Editor Mysore Economic Journal Bangalore*

NEW EDITION

BANGALORE

PRINTED AT THE GOVERNMENT PRESS

1980

P R E F A C E

This volume, which forms Volume V of the *Mysore Gazetteer* is, as its name indicates, devoted to *Gazetteer* proper of the State. It contains accounts of each of the Eight Districts forming it. Many Officers and Departmental heads helped in providing the necessary material or in revising the drafts of the several sections sent to them. Special acknowledgments are due to the following — The late Mr B Venkaba Rao, B.A. Deputy Commissioner, Bangalore District, Mr A. V. Ramasathan, B.A., Deputy Commissioner, Mysore District. Mr A K Syed Taj Peeran, B.A., Deputy Commissioner, Kolar District, Mr K. V. Anantaraman B.A., Deputy Commissioner, Tumkur District, S Venkatarangam B.A. Deputy Commissioner, Hassan District. Mr B T Kesaviengar, B.A. Deputy Commissioner, Shimoga District, Mr H V Ramaswami, M.A., B.L. Deputy Commissioner, Kadur District. Mr D Srinivasa Iyengar, B.A. Deputy Commissioner Chitaldrug District. Mr P H Krishna Rao M.A., Personal Assistant to the Deputy Commissioner, Mysore District, Mr A M Sen, M.Sc. M.I.M.E. F.G.S., Deputy Director, Department of Geology and Mines. Dr L. C. Coleman M.A. Ph.D. Director of Agriculture, Mr C Seabachar, M.A., Meteorological Reporter to Government, Mr John Bhare, A.M.I.C.E., Chief Engineer and Secretary to Government in the Public Works Department, Mr P G D Souza Revenue Commissioner in Mysore, Mr K Matthan, B.A., formerly Director of Public Instruction in Mysore and now Member of Council. Mr A Srinivasaraghavachar, B.A., B.L. Registrar Chief Court of Mysore. C Ranganatha Rao Sahob, B.A., B.L., Director of Industries and Commerce, ~~N. Madhava Rao, B.A., Chief Secretary to Government.~~ Mr D Srinivasa Rao B.A., Superintendent, Revenue Survey and Settlement. Mr B V Ramalingar, Chief Conservator of Forests in Mysore. Dr B Mahamed Usman, L.M.S., Senior Surgeon and Sanitary Commissioner in Mysore. Mr T Govindh Rao Commissioner Bangalore City Municipality. Khan Bahadur Mahomed Abbas Khan, President, Bangalore City Municipality. Mr C S Kappuswami Iyengar, President, City Municipality and

Chairman, City Improvement Trust Board, Mysore, and Mr M Venkatanaranappa, B A, General Manager, Mysore Iron Works, Bhadravati

I would take this opportunity, in this the final Volume of the *Gazetteer*, to express my indebtedness to Mr B. Puttaya, B A, Superintendent, Government Printing in Mysore, for the personal interest he has taken in putting the work through the Press and for his unfailing courtesy and goodwill in bringing it out I would also place on record the services rendered by Messrs. C Tirumala Rao, B A, B L., T R Bhimasena Rao, B A, C V Srinivasa Rao, and G V Rajaratnam, who have helped in the preparation of the Indices to the Volumes and in reading the proofs Mr S Nagappa, B A, of the Financial Secretariat, has cheerfully found time to assist in a variety of ways, especially in picking up material buried in Blue-Books, Reports and Government Proceedings and has rendered my work less laborious than it might well have been but for his timely and valuable aid His trained abilities and desire to make himself useful in every way possible deserve commendation Mr Murti Rao, F S S, of the Office of the Director of Public Instruction in Mysore, has rendered material service in the preparation of certain statistical data To both of these and to Messrs B V Narayanan, S Krishnappa and C Vasudeva Rao, Steno-Typists, who have been unsparing in their labours, I would here tender my cordial thanks for the willing and efficient manner in which they have discharged their respective duties

It might be added that in accordance with the instructions issued by Government since the printing of Volume I of this work, the contents of this Volume have been issued as Volume V instead of in two Volumes Vols V and VI, as originally proposed

A general map of Mysore, for use in connection with this work, will be found at the end of this Volume It has been specially prepared by the Director, Survey of India, Map Department, at the instance of the Government

BANGALORE,
6th September 1928

BANGALORE DISTRICT

SECTION I—DESCRIPTIVE.

SITUATION AREA AND BOUNDARIES

The District is situated in the south-eastern portion of the State, between 12° — $15'$ and 13° — $30'$ north latitude and 77° — $4'$ and 77° — $59'$ east longitude. Its greatest length from north to south is 85 miles and the greatest breadth from east to west is 60 miles.

The area is 3,069 square miles, of which 1,360 square miles are available for cultivation and 833 square miles are unculturable waste.

It is bounded on the north-east by the Kolar District, on the north west by the Tumkur District, on the south west by the Mysore District and on the south-east by the Salem District of the Madras Presidency, and for 10 miles on the south the river Cauvery separates it from the Coimbatore District of that Presidency, narrowing at one point to what is called the *mēke-dātu* or goat's leap.

PHYSICAL ASPECTS

(a) General
Description
of the
Country

The main portion of the District consists of the valley of the Arkāvati, with the Cauvery flowing at its southern base. The eastern portion includes the upper basin of the Southern Pinākini or Pennār, the western a small part of that of the Shimsha. A line drawn north and south from Nandidroog to the west of Bangalore and thence to Anekal would run along the highest part of the ridge of land which separates the Arkāvati valley from that of the South Pinākini. The elevation of this rising ground at Bangalore, one of the highest parts of the Mysore table-land, is 3,050 feet above the level of the sea, measured at the base of the Resident's flagstaff. At the *mantapam* or watch-tower on the Oyālī-dinnē, two miles to the north of Bangalore, which is the highest point, the elevation is 3,118 feet at the base of the Observatory.

Parallel with this water-shed, which forms the eastern boundary of the Cauvery system in Mysore, is a broken chain of rocky hills, extending from the west of the Nelamangala Taluk, through the Taluks of Magadi, Channapatna and Kankanhalli and occasionally rising into lofty mountain peaks, such as Sivaganga and Savandrug. Beyond this western belt, the surface waters coming from the west of Magadi run southwards into the Shimsha.

The central, northern and eastern portions of the District are open and undulating. The upland tracts are often covered with low scrub jungle, while the low-lying grounds are occupied with a series of tanks for cultivation, formed by embanking the streams of the valleys, and varying in size from small ponds to considerable lakes. Westward the country is broken and rugged, being composed of a succession of hills and valleys intersected by rocks and sandy streams having a great fall. In the south, where the general level of the land declines towards the Cauvery, the hills are closer together and surrounded with thick jungle.

(b) Heights
of Principal
Mountains
and Hills

The following heights above the level of the sea serve to show the general elevation of the upper plain surface.—In

the centre, Bangalore High Ground 3067 feet, Sonipur in the west, 3,088 feet, Betta Halur in the north 2991 feet, Kadgodu in the east 2856 feet, and Kankanhalli in the south, 2,061 feet

GEOLOGY

The prevailing rock of the District is a light to dark grey or whitish biotite granitic gneiss, which varies considerably from place to place in texture, structure and appearance according to the fineness or coarseness of its constituent grains and the relative abundance or scarcity, and mode of disposition of the darker ferro-magnesian minerals.

The darker minerals, mostly biotite mica are generally arranged with a simple parallel orientation but in places these form into streaks or segregate into curly or whorled patches in a lighter siliceous ground giving rise to streaky curly and banded types. The gneissic complex has also portions of more uniform granitic texture which in the field appear to be a less modified uncrushed phase of the same rock. Owing to the difficulty experienced in establishing a satisfactory relationship among these several types they have to be grouped together into one series and distinguished from the granitic members of other series of earlier or later origin. These complex gneissic masses have been styled 'Peninsular Gneiss' by the Mysore Geological Survey, on the belief that the major portion of the gneissic complex of the Peninsular India consists of this series.

Bordering the western side of the District passing northwards from near Kankanhalli through Closepet and Magadi runs the band of an intrusive, coarse, grey, uniform or porphyritic granite (of Closepet granitic series) forming chains of rounded bosses of an altogether different topographic feature from that of the gently undulating surrounding gneissic plain.

The schists are not promiscuous in this District but small isolated stringers of a dark hornblende granulite with its contact modified phase of the secondary pale-green

pyroxene rock occur in some parts as near Talghatpur and elsewhere.

The only other rock of any considerable importance is the laterite which occurs in almost horizontal layers capping chiefly the underlying gneissic rocks, to the north of Hoskote

Among the dyke rocks, the dolerites crop out in different directions through the gneisses, forming distinct lines of dark boulders. They appear to be rather less in number in this district than elsewhere. A group of dykes of charnockite affinities and also some hornblendic dykes are found conspicuously to the north-west of Harohalli, Kankanhalli Taluk

Building Materials

The gneissic exposures at Sarakki and in the vicinities of Lal-Bagh (Bangalore) are yielding good slabs and size stones, the slabs from the former place being reputed to be of good quality. The rocks are generally quarried by Woddars to whom the ground is leased on annual contracts or for other short periods by the Deputy Commissioner

Road Metal

Broken pieces of granite, gneiss and sometimes laterite form the chief road metal

Mines and Minerals

The district has not produced minerals in any considerable quantity to be of sufficient commercial importance. Such of them as have been prospected or observed to occur are stated below —

(1) Asbestos

Thin veins of a white amphibole asbestos were opened out near Avilhalli (Bangalore) and were found to be of no extent. At Bidadri also some prospecting was done for this mineral with the result that the deposits were found to be very small in extent. Only 17 tons had been extracted without any export

(2) Clay

The tank silts form the chief source of the potters' clay. Of better grade varieties, kaolin is found to some extent near Hoskote, Dodballapur, Golhalli and other places. The

kaolin which is at present being removed from near Tinalu (Hoskote Taluk) by the Kolar Brick Making Company appears to be found suitable for the manufacture of fire bricks. The City Brick and Tile Works Bangalore had been working for kaolin near Balagere (Nelamangala Taluk) and using the material for fire bricks. Kaolin obtained from Golhalli has also been used for the manufacture of fire bricks etc. in the works of Messrs. V. Manickavelu Mudaliar & Son at Bangalore.

Nodular concretions of lime bankar are found as secondary (ii) bankar products in many places in the gneissic region.

This mineral has been observed to occur in small quantities (iv) Graphite as crystalline flakes evenly disseminated in a quartzitic rock near Chick Banavar and Golhalli.

Small crystals of garnets are found to some extent near (v) Garnets Salhuns and Marulwadi, Hankanahalli Taluk.

Of the rare minerals a small quantity of Monazite in crystalline form has been found in a pegmatite near Yediyur—south of Bangalore. A small trial pit put at the instance of the Mysore Economic Conference authorities during 1917 showed the material to be of very small extent. Besides the amount of Thorium which this mineral contains is only about 2½ per cent whereas the deposits at Travancore are reported to contain from 6 to 10 per cent of Thorium. (vi) Monazite

BOTANY

The earliest accounts describe the district as covered with forest, forming a part of the great Dandakaranya. The distinctive names have been preserved of some of the wooded tracts, such as the Chandanaranya (sandal forest) on the Arkavati near Nelamangala, the Ganjaranya (forest of the *abrus precatorius*) around Sivaganga, the Kunderanya (jasmin forest) at Devanhalli, etc. Forest (a) Vegetation

The following trees and plants enumerated as growing in these woods may be taken to represent the indigenous vegetation —

San-skrit	Botanical Name	English	Kannada
Amalaka	Phyllanthus emblica	Emblie myro-bolan	Nelli
Amara, chuta	Mangifera indica	Mango	Māvinamara
Ankotha	Alangium hexapetalum		Udaginagida
Asoka	Uvaria longifolia	Asoka	Asōka
Asvatha, pip-pala	Ficus religiosa	Sacred fig	Arahi mara
Badari	Zizyphus jujuba	Jujube-tree	Yagachi
Bilva	Oegle marmelos	Bael-tree	Bilpatre mara
Champaka	Michelia champaca	Champac	Sampige
Chandana	Santalum album	Sandal	Gandada mara
Rakta chandana Hemaksha	Pterocarpus santalinus	Red sandal	Agaru
Jaji, malati	Jasminum grandiflorum	Large-flowered jasmin	Malhge
Jambira	Citrus bergamia	Lime	Nimbe mara
Jambu	Eugenia jambolana		Nerale mara
Kadali	Musa paradisiaca	Plantain	Bāle gida
Kapitta	Feronia elephantum	Wood apple	Byāladamara
Kapota			
Karanja, tamala	Pongamia glabra	Indian beech	Honge
Karaviraka	Nerium odorum	Oleander	Kanigilu
Ketaki	Pandanus odoratissimus	Fragrant screw-pine	Ketaki
Khadira	Acacia catechu		Tāte
Kharyura	Phoenix sylvestris	Wild date	Ichalu
Kovidara	Bauhinia variegata	Mountain ebony	
Krishnagara			
Kunda	Jasminum hirsutum	Bearded jasmin	Malhge
Kuranta	Amarantus	Yellow amarant	Goranti
Kutaja	Datura	Thorn apple	Datturigida
Langali	Gloriosa superba	Wild aconite	
Lodhra	Simplicococ racemosa		
Madhavi	Goertnera racemosa		Gulagunji
Madhuka	Bassia latifolia	Mahwah	Ippe
Malhika	Jasminum sambac	Jasmin	Malhge
Mandara			
Manjula			
Nagu	Cyperus pectinatus		
Punnaga	Rottleria tinctoria		Rangamāh
Naga kesara,	Mesua ferrea		Kesara
Gajaphaba			

is also hilly. The remaining taluks north and east are fairly wooded with trees in the long and hollow valleys of the downs. The most common is the honge (*pongamia glabra*), a valuable tree which fringes many tank bunds and often grows to a large size. Oil is extracted from the seeds and the leaves are used as manure for sugar-cane. Acacias grow freely, and chennuge (*lagerstroemia parviflora*) and huluve are frequent. There is much scrub jungle around Ujanibetta and along the western border of the Dodballapur and Nelmangala taluks.

The different kinds of ficus, the mango, tamarind, mohwah or ippe, jack and jāmūn or nerale, all grow well, together with many varieties of acacia, the wood-apple, bael-tree and some bamboo. The sandal grows in Bangalore, Kankanhalli, Magadi and Channapatna taluks.

Among shrubs and useful bushes are the kakke (*cassia fistula*), tangadi (*cassia auriculata*) and kusambe (*carthamus tinctorius*), also the wild date (*phoenix sylvestris*), which yields toddy.

The area of the State Forest in this District is 392 square miles. The forest plantations are 14 square miles in extent and those of the Revenue Department 5 square miles. Plantations yield fuel, sandal and grass.

(b) Arboriculture
(1) Plantations

Good many plantations, specially casuarina, are springing up in the District, more especially round about Bangalore, owing to the increased demand for fuel and the easy mode of rearing this species. The growth of industries in the City and Cantonment limits and the difficulty of getting foreign coal seem to have given a stimulus in this direction, so much so, that people prefer to grow fuel rather than dry crops on the dry land.

(11) Avenues.

There are about 159,487 trees in the District planted alongside the roads and they chiefly consist of mango, nerale, figs, honne and hunse. Special care is bestowed on the maintenance of avenue trees.

Groves of trees called *topes* are numerous. They are (iii) *Topes* planted near wells or tanks as works of merit for the shelter of travellers. The mango and the ippe appear to be preferred for the purpose in this District. The former is an umbra-geous and handsome tree of symmetrical form and grows well.

These have been introduced into the station of Bangalore (iv) *Orna-mental trees* in great variety. The poinciana regia or 'flame of the forest,' with its splendid scarlet blossoms has become quite common. The *spathodea* with a still more gorgeous flower of deep orange tint is also met with on all sides. Numerous coniferous trees have been cultivated with success including *amucaria* and other varieties of pine. The Java fig a graceful and fast-growing tree with glossy and delicate foliage, has been much planted in gardens as well as the Moreton Bay chestnut and the *grevillea robusta*. Many of these trees also find their way into the taluk stations and into compounds of the dawk bungalows.

Hedges consisting of the thorny *sige laya* or soap nut exist (v) *Hedges* round many villages forming an impenetrable thicket originally designed as a defence. Such an enclosure formerly surrounded the town of Bangalore. But hedgerows between the fields are very unusual. The alor and the kalli or milk hedge (*euphorbia tirucalli*) are most commonly used as fences by farmers with the lakkili (*euter negundo*) and the kadu haralu (*gatropha currus*). The *lantana* however bids fair to supersede every other hedge plant on account of its easy propagation. Unless frequently trimmed it has a tendency to become rank and spreads itself with wonderful rapidity choking other vegetation. It has spread almost all over the State. The growth has become so menacing that it has necessitated the organization of a campaign for its destruction. The Revenue Department is entrusted with the work of weeding out this plant, as it is found to seriously impair the health of the locality and diminish the productive area.

(c) Crops
(1) Dry
crops

The principal cultivation consists of dry crops, among which the most prominent is ragi (*eleusine corocana*), the staple food of the people. Avare or cow-pea (*dolichoe lablab*) is sown in lines with the ragi, and is the pulse most frequently eaten with it. Jola or millet (*soyghum vulgare*), also sown with the ragi, is in this District only used as fodder for cattle. Horse-gram (*dolichos biflorus*) is largely grown in the poorer soils, and as a substitute when ragi fails. It is the general food for cattle, and is also used as a pulse for human food. Various oil-seeds are also raised to a considerable extent, such as *wollellu* and *huchellu* (two kinds of sesamum), and *haralu* (castor-oil). Mulberry is cultivated for the support of silk-worms, which forms an important branch of industry among the Muhammadans. At one time it showed signs of decay owing to the losses arising from continued mortality among the insects, but it has now revived. Recent experiments have shown that the Bangalore District has a soil and climate suited for the silk industry. The Government have, therefore, formed a separate Department for improving this industry. In several parts of the District, silkworms are being reared. Consequently, mulberry cultivation is becoming popular. This cultivation is chiefly carried on in the taluks of Chennapatna, Hoskote and Closepet, about half the total area cropped in this District being in Chennapatna taluk.

(11) Wet
crops

Paddy cultivation in the Bangalore District, (Mr Ricketts has remarked), is for the most part uncared for by the raiyats whereas much attention is paid to dry crops, which yield in abundance, and also provide for the greater part of the year the necessary fodder for cattle. Excepting at wells and under very large tanks, he is inclined to think that in Bangalore where there are no canals, the wet crops are more uncertain than the dry. A species of blight often attacks paddy crops. The *batāy* system, too, may have originally led to the raiyat's not caring to labour for the benefit of the Government, and thus to expending all his manure and most

of his labour on his dry crops. One exception (he adds) must be made as regards wet cultivation and that is concerning sugar-cane. This product is highly manured and cared for and yields considerable profits. But sugar-cane is seldom planted in places where a failure of tank water cannot be supplemented by irrigation from wells.

From the figures for the two years 1891 and 1923 viz. 49,419 and 37,381 acres respectively it will appear that paddy cultivation has not expanded in the district during the long interval of 30 years. This may partly be due to the peculiar fitness of the soil for dry crops than for wet

The following is a list of the principal crops in the District — (iii) Their principal varieties.

Name of the Crop	Extent cropped in 1923 (in acres)
Ragi	4,50,56
Paddy	44,501
Cambu or bajra	11,038
Cholam or jawar	995
Horre-grain	64,234
Cow pea	5,024
Oil-seeds	28,320
Sugar-cane	3,987
Condiments and Spices	2,854
Tobacco	457
Betel	1,408
Fodder crops	16,500

Besides the productions of the country named above (iv) Garden Produce vegetables and fruits are raised in large quantities and great variety for the European markets at Bangalore and Madras. Among the former are included potatoes, cauliflowers, peas, asparagus, artichokes, French beans, knolkohl, cabbage and lettuce; among the latter apples, peaches, grapes, mangoes, strawberries, figs, guavas, loquats, raspberries and plantains. The foreign kinds are grown principally in the Bangalore and Devanahalli taluks.

The following statement shows approximately the area under fruit cultivation in the District .—

Name of the Taluk	Acreage of gardens	Mango	Apple	Orange	Lime
1	2	3	4	5	6
1 Bangalore	3,896 13	1,819 98	421 79	12 10	9 50
2 Hoskote	117 17	73 52	.	13	86
3 Devanhalli	467 00	243 75			
4 Doddballapur	297 23	15 28	20	26	89
5 Nelamangala	1 409 50	252 30	30	38	33
6 Magadi	940 16	29 42		87	62
7 Chennapatna	273 62	240 82		20	60
8 Closepet (sub-taluk)	129 90	38 47		43	70
9 Kankanhalli	845 30	45 50		83	28
10 Anekal	551 55	168 37	4 51	3 93	3 30

Name of the Taluk	Guava	Plantain	Poma-granates	Miscellaneous	Calculated acreage
	7	8	9	10	11
1 Bangalore	38 40	66 93	18 20	123 40	2,509 67
2 Hoskote	4 88	13 36		58	93 33
3 Devanhalli		23 16		69	267 60
4 Doddballapur	65	62 80	80	4 72	84 70
5 Nelamangala	45	18 15	70	2 78	344 22
6 Magadi	51	139 85	40	8 61	179 02
7 Chennapatna	1 20	82 77		4 30	329 17
8 Closepet (sub-taluk)		9 42		48	48 87
9 Kankanhalli	13	17 61	10	9 49	73 40
10 Anekal	11	48 37	17	4 26	232 75

(d) Horticulture

Horticulture received much impetus after the establishment of the Agri-Horticultural Society at Bangalore in 1839, but more especially, when that had ceased to exist, by the formation of the Lal-Bagh as horticultural and botanical gardens in 1856. A profitable means of livelihood was thus opened to local gardeners, some of whom have set up as florists and seedsmen, replenishing their stocks direct from England

Owing to the profusion of beautiful plants that may with care be successfully cultivated here much taste has been exhibited in the laying out and adornment of gardens both public and private. Of roses alone upwards of 258 varieties have been established, of ferns more than 160 kinds of crotons, 122, of ornamental flowering shrubs brilliant foliage plants, gay annuals and gorgeous blossomed creepers and orchids, an endless number. There is reason to believe that hybridising and cross breeding, which have produced such wonderful results in Europe, might be carried out with great success here.

The remarkable adaptation of the climate to the out-door cultivation of plants from different parts of the world will be seen from the following list of some growing in the Lal Bagh without any protection whatever —

From S America	<i>Achras sapota</i> <i>eucharis grandiflora</i> <i>allamanda grandiflora</i>
, N America	<i>Magnolia grandiflora</i> <i>quercus rubra</i> , <i>phlox paniculata</i>
Cape of Good Hope	<i>Agapanthus</i> <i>billatus</i> , <i>melanthus major</i> <i>gazonia splendens</i>
South Sea Islands	<i>Acalypha tricolor</i> <i>crotons</i> .
Australia	<i>Castanospermum australe</i> also <i>phila latebroza</i> <i>cocoloba plotyclada</i>
China	<i>Cupressus loneybris</i> <i>farfugium grande</i> , <i>alternanthera versalis</i>
G Britain	<i>Anagallis carrulea</i> , <i>viola odorata</i> <i>myosotis arvensis</i>
, Mexico	<i>Fuchsia fulgens</i> <i>ageratum mexicanum</i> <i>agave americana</i>

These plants, which in their natural habitats are found at various elevations, are all growing luxuriantly here in the same soil and under the same exposure as the tropical plants of India.

FAUNA

Wild
mals

Early legends tenant the ancient forests which covered the District with the following wild animals — *simha*, the lion, *sārdūla*, the tiger; *harina*, the deer, *kapi*, the monkey; *bhallūka*, the bear, *kunṅara*, the elephant, *srīgāla*, the jackal, *mahisha*, the buffalo, *bīdāla*, the cat, *chāmara*, the yak, or perhaps the bison. The lion, it is needless to say, no longer ranges the forest, nor are the elephant, bison, and wild buffalo now to be met with, though the first is said to appear occasionally in the south of the Kankanhalli taluk. But to the remainder on the list may be added the cheetah or panther, the wild hog, and the porcupine. The larger game, which is not plentiful, is mostly confined to the Magadi, Kankanhalli and Closepet taluks. Of the smaller animals, field-rats are very numerous. The bandicoot, or large pig-rat, infests stables and the neighbourhood of manure pits.

Birds

Jungle fowl, pea-fowl and spur fowl are met with in the woods, bustard, floriken, partridge, quail, rock-pigeon in the open country, snipe, teal and wild duck in the tanks and paddy fields. Birds of bright plumage wing their way in every direction, but none that are not common to the country generally.

Fish

The *Bestas* or fishermen are acquainted with the following species of fresh-water fish, caught by them in their nets — *Bāle-mīnu* (*sparus spilatus*) *āvu mīnu*, *korama*, *kuchchu mīnu*, *āne mīnu*, *marali mīnu*, *gende mīnu*, *gualu mīnu*, *god-dale mīnu*, *pakke mīnu*, *shigadi mīnu*, *handi gorava*, *sūle sasile*, *yemmechelu mīnu*, *malagu mīnu*, *hū mīnu*, *murave*, *domme*, *voniketatte mīnu*, *nāyi chelu*, *kallu korava*. Those brought to market at Bangalore are principally obtained in the Dharmām-budhi and Kempāmbudhi tanks at Bangalore, the Jigani, Hoskote, Bellandur, Vartur, Talhikere, Anekal, Nelamangala, and Hullur tanks.

These consist principally of horses, cows, bullocks, buffaloes (11) Domestic Animals sheep, goats, asses and pigs, dogs and cats. The following figures for 1922-23 show approximately the extent of the agricultural live stock of the District —bullocks 179,732, cows, 283,392, Buffaloes, 61,354, young stock 155,145 sheep, 264,726, goat, 228,334, horses and ponies 4,082, mules and donkeys, 12,530, and camels, 2. Elephants and camels were formerly kept by the Commissariat Department. The last named are said not to thrive here, and only mules are now kept for transport.

Some horses are bred by the Silahdars from country mares and English, Arab or Australian stallions imported for the purpose by Government. Excellent horses are sometimes reared but the want of good pasture prevents horse breeding on an extensive scale. The market however is well supplied annually by dealers, with horses and ponies from Arabia, Persia, Afghanistan and Dharwar. The more powerful Australian horses imported to Madras have, among Europeans, nearly superseded all others for carriage use and to a great extent for riding. The average prices of the various descriptions of horses are —For Arabs and Australians Rs. 1,000 and upwards. Persians and Gulf Arabs from Rs. 500. Afghan, from Rs. 400. Dharwar and Mahratta ponies from Rs. 200 but the demands of polo have sent up the prices of good ponies to high figures.

Bullocks of excellent breed are plentiful. With the exception of a few buffaloes they are the only animals used for agricultural labour. An average pair of bullocks will plough two acres of unirrigated land a day. They are fed chiefly on ragi straw, ballar or avare (cow pea) and the residue of the threshings of dry crops. The price of an ordinary pair of plough bullocks varies from Rs. 30 to 50 and more, but draught bullocks of a superior kind fit for carriage or dawk purposes cost from Rs. 70 to 200 and more. With a light carriage they are capable of trotting

the usual stage of six miles in an hour. Bullocks employed for this purpose generally have a feed of boiled horse-gram in the evening. The raiyats about Bangalore are very fond of rearing bulls. These are bought as calves from dealers, and, being well fed and cared for, are subsequently resold, at considerable profit, to the raiyats of other parts who have not the same favourable opportunities as regards climate and grazing for bringing up good cattle. The principal cattle fairs in the District are held in connection with the Ghāṭī Subrahmanya festival in Dodballapur taluk in December, the Madduramma *parishe* at Huskur (Anekal taluk) in March, and the Gangādēvi *parishe* at Nallur (Hoskote taluk) in October.

Cows

The common village cows are very inferior animals, owing to the want of proper care and attention. They subsist entirely on the waste lands about the villages and on the stubble-grazing after harvest. Very good cows are reared in Bangalore, where they sell for from Rs 40 to 80 apiece. They are fed on green fodder, ragi straw, and the husks of *avare*, and should yield from three to five quarts a day when in full milk. Dairy farming on any scale is carried on only in Bangalore, and perhaps to a small extent at Whitefield.

Cattle-shows were held for some years by Government, at which liberal prizes were given, with the view of promoting an improvement in the breed of domestic cattle. Breeding bulls from the Amrut Mahal have also been stationed at favourable places.

Sheep and Goats

Sheep and goats thrive well. The wool of the former, however, is of a coarse description, and used only for the manufacture of country blankets and horse-rugs. An account will be found elsewhere of the experimental sheep farm formerly maintained by Government, and the steps since taken to improve the breed. The quality of the mutton sold in Bangalore has been greatly improved by means of prizes offered by the Municipality at the new market.

There is as much room for improvement in regard to the Poultry rearing of poultry as there is in regard to dairy produce generally. The dunghill and the streets are the principal run of the fowls. The great demand which exists for eggs and poultry has resulted in establishing prices which would probably well remunerate any one engaging in this business. Amateur poultry yards are often kept in Bangalore in which the best laying and fattening foreign breeds, such as Dorkings, Brahmas, Spanish, etc., are successfully reared, in addition to Guinea fowl, turkeys, geese, and ducks. Some of the settlers in Whitefield have also taken up poultry farming. Game cocks are kept by many classes for fighting purposes and for the same object fighting quails are kept by Muham madans.

CLIMATE AND RAINFALL

The climate is very agreeable as the mean temperature (a) Climate. in the warmest month is $81^{\circ} 5$ and $69^{\circ} 0$ in the coldest month. The temperature during day rarely exceeds 100° during the hottest part of the year and the thermometer has fallen below 50° only on a few winter nights. The atmosphere is neither very humid nor very dry, the mean value of the relative humidity in the wettest and driest months being respectively 86 and 63 per cent.

The mean maximum temperature for the warmest month, viz. April, is $93^{\circ} 6$ and the highest temperature on record is $101^{\circ} 1$ registered on the 29th April 1924. For the past 31 years the thermometer recorded temperatures over 100° only on 5 days. January and December are the coldest months in the year, the mean minimum temperature for these months being respectively $58^{\circ} 1$ and $58^{\circ} 5$. Since 1893 the minimum temperature was below 50° only on four nights and the lowest temperature was $48^{\circ} 7$ recorded on the 11th December 1895. The diurnal range of temperature, i.e., the difference between the maximum and minimum temperatures recorded on any day is greatest in the month of March and least in July. The

(b) Temperature.

diurnal range has been as high as 36° while the highest monthly and annual ranges on record are respectively $42^{\circ}8$ and $50^{\circ}3$. The following is a summary of mean values of meteorological records obtained at the Central Observatory, Bangalore, since 1893.—

Month	Pressure in inches at 8 A M Read to 32° Fahrenheit	Temperature in day, Fahrenheit					
		Maximum	Minimum	Mean	Range	In sun	On grass
1	2	3	4	5	6	7	8
January	27 038	81 7	58 1	69 9	23 6	136 1	54 6

Year	4	356	28	6.06	26	61

The mean annual rainfall for the District is 30.95 inches (c) Rainfall spread over 50 days and over half the annual average falls in the months of August, September and October, from December to March little or no rain is gauged, the total for these months being only 1.09 inches. The driest parts of the District are those about Sarjapur, Sasalu and Hessar ghatta the average rainfall for these stations being only 25 inches, the region about Bangalore Anekal and Channapatna is the wettest and receives on an average 35 inches. The heaviest fall recorded on a single day was 8.84 inches gauged at Kankanahalli on the 22nd September 1897. During the past 31 years the deficit in the annual rainfall was 30 per cent only once and it was over 15 per cent in 6 years. Generally the showers fall in the afternoon and evening, and rainy mornings are very few. The following table gives the mean monthly and annual rainfall of the various rain gauge stations in the District. The number of years for which the means are found is also shown in the table.

The following table shows the extreme values of meteorological records obtained at the Central Observatory, Bangalore, since 1893.—

(d) Rainfall
at Bangalore

In the following table is given the annual rainfall at Bangalore from 1837 to 1924. It will be seen that the worst years on record are 1838 and 1876, during recent years, 1913 was a very dry year, the annual total being as low as 21.43 inches. The wettest year was 1874 when 56.65 inches were recorded and the annual total was over 50 inches in 5 years. The annual rainfall at Bangalore was below the normal in 46 out of 88 years —

Year	Inches	Year	Inches	Year	Inches
1837	44 30	1867	33 04	1897	41 82
1838	16 00	1868	39 37	1898	31 46

1863	36 01	1893	36 93	1923	26 73
1864	33 62	1894	32 21	1924	27 04
1865	36 02	1895	35 99		
1866	33 50	1896	28 38		

THE PEOPLE

(a) Distribu-
tion
(1) Number

The population of the District, according to the Census of 1921, was 788,379 (excluding the Bangalore City and the Civil and Military Station, Bangalore) of which 399,872 were males and 388,507 females.

The number of persons to the square mile was 257, a higher rate than that of any other District in the State. Individual taluks show a much higher rate. The most thickly populated taluks at the time of the Census were Bangalore, Anekal, Channapatna including Clorepet Sub Taluk where the rates were 329, 312 and 295 respectively. The most sparsely populated was the Kankanhalli taluk with only 167.

The following table compares the population of the District from 1871 to 1921 during the different Census periods —

(2) Density
(3) Inter
censal varia-
tions.

Taluk	1871	1881	1891	1901	1911	1921
Anekal	55,824	44,423	54,834	60,071	58,096	59,348
Bangalore	100,229	85,825	101,708	117,285	110,836	123,517
Channapatna	81,601	54,035	62,541	71,872	70,831	83,431
Clorepet (Sub-Taluk.)	47,703	33,300	38,720	42,755	45,438	50,294
Devanhalli	50,264	42,989	52,258	59,005	62,632	60,000
Dodballapur	70,671	46,616	59,455	67,059	73,833	74,619
Hoskote	65,771	51,982	60,738	73,083	78,690	78,272
Kankanhalli	84,551	65,373	71,860	83,577	98,024	104,303
Magadi	86,027	50,177	64,181	75,986	83,415	86,402
Nelsmangala	69,045	46,484	58,242	66,434	68,727	70,284
District Total	697,690	521,203	622,545	719,024	759,522	788,379
Bangalore City	60,703	62,317	80,285	70,640	88,651	118,556

Taking the total figures of the several periods for the District into consideration, we find that there has been a sudden fall in the population between the two Census years 1871 and 1881. This is explained by the fact that the great famine of 1877-78 crippled the growth of population. The population steadily increased thereafter. The City population which does not share the decrease noticed above suffered during the interval between the two Census years 1891 and 1901, the population having come down from 80,285 to 70,640. This decrease was due to the prevalence of plague which seems to have levied a heavier toll on the City than

(d) Rainfall
at Bangalore

In the following table is given the annual rainfall at Bangalore from 1837 to 1924. It will be seen that the worst years on record are 1838 and 1876; during recent years, 1913 was a very dry year, the annual total being as low as 21·43 inches. The wettest year was 1874 when 56·65 inches were recorded and the annual total was over 50 inches in 5 years. The annual rainfall at Bangalore was below the normal in 46 out of 88 years —

Year	Inches	Year	Inches	Year	Inches
1837	44 30	1867	33 04	1897	41 82

THE PEOPLE

(a) Distribu-
tion
(1) Number

The population of the District, according to the Census of 1921, was 788,379 (excluding the Bangalore City and the Civil and Military Station, Bangalore) of which 399,872 were males and 388,507 females.

The number of persons to the square mile was 257 a higher rate than that of any other District in the State Individual taluks show a much higher rate The most thickly populated taluk at the time of the Census were Bangalore, Anekal Channarayana including Clovepet Sub-Taluk where the rates were 329, 312 and 295 respectively The most sparsely populated was the Kankanhalli taluk with only 167

The following table compares the population of the District from 1871 to 1921 during the different Census periods —

(2) Density
(3) Inter
censal varia
tions

Taluk	1871	1881	1891	1901	1911	1921
Anekal	55,524	44,423	64,434	60,071	78,090	59,348
Bangalore	100,420	65,825	101,704	117,765	110,830	123,517
Channarayana	61,601	54,005	67,511	71,872	80,821	83,431
Clovepet (Sub Taluk)	47,703	33,399	36,720	47,755	45,438	50,794
Devanahalli	50,761	42,040	52,258	59,005	62,632	60,009
Dodballapur	70,671	46,616	59,455	67,040	73,433	74,619
Hoskote	65,771	51,982	60,738	73,053	75,690	75,272
Kankanhalli	84,551	61,323	71,969	83,677	98,074	104,303
Magadi	86,027	50,177	64,181	76,086	83,418	80,402
Nelamangala	69,015	46,404	58,742	66,451	68,727	70,284
District Total	697,690	521,203	622,645	719,074	750,522	788,379
Bangalore City	60,703	62,317	60,265	70,640	88,651	118,556

Taking the total figures of the several periods for the District into consideration we find that there has been a sudden fall in the population between the two Census years 1871 and 1881 This is explained by the fact that the great famine of 1877-78 crippled the growth of population The population steadily increased thereafter The City population which does not share the decrease noticed above, suffered during the interval between the two Census years 1891 and 1901 the population having come down from 80,285 to 70,640 This decrease was due to the prevalence of plague which seems to have levied a heavier toll on the City than

on the rural area, in the beginning of its history The opening out of the congested portions of the old City, the formation of extensions and the sanitary measures adopted on a wider scale seem to have minimised the scope for working havoc on the population with the result that the increase in the City has gone on steadily as may be seen from the recent Census figures Were it not for the ravage of the recent influenza, the District and City population would have been much more than what it is at present

(4) By Religion

The numbers professing each of the principal forms of faith are as follows —

Religion	Above 15		Under 15		Total	Percentage
	Males	Females	Males	Females		
Hindus	226,077	216,759	138,626	139,683	721,145	91 47
Mahomedans	15,521	13,543	11,378	10,611	51,053	6 47
Jains	720	740	460	471	2,391	30
Christians	1,920	1,785	1,333	1,302	6,340	80
Animists	2,397	2,191	1,440	1,422	7,450	1 00
Total	246,635	235,018	153,237	153,439	788,379	

(b) Towns & Villages —
(1) Towns

The District contains 15 towns with a total population of 307,024 made up of 220,880 Hindus, 51,534 Mahomedans 32,109 Christians, 1,580 Jains and 921 others

The following are the names of the towns, with the population of each —

Bangalore Civil & Military Station	.	118,940
Bangalore City	.	118,556
Total		237,496
Channapatna	.	11,846
Dodballapur	..	7,588
Anekal	.	6,326
Kankanhalli	.	5,759
Closepet	.	5,552

Devanhalli	5 387
Magadi	5 132
Hoskote	1 532
Vadigenahalli	3 730
Tyamaragondlu	3 391
Nelamangala	3 351
Sargapura	2 039
Yelabanka	2 508
Sulibele	1 731

The following table gives details of villages by taluks in (2) Villages, two different ways —

Taluk	Populated		De-populated	Classified				Total
	Villages	Hamlets		Government	Private	Jail	Mayangutta	
Bangalore	440		43	318	8	110		925
Devanhalli	130	13		100	1	60	10	569
Anekal	205	54	25	171	34			480
Hoskote	315	53	124		108			736
Nelamangala	200		15	230	7	77		639
Kankanhalli	231		34	248	17			530
Magadi	733	447	33	254	1	55		1 127
Closet	118	40	0	7	3	0		181
Dodballapur	277	110	50	240		57		731
Channarayana	142	100	10	120	8	4		309
Total	2,032	842	472	1 603	187	377	10	6,325

The quinquennial return for 1921 shows that there were in the District (exclusive of Civil and Military Station of Bangalore) 587,961 oxen 91 002 buffaloes 630,296 sheep and goats, 4 001 pigs, 4 082 horses and ponies, 93 mules 12,439 donkeys 114 045 ploughs of which 112 082 were of old pattern and 1,963 of new pattern and 34 513 country carts. Compared with the stock of the District in past years it may be said to have nearly doubled

(c) Stock and Dwellings :—
(1) Agricultural Stock

The following statement gives particulars of the Agricultural Stock in the several taluks of the District as per Census of January 1921 —

Names of Taluks	Oxen			Buffaloes		
	Bulls	Bullocks	Cows	Young stock (Calves)	Male Buffaloes	Cow Buffaloes
1	2	3	4	5	6	7
Bangalore City	131	1,455	2,602	2,158	44	1,150
Bangalore	4,746	23,432	30,020	17,978	988	8,253

Total	93	12,43	2	117,062	1,063	118,045	34,513

The number of occupied houses in the District as per Census of 1921 was 178,775 of which 24,031 houses relate to the City. Compared with the number of occupied houses in 1891, viz. 141,232, it may be said that the rate of increase in the number of houses is more or less proportionate to the rate of increase in the growth of population for the same period. The number of residents per house according to the figures of 1891 is 5.61 while that of 1921 is 5.07. It may therefore be inferred that the housing conditions are generally improving.

In about 34 different places in the District, *Jātras* are held and at 18 of them cattle-shows are also conducted at that time. Over 5,000 people assemble at 8 of these *Jātras*. The more important of these are —

(1) Ghāṭi Subramanya (50,000) in Dodballapur Taluk.
 Dharmarāyanakaraga (20,000) in the Bangalore City,

(2) Festivals —
 (1) *Jātras*.

Ranganāthasvāmi Car Festival at Magadi (17,000), Karaga at Hoskote (8,000) and Bisalammana Jātra at Hunasamārahalli, Channapatna Taluk (15,000)

The following table gives particulars of the *jātras* in the District.—

Name of place	Name of <i>Jātra</i>	Time	Attendance at the <i>Jātra</i>	Cattle shows No of cattle exhibited
<i>Bangalore Taluk</i>				
Vasanthapur	Vasantha Vallabharāyasvāmi	Māgha Suddha Purnami.	500	10,000

Channapatna			

During the year 1922-23 the number of births in the District was 13,316 while the number of deaths was 11,623. The following table gives the particulars of births and deaths and the causes of death during the five years 1920-21 to 1924-25 —

(c) Vital Statistics and diseases.

Year	Births	Deaths	Causes		
			Hague	Cholera	Other diseases
1920-21	10,063	10,204	2,645	10	8,640
1921-22	11,751	9,021	467	2	9,452
1922-23	13,316	11,623	1,192	10	10,411
1923-24	13,201	12,466	1,369	17	10,980
1924-25	12,034	11,769	123	110	11,531

CASTES AND OCCUPATIONS

The castes or classes which number over 10,000 are the following in order of strength. These account for 687,842 or 80.97 per cent of the population —

(i) Castes.

1 Vakkaliga	255,773	8 Vodda	26,369
2. Holeya	81,179	9 Banajiga	20,608
3 Madiga	57,518	10 Brahmin	18,702
4 Mahomedan	51,003	11 Beda	18,578
5 Lingayet	41,155	12 Golla	18,368
6 Kuruba	39,273	13 Panchala	14,564
7 Tigala	31,644	14 Agasa	12,998

According to occupation or means of livelihood, the population in the District (excluding the Bangalore City) may be classified as follows —

(ii) Occupations.

Exploitation of earth	152,210
Extraction of minerals	3
Industrial occupation	15,647
Transport	1,32
Trade	11,431
Public Force	1,597
M. GR. VOL. V	8

Public administration	3,150
Professional and liberal arts	3,378
Persons living on their income	413
Domestic service	.	.	.	1,761
Insufficiently described occupation	1,478
Unproductive	3,045

CHRISTIAN MISSIONS

The Roman
Catholic
Mission

The following are the religious, educational and charitable institutions maintained by the Roman Catholic Mission in the District.—

Bangalore Cantonment, Blackpalli.

St Mary's (1882) Sub-stations Dobbspet, Punatcherry, etc Churches or chapels 5 Two boys' schools, 141 pupils Two girls' schools, 98 pupils Orphanage for non-caste Christian boys, 32 orphans

St John's Hill

St Francis Xavier Sub-stations Mestri-paham, Naganhalli, etc Churches or Chapels 12 Schools 4 for boys, 307 pupils, 1 for girls, 235 pupils Institute for Indian Christians. Society of St Vincent de Paul Indian Catholic Family Benefit Fund Temperance Society with 400 members

Within the Parish St Joseph's Convent and Institutions St Aloysius' School.

Shoolay

Sacred Heart (1895) Sub-stations Ulsoor, Guntroop, etc Churches or Chapels 7

St Patrick's Cathedral Rev A M Tabard, Parish Priest and Military Chaplain

Immaculate Conception Chapels 3 School 30 boys

The Wesleyan Mission carries on evangelistic and educational work in Bangalore City Closepet Channarayana Dodballapur and Tyamagondlu. The Wesleyan Collegiate High School has 900 pupils on its rolls and there are in addition 3 boys schools and 5 girls schools in the City one middle school in Closepet 3 schools in Channarayana and one in Tyamagondlu. The total number of pupils is 1400 boys and 700 girls. A Hostel of boarders is attached to the High School. The Mission also maintains in the Bangalore City a Girls Boarding School, a Women's Normal School and a Rescue Home.

The Wesleyan Mission

In the Civil and Military Station the Mission maintains 6 boys' schools with 740 scholars and 5 girls schools of which one is of High School grade with a total of 670 scholars.

The Wesleyan Mission maintains 2 English Churches and 3 Tamil Churches in the Civil and Military Station and one English Church near the City Railway Station. The Kanarese Christian community connected with the Wesleyan Mission worships in the Hudson Memorial Church Ulsoor Gate, Bangalore City.

The London Mission maintains in the Bangalore City a Collegiate High School for boys, a Girls High School an Incomplete Middle and two Primary Schools for Girls and a Boys Primary School.

The London Mission

In the District, the Mission Schools are distributed in the Anekal and Devanahalli taluks. In Anekal the Mission

maintains a Complete Middle and a Primary School for boys. Previous to the introduction of the new curriculum, the Mission School was the only school to teach English, but recently the Government has opened a Complete Middle School. In Dommasandra, there is a Mission Primary School for boys. Before the new curricula was introduced, this school passed students for the Lower Secondary Examinations both in English and Kannada.

In the Devanhalli taluk, the Mission Primary School in Vadagenahalli has 90 pupils on the roll and formerly sent a number of girls up for the Kannada Lower Secondary Examination. In Devanhalli, there is a Mission Panchama School of about 40 children.

SECTION II — HISTORY AND ARCHÆOLOGY

A. HISTORY.

Legendary
period

The earliest historical legends connected with the Bangalore District relate to Nandagudi in the Hoskote taluk, and to Mankunda near Channapatna in the taluk of that name, at both of which places there are signs of ancient remains. The first is said to have been the capital of *Uttunga Bhruja*, whose nephews, the Nanda Princes, being imprisoned by him, obtained their release and seized the kingdom through the machinations of a sage named Chāṇikya. Near where Malur now stands, a king named *Vijayapāla*, of the *Sōma Vamsa* or lunar line, is related to have established a city named *Makunda* or *Muganda* in the *Kṛta Yuga* or first age.

Although the name Nandagudi has evidently given rise to confusion between the origin of that place and the incidents of Chandragupta's usurpation of Nanda's empire as dramatised in the *Mudrā-rākṣasa*, yet the legends exhibit a close connection with the account of the rise of the Āndhra or Telugu kings known as the *Kākatīya* family. "The *Kākatēya* family," says Wilson, (*Mack. Coll. Introd* 74) "is deduced

from the Pandavas, and in general, the line proceeds direct from Janamējaya through Satanika to Kshemaka and his two sons, Vijayarka and Sōmēndra. Their sons, named severally Vishnuvardhana and *Uttunga Bhūja*, disagreeing, the latter quitted Upper India and settled to the south of the Gōdavari. His son Nanda, who founded the fort of Nandagiri married the daughter of the Chōla king by whom he had Vijayapala.

Another account by Taylor is as follows —“ The Lunar line is specified down to Kshemaka. From that line are deduced Vijayāditya and Sōmēndra. The son of the first was Vishnuvardhana, of the other the son was *Uttunga Bhūja*. These two latter divided the country between them. Vishnuvardhana settled at Dharmapuri (there is a village near Nandagudi named Dharmēsvara which professes to be of great antiquity) on the western bank of the Gōdavari river. Four hundred villages or towns became subject to him. His son was Nanda who built a town called Nandagiri, in which the four castes of Hindus were located. His minister was named Dandasasi Nāyaka. Nanda formed a marriage alliance with the daughter of a Chōla king at Conjeeveram, and, on returning equitably governed his kingdom. His son was *Vijayapāla*, who was munificent.”

The history from which the above is an extract assigns to *Vijayapāla* the date of about 400 A.D. and he may with some probability be taken as identical with the founder of Makunda whatever the truth may be as regards the origin of Nandagudi.

That Makunda was a place of considerable importance as Ganges early as the seventh century is beyond doubt from the fact that at that period Bhūvikrama and Sivamara, two sovereigns of the Ganga line, made it the royal residence. The whole of the district must have been included in the dominions of that Dynasty for some centuries before, for it formed part of the Gangavādi ninety six thousand. A sub-division called Chikka Gangavādi, or the Lesser Gangavadi occupied the

valley of the Shimsha, with Honganur (Channapatna taluk) as its chief town. The earliest Ganga grant found in the District is dated in the 29th year of Avinīta, *i e*, 430 A D. The first Ganga kings are represented as the conquerors of the Bāna-mandala. In the eighth century, Śrīpurusha made Manyapura (Manne in Nelamangala taluk) the royal residence during some part of his reign, and from the Chōla references to the place it must have been important long after. Śrīpurusha's grandson was Mārasimha, in whose name the Manne plates, which bear date 797 A D, were issued. In *Bangalore* 79, dated about 870 A D, Satyavākya II is mentioned. During his reign, the Nagattara chief is said to have fixed sluices to two tanks at Agara (near Bangalore East) and constructed a third. In *Bangalore* 83, dated about 890 A D, Ereyappa is referred to as ruling over the country. He killed the Nolamba king Mahēndra in battle and obtained the title of *Mahēndrāntaka*. He was the donor of the grant mentioned in the Begur stone inscription.

Pallavas

Pallava and Nolamba inscriptions are met with to the east, in Hoskote and Devanhalli taluks. Among the kings mentioned in them are Mahēndra, Ayyapa Dēva, Bīra Nolamba, and Iriva-Nolamba. The last of these was attacked, according to *Hoskote* 47, by the Chōla king. From *Hoskote* 111 dated in 997 A D, it is clear that the Chōla king Rājarāja-Dēva had superseded the Pallavas in the northern portion of Bangalore District. This is, perhaps, the earliest Chōla inscription in the State.

Rāshtrakūṭa

An inscription of the time of the Rāshtrakūṭa king Akāla-varsha occurs in Devanhalli taluk, and one or two in Hoskote taluk may belong to this line.

Chōlas

The traces of the Chōla conquest in the eleventh century are numerous in the western taluks. Their inscriptions are found especially in the vicinity of the Ganga city of Makunda, namely, at Malur, Kudalur and Malurpatna, the latter

indeed receiving the name of Nikarilichōlapura Rājendra Chōla, son of Rajaraja Dēva, effected the conquest of the south and east of Mysore, by about 1001 A.D. He captured Talkad, the Ganga capital and brought the Ganga power to an end. There are inscriptions of his reign and of his successors down to Kulōttunga Chōla II (Anekal 74 dated about 1200 A.D.) Magadi is said to have been founded by a Chōla king and names and inscriptions testify to their influence from there to Nelnmangala. In this latter taluk they make a boast of their conquest of Manakatakani said to be the Manne above mentioned. This part of the country seems to have been named by them the Vikrama chōlamandala. Chōla-Ganga, described as the great king of Orissa, is said in an inscription of the twelfth century to have been born in the Hejjaji Twelve of the Kadannur Seventy (Dodballapur taluk). To the east we have Chōla inscriptions in Hoskote taluk, which it would appear was included in the Kolar country designated the Nikarilichōla mandala.

Inscriptions of the Hoysala kings in all parts attest their Hoysalas. dominion over the District and to Virā Ballala probably the one who reigned from 1172 to 1219 A.D., is attributed the adventure which gave Bangalore its name as related in connection with that place. The story is however devoid of foundation, as Bangalore is mentioned in an inscription of much earlier date. Vishnuvardhana's first queen, Saatala Dēvi died at Sivaganga, which seems to have been a possession of her father's. In the thirteenth century, when the Hoysala territories were divided between Narasimha III and his brother or half brother Rāmanatha the latter had the northern parts of the District included in his possessions and held his court at Knadana in Devanballi taluk. *Kan* *kankhalli* 80 dated in 1205 A.D. informs us that Honganur (in the Channapatna taluk) was the capital of the Chikka Gangavādi province and the residence of a Hoysala governor. A number of inscriptions occur especially in the Yelahanka country of the last days of the Hoysalas, in the time of

Ballāla III, when he had his residence at Unnāmale (Tiruvannāmalai, Trinomalai, South Arcot) In one he is described as living at Virupākshipura, perhaps the one in Chānnapatna taluk (See Vol II) In 1301, Ballāla III remitted the taxes on all religious establishments in his new acquisitions among which figures Ilappāka-nād, the present Yelahanka and the country surrounding it, to the north of Bangalore

Yādavas

To the time of these Yādava kings, who were rivals of the Hoysalas, perhaps belongs the tradition of a city north of the village of Binnamangala in the Nelamangala taluk The *Sthala-purāna* of Stambhōdadhī (Kammasandra) contains at length an account of how, in the *Dvāpara Yuga* or second age, a prince named Sumatī, the son of Hēmachandra, king of Karnāta-dēsa, came by his father's command from the capital city of Yadu-patna, and, after a march of thirteen days, arrived at Dēvarāyadurga (Tumkur District), where he besieged a robber chief named Andhaka *alias* Lingaka for one year, and finally seized and put him to death with all his family and relations, and how he then established a city named *Bhūmandana*, on the site above described, and took up his residence there for the security of that part of his father's dominions This story may possibly relate to Rāmachandra, here corrupted into Hēmachandra Inscriptions found in the District, however, throw no light on this line of kings

anagar

Under the *Vijayanagar* sovereigns, who about 1336 A D became paramount in the south, arose the local rulers of greatest note in the modern annals of the District Several inscriptions of this dynasty found in the District testify to its firm hold on it One of the most notable is *Magadī* 18 which belongs to the reign of Bukka I dated in 1368 A.D. It is a copy of an inscription at *Sravana-Belgola*, recording the reconciliation effected by the king between the Jains and the Vaishnavas in his kingdom *Devanhalli* 81 dated in 1425 A.D refers to the grant of a village in the

Sivanasamudra śīme of the Yelahanka nad Part of the present Bangalore District was in those times and lang after known as Sivanasamudra śīme after Sivanasamudram, another name of Hessarghatta From *Dodballapur* 1 dated in 1510 A.D., the complete conquest of this part of the District may be inferred *Channapaṭṇa* 153 dated in 1523 A.D. records a grant by Krishna Raya, the son of Narasa to Vyasaśrīrtha, the founder of the Vyasa Raya Mutt *Nelamangala* 31 dated in 1533 A.D. in the reign of Achyuta Dēva Raya identifies Sivanasamudra *agrahāra* with Hessarghatta in the Yelahanka nad and states that a big tank was farmed there in the Arkavati river

It is related that about the end of the fourteenth century a party of travellers consisting of seven farmers with their families, halted at the foot of a hill named Ramasvami hetta to the east of Nandidurga From their having arrived in carts they were called the *bandi kāpalu* or cart raiyats which may either indicate that carts were an unusual sight or have been equivalent to "carriage people," denoting the possession of greater wealth than those among whom they came to settle. They were of Telugu origin and subsequently became known as the *Morasu Wakkalu*, a name still borne by a large section of raiyats in this District They were worshippers of Bairā Dēva, and had the strange custom of amputating the ring and little fingers of the right hand of their daughters before marriage. The leader of the band was *Rana Baira Gauda* who had been forced to fly from the village of Ālūr near Conjeeveram, in order to preserve his daughter *Dod damma* from *mesalliance* with a powerful suitor of lower caste. The fugitives escaping along the banks of the Palār, were at one point in imminent danger of falling into the hand of their pursuers when the girl who was the innocent cause of the flight, invoking the aid of Ganga and casting her ear ring into the water as an offering the river miraculously divided, allowing her whole party to cross, and then interposed its swollen current to baffle the pursuers.

Arati Nāḍ
Prabhu.

On the night of their encampment on the spot before mentioned, Rana Baire Gauda was directed in a dream to settle in that neighbourhood. They accordingly built some huts and formed the village of Āhuti, now Āvati, north of Devanhalli. But before long they resolved to separate. *Rana Baire Gauda* remained at Āvati and his son was the founder of Devanhalli, Dodballapur and Chikballapur, *Sanna Baire Gauda* betook himself to Holuvanhalli or Korampur, and founded Kortagere (Tumkur District), and *Timme Gauda* went to Sugatur near Jangamkote, and became the ruler of Kolar and Punganur and the founder of Hoskote, while a descendant of his founded Anekal. The destination of three others is not known, but the seventh established himself at Yelahanka. This was *Jaya Gauda*, who acquired the title of Yelahanka Nādu Prabhu or lord of the Yelahanka-nād, as a feudatory of the Vijayanagar sovereigns. He ruled for 15 years (1418-1433) and was succeeded by his son *Gidde Gauda*. Being without children, the latter is related to have made a vow to Kempamma, the consort of Baire Dēva, that if by her favour he should be blessed with male issue, his descendants ever afterwards should bear her name. The goddess was propitious and he had a son, whom in accordance with his vow he named Kempa Nanja Gauda. After a rule of 10 years (1433-1443) *Gidde Gauda* was succeeded by *Kempa Nanja Gauda*. This chief governed his territory with benevolence and justice for the long space of 70 years (1443-1513). *Kempe Gauda*, his son, the most distinguished of the line, succeeded, and acquired the favour of Krishna-Rāya and Achyuta-Rāya, the kings of Vijayanagar. Once, while making a tour through the Yelahanka-nād, he came to a village named Sivanasamudram, 10 miles south of Yelahanka, and three miles south of Bengalūru. This was Hale (or old) Bengalūru as it was afterwards called, the site of which is pointed out near Kodigehalli, north-west of Hebbal tank. The Bangalore District was for a long time called the Sivanasamudram country. The site appearing to him favourable for the erection of a fort, he obtained permission of Achyuta-Rāya to

establish his capital there, and in 1537 built a mud fort and transferred to his new town the name of Bengalūru (Bangalore) As a reward for his zeal and activity, the following places were granted to him by Achyuta Rāya, namely Old Bengalūru Vartur, Yelahanka Bevur, Halasur Tengeri Tala gattapur, Jigani, Kumbhalgod, Kanalli, Banavar, and Hessar ghatta The revenue derived from the twelve *hoblis* amounted to 30,000 *pagodas* This accession of wealth was partly devoted to the erection of temples, of which the principal are those of Gavi Gangadharēśvara at Gavipūr, a mile to the south of the fort and those of Basavēśvara and others in the same neighbourhood A large tank was formed near these edifices and named the Kempambudhi after the family goddess

Not content with feudal honours the chief now usurped the prerogatives of royalty and established a mint (tankasale) whence issued the Baire Dēva coins At this period, Achyuta Rāya his patron, died, and was succeeded on the Vijayanagar throne by Sadasiva Raya, under the guardianship of Rama Raja. Rumour of Kempe Gauda's proceedings having reached the court, he was summoned to account and cast into prison, his territory being sequestered and added to that of Jagadēva Rāya After remaining in confinement at Ānegondi for five years, he obtained release by the payment of a heavy fine, and his possessions were restored to him His residence at the metropolis apparently wrought some change in his views for on his return he is said to have suppressed the custom of amputating the fingers of the marriageable females in his family, considering it incompatible with his dignity as Lord of the country (The observance of this barbarous custom continued in some branches of the sect until 1874, when it was prohibited by Government) He appears also to have secretly adopted the worship of Siva in place of that of Baire Dēva, the family god His rule continued till 1569 being 43 years before and 5 years after his imprisonment

His son *Immadi* (or the second) *Kempe Gauda* succeeded to the Government By him were erected the *Sōmēśvara*

pagōda at Halasur, and a number of tanks in various parts. He extended his territory westwards and obtained possession of Sāvandurga and Magadī, where he built a mud fort and the large temple, now in ruins, of Sōmēsvara, two miles to the west. According to inscriptions, these chiefs were known as Āvatī-nād Prabhus. They were *Gaudas* or farmers of the Morasu-vokkalu caste, who came from the east in the 15th century and settled in the Āvatī village, with the Nandi-mandala and the Devanapura (Devanhalli) kingdom as their territory. Their immediate descendants became founders of the modern States in eastern Mysore which were subordinate to Vijayanagar. The leader of the Āvatī-Prabhus was named Baire Gauda, and the inscriptions of the family date from 1428 to 1792. In 1640 the Āvatī Prabhu is said to be a protector of the family of Vēṅkatapati-Rāya II.

The Yelahanka-nād Prabhu is mentioned even in 1367, but the inscriptions of this Āvatī branch run from 1599. They generally had the name Kempe-Gauda, after the most celebrated of the line. He founded Bangalore in 1537, and his son of the same name gained possession of the Magadī country and Sāvandurga. Though at first describing himself as of the fourth *gōtra*, he is afterwards said to be of the Sadāsiva *gōtra*.

Of the Devanhalli and Dod-Ballapur Branches of the Āvatī line, there are no inscriptions. But of the Chik-Ballapur chiefs there is one. Of the Holavanhalli or Korampur branch, which founded Koratagere, there are a few, dating from 1627 to 1726. Baire-Gauda was the general name of the chiefs.

More prominent were the Sugatur-nād Prabhus, who usually had the name Tamme-Gauda. Their territory included a great part of the Kolar District, and they founded Hoskote. For his aid in defeating the Mussalman attack on Penukonda, the chief received the title of *Chikka-Rāya*, and his possessions were extended from Ānekal to Punganur. A palm leaf Mss. gives further details about Chikka Rāya. It is said he was the son of Tammappa Bhūpa, and was born with long matted hair. He was, we are told, a devout adherent

of the Jangama faith and by the grace of Siva restored sight to a blind man. His wife was Viramāmba. Their son was Immadi Tamma bhūpala, also devoted to the Jangamas. He captured Bhīmaridurga, and destroyed certain traitors to the king of Karnataka, thus gaining his friendship and received from him the flags of a golden bull and Virabhadra. His wife was Venkatamba. They had the son Mummadi Tamma bhūpa, who was learned in the Karnāṭaka Āndhra and Sanskrit languages. When quite a child (*sisu*) he wrote the *Rājendra-Chōla-charita*. When his moustaches began to appear, he wrote the *Kumārārjuniya* and when mature the *Saundarēsa-charita*. These were in Telugu. Then he composed an impromptu *yaksha-gāna* work in Kannada. He also wrote in Sanskrit a commentary called *Kaumudī vyākhyāna*, and a work called *Rasika manōraṅjana* and had the *Siva Darpana* compiled by Brahmans. Then by general request, he wrote his Kannada version of the *Sankara samhita*.

After the overthrow of the Vijayanagar empire by a Muham
 madan confederacy on the field of Talikota in 1564 the
 dominions of that mighty Hindu sovereignty fell a prey to
 numerous invaders. The Bijāpur and Ahmednagar princes
 having agreed on different lines of conquest to avoid mutual
 interference, the forces of the former made many acquisitions
 to the south. Emboldened by success, an attempt was made
 in 1577 on Penukonda, which had for a time been the capital
 of the ousted kings of Vijayanagar, but whence Timma Raja
 had transferred the seat of Government some years before to
 Chandragiri. The attack on Penukonda was gallantly
 repelled by *Jagadēva Rāya* a relation of the Raja's and his
 services were rewarded by bestowal of a large district which
 extended his possessions from Baramahal to the Western
 Ghats. He fixed his capital at Ohannapatna which his
 descendants held till 1630 when it was captured after a long
 siege by Chama Raja of Mysore, together with Kankanhalli.
 In 1638 Ban-dulha Khan, the general of the Adil Shahi
 prince of *Bijāpur* captured Bangalore from Kempe Gauda

*Jagadēva
 Rāya.*

and made it his chief residence, the Gauda retiring to his strong-hold on Savandurga According to *Channapatna* 182, Jagadēva Rāya was succeeded by his son of the same name, who was succeeded by his son Kumāra Immadi Jagadēva Rāya in 1623

Bijāpur
Invasion
Shāhji

On Ran-dulha Khān's return to court, *Shāhji*, father of the celebrated Sivaji, being second in command, was appointed to govern the districts subdued by the Bijāpur forces in Karnātika and Drāvida, named *Karnātic Bijāpur* With the view of attaching him to the fortunes of the government, he was afterwards granted as a Jāgir Bangalore, Kolar Hoskote, Dodballapur and Sira He fixed his residence at first at Bangalore, but afterwards, when not engaged in military expeditions, lived sometimes at Dod-ballapur and sometimes at Kolar The story of his eventful life is not without romance and demands more than a passing notice His father, Mallōji Bhōsla, was an officer serving with a few men mounted on his own horses, in the Nizām Shāhi army, in the time of Malīk Āmber, the celebrated Abyssinian minister of Ahmednagar He was, it is said, for many years childless when, in 1594, by virtue of the prayers of Shāh Sherif, a Muhammadan saint at Ahmednagar, his wife bore a son, whom in gratitude he named Shāhji after the holy man When five years old the boy accompanied his father to an entertainment at the house of his commanding officer, Lukji Jādu Rao, a Mahratta chief of high birth, who was at the head of 10,000 men Jādu Rao, attracted by the appearance of Shāhji, seated him beside his daughter Jeejee, a pretty child of three or four years old, and when they began to play together, remarked jestingly that they were a fine pair But the merriment which this occasioned was checked by Mallōji's rising and calling upon his friends to witness that Jādu Rao had formed with him a marriage contract The chief seemed astonished and was mute Affecting to treat what had passed as a mere joke, he next day asked Mallōji, the father, to a dinner. But the latter declined

the invitation unless Jadn Rao would formally recognize Shahji as his son in law, which was indignantly refused.

The crafty father, however, never relinquished the design and having acquired wealth and a high command, was eventually successful. The marriage of Shahji to Jeejee Bāi was accordingly celebrated with great pomp in 1601 and honoured by the presence of the Sultan. The offspring of this union were Sambhaji and the illustrious Sivaji.

In 1620, Shāhji, who had succeeded to his father's jagir distinguished himself in a battle against the Mughals. In 1629 he appears as a supporter of the cause of Khan Jehan Lōdi who had been driven into rebellion by the jealousy of the Emperor Shah Jehan. Finding he had adopted a failing cause and fearing the loss of his jagir Shahji made a tender of his services to the Mughal Emperor promising, on condition of receiving a safe conduct and a letter of pardon to repair to the imperial presence. The indulgence being granted, he came to court accompanied by his immediate dependants and a body of two thousand horse. Having paid his respects to Shāh Jehān he was promoted to the command of 5 000 horse, and not only confirmed in his patrimonial jagir but received a grant for some other districts.

In 1632, dissatisfied with the proceedings of the imperial court, he made overtures to the Bijapur Government with such inducements as led to their acceptance. In order to detach him from this alliance, his wife and family who in consequence of his second marriage had separated from him were seized by the imperialists but immediately released through the influence of Jeeji Bāi's relations, who were adherents of the Emperor. Shāhji became thenceforward a leading partisan of the Bijapur State, and subdued the Ahmednagar territories, of which he made himself regent. But in 1636 Muhammad Ādil Shah was compelled to sue for peace from the Emperor. Pardon to Shahji, on condition of giving up his forts, was one of the articles of the treaty concluded and from this time his attention was confined to the Karnātic provinces.

In 1649, being suspected of secretly inciting the rebellion of his son Sivaji, he was treacherously seized at an entertainment. On being brought to court, he denied all connection with his son's proceedings, but nothing could convince Muhammad Ādil Shāh of his innocence. Enraged at his supposed contumacy, the king ordered him to be confined in a stone dungeon, the door of which was built up, except a small opening, which he was told would be for ever closed if within a certain period his son did not submit. Through the influence of the Mughal Emperor Shāh Jehān and others, he was saved from a cruel death and released from the dungeon on giving security, but was kept a prisoner at large in Bijāpur for four years.

In 1653, Shāhji was permitted to return to his Government. Soon after his restoration, his eldest son Sāmbhaji, who during his absence had been at the head of affairs, was killed in an expedition. In 1662, with the approval of his sovereign, Shāhji, accompanied by his other son Venkōji (or Ekōji), paid a visit to Sivaji and was successful in effecting a reconciliation between him and the Bijāpur State. In 1664 the active career of Shāhji was brought to an end, at the age of 70, by a fall from his horse while hunting at Basavapatna on the banks of the Tungabhadra, in the Shimoga District, where he had joined the Bijāpur army to assist in reducing some refractory zamindārs. At his death, he possessed, besides the estates conferred upon him by Bijāpur before mentioned, the fort of Arnī, Porto Novo, and the territory of Tanjore, acquisitions made by conquest.

His son Venkōji continued to govern the jāgir with the aid of Raghunāth Nārāyan who had been his father's principal adviser. The latter is described as a person of superior abilities. His relations with the son of his patron were never altogether amicable, though mutual interests prevented an open rupture. But in 1675 Raghunāth Nārāyan left the Karnātic and in course of time entered the service of Sivaji, who received him with distinction. The intention of laying claim to a half share in his father's possessions as a hereditary

right had been formed by Sivaji, and with the aid of this new counsellor he matured his plans for an expedition into the Karnatic and the enforcement of his claim. The expedition which set out in 1677, and the negotiations between Sivaji and Venkōji are matters of history. By 1678, all the disputed districts had been overrun, and Sivaji's horsemen levied *chouth* and *sardāshmulhi* in every direction, but an amicable arrangement having been come to Venkōji regained possession the same year. Sivaji died in 1680.

Meanwhile the Wodeyars of Mysore who had gained possession of Seringapatam, were rising to power. In 1654 Kempe Ganda of Magadi had been defeated at Yelahanka by Kanthirava Narasa Raja with great loss and forced to pay a contribution. In 1687 Bangalore also passed into the hands of the Mysore kings in the following manner—Sivaji was dead and Venkōji, established on the throne of Tanjore found his distant dominion of Bangalore to be an expensive and precarious possession insulated in a great degree by the contending armies which constantly ranged over the intermediate country. He therefore determined to sell it to the highest bidder, and Chikka Dēva Rāja who taking advantage of the general anarchy had been gradually extending his possessions, finally agreed to purchase it for three lakhs of rupees (£30 000). He accordingly sent a detachment to occupy the new purchase and to pay the money. But the negotiation having been long protracted had become a matter of notoriety and attracted the attention of Hari Rāja, the Mahratta commander-in-chief at Senji (Ginjee) and of Aurangzib who had just raised the siege of Golkonda. These powers entertaining a high opinion of the importance of Bangalore, sent each a detachment from their distant and opposite stations to anticipate the Raja of Mysore. Khasim Khān, the general of Aurangzib by forced marches along the west of the Ghāts, arrived first and, the place being in a dismantled state preparatory to its sale, fell into his hands almost without opposition. The detachment of Hari Rāja,

Mysore
Rāja.

finding themselves forestalled, marched back as they came. The imperial colours, however, were hoisted for only four days on the ramparts of Bangalore. For Khāsim Khān who had more important objects in view, resolved to accept the terms still offered by the Mysore Rāja, as he would thereby obtain a large sum of money and escape the necessity of leaving a detachment to occupy the place. At the same time, its use as a point of communication would still be preserved. Thus, in July 1687, this important town became a part of the Mysore Kingdom. *Bangalore* 118, dated 1705, states that the Venkatēśvara temple in the Bangalore Fort was erected by Dēva Rāja, *i.e.*, Chikka-Dēva-Rāja Wodeyar, and endowed by his son Kanthirava Narasa Rāja.

At Dodballapur is an interesting inscription (No. 31) of the thirty-second year of Aurangzib (1689), recording its capture by Khāsim Khān and its bestowal in 1691 upon Shek Abdulla Farukh, a descendant of one of the courtiers at Delhi.

In 1728 Dēva-Rāja, Dalavāyī of Dodda-Krishna-Rāja, made an attack upon Magadī with a view to replenish the treasury which had been heavily drained by the contributions levied by the Muhammadans and the Mahrattas. Kempe Gauda imprudently allowed himself to be surrounded in the weak fort of Magadī and was forced to surrender at discretion. He was carried to Seringpatam as a state prisoner, and there ended his days, the last of his line. The impregnable fortress of Savandurga, with the accumulated plunder of nearly two hundred years, thus fell into the hands of the Mysore army.

In 1749, the siege of Devanahalli was undertaken, in which Haider Ali first distinguished himself as a volunteer horseman, and here his son and successor Tipu was afterwards born. In 1758, the fort and district of Bangalore were conferred on Haider as a jāgīr in recognition of his distinguished services. In 1759, the Mahrattas under Gōpal Hari infested Bangalore and surprised Chennapatna, but both places were relieved by his address. In 1761 he obtained from Basalat Jang the cession of Hoskote and of Dodballapur, the jāgīr of Abbās Kulī Khān. From this year dates his usurpation.

of the Mysore throne, from which period therefore the District was under the Muhammadan rule of himself and of his son and successor, Tipu Sultān

In 1791 Bangalore was captured from Tipu by the British nader Lord Cornwallis to whom also Devanhalli and other places submitted. Savandurga, Ramgiri Sivangiri and other hill forts were taken. On the death of Tipu in 1799, the District was included by the treaty of Seringapatam in the territory of the Mysore Raja. Under the restored Government which followed, the Bangalore and Kolar Districts constituted the Bangalore Faujdari which was afterwards called the Bangalore Division, until the formation of the Nunddroog Division in 1863, when the name Bangalore was confined to the District. The most important events that occurred in the District during this period were the foundation of Closepet in 1800 after Colonel Sir Barry Close the first Resident of Mysore (*Chennapatna* 5) and the establishment of the British Cantonment at Bangalore in 1809 the latter of which events has added so greatly to the wealth and prosperity of the surrounding country

On the Rendition in 1881, the site of the Bangalore Cantonment was made over as an Assigned Tract to the British Government who at the same time, surrendered to Mysore the island of Seringapatam. In 1882 were established the Eurasian and Anglo-Indian colonies of Whitefield and Sausmond in the east of the Bangalore taluk. The Closepet Sub Division, comprising the taluks of Chennapatna, Magadi and Kankanhalli, was formed in 1884

In 1888 the fort of Bangalore was given up to the Mysore civil authorities, being no longer required for military purposes, the Residency and grounds being added to the Assigned Tract in exchange

B ARCHÆOLOGICAL

The inscriptions found in the District will be found collected in *EO X Bangalore District* and in the *Mysore Archaeological Reports*

There are no great archæological remains to be specially noted. The pillars of a ruined temple at Gangavaram are of an unusual design in the State. These and the Palace of Tipu Sultān in the Bangalore Fort, built in the style of the Darya Daulat at Seringapatam, will be found referred to in Volume II, Chapters V and VI, of this work.

SECTION III.—ECONOMIC.

GENERAL AGRICULTURAL CONDITIONS

Prevailing
Soils and
Crops

The prevailing soil is red on which are grown *ragi* and the commonly associated crops. Paddy and sugar-cane are grown on lands under tanks. The sandy soil occurring in some portions of the District is not fertile and requires much manure. In the Closepet Sub-taluk, the soil is generally rocky, though on the banks of rivers it is fit for mulberry and cocoa-nut gardens.

(1) Cultivable area and area cropped

Chief Agricultural Statistics and Principal Crops.

The following table shows the area available for cultivation and the area cropped during the five years from 1920-21 to 1924-25.—

Year	Area of the District	Area available for cultivation	Cultivable waste not in occupancy	Current fallows	Net area cropped
1920-21	16,79,489	8,66,742	55,241	1,38,711	6,85,656
1921-22	16,79,924	8,77,760	47,193	1,22,011	7,08,556
1922-23	16,79,924	8,78,100	42,397	2,21,336	7,14,367
1923-24	16,79,909	8,77,799	36,063	1,45,806	6,95,930
1924-25	16,80,165	8,79,372	33,883	1,26,067	7,19,382

The following table gives information regarding the area cropped and the different kinds of crops raised during the years 1920-21 to 1924-25 —

Year	Food grains and pulses	Oil seeds	Condiments & spices	Sugar	Fibre
1	2	3	4	5	6
1920-21	5,76,702	26,062	1,406	4,536	100
1921-22	6,03,267	28,837	5,144	4,028	179
1922-23	6,03,672	28,869	3,114	4,895	763
1923-24	5,89,797	27,632	4,124	4,754	107
1924-25	6,16,812	28,326	2,854	3,987	1,206

Year	Dyes	Drugs & Narcotics	Fodder Crops	Miscellaneous	Total area Cropped
	7	8	9	10	11
1920-21	88	1,220	14,533	54,782	6,85,650
1921-22	40	1,816	15,300	38,774	7,08,556
1922-23	54	994	16,711	45,369	7,14,387
1923-24	45	1,362	18,880	30,618	6,96,400
1924-25	35	1,888	10,509	36,414	7,19,321

A table showing the number and extent of the different holdings under cultivation in the District during 1920-21, 1921-22 and 1922-23 is given below —

(ii) Number and extent of Holdings.

Year	Holdings not exceeding an acre in extent		Exceeding one acre but not exceeding 5 acres		Exceeding 5 but not exceeding 10	
	No.	Extent	No.	Extent	No.	Extent
1	2	3	4	5	6	7
1920-21	18517	15,235	71498	1,77,872	39593	2,11,450
1921-22	18734	10,457	73121	1,68,982	40780	2,26,342
1922-23	18575	36,079	60596	1,55,753	37381	2,07,988
1923-24	29272	27,003	64158	1,48,756	34857	2,07,918
1924-25	29343	26,129	64642	1,53,684	35060	2,16,452

Year	Exceeding 10 but not exceeding 50		Exceeding 50 but not exceeding 100		Exceeding 100 but not exceeding 500		Above 500 acres	
	No	Extent	No	Extent	No	Extent	No	Extent
	8	9	10	11	12	13	14	15
1920-21	19363	2,71,559	1417	87,032	237	39,09,233	5	2,768
1921-22	19878	2,82,478	1453	87,988	279	47,687	5	2,768
1922-23	18833	2,90,911	1388	89,485	280	48,021	5	2,768
1923-24	17308	3,00,241	1429	99,225	299	55,824	5	2,769
1924-25	16050	2,96,770	1432	94,544	305	55,102	5	2 768

(iii) Holders
according to
revenue paid

The following table gives the number of holders classified according to the amount of revenue paid during 1920-21 to 1924-25 —

Year	Holders paying assessment or jodi of Rs 5 and under		Holders paying assessment exceeding Rs 5 but not exceeding Rs 25	
	No	Amount paid	No	Amount paid
1	2	3	4	5
1920-21	97873	3,30,813	41338	4,24,769
1921-22	101494	3,35,023	55809	4,25,615
1922-23	81025	2,94,959	47052	4,58,793
1923-24	50281	1,40,391	43295	4,48,401
1924-25	45806	1,34,835	47527	4,36,849

Year	Holders paying Rs 25 but not exceeding Rs 100		Holders paying Rs 100 but not exceeding Rs 500		Holders paying above Rs 500	
	No	Amount paid	No	Amount paid	No	Amount paid
	6	7	8	9	10	11
1920-21	14633	3,80,194	661	1,01,535	10	31,362
1921-22	34864	3,85,263	668	1,06,692	13	34,125
1922-23	15184	3,96,232	706	99,102	98	49,750
1923-24	17568	5,29,989	794	1,43,987	35	47,435
1924-25	16083	5,13,884	1193	1,33,231	97	50,407

AGRICULTURAL LOANS

The following is a table of different kinds of loans granted for different purposes during the years 1920 21 1921 22 1922 23, 1923 24 and 1924 25 —

Kinds of
loans
granted

Year	Land Improve ment	Takavi	Fruit and other cultivation
	Rs.	Rs.	Rs.
1920-21	6 080	2,130	550
1921-22	3 150	1 475	1 075
1922-23	2 725	1 450	600
1923-24	8 600	5,915	
1924-25	3,816	1 000	

IRRIGATION

The District has not got any big rivers. Irrigation is therefore mainly carried on by means of tanks and wells.

The following table gives details of major and minor tanks and irrigation wells in the several taluks of the District and the area irrigated by each —

(i) Major
and Minor
Tanks, etc

Taluks	Tanks in action				Wells	
	Major		Minor		No.	Extent irrigated
	No.	Extent irrigated	No.	Extent irrigated		
Bangalore	62	7 763-11	15	3 111-10		1 686-25
Devanahalli	31	5 741-18	32	841-12	2654	2,447-37
Anekal	44	3 000- 0	149	2,391-28	240	548-2
Hoakote	37	5,709-28	30	1 176-24	2952	3,441- 0
Nelamangala	38	3,490- 0	60	4,243- 0	114	1 038- 0
Dodballapur	46	6,739- 0	81	2,681-23	987	1,334- 4
Kankanhalli	4	202-23	102	909-35		
Clovetpet	1	137- 0	8	801- 0		986 17
Magadi	21	3,861-14	156	3,648-14		
Total	284	36 734-14	858	10 804-26	6947	11 482- 5

(ii) Major and Minor tanks restored

The following is a table of Major and Minor tanks in the District including private enterprise tanks and the number of tanks which are restored out of them.—

Taluks	Number of Major Tanks			Number of Minor Tanks		
	Restored	Unrestored	Total	Restored	Unrestored	Total
Bangalore	58	4	62	54	98	152
Devanhalli	31	1	32	27	8	35
Hoskote	37	11	48	39	57	96
Anekal	25	19	44	65	84	149
Nelamangala	38	3	41	60	117	177
Kankanhalli	102	3	105			
Magadi	19	2	21	57	99	156
Dodballapur			46			81

(iii) Government Tanks according to revenue

Government tanks according to revenue are classified in the following statement —

Taluk	With a revenue of					Total
	Less than Rs 300	Between Rs 300 & 500	Between Rs 500 & 1 000	Between Rs 1,000 & Rs 5000	Above Rs 5,000	
Bangalore	205	32	23	18	1	339
Devanhalli	27	4	11	16		58
Anekal	163	11	11	8		193
Hoskote	39	11	19	6	1	76
Nelamangala	180	24	12	5		221
Kankanhalli	102	3	1			106
Closepet	66	1				67
Magadi	156	10	5	6		177
Dodballapur	83	16	24	4		127
Total	1,091	112	106	63	2	1,364

The more important tanks in the District with a revenue of Rs. 5,000 and above are shown in the accompanying statement —

(or) Tanks with a revenue of and over Rs. 5,000

Sl. No.	Name of Taluk	Name of Tank	Total irrigable area under the tank	Assessment
1	Hoskote	Doddakere	2,230	14,254
2	Channapatna	Mallurkere	891	5,885
3	Devanhalli	Hoskere		

FORESTS

Sandal grows in Bangalore, Kankanhalli, Magadi and Channapatna taluks. The *acacias* grow freely in the plains. Honge is the most common growing tree on tank bunds. Dmdiga, Jalari and Halusu are abundant in certain parts of the District. Kagi, Naibyala, Belwara, Bage, Some, Bevu, Kakke, Hale and Kamara occur commonly and *Bassia latifolia* is frequently seen. Among shrubs are Tangadi and the wild date.

MINES AND QUARRIES

See under Geology

INDUSTRIES

The following is a list of Large Industrial Establishments in Bangalore City —

Sl. No.	Name of Establishment	Class or Description of Industry	Average number of persons employed daily	Whether worked by mechanical power or hand power	Remarks
1	Bangalore City Government Printing Press.	Printing	403	Mechanical power	Owned by Govt.
2	Mysore Arts and Wood Works.	Wood carving, working in ivory etc.	125	do	do

Name of Establish- ment	Class or Descrip- tion of Industry	Average number of persons employed daily	Whether worked by mecha- nical power or hand power	Remarks
3 Government Art Workshop	Wood carving, working in ivory, etc	80	Mecha- nical Power do	Owned by Govt.
4 Standard Foundry and Engineering Company	Castings of all kinds	40	do	
5 Mysore Metal In- dustries, Ltd	Manufacture of safes, etc	38	do	
6 Madras & South- ern Mahratta Railway, Loco- motive Shed	Engino and Boiler repairing	183	do	
7 Madras & South- ern Mahratta Railway Work- shop	Do	295	do	
8 Messrs Petric Hay & Co	Brass and Iron Foundry	63	do	
9 Aryan Hosiery Factory	Manufacture of Hosiery	67	do	
10 Government San- dalwood Oil Fac- tory	Manufacture of Sandalwood Oil	100	do	
11 City Standard Tobacco Company	Manufacture of Cigarettes	33	do	
12 The Bangalore Woollen, Cotton & Silk Mills, Ltd	Manufacture of cotton goods, blankets and rugs	2,684	do	
13 B K Subbyiah & Sons	Manufacture of blankets, car- pets, etc	245	do	
14 Kaiser-i-Hind Woollen, Cotton & Silk Mills, Ltd	Manufacture of blankets, rugs tweeds, serges, etc	568	do	
15 Mahalakshmi Woollen & Silk Mills Co, Ltd	Do	80	do	
16 Mysore Spinning & Manufacturing Co, Ltd	Manufacture of cotton goods	1,540	do	
17 Government Cen- tral Distillery	Manufacture of Liquors	101	do	

Name of Establishment	Class or Description of Industry	Average number of persons employed daily	Whether worked by mechanical power or hand power	Remarks
18. Sri Rama Weaving Shed	Silk weaving	50	Mechanical Power	Owned by Govt
19. Government Weaving Factory	Weaving	93	do	do
20. Government Soap Factory	Manufacture of Soaps.	52	do	do
21. Central Industrial Work Shop.	Manufacture of Rice Mills, Sugar-cane Mills, Oil Presses, etc.	137	do	do
22. Sri Ramakrishna Oil Mills.	Oil Pressing	23	do	
23. The Mysore Tannery Ltd.	Tanning hides	160	do	
24. The Railway & General Engineering Company	Manufacture of reinforced Concrete articles.	60	do	
25. The Premier Metal Factory Ltd.	Manufacture of seamless measures, brassware, etc.	100	do	
26. The Bangalore Whitelead Syndicate, Ltd.	Manufacture of whitelead powder and paint.	30	do	
27. The City Brick & Tile Works.	Manufacture of bricks and tiles	105	do	
28. The Mysore Clay Works, Ltd.	Manufacture of bricks.	30	do	
29. Mr Khoday Eswarasa & Silk Twisting Factory	Silk twisting	30	do	
30. Bangalore Silk Filature.	Silk reeling	75	do	
31. Mr R. C. Muniappa & Oil and Flour Mills.	Oil extraction & flour milling	23	do	
32. Mr K. Naganna & Oil Mill.	Oil extraction	21	do	
33. Bangalore Printing & Publishing Company	Printing	100	do	

Name of Establishment	Class or Description of Industry	Average number of persons employed daily	Whether worked by mechanical power or hand power	Remarks
34 Sivaji Soap-nut Works & Oil Mills	Oil Extraction	31	Mechanical Power	
35 Swadeshi Perfumery Works	Manufacture of Perfumes	20	do	
36 Srinivasa Flour Mills	Flour Mill	37	do	
37 Sri Radhakrishna Rice & Flour Mills	Rice Milling, etc	21	do	
38 Sri Krishna Flour Mills	Flour Mill	35	do	
39 Sri Krishna Gold Lace Thread Factory	Gold lace making	28	do	
40 Bangalore Fire-bricks & Tile Company	Manufacture of bricks & tiles	73	do	
41 Messrs Madurai Mudaliar & Sons	Engineering Workshop	42	do	
42 Tata Silk Farm	Silk rearing and reeling	95	Hand Power	
43 Mr Sivappa Revappa's Rice Mill	Rice milling & soap-nut powdering	20	Mechanical Power	
<i>Bangalore Taluk</i> <i>Yelahanka</i>				
44 Standard Tile Factory	Brick-making	53	do	
<i>Whitefield</i>				
45 Permanent Brick & Tile Works, Ltd	Manufacture of bricks & tiles	29	Hand Power	
<i>Channapatna</i>				
46 Mr Ramasanjiva Chetty's Toy Works	Manufacture of lacquerware toys	23	do	

Arts and Manufactures

The Bangalore City is the chief centre in the District as in the State, where manufacture of various articles on a large scale is carried on.

Important
Mills and
other
concerns.

The foregoing tables give details of large industrial establishments in the District and in Bangalore City

The District has got some rural industry also such as manufacture of coarse cloth saris, duppies and kambles. Though the quantity manufactured is not in every case on a commercial scale it is sufficient to meet the local demand

Rural
Industries.

The Gudigars at Channapatna are very dexterous in preparing lacquer ware and toys and musical wires, while brass lamps, candle stands and articles of household use are manufactured at Magadi in addition to such musical instruments as *Thambooras* and *Veenas*

Arts—
Toys and
Musical
Instruments

The arts of printing book binding, lithography and photography are pursued in Bangalore with electro-plating boot and shoe-making smith's work of all kinds and carpentry in all its branches including, coach building and furniture making. The variety of handicrafts is too numerous to specify and is probably on the increase owing to the demand of a growing population

Brass and copper vessels are manufactured at Yelekyathahalli, Nelamangala Taluk.

Brass and
Copper
Works.

The weaving of silk saris after the model of Bangalore Aralepet Saris is done on an appreciably large scale in Kankanhalli town. The weaving of costly clothes at Tyamagondlu appears to have revived of late. Dodballapur is famous for its saris which besides being cheap and fashionable are decent and durable

Weaving
Industry

The extraction of oils forms an important branch of industry. These consist of castor-oil of two kinds, the inferior

Oils.

description obtained from the large seed being called lamp oil, ground-nut oil, caron oil, and gingelly oil, of good and inferior kinds.

COMMERCE AND TRADE.

Exports and
Imports

The following statement furnishes particulars regarding the exports and imports from and to the District. The figures are only approximate, as there are no reliable data available on the subject.

Exports

Article	Chief place of export	Quantity	Value
			Rs
1 Ragi (Candies)	Madras	1,25,360 Candies	18,80,400
2 Paddy do	Tumkur & Chitaldrug	17,150 do	2,57,180
3 Horse gram (Pallas)	Mysore and Hassan	3,445 Pallas	84,300
4 Tuvar (Togari)		2,300 do	36,800
5 Ballar (Avare)			
6 Tamarind		350 Tons	38,500
7 Chillies		45 do	13,950
8 Rice (raw)	Tumkur & Chitaldrug	7,785 Pallas	1,24,360
9 Rice (boiled)	Kolar and Mysore	7,866 do	1,25,860
10 Tuvar (Dhal)		1,600 do	25,600
11 Jaggory	Dharwar, Bellary & Belgaum	808 Tons	1,71,968
12 Ghee		6 Tons	78,000

Dak Bungalows,
Musafir-khanas, etc.

Dak Bungalows or rest houses have been built at places of some interest and where accommodation is considered absolutely essential for the convenience of travellers. A moderate fee is levied, the amount varying according to the class to which the bungalow belongs.

Besides these, there are also Musafir-khanas, meaning rest houses for strangers. Invariably a care-taker is appointed to look after the building and help the travellers.

The following table gives detailed information regarding Travellers' Bungalows in the District —

First Class	Second Class	Third Class
Closepet	Yelahanka Hoskote Dodballapur Sompur or Dobbpet Channapatna Bidadi Hebbagodu Devanhalli	Kumbalgod Hindignal Rajankunte Kankanhalli. Kuggghalli Kodihalli Satnur Magadi Solur Paduvatta Anekal Sarjapur

FAMINES.

Beyond the prevalence of drought consequent on insufficient rainfall in some years, there were no regular famines in this district since the famine of 1877.

SECTION IV — ADMINISTRATIVE.

DIVISIONS

Taluks and
Sub divisions

The District is divided into 9 taluks and one sub-taluk, with three Revenue Divisions in charge of three Assistant Commissioners exercising revenue jurisdiction over them. —
(1) The Dodballapur Sub-Division comprising of Anekal, Hoskote, Devanhalli, Dodballapur and Nelamanjala taluks;

(2) the Closepet Sub Division consisting of Magadi, Hankanhalli and Channarayana taluks and Closepet Sub Taluk, and
 (3) the Bangalore Sub-Division for the Bangalore Taluk.

The Assistant Commissioner in charge of Bangalore Taluk exercises also the functions of a Civil Officer, supervising the arrangements incidental to the marching manoeuvres and field firing of British troops in the Bangalore District and the surrounding parts.

The following statement gives further particulars of the taluks comprised in the District —

Taluk	Area in Square Miles	Number of Villages	Number of villages and towns		Totals in 1921	Per Square Mile
			Gravel	Iron		
1. Aerial	150.25	4	15	3	22,215	31
2. Bangalore	27.47	9	216	14	173,517	377
3. Channarayana	160.50	3	17	13	76,431	75

JUDICIALS

There are five Civil Courts in the District as shown below — (a) Civil Justice

1. District Judge's Court Bangalore City
2. Subordinate Judge's Court Bangalore City
3. First Munsiff's Court Bangalore City
4. Second Munsiff's Court Bangalore City
5. Munsiff's Court Doddaballapur

There are 14 Subordinate Magistrate's Courts administering Criminal Justice in the District as shown below — (b) Criminal Justice.

City Magistrate Bangalore — With territorial jurisdiction over all 1st 2nd and 3rd class cases of the Bangalore City and 1st class cases of the taluk.

Special First Grade Magistrate, Bangalore.—Having territorial jurisdiction over all 1st class cases of the taluks of Hoskote, Anekal, Devanhalli, Nelamangala and Doddballapur and also 2nd and 3rd class cases of the taluks of Devanhalli, Nelamangala and Doddballapur

Special Second Grade Magistrate, Bangalore City —With territorial jurisdiction over 2nd and 3rd class cases of the taluks of Bangalore, Hoskote and Anekal

Special Second Grade Magistrate, Closepet —With territorial jurisdiction over the 1st, 2nd and 3rd class cases of the taluks of Channapatna, Magadi and Kankanhalli and the Closepet Sub-Taluk

Ten Benches of Magistrates —Composed of Honorary Magistrates exercising jurisdiction over the several taluks and sub-taluks, with their courts located at the Head-quarters of the taluks and the sub-taluks

The work of all these courts is under the control of the District Magistrate, Bangalore, while for purposes of sessions trial, the district is included along with the Tumkur and Kolar Districts in the Bangalore Division presided over by the Sessions Judge, Bangalore Division.

The receipts and expenditure of these courts for two years is given below.—

Item	Year	
	1920-21	1921-22
Receipts	Rs 12,037	Rs 16,265
Expenditure	43,168	42,895

The Honorary Bench of Magistrates at Bangalore with one Chairman and two colleagues exercise 2nd class powers with regard to the following offences —

Jurisdiction

- (1) Offences under the Municipal Regulation
- (11) Offences under the Vaccination Regulation
- (111) Offences under the Public Conveyance Regulation

- (iv) Offences under the Regulation for the prevention of cruelty to animals
 (v) Appeals under Section 86 of the Municipal Regulation VII of 1906
 (vi) Section 56 Clause i, ii and under Police Regulation
 (vii) Offences under Sections 160, 278 285 286 290 323 331, 352, 355 426 and 501 I P C

There are a few village courts in the District established under Section 3 of the Mysore Village Courts Regulation 1913

Village Courts.

LAND REVENUE

The following statement shows the demand, collection and balance of Land Revenue in the District for the five years from 1920-21 to 1924-25, both inclusive —

LOCAL AND MUNICIPAL BOARDS

Local and
Municipal
Boards

For purposes of Local Self-Government, the following bodies have been constituted :—

- (i) Village Panchayets ,
- (ii) Taluk Boards , and
- (iii) District Boards

(i) Village
Panchayets

Village Panchayets, which, as the name indicates, are the lowest of the three bodies, have been constituted for 100 of the more populous villages in the District.

(ii) Taluk
Boards

The Taluk Boards are ten in number exercising jurisdiction over the respective taluks and the Sub-Taluk of Closepet. The members are partly elected and partly nominated with a few of the Government Officials holding appointments in the Taluk as *ex-officio* members. The strength of all the Taluk Boards, with the exception of Bangalore, was raised in 1918-19 to 16 and in the case of Bangalore to 20, half the number consisting of members elected by land-holders and ināmdars and selected Village Panchayets. The Presidents in the case of the Bangalore and Closepet Taluk Boards are the Assistant Commissioners in charge of the Revenue Sub-Divisions, respectively. In the case of other taluks, the Presidents are the Amildars of the respective taluks who are assisted by the elected non-official Vice-Presidents, except in the case of the Bangalore Taluk Board, of which the Amildar of the Taluk is the Vice-President.

(iii) District
Boards

The strength of the District Boards was also raised during 1919-20 to 45, two-thirds of the members being elected by Taluk Boards, Select Municipal Councils, Ināmdars and recognised Associations in the District, and under this provision, six Associations in the District have been given the privilege of deputing a member each to the District Board. The Deputy Commissioner is the *ex-officio* President of the District Board, the Vice-President being an elected non-official. Since 1924, the President is also an elected non-official.

The following statement shows the *Receipts and Expenditure* of the Local Boards for the last five years from 1918-19 —

Receipts and
Expenditure

RECEIPTS

1922-23	1,827 10 0	8,000 12 7	12,101 0 0	13,574 1 1

There are 15 Municipalities in the District, of which the Bangalore City Municipality, the premier one in the State administers the affairs of the Bangalore City Municipal area. The remaining 14 administer the municipal affairs of the several taluks. The Bangalore City Municipality is completely non-official in its composition with generally an elected non-official President, assisted until recently by one elected non-official Vice-President. In the case of the remaining Municipalities the President is the Amildar of the taluk, excepting in Closepet where the President is the Revenue Sub-Division Officer. The Vice Presidents of all the Municipalities are invariably elected non-official gentlemen.

Municipali-
ties.

The following statement shows the receipts and expenditure of the several Municipalities during the year 1921-22.—

Name of Municipality	Opening balance on 1st July 1921	Receipts during 1921-22	Total	Expenditure during 1921-22	Closing balance

POLICE AND JAILS.

Police

The Police administration of the District is vested in a District Superintendent of Police, with Head-quarter in Bangalore City, assisted by an Assistant Superintendent of Police with jurisdiction over the City area of Bangalore. The Deputy Commissioner of the District is the Head of Police for the whole District.

For each taluk or sub-taluk, there is a Police Inspector under the control of the Amildar or Deputy Amildar, as the case may be, as Head of Police for the Taluk or Sub-Taluk.

The total sanctioned strength of the Police Force for the District is as shown below —

Superintendent of Police	1
Assistant Superintendents of Police	2
Inspectors	16
Sub-Inspectors	18
Sergeants	90
Head Constables	15
Constables	850
Total	1,000

The total cost of the Force amounts to nearly Rs 2,11,000 per annum

The regular Police are assisted in rural parts by a number of Tōtis who are stationed in Oodaks

The District is served, for the detention of prisoners by Jail, the Bangalore Central Jail which besides receiving prisoners of the District proper admits prisoners sentenced to more than one month's imprisonment in some of the Magisterial Courts of other Districts in the State. Civil prisoners are also kept in the Central Jail

The Central Jail is under the supervision of a Government Officer designated the Superintendent, Central Jail. Arrangements exist to provide convicts with varied kinds of work. There are also 9 Taluk Lock ups at each of the taluk head quarters except Bangalore, wherein the convicts sentenced to not more than one month's imprisonment and under trial prisoners are confined. The Taluk Lock ups are in the charge of the Sub Registrars

The following statistics for the calendar year 1925 will give a general idea of the working of the Central Jail, Bangalore —

Item	Admitted during 1925			Daily average number of each class.		
	Males	Females	Total	Males	Females	Total
Convicts	1 469	91	1,560	664	17	681
Under trial	558	24	582	47	2	49
Civil	147		147	10		10
Total	2,174	115	2,289	721	19	740

The following table gives a general idea of the working of the Lock-ups in the District :—

Item	Received during 1925			Daily average number of each class		
	Males	Females	Total	Males	Females	Total
Convicts	79	5	84	2 69	23	2 92

Bangalore Central Jail	66,861
Lock-ups of the District	1,311

EDUCATION

Number of
Schools and
Scholars

On the 30th of June 1924, there were altogether 1,383 schools and 56,853 scholars in the district. Out of 1,383 institutions, one was an Oriental College for men, 8 English High Schools, 6 for boys and 2 for girls, 105 were Middle Schools, both for boys and girls, 1,186 Primary Schools, 15 Special Schools, such as Sanskrit Schools, etc., and 68 Village Indigenous Schools. Of the total number of pupils, viz., 56,853, 44,331 were boys and 12,522 girls. Of the total number of girls, 137 were in High Schools, 757 in Middle Schools, 11,497 in Primary Schools, 35 in Special Schools and 96 in Village Indigenous Schools.

This gives 22 square miles, 176 villages and 567 persons as served by each school in the district.

The educational work in this District is under the control of a Deputy Director of Public Instruction with Head-quarters at Shimoga. Under the Deputy Director, there is a District Educational Officer with Head-quarters at Bangalore who

is responsible for Primary and Middle School education in the District and in charge of the Kannada and Urdu Boys' and Girls' Schools. He keeps in touch with High School work, by conducting inspections in the High Schools in whole or in part under the direction of the Deputy Inspector and devotes special attention to the improvement of Middle Schools and their maintaining a high state of efficiency by constant guidance and regular inspections. The District Educational Officer is the officer whom the Deputy Commissioner and the District Board etc. are to address on all matters relating to education in the District. Each of the ranges into which the District is divided is in charge of an Assistant Inspector. One of the ranges comprises all the Urdu Schools in the District. The Assistant Inspectors are in administrative charge of the Kannada or Urdu Primary Boys' and Girls' Schools in their area but their inspections are as a rule confined to Boys' Schools.

MEDICAL

There is a large number of medical institutions in the District which includes the important Central Institutions of the State situated in the City of Bangalore such as the Victoria Hospital, the Minto Ophthalmic Hospital, the St. Martha's Hospital and the Maternity Hospital. The other institutions in the City of Bangalore are the Head-quarter establishment the Epidemic Diseases Hospital, and the Dispensaries at Basvanguḍi Mallāswaram Arlepet Gangarpet Chāmarajpet and Mavalli.

There are Local Fund Dispensaries in all the Taluk Head quarters and other important stations, their number being 14. The total number of hospitals and dispensaries in the district on 31st December 1925 was 27.

The total number of patients both in-door and out-door, treated during the Calendar year 1925 in all the above institutions was 451,880 and the total expenditure incurred on establishment, medicine, etc., was Rs. 3,27,830.

VACCINATION.

The control over the Vaccination Department in the District is exercised by the President of the District Board under the advice of the Sanitary Commissioner. The work of vaccination is under the supervision of Taluk Boards, Municipal Sanitary Inspectors and the Chief Sanitary Inspectors. The staff employed for the purpose consists of a Deputy Inspector and eight Vaccinators. The average expenditure on the Department amounts to about Rs. 8,200 per annum.

SECTION V —GAZETTEER

Agara also
Agram

Agara also Agram —A village in the Kengerı hoblı of the Bangalore taluk, about five miles south-east of Bangalore. Population 702. Contains large tanks, which inscriptions show were in existence in the 8th century. The Artillery practice ground is on the Agram plain. There is an installation for the manufacture of jaggory at this place.

This is said to be the birth place of the Kannada poet Timma-kavi, the author of *Ānanda-Rāmāyana*. He probably flourished in the first half of the 18th century. At the end of each *sandhi* of his work, he praises the god of Sahādēva-pura, Sadalı near Anekal, who is said to be his family god.

Judging from the inscription *E C IX*, Bangalore 79 at this village, it appears to be an old place, and to have been under the rule of the chief Nagattara, a subordinate of the Ganga King Satyavākya Permadi, in the 9th century. The chief Nagattara, is mentioned in several records of Bangalore Taluk. The modern village Ibbalur, near Agara is named Irvuhyur in the above epigraph at Agara. The Rāma temple at Agara, is a fine though modern structure with three cells standing in a line, containing figures of Gōpalakrishna, Rāma and Hanumān. It was erected by Rāma Reddi. The Chennigarāya temple, which according to the modern Sanskrit inscription on it, was recently restored by Rāma Reddi, has now a figure of Venkataramana, the former figure having been removed owing to mutilation. In the

sukhānasi is kept a figure of Beteraya about 2½ feet high with a bow and an arrow sculptured at the sides on the *prabhāvali*. The *bali pitha* or altar has figures of the regents of the directions with intervening *Simhalaśāṭas* or lions heads above and the elephants of the directions (*aśto-dṛggaṇa*) below. The *yāgasālā* has on a high pedestal figures of the nine planets set up in three rows—south row Rāhu, Mars and the Moon, middle row Saturn, the Sun and Venus, and north row, Kētn, Jupiter and Mercury. The outer doorway of this temple though modern is well carved. Its silver palanquin (of good workmanship) and other accessories are kept in a neat room called *Bhajanemane* (or prayer house) which is decorated with fine pictures of gods and goddesses.

Aigandapura—A village in the Bangalore District

Aigandapura.

This place is of some antiquity as it contains records of the 11th century relating to the Chōla Kings Rājēndrachōla Rājādhiraja and Kulōttunga I. The name is said to be a corruption of Aivarkanda pura, the town seen or founded by the five i.e. the Pandavas. There are five lingas in the village named after four of the Pāndava brothers and their mother Kuntī who are said to have set them up. They are called Dharmēśvara, Nakulēśvara, Sahadēśvara, Bhīmēśvara and Kuntī linga. The first is enshrined in a pretty large temple, the others in separate cells outside. The linga set up by Arjuna is said to be in the Arjunarāya temple at Totegere, a village about five miles to the west. The Dharmēśvara temple consists of a *garbhagrīha*, a *sukhānasi* and a *navaranga* with the entrance on the south though the linga faces east. There is a small pierced window opposite to the linga. In the *sukhānasi* are kept three figures to the left and four to the right. Of the former, one is *Langūḍlihasvāmūrti*, another a four handed male figure seated on Nandi, and the third a four handed female figure seated on a demon. And of the latter one is a four handed male figure standing with the left leg bent across the right with a nimbus at the back, another a female figure seated on a buffalo with the left lower hand in the *tarjani mudra* or the warning pose, another a three headed female figure and the fourth a seated female figure holding the discus and a conch. The *garbhagrīha* is surmounted by a stepped stone tower of the Pallava style, the bottom tier of which covers the whole cell.

An inscription discovered on the pedestal of the linga, which consists of two *anushtubh* verses, states that the *pīṭha* or the pedestal was caused by Madanārya, a dependant of Vāmana. The epigraph is not dated, but the Kannada characters in which it is engraved are of the 11th century. Vāmana of this record is probably identical with the Vāmanārya-dannāyaka mentioned in another inscription at the same village (*E C. IX Nelamangala* 37 of 1033 A D). If this be so, the period of the temple would be the first half of the 11th century. The Gōpālākṛishna temple is likewise one of antiquity, the inscription of 1033 A D mentioned above, being engraved on its basement. It is said that the temple had formerly a figure of the god Chennigarāya and that Kempe Gauda used to bathe in the Arkāvati, pay homage to Chennigarāya, and make grants of land to Brāhmins. The Purānic account of Aṅgandapura is stated to form a section of three chapters of the *Nandīmahātmya*.

Aisamipalya

Aisamipalya.—A village in the Nelamangala taluk. To its west stands a *tōrana gamba* with inscriptions on both the pillars. Above the inscription, the right pillar has a discus and Garuda, while the left has a conch and Hanumān. The sluice of the Devarkere tank, to the north, is a fine structure in the shape of a four-pillared mantapa about 20 feet high.

Anekal

Anekal—A taluk in the south-east. Area 190·29 square miles. Head-quarters at Anekal. The following table shows the hoblis, villages and population in the taluk.—

Hobls	Villages including hamlets	Villages classified			Kayam-gutta	Popula-tion
		Govern-ment	Sarva-manya	Jodi		
1 Anekal	56	50		4	2	17,359
2 Sarjapur	47	42			5	14,903
3, Attibele	48	38	2	4	4	14,223
4 Jigani	54	38	1	3	12	12,863
Total	205	168	3	11	23	59,348

Anekal, 6 326 Sarjapur, 2 639, Dommasandra 1 890
Attibele 1,506, Jigani 1,310, Bommasandra, 1,572

Principal
places with
population

The South Pinakini runs along the eastern side and receives nearly the whole drainage. The western side is jungly and marked by a continuous range of hills through which several rivulets uniting under the name of the Suvarnamukhi, descend to the Arkavati at the lower level of Kankanhalli. The taluk consists of two principal valleys which collect all the smaller streams running eastward, the southernmost extends from Anekal to Attibele, through the northern flows the Sanatkumara, which joins the South Pinakini near Hosur in the Salem District, five miles beyond the Mysore boundary.

Except in the western parts the soil is fertile and well cultivated, but a somewhat better rainfall in those parts, owing to the proximity of hills, allows of the growth of rice without artificial irrigation. The principal dry crops are the ordinary ragi, gram, etc. The wet crops consist chiefly of paddy and sugar-cane. In favourable seasons two crops of rice are grown under large tanks. The sugar-cane is of a superior kind. There are many gardens of the betel vine with some areca and cocoa nut plantations. Minor garden produce is raised by Tigalas in the south-east. Mulberry cultivation is also met with here and there. The Sanatkumara supplies several small channels and tanks. Its waters are further utilised by means of pikota wells.

Iron ore is collected and smelted in the western parts of the taluk. Common cotton cloths are made at Anekal, Dommasandra and other places. Raw silk is produced at Anekal and Sarjapur. At this latter place, muslins of various patterns, turbans, and small cotton carpets are made.

The revenue settlement was introduced in 1891. The area of the taluk was in 1910-20 distributed as follows —

		Extent in acres
Culturable	} Forests	64 093
Unculturable		1 671
Other lands not available for cultivation		37 016
Total		<u>102 810</u>

run from Anekal to Mattikere and from Anekal towards Denkanikota. One from Anekal to Kankanahalli has also been traced.

Anekal—A town situated in 12°13' N lat 77°42' E. An kal
Long, 22 miles south-east of Bangalore. Head-quarters of the Anekal taluk and a municipality. The direct road from Bangalore is by Bannerghatta but there is also a cross road from the Hosur road beyond Hebbagol.

Population in 1921	Males	Females	Total
Hindu	2,55	2,25	4,80
Muhammadian	423	370	793
Christians	69	74	143
Others	21	25	46
Total	3,183	3,145	6,328

A fair is held every Friday attended by about 400 persons.

The municipal income in 1921-22 was Rs. 5,233 and the expenditure Rs. 4,955.

The origin of the name *āne kal* hailstone is not known. The town was founded about 1603 by Chikka Timma Gauda, a descendant of the original Sugatur chief. The general of the Bijapur State, after seizing Timma Gauda's hereditary possession of Hoskote, granted him Anekal, which formed a hobli of that paraganā. He thereupon erected the fort and temple, constructed the large tank to the west, and set on foot such improvements as tended to the opulence and prosperity of the town. After a reign of thirty years he died and was succeeded by his son Timma Gauda. The latter reigned twenty years and left the territory to his son Dodda Timma Gauda, in whose time Anekal was conquered by the Mysore Raja. The chief, however, remained in possession, paying an annual tribute of Rs. 2,000 and died shortly after, having completed a long reign of 60 years.

His son Vira Nanjana Timme Gauda then ruled for 24 years, and was in turn succeeded by his son Jama Gauda. This chief, in common with many others, was expelled by Haidar and his possessions were annexed to Mysore.

An interesting stone at Anekal has been brought to notice by Father Pession of the Kolar Gold Fields. It has at the top a large figure of a cross below which are three lines of inscription in what seem old Kannada letters. These show that it was set up to mark the *Kumbāra ane* or Potter's dam, of which there are still remains in existence. As the Dominican Friars are said to have built a Church at Anekal in 1400, it would seem that this dam may have been made for the benefit of their converts.

There are several temples here, of which the Channekēsava is probably the oldest. It is a fine structure facing east with a *mahādvāra* or outer gate to the south. The *navaranga* or central hall has four sculptured pillars supporting a ceiling carved with a lotus bud. The sculptures on the pillars illustrate the stories of several of the ten incarnations of Vishnu such as the Narasimha, the Krishna and of the Vāmana. Among other noticeable carvings are a figure of Vishnu with fourteen hands and a large conch-shell. In the *sukhānasi* or vestibule are kept two sets of *utsava-vigrahas* or processional images, a figure of Hānumān and three stone figures of Ālvārs of Srīvaishnava saints. The god of the temple is said to have been set up by the Pāndava prince Arjuna. The outer walls are decorated with pilasters and three niches surmounted by small *gōpuras* or turrets on the three sides of the *garbhagriha* or adytum. There is a figure of Hānumān to the right of the *mahādvāra*. The Amṛitamallikārjuna temple is a pretty large building facing the east with a *mahādvāra* and a good *dīpa-stambha*, or a lamp-pillar, in front. The pillar, about 20 feet high, stands on a raised pedestal, about 5 feet high, and has, on the west face Ganapati, on the north Virabhadra, on the south Nandi, and on the east a four-armed figure, about 2½ feet high, of Siva standing on a chariot, the upper hands holding an axe and an antelope, the lower a bow and an arrow. The Siva figure is rather peculiar, it is perhaps intended to represent that god as the destroyer of the Tripura demons. The lintel of the *sukhānasi* doorway

shows a *linga* flanked by elephants instead of the usual Gaja Lakshmi. To the north of the temple in the *prālāra* or enclosure in which is the shrine of the goddess. The Bhavanisankara temple said to have been erected by one Annadanappa about 200 years ago has three cells standing in a line, the central one having a *linga* known as Bhavanisankara the north a good figure of Parvathi and the south a *linga* called Nanjundēśvara said to have been set up some fifty years ago. The central Ganapati cell has also the processional image together with a standing figure and the *astra-dēvata* i.e., a trident standing on a pedestal. In the south cell are also kept the processional images of the Amrita mallikārijuna and the ruined Gangadharēśvara temples the former being what is known as Sōmaskanda mūrti consisting of the group Siva Parvati and child Skanda or Subramanya and the latter Umāmahēśvara. The centre of the *nataranga* is paved with a smooth stone slab measuring $6\frac{1}{2}$ feet by $3\frac{1}{2}$ feet which is said to be the stone cot used by a former chief of the place. It is semi-circular at one end and is carved with two parrots. It is said that its four ornamental legs are buried in the ground. The *nataranga* has also pretty good figures of Ganapati Chandēśvara Lakshminerāyana and Sūrya. There is likewise a rude standing figure in niche with folded hands which probably represents the founder of the temple. The short lamp pillar in front has Indra on the east face Nandi on the south Ganapati on the west and a lotus on the north. In a shrine in the enclosure is a good marble figure of Sankarā chārya, recently set up.

The Vēnugōpala temple is said to have been founded about 100 years ago by Raghunpatarya, a high officer under a former chief of the place. The god about 3 feet high is flanked by consorts. Raghunpatarya is also said to have founded the *agra hāra* (or rent-free Brāhman village) Kammasandra about $2\frac{1}{2}$ miles from Anekal, and to have erected the Rāma and Siva temples there which have now gone to ruin. The Dharmarāja temple enshrines colored wooden figures of the Pāndava brothers and their consort Dranpadi. There is also a stone figure about 1 foot high of Dharmarāja seated in *lalitāsana* or with one leg dangling holding a *gada* or mace in the right hand the other hand being placed on the thigh. The processional images are metallic figures of Arjuna and Dranpadi the former armed with a bow an arrow and a quiver. In front of the temple is

a small shrine containing a standing figure, about 3 feet high, of Potalāraju, holding a sword in the uplifted right hand and a dagger in the left. In the *prakāra* is a miniature Muhammadan tomb newly set up with a *panja* or metal hand. The meaning of this is not clear. The annual festival takes place in the month of Chaitra (April), and in the procession Draupadī has precedence over the others. Dharmarāja is not taken out. Outside the temple at some distance is a circular mud embankment, said to represent Saindhava, who treacherously killed Abhimanyu in the *Mahābhārata* war, and during the festival a huge head is fixed on the embankment and cut off. Sham fights also take place during the festival in imitation of the battle in which Abhimanyu was killed. The Timmarāyasvāmī temple, situated at a distance of about a mile from Anekal, has been recently renovated with the materials of the ruined Venkataramana-svāmī temple at Halehalli. So, the inscription *E C IX Anekal* 46 of Halehalli is now here. The god is what is known as *udbhava-mūrti*, an upright round stone said to be of the shape of a serpent (*Sēshākāra*) and supposed to have emerged from an ant-hill (*vālmīkōdbhava*). We have the usual tradition that the god revealed himself in a dream to a chief of the place and that the dropping of milk by a cow led to the discovery of the god. The car festival takes place on a grand scale in Chaitra (April) every year, at which about 10,000 people are said to collect together. There are several *mantapas* and other buildings to accommodate pilgrims during the festival. Behind the temple is a neat little shrine once dedicated to Narasimha, but now containing a figure of Hanumān.

To the south of Anekal is what looks like the site of an ancient city, now known as *Sāsanada-bīdu* (the inscription plain) and *būdihola* (the ash field). It is full of ashes, bones, and pieces of old pottery with various kinds of ornamentation. The pottery mostly resembles that found on the Chandravalli site at Chitaldrug. A few old bricks and neolithic celts were also picked up on the site. No information is available about the city which once stood here. The site is now being dug up for the ashes which are carted away for being used as manure for the fields. It is well worth exploration.

Aradesahalli —A Jōdi village in Devanhalli taluk four miles south west of Kundana with a population of 551. Contains some old stone inscriptions, one of Akalavarsha and two relating to the Punnād kings. Aradesahalli

Arkavati —A tributary of the Cauvery flowing through the District from north to south receiving the drainage of all the country between the central watershed and the western chain of hills. Its reputed source is a well on Nandidrug on the south west. Thence entering the Doddhallapur taluk it forms several large tanks as at Doddhallapur Kukoli and Hessarghatta, and passing through the east of the Nelaman gala taluk, receives in the south the Krmādvati from the west. It then flows through the Magadi taluk, passing east of Savandurga. Penetrating between Ramgiri and Sivagiri near Closepet, it runs through the Channarayana taluk in a south-easterly direction past Closepet and Kunagal which are on the left bank, into Kankanhalli taluk. Near Muduvadi durga it is joined on the north by the Vrishabhavati and then runs due south leaving Kankanhalli on the right bank, and discharges into the Cauvery on the southern frontier. The length of the main stream is about 120 miles. Arkavati

The greater part of its course from Magadi onwards is through a wild country amid rocky hills, precipices and thick jungle. Its waters are therefore little utilized in those parts for purposes of cultivation. Though never entirely dry it presents in the hot season the usual aspect of a sandy bed with a little current of water flowing at one side. Holes scooped in the sand furnish a ready means of water supply to the dwellers on the banks. In the rains, when the freshes come down it is a formidable stream, swollen by mountain torrents and bearing along in its irresistible force logs of timber and uprooted trees torn from the forests on its banks. It is bridged in three places for roads from Bangalore, namely 5 miles east of Nelamangala, 10 miles east of Magadi and at Closepet. The calculations for the second of these gave a maximum

flood discharge of 50,000 cubic feet per second, with an ordinary monsoon discharge of 3,500

Avati.—Properly Ahuti, a village in the Devanhalli taluk, 4 miles north of the Kasaba, on the road to Chikballapur. Formerly the capital of the Avati Prabhus. Population 1,153

It is historically interesting as being the original settlement of the seven enterprising farmers from Kānchi, whose story holds so prominent a place in the annals of the Bangalore, Kolar and Tumkur Districts. The three sons of Baire Gauda the leader, it will there be seen, established themselves as chiefs of Devanhalli, Doddballapur and Chikballapur respectively. Timme Gauda became lord of Sugatur Nād, obtained the title of Chikka Rayal, restored Kolar and founded Hoskote, while his descendents became the chiefs of Punganur and Anekal. Sanna Baire Gauda settled at Holavanhalli and founded Koratigere. Jaya Gauda became lord of Yelahanka Nād and founder of Bangalore, his descendents being the chiefs of Magadi.

The Chennakēśava temple here, has a figure of the god, about 2 feet high, flanked by consorts. There is a lofty four-pillared *mantapa* in front. Tradition has it that the figure of the god was found by the Prabhus in the midst of seven *koppariges* (or large metal boilers) of treasure which they were fortunate enough to unearth, and that they built this temple and set up the god. The Avati hill was once fortified. On it are several ash pits containing huge bones and ancient pottery. A few boulders at the top are pointed out as the place where the Prabhus had their *Karagada dēvaru* or gods in the shape of earthen pots. These are said to be there even now. On another boulder is sculptured a female figure, about 1½ feet high, which is said to represent Virakempamma, a princess of the Prabhu family, through whom it attained great prominence. A portion of the hill is known as her *bīdu* or residence. Another portion is called *Dodda-bīdu* (or the great residence), where it is said, the Prabhus once had their buildings, though a part of the village below the hill is shown as the site of their palace. A sloping rock at the foot of the hill on the west, which has a small hole

with some water in it, is called Kannikalamma's rock and is worshipped on occasions of droughts and at other times. It is believed that if the water in the hole overflows and reaches the edge of the rock, which is about 2 yards from the hole on any day, there will surely be rain that day. Kannikalamma means the goddess of the virgins, and it is only virgins and boys that are allowed to worship her and not adult men and women. If the latter want their desires to be fulfilled they are at liberty to make vows to the goddess but must always have the worship done by the former. If the worship is to be conducted after sunset several lamps are carried to the rock. The hill to the west is called Kōlugudda because it is said kōls or fowls were reared there during the rule of the Prabhas. A cave in the hill is known as Bhaktara gavi or the Devotees cave. In the valley between the Avati hill and Kōlugudda are several cromlechs each situated within a circle of rough stones the top slab being about one foot thick and nine or ten feet square. It is a wonder how these gigantic slabs were got to their place. It appears that during Arthur Cole's time a few of these cromlechs were opened by having the top slabs broken to pieces and the contents consisting of pots, iron sandals, spears and bone bones removed to Bangalore. The ash pits and cromlechs bear testimony to the great antiquity of the place. There is a pretty temple of Srinivasa on the hill called Gautamagiri but popularly known as Yashoraballi Timmarayaswami betta. The place is considered very holy and several marriages are celebrated here every year. The god about 5 feet high is a good figure with 4 hands the right lower being in the *abhaya* attitude and the other three holding a discus a conch and a mace. The outer walls have as in the Gōpāla krishnaswami temple at Devanhalli a frieze of large images illustrating scenes from the epics and the *Purāṇas*. The figures on the south wall and on portion of the east wall delineate the story of the *Kṛṣṇakāṇḍa* of the *Rāmāyaṇa*. Among the events illustrated may be mentioned—Rama shooting the seven *Sala* trees his alliance with Sogriva, the fight between Vālī and Sugriva, Vālī's death Tāra pacifying Lakshmana a rager. As at Devanhalli the south wall also illustrates the boyish sports of Krishna the west wall the coronation of Rāma and the north wall the ten incarnations of Viṣṇu. The Nara-simha incarnation is represented in some detail showing also

the events that led up to it. These friezes form a peculiar feature of some of the Dravidian temples in this part of the State, another instance that has come to notice being the ruined Ādinārāyana temple at Doddaballapur. A cave in the hill is pointed out as the hermitage of Gautama, who is said to have worshipped the god. There are 3 *tīrthas* on the hill named Sankha, Chakra and Lakshmi. It is said that Tulasi and Bael leaves, when thrown into the first *tīrtha*, sink and float respectively, and that they behave contrarily when thrown into the second. The Channarayana hill is also known as Gautamakshētra.

Baichapura

Baichapura —A village in Magadi Taluk, Population 316.

The Varadarāja temple at this place is a good structure in the Dravidian style. The image of the god Varadarāja is about 3 feet high. According to tradition, this temple was built by Kempe Gauda in order that his mother who was too aged to pay a visit to Kānchi might worship Varadarāja here. The god at Kānchi or Conjeeveram is Varadarāja. A similar tradition in connection with the Varadarāja temple at Maddur has been mentioned in the Mysore Archæological Report for 1910. There is also a shrine of the village goddess known as Kaligattamma at Baichapura. The goddess is a seated stucco figure about 3 feet high. In front of the shrine and to the south is a fine grove formed of the lofty pendent roots of a banian tree extending over a large tract of land. The roots have spread in all directions giving good shelter, though the original tree has disappeared. Close by is a Lingāyat *matha* known as Mummadi Gauda's *matha*, a stone structure with a *gaddige* or tomb of a Lingāyat *guru* in it. Mummadi Gauda most probably refers to Mummadi Kempe Gauda or Kempe Gauda III, who may have built the *matha*. It is said that the chiefs of the Yalahanka family built 300 such *mathas* in and around Magadi and endowed them. They also built and endowed Siva and Vishnu temples.

Bairan durga

Bairan durga.—A hill in the north-west of the Magadi taluk near Kudur. It was fortified by the Mahrattas about 1609 and, with Hulikal, formed into a separate paragana. It was purchased twenty years afterwards by the Mysore Rāja, who appointed Timme Nāyak as governor. He

improved and strengthened the fortifications, which consisted of three lines of defence and some outworks on the north and east faces built the temple of Bhairava at the summit and changed the name of the hill from Abdul Bandar to Bhairava-durga. The works were demolished and the town removed to Kudur by order of Tipu Sultan in 1792 on account of its unhealthiness and deficiency of water.

Banahalli —A village in Hoskote Taluk population 274 Banahalli.
A small ruined temple at this place has besides Saptamatrika and Ganapati a seated figure of Dakshināmūrti with four hands the upper two holding a drum and a trident, and the lower a vina or lute. There is also a curious two armed seated figure holding what look like a noose and a whip, with two horses on the pedestal one with a saddle and the other without it. May this represent Rūvanta? An old Nolamba record is to be seen near the village.

Bangalore —A taluk near the centre Area 375 07 square Bangalore
miles. Head-quarters at Bangalore. Contains the following hoblis, villages and population —

Hobli	Villages included hamlets	Villages Classified				Popu- lation

9	Kacharpalli	1,205	
10	Vartur	1,256	
11	Gunjur	1,187	
12	Hagadur	1,293	
13	Agara	702	
14	Tavarekere	1,141	
15	Hessarghatta	1,704	

The taluk was increased in 1870 by the addition of the Krishnarajpur and Yelahanka hoblis from the old Yelahanka taluk, and in 1873 by the Begur and Vartur hoblis from the Sarjapur taluk, and Kengeri hobli from the Kengeri taluk. By these accessions its limits were restored to nearly what they were in 1799.

The greater part of the taluk drains to the east, the waters being collected into two streams, which forming continuous chains of tanks, fall into the S. Pinakini. The northern of these commences beyond Yelahanka and, uniting near Hebbal with a stream from the north, flows into the South Pinakini at Kadgod. The southern runs from Vasantapur past Vartur into the same near the Patandur hill. In the western part of the taluk, a stream from Oyali Dinne feeds the Vrishabhāvatī, which, rising near Gavipura, flows past Kengeri and Bidadī to the Arkāvatī in Kankanahalli.

The south-west is rocky and hilly, the remainder being composed of open, well-cultivated country, undulating much towards the north-west. Some of the principal elevations are those at Doddettahalli (3,158 feet), in the north, at Banāvar (3,108), in the north-west, at Kotnur (3,118 feet) in the south, and at Banasvadi (3,029 feet) in the east. From the Oyali Dinne (3,118 feet), north of Bangalore, was measured

the base line of the Great Trigonometrical Survey, for 7 miles north-east to near Gubbī. There are numerous quarries around Bangalore of green stone which is not only largely employed for every variety of building in the town but transported to distant places.

The prevailing soil is the soil on which are cultivated ragi and the commonly associated dry crops. Paddy and sugarcane are grown on the lands under tanks. In the immediate neighbourhood of Bangalore especially on the south numerous kinds of fruits and vegetables are raised for the European market such as apples, peaches, grapes, mangoes, strawberries, cauliflowers, peas, knolkohl, cabbage, lettuce &c.

The weaving of cotton cloths is the most extensive native manufacture. There are of the ordinary as well of superior kinds. Coarse woollen blankets and gins for bags are also made. But the most important local arts are those of silk weaving and carpet making in the city of Bangalore regarding which and other arts pursued in Bangalore more particular mention will be found elsewhere.

The taluk is intersected in all directions by roads radiating from Bangalore, and, except on the south-east by railways.

The revenue settlement was introduced into the Bangalore Agara, Halsur and Yesvantpur hoblis in 1872 into Yelahanka, Krishnarajpur and Kengeri in 1875 and into Begur and Vartur in 1877.

The revision settlement was introduced with effect from the year 1907-08 and the cultivable area according to resettlement was distributed as follows:—

<i>Occupied area —</i>			
Dry		Rs 701	
Wet		8 511	
Garden		4 320	
	Total		07,560
<i>Unoccupied area —</i>			
Dry		11,935	
Wet		169	
Garden		63	
			12,167
<i>Ekharab</i>			71,214
<i>Isam</i>			13 060
	Total		1 94 703

The total land revenue demand of the taluk for the year 1921-22 was Rs 2,52,962 and the actual collection Rs. 2,25,570

The following was the average monthly rainfall in the taluk as registered at the different stations in the taluk —

Bangalore —The chief town, situated 12° 58' N lat and 77° 35' E long The seat of Government for the State of Mysore, and head-quarters of the former Mysore Division and present Bangalore District Population 237,496 It covers an area of 22 square miles and consists of two separate parts, namely, the City and the Civil and Military Station (formerly called the Cantonment)

Its name *Bengalûru* of which Bangalore is a corruption is said to be derived from *bengalu*, a kind of beans to account for which the following story is related —One day when king Viri Ballala was hunting he became separated from his attendants and losing his way wandered about till night fall. At last faint and weary he came upon a solitary hut, in which was an old woman, to whom he applied for something to eat. She had nothing better to offer him than some *bengalu* green beans boiled in a little water, which however he was glad enough to get and sharing them with his horse passed the night under shelter of the lowly hut. The incident speedily became known and the village (*ûru*) which sprung up thence took it is said the name of Bengalûru. This story, however seems to lack foundation (see below). The new village was it is stated, situated to the north of Kodigehalli and after Kempe Gauda had given the name to his new capital, was called old or Hale Bengalûru. At each of the cardinal points is a picturesque old watch tower, which marks it is said the limits to which it was predicted the town would extend. The prophecy has now been more than fulfilled. The one to the north is on the Oyaladinne overlooking the Rifle Butta, the one to the east is on the rock of the Halsur water works the one to the south is above the quarry on the east of the Lal Bagh and the one on the west is near Gavipur, at the north end of the Kempanibudhi tank bund. This one had lost its dome which has been rebuilt.

To Hindus Bangalore is popularly known as Kalyana nagara a name which has apparently arisen from a confusion of its name with Mangalore which translated means Kalyana nagara.

City —Bangalore City includes the Fort on the south and City extends to the Maharaja's Palace on the north. Several large extensions have been added to it the Seshadripuram and the Malleswaram from the race-course northwards, and the Chamarajpet, Shankarpur and Basavanagudi from

the Fort westwards and southwards It includes many suburbs and occupies an area of 11 square miles (see below).

Population in 1921	Males	Females	Total
Hindus (with 942 Jams and 8 Sikhs)	53,730	46,411	100,141
Muhammadans	7,539	5,573	13,112
Christians	2,457	2,488	4,945
Others	185	173	358
Total	43,911	54,645	118,556

The town itself was originally surrounded by a deep ditch and a thickset thorny hedge, which had served as a defence against the Mahratta cavalry It was stormed by the British in 1791, and a cenotaph is erected near the Halsur gate to Colonel Moorhouse and other officers who lost their lives in the attack The hedge was cleared away about 57 years ago, and the ditch has been filled up and built upon The orthodox number of gates (*bāgilu*) was eight, to correspond with the eight cardinal points but, after improvements, have added several new ones The principal are the Yelahanka gate on the north, the Halasur gate on the east, the Fort and Mysore gates on the south, the *Agrahāra* and Sondekoppa gates on the west, and the Bale gate on the north-west

The City or *Pēttah*, as it is popularly called, with its palms, temples, mosques and shops, through crowds of Indians shopping and talking on the roads, is a picturesque sight

It is divided into numerous *pēte* or quarters But the Doddapēte (High-street) running from the Yelahanka gate in the north to the Fort gate in the south, separates the two comprehensive divisions of Deshadapēte on the west and Nagartapēte on the east This line is crossed at right angles by a street running from the Halasur gate on the east to the Sondekoppa gate on the west The intersection of these two main roads is styled the *chaurk*, or square, near to which was situated the old Taluk Cutcherry, now marked by what is called the Ahmed Buildings in Chikpēte.

Between the Fort and Mysore gates is a well-built public

market Siddi Katta the quarter in which many Brahman officials at one time lived, occupies, it is said, the site of an old tank built at the expense of Siddi, a lady of the Kempe Gauda family. A good part of it has now been taken up by the market, which has been extended and relaid on generous lines. It includes a cloth bazaar and a grain bazaar besides long rows of vegetable and fruit stalls. Opposite to the Market are the Victoria Hospital and the Sir K. P. Puttanna Chetty Dispensary, which is attached to it. Not far from it the Minto Ophthalmic Hospital. The City Railway station is on the west of the Dharmāmbudhi tank, and its advent sixty two years ago caused a great transformation on that side of the town. The houses forming the quarters of the railway staff are chiefly to the west of the station where there are also a church and a chapel.

Owing to the circumstances of its origin, the rapid growth of the town, and the various hands through which it has passed, the streets in the old parts are often narrow and mostly irregular in appearance. The latter defect has been to some extent remedied by the construction of stone drains along both sides of the principal streets, which has also promoted the cleanliness of the town. Many streets, too, have been widened as far as possible. Substantially built and imposing edifices may be seen in Chikpēte and other parts, belonging to wealthy Indians, but their effect is a good deal lost from their scattered positions. Bangalore, however presents a lively specimen of a Hindu town, the main streets being generally crowded with pedestrians, among whom vehicles of all kinds, from the motor car, carriage or brougham of the high official to the rude jutka of the merchant trader and the slow and heavily laden bullock-cart tread their difficult way by dint of continual vociferous shouts.

The open stalls or bazaars on either side of the Doddapēte and other thoroughfares display their wares arranged on tiers of shelves, all within reach of the owner who sits comfortably ensconced among them. Customers stand in the street to make their bargains or squat on a small ledge

in front of the shop for a preliminary chat with the proprietor. Those of a trade generally flock together, so that many shops containing the same description of goods will be found side by side. In the Grain market (Taragupēte), a perfect block of carts stops the way, their contents being discharged in heaps into the street, where they are measured before being stored. In the Cotton market (Aralepēte), the verandahs of the warehouses are piled with bulging bales. In 1889, arrangements were made to remove these markets to the Western Extension, now called the Chamarajpet Extension. A committee was appointed to carry out this scheme into execution and it finished its labours in 1895. The New Taragupete forms part of this Extension.

In the quieter and more private parts of the town, the floor and ground at the entrance to the houses will be seen carefully washed with purifying cow-dung, and pleasingly decorated with numerous geometrical figures, which are drawn afresh by the women with lines of white chalk every morning while the lintel of the door is decked with mango leaves strung on a thread as a sign of welcome. On all sides may be seen women, with water jars and shining brass vessels, grouped round the public wells and fountains, or on their way to a tank with baskets of clothes. The peculiar odours of eastern bazaars pervade the streets, mendicants go from house to house sounding their conchs or gongs, and the universal babel gives evidence of the out-door life of the people.

The water supply of the town was originally being derived principally from the Dharmāmbudhi tank on the north-west. From this reservoir water was laid on to the streets and drawn out by the people as required from the square troughs or basins constructed at convenient points. The residents of the north-east quarter resorted to the Sampangi tank, the bed of which is now a polo ground. The well-water in the town is mostly brackish. But at a cost of 19½ lakhs a pure and abundant water supply has now been provided, drawn from the Hessarghatta tank, 13 miles to the north-west. An inscription of 1533 A. D., in Nelamangala taluk, mentions

Hessarghatta, otherwise called Sivaxamudra *agrahāra* of the Yalahanka Nad as the place where there was a big tank formed in the Arkavati river. The water is pumped up to the top of a hill at Bannavar, and from there runs by gravitation through cast iron pipes to the settling and filter beds above Sankey's reservoir to the west and thence to a subterranean reservoir at the Race-course whence it is distributed in iron mains to all parts of the City and drawn off at stand pipes or hydrants at suitable points in the streets.

The drainage of the Pête is collected into one main channel which runs out from the southern side and is continued as far as the Sunnakal tank a distance of two or three miles where the sewerage is applied to agricultural purposes. A suitable scheme of drainage on up to-date lines is now under consideration of the City Municipality.

The Fort is no longer used for any military purpose and is now a part of the City. The original Fort was of mud and is said to have been erected in 1537 by Kempe Gonda Prahhu of Yalahanka and ancestor of the Magadi chiefs. Under its Hindu masters namely the Magadi gaudas the Mahratta governors subordinate to the Adil Shahi princes of Bijapur and lastly, the Mysore Wodeyars, the Fort retained its old character, with no doubt some additions to its strength. But under the Muhammadans the fortress was enlarged and rebuilt of stone. This work is attributed to a Khilidar named Ibrahim Salih and was carried out in 1761, the first year of Haider Ali's reign. The form of the Fort is oval with round towers at proper intervals. It had, when captured by the British in 1791 five powerful cavaliers a *fausse bray* a good ditch and covered way without palisades, but the glacis was imperfect in some parts. The two gateways one in the north and the other in the south, were called the Delhi and Mysore gates respectively. The former which opened towards the Pête was a handsome structure in the best style of Muhammadan military architecture and consisted of several gates surmounted by traverses. But there being no ditches between the gates an enemy taking possession

of the works over the first gateway had a ready communication with all the others, which the British troops who stormed the Fort at this point took advantage of

Within the Fort, the principal building was the *Mahal* or palace (on the plan of the one at Sira), which, though the walls were of mud, was not without some degree of magnificence. The building was of two storeys. A large open court in the front surrounded by a corridor, in the centre of which, opposite the palace, was the *naubatkhana* or raised band-stand. The upper storey of the palace contained the public and private apartments of the Sultan and his ladies, with two balconies of state from which he gave audience. Paint and false gilding decorated the walls.

Buchanan thus describes the arrangements of the building as he saw it in 1800. "On the upper storey, it contains four halls, each comprising two balconies of state for the prince, and each balcony faces a different *cutcherry* or court for giving audience. No persons, except a few trusty guards, were admitted into the hall with the Sultan, but at each end of the court was erected a balcony for the officers of the highest rank. The inferior officers occupied a hall under the balcony of the prince, open in front, and supported by columns as high as the roof of the upper storey. The populace were admitted into the open court, in which there were fountains for cooling the air. At each end of the hall are private apartments, small, mean, and inconvenient. The bath consists of a small room, in which a person may sit, and have water poured over him. There were two apartments for the ladies. One, for the principal wife, contains a *cutcherry*, where, like the Sultan, she gave audience to the concubines, and to the ladies of the Musalman chiefs. The other apartment belonged to the concubines. It is a square court, having at the two sides a corridor, under which the women sat at their meals and amusements." An inscription found in it says it was begun in 1781 A. D. and completed in 1791 A. D. The dates are expressed in phrases, meaning "Abode of happiness" and "Envy of heaven."

An inscription in Bangalore taluk of 1705 A D, states that the Venkatāvara temple (now known as Venkatarmanā swami temple) in the Bangalore Fort was erected by Chikka Dēva Raja and endowed by his son Kanthirava Narasa Raja.

When the Fort was restored to Tipu at the peace of 1792 he dismantled it but after 1799 Purnaima had it completely restored on the former foundation. On the removal of the British garrison from Seringapatam in 1809 some of the troops had their quarters in the Fort where the General Commanding and many of the European residents also lived. The arsenal was not transferred to it till about 1823. From 1831 the principal departments of the Administration were accommodated in the palace above described until in 1868 the new Public Offices in Cubbon Park were completed the removal to which carried away the few remaining European residents. The palace having partly fallen in, the greater part was demolished but the Government Press remained there till the present building was erected for it. The arsenal had been given up when the military guards were withdrawn and the Fort was handed over to the Civil authorities on the 2nd October 1888. What remains of the palace was for some time used for the Forest Police and Excise offices. But at present besides being an object of interest it is used by the Mysore Boy Scouts as their Head-quarters. The Municipal Office was also in the Fort until it was shifted to the present place. Orders have been long since issued for the removal of all these offices with a view to conserving the building as a historical monument. In Home's *Select Views in Mysore* (1791) there is an interesting inside view of this palace. One can infer from it the glory that once belonged to it.

The little Church in the Fort used by Protestants, was dedicated by Bishop Turner (John Matthias Turner) fourth Bishop of Calcutta (1829-1831) while on his visitation tour in the Madras and Bombay Presidencies in 1830. The first stone for it was laid in that year by him (See Bishop F. Chatterton's, *A History of the Church of England in India* 1831)

The Roman Catholic Church known as St Joseph's, is just outside the Fort, on the new Tharagupet Road. It is a fine large Church built in the form of a Cross. During the festival seasons it is beautifully decorated with flowers. On these occasions, its precincts are quite full, and some of these festivals being well-known ones, people from far and near attend them in large numbers.

Outside, on the east, are the the Lascar Lines, a quarter inhabited by large numbers of poor people. On the west side, south of the Mysore Road, is the Chāmarājapet Extension, with the Victoria Hospital and the Minto Ophthalmic Hospital. Both of these stately buildings, one facing the east and the other the west occupy the large square commencing from the Fort gate to the New Tharagupet on the west. North of the Mysore Road are the barracks of the Barr or Mysore Infantry. The new extensions of Shankarpur, Basavangudi, and Gavipur and lastly the Non-Gazetted Officers' extension are all to the south of Chāmarājapet. The northern extensions consist of Sheshādripuram, Raiyats' Block and the Mallēsvaram. A new extension by name Visvēsvarapur Extension has recently been formed to the east of the Shankarpur Extension, and the Fort Main road now called Krishnarajendra Road.

Buildings in
the City

The most prominent buildings and places in the City limits are, the Maharaja's Palace, to the north-east, near the Cantonment Railway Station, the Public Offices in Cubbon Park, with the old Band Promenade around Sir Mark Cubbon's statue, and the Tennis Courts and Museum lower down. In the road from the Public Offices to the Yelahanka gate are the Government Press, the Central College and the Meteorological Observatory, the Mysore Bank Buildings, the District Cutcherry, with St Martha's Hospital and the Maternity Hospital beyond to the east, and the Central Jail to the west. North of the Jail is the Race-course with the Silahdār lines to the west. Between the Race-course and the Golf Links is a new quarter, composed of houses

mostly in the European style occupied by the leading Durbar Officials. The cotton mills are on the north west, close to the Southern Mahratta Railway line, and the fine building of the woollen mills to the south west also close to the line.

No account of Bangalore would be complete without a notice of the Lal Bagh. This beautiful pleasure garden situated about a mile to the east of the Fort, appears to have been first laid out in the time of Haider Ali (perhaps after the one at Sirs) and enlarged in the time of Tipu Sultan. Dr Buchanan, writing in 1800, says — The gardens are extensive, and divided into square plots separated by walks the sides of which are ornamented with fine cypress trees. The plots are filled with fruit trees and pot herbs. The Mussalman fashion is to have a separate piece of ground allotted for each kind of plant. Thus one plot is entirely filled with rose trees another with pomegranates and so forth. The walks are not gravelled and the cultivation of the whole is rather slovenly but the people say that formerly the gardens were well kept. Want of water is the principal defect of these gardens, for in this arid country everything during the dry season must be artificially watered. The garden of Tipu is supplied from three wells, the water of which is raised by the capily or lenthier bag fastened to a cord passing over a pulley and wrought by a pair of bullocks which descend an inclined plane. This the workmen say is a much more effectual machine than the *yatam*. Haider's garden is watered from a reservoir, without the assistance of machinery. The taste of Haider accorded more with the English than that of his son. His walks are wider, his cypress trees are not so much crowded, and in the means for watering the plots there is not so much masonry or bricklayers work employed. There is indeed, so much of these in the parts of Tipu's garden which he probably considered the finest, as almost to cover the ground and to leave nothing but holes as it were through which the trees grow.

During the latter part of Tipu's rule, and for long after, the Lal Bagh was supervised by two Darōgas, father and son. The former, named Muhammad Ali, seems to have been invested with considerable powers and was able to do a good deal for his charge, but under Abdul Khader, the son, whose authority was probably more limited, the garden became an ill-kept jungle of fruit-trees. In 1836, Sir Mark Cubbon made over the Lal Bagh to the Agri-Horticultural Society, then newly formed in Bangalore, and assisted them with convict labour. But the Society came to an end in 1842 and restored the garden to Government. In 1856, on the recommendation of Dr Hugh Cleghorn, it was formed into a Horticultural Garden, and a professional Superintendent was obtained from Kew for its management. This system has continued to the present time and the gardens have a wide-spread reputation. Flower and fruit shows have all along been held twice a year, in July or August and in January or February, when numerous prizes are awarded, and there is a keen competition among exhibitors, of whom the greater number are Indian gardeners. Flowers, plants and seeds are obtainable for sale at the garden.

The Lal Bagh contains a rare and valuable collection of tropical and sub-tropical plants, together with indigenous and foreign fruit-trees. The stock is constantly replenished by exchanges and donations or importations. Being situated under a tank, the cultivation is easily supported by irrigation. Since the Rendition, it has been extended to the east and now contains nearly 108 acres. A handsome and spacious glass house, the foundation-stone of which was laid in 1889 by the late Prince Albert Victor of Wales, has been erected as an Exhibition Hall. This Hall is built in the model of the Crystal Palace and occupies 18,800 sq feet in area. A complete collection is being made of coloured botanical drawings of indigenous plants, for which an artist is employed. An Equestrian statue of His Highness Sir Sri Chāmarājēndra Wadiyar Bahadur, G C S I, erected in about the central portion of the Lal Bagh, is also a special feature of attraction.

Indians of all classes fully appreciate the Gardens and every evening numbers are there sitting under the trees or looking at the flowers and animals

The Pettah and the fort as they were in 1794 are thus described by Home in his *Select Views in Mysore*, written after the taking of the place in 1791 —

The pettah or town, is of considerable extent being two thousand yards long by seven hundred and fifty broad within the fortifications which consists of a rampart a thick hedge and a deep dry ditch These do not completely surround the place it being left open at the part opposite the fort to the north of which it is situated The fort is of an oval figure extending some what more than nine hundred yards in its longest diameter It is fortified with a broad double rampart about thirty semicircular bastions, or turrets and five cavaliers There are two entrances to it one at each end That on the north called the Delhi gate consists of five strong large gates finished with considerable elegance that on the south called the Mysore gate consist of four only low and far inferior to the others in beauty Both these gates are covered with outworks The ramparts of the fort are extremely well built The ditch is deep and wide, but dry in most part of it, the faussebraye and covert way are both very broad Originally built by the Hindus, as some figures sculptured in the walls and an ancient pagoda in the middle of the place sufficiently evince it has been considerably altered and improved in the modern style by Haider Ali and Tipu Sultan who have added many outworks and by whom the Delhi gate has been entirely rebuilt They likewise established here a mint, a foundry for brass cannon a machine for boring them another for musket barrels, which will bore a hundred and thirty at once an arsenal for military stores and magazines for grain and gunpowder Though these are in point of utility the most important the most splendid fabric within the walls is the palace built by Tipu for his own residence This is grand and spacious displaying to the four winds of heaven as many ample fronts each composing a lofty hall the wooden roof of which is supported by colonnades of the same material The pillars are connected by scalloped arches and the whole is superbly painted and gilt The walls in front of the entrances to

The Pettah
and Fort in
1794

the east and west halls have balconies, richly carved, and raised by small pillars, united by arches. In the middle of each balcony is a square projection, which we supposed to have been intended for the seat of State, whenever the Sultan held a Durbar. The north and south fronts are extremely airy, no wall dividing them, so that the eye completely pervades the building. In front of each face of the palace is a fountain, and on the north, south and west, are zenanas, not yet finished, low but highly ornamented with painting and gilding. Opposite the north and south fronts are small flower gardens, on the right and left, in which the pink of Europe vies with the variegated flowers of the east."

Taking of
Bangalore in
1791

The following is an account of the taking of Bangalore Fort in 1791 by Cornwallis:—

"It was late in 1790 before the siege of this place was resolved on, and early in 1791, Earl Cornwallis took the command of the army, avowedly with the intention of attacking it. He began his march from Vellour on the 5th of February, on the 20th, the whole of his forces had ascended the ghauts by the Mugalee pass, and on the 5th of March the army was encamped before Bangalore.

Tipu having been deceived into a firm belief, that his lordship meant to take the road of the Barramaul valley, had fortified the Changanmah pass in that quarter, and made dispositions to prevent our army from ascending the ghauts there. To call our general's attention homewards too, already had he begun to ravage the Carnatic, and had even taken Permacoil. Astonished when he found himself so egregiously duped and learnt that the British forces, having without interruption surmounted the formidable barrier opposed by nature to their progress, were rapidly penetrating into his dominions, he found himself compelled to abandon his purpose, and repair with speed to the protection of his own country. Marching with incredible diligence, he arrived near Bangalore on the same day with our army, and made a show of offering battle, but Lord Cornwallis, not deceived by this feint, opposed to his left wing only, while the right, covering the battering train, baggage and stores pursued its march. The enemy began a cannonade at a great distance, which as they did not advance, was not returned. In the

evening the whole army encamped within three miles of the fort and next morning took a more convenient position on the north east of the petta. The same morning the petta and fort were reconnoitred and in the afternoon another reconnoitering party went out, escorted by Colonel Floyd with the whole cavalry, and a brigade of infantry. The Colonel observing the rear of Tipu's army, at a great distance from the main body pursued and attacked it with the horse and made himself master of some guns. But a body of infantry advantageously posted behind some rocks which he had not observed galled him severely and obliged him to retreat. He was himself wounded and his loss was considerable, chiefly owing to the badness of the ground. It being on many accounts desirable for our forces to have possession of the petta it was resolved not to defer its attack. Accordingly the King's 36th regiment and the 26th battalion of Bengal sepoys under the command of Lieutenant-Colonel Cockerell with a body of artillery under Lieutenant-Colonel Moorhouse were ordered to storm it the following morning.

On the seventh at dawn, they advanced to the north gate which had been fixed on as the point of attack. The first barrier was soon penetrated and they rushed on to the second but were opposed there by well-directed and close fire of the infantry from the walls accompanied by showers of ground rockets which did considerable execution. A six pounder was run up with its muzzle to the gate but its explosion had no other effect than making a small hole. A second time it was fired with no better success. At this critical juncture fell the gallant Moorhouse. As he was giving directions for an iron twelve pounder to be brought up he received a ball under his left shoulder and almost instantaneously expired. Still the attack was continued with undaunted perseverance and the gate being at length considerably shattered by reiterated explosions it was forced open and the whole detachment rushed in. The enemy fled from the gate but continued firing from the houses for some time. Parties were sent in different directions to dislodge them, and before nine we were in complete possession of the place. Captain Delany of the 36th, was killed at the beginning of the attack and our loss altogether amounted to about a hundred men. In the afternoon Tipu made an attempt to dislodge us, three kushoons of his infantry entered the petta

at the opening on the south which we have already noticed. Marching in regular divisions, their attack was conducted with great spirit, whilst Tipu advanced from the north-west side of the fort and cannonaded our main army. The steady bravery of our troops, however, reinforced with the 76th regiment, compelled them to retreat, with the loss of their standards, and at least five hundred men.

Our batteries were soon after begun, and on the 12th three of them opened on the fort with considerable effect on the defences but, too distant for making a breach. Two others were erected, therefore, about four or five hundred yards, from the works. These soon demolished the stone facing, but the solid body of the rampart, which was of red clay, crumbled but slowly.

On the 17th Tipu again cannonaded our camp from the heights on the north-east but at too great distance to occasion any serious mischief. On the 21st he once more attempted to interrupt our operations, appearing with his army on the east side of the fort, and seeming to meditate an attack on our batteries. He had likewise opened embrasures in the bank of a tank, in which he had planted some heavy cannon, that would have enfiladed our trenches. His right wing and rear, however, being exposed to the attack of one of our wings, which made a movement towards him, he drew off, leaving part of his guns behind him. Thus had he now made an attack from each of the three open quarters, and found them equally unsuccessful.

Notwithstanding the heavy and well-directed fire from the fort, from which the mud walls and other cover in the *petta* greatly protected our troops, the breach was now practicable, and accordingly, it was resolved to storm the fort without delay. The flank companies of all the king's regiments, under the command of Major Skelly, and supported by some battalions of sepoys, were ordered upon this service. Colonel Maxwell commanded the attack, which commenced about eleven o'clock. The fort, in a moment, was completely illumined by a number of blue lights suspended from the ramparts, for the purpose of discovering the assailants, a practice very common in Indian camps and garrisons. These lights exhibit to the camp a striking and interesting scene, during the mounting of the breach, and the climbing over the different parts of the gateway, which was a principal object of the attack. The grenadiers with their usual intrepidity first ascended the breach, clearing the way

with their bayonets and dispersing the enemy with great slaughter. Thence they proceeded along the rampart to the right whilst the light infantry took the contrary direction, and the rest of the troops descended into the body of the place. They all met near the opposite gate, which the fugitives in their tumultuous retreat had now choked up and a horrible scene of carnage ensued. The killehdur or governor, Bhaudar Khan, a venerable old soldier and a favourite of his master fell bravely fighting to the last near the colours of his fort. Above six hundred of the garrison shared his fate three hundred most of them wounded were made prisoners and near two thousand are said to have escaped. Our loss was only about fifty officers and men killed and wounded. The body of the killehdur was found the next day amidst a heap of slain and pierced through and through with balls and bayonets. Earl Cornwallis sent a message to Tipu with an offer of the corpse for interment to which the latter with equal spirit and prudence replied that the proper place for the burial of a soldier was the spot where he fell. In consequence the body was buried in the fort by the people of the Mussalman religion and with every mark of distinction. If we consider the circumstances attending the siege that the enemy was in full possession of the open country so as to preclude the possibility of our getting supplies that during our operations in the petta we had but a small force in the camp to withstand the attacks of their whole army and that both our provision and ammunition were nearly exhausted the capture of Bangalore may be deemed one of the greatest achievements of the British arms in India.

The European Cemeteries in the city contain some interesting monuments. At the Cenotaph near the Halsur Gate which has been already mentioned there was originally a cemetery with a number of tomb and cypress trees of which a picture may be seen in Home's *Select Views in Mysore*. Home describes the tombs as elegant monuments and gives the inscriptions on seven of them, which are those of seven persons (Delany to Williamson) mentioned as numbers 2 to 7 in Mr Rice's *List of European Tombs and Monuments*. All trace of this cemetery has disappeared and its place is occupied by the present Cenotaph which was erected by the

The
European
Cemeteries.

Mysore Government and it is kept in repair by the Public Works Department. The Cenotaph is in memory of those officers and soldiers who gallantly fell at the siege and died in Bangalore in the years 1791 and 1792, those who fell at the taking of Bangalore; those who fell in the campaigns of 1791-92 after the capture of Bangalore in the assault on Tipu's lines, and the island of Seringapatam, 6th and 7th February 1792, in the engagement before Seringapatam, 22nd February 1792, and in the campaign of 1799. Among those who fell in 1791, was Colonel Moorhouse, of the Madras Artillery, who was killed at the storming of the Pēṭṭa, 7th March 1791. He was a very gallant and valuable officer highly respected throughout the army. He was lamented by the Madras Government as an officer whose long, active and zealous services deserved the highest praise, and he was interred in St Mary's Church, Fort St George, at the public expense.

In the Fort Cemetery, situated on the Minto Hospital Road leading to the Shankarpur Extension, the earliest tombstone is that of Peter Kelly, "Merchant of Seringapatam," who died on 20th November 1807, aged 34 years.

Basavangudi
Temple

The Bull Temple, after which the Basavangudi Extension in Bangalore City is named, is a large sized structure, with a fine *Dvajastamba* before it. The Bull is cut out of a monolith and is well proportioned. Inscribed at its base is the inscription registered as *Bangalore* 70, which probably belongs to the time of Kempe Gauda. The inscription states that at the feet of the god there are the sources of the *Vrishabhāvati* river which runs to the west. It is an affluent of the *Arkāvati*, which it joins a few miles north of Kankanahalli.

The Ganapati shrine at the foot of the Bull Temple contains a huge Ganapati figure, also a monolith. Not far away is the *Kādu Hanumān* temple, the huge image in which is similarly cut out of a single stone.

Bangalore
City Municipality

The administration of the City Municipality vests, under Regulation No. VII of 1906, in a Municipal Council, consisting

of 30 Councillors, 19 of whom are elected by the Rate payers of the nine Divisions into which the City is divided as noted below, 9 nominated by Government and one elected by the Bangalore Chamber of Commerce. The Council is reconstituted once in three years. The right of electing a President was given to the Council in 1920.

1	Palace Division	1	6	Jal Bagh Division	1
2	Balepet do	3	7	Fort and Channaraja	
3	Manavarthapet Division	4		pet Division	3
4	Ulsoorpet do	2	8	Basavanagudi Division	2
5	Nagartharpet do	1	9	Malleswaram Division	2

The Executive Staff consists of a Municipal Commissioner appointed under Municipal Regulation No IV of 1923, a Health Officer and a Municipal Executive Engineer. For special works connected with City Improvements, there is a Special Executive Engineer.

The last municipal general elections took place on 8th September 1924 and the following two days throughout the City. The number of voters at the time was 3 671 the number of voters who actually voted being 2 458. Women have the right of voting under the Regulation the number of women voters at the last general elections being 528. Though a large number of women voters did exercise the privilege of voting statistics are not available to show the actual number who voted.

The Municipality dates from 27th March 1862 when a number of leading citizens formed themselves into a Board binding themselves to abide by Act No XXVI of 1850. The Board worked under the Superintendent of the Division and the Amildar was its chief executive officer. Their duties were defined and they met once or twice a week to discuss the needs of the City. They imposed a sanitary tax of four annas for every 40 square feet of built area and subsequently permission to levy an octroi duty on tobacco sayar duty on country piece-goods, nuts and pepper was granted. The Municipal Regulation of 1871 came into force on 1st April 1871. Among other things, it provided a certain number of Municipal Commissioners, and a better conservancy system. In 1871 a full time President

was appointed in the person of Dr J H Orr, C B , who, is still well remembered in the City In 1881, however, the full-time President gave place to the Deputy Commissioner as *ex-officio* President In 1896, however, a full-time President was again appointed In 1898, the former arrangement was once again restored In 1904, however, a full-time President was again appointed, though in 1906, the Deputy Commissioner was re-appointed as *ex-officio* President In 1913, however, an Honorary President was appointed and in 1920, as above stated, the right of electing a President was granted to the Council

The Municipal Regulation of 1871 was amended successively in 1888, 1890, 1899 and 1900 and in 1906 it was wholly replaced by Regulation VII of 1906, which was passed on 16th October of that year and came into force on 1st January 1907 This Regulation was amended in 1911, 1916, 1918, and 1923 The present constitution is governed by the Regulation of 1906 as amended The amending Regulation (IV) of 1923 empowers the appointment of a Commissioner for carrying out the chief executive duties of the Municipality

For administrative purposes, the City is divided into nine divisions, and the Council manages its business in meetings convened for the purpose and also by one or more of its Committees, some of which, including the Managing Committee, the chief of them, are of a statutory character The business of the Council is spread over several departments, each with a requisite establishment of its own The Commissioner is generally responsible for the executive work He is also the Land Acquisition Officer for purposes of acquiring property within the limits of the City The President is empowered to convene the meetings of the Council and preside over its deliberations and is under the Regulation, the channel of communication between the Council and the Government He is also the final authority in all matters municipal, except where the Council has reserved special powers to itself or where they are so vested under the Regulation The Municipality has carried out many improvements in the City About 50 years ago, the deep ditch and thorny hedge which surrounded the old town was cleared, the ditch being filled up and built upon Since 1895, many new extensions have been formed, as above mentioned On the levelled sites and cultivated fields of about 26 villages, which the City has absorbed, stately buildings have been erected

The present City includes the fort on the south and extends to the Palace of H H the Maharaja on the north. It was only 8½ square miles in area in 1897. In 1926 it was nearly 11 square miles. Population and trade have increased and the style of house building has also improved. The following figures indicate its growth —

Year	Population	Percentage of variation
1881		+ 7 per cent
1891	60 000	+ 28.8
1901	70 000	- 13.5 "
1911	88 000	+ 27.7
1921	118 000	+ 23 "

Population

Variation for 50 years 93.3 per cent

The appearance of the plague in 1898 claimed a heavy toll and checked the growth of population to some extent as indicated in the figure for 1901.

The following table shows the growth in the density of population —

Year	Number of persons per house	Number of houses per square mile
1891	7	978
1901	5	1,320
1911	7	1 063
1921	5	2 463

The number of occupied houses in 1921 was 24 034 and the number of persons per square mile 12 147.

The following is a statement showing the population in each division of the city as per the Census of 1921 —

Division.	Population	Division	Population.
I	7,860	VI	9 643
II	23,425	VII	11 621
III " A "	30,578	VIII	5,128
III " B "		IX	5,936
IV	17,344		
V	7 015	Total	1 18,556

Improve-
ments
effected

The old City is being opened out, its narrow roads are being widened and fresh extensions are being laid out to house the growing population. With the improvements now going on, the City bids fair to become one of the most neatly laid out in India.

Description
of the City

It may not be out of place to refer in outline to the principal portions of the City just to give an idea of its thoroughfares, and to show how the extensions have become popular and attractive and where the improvements are being effected.

The heart of the City includes Doddapet, Chikkapet, Siddicutta, Taragupet, Arle (Cotton) Pet and Nagarathpet, which contain wholesale and retail shops. The total area of the old City is 2358.53 acres, of which 665.72 acres form the built-up area. The difference, viz., 1692.81 acres, consists of hamlets, tanks, parks, railway station, schools, jail, hospitals, public offices and the race-course. The population in this area is about 93,000. In the built area the density is over 200 per acre. The principal sanitary measures included in the present town-planning operations are confined to this area.

The remnants of Tipu's Palace and a dungeon near the Delhi-gate are, as mentioned above, places of antiquarian interest in the Fort. The Central Police Station, the Government Book Depot, the Chamarajendra Sanskrit College, the Bangalore Taluk Office, the Reserve Police Lines, the Government A-V School are also located here.

The High Ground contains the West-end Hotel, the Race-course, the Golf Links and the residences and offices of some of the high officers of the State.

The exten-
sions

Chamarajapet extends to the west of the Fort and contains very elegantly built bungalows and cottages. It is the first extension opened after the Rendition.

The Basavangudi Extension lies to the south of the Fort and consists of over 1,000 very neatly and fashionably built cottages. The Basavanna Temple is the favourite resort for picnic parties. The Bugle rock in front of it affords a panoramic view of the whole City from its railed platform.

Malleswaram an extension on the Tumkur road laid out simultaneously with Basavangudi contains 10 avenues north and south and 18 cross roads east and west. Over 1,000 houses are built in ever varying designs. Mantap Hill the highest point in the City lies to the north-east of this extension just above the Sankey's Reservoir. The Jewell Filters are to the north of this Extension.

The Shankarapur Extension forms the connecting link between Chamarajapet and Basavangudi with the magnificent edifice called Shankar Mutt in which the Indian Sanskrit Institute is located, in the centre.

According to an official description these Extensions are laid out on the gridiron or chess board plan. They are rectangular with the boundary roads running north and south and east and west. In Basavangudi there are four diagonal roads also. A narrow conservancy lane in the backyards of houses forms a distinguishing feature of these Extensions. They are located on high ground and the drains are so well constructed on the road-sides that after the heaviest downpour of rain it is remarkable no pool of water is to be seen anywhere. The sewerage is on the combined system of open drains and underground sewers. The open drains in the conservancy lanes are flushed by means of bent tube flushing syphons and the underground sewers by means of flushing tanks fitted with Field's flushing apparatus.

The normal annual receipts of the Municipality excluding Government grants etc. amount to about Rs. 6 lakhs, mainly derived from municipal rates and taxes octroi and revenue from municipal property. In 1925-26 it amounted to Rs. 6 lakhs as against Rs. 14 lakhs in 1892. The normal expenditure incurred mainly on Public Works Electric Lighting Public Health Education and General administration amounts to about 6 lakhs. In its improvement work the Municipality is being annually helped by Government by liberal contributions which have varied from time to time.

The City is quite as noted for its gardens as for its climate. Horticultural facilities abound in the place. A greater

variety of vegetables, flowers and fruits is not raised anywhere else in South India. English vegetables, French beans, ornamental flower shrubs, brilliant foliage plants, gorgeous blossomed creepers and orchids, apples, figs and mangoes, to mention only a few of the most important, are raised and exported in large quantities. Delicious mango fruits find their way to the markets of the distant Punjab and Bombay in the season, and grafted mango plants are supplied to all parts of India. A casual visit to the Horticultural shows annually held in the City will satisfy the curious in this respect.

Water Supply

The City receives its water-supply from the Hessarghatta Reservoir supplemented by the Kakol and Byatha tanks, 18 miles from the City. The water from this reservoir is led in a masonry delivery channel for about 23,500 feet and at Soldevanhally, $1\frac{1}{2}$ miles from Banavara, is pumped by suitable pumps to the storage tanks at the Jewell Filters near Yesavanthapur whence after filtration the water is distributed in iron mains to the City.

The pumping engines consist of 3 triple expansion surface condensing engines working 3 direct acting Worthington High duty pumps. Two of the engines work simultaneously and the third is a stand-by. The steam of these engines is supplied by one of the 2 Babcock and Wilcox Boilers of 75 N H P each. Two of the pumps, when working conjointly, pump 1,500,000 gallons in 24 hours against a combined static and dynamic head of 400 feet. There are 2 storage reservoirs of 3 million gallons capacity, 3 filter units of the Jewell gravity type, 17' in diameter and capable of filtering 386 gallons per minute each.

Water was pumped for the first time on 23rd June 1896

Total cost of project as completed Rs 20,78,641

Total capacity of the Reservoir 744.6 million cubic ft.

Average consumption in City per day 150,000 gallons.

Average consumption in City per head 11.3 gallons

Cost of distributing water per 1 000 gallons —

	Rs	a	p
Pumping	0	7	4
Filtering	0	0	0
Distribution	0	4	8
Total	0	12	0

Length of C 1 Mains	4½ miles
Do C 1 Sub Mains	50 miles
Number of Public Fountains	20 (1 for 1 in 5 acres or 1 for 170 people)
Do of house connections	1 000
Consumption of water in house connections.	(150 000 gallons in cold weather 200 000 gallons in hot season

Every house connection has a meter and is entitled for *Meters* a free allowance of 160 gallons per rupee rental value (as assessed by the Municipality) per month subject to a minimum of 4 000 gallons and the excess of water drawn over and above this free allowance is charged for at the rate of annas 12 per 1,000 gallons.

Fees to be paid in advance for making house connections —

	Rs	a	p
½ inch attachment or less	1	8	0
1 inch do do	2	0	0
1½ inch do do	2	8	0

When attachment is to be temporarily closed, half the above rates are charged.

The Contribution by the Municipality to the water works department is Rs 30 000 per annum.

Excess water charges and value of water used by institutions collected by the Municipality amounts to Rs. 24 350.

A larger scheme of water-supply for the City and the C & M Station is in hand. It is expected to cost about Rs 10 lakhs.

Electric power for lighting the streets of the City and for industrial purposes is generated at the Cauvery Falls 70
8* Electric Power Street lighting.

The above rates apply when the proposed installation is within a reasonable distance of the Department's power supply lines. When such is not the case special terms will be arranged to suit such special cases such as when the proposed installation is outside the Municipal limits.

Among the medical institutions are the Victoria Hospital, the Minto Ophthalmic Hospital, the St. Martha's Hospital, the Maternity Hospital and a number of dispensaries located in different divisions of the City and maintained by the Municipality. There are also maintained by the Municipality a free Unāni Dispensary and a free Ayurvedic Dispensary, besides a number of these indigenous medical institutions to which grants in aid are paid annually by it.

Medical
Institutions

The Victoria Hospital situated in the market square was opened by Lord Curzon on 8th December 1900. The foundation stone was laid by Her Highness the Maharani C. I. (late Regent) on 22nd June 1897 on the occasion of the Diamond Jubilee of Her Most Gracious Majesty the late Queen Victoria.

The building cost over 7 lakhs. It has accommodation for 134 in patients (90 males and 44 females) and provides quarters for medical officers and nurses in the Hospital premises. It is free to all classes of sufferers without distinction of class, creed or race. It is fitted with the latest appliances. All the benefits which modern science can provide for the alleviation of human suffering are provided. There are special wards for paying patients European and Indian. In patients are admitted at all times.

Average daily attendance of out patients: males 190·48 females 74·53.

The Ophthalmic Hospital situated in Albert Victor Road was opened by His Highness the Maharaja on 31st January 1913. It is fitted up with the latest appliances and has indoor accommodation for over 100 male and female patients. Average daily attendance of out-door patients is 104·39 (males) and 80·61 (females); indoor patients number over 75 daily.

The St. Martha's Hospital and Dispensary situated in District Office Road was established in 1886 and is under the Superintendence of the Lady Superior Sister and Nuns of the Order of the Good Shepherd. There is a qualified Resident Surgeon.

attached to it. The Senior Surgeon of the Government of Mysore acts as visiting officer. The Government of Mysore and the City Municipality give grants-in-aid to it. It provides accommodation for 86 indoor patients, while out-door patients are daily treated in the morning.

The Maternity Hospital, established in 1880, is on the Cenotaph Road. It owes its existence to the munificence of the late Rao Bahadur Yele Mallappa Chetty, a well-known local philanthropist.

There is also a Public Health Institute, established in 1911, situated close to the Central College. It has a Director at its head assisted by a competent staff. Chemical, bacteriological, toxicological and public health work is done here. There is, besides, a Vaccine Institute on the Lal-Bagh Road, which trains students in the manufacture of vaccine. It was established in 1881 and is presided over by a qualified medical officer. A hospital for mental diseases providing for 250 beds, a leper asylum with provision for 40 beds and a Veterinary Hospital are other institutions situated in the City. Vaccination is compulsory within the Municipal limits and depôts are maintained for carrying it out during regular hours at the Municipal Dispensaries. Qualified female vaccinators are engaged for vaccinating women and children at their private residences free of charge.

Education

Within the Municipal limits of the City, primary education, which is both compulsory and free, is managed by the Municipality, which has an elected Committee to look after it.

Chief among the higher educational institutions is the Central College, at the Yelhanka Gate, which is an University Institution, with a large staff of professors, assistant professors, demonstrators, etc. It has attached to it a commodious hostel which provides for 96 boarders, a Reading Room, a Library, an University Union and large recreation grounds. There is a clock tower on the older portion of the building. Overlooking it on the other side of the Post Office Road are the Engineering College and the Government Collegiate High School. The former is an University Institution training students for the B. E. Degree of the local University. The Collegiate High School is the largest one of its kind with up-to-date equipment. To the Engineering College is attached a Mechanical Engineering School.

as well while to the Government Collegiate High School is attached the Government Commercial School. There are besides Collegiate High Schools run by the London and the Wesleyan Missions and a large number of primary schools distributed all over the City managed by the Municipality. The latter provide instruction for both boys and girls of all communities. The London Mission High School for girls situated on the Mission Road provides instruction for nearly 70 girl students. In the fort is located the Vani Viles Institute a Government institution which also educates girl students up to and including the Collegiate Class.

Outside the City limits but not far away from Mullesvaram is the well known Indian Institute of Science. The Institute owes its existence to the munificent gift of the late Mr J N Tata, to perpetuate whose memory a statue was, in 1922 erected in the grounds of the Institute. The Government of Mysore have given the lands free and make a large annual grant for its upkeep. It is a post graduate institution for advanced studies and original researches. General Chemistry, Organic Chemistry, Applied Chemistry and Electrical Technology are among the departments which exist at present. Students quarters, mess rooms and recreation grounds are attached to the Institute. The Institute is managed by a Committee on which the Mysore Government is also represented. The Viceroy and Governor General of India is its Patron. At Basavangudi on the Shankar Mutt Road is the Indian Sanskrit Institute established in 1911 by His Holiness the Jagadguru of Sringeri Mutt. It provides for advanced studies in Indian Philosophy, Rhetoric etc. Attached to it are quarters for professors and lodgings for students. At the extreme southern end of Basavangudi at the point where the Fort Centre Road meets the Edur road is the Tata's Silk Farm established by the late Mr J N Tata and now managed by the Salvation Army. Here experiments in sericulture are carried on. Indian and European students from Mysore and South India generally being trained at it. Japanese Reels are used and Mysore Cocoons are supplied for seed.

Connected with the Agricultural Department, whose offices are on the Seshadri road are a number of laboratories which provide facilities for the carrying out of agricultural, chemical, mycological and entomological work. There is also an insectory run by the Department. An experimental farm is maintained

by the Department It is located at Hebbal, 7 miles from the City on the Bellary road It has a Students' Hostel and an Implements Depôt attached to it An Agricultural School is also managed by the Department and is situated within the Farm limits It provides instruction for about 30 students in agriculture, carpentry and smithy work

At the Market Square is the Doddanna Hall, in which is located a free Industrial School, established by Janōpakāri Doddanna in 1906 It provides instruction in drawing, painting, clay modelling, carpentry and rattan weaving A free boarding house is attached to it The Institution is supported by a liberal grant by Government

In recent years, a number of Students' Hostels have been established in the City for the benefit of students of different communities—Brāhman, Mahrāṭta, Muhammadan, Vokkaligar, Vaisya and Virasaiva Of these, the last two are fine piles of buildings on the Seshadri road Recently, a hostel for students belonging to the Depressed Classes has been opened in a rented building on the Race Course road The Mahratta Hostel is also located in a rented building in Basavangudi

Notable
places of
interest

Among the more notable places of interest is the Cubbon Park, which has an area of more than 100 acres It is situated between the City and Military Station A fine view of it is obtained from the top of the Public Offices It was originally laid out by Major-General Sir Richard Sankey, R E, and is looked after by the Superintendent, Government Gardens It is named after Sir Mark Cubbon, late Chief Commissioner of Mysore The Public Offices, built between 1864-68, at a cost of over Rs 14 lakhs, and added to in 1914-15, forms part of it This huge pile of buildings is in the Grecian style and is 640 feet long The chief offices of Government are located here The Legislative Council meetings are held in the imposing Central Hall, which is just above the central stair case In this Hall is to be seen on the western roof a fine medallion portrait of Sir Mark Cubbon His equestrian statue was designed by Baron Marochetti The statue of Her Majesty Queen Empress Victoria, which is a white marble replica of the one at Worcester, is the chief

object of interest in the Park. It is 11 feet high including the plinth, the pedestal (of Mysore grey granite) being 13 feet. Sir Thomas Brock the well known sculptor, who was commissioned to execute it has produced a likeness which has given universal satisfaction. It cost £1000. At the statue, most of the more memorable functions that have taken place in Bangalore, have been held. Close by are the statues of His Majesty King Edward and His Highness Chamarajendra Wodeyar (1928). The Park has many lovely carriage drives and broad promenades lined with seats, besides many pleasant retreats. From its situation and picturesqueness it easily lends itself for the holding of exhibitions etc. The new Band Stand a gift of His Highness the Maharaja is not far away being between the Public Offices and the Seshadri Memorial Hall and the Century Club, the chief social centre in the City. The Seshadri Memorial Hall is named after Sir Seshadri Iyer the great Dewan of Mysore. In front of it is the statue set up to perpetuate his memory which was unveiled on 20th November 1913 by Lord Hordinge. The Public Library is located in the Memorial Hall, which until recently housed an Educational Museum as well. The Government Museum (founded in 1865) is on the south-eastern part of the Park not far from it. It is a neat building, well stocked with exhibits illustrating the fauna and flora of Mysore besides varieties of its agricultural and industrial products. Its Archaeological and Ethnological sections are among its chief attractions. It has a library and a reading room attached to it. Nearly five lakhs of people visit it annually. The Survey Offices the Chief Electrical Engineer's Office the Heggarghatta Water Supply Offices the Government Central Press, the Stamp Manufactory the Industrial Workshop and the offices of the Director of Industries are in the vicinity of the Cubbon Park. Facing the Cenotaph Road are the New Public Offices the Y.M.C.A. (City branch) and the Maternity Hospital. Facing the New Public Offices and the City Y.M.C.A. is the Daly Memorial Hall named after Sir Hugh Daly a former Resident in Mysore. In it is located the Mythic

Society, with its Library, Reading Room and Tennis grounds. The Society was founded in 1909 and is one of the best conducted learned societies in India interesting itself in the study of Indian History, Folklore, customs and manners, religion, etc. A feature of its activities is the attention it gives to the elucidation of the ethnology, ancient history, religions and antiquities of Mysore. In the main hall, which is used as a public lecture hall as well, are interesting pictures of those intimately connected with its founding, among them of His Highness the Maharaja, His Highness the Yuvaraja, Sir Hugh Daly, the Rev. Father Tabard, who was its life President until his death, which occurred in 1925, and others. A little portrait of Dewan Purnaiya is one of the curiosities of the place. The Society issues a journal of its own and is affiliated to the Royal Asiatic Society of Great Britain and Ireland. His Highness the Maharaja is its Patron.

The City has the usual complement of clubs, hotels, theatres, cinema houses, *chattrams* (choultries), temples, *masjids*, churches, etc.

The following statements give the Receipts and Expenditure of the City Municipality, during the five years *viz.*, 1921-22 to 1925-26. It may be added that the incidence of Municipal taxation in the City during the year ending 30th June 1926 was Rs. 4-1-8 as against Rs. 3-1-11 in the Mysore City.

Civil and
Military
Station,
Bangalore

Civil and Military Station.—Till the Rendition in 1881, the Civil and Military Station was known as the Cantonment (called *Dandu* by Hindus and *Lashker* by Mahomedans) It was then made over to the British Government as an Assigned Tract and is under the administration of the Hon'ble the British Resident It is situated to the north-east of Bangalore proper, and was established in 1809, on the removal of the British Garrison from Seringapatam, which had proved unhealthy for the troops It includes suburbs and covers an area of 13 54 square miles, inclusive of the land on which the Indian Institute of Science is situated This latter was added on to the Civil and Military Station, Bangalore, in 1906

The Parade ground extends two miles east and west and is surrounded by a wide or mall, the Rotten Row of the Station

At its western end, on a commanding site, stands the Residency with the fine range of Mysore Public Offices rising out of the wooded grounds of Cubbon Park and the General Post Office. The new Telegraph Office has been built opposite the General Post Office. The statue of H. M. the late King Emperor Edward VII has been erected near the new Telegraph office on the north side of the Cubbon Park and the Bangalore War Memorial in memory of European and Anglo-Indian Boys of Bangalore who fell in the Great War of 1914-18 has been erected in front of the Telegraph Office. Further east stand the B. R. V. Armoury and St. Andrew's Kirk and beyond that come the main-guard, the Military Head Quarter Offices, Supply and Transport Offices, the bakery for the troops and the barracks of the British Infantry. At the east end and southerly from Trinity Church are situated the extensive artillery and Cavalry barracks and lines with the Indian town of Ulsoor on their north. The Cavalry barracks occupy the site of what was the old Race-Course. On the south side of the parade ground are the Victoria Statue, St. Mark's Church, the Bowring Institute, the Bangalore Library, the Mayo Hall, the Public Offices and the Gymkhana besides several fine shops. From this direction thoroughfares lead south to the quarters known as Shoolay and Richmond Town, where numerous European pensioners and Anglo-Indians live. Beyond this again are the Indian Cavalry and Arab lines and All Saint's Church.

The Cantoament Bazaar, an Indian town in itself, lies in a valley to the north of the Parade ground. It contains a commodious and well kept market, the Bowring Civil and the Lady Curzon Hospitals, numerous imposing stores for the sale of European goods, large Indian buildings and also a fine Roman Catholic Church—St. Mary's. To the north of this again is the populous district of St. John's Hill inhabited by a large number of European pensioned soldiers whose neat little cottages with the spire of the parish Church rising up in their midst give the place somewhat the appearance of an English village. To the east of St. John's Hill are the lines

of the Sappers and Miners, on the north Cleveland Town, Cox Town and the Peninsular Tobacco Factory, and on the west, the Pioneer lines and the Cantonment Railway Station

The congested parts of Blackpalli were demolished, and a new extension called "Fraser Town" was formed in 1906 in Pāpireddi-pālayam, north of Cleveland Town, and to suit the convenience of the people a railway station called "Bangalore East" was also opened. Houses have been built on sanitary principles, there is a mosque, a school, and a dispensary. A small market and a post office have also been started here. Further north, on the other side of the Madras and Southern Mahratta Railway line, another extension called Richard's Town has also been started. Some fine large bungalows have been built in this extension.

Among the buildings in the Station deserving more particular notice are the Residency, the Convent Schools, the Roman Catholic St. Patrick's Cathedral and St. Mary's Church, St. Xavier's Church, St. Mark's Church, the Mayo Hall, the Public Offices, the Kirk, the Cavalry barracks, etc. Near the New Market will be seen more than one ornamental mosque and the *gōpura* or tower of the Sōmēsvara Temple, commonly called the *Ulsoor pagōda*, is a good specimen of the Hindu pyramidal architecture.

Station
Municipality.

The Municipal affairs of the Station are administered by a body styled the Municipal Commission of the Civil and Military Station of Bangalore and consisting of a President, who is the District Magistrate of the Civil and Military Station for the time being, a medical officer, who is appointed by the Hon'ble the Resident, and twenty-six other Commissioners. Of these twenty-six Commissioners, six are appointed by the Resident either by name or by office, one is elected by the Bangalore Trades Association, and nineteen are elected by the ratepayers. Every elected Commissioner and every Commissioner appointed by the Resident by name holds office for a term of three years.

The Station is divided into the following wards or divisions namely —

No	Ward or Division
1	Ulsoor
2	Southern Division
3	East General Bazaar
4	West General Bazaar
5	Cleveland Town
6	High Ground

The inhabitants of the Station are divided into the following classes —

- 1 Europeans and Anglo Indians
- 2 Muhamadans
- 3 Hindus and others
- 4 Indian Christians.

and each class elects separately its own representatives

The number of Commissioners to be elected by each class and for each division is as follows —

Divisions	Classes				Total Number of Commissioners
	Europeans and Anglo Indians	Muhamadans	Hindus and Others	Indian Christians	
1 Ulsoor	1	1	1		
2 Southern Division	1	1	1		3
3 East General Bazaar	1	1	2	1	4+1
4 West General Bazaar	1	1	2		4
5 Cleveland Town	1		1		2
6 High Ground	1		1		2
Total	6	4	8	1	10

**Water
Supply.**

Water-supply is drawn both for the City of Bangalore and the Civil and Military Station from the Chamarajendra Reservoir at Hesserghatta about 13 miles in a direct line from Bangalore. This reservoir was built by the Mysore Durbar, and water was first pumped from it to the City in June 1896. Shortly after, in February 1897, an agreement was drawn up between the Secretary of State and the Durbar, whereby the Imperial Government were given certain rights in the water impounded. Under the agreement cited above and since revised the Station is supplied with two-thirds of the water actually received from the reservoir, the remaining one-third being reserved for the Military. The whole initial cost of the scheme and of the Secretary of State's share of the cost of the Jewell filters was borne by Government. The Municipality paid two-thirds of the cost of the new rising main, engine and boiler installed in 1912, and contribute two-thirds of the actual working expenses and a fixed sum annually towards maintenance. The filters are under the control of the Mysore Durbar, and the Imperial Government pay half the cost of working and maintenance. The water is distributed through the Station in cast iron mains and sub-mains. To meet the charges connected with the water supply, a water tax at 6 per cent per annum is levied on all house property.

**Electric
Lighting**

The agreement of 1908 between the Mysore Durbar and the Municipal Commission in regard to the electric lighting of the streets in the Station was superseded by a new agreement entered into between the same parties which came into force from the 1st January 1923, for a period of ten years from that date. According to this agreement, the Commission pays at an average rate of Rs. 35 per lamp per annum on all street lights installed to the end of December 1922, and at Rs. 35 per lamp per annum on all additional lights installed on and after the 1st January 1923. All extensions of the system from that date are carried out by the Mysore Durbar at their own cost. The total number of lamps in the Station on the 31st March 1921 was 1074, on 30th September 1926, it stood at 1220.

The following taxes are levied in the Station —

Municipal
taxation

- Profession tax on money lenders pawnbrokers and hawkers
- House conservancy tax
- Water tax
- Excess water charges and meter rent
- Tax on vehicles and animals
- Octroi

Miscellaneous such as slaughter house fees hackney carriages fees and license fees for places where articles of food and drink are prepared for sale and where offensive and dangerous trades are carried on

The incidence of taxation per head of population on 31st March 1924 was Rs 4-8-9

The population of the Civil and Military Station as taken at the census in 1921 is as follows —

Males	61,576
Females	57,361
Total	1,18,940

The population has been classified as under —

Religion	Males	Females	Total
Hindus	34,115	31,018	65,033
Muhammadans	13,471	11,603	25,074
Christians	13,125	13,404	26,529

Parsees	70	53	123
Sikhs	104	5	109
Brahmins	16	11	27
Animistic			
Jews	17	14	31
Buddhists	99	92	191
Others	2		2
Total	61,576	57,361	1,18,940

For population classified according to occupation or means of livelihood *vide* Mysore Census Report, 1924 Part II Tables—Table XVII

Medical Institutions

Many changes have taken place in the Medical institutions of the Civil and Military Station. Thirty years ago, there existed only the Bowring Civil Hospital and Ulsoor Dispensary. Besides these, there are now the Lady Curzon Hospital, the Saadut Dispensary in Shoolay, the Annaswamy Mudaliar Dispensary in Fraser Town and the Isolation Hospital in Langford Town.

Previous to the year 1900, the only medical institution receiving in-patients was the Bowring Civil Hospital, which was financed by, and was under the control of, the Municipal Commission. In this Hospital, men, women and children were treated, the accommodation for women being only 24 beds.

In April 1900, the financing and management of the Civil Hospital was taken over by the Government of India.

Under advice of the then Residency Surgeon, additional accommodation for the treatment of women and children was provided in a series of buildings, some built by Government and others by contributions from six Indian philanthropic gentlemen. The buildings were connected by roofed passages, and so grouped, were formally opened on December 10th 1900 by Lady Curzon who graciously allowed the whole to be styled the "Lady Curzon Hospital for women and children."

Since that date, many important alterations and additions have been made in the two Civil Hospitals, the Bowring which is now used for male patients only, and the Lady Curzon, for females only. The result of these improvements is that, at a cost estimated at about Rs 5,00,000, the two Hospitals which were originally most primitive in their arrangements and equipment, are now furnished and equipped on a scale which makes them, perhaps, the most complete institutions of their kind in India. Among the improvements which have been carried out to bring the institutions up to modern requirements, are the lighting throughout by electricity and the provision of electric fans, a powerful X-Ray installation and apparatus for every sort of electrical examination and treatment by electricity. All cooking and heating is also carried out

by electricity. All the Hospital wards and bath rooms are tiled and equipped in conformity with modern sanitary requirements. Two operation blocks, one for males and a second for females were built and equipped, that for females being the generous gift of the late Rao Bahadur B. P. Annasawmy Madaliar *c. s. r.*, the Maternity Department has been entirely remodelled and isolation wards provided for suspicious cases. Quarters have been provided for the House Surgeons, Assistant Surgeons, Sub Assistant Surgeons, Stewards, Electric Mechanic Compounders, Sisters and Nurses as also for the menial Staff. Private wards for better class patients have been provided and a new laundry built and equipped.

The remodelling of the Staff has also received attention and in particular, the Nursing Department has been enlarged and put on a proper footing. In 1900 the nursing Staff available for 210 beds was 3 charge nurses, 3 Sisters of Charity and 3 Indian Nurses. The Staff now comprises 1 Nursing Superintendent, 2 Nursing Sisters, 2 Senior Charge Nurses, 4 Sisters of Charity, 4 Charge Nurses, 15 Pupil Nurses, 8 Maternity Paying Pupil Nurses, 4 Indian Nurses and the Civil Hospitals are now a training school for nurses both in general nursing and midwifery.

The plans of both the hospitals still leave much to be desired but a great deal has been done to remedy defects in construction such as the provision of ramps where steps existed and the demolition of unnecessary small buildings. Chief among other improvements was the closing of New Market Road which ran between the Bowring and Lady Curzon Hospitals and which being the main road to the bazaar and market was an obvious nuisance to both institutions the noise and dust being continuous by day and night. It was found possible to divert this road without much inconvenience to the public with the result that the two institutions now stand in one compound, the road having been converted into a pleasant garden and the male and female wards connected by a roofed passage which crosses where the road ran the

same being a great boon to the Nursing Staff during rain This arrangement greatly facilitates the administration of the hospitals and indeed it is now possible to group the male, female, children's and maternity wards into one institution under the title of the "Bowring and Lady Curzon Hospitals" These Civil Hospitals provide the following accommodation —

—	Wards	Beds	
General wards (Male)	7	69	Bowring Hospital
Private wards do	3	3	
Maternity wards	4	28	Lady Curzon Hospital
Children's do	2	12	
European do	2	16	
Private do	3	3	
Indian Surgical wards	1	6	
Hindu wards	3	17	
Muhammadian wards	1	6	
Caste do	2	12	
European Isolation ward	1	4	
Indian do	1	4	
European Tubercular ward	1	4	
Indian do	1	8	
Total	32	192	

The attendance at the medical institutions of the Civil and Military Station during 1923-24 was as follows —

—	In-patients	Out-patients	Total
Lady Curzon Hospital	2,688	Rs 20,941	Rs 23,629
Bowring Civil Hospital	1,488	14,564	16,051

The Ulsoor Dispensary rendered medical aid to 28,367 and 383 minor operations were performed

The Dispensary at Fraser Town afforded medical aid to 22,083 and 174 minor operations were performed

The Saadut Dispensary at Shoolay afforded medical aid to 17,976 and 220 minor operations were performed

The Isolation Hospital for all infectious diseases afforded medical relief to 212 patients with a mortality of 37

Out of the above, there were 15 plague patients with 8 deaths and 180 small pox patients with 25 deaths

The Staff of the Civil Medical Institutions are —

A Commissioned Medical Officer styled the Residency Surgeon

- 1 House Surgeon for the Lady Curzon Hospital
- 1 House Surgeon for the Bowring Civil Hospital
- 2 Lady Assistant Surgeons
- 4 Indian Sub-Assistant Surgeons
- 1 First Steward and Head Clerk
- 1 Assistant Steward and Cashier
- 4 Compounders.
- 1 Nursing Superintendent
- 2 Nursing Sisters
- 2 Senior Charge Nurses
- 5 European Sisters of Charity
- 4 European Charge Nurses
- 15 Pupil Nurses.
- 4 Indian Nurses
- 8 Maternity Paying Pupil Nurses.

The Annasawmy Mudaliar Dispensary in Fraser Town and the Saadut Dispensary in Shoolay were respectively the generous gifts of Rao Bahadur B P Annasawmy Mudaliar C.I.E. and Mr Aga Abdullah Saib to the Municipality

Education in the Civil and Military Station, Bangalore was supervised by the Director of Public Instruction, Mysore until December 1888 assisted by his Deputy Inspector. It was then placed under the control of the Madras Educational Department and the Inspector of Schools Western Circle was given the charge of it. Changes continued to take place in the Inspectorate until at present all the schools in the Station European and Indian, are under the control of the Inspector of Schools, Coorg and Bangalore permanently stationed at Bangalore, and assisted by a Sub Assistant Inspector of Schools in the control of the Indian Elementary Schools.

Probably no place in India of the size of C & M Station, Bangalore is better provided with the means of education for all classes and nowhere is a more earnest attention paid to the subject, than on the part of the various private agencies at work

The following are the statistics for the 4 years 1921-22 to 1924-25 .—

—	1921-22				1922-23			
	Boys' Schools		Girls' Schools		Boys' Schools		Girls' Schools

Total Rs.	67 227		35 654	61 000	1 63,971	100.0

There are two Colleges in the Station the St Joseph's College and the Sacred Heart College The St Joseph's teaches up to the B. A. Degree and the Sacred Heart up to the Intermediate Examination in Arts. The former is attended by

both European and Indian boys and the latter is chiefly attended by European girls. The European High Schools are St Joseph's College, European Section, Bishop Cotton Boys' and Girls' High Schools, Baldwin Boys' and Girls' High Schools and St Francis Xavier's Girls' High School. There are also three Indian High Schools: St Joseph's College (Indian Section), R B A N M's High School, both for boys and Goodwill Girls' High School for girls.

With the coronation of His Majesty the King-Emperor at Delhi in 1911, a new era of educational activity began in the Station. The Imperial Government contributed large sums of money, as special grants, for the improvement of Indian education, with the help of which good buildings were constructed for many elementary and secondary schools. The building in which St Joseph's College, Indian Section, is located and the building recently constructed for St Joseph's College (College Section) are two of the finest in the Station. St Euphrasia's Training School and Rajamma Thambu Chetty Girls' School in St Joseph's Convent and R B A N M's High School buildings are also excellent.

Statistics of education of Europeans as they stood on 31st March 1925 are given in the table below —

Number of Schools	Boys	Girls

An *imperium in imperio* under the control of the Resident the Assigned Tract is provided with the various departments of administration separate from those of the Mysore Government

Administra-
tion

The area for cultivation is a little over 4 square miles of Land which only about nine twentieths are Government land (365 acres of it unculturable) the rest belongs to Kayamgutta jodi and sarvamanya villages. The revenue work continued under the Deputy Commissioner of the Bangalore District till the 1st April 1884, when it was made over to the Station District Magistrate as Collector. In *legislation* all Acts Rules and Regulations in force before the Rendition continued in force, but in 1883-4 a revised list of such as applied to the Civil and Military Station was issued by the Government of India, declaring to what extent and with what modifications they were to be law. Other enactments have been extended to the Civil and Military Station from time to time. A list of enactments in force in the Station has been issued with the Government of India Notification No. 318 D dated 16th January 1917 and subsequent Notifications. The Police Force is composed of a District Superintendent of Police with (1923 24) officers and constables costing Rs. 2 73,135 11-3

The Courts are (1) the Court of the Bench of Honorary Magistrates established in 1888 with third class powers in regard to offences under Sections 302 and 405 Indian Penal Code, and 34 of Act V of 1861 or against Municipal Regulations and Bye-laws the penalty for which does not exceed Rs. 50

Criminal
Justice

their powers have subsequently been altered to those of the Second Class Magistrates , (2) the Court of the Second Magistrate with powers of the First Class , (3) that of the District Magistrate (who took the place of the previous Town and Cantonment Magistrate) and the Sessions Court In 1896 the jurisdiction over the Railway lands,—Bangalore to Harihar , Bangalore to Hindupur , Bangalore to Bisanatham including the Kolar Gold Fields Railways—was ceded to the British Government with supervision by the Honorable the Resident , in consequence, the District Superintendent of Police was invested with the powers of a first class Magistrate, Mysore Railways, subordinate to the District Magistrate who as Railway Magistrate has also jurisdiction The jurisdiction over the Kolar Gold Fields Railways was made over to the Durbar tentatively for one year in 1913-14 and was subsequently made over permanently on certain conditions The powers of the High Court were vested in the Chief Judge of Mysore till May 1884, when they were transferred to the British Resident and the other Courts abovenamed were established The duties of the Civil and Sessions Judge were combined in one officer till August 1891, when the First Assistant Resident was made Sessions Judge and a post of a separate District Judge was created The duties of the Sessions Judge were entrusted to the District Judge in 1920 The receipts in Criminal Courts amounted in 1923-24 to Rs 19,209-8-6 and the charges to Rs 79,172 The number of cases brought to trial was 6,792 involving 7,991 persons The great majority (which were minor offences and Police and Municipal cases) were disposed of by the Bench of Magistrates There is no separate jail, the Bangalore Central Jail being close at hand , but convicts, whose sentences are over one year, are being sent to the Jails at Vellore, whence they are transferred to the other Jails in the Madras Presidency The District Magistrate is also a Justice of the Peace and *ex-officio* Assistant to the Honorable the Resident in Mysore.

Civil Justice is administered by a District Judge and Civil Justice a District Munsiff. The latter has original jurisdiction up to Rs. 2,000 and Small Cause jurisdiction up to Rs. 100, and the former has unlimited Original jurisdiction besides Small Cause Jurisdiction up to Rs. 500 and exclusive jurisdiction over Railway lands. The District Judge hears all appeals from the District Munsiff. Appeals from the District Court lie to the Hon'ble the Resident in Mysore.

The Secretary to the Resident is the Inspector General of Registration. The District Judge is the District Registrar and the Manager of the Residency Premises is the Sub Registrar. There were 1,681 documents registered in 1924-25. The receipts were Rs. 12,582-4-6 and the charges Rs. 3,426-11-11.

The Resident Treasury deals not only with the receipts and payments on account of the Assigned Tract but also with the transactions of various departments and services such as Army, Ecclesiastical, Posts, Telegraphs, Survey of India, etc., as well as interest on the Government of India Securities and Penions. The total receipts in 1923-24 were 13 lakhs and the disbursements 230 lakhs. The treasury is not, however, responsible for the actual receipt and payment of cash, this work having been transferred with effect from 1916 to the local branch of the Imperial Bank of India. From October 1921 the Treasury has been converted into a Pay and Account Office in charge of an officer subordinate to the Government of India and all work hitherto done by the Accountant General, Madras in connection with the Assigned Tract and the Residency is now done by the Pay and Account Office in addition to the regular treasury work. The transactions brought to account are finally recorded in the books of the Accountant General, Central Revenue, of whose office the Pay and Account Office is an outpost. The transactions of the Government of Mysore at the Treasuries in British India as well as those of the Governments in British India at the

Mysore State Treasuries are adjusted through the Pay and Account Office. The Pay and Accounts Officer also acts as *ex-officio* Financial Adviser to the Resident. It will suffice in this place to give the *Revenue* and *Expenditure* of the Assigned Tract for the past five years —

The principal item of Revenue is under Excise and is derived from the grant of licenses and the levy of duties. Arrack is supplied from the Durbar Distillery which has the exclusive privilege of manufacture and wholesale vend the Station paying a proportionate cost of the Distillery Establishment. There is a separate Excise staff for the Station consisting of an Assistant Commissioner of Excise 3 Sub Inspectors and a clerk with 11 servants. Separate contracts are made for retail vend of arrack toddy beer and foreign liquor. Opium and ganja shops are given on purchase system. The beer is supplied by the Bangalore Brewery Company established in the Station.

Bannerghatta—A sacred hill in the Anekal taluk 10 miles south of Bangalore. Its height is 3,271 feet above the level of the sea. On the occasion of the Car festival (*rathotsava*) in honour of Sampangi Rāmaswami, held for three days from *Phalguna bahula* 6th (March—April) there is an assemblage of 4,000 people. Bannerghatta

The outer walls of the Garbhagriha of the Sri Champa kadhama-Swami temple here are full of inscriptions but with a thick coat of chunam all over them. Some of them are in Tamil and belong to the 13th century. The *dhvajasthamba* near the Ānjanēya temple is a lofty one and bears three inscriptions at its base.

About a mile to the rear of the temple, past the rocks, is a Ravanakote (or Stone maze) which is a popular resort.

About a couple of furlongs from it, is a fine stone revetted well, whose cool waters are refreshing to a degree to the many pilgrims who visit the temple during the hot weather

Basavapatna

Basavapura —Bechirak village in Kankanhalli Taluk, Kodihalli Hobli Its full name is Basavapatna-Virasandra.

In a grove near this place is a shrine dedicated to Balobasavappa with another in front dedicated to his disciple Huchabasavappa Both these were Lingāyat *gurus* The shrines have a Nandi inside and are visited by a large number of devotees The disciple Huchabasavappa is, however, held in greater regard than his *guru* About a mile to the south of the village is a boulder called Kudure-gundu which bears an inscription Another boulder close to it is called Anegundu It is said that Basavapatna was once a great city, the capital of a king whose elephants and horses were tied near the above boulders

Begur

Begur —A village of considerable antiquity in Bangalore taluk, about 8 miles south of Bangalore Head-quarters of the *hobli* of the same name Population 2,362 An elaborately sculptured stone from here, now in the Bangalore Museum, is a memorial to the local chief, named Nagattara, who, in about A D 920, fell in the war between the Ganga king Ereyappa and the Nolamba king Bīra Mahēndra, while attacking the elephants in the army of the Nolamba prince Ayyapa Dēva

The historical records, such as *Bangalore* 83, found at this place go back to about A D 900 To the west of the present village the fields are said to be full of ash-pits containing bones and pieces of pottery Several circular ovens built of bricks have also been met with while ploughing the lands These are said to have been erected for the manufacture of glass bangles The Nāgēsvara temple is an old structure in the Dravidian style It has five *lingas* named Nāgēsvara, Nagarēsvara, Chōlēśvara, Karnēsvara and Kamathēsvara set up in five separate shrines, the first being looked upon as the most sacred, owing probably, to its great antiquity The others may be later additions In the *navaranga* of the Nāgēsvara shrine, there are to the left figures of Mahishāsura-mardini, Chandikēsvara and Sūrya, the last with four hands, two holding lotuses and two placed on the waist,

and to the right figures of Bhairava, Ganapati, Chandra with two hands and a nimbus and *Saptamatrikah*. The ceiling of the *nataranga* measuring 5.5 and consisting of 3 slabs, has *ashta dikpulakas* with Uma maheswari in the centre. At the sides of the *nataranga* entrance stand two females instead of the usual *drūrapulakas*. In a separate shrine is the goddess of the temple a good figure about 2½ feet high. The front veranda of this shrine has to the right a figure of Ganapati with only two hands, a fine figure of Durga about 3 feet high said to have been recently found in a well, and a figure of Surya with two hands. A fragmentary old inscription, apparently a Jaina epitaph is found built into the floor of the veranda. The *nataranga* of the Chōkeshwara shrine has likewise a ceiling of *ashta-dikpulakas* with Umamaheswari in the centre. Another old inscription is to be seen on the floor of the veranda in front of the Kamatheshwara shrine together with two fragmentary Tamiḷ ones on the front base. The former which has been assigned by Mr Narasimha char to about A.D. 900 is of great interest as it mentions Bengalūru (i.e., Bangalore) thus testifying to the antiquity of the place. The story which connects Ballala with the origin of the name has accordingly to be given up. The stone on which *Bangalore* 82 is engraved stands behind a seated headless Jina figure. The latter has at its side a figure about 2 feet high of Parsva. Judging from the old Jaina epitaphs the place appears to have once been an important Jaina settlement. There is a Lingāyāt *matha* here known as Chikkaonayya's *matha* or more popularly *Alkavile* (Goldsmiths) *matha* which is said to be a branch of the *matha* at Hosur. In the *prakāra* of the Virabhadra temple belonging to the *matha* are several *śamādhi mantapas* or tombs. About a fourth of the population of the village consists of Indian Christians who have a church about 100 years old. In front of the church is a bell which bears the inscription *Hildeer and A Paris*.

Belaguma.—A village in Magadi Taluk. Population 373. Belaguma.
Here may be seen in Patel Chikkanna's field a cromlech, with its top slab off.

Bellandur—A village in Vurtur Hobli Bangalore Taluk. Bellandur
Population 544. Here close to Ibalur in the lands belonging to
M GR VOL V 10

Mr E M Morrel of Bangalore, are a few cromlechs. These cromlechs are rather peculiar. they differ from the usual specimens in not having a circle of rough boulders around them and in not having gigantic slabs for the top, sides and bottom. They have instead a circle of rough slabs of various sizes standing in a slanting position buried nearly up to the top. One of the partially excavated cromlechs has a rough slab of irregular shape for the top, and another has two pillars parallel to each other placed horizontally at some interval with rough thick slabs at the sides. The pots, iron sandal, etc., said to have been unearthed by Mr Bush are said to have been found between the pillars. The remaining two have no top slabs at all. one of them, excavated to a depth of three feet by the Archæological Department, shows a side slab of a pretty large size.

The cromlech referred to above was subsequently excavated and a cell in the form of a stone basin measuring $9' \times 4\frac{1}{2}' \times 5'$ was disclosed. It lay west to east and had no top slab, though there was one at the bottom. On the east, there were two slabs joined together with a semi-circular hole in the middle towards the top. It had three different layers of earth, ordinary earth a depth of 2 feet, hard earth mixed with small stones and pieces of pottery, and ordinary earth again over the bottom slab. The pieces of pottery appeared to be very old. Some were black, some red and some a mixture of both colours, the black ones being polished and heavy. A few legs of pots were also unearthed. Two more cromlechs were excavated, but nothing was obtained except a piece of iron and a few pieces of old pottery. Evidently all the cromlechs had once been dug up and the relics removed.

Binnaman-
gala

Binnamangala — A village in Nelamangala Taluk. The Muktinātīśvara temple at this place is a small ornate structure in the Dravidian style, consisting of a *garbhagriha*, a *sukhānasi*, a *naiwaranga* and a porch. The fine Tamil inscription near it, *EC IX, Nelamangala 3*, registers a grant for it in A D 1110 during the reign of Kulōttunga-Chōla I. The temple was therefore in existence before that date. It may have been erected during the reign of Rājēndra-Chōla, one of whose

inscriptions, *E C IV*, *Nelamangala 7a*, of A D 1038, mentions Binna-mangala. The temple faces east. The *garbha griha* and *sukhānasi* are each supported by 4 pillars. The *navaranga* pillars, four in number stand on ornamental bases and are sculptured with figures all round at the bottom and decorated with devices in the upper portion. The ceiling is a panel of well carved *ashta-dikpālakas* or regents of the eight directions. The *navaranga* doorway shows good work. the lintel has a Gajalakshmi in the centre flanked by lions and *makaras* the latter represented as swallowing one of the hind legs of the lions, and the jambs are carved with a row of dwarfs to front. The outer walls, built of well-dressed slabs contain a row of lions all round at the bottom. Above the ornamental plinth comes a row of figures small and large some of the latter being in niches. The figures in niches, 7 in number, are Tandavāvara Gannapati Siva Vishnu, Brahma Mahishāsura-mardini standing on the head of a buffalo, and Kalivamardana. Among the other figures may be mentioned a female, probably representing Sachi Indra's wife riding an elephant, a sage with matted hair Bhairava Vānugōpala, Sūrya and Chandra. The two latter are at the sides of the doorway. Of the female figures the larger ones are well carved. One of the smaller figures to the left of the outer entrance, which holds a club and is represented as wearing breeches is worthy of notice. The temple is of interest as affording examples of Mysore architecture and sculpture of the 11th century. The figures are rather plain but natural there being no excessive ornamentation as in the temples of a later period. Though there is some similarity between the carvings of this temple and those of the Vaidyēśvara temple at Talkad, which also contain records of Kulōttunga Chōla I the workmanship here appears to be decidedly superior.

Channapatna — A taluk in the south west Area 453 square miles Head-quarters at Channapatna. Contains the following hoblis, villages and population Channa
patna.

Hoblis	Villages including hamlets	Villages classified				Population in 1921
		Government	Sarvamanya	Jodi	Kayamgutta

15	Malurpatna	1,369

In 1873 Channapatna was formed into a Sub-taluk of the Closepet taluk, with Channapatna, Malur and Mudigere hoblis, but in August 1892 its former status was restored, and Closepet made its Sub-taluk.

The taluk may be divided into two parts with regard to its physical features. The northern and north-western part is traversed by several ranges of hills, contains large tracts of waste land, more or less covered with scrub-jungle, and is generally devoid of tanks and other artificial irrigation works. The southern and south-western parts are plain,

contain more populous villages, and are studded with tanks some of which are of considerable importance

The Arkavati flows past Closepet and Kunigal through the west, and the Kanva past Malur through the east both running from north to south. The course of the former is surrounded with lofty hills, precipices and jungle, which are characteristic of much of the taluk. Its waters are therefore little used for purposes of cultivation, except that it is fringed with a multitude of mulberry gardens, irrigated by lifts from the stream. Its tributary, the Vrishabhavati, joins it in the extreme west. The Kanva, on emerging from the hills a short distance north of Malur, enters on a broad and fertile valley of wet and garden land, which continues to the limits of the taluk. This river is dammed near Abbur and is made to feed several good tanks.

Owing to the broken nature of the country the soil is very varied. The produce of wet cultivation, consisting of paddy, cocoa nuts, betel leaf, plantains, and sugar-cane is considerable. Numbers of cocoa nut gardens are formed along the lower course of the Kanva river, the soil being well adapted for the purpose, and water tapped a few feet from the surface. The trees are watered only when young; on arriving at maturity they are left to depend upon rainfall and soil moisture. Much raw silk is produced at Channapatna and exported though disease among silkworms for many years destroyed the industry. Channapatna is one of the principal manufacturing and trading towns in the country. Coarse cotton cloths are woven in many parts of the taluk.

The whole of this region formed part of the Ganga dominions, Mankunda having been the royal residence in the seventh century. The western part of the taluk was included in the District of Chikka Gangavadi, whose chief town was Honganur. Under the Chōla kings, Malurpatna and Kndlur were important places. Subsequently, after having formed part of the Hoysala kingdom, the entire stretch of territory east and west between the Ghats was conferred by the fallen Vijayanagar sovereign upon Jagadēva Raya for his services.

in defending Penukonda. He made Channapatna his capital. In 1630 it was taken by the Raja of Mysore and the territory absorbed into the Mysore kingdom.

An inscription in Channapatna taluk of 1523 A D records a grant by Krishna-Rāya to Vyāsātirtha, the celebrated Mādhva *guru* and author, who was the disciple of Brāhman-yātirtha. He is called *Varshnava-siddhānta-sthāpaka* and is said to have commented on all the *Sāstras*.

The revenue settlement was introduced in 1893. The total land revenue demand and collection in 1921-22 was Rs 1,77,973 and Rs 1,59,811, respectively.

The following was the average rainfall —

Station	Month					
	Jan	Feb	Mar	Apl	May	June
1	2	3	4	5	6	7
Channapatna	0 08	0 10	0 34	1 81	4 65	2 65

Station	Month—concl'd						Year
	July	Aug	Sep	Oct	Nov	Dec	
	8	9	10	11	12	13	14
Channapatna	3 09	4 79	6 89	7 15	2 33	0 54	34 42

The railway from Bangalore to Mysore runs through the middle of the taluk from north-east to south-west, with stations at Channapatna and Mudgere. Alongside of this railway is the old trunk road to Mysore. From Channapatna there is a road south-east to Satnur with a branch to Halagur.

Channa-
patna or
Chennapatna.

Channapatna or Chennapatna.—A town situated in 12° 38' N. lat 77° 13' E long, 37 miles south-west of Bangalore, on the Bangalore-Seringapatam road. Headquarters

of the Channapatna taluk and a municipality. The industrial portion of Channapatna, the handsome city, is called Sukra var pete, Friday bazar, and contains much of the population

Population in 10-1	Males	Females	Total
Hindus	3 56	3 45	7 016
Mohammadians	2 4 8	2 0 0	4 4 37
Christians	3 1	7 9	0 3
Total	6 0 34	5 7 02	11 8 16

The fort appears to have been built about 1580 by Jagadēva Raya, who made Channapatna the capital of the territory yielding it is said a revenue of nine lakhs of *pagodas*, bestowed upon him for his gallant defence of Penukonda by the fallen Vijayanagar prince, to whom his daughter was married. Possessions which included such widely distant places as Mulbagal and Periyapatna, Kankanhalli and Budihal thus suddenly acquired, must have formed a government more extensive than consolidated. The original possessions of the family were in Baramahal. Buchanan states that they were of the Telugu Banajiga caste and rose to power about the fourteenth century. The following names are given of the Rayas of this line who ruled at Channapatna —Ranōji Raya Immadi Jagadēva 15 years, Mummaddi Jagadēva 8 years, Kumara Jagadēva 7 years and Ankusha Raya 10 years. *Channapatna* 182 dated in 1623 gives the succession as follows —Rana Peda Jagadēva Raya his son Jagadēva Raya and the latter a son Kumāra Jagadēva Raya II (in 1623). *Kankanhalli* 108 also gives the date 1621 for the last of these chiefs. The fort stood a long siege in 1630 when it was captured by Chama Raja Wodeyar of Mysore. In 1759 it was surprised by the Mahratta army under Gōpal Hari but was speedily released by Haider Ali. It was repaired by the Dewan Purnaiya and contains portions of a palace erected for a relative of the then Maharaja but has become much depopulated by reason of extreme

unhealthiness from fever The remains of the old fort are visible from the railway lines, the fort having been situated on the direct road to Seringapatam It was never very conspicuous for its strength Tipu Sultān thought proper to dismantle it in 1790 and remove its guns and stores to Ramagiri (see below), which was supposed to be much more capable of defence Home illustrates in his *Select Views* the east view of this place, which should have been a fine one

The Pēte lies to the north-east of the fort It is celebrated for the manufacture of lacquered ware and toys, of fine steel wires for strings of musical instruments, and of glass bracelets, of all of which an account will be found elsewhere It is the residence of a large number of Muhammadans belonging to the Labbe and Darra sects, who trade with the western coast

North of the Pēte are two large Muhammadan tombs, one erected in memory of Akīl Shah Kadri, the religious preceptor of Tipu, and the other in honour of Sayyid Ibrahim, a commandant of Bangalore, distinguished for the humanity to the English prisoners taken by Tipu

At the crossing of the Railway Station road and the Mysore road, there is the Coronation Lamp-stand, consisting of ten lights, erected by public subscription, in honour of the Coronation of His Majesty King George V and Empress Queen Mary, on 12th December 1911 The Mysore Bank has a branch here, which is close to the Railway Station A mile from this place is Mangalvarpēte, where are a number of cocoa-nut gardens

The Municipal income for 1921-22 was Rs 15,229 and the expenditure Rs 15,083

Chikka
Taggalī

Chikka Taggalī.—A village in Hoskote Taluk. Population 197 At this place is a *mastīkal* sculptured with a warrior and his two wives, both standing to his left The warrior bears a sword in the right hand and a dagger in the left. Both his wives hold a flask in the right hand and a lotus in the left.

Closepet —A Sub-Division of the Bangalore District composed of Channapatna, Magadi and Kankanhalli taluks. Also a sub taluk of the Channapatna taluk. The hoblis of the sub-taluk are Closepet, Kutagalli, Kailanah and Bidadi.

Closepet —A town on the left bank of the Arkavati situated in 12° 40' N lat 77° 12' E long, 30 miles south west of Bangalore on the Bangalore-Seringapatam road. Head quarters of the Closepet Sub Division and of the Closepet Sub Taluk and a municipality.

Population in 1901	Males	Females	Total
Hindus	1 801	1 703	3,504
Muhammadans	1 003	877	1,880
Christians	61	55	100
Total	2,865	2,635	5 502

A fair is held every Tuesday attended by about 4 000 persons.

Closepet, popularly pronounced *Kulis pete* is so named after Sir Barry Close Resident at the Court of Mysore. There is an inscription on a pillar in the town to this effect in Persian and Kannada. It is generally called in Kannada *Hosapēte* in Hindustani *Nawipet*, both meaning the new town. It is also called *Ramgiri*, from a neighboring hill, at foot of which the original town stood. Closepet was founded in 1800 by the Dewan Purnaiya for greater security of the high road which there passed through a wild and jungly tract. It was at the same time made the head-quarters of the Bargeer, or irregular horse. The horse breeding establishment of the Silehdars since removed to Kunigal (Tumkur District) was formerly at Closepet.

The town has an *agrahāra* at the side of the river, with a temple of Arkēśvara, and a chattram established by Purnaiya. The Muhammadans here are largely engaged in the rearing of silk worms. This industry was brought nearly to a stand by the disease which for some years destroyed the insects, those engaged in it emigrating in large numbers to the coffee districts. But the industry has now revived.

The Municipal income for 1921-22 was Rs 4,466 and the expenditure Rs 4,920

Dasanpura

Dasanpura.—A village in Nelamangala Taluk Population 364 The Ranganātha temple at this place, though so named, has a figure of Srinivāsa, about 2 feet high, flanked by consorts The Garuda-pillar in front has, instead of the usual Garuda, a Hanumān on the side facing the temple

Dasarahalli

Dasarahalli —A jodi village in Hoskote Taluk Population 339 Near the Channarayana temple at this place stands a fine four-pillared open *mantapa* surmounted by a sculptured pavilion resembling a small *gōpura* with entrances in the four directions All the entrances are flanked by *dvārapālakas*, the sculptures above them being Vishnu flanked by consorts on the east, Vēnugōpāla on the south, Vēnugōpāla flanked by consorts on the west, and a standing male figure with folded hands on the north representing perhaps the donor of the *mantapa* The *mantapa* is locally known as *Uttala-kamba*, and at the annual festival of the village goddess, a cocoa-nut is let down through a cavity at the bottom of the pavilion and there is a contest among the villagers for breaking it

Devanhalli

Devanhalli —A taluk in the north-east Area 229 70 square miles Head-quarters at Devanhalli Contains the following hoblis, villages and population —

Number	Hoblis	Villages and hamlets	Villages classified				Population in 1921
			Government	Sarvamanya	Jodi	Kayamgutta

4	Budigere	1,512
5	Bagalur	1 361

Principal
places with
population

The taluk was abolished in 1882 but re-established in 1886. The S Pinakini forms a part of its eastern boundary, and receives all the smaller streams. The country undulates in gentle curvatures the valleys being fertile and well cultivated. The elevated parts are covered with low jungle. There are a few small hills and rocks to the north and west but generally speaking it is an open country, healthy and well supplied with good water.

In addition to the usual dry and wet crops, there was until prohibited, some cultivation of the poppy for opium. Potatoes of good quality are raised in considerable quantities. Pamelos attain a large size. Sugar of superior quality was formerly manufactured, under the instruction of some Chinese brought over for that purpose by Tipu Sultan. A few coarse cotton cloths and *kumblis* (woollen blankets) are made.

An early place of importance in the taluk appears to have been Nellurpatna in the east, a town which has lain for centuries in ruins. In the thirteenth century Kundana seems to have been the royal residence of the Hoysala king Ramanātha, who had possession of the south and east of the Hoysala dominions. Devanhalli was subsequently founded by one of the family of refugees who, settling at Avati became the founders of the Magadi, Chikballapur and other lines of chiefs. Vadigenahalli, which is largely populated by merchants, is one of the chief trading places in the Bangalore District.

The revenue settlement was introduced in 1885 at the time when the taluk had been broken up and portions annexed

to other taluks Thus Kundana hobli was assigned to Doddaballapur taluk, Jala hobli to Bangalore taluk, and Devanahalli hobli to Chikballapur taluk The wet rates were found to be generally so high as to be prohibitive, in consequence of which all available manure was applied exclusively to the dry fields, and much rice land was waste

The revision settlement was introduced with effect from the year 1923-24 and the cultivable area was distributed as follows —

	Dry	Wet	Garden	Total
Occupied area	16,802	2,197	1,698	20,697
Unoccupied area	2,682	82	7	2,771
Kharab-land				24,649
Inam				3,979
Total				52,096

The total land revenue demand and collection in 1921-22 were Rs 1,42,815 and 1,34,789, respectively

The following was the average monthly rainfall for 27 years (1895-1922) at the following two places in the Taluk —

Station	Month					
	Jan	Feb	Mar	Ap	May	June
1	2	3	4	5	6	7
Chik Jala	0 20	0 11	0 48	1 29	4 01	2 35

Muhammadians	200	107	406
Christians	8	13	21
Total	2 712	2 075	5,387

A fair is held every Wednesday, attended by 500 persons

Devanhalli appears to have been originally a small village, named Devandoddi from Deva, its headman. About the year 1501 Malla Baire Gauda a son of one of the refugees from Kanchi who settled at Avati, being led by auspicious omens formed the resolution of building a fort on the spot. The consent of Dēva Gauda was obtained with difficulty and only after the bestowal of liberal compensation and the promise that the new town should bear his name. A fort the remains of which were formerly visible inside the present one, was accordingly erected by Malla Baire Gauda and named Devanhalli, or Devandhalli. He conferred the government upon his brother Sanna Baire Gauda, who succeeded in bringing a large tract of the surrounding country under cultivation. He reigned 40 years and was succeeded by his son Baire Gauda who reigned 25 years. The following chiefs succeeded to the government each being the son of the preceding — Dayal Baicbe Gauda ruled 37 years, Mndda Baire Gauda 20 years, Immadi Sanna Baire Gauda 37 years Gopal Gauda 35 years Dodda Baire Gauda 54 years and Rangappa Gauda only 10 months. The last of these dying without issue, was

succeeded by his relative Chikkappa Gauda of Chikballapur, three months after whose accession Devanhalli was invested by the Mysore army under Nanja Rāj. It fell in 1749 after a gallant defence of eight months and was thenceforward annexed to Mysore.

In this seige Haidar Alī, the future ruler of the country, first gained distinction as a volunteer horseman, and at Devanhalli his son and successor Tipu was born. These circumstances were sufficient to invest the place with peculiar interest in the eyes of the family. The site of Haidar's house is still pointed out, to the west of the fort. Haidar therefore commenced rebuilding the fort. It was built of stone, in the form of an oval flanked with circular bastions and two cavaliers on the eastern face, and was not quite completed when infested in 1791 by the army under Lord Cornwallis, to whom it easily submitted. When the fort was erected, the old *pēte* surrounding it to the south and east was levelled to the ground, to prevent its sheltering the besiegers in case of an attack, and a new one on rising ground half a mile to the westward was afterwards erected called the Sultan Pēte. This was soon deserted for the old quarter after the capture. It is interesting to note that the place was renamed by Tipu 'Yousafābād' (the abode of Joseph, the fairest of men) a name which, however, never became popular. It is worthy of remark that Tipu had the vanity to think he was—though brown in colour and possessed of a neck rather short and thick and a body somewhat inclined to corpulency—the handsomest of men and so called his birthplace after Joseph, the fairest of men.

Many are the tales told here of Haidar Alī and his son Tipu Sultān. Among these, the greatest favourite is the one which describes how Haidar as a boy was a petty cow-boy in a local Brāhman household and how one day, while he was fast asleep under the shade of a tree, a seven-hooded cobra played on his head and his Brāhman master espied this from at a distance and subsequently took him home and gave him a good meal and said he would be a great ruler one day. It is said Haidar

gratefully remembered his old master and his wife and requited their loving kindness towards him by the grant of rent free lands. The plain on which Tipu received his sons near here is still pointed out to the north-east of the plains by old residents. Mir Hussain Ali Kirmani states that the Sultan made a hunting and pleasure excursion to Devanahalli for the purpose and there on an extensive plain he received the ambassadors his sons, and their enlightened tutors or guardians. After the escort of the princes had been dismissed with honours and royal presents a banquet was we are told given by the Sultan at which everything which could promote festivity and joy was provided and every one of the Sultan's Amirs, and his brave officers received his favours with increase of rank and pay. The Sultan marked the occasion by raising several of his higher officers to the position of Mir Miran among them being Syed Ghaffar the commander of his military forces. Muhammad Raza (otherwise known as Denky Nawab) his maternal grandfather and Purnaiya.

The Vēnugōpalasvami temple here is a good Dravidian structure with a fine *gōpura* and a four pillared *mantapa* in front. The *navaranga* is supported by four black stone pillars carved with figures on all sides. Some of the figures worthy of note are Hayagrīva, dancing female figures with attendant musicians, a conch blower a Kinnara with the lower half of the body in the form of a bird and a huntress getting a thorn taken out of her leg. The last figure occurs in several places.

The stucco figures in niches over the front veranda of this temple as well as those on the *gōpura* are well executed. The outer walls have a frieze of large images, about 2 feet high illustrating scenes mostly from the *Rāmāyana*. The story of the *Balakānda* is well illustrated by the figures on the north and south walls. A portion of the frieze on the north wall delineates graphically the following events —the bringing of Rishyasringa from the forest to Ayōdhya by dancing girls, Dasaratha performing the sacrifice with the help of Rishyasringa and other sages, and the distribution by him among his queens of the *pāyasa* or sacred food. The figure with the head of an antelope is Rishyasringa and the figure with two heads is Agni

or the God of Fire The story is continued on the south wall up to the removal of the curse on Ahalya, wife of the sage Gautama A frieze on the east wall to the left of the entrance represents the story of Visvāmitra teaching archery to Rāma and the goddesses Bala and Attibala attending upon Rāma A portion of the south wall also illustrates the boyish sports of Krishna, as a portion of the north wall delineates the ten incarnations of Vishnu On the west wall is represented the coronation of Rāma In a cell in the *prakāra* is kept an artistically executed gilt vehicle called Chitrāgōpura-vāhana with two female figures standing at the sides The god is taken out in procession on this vehicle on the full-moon day of *Chaitra* (April) every year and thousands of people are said to collect together to witness this festival It appears that a grand illumination takes place on this day, one lakh of lamps being lighted A silver cup and a gong belonging to the temple bear inscriptions stating that they were presents from Haidar and a subordinate of the Pēshwa Bālājī Bājī Rao, respectively

The Nanjundēsvara temple is a small building with two cells in a line and a common *navaranga* It is said to be the oldest temple in the town

All the doorways of this temple are well carved The *dvārapālakas* at the sides of the *sukhānasi* entrance of the south cell have over them pilasters carved with the vase and creeper device To the left in the *navaranga* are kept figures of Nārāyaṇa with consorts, Takshaka, Nāga-mata, Karkōtaka, Brahma, Sarasvatī and Subrahmanya with one face and four hands, the upper ones holding a thunder-bolt and a trident, the lower ones being in the *abhaya* and *varada* attitudes flanked by his consorts Lavalī and Dēvasēna

The Siddhēsvara temple is a Lingāyet shrine with a seated figure, about 11 feet high, of Siddhēsvara with two hands, the left holding a *linga* and the right in the act of worshipping it.

The large pond known as Sarōvara is said to have been built by Dewan Pūrnaiya and the Ānjanēya in the shrine near it is called Sarōvarānjanēya The Gangamma temple, which belongs to fishermen, has a fine seated stucco figure, about 5 feet high, of the goddess with a smiling face and 4

hands, the attributes being a trident, a drum, a sword and a vessel. The figure treads on a prostrate demon

The municipal income for the year 1921-22 was Rs 6,031 and the expenditure Rs 4,842

Dod-Ballapur—A taluk in the north west

Principal
places with
population.

The taluk is an irregular oblong in shape about 18 miles from north to south, and 14 miles from east to west. It is practically an open country with undulating plains excepting in the north and north west where there is a range of hills through which a pass descends to the low country of Gornidnur. The river Arkavati takes its rise in the north-east on the Nandidrug hills and flows in a south westerly direction, feeding several of the tanks and draining almost all parts of the taluk excepting in the extreme north which is

drained by the North-Pennār and its tributaries. There are no forests of any importance excepting a stretch of scrub jungle in the north-west. A State Forest is in the course of formation near Makalidrug in the north, and there are two plantations at Hulkunte and Kolor.

The climate is generally cool and healthy, almost similar to that of Bangalore, though fevers prevail to a limited extent in the northern villages in the early part of cold weather.

The soil is generally red mixed with sand, peculiarly well suited for the cultivation of ragi and other dry crops. Other varieties of soil are also met with. The soils in the north and north-west are generally poor, while those in the centre and south are comparatively rich, varying in colour from deep brown to red. Black soils are rare in this taluk.

Besides the usual crops, some tobacco is cultivated and a small quantity of potatoes. Dod-Ballapur is fast becoming a great weaving centre. Superior cloths of Aralēpet and Dharmāvara pattern are manufactured to a large extent and exported to different places. The famine of 1877-78 affected this taluk more severely than any other in the Bangalore District, but the recuperative powers of the tract are so good that in two decades, the normal strength was almost resumed.

Passing over the times of the Gangas, the Chōlas and the Hoysalas, the country at a later period formed part of the dominions of Malla Baire Gauda, the founder of Devanballi, who, resigning that possession to his brother, and led by auspicious omens, founded the present Dod-Ballapur. With the countenance of the Vijayanagar king, who maintained a shadow of the former state at Penukonda, he speedily subdued all the neighbouring tract of country, forming the Goribidnur and Gudibanda taluks, and possessed himself of a territory yielding a revenue of a lakh of pagōdas. His descendants continued to rule this dominion until it was subdued by the Bijāpur army under Randulha Khān. The Mahrattas subsequently held it for a short time, when it was taken in 1689 by the Mughals under Khāsīm Khān.

and dismembered. After annexing the north to Chik Ballapur and other parts to Sirsi, the remainder was formed into a *jagir* yielding a revenue of 1,000 pagodas and bestowed on a general named Ali Khuli Khan. On his death it passed to his son and afterwards formed a part of the province of Sirsi until subdued by Haidar and incorporated with the State of Mysore.

A Hoysala stone in crypton of 1,667 A.D. in the taluk is of special interest on account of the symbol at the top having been removed in order to make room for an inscription in Persian dated in 1691 A.D. of the time of the Mughal Emperor Aurangzeb. This Persian inscription says that in the 32nd year of the reign of Aurangzeb the Fort of Bilapura Kariyata was in the hand of the Sambla (Sambhaji) family, that through the exertion of Khazim Khan Foudar of the Karnatak Province it passed from the hands of Sambla and son of Siva Dad (Sivaji) into the possession of the supreme Government and that in the 34th year of the reign it was granted to one Sheikh Abdulla. In the 30th year of the reign the stone had been brought from some temple and was intended for a building. But as it contained a grant of a charity, it was erected to perpetuate the memory of Sheikh Abdulla.

The revenue settlement was introduced in 1881 which remedied the defects in the alternate forcing of the revenue under the *batayi* system and checking it under an erroneous system of wet rates. The revision settlement was ordered to take effect from the year 1921-22.

The culturable area according to resettlement was distributed as follows —

	Dry	Wet	Garden	Total
Occupied area	61,630	7,600	1,087	71,217
Unoccupied area	9,463	197	4"	9,664
Kharab land				62,403
Inam				6,016
Total				1,40,288

The total land revenue demand and collection in 1921-22 were Rs 1,92,281 and Rs 1,88 222, respectively

The following was the average monthly rainfall for 15 years registered at the Sasalu station in the Dod-Ballapur taluk.—

Station	Month

A fair held on Thursday is attended by about 3 000 people

Dodda Ballapura Great Ballapur, is so named to distinguish it from *Chikka Ballapura* Little Ballapur. Similarly in Hindustani it is called *Bara Ballapur* and in Telugu *Pedda Ballapuram*. It is said to derive its name from the circumstance that a cow used to drop a *balla* of her milk daily over a certain ant-hill, an omen which led to the foundation of the town.

It was an important place of trade in the twelfth century under the Hoysala kings. But Malla Baire Gauda of Avanti the founder of Devanahalli was also the founder of the present Dod Ballapur. He was revolving in his mind the import of the omens he had witnessed in hunting when the god *Ādi Nārāyaṇa* was revealed in a dream as the dweller in the ant hill above-mentioned. A temple and fort were shortly erected the jungle cleared and cultivation encouraged. Obtaining authority from the king at Penukonda to punish the neighbouring refractory pālegars, Malla Baire Gauda speedily possessed himself of territory yielding a revenue of a lakh of pagūdās. In the government of this, he established his brother Havali Baire Gauda who died after a prosperous reign of 20 years and was succeeded by his son Dodda Havali Baire Gauda. He ruled 25 years and was followed by his son Havali Baire Gauda who ruled for 40 years. On his death Chikkappa Gauda, the heir being a minor the government was for a time conferred on Tammanna Gauda, the nephew and Dalavayi of the late chief. He discharged the trust reposed in him with zeal and fidelity for ten years, when he died, and Chikkappa Gauda now come to years of maturity succeeded. Three years after his accession, Dod Ballapur was besieged and taken by the Bijāpur army under Randulab Khān. After 40 years of possession by that power

it was surrendered to the Mahrāttas, by whom the fort was enlarged and various temples erected. In ten years, it was invested by the Mughals under Khāsim Khān, and yielded in 1689 after an obstinate defence of two months. Dod-Ballapur and a part of the surrounding country were then formed into a *jāgīr* yielding a revenue of 54,059 *pagōdas* and bestowed on a favourite general named Alī Khūlī Khān. He enjoyed it only for a short time and died. It was next bestowed on his son Durga Khūlī Khān, then Subadār of Sira, which however he shortly after relinquished and retired to Dod-Ballapur, but only enjoyed it for one year. It remained attached to the Government of Sira for 49 years, when it was seized by the Nizām, and bestowed as a *jāgīr* on Abbās Khūlī Khān. In 1761 it was captured by Haidar Ali and has ever since been subject to Mysore.

The fort, of which only the name remains, is said to have been erected with stones from the ruins of Rājaghatta. There are remains of several fine buildings and tanks in the fort, the principal, now almost destroyed, being the Ashur Khana erected by Abbās Khūlī Khān, and a fine well with three flights of stairs leading down to it and a very stout stone grating over the water. At the west of the town is the *darga* or tomb of a saint named Mohiddin Chishtī, said to have died nearly 227 years ago. It is built of materials taken from Hindu temples. The town extends lengthwise north and south for above two miles. Cotton clothes in great variety are made here.

The outlet and the bund of the Nāgarakere tank at this place are built mostly of the materials of ruined temples. The temples in the town are mostly modern. The ruined Ādinārāyana temple must have been a fine building, judging from what is now left of it. The four pillars of the *navaranga* are sculptured with fine figures on all sides. The figures of one of the pillars illustrate the story of the *Rāmāyana* in brief, of another, the story of the *Bhāgavata-purāna*, of the third, the story of the Narasimha incarnation, and of the fourth, the story of Gajēndra-mōksha or the saving of an elephant by Vishnu from the clutches of a crocodile. On the outer wall to the left of the *navaranga* entrance are found only a few figures of the frieze illustrating the *Bālakānda* story of the *Rāmāyana*, similar to the one at

Devaohalli An inscription is to be seen on the wall of the *mahādrara* and another in front of the Ānjaneya temple to the east. The Chaodramanllavara temple has on the pillars of the front hall among others figures of Bhairava Virabhadra Vyaghrajaḍa (or a sage with the lower half of the body in the form of a tiger) and Kannappa the hunter a devotee of Siva with his foot placed on a *linga*. Two of the pillars of the front veranda are sculptured with a male and a female figure with folded hands which are said to represent Arunachala Pant and his wife Sēshanima. The Pant who lived about 132 years ago is said to have built this as well as the Venkatarāmanasvāmī temple. The latter is a large structure surrounded by a veranda over which runs a parapet built of mortar in the Saracenic style. The pillars of the south veranda as well as those of the front hall have, carved on them, figures of the ten incarnations of Vishnu. Here also we have on two pillars figures of the Pant and his wife. One of the pillars shows a figure of Ganapati seated on a rat with his consort on the lap. Such a figure of Ganapati is called Sakti Ganapati. To the left of the outer entrance in the *prakāra* is kept the stone image of Ādinārāyaṇa belonging to the ruined Ādinārāyaṇa temple. It is a seated figure about 6 feet high with *prabha* with Lakshmi on the lap enooped by a seven hooded snake. To the right of the same entrance is lying a grinding mill about 2 feet in diameter the upper stone being beautifully carved with floral devices. The two *chauris* of the temple are according to the inscriptions on them presents from Shama Rao son of Arunāchala Pant. The god in the Vithala temple about 2½ feet high stands on a brick with the hands placed on the waist. His consorts stand at the sides with folded hands. The Gōpālkrishna temple has a figure of the god about 2½ feet high with four cows sculptured at the sides. Near the Taluk office are kept a few figures which once belonged to some temple. One of them deserving of notice is a four handed naked figure with flowing matted hair the right lower hand holding a bell and the left lower what looks like a vessel. It perhaps represents a form of Bhairava. There is a well built pond, now in ruins, in the town, partitioned by stone slabs into 16 compartments or wells. Dargāpura a village to the south, is said to have been granted to Chisti Vali above-named. The old inscription, *E C IX Dodballapur 32* is incised on a boulder at this village.

The municipal income for the year 1921-22 was Rs. 6,901 and the expenditure Rs. 6,277

೨೪೧

Domlur.

Domlur.—A suburb of Bangalore, on the east, included in the Civil and Military Station. On an old temple here are some Grantha and Tamil inscriptions of the time of the Hoysala king Vīra Rāmanātha, who ruled during the thirteenth century. The name of the village was Dombalur or Tombalur, perhaps Tumbalur, which, it was suggested, may afford a clue to the title of one of the earliest Kannada authors. This view, however, has been recently given up.

The two temples of Sōmēsvara and Chokkanātha here contain a number of inscriptions in Tamil and Kannada. Both on the pillar in front of the Māri temple and on the large slab near the entrance of Domlur is sculptured a discus on a high pedestal. The same is the case with a slab standing in a grove near at hand, but without any inscription. This may be a mere boundary stone, known as *truvalhikkal* in Tamil. To the north of the entrance to the village stand three stones, each containing a standing figure of a man with a stick on the neck, the ends of which are held by the hands. All the three figures face the Chokkanātha temple. Similar figures, about a dozen in number, are also found facing the Champakadhamāsvāmī temple at Bannērghatta, Anekal Taluk. It is not clear what these figures mean, but some people say that they represent persons who committed suicide for some reason or other by means of the weapon known as *Gandagattari* in Kannada. Two of the figures at Domlur appear to represent persons of some importance, as evidenced by their necklaces, etc.

Domlur is also called *Dēsīmānikkapattanam* in the inscriptions. It is said to be situated in *Ilaippākka-nādu*, a division of *Rājēndra-Sōla-valanādu*. *Ilaippākka* is the Tamil form of *Yelahanka*. Judging from the inscriptions, the Chokkanātha and Sōmēsvara temples which are Dravidian in style, must have existed before the middle of the 13th century. The former, with a pretty well carved Vishnu image, stands on a high basement in the middle of the village and must have been a prominent structure once, though now in a dilapidated condition. A few pillars and capitals lying in front of the temple, which

apparently formed parts of a front *mantapa* show pretty good work. The *Sōmēsvara* temple is in a more ruinous condition being situated on low ground in an unfrequented part of the village in the midst of cultivated fields.

The place is well known in modern times for its excellent bricks which are highly prized by house builders all round Bangalore.

Dommasandra —A large village in the north east of Anekal taluk, 3 miles west of Sarjapur Dommasandra.

Population in 1921 —Males, 952 Females 938 Total 1890

This village contains two Government and two Mission Schools. There are nearly 200 families of weavers here. Good female cloths are manufactured by them and their quality has earned a good reputation in the Bangalore market.

Gangavara —A village in Devanahalli taluk on the right bank of the S. Pinakini, near the head of the Hoskote tank. The inscriptions and remains at this place show that it was a place of some importance in the eighth century under the Gangas, and subsequently under the Chōlas. The *Sōmēsvara* temple has some picturesque fluted pillars with a seated lion for the pedestal. Gangavara.

Gavipur —A suburb of Bangalore City about a mile south west of the Fort. Gavipur

Its chief feature is the cave temple of Gavi Gangadharēsvara the Saivite emblems attached to which carved on a gigantic scale out of solid stone, are curious specimens of the mason's art. They consist of the *tristūla* or trident the *chhatra* or umbrella and the *damaruga* or double drum each being 15 feet or more in height and proportionately wide. They were executed in the time of Kempe Gauda.

The new extension near by it is known after it as the Gavipur Extension and forms part of Basavangudi. It consists of about eighty sites, on forty of which houses have been built.

Halasur

Halasur—One of the suburbs of the Civil and Military Station of Bangalore, situated north-east of the Cantonment, close to the large tank of the same name

The place appears to have been founded by Kempe Gauda, under the following circumstances. The surrounding country was then covered with forest, into which he had wandered from Yelahanka in pursuit of game, and being much fatigued, laid himself down under the shade of a tree. In his sleep the god Sōmēsvara, formerly worshipped on that spot by Māndava Rishi, and which lay buried in the sand, appeared in a dream, and revealing to him the existence of a hidden treasure, bid him therewith erect a temple, promising at the same time the divine favour. He accordingly secured the treasure and built the Sōmēsvara pagoda, employing, it is said, a sculptor, from Bēlur, a descendant of the famous Jakanāchāri, to ornament the walls with scenes from the marriage of Śiva and Pārvati (See below). The village of Halasur was also built, containing residences for the attendant Brāhmans, and made the *kasaba* of 33 villages, from each of which one *kolaga* for each *kandaga* of grain was appointed to be given as an endowment for the maintenance of the religious services. There is another temple on a large scale, dedicated to Subba Rāya, but unfinished. The village is a prosperous one and contains several wealthy residents of Tamil origin.

The Sōmēsvara temple, mentioned above, is a large one and a good specimen of the Dravidian style of architecture with a lofty *gōpura*. There seems to be some foundation for the story that it was built by Kempe Gauda, for there is a sculpture at the end of the wall to the right of the inner entrance which is said to represent him. In the front *mantapa* is a big brass-plated Nandi and towards the right on a platform are figures of the nine planets which are occasionally worshipped. On the west wall of the shrine of the goddess is sculptured the scene of the marriage of Śiva and Pārvati with Brahma as officiating priest and Vishnu and other gods as guests. No inscription has so far been discovered in the temple.

Haragadde

Haragadde.—A village in Anekal Taluk.

Population 602. The Channakēsava temple at this place, known as Parangalanī in the Tamil epigraphs, is a fairly large

building in the Dravidian style. The image of the god, about 5 feet high, is a good figure flanked by consorts all the three standing on a large well-executed *gomukha* (or a stone platter with a spot resembling a cow's face). The Kannada poet Lakshma, the author of a *Bharata Rukmāṅgada-charite* and other works, was a native of this village and a devotee of this god. In his works which are all dedicated to this god, the village is named Khagapuri. Tradition has it that though illiterate he acquired poetical skill by the grace of Vishvakṣēna mentioned above. He flourished in the first half of the 18th century and the present officiating priests of the temple are his lineal descendants.

Hasigala—A village in Hoskote Taluk. Population 575. Hasigala.

The Somesvara temple at this place is an old building probably of the Chōla period. It has two cells one containing the *linga* facing east and the other a figure of Virabhadra facing north. The lintel of the *sulhanāsi* doorway of the Sōmesvara cell has Tundaravara and the jambs dancing male and female figures some of which are shown in rather queer postures. At the sides are perforated screens of considerable breadth with holes of the shape of the leaves of the sacred fig tree. The outer walls of the *garbhagriha* of the same cell have a row of sculptures all round the south wall showing the dance of Śiva with attendant musicians, the west wall illustrates the story of the Naraśimha incarnation of Viṣṇu there are besides two curious sculptures here—a peacock with the head of a cobra and facing it a cobra with the head of a peacock and the north wall depicts a few *līlas* or sports of Śiva such as the killing of Gajasura etc.

Heggunda.—A village in the Nelamangala taluk. Heggunda.
Population 1029

On the slope of the hill near this place are two cave temples, one of Virabhadra and the other of Mallikarjuna. The stone containing Nelamangala 68 which is in the Mallikarjuna temple has a seated male figure with folded hands with a chauri bearer standing at the side. An inscription in characters of the 10th century is to be seen in this temple. On the summit of the hill, which is rather difficult of approach is situated what is known as the Rāma temple containing a short pillar to which it is believed Rāma's sacrificial horse was tied. By the side of

the pillar is the seated figure of a goddess with four hands which is said to represent Sīta. Two modern inscriptions found on the bells of this shrine give the name of the village as Hayagunda since, according to tradition, Rāma's horse (*haya*) was tied here. But this is merely an ignorant attempt to connect the village with the above story, seeing that a Tamil inscription (Nelamangala 67) of Viṣṇuvardhana's reign, found on the hill names the village Perkunda which corresponds to Pergunda in Kannada, the old form of the modern Heggunda. It may also be stated here that on a hill close by named Rāmadēvarabetta the foot-prints of Rāma over which a temple is erected form the object of worship. This is supposed to be the place where Ahalya, wife of the sage Gautama, was delivered from her curse. Festivals are celebrated in honour of the foot-prints.

Hessargatta,

Hessarghatta —A village in the Bangalore Taluk
Population 1704

In the Lakshminarasimha temple at this place, the image of the god, about $2\frac{1}{2}$ feet high, is seated on a high pedestal. He is said to have been worshipped by the sage Dūrvāsa. The *dvārapālakas* at the *navaranga* entrance have one leg put over the other as in some South Indian temples, where worship is conducted according to the Vaikhānasāgama. The front portion of the temple is said to have been built by the Vijayanagar king Achyuta Rāya (16th century). The tank here is the source of the water supply for Bangalore.

Hindiginal

Hindiginal —A trading village in the north-east angle of the Hoskote taluk, near where the Kolar-Vadigenhalli road crosses the Bangalore-Cuddapah road. Population 904.

The Rāma temple at this place, recently renovated, is a *trikūtāchala*, i.e., has three cells. The main cell facing north has a *brindāvana* with Kēsava flanked by consorts sculptured on the front face, the east cell has Hanumān, the original god of the temple, and the west cell Rāma, Lakshmana and Sīta set up about 56 years ago. The temple has a vehicle known as Chitrāgōpura-vāhana adorned with painted wooden images. In a grove to the north of the village is a *māstīkal* carved with the figures of a warrior and his two wives. The warrior is represented as bearing a quiver on the back and shooting arrows.

One of the wives has a flask in her left hand the other hand being placed across the body, while the other holds a lotus with stalk in the right hand the other hand hanging by the side. It is not known if the difference in the attributes has any significance. May it be that the wife holding the flask became a *sati* and the other did not?

Honganur —A village about five miles south of Channarayana. Population 2,433. In the time of the Ganga kings it was the chief town of Chikka Gangavadi, a district which occupied most of the valley of the Shimsha. Honganur

Hosahalli —A village in Hoskote taluk. Population 197. Hosahalli

This village has a ruined Chandevana temple containing figures of Satpamātrika and Canapaṇi. There are also two *mātūlals* in the village. One of them shows a couple the husband holding a sword and a dagger in his uplifted hands and the wife bearing a flask in the right hand and what looks like a mirror in the left. The other shows on the lower panel two warriors armed with daggers fighting with each other and on the upper a couple with folded hands in front of a figure of Viṣṇu.

Hoskote —A taluk in the east. Area 272.35 square miles. Head-quarters at Hoskote. Contains the following hoblis, villages and population — Hoskote

Hoblis	Villages including hamlets	Villages classified				
		Govern-ment	Sarva-manya	Jodi	Kayam-gutta	Popula-tion in 1901

3	Hindiganal	904
4	Sivanapur	863

Towards the north, the S Pīnākini forms the western boundary. After entering the taluk, it supplies the large tank at Hoskote, and thence flows southwards past Kadgodī, where it receives a stream from the Bangalore taluk on the west. With the exception of some low hills on the north, the country is open and easily crossed in all parts. The tracts best cultivated are those bordering on the S Pīnākini and the neighbourhood of Nandagudi eastwards. From Nandagudi southwards and along the Bangalore road, the soil is stony and unfertile. Some cultivation is carried on of potatoes, and formerly poppy was also grown, in addition to the usual wet and dry crops. Considerable attention is given to the cultivation of hay for the Bangalore market, especially in the neighbourhood of Hoskote.

At Nandagudi are traces of former buildings, of which it is related that they mark the site of Pātālipur, the capital of Uttunga Bhuja Rāya, whose nine nephews, the Nava Nanda, being imprisoned by him, were released by the schemes of Chāṇakya. The story is taken from the *Mudra Rākshasā*, a play based on the successful usurpation of Chandragupta and the establishment of the Nanda kings. In a similar manner, Dharmēsvara, in the same neighbourhood, is connected with Dharma Rāya and the Pāṇdavas. They are stated to have been rendered insensible by the poisonous exhalation of a well made by Duryōdhana for their destruction. This incident is said to be sculptured on a pillar at the temple over the spot. Two masons, engaged in the repairs of this temple 60 years ago, are related to have fallen down senseless from the exhalation on shifting the stones covering the well.

The country at times belonged to the Gangas, and to the Pallavas or Nolambas. The Chōlas followed, but subsequently

it formed part of the Hoysala dominions, and on their partition, went with the Tomal territory to Hanumantha. Eventually under Vijayanagar it became a possession of the Sugatur family one of whom erected Hoskote, or the new fort, as distinguished from Kolar and settled traders in the place. Afterwards it became a part of the territory administered by Shahji, the representative of the Bijapur princes and changing hands several times was finally ceded to Haider in 1761, and united to the kingdom of Mysore.

The revenue settlement was introduced in 1886.

The revision settlement was introduced with effect from 1921-25 and the culturable area was distributed as follows —

	Dry	Wet	Garden	Total
Occupied area	25,200	6,554	5,200	36,954
Unoccupied area	4,160	281	106	4,547
Kharab land	8,001			8,001
Inam				14,432
Total				1,77,215

The total land revenue demand and collection in 1921-22 were Rs. 1,92,401 and Rs. 1,81,380 respectively.

The average rainfall in the taluk was as follows —

Station	Month					
	Jan	Feb.	Mar	Apr	May	June
Bulbele Kadgodri	0.20 0.19	0.10 0.18	0.30 0.44	1.45 1.12	3.45 3.16	2.07 1.91

The Bangalore branch of the Madras Railway crosses the south of the taluk, with stations at Whitefield and

kundi. The Bangalore-Kolar road runs through the taluk from west to east, and gives off at Hoskote roads to Kadapa, to Jangamkote and to Sulibele north-wards, to Malur east-wards, and to Kadgodī south-wards.

Hoskote.—A town on the left bank of the S. Pinākinī, situated in 13° 4' N. lat., 77° 48' E long., 16 miles E N E of Bangalore, on the Bangalore-Kolar road, and 6 miles north-east of the Whitefield Railway Station Head-quarters of the Hoskote taluk, and a municipality

Population in 1921	Males	Females	Total
Hindus	1,943	1,878	3,821
Muhammadans	371	316	697
Christians	11	13	24
Total	2,325	2,207	4,532

At the Amritēsvara *rathōtsāva*, for ten days from Vaishākha *suddha* 11, there is an assemblage of about 4,000 people. On the full moon day in the same month, Dharma Rāyan *karaga* is attended by about 5,000 people

Hoskote, new fort, so called to distinguish it from Kolar, was built about 1595 by Tammē Gauda, the chief of Sugatur, who had recently settled at Kolar and obtained from the Penukonda sovereign the title of *Chikka Rāyal*. The superiority of the soil to that of Kolar induced him to fix on the new site, as well as the facility with which the waters of the S Pinākinī might there be dammed for purposes of irrigation. The large Hoskote tank, with an embankment two miles long, which forms when full a sheet of water not less than ten miles round, bears testimony to the sagacity of his choice. Raising an armed force, he subdued Anekal, Mulbagal and Punganur, and added them to his possessions. He ruled till 1632. Shortly after, the territory was conquered by the Bijāpur army, and subsequently conferred as a *jāgir* on Shāhji, the Governor of Karnatak Bijāpur, who resided at Bangalore. On the capture of these districts by the Mughal troops under Khāsim Khān in 1663, they became part of the

province of Sirā In 1756 Hoskote was taken by the Mysore army but was subdued the following year by the Mahrattas. It changed hands several times until finally ceded to Haider Ali and annexed to Mysore in 1761.

The Avimuktasvara temple is a large Dravidian structure said to have been founded by the abovenmentioned Timme Gauda. It has three cells standing in a line the middle cell enshrining a figure of Virabhadra, the right cell a *linga* and the left Pārvatī. The processional image, said to have been recently prepared, bears no inscription on the pedestal which merely gives the name of the god. Of the noticeable figures in the *nararanga* are a two armed Ganapati and a two-armed Subramanya. The latter has only one face and bears in the right hand the weapon *sakti* the left hand being placed on the waist. His vehicle, the peacock, is shown at the back. In front of the temple stands a fine *dīpa stambha* or lamp pillar somewhat resembling those at the Hariharasvara temple at Harihar. It is about 25 feet high with pedestal and is built of 22 circular discs, the alternate ones jutting out in the four directions so as to allow lamps being placed on the protuberances which number 44 in all and are carved with floral or geometrical designs on the upper surface. It has on the east face a trident on the south a *linga* on the west a drum and on the north a lotus. On a pillar to the left in the *mulka mantapa* or front hall is carved a standing figure about 1 foot high wearing a *gotu* or cloak and leaning on a staff which is said to represent the chief Tamme Gauda. A similar figure is also found on one of the pillars of the *kalyāna mantapa* of the same temple. These figures are very much like the figures of Kempe-Gauda found at Magadi and other places. The Vithalesvara temple has also three cells standing in a line. The middle cell has a good figure about 3 feet high of Vithala flanked by consorts. The god stands with his two hands placed on the waist. The right cell has good figures of Garuda and Ganapati and the left a good figure of Hanumān. From the records in the possession of Vithalesvara Subbarāya the hereditary *archaka* of the temple we learn that it was founded about the middle of the 17th century by Raghunātha Bāvajī Suhedār of Hoskote-peragana at the instance of the Peshwa. The images seem to have been sent from Poona with the Brāhman Mīndgal bhatta who became

the first *archaka* of the temple The village Turugalur of the revenue value of $42\frac{1}{2}$ *vanāhas* in the Malur Taluk was granted for the upkeep of the temple Among the old papers in the possession of the present *archaka* are a *sanad* issued by Purnaiya in 1800 , another issued by Lingarājayya-arasu, Fauzdār of Bangalore, in 1815 , another issued by Dewan Venkata-ārasu in 1830 , two issued by Raghunātha Bāvājī in about 1760, one addressed to *archaka* Rāma-bhatta, son of Mudagal-bhatta, and the other addressed to the Dēsapāndes and other officials of the Paragāna , and two issued by merchants and officials in 1772 granting certain dues to the temple

There are two Ānjanēya temples in the town known as the Kōte Ānjanēya and the Agrahāra Ānjanēya The former is a small but neat building with an ornamental plinth and a porch supported by four sculptured pillars, the middle ones adorned with lions and riders and the end ones with a fine pilaster each cut out of the block The other temple, which appears to have been recently renovated, has in the *navaranga* four beautifully carved black stone pillars which, judging from the sculptures on them, seem to have originally belonged to some ornate Siva temple of the Dravidian style The workmanship is of a superior kind, though the pillars differ from one another in design The south-east and north-east pillars are mostly similar, both having a pilaster standing on an elephant and a *yali* in the one case and on a seated lion in the other The former has, attached to it, on the east a plain round column $4\frac{1}{2}$ feet high and 8 inches in diameter, which, it is said, could be turned round if the bottom now buried a few inches in the ground was set free There are old people in the town who say that they have turned it round The south-west pillar has likewise a pilaster resting on a standing lion, and the north-west pillar is adorned with three pilasters carved out of one block The capitals appear to be made of granite, and only one of them, that on the south-west pillar, is sculptured The sculptures are a *ganda-bhērunda* with human body holding elephants in the beaks and claws on the east face and Vyāghrapāda worshipping a *linga* decorated with fine creeper work on the west Among other sculptures on the pillars may be mentioned a huntress armed with a bow and an arrow getting a thorn taken out of the leg , Tāndavēsvara with Vishnu as a drummer and Brahma and Subramanya as attendant musicians , Narasimha as a drummer, Kannappa kicking a *linga* , Yama

seizing Mārkaṇḍēya Bhairava resting his right hand on a basket borne on the head of a dwarf and receiving what looks like some eatable from a woman and Siva spiking some one with the prongs of his trident and touching the head of another. The Varadaraja temple is said to have been renovated in about 1830 by Biligiri Rao a former Amildar of Hoskote and a member of the Hebbar Srivaishnava community. It is also stated that he built the Āṇjaneya temple near the tank since

A portion of the fort appears to represent the site of an ancient city. It abounds in ashes and old pottery the latter probably not so old as that at Anekal. Most of the land here now belongs to Sinappa Shanbhūg of Hoskote who has allowed the earth which is full of ashes at a depth of about 2 or 3 feet to be removed for being used as manure. The fort was full of houses once though deserted at present but the pottery in question is certainly older than the time of Tamme-Guṇḍu who built the fort in about 1500. We are therefore led to the inference that the place is the site of an older city. Sinappa says that excavations conducted by him for levelling the land disclosed some stone foundations and earthen pipes plastered over with *chunam* which had apparently been used for conveying water as also mud pillars enclosed with sand. There are two Lingayat *mathas* known as Chikume-matha and Virattayya's matha, the latter about a mile from the town. Both are stone structures more or less in a ruinous condition. The former is so called because it has close to it a perennial spring (*chikume*) in the form of a well which supplies good drinking water to the eastern portion of the town. It has also another empty well faced with rough slabs. The other *matha* is a large building with several sculptured pillars, one of the sculptures being a figure of Tamme Guṇḍu who is said to have built the structure. In front of the entrance is lying half buried a dressed stone slab about 6½ feet by 4 feet with bevelled edges decorated with scroll work which is very probably a cot with the legs buried in the ground. But people say that it was used to heap cooked rice on for distribution among the poor who visited the *matha*. Behind the building is a fine well faced with dressed stone slabs on all the sides with a shallow stone trough near it. In Nandārāma Sing's grave near the town are a few *māṃśikals* which differ in some respects from similar memorials in other parts of the State. One of them shows the husband armed with daggers

in both the hands, the right hand being raised, while the wife holds in the left hand a water-vessel resembling a flask instead of the usual *gindri* or spouted vessel, the right hand being placed on the belly. Another in the Municipal garden shows a warrior and his two wives, both of whom appear to have become *satis*. The warrior is represented as wearing a beard and a top-knot, (*gonde*). He holds a dagger in the right hand, the other being placed on the belly. The wife to the right holds a flower in the right hand and a flask in the left, while the one to the left bears a murror in the left hand and what looks like a thunderbolt in the right, flames being shown as issuing from her head. There are also two smaller figures with folded hands on either side of this wife, which apparently represent her children. A third near Bendiganhalli, though at some distance from the town, may also be noticed here. Here, too, we have a warrior and his two wives. He holds a dagger in his right hand with the point turned to the ground. The wife to the left bears a flask in the left hand and a mirror in the right, while the other wife holds a mirror in the left hand and a lime in the right.

In the Municipal garden, which has a small neat structure in the middle, is collected together a number of sculptures brought from some ruined temples. They consist of a number of Nandis and figures of Vishnu, Virabhadra, Ganapati and Saptamātrika or the seven mothers. The *māstikal* here has already been noticed in the previous para. There is also lying here the lower part of a huge millstone, about 5 feet in diameter and $1\frac{1}{2}$ feet thick, resembling those on the hill at Chitaldrug. To the north of the town is a fine *idga*, now mostly gone to ruin. An inscription is to be seen close to it. In a garden known as Khāji's grove to the east of the town is an ornamental plaster structure raised on a stone plinth, which is popularly called Khāji's *darga*. The name of the Khāji is given as Sāballi Sāb and he is said to have died more than 200 years ago. Another ornamental structure, though in a ruinous condition, is Latif Shāh's *darga*, popularly known as Khāsim Sāb's *maḥan*, situated near the old mosque in the east. The fine *gumbaz* situated to the north of the Varadarāja temple is said to represent the tomb of another Khāji, a predecessor of the abovementioned Sāballi Sāb, who lived like a hermit in a stone *mantapa* in the midst of a garden. The *mantapa* is still to be seen near the *gumbaz*. A Tamil inscription is to be seen near the Pēte Ānjanēva temple.

Hulladurg—A small fortified hill, about 37 miles from **Hulladurg**
Vysore. The fort is situated on an inaccessible rock
 considered capable (in olden days) of reduction only by
 famine. Notwithstanding its natural advantages it
 changed hands thrice in the war of 1790-1791.

On the 19th of June 1791 the allied armies having crossed
 the Maddur river and encamped on its eastern bank the Chief
 Engineer Lieutenant Colonel Ross, was sent forward with the
 22nd battalion of Coast Sepoys commanded by Captain Oran to
 reconnoitre and summon Hulladurg and the day following
 the 6th brigade was sent to invest the place and make an appear-
 ance of attacking it. Fortunately the garrison thought their
 enemies too formidable to be resisted and agreed to yield up
 the place on condition of having their private property secured
 to them and being safely escorted clear of our camp. In the
 neighbourhood of this place were collected above six thou-
 sand head of cattle and two thousand sheep with a quantity of
 grain in the fort and *pettah* which afforded a reasonable supply
 to the army. At the same time were liberated thirty people
 from the Karnatic one of whom had been kept in irons in the
 fort seven years another fourteen probably forgotten by the
 ruler of the day as what motive can be assigned for the perpetual
 imprisonment of a few obscure peasants brought from a distant
 country? Lord Cornwallis deeming it too inconsiderable
 to be kept by our army it was offered to the Mahrattas as an
 useful halting place for their convoys but they also declining
 its possession orders were issued to destroy it so as to prevent
 its being again occupied by the enemy. After the British had
 thus quitted it Tipu thought proper to repair its dismantled
 works, and garrison it afresh. This the British found when
 their army encamped near it, on the 27th of January 1792
 on the march to Seringapatam. A reconnoitering party being
 sent on from the left wing the garrison fired upon it, as it ap-
 proached but when the Killedār was summoned by Lieutenant
 Colonel Maxwell who told him that there was no time to deli-
 berate for if he delayed he should instantly commence the attack
 he was so intimidated as to surrender without further resistance.
 Hulladurg was now garrisoned and established as an advanced
 post, being ten miles nearer to Seringapatam than Uttaradurg.
 And from this place the allied armies, being finally assembled

commenced their march on the first of February, for the second attempt on Tipu's capital

Hulikal.

Hulikal —A village in the north of the Magadi taluk, in the Kudur Hobli Population 859.

It is said to have been founded in 1310 by the Hoysala king, under the following circumstances —A *sanyāsi* named Guriachinta, who had gained his favour, lived at the foot of the adjacent hill called Rānalinga Betta On a certain day, one of the holy man's bullocks, attacked by a tiger, not only threw off its assailant but killed it This being reported to the king, he considered it a happy omen and ordered the hill to be fortified, naming it, in memory of the incident *hul-lallu*, tiger-rock, or, according to the tradition of the place, *hul-kollu*, tiger-kill. It subsequently came into the possession of Baiche Gauda of Koratigere, whose descendants held it as tributaries of the Mysore kings The chief was expelled by Tipu Sultān and the place annexed to Mysore

This place contains a number of ruined temples and *mantapas* The Pālegār's house is a good stone structure Adjoining it on the north is a tiled mud structure with an open courtyard and a veranda supported by huge wooden pillars, which are 2 feet square at the bottom

The Mallēsvara temple, one of the temples in ruins, is a small, neat structure in the Hoysala style, being similar in plan to the Chennigarāya temple at Turuvekere It is mostly buried and in ruins It faces north and consists of a *garbagriha*, an open *sukhanasi*, a *navaranga* and a porch The *garbhagriha*, the *sukhanasi* and porch are all of the same dimensions, being about $4\frac{1}{2}$ feet square, while the *navaranga* measures 16 feet by 14 feet The ceilings which are about one foot deep have lotus buds, the central one of the *navaranga* having a larger bud with three concentric rows of petals The *navaranga* has two niches enshrining figures of Ganapati and Bhairava There are likewise figures of Subrahmanya and Vishnu, the latter adorned with a *Yagnōpavīta* or sacred thread and a peculiarly formed tiara The tower, now gone to ruin, consists of uncarved blocks with Nandis in two or three tiers at the angles The Sangamēsvara temple, newly built with the materials of the ruined Kamathēsvara at the same village, has in the *navaranga* figures of Vēnugōpala, about 5 feet

high, Narayana and Sūrya both about three feet high brought from the ruined temple. The first is a fine image flanked by consorts with cows, cowherds etc. carved at the sides. The slab containing E C 12 Tiptur 35 is now kept at the entrance of the temple. The Kempanima temple has two large stucco elephants at the sides of the navaranga entrance. The goddess is a coloured stucco figure about three feet high seated with a trident, a sword, a drum and a cup in her hands. A worn *viragal* is found to the right of the temple.

Huskur—A village in the Sarjapur Hobli. *Anchal Tuluk* Huskur
Population 583

A fair takes place on Friday attended by 300 people. A festival (*parishé*) is held for five days from *Phalguna bahula* 3rd in honour of Mudhuramma at which 3 000 persons assemble and as many as 10 000 bullocks are brought for sale.

Colonel Boddam gave the following account of a visit to the cattle fair in 1871—

There are peculiarities about this fair it is essentially one for low castes both human and bovine. There is a superstition that cholera and cattle plague are averted by worship at the Huskur temple (a very insignificant one) at this time consequently all the idol cars of the surrounding villages are dragged to the temple each with about forty bullocks and their owners and a rabble usually there are not less than 25 of these cars run up like high Chinese pagodas on a framework of bamboo and covered with gaudy paintings of Hindu deities. The religious ceremonies last five days, and then the cattle fair is held after which the cars are taken back on an average about 10 000 bullocks are collected but the greater portion of them are inferior cattle. Looking over the lot I found all the good caste animals were born outside the Province principally at Mahadesai. I only came upon one good animal bred in this District the mother was said to be of fine breed. As a rule the people do not keep fine cows they are content with the small cows of the country for giving milk and do not attend to breeding. This year owing to many people being still engaged in threshing their grain which had been delayed by the recent unusual rains, there were less idol cars brought (15 only) and fewer bullocks—not 8 000 in all.

Jalige

Jalige —A village in the Devanhalli Taluk. Population 274.

The Rāma temple here has a seated figure of Rāma, about 2½ feet high, with 2 hands, the right hand being in the *abhaya* attitude and the left resting on the knee. To the right of Rāma is a standing figure of Lakshmana and to the left a seated figure of Sīta with folded hands. The god is said to have been set up by king Janamējaya. In a cell to the left stands an inscribed stone recording a grant to Chāmundēsvari on the Chāmundi hill by Krishna-Rāja-Wodeyar II of Mysore. It is interesting to note that the stone itself is now worshipped as Chāmundēsvari and the *pūjārī* gets pay and enjoys a *mānya* or rent-free land for worshipping it. The stone is smeared with oil and bedaubed with vermilion, so that only a few letters here and there are visible to the trained eye.

Jigani

Jigani —On the Bangalore-Anekal road, *via* Bannerghatta. About 20 miles south of Bangalore. Headquarters of the *hōbli* named after it. Population 1340. The local chiefs can claim a respectable antiquity being referred to as subordinates of the Hoysala kings in 1302 A. D. (*Anekal* 80). This inscription gives the name in the form *Suguni*. In 1422 A. D., they were under the Vijayanagar king who was at Mulbagal (*Anekal* 7a).

There is a large tank with a sluice in the form of a lofty four-pillared *mantapa*. The inscriptions Anekal 76 and 77 here are fragmentary Ganga records not connected with each other. The Varadarāja temple at the village appears to be an old structure.

Jodi Manganahalli

Jodi Manganahalli.—A village in Bangalore Taluk. There is to be seen here an epigraph, engraved partly in Dēvanāgarī and partly in Kannada, which seems to record the grant by Sīvājī, the famous Mahratta leader, of the village of Rāmasamudra. It appears to be dated in 1677 A. D. The epigraph has been copied by the Archæological Department (*M. A. R.* 1909-10, Para 103).

Kalyā.

Kalya —A village in Magadi Taluk. Population 1,060.

It was a holy place to both the Jains and the Lingāyets. The village is named Kalleha in inscriptions and literary works.

The ruins of a *basti* or Jaina temple are pointed out in the village and an inscription at the place *E C I A Mgadi* 18 is a copy of *Sravana Belagola* 136 which records a compact made in A D 1368 by Bukka Raya I of Vijayanagar between the Vishnavas and the Jainas with a view to settle the differences between the two sects. Two short epigraphs to be seen near a boulder known as *Adugal bande* simply record the name *Devi setti* in characters of the 13th century below a *mukkoda* or triple umbrella a Jaina symbol indicating a grant by that individual to some Jain institution. On a small hill to the west of the village are situated a Lingayat *matha* and the *Kalikavara* temple. The former is a decent and substantial structure with a court yard and a cave containing a big room and a porch sheltered by a big boulder. Outside the *matha* are three or four *mantapas* containing *gaddiges* or tombs one of which with a big *Anandi* sculptured on a slab is said to be the tomb of Palkurike Sōmesvara. The latter was a great Virasaiva teacher and author who flourished at the close of the 12th century and who according to the *Channa basma purāṇa* died at this village. A much worn old inscription in characters of the 8th century is to be seen on a boulder to the left of the entrance to the *matha* and another of a later period at the entrance known as *Bhairava bagilu*. The *Kalikavara* temple, picturesquely perched on the hill, presents a pretty appearance from below. It is a cave temple with a *pradikshina*. To the right of the steps leading to the temple is a short pillar sculptured with a human head. This is said to represent an old woman named *Kumbhalakanyji* (the Pumpkin grand mother) who is supposed to have brought ruin on the place which was once a city of considerable importance bearing the name *Kalavati*. It is said that there was a fierce fight between the Jainas and the other inhabitants of the city about the purchase of the pumpkin brought by the above mentioned woman which resulted in the death of a very large number of the population. To the south of the village stands a huge *Garuda* or lamp pillar about 2½ feet square at the bottom and 30 feet high which is said to have been in front of a *Varadnāja* temple now no longer in existence. It is said that the metallic image of this temple was removed to the *Ranganātha* temple at *Tirumalē*. The *Āṇjanēya* temple has in front a fine figure about 1½ feet high of *Chakratālvār* with 8 hands. This represents the discus of Vishnu.

Kambalu

Kambalu—A village in the Sōmanapura hobli, Nelamangala taluk Population 386

There is a Lingāyet *matha* at this place, said to be affiliated to the Parvata *matha*. It has a shrine of Mallikārjuna with a good Nandi-mantapa in front. In another shrine is a seated figure, about 1½ feet high, of Marulasiddhēsvara with two hands, the left holding a *linga* and the right bearing a rosary in the *abhaya* attitude. This *matha* is stated to be subordinate to the *matha* at Hunasamāranhalli, Devanhalli Taluk

Kankanhalli

Kankanhalli—A taluk in the south Area 623 40 square miles Contains the following hoblis, villages and population:—

Hoblis	Villages and Hamlets	Villages classified				
		Govern-ment	Sarva-manya	Jodi	Kayam-gutta	Popula-tion in 1921
1 Harohalli	54	48	1		5	21,217
2 Kankanhalli	46	41		1	4	23,739
3 Maralavadi	46	45		1		16,755
4 Kodihalli	45	42	1	1	1	14,312
5 Uyamballi	35	33	2			14,289
6 Satanur	39	39				13,181
Total	265	248	4	3	10	95,024

Principal places with population

No	Place	Population
1	Ogichudahalli	1,228
2	Somanahalli	1,415
3	Harohalli	3,557
4	Kankanhalli	5,759
5	Chikkamudavadi	1,205
6	Kodihalli	1,689
7	Herandyapanahalli	1,059
8	Alahalli	1,544
9	Nallahalli	1,410
10	Maralebekuppe	1,451
11	Yadamarahalli	1,064
12	Hukunda	1,036
13	Chudahalli	1,069
14	Sathanur	1,620
15	Halasur	1,204
16	Avanimall	1,009
17	Chilur	1,220
18	Chikkamaralavadi	1,029
19	Doddamaralavadi	1,285

The taluk is bounded on the south by the Cauveri and traversed from north to south by its tributary the Arkavati. The southern half of the taluk is a succession of hills and forests, affording extensive grazing grounds in proximity to the river Cauveri. The principal heights near Kankanhalli are on the west Hanati Mari Betta, 3,422 feet above the level of the sea, Narasimha Dēva Betta and Mudvadi Betta on the east Bilikal Betta and Koppa Betta the latter 2,822 feet in elevation.

The Arkavati is joined on the west near Mudvadi by the Virshabhavati from Bangalore, which itself receives a little higher up the Suvarnamukhi from Ankal taluk. Another considerable stream from the same quarter unites with the Arkavati at Kankanhalli, as well as two further south one on the west and one on the east. Ragi avare and the castor-oil plant form the principal cultivation of the open parts. Tamarinds and cocoa nuts are also important products as well as mulberry. But the soils are for the most part inferior, and generally very shallow and rocky.

The taluk was included in the territory granted to Jagadēva Raja, and by him the fort of Kankanhalli seems to have been erected. It was captured along with Channapatna by the Mysore Rāja in 1630.

The revenue settlement was sanctioned in 1896. The area of the taluk is thus distributed:

Culturable (dry 91,716 wet 1,671 garden 2,651)	98,638
Unculturable (including village sites etc.)	1,75,261
Inam villages	13,825
Forests (81,391) and Lavals (6,003)	90,394
Total area in acres	3,78,121

Of the culturable area, 4,263 acres are waste.

The total land revenue demand and collection for 1921-22 were Rs. 1,24,334 and 1,23,277 respectively.

The following was the average monthly rainfall in the taluk.—

Station	Month					
	Jan	Feb	March	Apl	May	June
1	2	3	4	5	6	7
Kodihalli (9 years)		0 14	0 13	0 91	3 75	2 29
Satnur (8 years)	0 04	0 10	0 30	1 11	3 95	3 18

Station	Month						Year
	July	Aug	Sept	Oct	Nov	Dec	
	8	9	10	11	12	13	14
Kodihalli (9 years)	2 26	3 12	7 65	4 68	3 10	0 36	28 39
Satnur (8 years)	1 88	4 18	6 52	4 99	3 79	9 16	30 20

There is a road from Kankanhalli to the railway at Closepet. Also a road from Bangalore to Kankanhalli, continuing west to Mysore. There is a crossroad from Satnur to Channapatna, and one from Kankanhalli to Kodihalli.

Kankanhalli—A town on the right bank of the Arkāvati, situated in 12°33' N Lat 77°29' E long, 36 miles south of Bangalore, on the Bangalore-Malvalli road, and 17 miles from the railway at Closepet. Head-quarters of the Kankanhalli taluk, and a municipality.

Population in 1921	Males	Females	Total
Hindus	2,620	2,559	5,179
Muhammadans	301	256	557
Christians	6	2	8
Total	2,927	2,817	5,744

A fair held on Thursday is attended by 2,000 people.

The existing fort of Kankanhalli appears to have been erected by Jagadēva Rāya, the chief of Channapatna, who

in order to do so is said to have displaced a smaller structure owned by one Kanakana, and whence the name (but see below) It was captured by Chama Raja of Mysore in 1630

The principal feature in the fort is the ancient temple of Ranganatha, much out of repair The town was twice burned or laid waste by Tipu Sultan to prevent its being of use to the British army on their march to Seringapatam The beasts of prey increased so much in consequence that during the last two years of his reign eighty persons were carried away by tigers from within the walls of the fort Except on the north it is surrounded at a short distance by lofty mountains and thick jungle On the banks of the Arkavati are many cocoanut gardens

The alliteration of the name excites attention and arouses curiosity as to its derivation Buchanan has the following remarks on the subject — "I went three coses to Kanikarn halli, commonly called Kankanhalli. The former name is universally said by the natives to be the proper one but the derivation which they give of it seems very forced *Kanikarna* they say is the genitive case of *kānikār* which in the Tamīl language signifies a proprietor of land and *halli* in the language of *karnāta* is a village In a note he adds

The name of this village is properly *Kanya karna*, composed of two Sanskrit words *kanya* virgin, or the goddess Bhavāni, and *karna*, ear ' This cannot be said to throw much light on the question

An inscription of the 13th century gives the name as Kanikarahalli, which accords with the first explanation.

Municipal funds in 1921-22 was —

	Rs
Income	3 503
Expenditure	3 738

Koramangala — A village in the Magadi Taluk. Population 376 Koraman-
gala.

Near this place are found numerous *Pāṇḍavara-gul*i or cromlechs with as usual gigantic slabs for the roof, situated within a circle of rough boulders There is also an underground

cell sheltered by a huge slab with a porch in front It is not quite clear what this structure was intended for

Kotigenhalli

Kotigenhalli —A village in Hoskote Taluk Population 513

Two old records at this place are of some interest One of the inscribed stones has at the top a big boar attacked by three dogs, in front, behind and on the back The inscription evidently refers to a boar hunt, but unfortunately only a few letters are legible The village has a *makan* containing the tombs of the three *valis* Ināyat Shāh, Sadat Shāh and Rahīmān Shāh The *fakīr* in charge of the *makan* has a number of Persian and Marāthi *sanāds* issued in favour of the *makan* by the Mughal Viceroys of Sira and the Mahrattas Some of the Persian *sanāds* were issued by Durga Kūh Khān during the reigns of Shāh Ālam I and Farrukhsiyar, and some by Dilāvār Khān during the reigns of Muhammad Shāh and Āhmad Shāh Two more bear the names of Ghāzī Khān Bahadūr and Tahar Khān during the reign of Muhammad Shāh The patel of the village, Abdul Latīf Khān, a lineal descendant of the Jāgīrdar Asaf Sayīd Khān who was the grantee of 30 villages, has likewise a good number of Persian and Mahrathi *sanads* with him Some of the Persian ones were issued by Sādat Khān, Mohabat Khān and Diyanat Khān during the reigns of Farrukh-Siyar and Muhammad Shāh, and by Dilāvar Khān during the reign of Āhmed Shāh The Jāgīrdar appears to have been an officer under Farrukh-siyar in about A H 1125 (A D 1713) One of the Marāthi *sanads* bears the seal of the Pēshwa Bālājī Rājī Rao

Kempa-
sagara

Kempasagara —A village in Magadi Taluk Population 348

The Lingāyet *matha* at this place is a fine building with sculptured pillars It faces west and has a good Nandi-mantapa in front The *prakāra* has also good structures with sculptured pillars and fine doorways On one of the pillars of the *navaranga* a *linga* is represented as issuing out of a pot This is known as Surabhandēsvara The ceiling of the *navaranga*, consisting of 9 compartments with lotuses, is well carved, the lintels also being ornamented with floral and geometrical devices One of the pillars of the front veranda has a figure, about 1½ feet high, of

Kempe Gauda, exactly similar to the figure noticed in the Somasvara temple at Magadi. He is said to have built the *matha*. It is said that the *gurus* of this *matha* have recently taken up their residence at the *matha* on the hill at Kalva. The Kūgina kallu betta forms the eastern boundary of the large tank at Kempasagara which has three fine sluices in the form of four pillared *mantapas*. FC IV, Hoqada 50 is near the west sluice of this tank.

Kengeri—The head-quarter of a hobli in the Bangalore taluk, 9 miles south west of Bangalore on the Bangalore Mysore Railway. It was, till 1873 the head-quarters of a taluk of the same name. Population 1,701. Kengeri

Kengeri or *Tengeri* southern street or road appears formerly to have been of greater extent than it is now but was destroyed by Tipu to prevent its giving shelter to the army of Lord Cornwallis. The town was for a short time the seat of the raw silk trade. In 1860 Signor de Vecchy, an Italian gentleman noticing the then depressed condition of the industry made exertions with the assistance of the Government for its revival. He attributed the mortality of the silk worms to degeneracy owing to continued propagation from the same stock to feeding on inferior species of leaf and to want of care in rearing. The raw silk produced was not deteriorated in value from negligent methods of reeling. In order to remedy these defects cocoons of silk worms eggs were imported from Japan and freely distributed superior kinds of mulberry trees (*Morus sinensis*, *M. peroletra*, *M. alba* and *M. nigra*) were grown from cuttings and seed and finally a steam factory for Silk Filature was established at Kengeri with eighty basins. The hands employed in this delicate process were female orphans from the Bangalore Convent under the charge of Indian nuns. These measures produced their natural effect and a great impetus was given for a time to sericulture. Not only were cocoons bought to any extent for filature but the refuse silk (*chussum*) not taken into consideration before became an important article in the market. But the severe drought of 1866 proved disastrous to the imported worms. Fresh worms were obtained in two successive seasons. After all however, the eradication of disease among the worms was not effected and the business was at length given up.

On Karadi Betta, near Kengeri, is the Ānjanēya temple. The image was found under a tree and the temple built by a raiyat some 500 years ago. The temple was rebuilt in 1845, *Saka Dundubhi* year corresponding to A D 1892.

Khaji-Hosahalli.

Khaji-Hosahalli—A village in Hoskote Taluk. Population 352.

At this place a fine old inscription of about the 7th century, referring itself to the rule of a chief named Binayāditya, has been discovered by the Archæological Department. The characters are beautifully engraved. The village has a Lingāyet *matha* containing the *gaddige* or tomb of a Virasaiva teacher of the name of Nijaguna-Sujnānamūrthi, who was the *guru* or spiritual preceptor of the Sugatur chief Tamme-Gauda. A copper-plate inscription in the possession of the *archaka* of the *gaddige* records the grant of a village to the above-mentioned *guru* in the reign of the Shāh of Bidar. The inscription bears the name of the village as Kodige Tirumalapura.

Kodige Tirumalapura.

Kodige Tirumalapura.—A village in the Bangalore Taluk. Population 344.

In the Ashūrkhāna of Kodige Tirumalapura are kept three fine metallic *Panjas* beautifully engraved with inscriptions of Persian characters consisting mostly of the names of the Prophet and his successors and of extracts from the *Korān*. The middle one, about 4½ feet long, is *Eh jiblidar*, having only one blade; the left one, about 2½ feet long, is *tin jiblidar*, having two blades, and the right one, of about the same length, is *zu jiblidar*, looking like two swords put together. It is said that these *panjas* were once in Tipu's palace and that they were kept here after the fall of Seringapatam. From an epigraph in the village, *E C 9, Nelamangala 22*, we learn that the village was granted in A H 1176 (A D 1762), as a *kodige* to Hājī, younger brother of Kākī Shāh for having built a tank. It is said that this tank is none other than the Hessarghatta-mantapa which now supplies drinking water to Bangalore and the Military Station. *Panjas* similar to those mentioned are said to be found also in the Darga of the above Kākī, known as Nimkanpalli, Chintamani Taluk.

Kodihalli.

Kodihalli.—A village in Hoskote Taluk. Population 100. Behind the Basava temple at this place is lying a bingh, of

having at the top a boar attacked by three dogs and on the stone at Kattigenhalli, a young boar being shown below as lying dead. The slab is not inscribed, though neatly dressed.

Kondarhalli — A village in Hoskote Taluk. Population Kondarhalli 402.

The Dharmīśvara temple at this place is a small but neat old Dravidian structure, perhaps of the Chōla period. In the *prakāra* is an inscription of the Chola King Rajamahēndra, of about 1060 (Hoskote 36). According to tradition and *Hoskote* 34 of 1410 the *linga* was set up by the Pāndava prince Dharmaraja. The temple faces south, though the *linga* faces east. There is a perforated window in the wall opposite the *linga*. There are three cells in a line: the middle cell with a *sukhanāsi* has the *linga*; the left cell Parvati and the right Ganapati. To the right of the *sukhanāsi* entrance stands Durga, about 2½ feet high, the upper hands bearing a discus and a conch and the lower right a sword, while the lower left rests on the wrist and to the left Bhairava, about 3½ feet high, the upper hands holding a skull and a drum, while the lower are like those of Durga. The *anaranga* is supported by four well-carved pillars, consisting on one side of a pilaster standing on a lion and on the other of a lion standing on a *yali*. The south-east and south-west pillars have some interesting sculptures relating to the Pāndava princes. The east face of the south-east pillar shows on the bottom panel Dharmaraja talking to a Yaksha seated on the top of a tree, on the middle Bhīma and Arjuna, and on the top Nakula and Sahadēva, while the south face of the same pillar shows on the bottom panel Dharmaraja standing in front of a *linga* canopied by the hood of a cobra, representing perhaps the consecration by him of the *linga*, on the middle a well, said to be the poison well made by Duryōdhana for destroying the Pāndavas, with three figures, Arjuna, Nakula and Sahadēva, lying across above it, perhaps representing them as being in a swoon or as dead on tasting the water of the poison well, and a figure, Dharmaraja, standing close by, and on the top Bhīma lying on a bed, either unconscious or dead. The reference is evidently to the story of the pond and the questions of the Yaksha related in the *Bhārata*, which tradition has localised here with the addition of a poison well and the setting up of a *linga* over it.

(*nāṇḡ-guḡ*, vide Nandagudi) The south face of the south-west pillar shows on the bottom panel two *rishas* with a fire between them, on the middle a seated figure, apparently Dharmarāja, with a *rishi* standing in front, and on the top a deer with *aram* (or wood used for kindling a fire) in the mouth, and the west face of the same pillar shows on the bottom panel two men armed with bows, on the middle one the men shooting into the sky, and on the top a man shooting what looks like a crocodile. The reference here is apparently to the *Bhārata* story of the stealing of the *aram*. This episode has also been localised here by tradition. The north-east pillar illustrates on the east face the story of Mārkaṇḍēya and on the north face the story of the hunter Kannappa. The top panel of the north face has also an elephant worshipping a *linga*. The sculptures on the north-west pillar have no special interest: they consist of a dancing female figure and so forth. The *navaranga* has a large flat ceiling, about 7 feet square, with a lotus in the centre and figures of the *aṣṭa-dīkṣālakas* or regents of the directions around. One of the sculptures on a pillar of the porch deserves notice: a man on a tree is bending over a *linga* below, while a lion below is trying to climb the tree. It is not clear if this is intended to illustrate any Purāṇic story. An old Tamil epigraph is to be seen in a field to the east of the temple.

Kudalur

Kudalur —A village on the left bank of the Kanva, about 4 miles south-east of Channapatna. Population 1534. In the time of the Chōlas, it was an *agrahāra* called Rājārāja-chaturvēḍimangala. Haidar Alī gave it as an *mām* to a *fakir*.

Kundani

Kundani —A village about 7 miles west of Devanhalli and the head-quarter of the *hobli* of Kundana. Population 425. It seems to have been the Kundani which was the royal residence of the Hoysala King Rāmanātha in the 13th century.

Kuppepaly

Kuppepaly —A village in Magadi Taluk. Two fragmentary epigraphs in characters of the 8th century have been discovered at this place by the State Archaeological Department. One of them mentions Sivamāra-Ereyappa, son of Sripu (*rusha*), as the governor of Kunungai-nādu, *i.e.*, the Kunigal

District, and names a place *Bisugūr* which is evidently identical with the modern village *Bisakur* situated close by. It appears that when a raiyat was ploughing the land this inscribed stone came in contact with plough share and that on his getting that portion excavated he came upon heaps of ashes, broken pottery and pieces of iron. Tradition has it that *Bisakūr* was once a great city of considerable importance which contained 75 *ba tis* or Jain temples. It is said that several fields here contain ash pits and pieces of old pottery and that gold coins also used to be picked up after heavy showers some years ago. An enquiry has been made for a specimen of the coins so picked up, but none could be had. A piece of pottery in the possession of a raiyat was, however, procured for examination. Excavation may bring to light some old relics of historical importance but the village is out of the way and not easy of access. The antiquity of the place is also testified to by the printed old inscription of the village *F C IX, Māgadi 53*. Two new inscriptions have also been found on the pillars of a *mantapa* at the entrance to the village, but these are mostly worn.

Magadi —A taluk in the west. Area 358.64 square miles. Magadi
Head-quarters at Magadi. Contains the following hoblis villages and population. Of Bidadi and Tavarekere which were added in 1873 the former is included in the Closepet Sub-Taluk.

Hoblis	Villages and Hamlets	Villages classified				
		Govern- ment	Sarva- manya	Jodi	Kayam- gutla	Population in 1921

9	Tippasandra	1,113
10	Neralakere	1,115

In shape, the taluk is almost rectangular, with a few villages straggling in the south-east and south-west. Its length from north to south is about 22 miles and breadth from east to west, about 14 miles. Situated as it is between two lofty peaks—the Sivaganga in the north and Sāvandurga in the south, the country is a succession of pretty well defined elevations and depressions. Entering the taluk from the north, we cross a gently undulating surface dotted with small hills, rocky and bare. Farther south the country becomes more hilly and appears more and more thickly studded with vegetation until we reach Sāvandurga and Siddēdēvara Betta where the configuration is relatively speaking mountainous, and covered with dry jungle. This part is said to have been a great forest in days gone by, but now, nothing better than scrub jungle is seen, except in the immediate neighbourhood of Sāvandurga, where bamboos and timber trees of inferior kind are available.

The character of the surface of the country does not admit of one common system of natural drainage, there are three outlets in three different directions. The north-east is drained off by the Arkāvati which in this taluk, is a big stream

flowing in a deep ravine and of little use for irrigation. The drainage of the centre and the west is carried off to the south by several streams, which go to form Kanva which is of less importance than the Arkavati. The surplus water of the north west is led away towards the Kurnool frontier by a number of little streams. On the banks and even in sections of the beds of these streams is observed a prolific growth of Honge trees, an important asset to the raiyat for the supply of manure, oil and fuel. Besides the Honge the wild date grows abundantly in the centre and the west.

In the bottom of the valleys, as a rule, the soil is good though sand is also found washed down from the heights. The quality of the soil deteriorates as the land rises so that in high lying fields the soil is generally poor. There is no real black soil in the taluk. Several classes of soil are met with, but the most common variety is the red with a mixture of stones. In point of fertility this kind of soil is mediocre, but its productivity is greatly improved by a fairly copious rainfall.

In dry lands, the chief crop is ragi next in importance is *aturu*. Other products are gram, togaru, oil seeds and condiments. Wet lands are cultivated mostly with paddy while sugar-cane is grown in patches the size of each being determined by the capacity of the tank above it. Gardens are generally of a miscellaneous character containing plantains and vegetables with a few cocoa nut, areca nut and other fruit trees chiefly the jneke.

The Chōlas appear to have held the district in the 12th century, followed by the Hoysalas. From them it is said to have been wrested by Pratapa Rudra of Warrangal, and soon after to have been conquered by Harihara I, king of Vijayanagar. The deputy of the Vijayanagar sovereigns Sāmanta Raya by name taking advantage of the feebleness of the government, declared his independence, and the country was held by his descendants to the third generation when Kempe Gauda, the chief of Bangalore, obtained possession. In his family it remained till 1728, when it was captured by the Raja of Mysore.

The revenue settlement was introduced in 1879 and the revision settlement in 1921-22. The culturable area according to resettlement was distributed as follows —

—	Dry	Wet	Garden	Total
Occupied area	71,296	6,263	2,417	79,976
Unoccupied area	7,474	62	48	7,584
Kharab land				81,499
Inam				8,146
Total				1,70,205

The following was the average monthly rainfall for the taluk —

Tavarekere (26 years)	3 30	4 19	7 04	6 36	1 89	0 28	30 82
Solur (27 years)	3 86	4 46	6 93	5 13	2 73	0 11	29 74

There is no railway line running within the taluk itself, but the three railway stations of Gollahalli, Closepet and Bangalore are not remote from its borders. The taluk is well supplied with main-roads, of which the old ones are—

- (1) The Bangalore-Mangalore road,
- (2) The Bangalore-Huliyar road, and
- (3) The Magadi-Kunigal road

Two new roads connecting Magadi with Closepet on one side and with Gudmaranahalli on the other have been opened. Some good roads for wheeled traffic have also been opened, one of which leads from Solur to Banasavadi. Inter communication between villages is well established by numerous cart tracks, and is tolerably easy except when heavy rains make the hill streams flow strong.

Magadi—A town situated in $12^{\circ} 57' N$ lat $17^{\circ} 17' E$ long 29 miles west of Bangalore, with which it is connected by road. Head-quarters of the Magadi taluk and a municipality.

Population in 1911	Males	Females	Total
Hindus	2,113	2,313	4,426
Muhammedans	201	210	411
Christians	9	3	12
Total	2,523	2,606	5,129

There is a tradition that Magadi was founded in 1139 by a Chōla king who in the course of an expedition to that part heard that in early times it had been the residence of some holy *Rishis*. It soon passed into the hands of the Hoysala kings and after them into those of the Vijayanagar line. In the time of Achyuta Raya of that House Samanta Raya was appointed *Adhikārī* or manager of the district. He enlarged the town and fortified the height of Savandurga in return for which that part of the country was granted to him as an *amara* or *jāgīr*. He enjoyed it for 28 years from 1543 to 1571, and was succeeded by his son Sampaja Raya. He governed for 17 years and repaired the temple of Ranga swami at Tirumala. His son Chikka Rāya or Mūlaka Raya after ruling 16 years throw himself in a fit of madness into the pool on the *droog* and was drowned. He left no children, and Gangappa Nāyaka, the *talārī* or watchman of Balakara taking advantage of the confusion seized the government and strove to enrich himself by plunder. Bnt Immadi Kampe

Gauda of Bangalore marched against him, took the place and put him to death. Kempe Gauda being shortly after ousted from Bangalore, retired to Magadī, which is thenceforward identified with that family.

Magadī became Kempe Gowda's capital. He and his successors held it in their possession till 1728 when it was captured by the Ruler of Mysore. It has a small fort, now in ruins, said to have been built by Kempe Gauda, in which is situated the temple of Rāmēśvara, his family god. The ruins of his palace are pointed out to the south-west of the temple. The latter consists of a *garbhagrha* or adytum, a *sukhanāsi* or vestibule, a *navaranga* or central hall and a front veranda. In the *prakāra* or enclosure are the *panchalīnga* cells in the west and a cell enshrining a figure of Pārvatī set up recently. The *sukhanāsi* has a well carved Nandī. The *utsava-vigraha* or metallic image of the god is a fine figure with two consorts known as Ganga and Parvata-vardhanī (i.e., Pārvatī), though usually only one consort is seen in Śiva temples. Near the *utsava-vigraha* is also kept a metallic figure of what is known as Astra-mūrti, a small trident standing on a pedestal, which is used on the occasion of the car and other festivals just as the *balibera* or a small metallic image of Viṣṇu is used in Viṣṇu temples. To the right of the *navaranga* entrance are good figures of Ganapatī and Vīrabhadra, and to the left in a shrine stands Pārvatī, about four feet high, with four hands. It appears that all the public offices of the Taluk were once held in this fort. The Sōmēśvara temple situated about 1½ miles to the west of Magadī, is now in ruins, though built so recently as A.D. 1712 by Mummadī Kempavīra Gauda. It is a large Dravidian structure, measuring 90 yards by 70 yards, with a *prakāra* or enclosure, 2 *mahādvāras* or outer entrances and several fine *mantapas*. The temple faces north. Of the two *mahādvāras*, which are on the north and south, the latter, which is bigger than the former, is surmounted by a lofty *gōpura* or tower which was damaged some years ago by a stroke of lightning. A fine *mantapa* to the left of the temple is known as Kempe Gauda's *hajāra* or hall, and another to the right, as the dancing girls' *hajāra*. The former had once scenes from the *Purānas* painted on the walls and ceiling of which only a few traces are now left. On the west face of the south pillar of the veranda of this hall is sculptured a male figure seated on a dog.

with a dignified pose and expressive movement. On one of the pillars of the front veranda of the dancing girls hall is a figure, about 1½ feet high of an old man wearing a cloak and leaning on a staff. This is said to represent the original Kempe Gauda the progenitor of the Lalahanka family of chiefs. The *nara ranga* or central hall of the temple has a pretty good ceiling supported by four pillars which are well sculptured on all the sides with figures of animals, etc. some of the panels showing skillful combinations of birds, men and beasts. A panel on the west face of the north west pillar of the *nara ranga* has a sculpture of three birds which are very ingeniously combined. The Nandi in the *sulhanāsi* though smaller than the one in the Ramasvara temple is well executed. A long inscription is to be seen on the back inner wall of the *garbhagriha*. This is rather peculiar. Generally no inscriptions are engraved in the *garbhagriha* of temples. The shrine of the goddess situated to the left of the temple, has a seated figure, about 3 feet high of Parvati. The temple has small towers at the four corners of the enclosure and a large pond known as Kalyāni at some distance in front. To the south west of the temple outside the enclosure is a fine shrine of Basava or Nandi with a good tower situated on a lofty boulder. It is known as the Sikkhara Basava shrine and is a prominent structure being visible from a great distance all round. A flight of about 50 steps leads to it and the Nandi in it is worshipped by Lingayats on marriage and other occasions.

To the east of the Travellers' Bungalow at Magadi is a pond built by Mr. Kurnik Krishnamurti Rao a local Inamdar. It is said to be the source of the Kanva river.

A few inscriptions on some jewels and vessels kept in the Taluk Treasury have been copied by the State Archaeological Department. Gulām Hussain Khan has also four Marāṭhi *nirūps* with him. Two of these dated A.D. 1808 are addressed by Dewan Purnaiya to Hussain Khan Killedār of Magadi and the remaining two dated 1841 and 1844 are addressed by the Commissioners of Mysore to Fakaruddin Khan son of Hussain Khān. Fakaruddin Khān was also Killedar of Magadi. But in another *nirūp* received by him in 1832 from the Commissioners of Mysore he is addressed as the Killedār of Hntridurga a hill in the adjoining Kunigal Taluk. The seal of this *nirūp*

bears in the middle the British Coat of Arms and around the margin the words "Commissioners for the Government of Mysore "

Makli

Makli —A village in Nelamangala Taluk with a population of only 39

The Bhīmēśvara temple at this *bechirakk* village is an old structure with doorways and lintels carved with rough scroll work, situated on the bank of the Arkāvati. The god is said to have been set up by the Pāndava prince Bhīma. On a rock in the bed of the river is a large foot-print which is supposed to represent Bhīma's left foot. It is worshipped on certain occasions by pilgrims. Bhīma's right foot is believed to be somewhere near Kankanahalli, and his knee on a hill known as Bharjī-betta in Nelamangala Taluk. There is likewise in the same taluk a village named Arjunabettahalli, connecting Arjuna also with the taluk

Malurpatna.

Malurpatna.—A village on the banks of the Kanva. Headquarters of the Malur hobli, Channapatna taluk. Population 2,364.

Most of the residents are Brāhmans of the Srivaishnava sect, they give the village the name of Rājēndrasūnha-nagara. There are several ruined temples in the place, and a number of Chōla inscriptions, but the large temple of Apramēya-svāmi is maintained in good order. The sage named Vijnānēśvara-yogi here composed the *Mitākshara*, his celebrated *bhashya* or commentary on the code called the Yajnavalkya *Smṛiti*. It is the basis of the Hindu Law as it prevails in Southern and in part of Western India.

Mankunda

Mankunda —A village on the right bank of the Kanva, about 3 miles south of Malur in Channapatna taluk. Population 9,316

It contains a number of ruined temples and Kannada and Tamil inscriptions of the Ganga and Chōla periods. It was originally called Manalur, but the Chōlas gave it the name of Nikarilli-Chōlapura. In 1761 Haider Ali granted Malurpatna as an *inām* to a *salār*.

It appears to have been a place of considerable importance in the 10th and the 11th centuries. The Varadarāja, Nārāyaṇa,

Arkṣvara, Chaudesvari and Durgā Paramēsvarī temples contain several of the inscriptions found. The Nārāyaṇa temple is a small building but its outer walls are fully covered with Tamil inscriptions from top to base. A few of these are printed. The image of the god was set up in 1007 A. D. during the reign of the Chōla king Rājārāja.

Mankunda.—A village in the west of Channapatna taluk, about 2 miles north of Mudigere. Population 914. Mankunda

In the 7th century the Ganga kings Bhūvikrama and Siva mārma appear to have made this the royal residence, removing from Talkad. The place was probably destroyed in the Chōla invasion.

Manne —A village in the north of Nelamangala taluk, about 5 miles north of Tyamagondlu. Population 919. Manne.

Under the name of Manyapura, it was a royal residence of the Ganga kings in the 8th century in the time of Śrīpuruṣa. It was captured and destroyed by the Chōlas at the beginning of the 11th century, and as Mannai kattakam is referred to in their inscriptions as one of their principal conquests. Some however doubt this identification. Several ruined temples attest to its magnificence and its extent is shown by the tradition that the city included Chik Hejjajī and Belavangala, 8 miles more to the east.

Manne having been the capital of the Gangas and the seat of the Rashtrakūṭa viceroys, it is rather disappointing that no old lithic records are forthcoming either in or around the village, the only old inscription on stone hitherto discovered here being Nelamangala 54. Among the ruined temples mentioned above is the Kapilēsvara temple, an old structure with a *garbhā grīha* built of old bricks. The *nataranga* has four good pillars and two pierced windows. The south window has a creeper with delicate figures in each of its six convolutions, while the north window which has likewise a creeper has dwarfs in its three convolutions. The temple known as *Sūlara-dēvasthāna* or the Dancing girls temple is also a neat structure. It shows some peculiar features of architecture. The lintels of the Nandi mantapa in front have their ends shaped like capitals on the

under surface There being no separate capitals for them to rest on, it is not clear how the lintels on the four sides are supported unless iron clamps are used inside The ceilings of the *navaranga* and Nandi Mantapa show a creeper device with a Nāga and Nāgini in the middle canopied by snake-hoods Such ceilings are rarely met with in Mysore temples The *garbhagriha* of the Sōmēsvara temple is also built of old bricks These brick structures appear to go back to the Ganga period The site of the old city is pointed out to the south-west of the present village It is now covered with fields and no mounds are to be found Old bricks and pieces of pottery are strewn over the place. It is said that ash-pits and foundations of brick structures have often been met with when ploughing the fields. Some of the houses of the village are built of these old bricks The latter are somewhat larger and thinner than the modern ones, but neatly prepared in different sizes and shapes so as to suit the parts of the structures for which they were intended.

Mangondahalli

Mangondahalli.—A village in Devanhalli taluk. Population 223. A few of the cromlechs here were excavated by the Archæological Department in 1916-17 and found to contain pots of different sizes and bowls A big pot and a smaller one with legs, unearthed from another Cromlech here, are included in the exhibits of the Mysore Archæological Museum. Some of the finds are figured on Plate XV of the *Mysore Archæological Report* for 1916-17

Mayasandra.

Mayasandra.—A village in Magadi taluk. Population 401. It has a large tank. A good *vīragal* of a pretty large size is to be seen here It consists of two panels—the upper having the figure of a man riding a horse with an umbrella-bearer behind and a servant in front, and the lower having 5 female figures standing in a row, representing perhaps his wives

Mikarajanabetta

Mikarajanabetta —A hill to the south of the Sivaganga hill, it is so called because, according to tradition, a prince named Mikarāja had his residence on it The way up to the hill lies through a pass known as Irajikanive It is said that

Iraji a dancing girl was the mistress of prince Mikaraja. A cave on the south slope of the Sivaganga hill known as Iraji's cave is supposed to have been her residence. The cave is a large one with a stone doorway and a front pillared *mantapa* over the overhanging rock. An inscription is to be seen on the rock over the doorway. Mikarajana hetta abounds with cromlechs, the upper slabs of some of them being unusually large and thick. Some measure $16 \times 9\frac{1}{2} \times 1\frac{1}{2}$ $15 \times 10 \times 1'$ and $12' \times 9 \times 3$. A few have no side slabs, the upper slabs being supported by small stones put one over the other at the corners. Some cromlechs dug out at one end are supposed to be granaries of former times. Kempe Ganda is said to have found enormous treasure on this hill.

Nagamangala —A village in Magadi taluk. Population 318. Nagamangala.

The Lingavat *matha* on the hill at this place is situated in a cave. It consists of two cells, one behind the other, the front one having a *linga* and the back one serving as a retreat for yoga or meditation of the *guru*. Outside is a Nandi with a fine well in front. The water of this well is used solely for bathing the *linga*. To the right of the well stands an ornamental tower like wooden chair on which the *guru* takes his seat and is worshipped by his disciples on special occasions. The hill has four or five fine *dones* or springs.

Nagasandra —A village in Yelahanka hobli. The stone containing the inscription *Bangalore* 34 dated in 1342 in the reign of Hoysala Ballala III has also a gateway sculptured at the top and the figure of a man with two heads. The stone lies near a banyan tree and is the only one of its kind in the State. Nagasandra.

Nandagudi —A village in Hoskote taluk. Population 773. Nandagudi.

This place is said to represent the site of a very old city. It is named Nanduguli or Nanjuguli in the Kannada and Nondaguli in the Tamil epigraphs. The modern name Nandagudi appears to be responsible for the story of the Nandas given

above In the name Nanjugulī there may be a reference to the supposed poison-well (*nangu*, poison and *lulī* or *gulī*, a pit) in the Dharmēsvara temple at Kondarhallī To the east of the village is a small hill named Rāgularāsī (a heap of *ragī*) and to the west another known as Addabetta Tradition has it that the former once represented the heap of *ragī* and the latter the stack of straw belonging to a rāyat and that when his wife looked on the heap and sighed with sadness at the prospect of her having to grind such a large quantity, both were metamorphosed into their present form It is stated that Addabetta had on it at one time the palace of an ancient king Rāgularāsī is made up of laterite of a mixture of red and white A temple excavated in it has now gone to ruin

Nelamangala

Nelamangala.—A taluk in the west. Area 255·53 square miles Headquarters at Nelamangala Contains the following hoblis, villages and population. —

No	Hobles	Villages and Hamlets	Villages classified				
			Govern-ment	Sarva-manva	Jodī	Kayam-gutta	Popula-tion
1	Nelaman-gala	96	62	3	18	13	19,462
2	Dasana-pura	72	47	1	11	13	14,758
3	Sompura	77	65	5	5	2	17,336
4	Tyama-gondlu	74	65	1	5	3	18,716
			Floating population				
							12
Total		319	239	10	39	31	70,281

Principal places with population

No	Place	Population
1	Nelamangala	3,354
2	Sāndel oppa	1,405
3	Kēgunda	1,020
4	Tyamagondlu	3,391

The greatest length is from north-east to south west about 25 miles, and the breadth on an average is 12 miles. The surface of the country is undulating the slopes are mostly gentle but become more and more abrupt towards the west where is also seen a chain of rocky hills. The most important of these are the hills of Sivaganga and Nijagal. All the hills are as a rule bare at the top and clothed on the sides with stunted dry jungle. The whole of the taluk is poor in forest, and there are neither State nor District forest reserves in it. A few large valleys like that at Tyaningondlu have lent themselves to the formation of excellent tanks. The eastern and southern portions of the taluk are drained by the Arkavati, and the western by the Kumadvati. Both streams run through deep rock lined channels and so far have been of no account for purposes of direct irrigation.

The prevailing kind of soil is the red mixed with sand or gravel in different proportions. A superior kind which is very dark in colour but cannot be called black soil of the best order is found in some of the villages. The soil in garden is generally the best while that of rice lands is quite poor in productive qualities. Ragi, avare togari kulthi and oil seeds are the more important crops raised on dry lands. Rice is the staple produce of the wet lands but the paddy is of the coarser kinds. The cultivation of sugar-cane is also earnestly undertaken wherever facilities exist for it. Gardens are very few in number and the riyats do not evince much interest in their cultivation. The most remunerative of the gardens are what are called market gardens, where the common Indian fruits, vegetables ground nuts, *musikina gola* (Indian corn) and such other crops are grown as can find a ready sale.

In the 8th century, Manne was a place of great importance, under the Gangas, and in the 11th century Mannai nattu was still the chief district, under the Cholas. The Hoysalas soon after succeeded, and in the temporary partition of their territories in the 13th century, this part of the country fell to the share of Rāmanātha who had the Tamil districts

After sharing in the fortunes of Dod-Ballapur and Bangalore, Nelamangala was apparently acquired by the Mysore Rājas at the same time as the latter place

The revenue settlement was introduced in 1878 and the revision settlement in 1919-20. The culturable area according to re-settlement was distributed as follows —

	Dry	Wet	Garden	Total
Occupied area	74,806	6,556	1951	83,313
Unoccupied area	4,902	68	19	4,989
Kharab land				42,789
Inam	11,079			
Total				1,42,170

The land revenue demand and collection for 1921-22 were Rs 1,51,812 and Rs 1,46,945 respectively

The following was the monthly average rainfall in the taluk —

Station	Month						
	Jan	Feb	Mar	Apr	May	June	July
1	2	3	4	5	6	7	8
Tyamagondlu (21 years)	0 14	0 08	0 38	1 06	3 19	2 43	3 99

The Bangalore-Harihar railway runs through the northern half of the taluk, with stations at Gollahalli, Dodbele and

Nidavanda The Bangalore Tumkur road passes through the whole length of the taluk. The other old roads are the Nelamangala Kunigal road, the Dobbispet Horatagere road, Dobbispet Doddaballapur road and the Dobbispet Tyamagondlu Begur road, with a branch connecting with Doddbele. A new road has been opened from Gollahalli to Nelamangala and another from Yelekatanaiahalli to Nidavanda meeting the Dobbispet Tyamagondlu road in the south. From Dobbispet a new road was laid to Sivaganga in continuation of the Nidavanda Dobbispet road which is particularly useful to pilgrims to the sacred place.

Nelamangala — A town situated in $13^{\circ} 6' N$ lat $77^{\circ} 27' E$ long 16 miles north west of Bangalore on the Bangalore Tumkur road. Head-quarters of the Nelamangala taluk and a municipality.

Population in 1911	Males	Females	Total
Muslims	1,544	1,470	3,014
Mohammedans	205	186	391
Christians	7	12	19
Total	1,756	2,668	4,424

A fair is held on Friday, attended by about 2,500 people.

On or near the site of Nelamangala formerly stood a large city so it is said to which tradition gives the name of Bhūman dana. It is said to have been founded by Sumati son of Hēmachandra king of Karnataka whose capital was Yadu patna. Having succeeded in an expedition against a robber chief at Dēvarāvadurga, he took up his residence at Bhūman dana for the security of that part of his father's dominions. The actual history has been given above under the taluk Nelamangala appears to have been transferred to the Mysore Rajas along with Tyamagondlu at the time when Bangalore was purchased from the Mughal general Khasim Khan. This was in 1687.

Of the temples in the town, which are mostly modern, the Adake Ānjanēya temple is said to be the oldest, the god in it being supposed to have been set up by king Janamējaya. The temple is so called because *adake* or areca-nut used to be stored in it when the *batayr* (payment of tax in kind) system was in vogue.

Nellurpatna

Nellurpatna.—A ruined city five miles south-east of Devanhalli. It is stated to have been of great extent and ruled by a rich and powerful line of kings. In the time of the last of these, named Chauda Rāya, the city was captured after maintaining an obstinate defence for three years, during which the enemy was twice forced to raise the siege. Its fall was due to an act of treachery on the part of the king's daughter, who, being married to the chief of Gubbī in the Hoskote taluk, had accompanied her husband to the war, and made known the existence of the subterranean passage by which the city was supplied with water from a distance. Chauda Rāya is said to have blown up his palace, containing his family and treasures, while the enemy were scaling the walls.

Niduvanda

Niduvanda.—A Railway station on the Bangalore-Poona section of the Madras & Southern Mahratta Railway. About 32 miles north-west of Bangalore, at the meeting point of the roads to Bangalore, Chik-Ballapur, and Tumkur. It is the nearest station for Sivaganga (*q v*), a sacred hill conspicuous for miles by its conical form.

Nijagal

Nijagal.—A hill, also called Suragiri, in the north-west of the Nelamangala taluk, accessible only on the north and east. The fort which formerly occupied the summit owed its strength more to nature than to art, and was the scene of many desperate encounters. The *pēte* has been for many years almost deserted, the inhabitants having removed to Tyamagondlu. The present population is 215.

Nijagal Hill

The Nijagal hill has on its slope a temple of Virabhadra and a Lingāyat cave *matha* called Nijagal *matha*. The figure

of Virabhadra carved on a big slab is 12 feet high with the usual attributes but with Daksha to the left and Bhadrakali to the right. The hill is popularly known as Uddandayvana betta from the tall (*udda*) figure of Virabhadra on it. A seated figure about 1½ feet high to the right of the god is said to represent a devotee named Kakasvami who is believed to have gone to Kailasa with his mortal body. He was so named because he was accustomed to laugh aloud (*kaka hodi*). Opposite to the temple is a lamp-pillar with a standing figure on the front face which is said to represent Helinahampama who erected the temple. On the way to the hill is a boulder on which is sculptured a seated figure with a Nandi on either side. This figure is worshipped under the name of Keshivappa. The ascent to Nijagal-darga also known as Rasasiddhara betta is rather difficult. The hill is fortified and has the remains of powder magazines granaries and buildings of the former chiefs of the place. Grains of *ragi* are even now picked up from the granaries. There are several springs on the hill known as Kanchana-dona An-dona Siddhara-dona Akkatangiyara-dona etc. Siddhara dona is a fine retreat cool and refreshing largely frequented by the Mahammadans for worship. The Hindus too go there for worship but in their case the worship has to be offered through a Mahammadan *shair*. Near at hand is what is known as the Rasasiddhas temple the object of worship being the head of a *rishi* or sage with a beard made of wood. The Hindus alone worship here the special days of worship being Tuesdays Thursdays and Fridays. The Muhammadans worship at Siddhara dona on the same days and also on Sundays. The hill is called Rasasiddhara betta because according to tradition the *siddhas* or sages prepared on it *rasa* or the liquid which transmutes base metals into gold. Vows are made at the Rasasiddhas temple. Many pilgrims come here from long distances to have their desires fulfilled. On the summit of the hill a mortar scooped out of the rock and a mark on a boulder are pointed out as the place where when two sisters were husking paddy a gnat shot from below struck the boulder. The reference may be to an attack on the fort by some Mysore king. Near Akkatangiyara dona stands the ruined Narasimha temple a large structure from which as stated above the images were removed and set up in the temple at Hale Nijagal. Lower down is a Muhammadan tomb. It is curious that this hill is held sacred by both

It formerly gave its name to the taluk the town of Ramagiri being at its base. On the foundation of Closepet, the residents removed to the new settlement.

The old fortifications occupy a considerable extent and appear to have been very respectable in point of strength. In old days the iron found here was worked into implements of war. The place was carried by assault by Captain Welch on 22nd December 1791. Just before its fall it had been strengthened by new works and on its capture it was found to be well provided with guns, provisions and stores. The chief part of which had been removed from Channarayana when that fort was dismantled the preceding year. Home illustrates the north view of this fort in his *Selected Views of Mysore*.

The hill is easily reached on the side of Mallimalla. There are three stone gateways through which we have to pass before reaching the top. The rock known as Karkhane bande has an inscription on it. The rock is so called because on it once stood the arsenal where guns, gunpowder etc. were manufactured during Palegar Kempe-Gauda's time. The hill which is fortified was the residence it is said of the Palegar for some time and a spot is shown as the one where he came upon a large treasure. The Rama and Ramaswara temples are worth a visit. The *ranga mantapa* of the former is said to have been built by Kempe Gauda. According to tradition the god Rama was set up by Sugriva and the story related in connection with this event is an exact counterpart of the story of Vibhishana's setting up the god Ranganatha at Srirangam. Ramagiri is said to be the place where the demon Kākāśura was punished by Rama and this is why they say no crows frequent the hill even now. The god Ramaswara is said to have been set up by Rama after killing a demon called Sukarasura, supposed to be now represented by Handigondigudda a hill situated at some distance. A rock in front of the Ramaswara temple is said to represent the sage Markandeya and a few other rocks to the left of the Rama temple the Seven Sages (*saptarshayah*). There is a magnificent dome or spring between two lofty masses of rock. It is strange that neither temple contains any inscription. At Chaudesvari hall there are ruined temples near Basavanahalli and the Chaudesvari hill. Tradition locates a great city ruled by Sūmasākhara rāya and Chitrasukhararāya at the east foot of the Chaudesvari

hill Several ruined temples and *vīṇagals* are to be seen here but without inscriptions Nīrgunda in the Chitaldrug District is also traditionally connected with the above princes but as tradition says they may have gone there from here in search of a bride

Sankigatta

Sankigatta.—A village in Magadī taluk Population 769.

The Vardhamāna-bastī at this place is a plain structure According to tradition it is an old *bastī*, but no one knows anything about its origin A *bastī* dedicated to Vardhamāna, the last Tīrthankara, is not very common An inscription on the back of the image gives the genealogy of the Hoysala kings from Vinayāditya to Narasimha I and stops there The characters are of the 12th century The pedestal also has an inscription Unfortunately this inscription is almost completely worn out It may contain information about the person by whom and the date on which the image was consecrated From the inscription on the back of the image one is naturally led to the conclusion that the temple probably came into existence during the reign of the Hoysala king Narasimha I (1141-1173) But there are other considerations which go against such a conclusion Mr Narasimhachār writes —“The inscription in question, judging from its similarity to some which are already published, is a long one consisting of many lines, though there are only 22 lines in the impression that was taken Such a long inscription on the back of an image is extremely rare Further the published inscriptions show clearly that this inscription wants some lines both at the top and the bottom and that the intervening lines are defective by reason of the missing letters both at the extremities and in the middle We shall not therefore be wrong in concluding that the image of Vardhamāna was carved out of a big inscription stone with a few tell-tale remnants of the epigraph left on the uncarved portions of the back Instances are not wanting of inscription stones having been cut and converted into pedestals of images, jambs of doorways, etc, but the present is a curious instance of considerable interest” The image of Vardhamāna is about 5 feet high with *prabhāvalī* The temple also contains seated metallic images of Padmāvati Jvalāmālīni and Sarasvatī in addition to the usual figures of Pancha-Paramēśhtis, Navadēvatah, etc There are about 30 families of Jainas in the village

Sarjapur—A town in the Anekal taluk 12 miles north east of the Knsaba and a municipality Till 1873 it was the headquarters of a taluk of the same name It is now the headquarters of the *hobli* of Sarjapur

Population in 10 1	Males	Females	Total
Hindus	1 091	99.	2 086
Muhammadans	2 2	272	514
Total	1 763	1,267	3 030

A small fair is held on Sunday visited by about 100 people Cotton cloths, carpets and tape are made in Sarjapur in considerable quantities. Formerly it appears that muslins of fine quality were woven

Sarjapur with 18 other villages was formerly a *jagir* held from the Mughals by Hafiz Mahammad on condition of maintaining a military force for the service of the emperor The *jagir* was confirmed by successive rulers as appears from some interesting *sanads* exhibited to Mr Rice several years ago (1) Grant in Persian by Dilāvar Khan Subedar of Sirā in the name of Alamgīr Padshah Ghazī (2) Grant in Marāthi by Mādhava Rao minister of the Pēshwa The seal bore the inscription *Raja Ram narapati karasha nidhan Madhava Rao Ballal pradhan* At the joinings of the paper and at the end were small seals with the words *lekhan sima* (3) Grant by Haider Ali in Marathi signed with Haider's autograph and sealed with the words *Fatte Haider* (4) Grant by Lord Cornwallis written in Persian on white paper sprinkled with gold dust signed *Cornwallis* and sealed with the Persian words *Salar e Inghistān* Initialed at the back G F C (5) Grant in Persian, by Captain Cherry Seal in Persian with the words *George Frederick Cherry Khayim jang fidai e Kampani, Angrez Bahadur* (6) Grant in Persian by Captain Read, dated 1791 Seal in Persian *Alexander Read Bahadur*

The grants were cancelled by Purnaiya, who finding the Jagirdār wanted to sell his villages, bought him out. There is now no *jagir*

Sāmbappa's *matha* which contains the *gaddige* or tomb of Sāmbappa a great Panchama teacher This *matha* is a branch of the original *matha* which is at Āldūr in the Chāmarajanagar Taluk of the Mysore District Sāmbappa was a pious Panchama who is credited with the performance of many miracles He has many disciples among the Panchamas and others in several parts of the State In front of the *gaddige* stand two slabs sculptured in the lower half with figures of Saiva *dvārapālakas* or door keepers In the upper portion one of the slabs has Virabhadra, while the other shows a tree with monkeys and birds on it and a bull in front of which stands a man with the right hand raised and the left armed with a dagger caught with one of the forelegs by the bull The meaning of this is not clear Mādaiya, a descendant of Sāmbappa who is in charge of the *matha* possesses a copper plate inscription in Nagari characters of the Vijayanagara king Venkatapati Rāya I dated 1602 The inscription registers a grant by the king to a Srivaishnava Brāhman named Ramacharya Mādaiya has also some papers relating to the *matha* which describe the greatness of Sāmbappa and enjoin the payment of certain contributions to the *matha*

Satanur —A village in Magadi taluk Population 700 Satanur

The Vithalarāya temple at this place has a fine figure about 32 feet high of Vithala, with two hands, both of which are placed on the waist. The right hand holds a conch and a flute and the left hand an object which looks like a bag with its mouth tied with a rope. The god is flanked by consorts who hold a *chaura* in one hand and a lotus in the other. The *prabhāvala* or halo has in the upper portion well carved figures of the *dasāvatāra* or ten incarnations of Viṣṇu and at the bottom a figure of Varuna seated on his vehicle *makara* on both sides. The temple is also known as the Vithalagōpālasvami temple.

Sausmond —One of the Anglo-Indian settlements in the Sausmond.
east of Bangalore taluk (see White field) It is 12 miles from Bangalore and 3 miles south of White field, named after Dr Sausman, a former President of the Association. The history of the settlement has not been one of prosperity.

from an agricultural point of view. The number of persons owning interest in the lands of the settlement is at present only 10, of whom 9 are non-residents. A conflict of interest arose between the Eurasian and Anglo-Indian Association of Mysore and Coorg and the settlers who resented any control over them by the Association. Assessed lands were gradually relinquished by the Association in favour of individual settlers (For the later history of the settlement see *Whitefield*)

Recently Sisal hemp cultivation was introduced in the settlement by the late Mr Briggs, who sold his fibre factory to the Bank of Mysore Limited, Bangalore. From the fibre prepared out of the Sisal hemp are manufactured good coloured rugs, ropes, mats, etc., and exported to foreign countries.

Sāvandurga

Savandurga.—A mountain in the Magadī taluk, 7 miles south-east of the Kasaba, and is familiarly called the Magadī hill. It is an enormous mass of granite, rising to 4,024 feet above the level of the sea, and standing on a base eight miles in circumference. The summit consists of two peaks, separated by a chasm, each being independent of the other, and abundantly supplied with water. One is called the *Kari* or black peak, the other the *Bih* or white peak.

The hill appears to have been first fortified in 1543 by Sāmanta-Rāya, the officer appointed to the charge of the Magadī district by Achyuta Rāya, the king of Vijayanagar. Taking advantage of the feebleness of the government, and relying no doubt on the natural strength of his position, he made himself independent and took up his residence on the *droog*, with a force of 8,000 men, officered by 8 *gurikāns*. He died in 1571 and was succeeded by his son Sampaja-Rāya. He ruled for 17 years, and was followed by his son Chikka-Rāya, who, after a rule of 16 years, threw himself in a fit of madness into the chasm and was drowned, leaving no issue. Ganga, the *talān*, or watchman of Gudamārnhalli, seized the place and began plundering in order to enrich himself. But Immadī Kempe Gauda of Bangalore put him to death, secured the stronghold for his own family,

and changed its name from *Sāmanta-durga* to *Sārana-durga*. He soon had need of the retreat, being driven out of Bangalore by the Bijapur army. His descendants held Savandurga till 1728, when Dēva Rāja Dalavayi of Mysore obtained possession and carried Mummadi Kempe Gauda, the chief prisoner to Seringapatam where he ended his days the last of his line. The name of Krishnarajagiri then given to the droog has not survived. The memorable capture of Savandurga in 1791 by the British under Lord Cornwallis is thus described by Wilks —

Colonel Staart encamped within three miles of the place on the 10th of December and immediately commenced the arduous labour of cutting a gun road through the rugged forest to the foot of the rock a work which added to the difficulties of dragging iron twenty four pounders over precipices nearly perpendicular called for a degree of incessant exertion and fatigue which could scarcely have been exceeded.

The batteries opened on the 17th and the breach in what was named the lower wall of the rock although at least fifteen hundred feet higher than its base was deemed practicable on the 20th. Immediately overlooking it at a precipitous height, and perfectly well situated for destroying by the usual artillery of rocks and stones everything that should attempt to ascend beyond the breach was a range of ancient wall. Lord Cornwallis had come from the camp distant seven miles to witness the assault the grenadiers were ordered to their stations and the garrison was seen to be collecting behind this wall. This observation fortunately prevented the assault on that day the experiment was made of pointing with sufficient elevation by receiving the trail of the gun carriage into an excavation behind the platform. The execution was not only perfect, but the wall was found to be so frail that a few discharges must dislodge its defenders. The arrangements for the ensuing day were founded on the fact thus opportunely ascertained. The batteries were prepared for the purpose and in the morning the requisite number of guns were directed against this wall with the most perfect success every person behind it was dislodged and the storming party having been placed without observation within twenty yards of the breach, the assault commenced by signal at eleven o'clock in the forenoon.

The defenders had been so unexpectedly dislodged from their appointed positions that no new disposition had been made. The assailants accordingly ascended the rock without the slightest opposition, clambering up a precipice which, after the service was over, they were afraid to descend. The eastern citadel was completely carried, and the assailants, on reaching the summit of the rock, had the satisfaction to desery a heavy column of infantry, destined to reinforce the garrison, in full march to enter the place, which would have been effected if the assault had been postponed even for half an hour. A division of the assailants, after descending considerably above the breach, had been directed to turn to the right along a path which had been observed to be practised by the garrison, leading along the side of the rock to the western citadel. The killedar of that citadel, observing the defenders of the eastern rock to be driven from their post above the breach, and the assailants to have begun climbing up, sallied with the view of taking them in flank, but was unexpectedly met among the rocks by the divisions described, and, at the same instant, a few well-directed shot from the batteries fell with great execution among his troops. He retreated in surprise and dismay, followed with great energy by the English troops. At this instant, the assailants, who had gained the highest eminence of the eastern rock, obtained a distinct view of the pursuit, they observed the killedar to fall just as he approached the gate of his citadel, and the pursuers to enter with the fugitives. Everything was carried within one hour from the commencement of the assault, and an enterprise which had been contemplated by Lord Cornwallis as the most doubtful operation of the war, was thus effected in twelve days from the first arrival of the troops, and five of open batteries, including the day of assault, with a moderate amount of casualties in the previous operations, and in the assault itself. His Lordship had not to regret the loss of a single life."

On the 28th of June 1791, Lord Cornwallis pitched his camp here whilst he reconnoitred Sāvandurg. On the 24th of December, he encamped here again, and waited for the detachments by which Uttradurg, Ramagiri and Sivagiri, were attacked and taken. And in this neighbourhood, he was joined by the forces of the Nizām on the 25th January, 1792.

At the foot of the hill Bilagudda (see above) are two temples dedicated to Virabhadra and Narasimha. The former is a large Dravidian structure standing within a courtyard with a massive *mahādēvra* supported by huge short pillars. The temple faces east and has in front a fine lofty lamp-pillar about 60 feet high, with an iron frame work for suspending bells at the top. The bottom portion of the pillar is sculptured on all the four sides with figures and floral devices. The figure opposite the temple is the sheep-headed Dakṣha with folded hands; those on the north and south faces of the pillar are Dakṣha's wife and Nandi; and the figure on the back is Bhairava. The pillar shows good work both at the top and the bottom. To the left of the pillar is a good four pillared *Kalyana mantapa* and to the right a *tōraṇa gamba* or *uyyala kamba* with an iron chain hanging from the top slah for swinging the god of the temple on special occasions. The god Virabhadra about 4½ feet high bears the usual attributes viz. a bow, an arrow, a sword and a shield. In a separate cell is his consort Bhadrakālī, a fine figure about 3 feet high with the same attributes. To the right of the *navaranga* entrance is the figure of a *rishi* or sage with a *goliḡe* or alms bag and a staff. There are also metallic images of the god and his consort holding the same attributes. *Virabhadra vijaya*, a Sanskrit *champu* work composed during the time of the Yelabanka Chief Minminadi Kempe Gauda is in praise of this god. At some distance to the east of this temple is the Narasimha temple with its *garbha griha* and *navaranga* situated in a large cave sheltered by a huge boulder. There are two black stone elephants at the sides of the entrance. The figure of Narasimha is sculptured on a rock with that of the demon Hiranya kāsipu at the side.

Home in his *Select Views in Mysore* has two interesting views of this place, both 'distant views' from Bangalore. Also, a north view from the Magadi side. Home thus writes of it —

This stupendous fortress enjoys such advantages from nature, as to need little assistance from art though art seems to have neglected nothing to render it absolutely impregnable. Completely surrounded by walls and defended by cross walls and barriers wherever it was deemed accessible it has the farther advantage of being divided above by a vast chasm separating it into two hills each of which having its own defences two distinct citadels are formed capable of being maintained

Kalale Nanjarāja, an author who flourished about the middle of the 18th century, has written a Kannada version of the *Kaḷudgiri-mahātmya*. The northern slope of the hill presents a picturesque appearance with its temples, towers and grand flight of stone steps. As we ascend the flight of steps, there is to the left a huge Ganapati carved out of a boulder and behind it on another boulder a fine tower over a small four-pillared *mantapa* which once contained a Basava or Nandi, and to the right a shrine of Virabhadra known as Padekal Virabhadra owing probably to his position near the beginning of the flight of steps. Further up to the right we have a shrine of Subrahmanya, a good figure seated on a peacock with 5 faces in front and 1 on the back and with 12 hands, two being in the *abhaya* or fear-removing and *varada* or boon-conferring attitudes and the rest holding various weapons. After this, the passage to the right leads to the Gangādhārēśvara temple and that to the left to the summit of the hill. A few yards further up is a huge Nandi, measuring 12' × 8' × 9', called *Emme-basava* (She-buffalo) owing perhaps to its rude execution. There are also a cave and a linga shrine near it, in the latter of which an inscription is to be seen. Further up, we have to the right a figure, carved out of a rock, of Ganji-Virabhadra, so named because his shrine is situated near the drain of a former temple kitchen through which *ganji* or rice gruel once flowed. Going a little higher up, we come to the structure called Kempe Gauda's *hajāra* or hall, a good *mantapa* in three *ankanas* with a verandah on a lower level, both supported by sculptured pillars with protruding lions with riders. The end pillars of the verandah have lions and riders on both the outer faces. On the west face of the third upper pillar from the east is a well executed figure of a man trimming his mustaches with the left hand and holding a dagger in the right. A few yards above this we have to pass through a gate called Gāre-basavanna's gate, because it has over it a huge, but pretty, *basava* or bull made of mortar (*gāre*). People make vows to this bull and worship it. Higher up to the right is a large spring called Āne *doni* (Elephant spring), to the east of which is an inscription near a linga shrine. Continuing the ascent, we come to a cave called Chigatenu-gavi, which has some figures, male and female, elegantly carved out of the rock, though now in a mutilated condition. Further up is another huge Nandi, measuring 12' × 9' × 10' known as Dode

(big) basava. Then we pass through a small gateway called Kalla bāgilō (stone gate), a few yards above which is a well called Kanya tirtha. An inscription found here tells us that the well was built in 1652 during the rule of the Mahratta chief Shāhaji father of Sivaji. Higher up we have to go through a narrow passage between boulders which bears the name Onake-gandī (Pestle hole). An inscription is to be seen here. There is also an English inscription on a boulder close by recording His Highness the Maharaja's visit to the hill in November 1900. Above Onake-gandī the ascent is very steep in several places and an iron railing has been put up for the safety of the climbers. Further up is a good Nandi called Kodugal basava (Peak hall) because it is carved out of the top of a peak on the east. It is really astonishing that the artists were able to accomplish this piece of work seeing that there is scarcely enough space around for them to sit and do their work, the rock being almost perpendicular on all the sides with an abyss below. Two inscriptions are to be seen on this rock, one of them giving the date of the execution of the ball as A. D. 1389. Going higher up we reach the summit. On this is a shrine of Virabhadra, to the north of which stand on an extensive rock two stone pillars, one larger than the other, the larger called Tirthada Lamba or the Tirtha pillar owing to a small quantity of water oozing from beneath it on the day of the winter solstice or *Makara sankranti*, and the smaller called Dīpa stambha or the lamp-pillar as a lamp is lighted on it on particular occasions. The rock on which the pillars stand juts out to a considerable distance without any support below and has on the under side of the extremity two iron hooks for hanging bells. It is said that two bells, one of gold and one of silver, were once attached to the hooks. It is really wonderful how the hooks were fixed on the under surface of this precipitous rock. Around the pillars the rock is covered with numerous inscriptions in Kannada and Nagari characters recording the names of pilgrims. The Tirtha pillar is octagonal in shape, the upper faces being adorned with a device resembling Tenkale-namam (the mark on the face of the Tenkale Śrīvaishnavas). The lower portion of the pillar has an inscription repeated on all the four sides stating that it was set up as a lamp-pillar by one Kusa Basavana during the reign of the Hoysala king Narasimha I (1141-1173). There is also an inscription in the

Gangādhārēśvara temple on the north slope of the hill which mentions this fact. We thus learn from the inscriptions that the Tīrtha-pillar was originally intended for a lamp-pillar. It is not known when the other pillar, now known as the lamp-pillar, was set up. The water that oozes from beneath the Tīrtha-pillar is considered very holy and a portion of it is sent to the Palace in a sealed vessel on the *Sivarātri* day, as mentioned above. The top of the hill commands a fine view all round.

Before noticing the temples on the north slope of the hill, it is necessary to say a few words about a Lingāyat *matha* situated higher up. This is called Mēlgavi *matha*, i.e., the Upper Cave *matha* in contradistinction to another Lingāyat *matha* known as Kelaganagavi *matha* or the Lower Cave *mathā* which is situated lower down behind the Honnādēvi temple on the north slope. Mēlgavi *matha* is an institution of some antiquity, affiliated to the *matha* of Rēnukāchārya at Balehalli. Gubbī Mallanārya, a Vīrasaiva author who wrote the Kannada poem *Virāsavāmritapurāṇa* in A. D. 1530, gives a list of the *gurus* of this *matha* and says that he was the disciple of Santananjēśvara of this *matha*. The *matha* has a temple in a natural cavern of Rudramuni who is said to have been the son of Rēnukāchārya, one of the five Vīrasaiva *āchāryas*. The figure of Rudramuni about 1½ feet high, stands with 4 hands, wearing a garland of skulls. Two cells on both sides of this temple with female *dvārapālakas* at the sides are styled *yōga-mantapas*. In the *pradakshina* of the temple is a deep narrow spring called Oralu-tīrtha, *oralu* meaning a stone mortar, said to be connected with the Kumbhāvati tīrtha, a fine spring at the back of the *matha*. Three inscriptions are to be seen near the *matha*, two near a spring known as Jaji-donē and one on a pillar of a *mantapa* in front. Some vessels of the *matha* were also found to bear inscriptions stating that they were presents from Krishna-Rāja-Wodeyar III. Kelagana-gavi *matha* may also be noticed here for convenience. As stated above, it is situated behind the Honnādēvi temple and is said to be affiliated to the Parvata *matha*. Close to it, in a deep and narrow cleft of rock, is a tīrtha known as Pātāla-Ganga. To reach the tīrtha we have to descend 40 steps between two boulders. The *Sthala-purāṇa* tells us that on one occasion Pārvatī, feeling thirsty, asked Siva to give her some water from the Ganga on his head, and that, on his refusing to do so, she assumed the form of Honnādēvi, an

incarnation of Kali and struck the rock with her sword where upon water gushed out of the rock. This is the origin of Putāla Ganga. On the way to the *Utha* from the *matha* are some *gaddige* or tumbs of the *gurus* of the *matha* and to the left of the passage is a huge figure about 9 feet high of Virabhadra carved out of a boulder holding a bow an arrow a sword and a shield and wearing a garland of skulls. It is said that the *gurus* of this *matha* had once the sole management of the Honnadēvi temple (and according to some people of the Gangadhareśvara temple also) in their own hands and that they were thrust to the background when latterly Brahmans took possession of the temple. But it appears that as a reminiscence of their former position some honour is shown to the *gurus* on certain occasions, though they do not visit the temple.

The Gangadhareśvara and Honnadēvi temples on the north slope of the hill are formed out of large natural caverns with *mantapas* and *prakāra*s attached to them. The former is a large structure with two *mahadrasas* on the north and east surmounted by *gopuras* or towers the east tower being in an unfinished state. The temple proper is a large cave sheltered by a huge overhanging boulder with cells all round. It faces north and has a well carved doorway consisting of four sets of jambs on either side. There are no pillars in the cave except two ornamental brass pillars set up in front of the linga cell which faces east. Another cell serve as the temple treasury with a figure of Ganapati, named *Ahajune* (Treasury) Ganapati at its entrance. In a third cell are kept a few stone and metallic images. Two niches contain figures of Harihara and Subrahmanya the latter with all the six faces in front and four hands. Other figures in the cave are Mahishasūra mardini Nārāyaṇa Bhairava and Ganapati. The last two are elegantly carved. The figure of Ganapati about 1½ feet high which is kept in a niche is said to be Jakanāchari's own handwork. The *utsava* *vigraha* or metallic image of the god is a good figure with two consorts, Pārvatī and Ganga as in the Rāmeśvara temple at Magadī. There are also several other metallic images in the temple which are of interest from an archaeological historical or artistic point of view. A portrait statuette of the Yalahanka chief Kempe Ganda with a label on the pedestal stands with folded hands with a sword to the left in front of the linga cell. The figure is about 4 feet high and the label gives the date A. D. 1608.

Another statuette, about $1\frac{1}{2}$ feet high, also with an inscription on the pedestal, standing to its left with folded hands and armed with a sword and a dagger, represents Uḷḡam Basavayya while a third, about $4\frac{1}{2}$ feet high, standing to its right without a label and holding a lamp in both the hands, is said to represent Kempasōmanna. It is stated that Uḷḡam Basavayya and Kempasōmanna were Kempe Gauda's brothers. Kempe Gauda is said to have enlarged and liberally endowed the temple. Opposite to the entrance are kept in a row at the back two figures of Tandavēsvara differing from each other in details and artistic quality, a good figure of dancing Ganapati, seated figures of Śiva and Pārvatī and a figure of Umāmahēśvara. Another figure worthy of note is a rare form of Chandīkēsvara, about $1\frac{1}{2}$ feet high, represented as an incarnation of Brahma, with 4 faces and 4 hands. The attributes in the hands are a trident, an axe, a water-vessel and a rosary, the hand holding the rosary, being in the *abhaya* pose. The temple possesses four large inscribed bells which may be assigned to the middle of the 16th century. In front of the cave is a fine Nandi-mantapa supported by four polished black stone pillars. Adjoining this is the Kalyāna-mantapa supported by four similar pillars. The pillars of both the mantapas are well carved, though devoid of sculptures. The *mulha-mantapa* or front hall on the east is a fine structure standing on an ornamental plinth, supported by sculptured pillars. The inner walls have a row of images, about 2 feet high, all round representing Saptamātrikāḥ or the seven mothers, *astha-dīkṣālakāḥ* or the regents of the eight directions, *nava-grahas* or the nine planets, sages, musicians, etc., who are supposed to have gathered together to witness the marriage of Śiva and Pārvatī which forms the chief subject of the composition. Some of the figures, such as Tumburu, a lute player and a female in the marriage group, are well executed. Of the 6 front pillars of the *mantapa*, the middle four have lions with riders, while the end ones consist of pilasters with figures of sages standing in front. Over the *mantapa* are fine stucco figures in niches. The *vimāna* or tower over the cave temple is a fine structure built of granite and sculptured all round. It is about 20 feet square at the bottom and stands on the boulder overhanging the cave. On all the four faces it has a small porch supported by two pillars carved with lions and riders. Each face has 3 niches with figures in them and two pillars at the ends,

only the east face has an empty cell in place of the central niche. The end pillars are carved figures with miniature tarrets over them. The figures in the two niches on the east are a *rishi* or sage and Ganapati, the end pillars representing sages. The figures in the three niches on the north are Tandavāsvara, Parvati and Virabhadra, the end pillars showing Narada and Tumburu; those on the west are Siva, Bhairava and Sūrva, the end pillars representing Lakshmi and Vishnu as a drummer, and those on the south are Siva in two niches and Bhairava with mere pilasters at the ends. The top of the tower has Nandis at the corners. Besides the two inscriptions on metallic images and four on bells referred to above several more records have been discovered in the temple. Two of these found in the temple kitchen refer themselves to the reign of the Hoysala king Narasimha I (1141-1173). One of them confirms the statement made in the inscription on the Tirtha pillar that it was set up by Kusa Basavana while the other records the erection of a *mantapa* probably the present temple kitchen by Chokkimayya, a general of Narasimha I. From *E. C. V. Boerigget* 9 we learn that Chokkimayya had also served as a general under Vishnuvardhana, father of Narasimha I. An inscription on one of the pillars of the Nandi mantapa in the temple *F. C. IV. Aclamangala 81* tells us that Vishnusāmanta, apparently a feudatory of Vishnuvardhana, built a fine Siva temple on the Sivaganga hill. If the reference as is most probable is to the present temple its period would be the early part of the 12th century. *Aclamangala 85* is a modern inscription of the 16th century dated perhaps in 1571. The Hoanadevi temple faces east. The goddess is a seated figure about 5 feet high with pedestal trampling on the demons Chanda and Munda. The figure is well carved though with a terrific expression and has 8 hands, the attributes in six of them being a bell, a conch, a discus, a skull, an axe and a sword, the remaining two being empty. There are also some other demons represented as fighting or in a dying condition. The name of the goddess Hoanadevi or Honnamma is the Kannada form of the Sanskrit Svarnamba. The goddess was once flanked by two female figures, about 4½ feet high holding a sword in one of their hands. It appears that one of these was removed owing to mutilation. The other is now kept in a separate niche. The *utsava vigraha* also has eight hands and the same attributes. An inscription is to be seen on the gold

neck ornament of the goddess, stating that it was a present from Dēvājamanni, one of the queens of Chāma-Rāja-Wodeyar, father of Krishna-Rāja-Wodeyar III

Some *tīrthas* on the hill, such as the Kanva, the Kumbhāvati and the Pātāla-Ganga, have been referred to above. A few more may now be noticed. To the east of Kempe Gauda's *hajāra* or hall is a fine circular pond known as Chakratīrtha. Higher up to the west is the Sankarāchārya-tīrtha, a basin at the foot of a wall-like perpendicular rock. The great Advaita teacher Sankarāchārya is said to have performed penance here. Maitrēya-tīrtha is an open reservoir on the north slope. In a deep cave on the south slope is the Maudgalya-tīrtha. There is here a shrine of Mudduvīrēśvara. The god, about 5 feet high, is carved out of a boulder and has four hands, the attributes being a bow, an arrow, a drum and a trident. The Gangā-tīrtha is in a cleft of the rock on the west slope. Two inscriptions are to be seen here. Close by are a small neatly built pond and a small well with a neat tiny four-pillared *mantapa* over it. Lower down is a pond said to have been built by Dāsarājaya, a subordinate of the Mysore king Chikka-Dēva-Rāja-Wodeyar. Near this is a rock known as Pādādare (Foot-print rock) sculptured with two pairs of feet which are believed to represent those of Śiva and Honnādēvī. A modern inscription is to be seen here.

The entrance to Śivaganga is through a stone gate-way surmounted by a lofty tower. The Sāntēśvara temple is an old structure with a fine lamp-pillar in front which is 3 feet square at the base and 45 feet high. The pillar is known as Gante-kamba (Bell-pillar) as it once had 4 bells attached to the four sides at the top. The east face has a large figure of Ganapati enclosed in a rude *mantapa*. In front of this is kept a most beautiful carving in the shape of a circular disc with a lotus in the centre and creepers around. It is an exquisite piece of sculpture brought from some ruined temple and undeservedly built into the steps of the above rude *mantapa*. From *Sravana Belgola* 53 we learn that Sāntala-Dēvī, queen of the Hoysala king Vishnuvardhana, died at Śivaganga in A. D. 1131. It is just possible that the Sāntēśvara temple is named after her. The Rudrēśvara temple has a good figure of Vīrabhadra about 6 feet high. To the north of the temple is a good pond, and to its west a ruined Lingāyat *matha* known as Mahantana-matha, a large structure with a courtyard supported by sculptured

pillars, one of which is a figure of Kēmpa Ganda resembling those at Magadi and Kempasagara. Another sculpture on one of the pillars worthy of notice is the Lingūdhava mūrti of Siva with Brahma going up in the shape of a swan to reach the top of the linga and Vishnu going down head foremost to reach the base. It is said that Sivaganga once had 61 Lingayat *mathas*. On the rock to the north of the Kumbhāsvara temple three inscriptions are to be seen. The Sarada temple is a neat modern structure consisting of a *garbhagriha* with a *pradakshina* and a *navaranga* of large proportions. It is situated outside the village. The goddess Sarada is a beautiful four handed seated figure about 2 feet high made of white marble. The *prabhurati* also of white marble is well executed. The figure was prepared and set up only a few years ago. Adjoining the temple is the *matha* of the Sivaganga Svami, a *sanyāsī* of the Smārta sect recently built to two storeys and presenting the appearance of a modern bungalow. The old *matha* is a stone structure within the village. In it is a pond named Agastya tīrtha though popularly known as Nuretna lingadakalyani on account of the 108 lingas set up around it. In front of the new *matha* at some distance is a large pond known as Kalyani measuring 60 yards by 50 yards, with entrances on all the four sides. The stone parapet above the steps has a frieze of figures all round illustrating scenes from the *Rāmāyana* and the *Bhagavata-purāṇa*. The story of Rāma is completely delineated from his birth to his coronation. The bringing of Rishyasringa from the forest to Ayūdhya by dancing girls is also represented here as at Devanhalli. It is also worthy of note that unlike in other ponds all the steps here have their front faces carved with figures of animals etc. at intervals. The pond is also known as Kamala tīrtha.

Sivaganga.—The village of Sivaganga is at the northern base of the hill. Population 561. The houses are entirely of stone and form a single street through which the car is drawn at religious festivals. At the entrance to the village is a lofty towered gateway (See above). The *matha* having become involved in great pecuniary difficulties, the revenues of the religious endowments are on the wish of the *guru* being managed by the Muzrai Department.

A fine view of this place from the road to Seringapatam is to be seen in Home's *Select Views in Mysore*

Sivagiri

Sivagiri.—A large fortified rock, near Closepet, on the right bank of the Arkāvati. It is the centre of an extensive forest, which reaches from Sivaganga to the banks of the Cauvery. This fort, as well as Rāmagiri, which is not far away from it, was one of those, which in 1730, was taken from Kempe Gauda, by Dēva-Rāja. It surrendered, at the first summons, to Captain Welch, on 22nd December 1791, immediately after the fall of its neighbour Rāmagiri. Home, in his *Select Views*, has a fine view of it as seen from the top of Rāmagiri.

Solur

Solur.—A village in Magadī taluk. Population 1340. The place appears to have once been the capital of a Pālegār. The Lingāyat *matha* at this place in which *Magadī* 64 and 65 are found is known as Chilume-matha owing to its having a fine spring (*chilume*) in the form of a well with steps built on all the four sides.

Sugganhalli

Sugganhalli.—A village in Magadī taluk. Population 196.

This place has a beautiful grove in front. The Narasimha temple here is a pretty large Dravidian structure. The *garbhagriha* has a pillar sculptured with a discus on the front face. Attached to this is the *vajarāṅgi* (or a brass plate in the shape) of a standing Narasimha. The *utsava-vigraha* or metallic image, though a Srīnivāsa in form, is called Ranganātha. The brass Garuda-vehicle of the god, kept in the *navaranga*, is a great object of worship. It has many devotees who make vows to it, present it with jewels and cloths and have it constantly bathed in fulfilment of their vows. In a cell to the right of the *navaranga* entrance is a fine figure of Chakrattālvār (or the discus of Vishnu) with 16 hands, and in a cell to the left a *brindavana* worshipped on the Utthānadvādasi day (i.e., the 12th lunar day in the bright fortnight of Kārtika). The car festival of the god takes place about the full-moon day of *Phālguna* (February-March) when a large cattle fair is held at which about 50,000 people are said to collect together. In the *prakara* are cells enshrining the goddess of the temple, Āndāl and the

Ālvaś. As at the temple at Tirumale, Sātānis perform the duties of a *parichāra* here. They style themselves the *sthānīkās* of the temple. Many people name themselves Sugga after the village and Kambadayya (*kamba pillar*) after the god. The temple, though Vaiṣṇava is said to own many Lingayat devotees.

Sulibele —A village in the north of Hoskote taluk head quarters of the hobli of the same name, and a municipality. Population 1 734

Sulibele.

Municipal Funds	1921-22
Income	Rs. 1 467
Expenditure	690

Tirumale —A village about a mile to the east of Magadi. Population 133. It contains the well known Ranganatha temple, a large structure in the Dravidian style, with two *mahādōvāras* on the east and west surmounted by lofty *gōpuras* or towers, the east tower being taller than the other.

Tirumale.

The temple faces west and consists of a *garbhagriha* a *sukhanāśi*, a *navaranga* and a *mukhamantapa* or front hall. The last has three entrances with an inscription at each telling us apparently that the hall was caused to be built by one Naga reddi. The *navaranga* has a good ceiling about three feet deep. At the sides of the *navaranga* entrance are two large stucco elephants with their trunks raised over the figure of Lakshmi on the door lintel. In the *garbhagriha* is a square stone basin with a round stone in it. This round stone is the god Ranganātha. Similar representations of Ranganatha are to be seen at Māvina kere-betta and Haradurpura. Behind the stone stands a figure, about 4 feet high of Śrīnivāsa. It is stated that, however great may be the quantity of water used for the *abhishēka* or bathing of this stone not a drop of it is left in the basin. This is looked upon as a miracle. There is also a seated figure in the *garbhagriha* which is said to represent the sage Māṇḍavya who according to the *Sihala-purāna* worshipped the god. Magadi is said to be a corruption of *Māṇḍavya kūt* or the hermitage

of Māṇḍavya The *prakāśa* of the temple has cells all round containing figures of Rāma, Ranganātha, a good reclining image about 4 feet long, Sita, Ālvārs or, Srīvaishnava saints, Āchāryās or Srīvaishnava sages, etc Behind the *garbhagriha* is a figure of Ranganātha, about 3 feet long, called *Beleyura-Ranga*, because the figure is supposed to be growing (*bele*) in length year after year It has the left leg bent and the left foot rests on the knee of the right leg There are no figures of Srīdēvi and Bhūdēvi at the feet as is usual with images of Ranganātha. It is worthy of note that Sātānis perform the duties of a *parichāraka* in this temple and have the privilege of entering the *garbhagriha*, though the *archaka* is a Brāhman They light the lamp and supply *tulasi* and flowers for the worship of the god A *jātrē* takes place here on a large scale in the month of *Chaitra* (April) every year There are numerous *mantapas* around the temple to accommodate the pilgrims on that occasion It is noteworthy that the towers of this temple, especially the east tower, show some features of the Saracenic style This is accounted for by the statement that the east tower was caused to be erected by a Muhammadan Killedār of the place named Hussain Khān who was a devotee of the god It appears that the Killedār was directed by a *vali* or saint in a dream to build the tower The family of the Killedār possesses some *nirūps* addressed to his grandfather by Dewan Pūrnaiya in A D 1801 and by Krishna-Rāja-Wodeyar III in A D 1811, and some others addressed to his father Fakruddīn Khān, who was also Killedār of Magadi, by Dewan Lingarājaiya Arasu in A D 1825 and by the Commissioners of Mysore in A D 1832 But none of these refers to the building of the tower In a *nirūp* from Dewan Lingarājaiya Arasu, however, Fakruddīn Khān is asked to take particular care of the garden of the temple There are five or six families of Smārta Brāhmins at Tirumale who are experts in the manufacture of musical instruments such as *tambūris* and *vīnas* These instruments command a large sale both in and outside the State The Brāhmins have been doing this work for several generations

Totagere

Totagere.—A village in Nelamangala taluk Population 200 The Arjuna temple at this place is now in ruins The linga in it was, according to tradition, set up by Arjuna.

Judging from the inscriptions here, *F C 9 Nelamangala* 33 and 31, which take us back to the 8th century, the temple should be taken to be one of considerable antiquity

Tyamagondal —A mercantile town and municipality 11 miles north west of Nelamangala with which it is connected by a branch road from Begur It is about midway between the Niduvanda and Doddbele railway stations not more than 3 miles from either

Population in 1911	Males	Females	Total
Hindus	1,393	1,309	2,701
Mohammadans	369	314	682
Christians	2	3	6
Total	1,763	1,626	3,389

The town increased to its present dimensions on the destruction of Nijagal and contains a considerable number of merchants and traders in grain Some large tanks have been formed in the vicinity by intercepting the waters of the Kumadvati.

Municipal Funds	1921-22
Income	Rs 4,711
Expenditure	5,304

Uttaradurg —(Formerly spelt Ootradroog) A strong fortress, about 30 miles West of Bangalore and eleven miles distant from Savandurg This is one of many strong fortresses in the State in which (according to old military writers) a small intrepid band might long keep a large army at bay Home gives a view of the works and the pottah in his *Select Views in Mysore* He writes —

Here were sent at the commencement of the late hostilities twelve of the crew of the *Hannibal* whom Admiral Saffern

basely delivered into the hands of Hyder Ali, during that war, in which Britain had alone to contend with the forces of the east and west, aided by the arms of her neighbours in Europe. From this place they contrived to escape, one dark and rainy night, down the precipices on the north side of the rock, at the expense of few bruises, and one broken arm. But they were unfortunately discovered the next day, by a boy keeping cattle, who conveyed information of their track to the garrison. Finding themselves pursued, they separated, seven were retaken, two arrived safe in the British territories, of the other three, no tidings have ever been heard. The recaptured fugitives could expect nothing but the severest treatment, and indeed of six of them famine soon put a period to the existence. The seventh, Mr Cadman, a mid-shipman, must soon likewise have perished from inanition, had not the army of Lord Cornwallis passed this way, when fear probably induced the killedar to supply him with a sufficiency of wholesome nourishment. This soon recruited his strength, and enabled him to be removed to Seringapatam, where he was liberated about six months after by his victorious countrymen. On the march of the army from Seringapatam to Bangalore, in June 1791, this fortress was summoned to surrender. The killedar tauntingly answered, "I have eaten Tippoo's salt for twenty years and will not give up post till you have taken Seringapatam." He was unable, however, to keep his word, for though Lord Cornwallis judged it not advisable to attack the fortress at this time, he sent against it, on the 23rd of December following Lieutenant-Colonel Stuart's detachment, flushed with the capture of Savendurg. The killedar being again summoned, appeared to persist in his resolution, and to avoid any communication, fired on the flag of truce, Colonel Stuart in consequence made his disposition to attack the lower fort and pettah next morning. Captain Scott of the Bengal establishment, with four battalion companies of the 52nd and 72nd regiments, and his own battalion of sepoys was sent on this service, while another body made a feint, and opened some guns on the opposite side of the fort. So rapidly did Captain Scott carry the lower fort by escalade, that the killedar sent to request a parley. While this took place, an appearance of treachery was observed in the upper fort, the garrison being busily employed in moving guns, and bringing them to bear on the assailants.

Exasperated at this sight and impatient of the delay the troops again rushed on to the assault. Lieutenant McInnes of the 72nd regiment, led the storm, with part of the Europeans and the pioneers commanded by Lieutenants Dewar and Macpherson supported by Captain Scott who followed in more regular order with the rest of his force. Some of the gates were burst open others escaladed till having passed five or six different walls which defended this steep and difficult rock, the troops at length gained the summit. So infatuated were the enemy that whenever they saw a single European above the walls they fled and although from the steepness, and narrowness of the road in the ascent a few men of the determined courage might with ease have stopped the progress of the assailants they attempted not to make the least resistance except at the last gateway where a few muskets were discharged by which two soldiers were wounded. The killedar was made prisoner many of the garrison were killed and many terrified at the approach of the British soldiers with their bayonets are said to have rushed headlong from the rock. When in our possession this place was fitted up as a general hospital and a magazine for the grain and stores that could not be carried on immediately with the army. For these purposes it was extremely well adapted as the lower fort was strong, spacious, and contained a number of good houses. Its situation too was convenient being between forty and fifty miles away from Seringapatam.

Vadigenhalli—A mercantile town and municipality 7 miles north-east of Devanhalli on the Kolar Nandi road

Population in 1921	Males	Females	Total
Hindus	1 752	1 706	3,458
Muhamadans	137	128	265
Christians	4	3	7
Total	1 893	1 837	3,730

A fair held on Friday is attended by about 300 people

The principal trade of Vadigenhalli is in the hands of Nagarta merchants, and consists of the import and export of cotton. The two temples of Nagarēsvara and Kēsava were erected about fifty years ago, and the designs are said to be taken from the temples at Kānchi.

Vagata

Vagata.—A village in Hoskote Taluk. Population 394. This appears to have been a place of considerable importance at one time. It is named Ovattam and Varadarāja-chaturvēdi-mangalam in the Tamil, and Ogatta and Bhāgīrathipura in the Kannada inscriptions of the place. In later literature, it is known as Yōgavatapuri or Yōgapuri.

The Varadarāja temple here is an old Dravidian structure. The inscriptions take it back to the 13th century, but it is much earlier. A painted wooden vehicle, Hanumanta-vāhana, of the temple has two *chōpdais* or mace-bearers standing at the sides. In the *sukhanāsi* of the Chandramaulisvara temple is kept a four-armed figure, about 3½ feet high, of Pārvatī, bearing in the upper hands a noose and an elephant-goad, the lower hands being in the *abhaya* (or fear-removing) and *varada* (or boon-conferring) attitudes. Here is also kept the processional image, about 1½ feet high, of the Chaudēsvari temple, a standing figure with the usual attributes a trident, a drum, a sword and a cup. The Ānjanēya temple, recently renovated, has a good figure, about 7 feet high, of the god. The Chaudēsvari temple, situated to the north-east of the village, has Saptamātrikah Ganapatī and a few other curious figures. Among the latter are a Vētāla in the form of a skeleton, a seated four-armed male figure holding in the upper hands some small indistinct things, the lower right hand being in the *chin-mudra* or teaching pose and the lower left resting on the thigh, and another seated male figure bearing a lotus in the right hand, the left hand being

placed on the thigh. The semi-circular top piece of the *pranagambha* or gate in front of the temple bears an inscription dated 1028 of Rājendra Chōla and some sculptures on both sides which are of some interest as illustrating the art of that period. The front face has *Cajalak linu* in the middle flanked on the right by a bull and a lion and on the left by a bird with the head of an elephant and a lion. On the back is the inscription referred to above with the celestial cow or *Kamadhēnu* with a human head to the right and a seated lion to the left.

Vanakanhalli — A village in Anekal Taluk. Population 751. Vanakanhalli is named *Vannakkarpattanani* in the Tamil inscriptions of the place. Three old Tamil epigraphs are to be seen here. One of them refers to a bear hunt and the slab on which it is inscribed has at the top a bear which is attacked by two dogs both in front and behind.

Varanayakanahalli — A *sarvamūnya* village in Delamangala taluk, belonging to the *Smārtha māta* nt Siva *ganga*. Population 312. Here are two interesting inscriptions — a Kannada record of the Chōla king Rajadhiraja dated in (Saka 973—1051 *A D*) and a Tamil record of the Hoysala king Vishnuvardhana. Both are *viragals*, and it is worthy of note that the inscriptions are on the back of the stones the front faces being occupied with figures of fighting men.

Vasantapur — A village five miles south of Bangalore. Population 144.

Here is a pretty large Vishnu temple prominently situated on an eminence. The god known as *Vallabharayaswami* or *Vasanta vallabharayaswami* is a well-carved figure about five feet high flanked by consorts. A cell in the front hill has a seated figure of the goddess of the temple. Another cell contains figures of *Vishvakarma* and ten *Ālvars*. According to the *Sihala purāna* the god was worshipped by the sage *Mundavya*. There are said to be eight *tirthās* around the place known as *Chakra tirtha*, *Gada tirtha* and so forth. Two modern inscriptions are to be seen in the temple. The temple is a great favourite for wedding parties from Bangalore.

Whitefield

Whitefield.—The principal of the Eurasian and Anglo-Indian settlements in the east of the Bangalore taluk, named after Mr D. S. White, the founder of the original Association in Madras. It is two miles south of the railway station of the same name (formerly called Kadgod station) and 12 miles east of Bangalore.

The Eurasian and Anglo-Indian Association in Mysore (numbering 213 members in 1895) was formed in November 1879, for the purpose of co-operation among the members in improving the condition of families belonging to those communities. This object was to be attained by promoting industrial and agricultural pursuits among them. A boot and shoe factory was started, and as long as it was open, proved successful, arrangements were also made for apprenticeship to other trades, and an Art and Industrial Institute was in view, where poor women and girls could be employed in needlework and fancy work, and in making Indian condiments and jams. But the main reliance was on the land scheme, which aimed at the formation of agricultural settlements or colonies. The Mysore Government readily lent its aid by a grant in July 1881 of nearly 4,000 acres of land, selected by the Association, to be held free of assessment for the first five years. With the help of Sir James Gordon, special sanction was obtained for holding a lottery in order to raise funds for starting the scheme. One lakh was thus obtained, but half of it was allotted for prizes. The original intention was to establish four colonies, as follows —

	acres	
Glen Gordon	527	In the Sriganthakaval, 8 miles west of Bangalore, on the Magadi road
Haldwell Green	757	
Whitefield	542	12 miles east of Bangalore, as above described
Sausmond	926	

But this was found to be more than the Association could accomplish. They, therefore, in July 1883, relinquished the lands of the Kaval and also the outlying lands of Sausmond, the Mysore Government having sanctioned their giving up any of the lands either absolutely or in favour of any specified individual or individuals. The terms on which the lands retained were held were further modified in November 1884 in the following manner — No assessment was to be levied on village sites, and on land set apart for common pasturage. On the rest,

the assessment was remitted for 3 years more, half rates to be levied in the 4th year and full rates thereafter

Though the Anglo-Indian Association of Mysore and Coorg continued to have control over the settlement, the settlers at Whitefield formed in the meanwhile an Association of their own and began to agitate for independent recognition. The question came up finally before Government in the year 1921 when they passed orders directing the resumption of the village site and the unassessed lands in the hands of the Anglo-Indian Association on the ground that it had failed to fulfil the condition on which the lands were granted. Thereupon the two Associations, viz. The Furasian and Anglo-Indian Association of Mysore and Coorg and the Whitefield Settlers Association submitted a joint memorial to Government praying for the cancellation of the resumption order their chief contention being that the Association had fulfilled the condition on which the lands were originally given. They asked that the Anglo-Indian character of the settlement under the terms of the original grant should be maintained and that the lands should not be alienated by the settlers in a manner that would effect this feature of the settlement. So far as the agricultural lands under private occupancy were concerned Government considered that as soon as the Association relinquished the lands and Government accepted that relinquishment direct relationship between the Government and the Pattedars was established without the intervention of the Association. Government therefore could not recognise any understanding that might have existed at the time between the Association and the Pattedars. The relinquishment was made free of all conditions and under the Land Revenue Code when a person holds a pattin under Government unconditionally no restriction can be imposed at a later stage.

As regards the village site in view of the Association having substantially succeeded in accomplishing the object of the grant viz. the formation of an agricultural settlement of Furasians and Anglo-Indians Government did not wish to resume possession of the village site compulsorily without a voluntary relinquishment on the part of the Association as in the case of Agricultural lands. They have therefore directed in modification of the order of 1921 that the Anglo-Indian Association of Mysore and Coorg continue in possession of the village site in accordance with the terms of the original grant.

Yelahanka.

Yelahanka.—A town 10 miles north of Bangalore, on the railway to Guntakal and on the Bangalore-Chikballapur road, and a municipality. Till 1871 it was the Headquarters of a taluk of the same name

Population 1921	Males	Females	Total
Hindus	1,135	1,098	2,233
Muhammadans	156	158	314
Christians	6	5	11
Total	1,297	1,261	2,558

The place is historically interesting as being one of the oldest in the District. As Ilaiṭṭakka under the Chōlas, and Elahakka under the Hoysalas, it gave its name to all the surrounding country. The form Yelahanka probably arose from the old Prākṛit custom of indicating a duplicated consonant by a round dot, like that used to express a nasal for which latter purpose it is now exclusively employed. It was the first possession of Jaya Gauda, the progenitor, of the Kempe Gauda line of chiefs, who founded Bangalore and subsequently became identified with Magadī and Sāvandurga. Jaya Gauda obtained the title of Yelahanka Nāḍ Prabhu in about 1420, and the place remained in possession of his family for 230 years when it was captured by the Mysore Rāja.

Several inscriptions of this line of chiefs have been found in the Bangalore District. They were a branch of the Āvati family and founded Bangalore. (See *Bangalore* above). The dates of their inscriptions run from 1367 to 1713, a few being in Telugu. *Kunṅal* 12 dated in 1599 (*E. C. XII* Tumkur District) records a grant by the wife of Hire Kempayya Gauda, chief of Yelahanka.

A car festival held for 10 days from *Chaitra suddha* 8th, in honour of Vēnugōpāla, is attended by about 2,000 people.

KOLAR DISTRICT

SECTION I—DESCRIPTIVE

SITUATION, AREA AND BOUNDARIES

A District in the east of Mysore, situated between $12^{\circ} 48'$ and $13^{\circ} 58'$ north latitude and $77^{\circ} 22'$ and $78^{\circ} 35'$ east longitude. Its greatest length is from north to south, about 85 miles, but from east to west an equal distance may be measured between the furthest points. Situation

The area is 3,170 square miles. Area

It is bounded on the west by the Bangalore and Tumkur Districts. On all other sides it is surrounded by Districts of Madras Presidency having Anantapur on the north, Cuddapah and North Arcot on the east and Salem on the south. Boundaries.

PHYSICAL ASPECTS

The District occupies that portion of the Mysore table-land immediately which borders on the Eastern Ghats. But the frontier touches the Ghats only in the north-east and south. Between those points it recedes from the range to a mean distance of 15 miles.

The chief watershed lies in the north-west in and around Nandidrug, the height of which is 4,851 feet above the sea. The streams which spring from this elevated region said to be the birth place of seven rivers radiate in all directions, receiving the drainage of the intermediate tracts of country. The Arkavati and Northern Pinilkini (or Pennar), rising to the west of Nandidrug flow, one to the south and the other

to the north, the Chitrāvati and Pāpāghni rise in the north and have a north-easterly course, the Pālār and Southern Pinākini (or Pennār) springing from the eastern side, run eastward and southward respectively. Of these several streams, the Arkāvati and most of the S Pinākini belong to the Bangalore District. The main part of the Kolar District comprises the head of the Pālār river system on the south and that of the N Pinākini on the north, separated by an imaginary line from Chikballapur to Srīnivaspur.

The principal chain of mountains runs north from Nandīdrug, the highest point, through Gudibanda, as far as Penu-gonda and Dharmāvaram in the Anantapur District. More or less parallel with the Nandīdrug range, and from 30 to 40 miles to the east of it, is a line of hills entering the District due north of Gumnāyakanpālya, and separating the valleys of the Chitrāvati and Pāpāghni. At the frontier, the range is known as the Dongala or Dokkala-konda. After a considerable interval, it reappears in the isolated peaks of Murugamale, Ambajidurga (4,399 feet) and Rahmandurga (4,227 feet). Thence, forming the chain of hills to the west of the town of Kolar (highest point 4,026 feet), it is continued in the Vokkalēri and Tyakal hills to the south.

A third line of low hills, represented in places merely by mounds or rising ground, commences near Srīnivaspur, and preserving the same general direction as the former, passes to the east of Kolar, and extends through the southern most parts of the Bowringpet taluk to Kangundi, Kuppam and Ghāts.

The hills still more to the east incline in some places to a circular arrangement, enclosing elevated valleys which are occupied by villages. This configuration appears at Mudimadagu and Sunnakal.

The central and eastern parts of the District, forming the valley of the Pālār, are undulating and well cultivated, the general level varying between 2,786 feet at Kolar, 2,970 feet at Malur, and 2,989 feet at the foot of Ambajidurga. A considerable depression occurs in the valley of the N Pinākini

towards Goribidnur, the height of Hindupur just beyond the boundary being only 2,008 feet, and of Penugonda, 1 677 feet. The outlying districts along the northern frontier mark with alternate rise and fall the descent to the level of the Anantapur country. On the east, the Nighi and Naikaneri passes to the plains of the so-called Karnatic are some distance beyond the boundary.

GEOLOGY

But for the occurrence of a thin belt of hornblende schist Rock which extends north and south for about 40 miles in length with a maximum width of four miles in the District from near Srinivasapur southwards to the boundary of the State and beyond the geological feature of this District is not in any way essentially different from that of the adjoining Bangalore District. The gneissic ground consists as usual of a low gently undulating broken country from which start abruptly granitic hills of varying altitudes forming conspicuous features in the landscape such as the Nandi hills, Maklidurg range, the Tyakal range and others. The Tyakal range, the Kolar hills and several others form a very striking topography in consisting of piled up granitic boulders giving rise to picturesque scenery. The vast gneissic complex according to the results of recent observations is believed to consist of granite members of both the Peninsular gneiss and the older Champion gneiss as well.

The younger intrusive granite of the Closepet age are not represented to any great extent in this District. The only patch noticeable is of an irregular shield shaped mass to the S. W. of Chintamani.

The schists form the most economically important rocks of the District and in fact of the State itself as in them are located the gold producing mines. The belt consists of a series of beds or bands of a dark hornblende schist of varying texture, believed to be the altered representative remnants of a series of basic lava flows, basalts and dolerites. The western edge of the belt exposes long ridges of ferruginous

quartzite, while at the eastern end, sometimes edging and sometimes getting into the schists, is a remarkable exposure of a conglomerate, often containing opalescent quartz, which has been found to be autoclastic in origin, and not a distinct bedded sediment. This conglomeratic material, the finer grained granite porphyry and some of the crushed granitic gneisses of this area are clubbed under the series styled Champion gneisses and are shown to be intrusive with reference to the schists. Auriferous reefs or lodes of blue-quartz, containing also a small quantity of galena, blende, pyrites, etc., are found in these schists striking north and south in conformity with them and all the gold producing mines are situated approximately about the middle of the width of the belt on these lodes which are regarded as the extreme acidic differentiates of the Champion gneissic granites.

Dykes

Dolerites are the chief dyke rocks and these strike north and south, east and west, both through the schists and the gneisses. They are harder, generally fresher, uncrushed and less altered than the other basic schists.

Laterite

Laterite occurs in horizontal layers hiding the underlying formations. The distribution of the laterite patches in the District is roughly in the shape of a triangle, the line joining Chik-Ballapur and Sidlaghatta forming the base of the triangle with its apex pointing towards Jangamkote. A few flat topped tabular exposures are also found to the east and north of Srinivasapur, outside this triangular area.

Mines and Minerals

Gold is the chief mineral which is being produced in the District. An account of the description of the mines, production, etc., is given in Volume III, Chapter V of this *Gazetteer*.

Gold and Silver

Silver is also obtained to a small extent in addition to gold from the Kolar Mines and the total annual production of silver from all the Mines amounts to about 44,000 ozs.

Ruby corundum is found to a small extent near Kanna samudram, Bowringpet Taluk. Corundum

Low grade amorphous graphite is found as fine dust impregnating an earthy fine grained schist near Gannacharpur. The deposit is found to be gritty and the graphitic contents cannot be easily separated and concentrated. The analyses show that these graphite schists contain up to 30 per cent carbon. Prospecting carried on in the area by the Mysore Geological Department disclosed veins of 60-70 feet in length with an average total width of about eight feet and one of the veins was proved to a depth of 70 feet. There is a good amount of material of very poor grade which cannot find a market. A few tons were disposed of for a nominal price to the Mysore Royal Paint Works. The material might to a small extent be found suitable for foundry purposes otherwise there does not seem to be any great demand for this kind of stuff. Graphite

Kaolin is found near Kardibande (Malur taluk) and a fairly large quantity has been removed by the Kolar Brick Making Company who are using it for manufacturing fire bricks and other materials. Besides this, there are other smaller deposits near Vokkalari, Doddkuntur, etc. which are being used for the manufacture of slate pencils and marbles. Kaolin.

Manganiferous Limestone is being obtained near Sakarsan halli. Manganiferous Limestone

The soil on the high grounds is red and gravelly. The regions of laterite are intersected by numerous nullahs or deep ravines which expose the underlying decomposed gneissic rocks (*Sudde*). The soil in the valleys is usually loamy and good and is formed of the finer particles of the decomposed rocks washed down and deposited during the rains. The decomposition of the schistose rocks in the eastern portion of the District has given rise to red (ferruginous) and dark soils with a good deal of black cotton soil in places. Soils.

BOTANY.

Vegetation

The area of the State forest in the District is about 213 square miles. The only forest containing large tree growth is in the vicinity of Nandidrug. The hilly portions of the District are covered with dense vegetation, but no tree growth. The forests in Srinivaspur, Rāyalpād and Chik-Ballapur taluks yield poles and small timber to some extent.

The hills in the south-east corner of the Bowringpet taluk are covered with a profuse but small growth of various common fuel trees, among which tamarind, are not uncommon. In the Chik Ballapur taluk, the babul and topal (*acacia leucophlœa*) grow freely, and near Nandidrug there is much jalari (lac tree), chiefly in the west and south-west of the hill. The vegetation up to the fort walls is frequently dense but of no size. Acacias are also common in groves in Kolar, Mulbagal, Sidlaghatta and Srinivaspur.

In the Malur taluk, there are fewer trees, and the uncultivated plains are covered with the ordinary scrub, mixed with euphorbias, which are also common in the Kolar taluk. Many villages in parts of this District are surrounded with stout and high hedges, in which banyans and bhair (*zizyphus jujuba*) trees are common and well grown.

Cocconut trees are principally cultivated in the Mulbagal and Goribidnur taluks and areca in the latter.

Arboriculture

The planting of avenues along the public roads and of village topes has been successfully carried out. Plantations in the District cover an area of about 18 square miles.

Crops

The cultivated products are similar to those of the Bangalore District, but owing to the large number of tanks, there is a greater proportion of wet and garden cultivation. Potatoes are extensively cultivated in the rich valleys of Chik-Ballapur and Sidlaghatta taluks. Mulberry cultivation is prevalent in the Chik-Ballapur, Sidlaghatta and Kolar taluks.

The number of acres cultivated with rice in 1922-23 was 36,446, Cholum or Jawar 2,541, Cambu 1197, Ragi 267,834,

Maize 190, Horse-gram 45 414, Bongal gram 113, Copra 2,405, Togari 14 508, other food grains and pulses 55,160 oil seeds 30 938, Condiments and spices 9,310 Sugar-cane 6,616 Tobacco 2,207, Betel leaves 1 840, fodder crops 9 730 Mango 875 Potatoes 781, Araca nut 636 and Mulberry 4 432

The kinds of rice grown in the District are dodda baira gidda baira dōdda kembatti sanna kembatti arasina kembatti, gutti sanna, bili sanna, sukadas, punagaraj, yalakki bhatta, putta bhatta, toka nellu kari toka nellu and gand basale

FAUNA

Owing to the absence of large forests, there is not much Wild cover for wild beasts Bears, cheetas and wild dogs inhabit animals the Nandidrug hill ranges In the unfrequented parts of the District with some forest growth, hyenas jackals antelopes porcupines and hares are found The mungoose and other small animals find protection in the thick hedges around villages

The wild birds are similar to those of Bangalore District Birds. A large kind of vulture takes shelter and breeds on the almost inaccessible top of Worlakonda, a large hill between Peresandra and Gudibanda

Fish are stated to be not so plentiful as the number of Fish. streams and tanks would lead one to expect, but large fish are found in the Bētamangala and Rāmasāgara tanks.

The indigenous hulls of the District are of a diminutive Domestic breed Large-sized ones are imported by raiyats from the animals woodlands and jungles on the Madras frontier, and reared either for local use or for sale at places below the Ghats Buffaloes are generally met with throughout the District as well as sheep and goats Gumūyakanapalya is noted for a superior breed of sheep, sold at moderate prices

CLIMATE AND RAINFALL

Climate

The climate is practically similar to that of the Bangalore District; by comparing the temperature records of the observatories at Gold Fields and Bangalore, it is found that Kolar is a little warmer than Bangalore on account of its lower elevation. The average annual rainfall of this District is $2\frac{3}{4}$ inches less than that of Bangalore. This is probably due to the influence of the mountain ranges between this and the Bangalore District, which intercept the moisture-laden clouds during the South-west Monsoon. The relative humidity varies from 45 per cent in March to 74 per cent in November.

Temperature

April and May are the warmest months of the year, the mean maximum temperature for these months being 93.5. The thermometer rose as high as 100.2 on the 8th May 1920. The coldest months of the year are January and December and the mean minimum temperature for these months is respectively 58.8 and 59.0. The lowest temperature on record is 51.0 registered on the 1st February 1923.

The following table gives the mean values of the meteorological elements obtained at the Kolar Gold Field Observatory -

Month	Pressure in inches read to 32 F	Temperature in degrees Fahrenheit				Humidity	
		Maximum	Minimum	Mean	Range	Vapour pressure in inches	Relative humidity per cent
1	2	3	4	5	6	7	8
January	27.113	78.4	58.8	68.6	19.6	431	66

The mean annual rainfall for the District is 28.21 inches distributed over 45 days. As in Bangalore, good showers may be expected from August to September, occasionally, heavy falls occur in November also. The driest part of the year extends from December to March when only 1.21 inches of rain falls in a normal year. The annual aggregate comes up to 30 inches or a little more only in the taluks of Chik Ballapur and Bowringpet. In parts of the Bagepalli and Chintamani taluks, the annual average is as low as 22 inches. The heaviest fall for a single day was 11.50 inches recorded at Narasapur in the Malur taluk on the 10th November 1903. Since 1893 the annual total was over 90 per cent short of the average only in two years and the deficit was over 15 per cent in eight years. The following table gives the normal monthly and annual rainfall of the rain gauge stations in the District. The number of years for which the means are found is also shown

Rainfall at
Kolar.

During the past 55 years, the annual total was over 40 inches in three years and the wettest year on record is 1903 when the annual rainfall was as much as 46 29 inches. The yearly aggregate was less than 20 inches in nine years, of which the worst were 1875 and 1876 with totals as low as 13·79 and 12 49 inches respectively. The rainfall fell short of the normal in a little over half the number of years since 1870.

The table below gives the actual rainfall at Kolar from 1870 to 1924 —

Year	Inches	Year	Inches
1870	21 87	1898	34 95
1871	26 58	1899	20 29
1872	26 59	1900	24 30
1873	15 02	1901	22 71
1874	35 78	1902	25 76
1875	13 79	1903	46 29
1876	12 49	1904	17 23
1877	33 63	1905	17 37

1895	30 62	1923	17 34
1896	24 19	1924	28 48
1897	24 79		

THE PEOPLE

Population.

The total population as per Census of 1921 was 792,339 (including the Kolar Gold Fields), of which 404,961 were males and 387,378 females

Density

There are 223 persons to the square mile as per 1921 Census figures. The taluks mostly thickly peopled are Kolar, with

357 to the square mile, Malur with 251 and Gornbidnur with 273. Next follow Chik Ballapur with 235 and Sidlaghatta with 236. The lowest is Bogepalli with only 163 to the square mile.

Classified according to religious belief, the following are the numbers and percentage under each head —

By religion

Religion	Above 15		Under 10		Total	Percentage
	Males	Females	Males	Females		
Hindus	213,602	202,306	114,314	117,842	648,214	91.49
Mahomedans	18,011	13,745	10,008	10,008	48,900	6.94
Jains	916	843	508	494	2,761	.39
Christians	639	611	450	500	2,200	.31
Animists	784	751	451	505	2,491	.35
Total	231,012	217,766	126,461	129,207	704,650	

The following table compares the statistics of the population by taluks during the last 50 years in the Census periods commencing from 1871 to 1921 —

Inter-censal variations.

Taluk	1871	1881	1891	1901	1911	1921
Kolar	99,965	56,077	72,628	75,648	80,091	86,781
Mulbagal	65,533	60,102	56,033	60,899	68,556	67,103
Srinivaspur	56,246	39,061	47,503	58,812	64,170	62,674
Chintamani	60,079	39,370	47,677	97,144	60,077	64,109
Sidlaghatta	71,388	49,761	59,54	70,022	70,895	67,034
Bogepalli	48,587	38,576	43,027	49,142	54,090	55,562
Gudibanda	17,793	12,446	14,160	16,479	17,739	17,390
Gornbidnur	76,400	58,670	71,990	83,296	90,516	93,076
Chikballapur	59,273	41,450	61,592	56,037	56,753	58,089
Malur	58,976	44,545	54,180	61,908	68,831	67,650
Bowringpet	62,595	51,232	46,871	57,310	61,078	63,012
Total	640,837	481,101	567,002	662,726	696,410	704,657

Some of the variations are due to re-distribution of taluks and to changes in the limits of the District. The famine of

1877-78 sent down the total to 25·6 per cent by 1881 but it had risen again by 17·8 per cent and 35·6 per cent in 1881-91 and 1891-1901 respectively on account of the favourable character, on the whole, of successive years and the improvement in the economic condition of the people. During the decade ending 1911, though there was an increase in the population, the rate of increase was much smaller, being only 7·8 per cent, due to frequent visitations of plague in most parts of the District. The percentage of increase during this decade, however, was above the average (1·8) for the whole State, and in this respect, the District stood third after Chitaldrug and Tumkur District.

The increase during the last decade was only 1·1 per cent.

Towns
Villages and
Towns

The District contains 11 towns with a total population of 58,127, of which 43,451 are Hindus, 13,257 Mahomedans, 1,165 Christians, 234 Jains and 20 others. The following are the Municipal towns (all being taluk or sub-taluk Headquarters) with their population.—

Kolar town	13,368	Sidlaghatta	3,697
Chik-Ballapur	10,431	Srinivasapur	3,119
Chintamani	6,161	Gudibanda	2,450
Bowringpet	5,893	Goribidnur	1,842
Mulbagal	5,671	Bagepalli	1,716
Malur	3,779		

The following table gives details of villages by taluks

Taluk	Number of hoblis in the taluk	Number of villages
Kolar	6	371
Mulbagal	5	351
Srinivasapur	6	341
Chintamani	7	341
Sidlaghatta	5	256
Bagepalli	5	221
Goribidnur (Sub Taluk)	2	118
Gudibanda	6	268
Chik Ballapur	4	209
Malur	5	378
Bowringpet	1	411
Total	55	3,426

The quinquennial return for 1921 shows that there were Stock
in the District 477,659 oxen, 112,280 buffaloes, 728,263 sheep
and goats 7,102 pigs, 2 556 horses and ponies, 14 mules
11 913 donkeys 91 289 ploughs of which 93 593 of old pattern
and 694 of new pattern and 29 608 carts

According to the Census of 1921, there were 138,740 occupied Dwellings
houses in the District of which 12,007 were in towns and
126,733 in villages. Houses of a superior class are found in
large numbers in the taluka of Chik Ballapur, Sidlaghatta
Bowringpet, Kolar and Chintamani

The following religious festivals are the most numerouslly Festivals
attended in the District — etc

Name of place	Name of Jatra	Time	Attendance at the Jatra
Kolar			
Vokkaluri	Mārkaṇḍēvara Car Festival	New moon in Magha	10 000
Vanarasi	Iralappan Festival	April	25 000
Mulbagal.			
Avani	Rāmalingasvāmi Festival.	Magha	20 000
Yekdur	Kōṇḍandarāmasvāmi Jātra	Chaitra	10 000
Chintamani.			
Ronur	Venkataramanasvāmi rathōtsava	Asvādha	4 000
Chik Ballapur			
Nandi	Nandisvara rathōtsava	Magha	30 000
Bowringpet	Kōṇḍandarāmasvāmi Car Festival.	Valakha	2,000
Sidlaghatta			
Melur	Gangadēvi Jātra	Chaitra	10,000
Malur			
Thirupati	Venkataramanasvāmi Festival	April	2 000
Bagepalli			
Devaragudi	Gadadam Venkataramanasvāmi Jātra		25,000
palli.	Venkataramanasvāmi Jātra.		5 000
Talakallikonda			

Besides the above, there are also *jātras* of minor importance. These afford an occasion for the collection of cattle for sale. The trade in bullocks in these gatherings is generally brisk and attracts purchasers from different parts of the Madras Presidency, such as the districts of Chinglepet, North Arcot, South Arcot, Trichinopoly and Tanjore.

Vital
Statistics.

The following are particulars of the number of births and deaths registered in the District during the past 3 years from 1921-22 to 1923-24 —

Year	Births	Deaths
1921-22	11,952	11,342
1922-23	12,255	11,930
1923-24	13,071	10,148
1924-25	11,300	11,177

The most prevalent causes of mortality are indicated in the following statement for the same period —

Year	Cholera	Plague
1921-22	9	328
1922-23	21	1,590
1923-24	52	758
1924-25	60	99

CASTES AND OCCUPATION.

Castes

The castes or classes which number over 10,000 are the following in order of strength. These account for 663,833 or 83.71 per cent of the population —

Vokkaliga	. 1,85,512	Brahman	26,432
Holeyā	1,02,411	Agasā	13,794
Beda	. 61,513	Vaisya	12,169
Mahomedan	56,175	Tigala	11,914
Madiga	53,955	Langayēt	11,345
Banajiga	.. 46,400	Panchala	11,591
Kumbara	. 40,376	Nayinda	10,713
Wodda	.. 33,327		

According to occupation or means of livelihood, the population is distributed as follows —

1	Exploitation of earth	1,31,017
2	Extraction of minerals	216
3	Industrial occupation	13,998
4	Transport	1,177
5	Trade	10,360
6	Public force	1,698
7	Public Administration	3,916
8	Professions and liberal arts	3,289
9	Persons living on their income	416
10	Domestic service	1,567
11	In sufficiently described occupations	189
12	Unproductive	9,916

CHRISTIAN MISSIONS

Champion Reefs (Kolar Gold Fields) is a head station of the Roman Catholic Mission. There are sub-stations at several camps in the Gold Fields and Gancunta. Churches and Chapels number 12. The Mission maintains 4 Boys' Schools with 226 pupils, one Girls' School with 32 pupils and the St. Joseph's Convent English Girls' School with 260 pupils. Chik Ballapur is another head station in the District with sub-stations at Karhalli, Devanahalli etc. There are 4 Churches or Chapels. Suscipaham near Chik Ballapur is an Agricultural Farm with a settlement of new converts.

The Roman Catholic Mission

The Wesleyan Mission maintains work only on the Kolar Gold Fields where it has two English and two Tamil Churches. There are five Tamil Boys' Schools with 650 scholars.

The Wesleyan Mission

The London Mission in this District maintains a Girls' Primary School in Malur with a roll of 93 and a Girls' Primary School in Manohanahalli in the Gornahidnur taluk with a roll of 90. In Chik Ballapur there is a Mission Panohama School with 62 boys on the rolls.

The London Mission.

SECTION II — HISTORY AND ARCHÆOLOGY

A HISTORY

Legendary
Period

On tracing back the history of the District, the usual legends are encountered. These are associated principally with Āvanī in the Mulbagal Taluk, which is identified with Avantika-kshētra, one of the ten chief sacred places in India. Here Vālmīkī, the author of the *Rāmāyana*, it is said, lived, and here Rāma remained for some time on his way back to Ayōdhya after the conquest of Lanka. Here, too, Sīta retired on being rejected by her husband, and, under the protection of the sage Vālmīkī, gave birth to her twin sons Kusa and Lava, to whom he became the preceptor.

The hills to the west of Kolar, called the *Satasīnga parvata* or hundred peaked mountains, are also made the scene of the story of Rēnuka and Parasu-Rāma, and there the latter is said to have revenged upon Kārtavīryārjuna the murderer of his father Jāmadagni, committed in order to obtain possession of Surabhi, the cow of plenty. The *lōlāhala* or “shouting” consequent on this feat is represented to have given the town its name since shortened into Kolar.

At both places the Pāndavas are stated to have lived in the course of their wanderings. Kaivāra is said to be Ēka-chakrapura, and Sādali is said to have been founded by Sahadēva, the youngest of the brothers. At Kūdumale the gods are said to have mustered their forces previous to assaulting the mythical city of Tripura.

Mahāvalis

From inscriptions it may be gathered that the Mahāvali or Bāna kings were in possession of the country east of the Pālār river early in the Christian era. Traces of them are found throughout the Mulbagal and Chintamani taluks, as well as in the Bowringpet taluk. The Bānas lost their independence at the end of the 9th century A D, when they were uprooted by the Chōlas.

Gangas.

In about the second century, the Gangas either founded or

became masters of Kolar from which as long as their dynasty was in power or for nearly a thousand years they took the title *Kuralāla pūrarāśvara*. The narrative of their migration to this place is given in Vol II, *Historical*. But as there stated among the Kalinga Ganga inscriptions one of 1118, from Vizagapatani contains a very full and circumstantial account connected with Kolar. According to it, Gangēya, the progenitor of the line was succeeded by the following eighteen kings —

Virochana	Kaurānga	Jayasēna (II)
Samvedya	Chitrāmbara	Jitasūrya
Samvedin.	Hārādhrāja	Viśvadhvrāja
Dattasēna	Dharma (Dharmela)	Pragalbha (Pragarbha)
Sōma	Parīkshīt	Kōlāhala
Amśudatta	Jayasēna	Virochana (II)

Kōlāhala, the last but one of these it says built the city named Kōlāhala in the great Gangavadi viśhaya. After eighty kings (not named) in succession to Virochana (II), had enjoyed the city of Kōlāhala there arose Virasimha who had five sons Kamarnava Danarnava Gunarnava Marasimha and Vajrahasta. The first of these giving over his own territory to his paternal uncle (not named) set out with his brothers to Kalinga, where he founded a new Ganga dynasty. As grants have lately been discovered in the names of some of these kings, it may be well to give the list with the number of years each is said to have ruled (See *E I IV*, 186)

Kāmārnava I	36	Jitānkusa	15	Gundama II	3
Dānārnava	40	Kaligalānkusa	12	Madhu Kāmārnava	
Kāmārnava II	50	Gundama I	7	VI	10
Kanārnava	5	Kāmārnava IV	3	Vajrahasta V	30
				(crowned in 1038)	
Vajrahasta II	15	Vinayāditya	3	Rājārāja	8
Kāmārnava III	10	Vajrahasta IV	33	Chōla Ganga (Crowned in 1073.)	
Gunārnava	27	Kāmārnava V	1		

Instead of Jitankusa and the following name two grants have Vajrahasta III (40 or 44) while Gundama is said to have ruled three years, and Kāmārnava IV, 35 years. Vajrahasta V is also given 33 years.

Whatever truth there may be in this account, it is undoubted that the Gangas of Mysore came into conflict with the Bānas from the first, and occupied nearly all the District down to the eleventh century

Pallavas

Their principal rivals in the east, however, were the Pallavas of Kānchi, who in general ruled over the tracts east of a line from about Gōribīdnur, through Nandi, to Āvanī and Hunkunda. The Gangaru Thousand was an important province in this region.

Vaidumbas

Of Vaidumbas occasional inscriptions are found in Chintāmanī and Bagepalli taluks. The Chōla kings, Pārantaka and Vīra-Rājēndra, subdued the Vaidumba kings in the 10th and 11th centuries.

Chōlas

There is a traditional account of the foundation of Kolar to the following effect. A herdsman named Kōla discovered a hidden treasure, which the king Uttama Chōla hearing of, sent for him to Kānchi the capital, and being warned in a vision by Rēnuka in the form of Kōlāhāmma, erected a temple in her honour, founded the city of Kōlāhala, and invested Kola with the government. The name is with equal probability derived from *Kōlahala* or Kōla's plough, the implement which turned up the treasure. Be this as it may, the *hōblis* of Yerkalve, Mulbagal, Murgamale, and Betamangala were annexed to the new settlement, in the enjoyment of which Kōla and his descendants continued under the Chōla dynasty. Of that line, Vīra-Chōla, Vikarma-Chōla, and Rāja-Narēndra-Chōla are stated to have erected *shāsanas* at Sītibetta, Āvanī, Mulbagal, and other places in the vicinity.

This tradition is evidently based on some confused reminiscence of certain names and historical events. From the records of the period, we know that the Chōlas first under Rājarāja and then under Rājēndra-Chōla, subverted the power of the Gangas by the capture of Talkād in about 1004, and speedily possessed themselves of all the south and east

of Mysore The important city of Kōlahala, or Kolar, thus became subject to them, together with the whole of the present Kolar District In accordance with their usual system they gave the name of Nīkarīhōla mandala to the District and formed it into sub-divisions of which Jayamkondachōla valanād was towards the south At a later period, we find a family of Chōla-Gangas ruling over the parts around Kolar of whom, in the thirteenth century, we have the names of Uttama-Chōla Ganga, Vikrama Chōla-Ganga and others

But before this or in about 1117 the Hoysalas under Hoysalas. Vishnovardhana captured Talkād, and drove out the Chōlas from Mysore Kōlahala is specially mentioned among the conquests of these kings, and the lower Ghat of Nangali is specified as the eastern boundary of this kingdom On the death of Sōmēśvara in 1254 a partition of the Hoysala dominions took place between his two sons, and the Kolar District was included in the Tamil provinces, which fell to the share of Rāmanatha In the next reign the kingdom was again united under Ballala III but the ancestral capital of Dōrasamudra or Halebid having been destroyed by the Mussalman invaders in 1326 we find him residing among other places at Hosavīdu (the now capital) identified by Mr Rice with Hosur in Goribidnur taluk

The empire of Vijayanagar was founded in the fourteenth Vijayanagar century and Bukka Raya I made the place, called Hosapatana, his residence for a time, and it may have been then the eastern boundary of the kingdom. Under Dēva Raya it appears that Mulbagal was the principal place in the District and in the fifteenth century we find two brothers, Lakhanna Danāyaka and Mādanna Danayaka as the Heggade Dēvas or chiefs who were governing there as representatives of the supreme power

But we may now revert to the annals of the principal modern local rulers

Timme Gauda —The history of the Bangalore District has Modern Local Rulers.

already been introduced up to Baire Gauda and the band of refugees of the Morasu Vokkal tribe, who, escaping from Kānchi, settled at Āvatī in the Devanhalli taluk. On their agreeing to separate, Timme Gauda, one of the seven, took up his abode at Sugatur, near Jangamkote. This was about the year 1418. Another Sugatur near Kolar lays claim to the place, but apparently without foundation.

Soon afterwards Timme Gauda repaired to the Vijayanagar court, and having ingratiated himself with the authorities, returned with the title of *Nād Prabhu*, or Lord of the Sugatur Nād. In course of time, he discovered a hidden treasure, which, as it was in a tract claimed by Yerra Ganga and Challava Ganga, two men of the Yerralu tribe, (a wandering tribe identical with or closely related to the Korachar, but known in Coorg as Servas), he did not disturb, but resorted again to court, where he received the command of a small body of men. While thus employed, he had an opportunity of rendering signal service by rescuing some members of the royal family who had fallen into the hands of the Mughals. (Another account says of the Palegār of Chinglepet). For this gallant act, he was rewarded with the title of *Chikka Rāya*, and soon after returned with royal permission to appropriate the treasure he had discovered and with extended authority. He accordingly repaired the fort of Kolar, built Hoskote (the new fort), and possessed himself of Mulbagal, Punganur and the adjacent parts, turning out the descendants of Lankhana and Mādanna. To Kolar he added the *hōblis* of Vemgal, Bail Sugatur, Kaivara, Buradagunte, and Budikote. At this period, some Lingayet traders, headed by Chikkanna Setti and Kalasanna Setti, leaving the Bijāpur country on account of troubles there, placed themselves under the protection of Chikka Rāya. Timme Gauda, who with wise policy appointed the former as Patna Setti of Kolar and the latter of Hoskote, thus attracting merchants and settlers to these two towns. He further favoured the same sect by erecting Jangamkote for their *jangama* or priest.

Immadi (or the second) Chikka Rāya Timme Gauda succeeded. On his death, he divided the territory between his two sons. To Mimmadi (or the third) Chikka Raya Timme Gauda he granted Hoskote and Kolar to Timme Gauda. The latter ruled for five years under the name of Sugatur Timme Gauda and was succeeded by his son Timme Gauda who in turn was followed by his son Chikka Rāya Timme Gauda.

In the middle of the sixteenth century the District appears to have been in a disturbed state owing to the incursions of some robber chiefs, until it was subdued by the Bijapur army and placed under the governorship of Shahji in 1639. The latter bestowed the Punganur district upon Chikka Raya Timme Gauda in place of Kolar the charge of which he committed to his own son Sambhaji. Of his time there are several inscriptions in the District dating from 1653 to 1680. In Kolar 219 dated in 1663, he makes a grant for the restoration of the Holur tank. Chikballapur 32 dated in 1680 mentions the beating of a Muhammadan raid on Nandi hill and its occupation by the Mahrattas. On the death of Sambhaji, his son Soorut Singh managed Kolar and subsequently it formed part of the territories of Venkōji or Eoōji.

Bijapur
incursions
Shahji and
his successor

During Soorut Singh's government the Mughal army under Khāsim Khan conquered this part of the district which was thenceforward attached to the Province of Sira for 70 years during part of which time Fatto Muhammad father of Haider Ali was Faujdar with Budikote as his *jāgir*.

Mughal
conquest
1689

The District next passed into the hands of the Mahrattas of the Nawab of Cuddapah and then of Basalat Jang, chief of Adōni and brother of the Nizam. Kolar and Hoskote were ceded by the last named in 1761 to Haider Ali who regarded Kolar with peculiar interest as being the country of his birth place and connected with his family. Mulbagal

Later
History

and Kolar were taken for a time by the British in 1768. In 1770 the Mahrāttas under Mādhu Rao again seized the district, but it was recovered by Haider. In 1791 it was a second time taken by the British under Lord Cornwallis, but restored at the peace of 1792, since when it has been incorporated with the State of Mysore.

Malla Baire
Gauda

The history of the north-western part of the District carried us back again to the band of exiles at Āvati. Their leader Baire Gauda had three sons, the youngest of whom, Malla Baire Gauda, we have seen, in connection with the Bangalore district, providing for his eldest brother Saana Baire Gauda by founding Dēvanhalli, and for the second brother Havali Baire Gauda by founding Dodballapur. Having accomplished these undertakings, Malla Baire Gauda, about the year 1478, when on a visit to the ancient temple of Vārada-rājasvāmī at Kandavara, went out hunting northwards along the tank bank with his son Māre Gauda. As they approached Kodī Manchanhalli, the site of the present Chik-Ballapur, they were surprised to see a hare turn upon the hounds. As this indicated heroic virtue in the soil, it was resolved to erect there a fort and *petta*, for which the consent of the Vijayanagar sovereign was obtained. Chik-Ballapur was accordingly founded, and long remained in the possession of Māre Gauda and his descendants, who extended the territory by the purchase of Sidlaghatta and strengthened themselves by fortifying Nandidrug, Kalvaradrug, Gudibanda and Itikaldrug. The annals of this House are given elsewhere.

Chik-Ballapur, which was assisted by Morārī Rao, the chief of Gooty, was exposed to the rival contests of the Mahrattas and the Mysoreans until taken in 1762 by Haider Ali, who carried the chief as a captive to Bangalore, and subsequently removed him to Coimbatore. The family were kept prisoners there until released by the British army and reinstated by Lord Cornwallis in 1791, but on peace being made with Tipu Sultān, they were again forced into exile, and the district was included in the territory of Mysore.

B, ARCHAEOLOGY

The inscriptions found in this District are included in *E C V Kolar District* and in the *Mysore Archaeological Reports*, 1901-26

The most important building in the District architecturally, is the Nandisvara temple at Nandi. It contains a *mantapa* of black stone with some very ornamental carving. The original temple was older than the 9th century (See *Chikballapur* 26). But the numerous inscriptions at and on the building show that it was extended in the Chōla and Hoysala period in the 11th and 12th centuries. The god is called Bhōga Nandisvara in distinction from the Yōga Nandisvara on the top of the Nandi hill, which is connected with it and to which a Chōla officer gave a gold plate in 1049 (*Chikballapur* 21). A similar gift was made for the Bhōga Nandisvara in 1092 by another person (*Chikballapur* 24). From *Chikballapur* 29, it may be conjectured that they were originally perhaps Jain temples.

The other building of most interest, though of ordinary construction, is the Kōlaramma temple at Kolar. This was a local deity called in the Tamil inscriptions *Pidāriyār*, and the Chōla kings on their conquest of Kolar evidently attached great importance to patronising it. The former brick walls of the temple were rebuilt in stone by their orders in 1033 (*Kolar* 109a). Under the entrance is a pit full of scorpions, which can be heard to hiss when disturbed. A silver scorpion is the orthodox offering to the goddess. The entire walls are covered with inscriptions, nearly all in Tamil. The Sōmēsvara temple is a finer building but more modern of the Vijayanagar period.

The group of temples at Āvanī are also of interest, and their walls are likewise covered with Tamil inscriptions. They are separately dedicated to Rāma Lakshmana Bharata, Satrugna, Vali, and Sugriva.

Of Muhammadan buildings the best is the tomb of a Bijāpur noble at Hire-Bidnur, near Goribidnur, of the 17th

century There is also the *Imambāra*, the mausoleum of Haidar Ali's father, at Kolar

SECTION III - ECONOMIC

GENERAL AGRICULTURAL CONDITIONS

The rainfall in the District is liable to considerable fluctuation It is often meagre and unseasonable, and years of anxiety both to Government and people are not of uncommon occurrence

In years of good rainfall, when the agricultural prospects are favourable, there is generally a large number of applications for lands for cultivation, and in years when the conditions are otherwise, a large number of relinquishments are made

The soil in the valleys is a good and loamy mixture, formed of the finer particles of the decomposed rocks, washed down and deposited during the rains On the first ascent from the valley, the soil is of a middling quality, suited for dry grains, and is a mixture of loam, sand and oxide of iron, with a portion of vegetable and animal matter Higher up towards the top of the ridge, a silicious sand prevails in the soil, which is on that account adapted only for horse-gram

CHIEF AGRICULTURAL STATISTICS AND PRINCIPAL CROPS

The following table gives detailed information for the three years from 1921-22 to 1923-24 regarding the extent of land that was available for cultivation in the District, the extent actually cultivated and other particulars —

Year	Area of the District	Area available for cultivation	Culti- vate waste not in occu- pancy	Culti- vate area under occu- pancy	Current fallow	Net area cropped
1921-22	18,14,417	7,98,406	1,33,645	6,64,761	1,64,736	5,00,025
1922-23	18,14,417	7,95,249	1,21,102	6,74,147	1,69,345	5,04,882
1923-24	18,13,341	7,90,875	1,14,691	6,76,184	1,91,043	4,85,141
	18,12,529	8,31,694	1,07,687	7,24,007	1,90,392	5,33,615

The following table furnishes information regarding the different crops that were raised during the three years from 1921-22 —

Nature of the crop	1921-22	1922-23	1923-24	1924-25
Food grain	4,21,031	4,23,402	4,05,023	433,216
Oil seed	27,690	30,024	25,240	53,760
Condiments and pulses	7,031	9,310	7,611	10,118
Sugar-cane	7,705	6,616	7,515	5,550
Fibres		1		115
Dyes	341	20	170	
Drugs and narcotics	3,666	4,184	3,172	3,467
Miscellaneous crops	34,742	19,079	25,747	33,123
Total area cropped	510,355	509,624	457,400	591,384
Area cropped more than once	16,36	8,233	2,0	37,769
Net area cropped	526,715	517,857	459,400	629,153

The following table shows the number and extent of different Holdings under cultivation in the District during 1921-22 and 1922-23 —

Year	Holdings not exceeding one acre in extent		Holdings exceeding one acre but not exceeding five acres		Holdings exceeding five acres but not ten	
	No.	Extent	No.	Extent	No.	Extent
1	2	3	4	5	6	7
1921-22	27,485	4,233	70,905	178,217	23,345	161,397
1922-23	24,093	4,484	78,740	184,772	23,376	168,376
1923-24	26,560	25,605	76,777	181,174	22,450	151,877
1924-25	26,870	24,484	74,417	193,671	22,406	160,705

Year	Holdings exceeding 10 but not 50		Above 50 and not exceeding 100		Above 100 and not exceeding 500		Above 500	
	No.	Extent	No.	Extent	No.	Extent	No.	Extent
	8	9	10	11	12	13	14	15
1921-22	13,071	212,990	1,280	50,974	65	17,825	4	2,512
1922-23	13,087	213,401	1,276	58,569	65	12,004	4	2,512
1923-24	12,221	205,080	1,051	61,797	60	11,239	4	2,513
1924-25	12,009	191,313	1,270	67,679	55	10,765	4	2,513

The following table shows the number of holders classified according to the amount of revenue paid during 1921-22 and 1922-23 —

Year	Holders paying Assessment or jodi of Rs five and under		Holders paying Rs five but not exceeding Rs 25	
	No	Amount paid	No	Amount paid
1	2	3	4	5
1921-22	64 513	166,848	60,227	626,714
1922-23	65,720	167,230	61,568	650,195
1923-24	65,702	159,937	58,661	673 612
1924-25	64,388	287,052	62,458	634,705

Year	Holders paying Rs 25 but not exceeding Rs 10		Holders paying Rs 100 but not exceeding Rs 500		Holders paying above Rs 500	
	No	Amount paid	No	Amount paid	No	Amount paid
	6	7	8	9	10	11
1921-22	12,790	418,422	889	117,422	26	17,990
1922-23	12,984	416,542	911	117,823	26	17,990
1923-24	13,474	419,540	911	117,994	26	17,990
1924-25	13,416	428,861	737	119,388	28	16,660

AGRICULTURAL LOANS

The following statement shows the different kinds of loans granted in the District during the years 1922-23 and 1923-24

Year	Takavi		Land Improvement		Irrigation works	
	Amount sanctioned	Amount disbursed	Amount sanctioned	Amount disbursed	Amount sanctioned	Amount disbursed

IRRIGATION

The District is remarkable for its facilities for the construction of tanks, such facilities have been successfully utilized, with the result that the tank system of this District is the most fully developed in the State

The water of the Palar river which runs through the central and eastern parts of the District has been intercepted to construct a series of tanks—one above the other and a few miles apart from one another—known as the Palar series on which the District is mainly dependent for its irrigation

The Sōmāmbudhi Amanikere, Jannaghatta, Bethamangala and Ramasagara are the important tanks of the Palar series while the Kolar Amanikere, Nangali and Kurhur tanks are also indirectly connected with it

The drainage of the other rivers in the District such as North and South Pennar and Chitravati has also been utilised in a similar manner

The total number of major tanks or tanks that yield a revenue of Rs 300 and more is 568

The total number of minor tanks is 3,376

Minor Tanks.

The names of the more important tanks with a revenue of more than Rs. 5 000 as also the revenue under each are noted in the statement below —

Important Tanks.

Taluk	Name of tank	Revenue
Kolar	Sōmāmbudhi Amanikere	Rs. 5,241
Bowringpet	Rāmasāgara	6,220
Siddaghatta	Bhadrankere	7 282
Do	Rāmasamudra tank	5,813
Chikballapur	Sivasa Sāgara tank	7 400
Goribidnur	Watadahosahalli Amanikere	6,369
Gudibanda (Sub-Taluk)	Amāni Byrasāgara	6,473

River
Channels

There are only a few channels like those drawn from the North Pennār in the Goribidnur taluk, from Chitrāvati in the Bagepalli taluk, and from jungle streams, hallas, etc., in the taluks of Bowringpet, Mulbagal, Sidlaghatta, Malur, Srinivasapur and Chikballapur. They are very short in length and the total extent irrigated by them is 3,231 acres with an assessment of Rs 20,042.

Wells

Private wells constructed from takavi loans number 698 irrigating an extent of 501 acres nearly with an assessment of Rs 2,821

FORESTS

Sandal grows to a fair extent throughout the District. Tangadi, Bandarike, Barleria, Davadari are the most commonly occurring species, Beppale (*wrightia tinctoria*), *Butea Frondosa* and *Bassia latifolia* occur here and there. Near Nandi hills, much jalaru is found. In the plains, topes of mango, hippe and wild tamarind are frequent. Dindiga, Chennangi, Huluve, Thupie, Jali, Bevu and Bage may be mentioned among other things.

Several private casuarina plantations have sprung up in some of the taluks. Babul and toppal grow freely and the former is considered durable timber, being used for buildings and carts. The District is rich in honge trees (*pongamia glabra*), which grow more extensively here than in other parts of the State. They are most useful to the rayats, the leaves and flowers being excellent manure for rice-fields, and the seeds yielding oil for lamps, and the wood being used for fuel.

In recent years, an active policy has been pursued of bringing waste lands under special protection and promoting sylviculture under the direct control of the Forest Department, a policy productive of much benefit to a district known for its uncertain rainfall and frequently liable to droughts.

In seasons when owing to scanty rainfall, scarcity of fodder is felt, the concession of free grazing in the neighbouring State Forests is often applied for by the raiyats and given readily by Government

MINES AND QUARRIES

See under *Geology*

ARTS AND INDUSTRIES

The chief industries are gold mining, weaving the production of raw silk, silk thread and silk cloths jaggery, sugar oils and manufacture of jewellery, etc. Cotton cloths and coarse woollen blankets are made in various parts as well as the ordinary pottery of the country. Roofing and flooring tiles of the Mangalore pattern are manufactured at Kolar on a large scale and on a small scale at Mandikal in Chikballapur taluk

General

This industry is carried on wholly by European Companies formed and financed in England. It is carried on in one corner of the District viz., in a portion of the Bowringpet taluk, which has on account of this industry come to be designated as the 'Kolar Gold Fields'. Machinery worked by steam and electricity is used on an extensive scale the electric power being supplied by the Mysore Government out of the power generated at Sivasamudram. A daily average of 26,000 persons are being employed by the several Mining Companies

Gold mining industry

The industries that are carried on in the several taluks are briefly described below —

Industries in the several taluks.

Kolar Taluk.—Kambli weaving is confined to Kolar town, weaving of saris to Matrahalli, Sugatur hobli and the manufacture of checks and bed sheets to Yedahalli of Kolar hobli. Donegal pattern coating pieces manufactured at Kolar are also popular. Excepting weavers of cotton in Kolar and

weavers, of saries in Matrahalli others are engaged in the industry along with agriculture

Bowringpet Taluk — Good saries are woven in Sulikunte and kambles in Budikote

Malur Taluk — Weaving is carried on in the Malur kasba, Madivala, Lakkur, Tirupati, Masti and Sivarapatna as an independent profession with both fly-shuttle looms of the new pattern and ordinary looms of the old pattern

Mulbagal Taluk — Weaving of saries is confined to Tayalur of Mallinaikanahalli hobli and Tirumanahalli of Avani hobli and it is the only occupation in almost all cases

Srinvaspur Taluk — Cotton weaving and the making of *kambles* is being carried on. The industry is subsidiary to agriculture and is diffused throughout the taluk with a slight preponderance in the villages of Yeldur Hobli

Chintamani Taluk — Manufacture of saries and other cloths with silk and cotton borders is carried on in Chintamani Kanappalli and Timmasandra. The manufacturers are weavers by class. Cotton *duptries* and woollen *kambles* are also manufactured by them. Most of these own lands and attend to this work when they are free from agricultural pursuits

Sidlaghatta Taluk — Weaving of saries is the occupation of a considerable number of people, chiefly at Sidlaghatta, Nagamangala and Jangamkote, who carry on the work as their principal occupation. *Kambli* making is carried on in Sadali and Jangamkote hoblis as an independent profession

Chik-Ballapur Taluk — Weaving of saries is carried on in Varadahalli and Manchanbele, Sabbedhalli, Mailappanhalli and Kalavara mainly as an independent profession, *duptries* in Ramsandra, Hosur Gundlagurki, Varadahalli, Avalahalli and Maralkunte and *kambles* in Avalgurki. In both the latter cases, the industry is subsidiary to agriculture

Goribidnur Taluk — The Devāngas of Vedalveri weave *panches* and saries costing between Rs 10 and 25 and at Namagondla saries costing Rs 5 to 15 are manufactured. *Panches* are woven in Kenkere, Kacha-machanhalli, Minakangurki and Manchenahalli

Bagepalli Taluk —Weaving is not confined to any particular village and almost everyone engaged in the industry owns lands and attends to this work during non agricultural seasons

The silk industry is carried on by about 1,600 people chiefly in the taluks of Kolar, Sidlaghatta Chik Ballapur and Chintamani and to a smaller extent in Malur and Srirangapur taluks. The bulk of the industry is localized in the under mentioned localities

Kolar Taluk	{ Vengal Sugatur Holur
Sidlaghatta Taluk	{ Jangamkote Sidlaghatta
Chintamani Taluk	{ Kaivara Chintamani
Chik Ballapur Taluk	{ Nandi Chik Ballapur

The manufacture of raw silk and silk fabrics is financed partly by capital of the people engaged in the industry and partly by borrowing

With a view to expand sericulture, Government have granted several concessions for the cultivation of mulberry and the rearing of silk worms

A silk farm has been established at Kolar for the purpose of scientific improvement of the industry and the supply of disease-free eggs to rearers

At Sidlaghatta and Mothakapalli in the Mulbagal taluk a depôt has been established for the supply of disease free eggs to the rearers.

A silk reeling and twisting class has also been opened at Sidlaghatta

The manufacture of gold jewellery is carried on chiefly in Chintamani Kolar and other important towns by goldsmiths, who are generally in good circumstances, as the demand for their services is always steady

Stone-ware
idols

The manufacture of stone-ware idols at Sivarpatna is a relic of an old industry

Manufacture
of jaggory

Jaggory is manufactured in most parts of the District, sugar in the taluks of Mulbagal, Srinivasapur, Sidlaghatta and Goribidnur

Big Concerns

The more noteworthy industries carried on as single concerns in the District are noted below —

Tobacco Manufacturing Companies — There are two Cigarette manufacturing firms in Bowringpet, under the names “ Oriental Tobacco Manufacturing Company ” and “ South Indian Tobacco Manufacturing Company,” the former worked by steam and the latter by oil engine under different proprietors who have invested their own capital in the concerns Both are thriving well, but of late they are working under the stress of severe competition consequent on the establishment of the British-American Tobacco Company in Bangalore

Saw Mill — An electric saw mill owned by a private gentleman at Champion Reefs employs a daily average of 22 persons

Tanneries — There are two tanneries one at Kolar, the other at Chintamani

The following is a list of large industrial establishments in the District —

Name of Establishment	Class or Description of Industry	Average number of persons employed daily	Whether worked by mechanical power or hand power	Remarks
<i>Kolar</i>				
1 Kolar Tile Works	Manufacture of Tiles	20	Mechanical power	
<i>Robertsonpet</i>

Chikballapur	Chikballapur	Saturday	2,000
Thirupati	Malur	Do	1,500
Robertsonpet	Robertsonpet	Wednesday and Sunday	2,000

MEANS OF COMMUNICATION.

Railways

The M & S. M Railway, Bangalore Branch, runs through the south of the District. Ascending the Ghâts near Kuppam, in a north-west direction, it enters the Bowringpet taluk and keeps that course to the junction at Bowringpet, eleven miles from Kolar. Thence it continues due west through Malur taluk. The Gold Fields Railway runs for ten miles east and south from the Bowringpet junction to the Mysore Mines. The Bangalore-Guntakal Railway passes through the Goribidnur taluk from the south to north.

The Bangalore-Bowringpet Railway (two feet and six inches gauge) runs east and south in this District and contains stations at Chik-Ballapur, Gidnahalli, Sidlaghatta, Hunsenhalli, Chintamani, Doddanetta, Srinivasapur, Dalsanur, Jannaghatta, Kolar, Hudakula and Bowringpet.

Roads

The length of Provincial roads is $217\frac{1}{4}$ miles, maintained at an annual cost of Rs. 44,400. Of District roads there are $387\frac{1}{4}$ miles costing for upkeep Rs. 37,497 a year. The particulars regarding each class are given below —

PROVINCIAL ROADS.

Name of Road	Length in miles	Rate	Amount
1 Madras-Cannanore Road	43	Rs 150	Rs 6,450
2 Cuddapah road Railway feeder	9	275	
	$24\frac{1}{2}$	175	6,763

Accommoda-
tion for
travellers

Dāk Bungalows or Rest-houses for officials and travellers are situated at the stations named below where the class is shown to which each belongs —

First Class —Bowringpet, Kolar, Robertsonpet

Second Class —Chikballapur, Malur

Third Class —Bagepally, Chintamani, Dibburhalli,
Goribidur, Jangankote, Metumakalpalhi,
Mulbagal, Narsapur, Peresandra, Rayalpet,
Srinivasapur, Talagavara, Vemagal

Chattrams for the accommodation of Indian travellers are kept up by Government at Kolar, Bowringpet, Mulbagal and Malur.

FAMINES.

Famine in the sense given to it in the Famine Code was not declared in any part of the Kolar District during the last forty years. But distress prevailed in the District during the years, 1891-92, 1908-09, 1918-19 and 1923-24. During these years, the rainfall was scanty and there was great difficulty for drinking water and pasture. There was a thorough failure of crops. The distress of 1918-19 was keenly felt by the people partly on account of the scanty production of food grains and partly due to the effects of the great European War. The Government had to open grain Depôts, import Burma rice and commandeer food grains under the Defence of India Regulation. During the distress of 1923-24, there was scarcity of fodder and drinking water in parts of the District owing to the holding off of the rains. Government had to start a number of tank maintenance and restoration works in order to provide labour for certain classes of people. Large amounts were advanced as loans to riyats to sink irrigation wells. Takavi loans were sanctioned liberally to enable people to buy food grains and fodder. A very large number of drinking water wells were sunk, fodder depôts were opened and all State Forests were thrown open for grazing purposes. Gratuitous relief was also given in deserving cases. Taluk Board and Village Panchayet works were

also carried out to provide employment to the people. During these years of distress Government sanctioned remission of half the wet and garden assessment in the areas affected.

SECTION IV—ADMINISTRATIVE

DIVISIONS

Government in June 1922 directed the abolition of the Chintamani Sub Division which was formed in 1918 comprising the taluks of Chintamani, Sririvasapur and Sidlaghatta with head-quarters at Chintamani and the regrouping of the several Sub Divisions in the District as follows—

The taluks of Malur, Mulbagal, Sririvasapur and Chintamani forming the Malur Sub Division with head-quarters at Kolar and the taluks of Chik Ballapur, Goribidnur, Bagepalli (including Gudibanda) and Sidlaghatta forming the Chik Ballapur Sub-Division with head-quarters at Chik Ballapur. Kolar taluk is under the charge of the Treasury Assistant Commissioner, Kolar and the Howringpet taluk is under the direct charge of the Deputy Commissioner. The District contains the following taluks—

Taluk	Number of Panchs in the Taluk	Area in square miles	Number of villages	Population
1. Kolar	6	272.54	333	88,811
2. Howringpet	6	336.56	411	63,012
3. Chintamani	5	271.91	71	61,109
4. Sririvasapur	6	324.9	711	62,674
5. Mulbagal	5	326.95	351	67,163
6. Sidlaghatta	5	320.40	350	67,034
7. Chikballapur	4	240.85	260	58,680
8. Malur	5	266.55	381	67,650
9. Goribidnur	6	313.10	268	63,675
10. Bagepalli	—	—	375	72,061
11. Gudibanda	2	447.13	146	17,309
Total	57	3,179.00	3,573	7,20,050

JUDICIAL.

Civil Courts

There are three Munsiff's Courts in the District, *viz*, (1) Kolar Munsiff's Court, (2) Chik-Ballapur Munsiff's Court and (3) Kolar Gold Fields Munsiff's Court

Criminal Courts

There are also the following Criminal Courts in the District —

1 The District Magistrate, Kolar

2 First Class Magistrates —

(a) Assistant Commissioner and 1st Class Magistrate, Chikballapur Sub-Division

(b) Assistant Commissioner and 1st Class Magistrate, Malur Sub-Division, Kolar

(c) Assistant Commissioner and 1st Class Magistrate, Kolar Gold Fields

(d) Munsiff and 1st Class Magistrate, Kolar Gold Fields, Robertsonpet

(e) Treasury Assistant Commissioner and 1st Class Magistrate, Kolar

(f) Munsiff and 2nd Class Magistrate, Kolar

(g) Ten Amildars, 2nd and 3rd Class Magistrates

LAND REVENUE

The following table shows the demand, collection and balance under Land Revenue for the five years commencing from 1920-21 to 1924-25 —

Year	Total demand	Remission	Net recoverable demand	Actual collection	Balance	Percentage
1920-21	18,31,587	8,531	18,23,056	14,89,894	3,33,162	81.70
1921-22	17,37,316	7,831	17,29,485	15,05,899	1,03,586	83.4
1922-23	16,19,820	18,518	16,01,302	14,63,397	1,37,915	93.6
1923-24	16,20,599	3,095	15,83,648	13,20,925	2,62,723	83.0
1924-25	17,77,457	37,092	17,40,365	14,65,954	2,74,411	86.8

MISCELLANEOUS REVENUE.

The following statement shows the demand, collection and balance under Miscellaneous Revenue which consists of Mohatarfa, Supari cess and Salt during the five years from 1920-21 to 1924-25 —

Year	Demand	Collection	Balance
1920-21	25,321	19,603	5,518
1921-22	21,905	21,461	3,441
1922-23	24,111	22,315	1,760
1923-24	22,754	19,722	3,032
1924-25	23,549	19,094	3,615

LOCAL AND MUNICIPAL BOARDS

The administration of District Funds is carried on by District Funds.
 (1) The Kolar Gold Fields Sanitary Board specially constituted for the Gold Fields area and exercising control over an extent of 30 square miles, with a population of 87,682 and (2) "The Kolar District Board," exercising control over the remaining portion of the District comprising 10 Taluk Boards. The economic development of the District is now vested in these Boards and each of the Boards has three Committees viz., (i) Education, (ii) Agriculture and (iii) Industries and Commerce. Government subsidise these Boards for development work.

A statement showing the Receipts, and Expenditure of the Kolar Gold Fields Sanitary Board during 1918-19 to 1919-20 is given below —

Items	Receipts		
	1918-19	1919-20	1920-21

During 1920 21 there were 11 Municipalities in the District one at each of the Taluk Head-quarters. The Deputy Commissioner is the President of these Municipalities.

Municipal Board

The following table shows the receipts and expenditure of the Municipalities in the District for the three years commencing from 1918 19 —

Year	Receipts	Expenditure	Balance
	Rs.	Rs.	Rs.
1918-19	2,18 103	83,031	1,35 071
1919-20	2,41 895	1,33,573	1,08,322
1920-21	2,26 234	1 11,534	84 700

The following statement shows the names of the several Municipalities in the District, their area, population etc —

Municipalities

Municipalities	Area	Population	Receipts	Expenditure
			Rs.	Rs.
<i>Regulated Major</i>				
Kolar	1 000	17 368	31 513	33,508
Bowringpet	0 451	4 008	2,274	31 042
Mulbagal	1 222	5 671	5,287	4 755
Chintamani	1 17	6 161	40 03	23,551
Sidlaghatta	0 207	3 097	6 145	4 082
Chikballapur	2 000	10 431	19 070	23,854
<i>Regulated Minor</i>				
Malur	0 110	3,770	5 735	5 507
Srinivasapur	0 108	3 110	1 085	1 037
Goribidnur	0 073	1 842	3 103	3,070
Bagepalli	0 031	1 716	1 150	1,306
Gudlbanda	0 100	2 450	1 431	2,215

There were 122 Village Panchayets at the end of 1922 23 distributed as follows in the several Taluks of the District —

Village Panchayets

Taluk	Number of Panchayets	Taluk	Number of Panchayets
Kolar	20	Srinivasapur	9
Bowringpet	4	Sidlaghatta	8
Malur	11	Chikballapur	9
Mulbagal	9	Goribidnur	25
Chintamani	14	Bagepalli	13

POLICE AND JAILS.

Police

The District is divided into two circles under two Police Superintendents one for the Kolar Gold Fields together with the rest of the Bowringpet taluk with Head Office at Champion Reefs, and the other for the remaining portion of the District with Head Office at Kolar. Particulars of Head Stations, Sub-Stations, Out-posts, etc., are shown below. —

Stations and Officers	Kolar Circle No	Kolar Gold Fields Circle No	Total
Head Stations	19	5	24
Sub-Stations	24	5	29
Out-Posts	15	4	19
Officers	78	41	119
Men	437	277	713

The strength of the Police Force for the District consists of 11 Inspectors, 9 Sub-Inspectors, 13 Jamedars, 46 Daffedars, 10 Instructors and 424 Constables.

Lock-ups

The total number of Lock-ups in the District is 12, one at each taluk headquarter and one at the Champion Reefs. The District Lock-up at Kolar is under the charge of the District Medical Officer. The Amildar of Bagepalli, the Deputy Amildar of Gudibanda and the Assistant Surgeon at Chik-Ballapur are in charge of the lock-ups at these taluk head-quarter places respectively. The Sub-Registrars of the remaining taluks are in charge of the lock-ups at the taluk head-quarters.

EDUCATION.

Number of
schools and
scholars

There were 1,004 schools on the 30th June 1924 with a strength of 34,381. Of these schools, three were High Schools, 2 for boys and 1 for girls, 79 Middle Schools, 777 Primary Schools, 14 Special Schools both for boys and girls and 131 Village Indigenous Schools. Of the number of girls, 9 were in High School classes, 325 in Middle Schools, 6,013 in Primary Schools, 27 in Special Schools and 197 in Village Indigenous Schools. The average number of square miles

served by a school was 31 and the number of villages served 27 and the number of persons served was 701. A tabular statement showing the numbers and grades of the schools in the District together with their strength is noted below:

Area	3149 Sq. Miles		
Inhabited villages	2782		
Population	7,04,607	(Males	3,67,474
		(Females	3,47,183
Colleges	Nil		
		Boys	Girls
High Schools	3	402	9
Middle Schools	74	3,944	701
Primary School	777	21,810	6,013
Special School	14	475	27
Village Indigenous Schools	131	1,503	197
Total	1,001	27,810	6,551

Number of square miles served by a school	31
Number of villages served by a school	27
Number of persons served by a school	701

Besides the Deputy Director of Public Instruction, Inspectress, Assistant Inspectresses and the Assistant Inspector of Sankrit Education, who have their head-quarters at Bangalore and visit the District for inspection, there are six Inspecting officers entrusted with the inspection of schools in the District. A statement showing the numbers and grades of the several Inspecting officers in the District is noted below:—

Designation of the Inspecting Officers	Territorial Jurisdiction	Head-quarter	Kinds of schools under district control
District Inspector, Kolar	Revenue District of Kolar	Kolar	All Middle and Incomplete Middle Schools in the District
Assistant Inspector Srinivasapur	Srinivasapur and Mulbagal	Srinivasapur	Primary Schools in the Range.

Designation of the Inspecting Officer	Territorial jurisdiction	Head quarter	Kinds of Schools under direct control
Assistant Inspector, Sidlaghatta	Sidlaghatta,, Chintamani and Chikballapur	Sidlaghatta	Primary Schools in the Range
Assistant Inspector, Goribidnur	Goribidnur and Bagepalli	Goribidnur	Do
Assistant Inspector, Kolar	Kolar, Malur and Bowringpet	Kolar	Do
Assistant Inspector, Urdu Primary Schools	Kolar District	Kolar	Urdu Primary Schools in the Range
Assistant Inspectress of Kannada Girls' Schools	Kolar & Tumkur Districts	Kolar	Kannada Primary Schools for girls

MEDICAL

There are five Hospitals in the District distributed as follows —

Kolar 2, one maintained by Government and the other by the American Mission Methodist Society

Kolar Gold Fields 2, one maintained by Government and the other by the Mining Board

Chik-Ballapur 1, maintained by the London Missionary Society

Besides the Hospitals, there are 17 Local Fund Dispensaries and 11 Vaidya-sālas as shown in the statement appended —

Taluk	Vaidya salas	Local Fund Dispensaries
Kolar		1 Civil Hospital
Bowringpet	1 Sanganahalli	2 Female Dispensary
Malur	2 Budikote	3 Bowringpet
Mulbagal	3 Sivarapatna	4 Malur
	4 Masthi	5 Mulbagal
		6 Devarayasamudra
Srinivasapur	5 Royalpad	7 Srinivasapur
Chintamani	6 Iragampalli	8 Chintamani
		9 Chintamani Female Dispensary

	20. Chik Ballapur	29. Chik Ballapur Local Fund Disbursements
	21. Chik Ballapur	30. Chik Ballapur Local Fund Disbursements

During the year 1921 the number of Government Hospitals and Local Fund Dispensaries working in the district was 19, the total number of patients treated (both in-door and out-door) in them was 26,000 and the total expenditure incurred on them (including establishment medicine etc.) was Rs. 1,03,914.

VACCINATION

There are 14 vaccinators in the service of the Local Boards and 4 in the Municipal Boards. 13,187 persons were vaccinated during the year 1921-22.

The control over the Vaccination Department is exercised by the President of the District Board under advice by the Sanitary Commissioner.

SECTION V - GAZETTEER

Agalpuriki — Village in Chikballapur Taluk. Population 657. The Virabhadra temple here has a figure of Virabhadra about 4 feet high with the usual attributes—a sword, a shield, a bow and an arrow and the usual sheep-headed Daksha at the side. Near the Nandi in front is a prostrating figure with the label Bolavirayya at the side. To the right in the narayana stands a profusely ornamented figure about 4 feet high with folded hands which is said to represent one Settappa who built the temple. The south sluice of the Gopalakrishna

tank is a fine structure, being in the form of a *mantapa*, supported by 6 lofty pillars. The stone containing the old inscription *E C X*, *Chikballapur* 3 is at a considerable distance to the east of the tank, on the way from Ajjavara to Nayindhalli. The inscription is on the back. The front has an apparently modern figure, about $1\frac{1}{2}$ feet high, of Mahīshasurāmardini, standing on the head of a buffalo with 4 hands, the upper two holding a discus and a conch, the left lower place on the waist and the right lower either in the *abhaya* (or fear removing) attitude or holding something which cannot be made out.

Ajjavara

Ajjavara.—A village in Chik-Ballapur taluk. Population 440. The Ranganātha temple at this place has a stone *brindāvana* at the bottom of which, on the front face, is sculptured a figure of Ranganātha, about 3 feet long, with the head to the south.

Ambajidurga

Ambajidurga.—A detached hill in the Chintāmani taluk, three miles west-south-west of Chintāmani. The summit, which is 4,399 feet above the level of the sea, was fortified by Tipu Sultān, but taken by the British in 1791. Until 1873 the surrounding *hobls* formed a taluk called after this hill, with head-quarters at Chintāmani. Now this is one of the Hobli head-quarters of the present Chintāmani taluk.

Anakanur

Anakanur.—A village in the Chik-Ballapur taluk. Population 327. Here is a Ranganātha temple with a similar figure of the god as at Ajjavara. The village has about 10 families of Srīvaishnavas who are said to be the lineal descendants of Parāsara-Bhatta, a celebrated Srīvaishnava teacher and author of the 12th century, who was a younger contemporary of Rāmānujāchārya.

Avani

Avani.—A village and hill in the Mulbagal taluk, eight miles south-west of the kasba, head-quarters of the hobli of the same name. Population 1,000.

The region is said to be the *Arantika Lashira* one of the ten places of great sanctity in India. The hill is related to have been the residence of the poet *Valmiki* author of the *Rāmāyana* and thence to have been called *Valmiki Parvata*. Rāma is said to have encamped here for some time on his return from the expedition against Lanka or Ceylon and hither Sita when subsequently banished by her husband, is stated to have come and given birth to her twin sons finding in *Valmiki* a protector for herself and a preceptor for her children. The place is mentioned in a Bāna inscription the professed date of which is 339 and in a later inscription it is called the Gayn of the south. (See *Mulbagal* 76)

The place is undoubtedly one of considerable antiquity its correct name being *Āshvanīya*. To the east of the hill are shown two rocks known as *Rāmanabande* and *Lakshmanabande* and Sita is said to have witnessed the battle between Rāma and his sons in connection with the sacrificial horse which took place on the above rocks from the top of a huge boulder on the hill called *Tottalgundu*. Another rock on the hill is called *Kuduregnudu* because it is said the sacrificial horse was tied on it by *Lava* and *Kusa*. A cave on the hill with a figure of *Valmiki* is pointed out as his residence. This is also known as the temple of *Jnnakarishi*, the father of Sita. To the north of the cave is the *Pandava* temple with 5 *lingas* in a line said to have been set up by the five *Pandavas*. Three inscriptions have been found here and seven more at the *Ekāntaramēśvara* temple. Near the latter is a cave with two *lingas* on one pedestal said to have been set up by *Lava* and *Kusa*. A few large holes in the overhanging rock of this cave are said to represent the places where Sita kept her toilet things. A spring in front is called *Kashaya tirtha* because according to popular belief it was here that Sita washed the cloths of her children. Another spring between two huge rocks, called *Dhanushkōti* is held very sacred the *Sraddhas* performed here being supposed to be equal in merit to those performed at *Gaya*. Here there is a figure of *Bhairava* whose permission is necessary, according to the *Saivāgama* for bathing in holy *tirthas*. On the rock to the north is figured in several places a single foot with labels giving the name of the god whose foot it represents. There is also a figure of *Gadādharaśvāmi* with the name inscribed below. On the top of the

hill is a temple of Sīta-Pārvati, commonly known as Sītamma. A few other inscriptions have also been discovered in various parts of the hill.

The temples at Avani, which are enclosed in a courtyard measuring about 90 yards by 50 yards, contain mostly *lingas* said to have been set up by Rāma, Lakshmana, Bharata, Satrugna, Hanumān, Sugrīva and Angada, and hence called Rāmēsvara, Lakshmanēsvara, etc., after their names. There is also a temple of Pārvati and small shrines of Ganēsa, Vīrabhadra and Subrahmanya. The Lakshmanēsvara, Bharatēsvara, Satrughnēsvara and Pārvati temples are fine buildings with sculptures on the outer walls. The *linga* of the first temple is the biggest of all in the enclosure, being about 6 feet high with pedestal and 5 feet in girth. The *navaranga* has a ceiling panel, about 9 feet square, of *ashtadīkṣpālakas* or the regents of the cardinal points with the figure of Umāmahēsvara in the centre. A similar panel is also found in the Bharatēsvara temple. In the *navaranga* of the Pārvati temple stand two profusely ornamented figures, about 4½' and 4' high respectively, with beards and mustaches, which are said to represent the brothers Ilavāṅjiraya and Vāsudēvaraya. The doorways of the Satrughnēsvara, Sugrīvēsvara and Angadēsvara temples are of black stone and well-carved, the first being the best. On the north outer wall of the Lakshmanēsvara temple is a seated figure, with a *rudrāksha* necklace, representing Tribhuvanakartara, the famous *guru* of the 10th century, referred to below. A label to the right of the figure gives the name. The fragmentary nature of the inscriptions on the north outer wall of the Rāmēsvara temple (Mulbagal 42e-42j) has to be attributed to a subsequent renovation of the building. On the west outer wall of the store-house are sculptured in two or three places a boar and a dagger, indicating that the building was constructed or renovated during the Vijayanagar period. Inscriptions are to be seen on the east base of the Lakshmanēsvara temple, in the Pārvati temple, in the *Kalyāṇa-mantapa*, to the west of Nagarkunte, 2 of them being old *vīragals* of the Nolamba period, and on the rock to the west of Gindī-tīrtha, some of them being short inscriptions in old characters consisting of mere names like those at Sravana-Belgola. The rock to the west of Gindī-tīrtha contains some old inscriptions. Earlier than the temples above noticed was

a temple erected in the ninth century to the memory of her husband by the Kadamba princess who was married to the Nolamba king Bira Mahendra. A memorial to a certain Tribhuvanakarittara Deva who died in 931 A.D. states that he governed Avani for forty years during which he built fifty temples and constructed two tanks (*F. C. V. Kolar District Mullagal 63*). Inscriptions of the Pallavas the Chōla the Hoysalas and the Vijayanagar kings found here show the importance attached to the place for several centuries. Tribhuvanakarittara-deva or *Mattar* is mentioned in several inscriptions (*Mullagal 91*) dated in 1007 A.D., 93-94 and 264. Tribhuvannakaritta seems to have been the standing designation of the high priest of the place. The religious establishment at this place was of importance from a very early date. The head of it is generally described as ruling the kingdom of penance.

The temples were repaired in the fourteenth century by Havanji Rāya and Vānukavarāya who came together with a merchant named Navakul Narayana Setti from Kumbhakunam. A guru of the Smartha sect resides here. To the great annual festival held for ten days from *Masika bhakula* 14th in honour of Rāmalingavarā (the linga set up by Rama) about 10,000 people resort and 20,000 bullocks are brought for sale.

Bagopalli — A taluk in the north formerly till 1882 called Gumnāyakanpalyo. Area 447.13 square miles (including Gudibanda). Head-quarters at Bagopalli. Includes the Gudibanda Sub Taluk and contains the following hoblis villages and population —

Hobli	Villages	Villages classified				Population
		Government	Sarvamanya	Jodi	Kayamgutta	
1 Bagopalli	48	40		6	2	11,318
2. Gular	43	39		3	1	12,514
3 Chelar	66	63		2	1	14,252
4 Pathapallya.	3	28		3	1	9,251
5 Mittemari	30	34		5		8,227
6. Gudibanda	73	68		3	2	8,730
Somenhalli.	75	7		1	2	8,069
Total	376	344		23	9	72,061

Principal
places, with
population

No	Place	Population
1	Gudibanda	2,450
2	Bagepalli	1,960
3	Chakavel	1,933
4	Mittomari	1,153
5	Gulur	1,064

A rugged and hilly taluk, the centre of which is crossed from north to south by the Dongala-konda hills. The south-eastern portion is watered by the Pāpāghni, which receives a considerable stream named the Vandaman, rising near Pātpālya. On the frontier, near Chelur, the Pāpāghni forms a very large tank, called the Vyāsa-samudra, after Vyāsa-rayāsvāmī, a *guru* of the Mādhva Brāhmans, by whom it is said to have been constructed. Through the western side of the taluk flows the Chitrāvati, which near Bagepalli is dammed by *anicut*s, and supplies some small channels for irrigation. In the open country east and west of the hills, there are many good tanks, the number in the taluk altogether being 481. The most productive part is probably the north-eastern. But much of the surface of the country is broken and irregular and unfit for cultivation. The neighbourhood of the hills, except where there are fruitful valleys, is covered with low jungle.

The revenue settlement was introduced in 1885, except in the Gudibanda and Somenahalli hoblis which had been settled in 1876. The revision settlement was introduced with effect from 1923-24 and the culturable area was distributed as follows —

<i>Occupied area</i>	
Dry	42,090 acres
Wet	4,957 „
Garden	6,440 „
<i>Unoccupied area</i>	
Dry	20,972 acres
Wet	686 „
Garden	188 „
Kharab	1,38,248 acres
Inām ..	9,032 „

The total Revenue Demand for 1921-22 was Rs 2,24,587 1 4 the demand under Land Revenue being Rs 1,37,386-9-6

The old road from Bangalore to Bellary runs through the west of the taluk from south to north. From Bagepalli there are roads east to Chelur and south-east to Chintamani. From the high road there is also a branch west to Gudibanda and to the railway at Gorihidnur.

Bagepalli or Bagerahalli—A small frontier town on the right bank of the Chitravati about sixty miles north west of Kolar, on the old Bangalore Bellary road. Head quarters of the Bagepalli taluk and a Municipality.

Bagepalli or
Bagerahalli

Population in 1921	Males	Females	Total
Hindus	637	608	1,245
Muhammadans	225	227	452
Christians	1		1
Total	863	835	1,698

There were formerly, it is said three towns near this spot, namely, Gadadampatna at Devaragudipalli two miles to the east, Karkur at the village of that name two miles to the south-east and Kuntlur on the banks of the Chitravati to the west. Inscriptions show that the first of these was in existence in the fourteenth century.

The place now derives all its importance from being the taluk head-quarters. An attempt was made some years ago to remove it to the left bank of the river for the sake of communication with the high roads but without success as the people could not be induced to move and rebuild their houses on the new site.

Municipal Funds	1920-21	1921-22	1922-23	1923-24
Income	1,160	1,014	1,343	779
Expenditure	1,307	869	691	1,104

Bellur.

Bellur.—A village near Mahur. Population 478. Judging from the inscriptions found in it, this village appears to be of considerable antiquity. In some of the epigraphs it is named Vishnuvardhana-chaturvēdi-mangalam after the Hoysala King Vishnuvardhana. But there are also older records dating back to the period of Śrīpuruṣa, if not to an earlier period. There were once several Śrīvaiṣṇava scholars in the village, who had a large number of disciples both among Brāhmins and Non-Brāhmins. A few of their descendants are now living in the village. They say they are the lineal descendants of Prativādibhayankaram (a terror to hostile disputants) Anna, a disciple of Manavālamahāmuni, the great Śrīvaiṣṇava teacher and author who flourished in the 14th and 15th centuries. It appears that one of their ancestors named Vellurappa or Annangaiāchārya came from Kānchi (Conjeeveram) and settled here some 132 years ago. On hearing that some of his *sabara* (hunter) disciples were addicted to beef, he in disgust made up his mind to leave the place for Melkote. Thereupon the *sabaras* swore on his foot-prints, now pointed out on a rock of Chikka-Urukalgudda to the west under the name *Gurugala pāda* (the *guru's* feet), that they would give up the bad habit and entreated him to stay in the village. The god of the Rāma temple is called Valavanda-perumāl in the Tamil inscriptions.

Betamangala

Betamangala —An old town on the right bank of the Pālār, which till 1864 gave its name to and was the headquarters of what is now the Bowringpet taluk. It is eighteen miles south-east of Kolar, with which it is connected by road. A road from Bowringpet to Mulbagal also passes through it. Population 1,532.

A fair held on Friday is attended by about 1,000 people. The name is a contraction of *Vijayāditya-mangala*, derived from the Bana king Vijayāditya, probably its founder. Two old inscribed stones worshipped in a temple under the name of Gangamma, are of the dates 904 and 944, the Nolamba period. The large tank was repaired in the time of the

Nolamba king Iriva Nolamba, about 950 It again breached and was restored in 1095 by Chokkimaya general of the Hoysala prince Vishnuvardhana, while encamped at Nangali after a victorious expedition to the countries in the east below the Ghats Vishnuvardhana was on this expedition apparently followed by this brother Udayaditya whose daughter according to an inscription died at this place (*Chikmagalur* 70, dated about 1117 A.D.)

It was again breached in the year 1903 on account of heavy rains and was restored by the Mysore Government

The water of this tank has been reserved to supply water to the Kolar Gold Fields There is a large pumping plant to lift and filter water before supplying it to the Fields

The town lost its importance on the opening of the Rail way in 1864 which diverted the former large passenger traffic and the removal owing to increasing unhealthiness of the taluk head-quarters to the newly formed town of Bowringpet

During the Chōla and Hoysala times, the place was undoubtedly one of importance Near the Gangamma temple in which two stones containing the inscriptions *Bowringpet* 1 and 2 are worshipped is to be seen a Tamil inscription. On the rock known as *Kothila bande* to the north of the Isvara temple 14 short Tamil inscriptions of about the 13th century are to be seen in different parts These are of some interest as recording grants for some temple by people belonging to places such as Kumāndūr Tūppil and Mangalur now included in the Madras Presidency In the Ānjanēya temple the image which is about 12 feet high is said to have been set up by Arjuna The Arkēsvara temple is a good structure with sculptures on the pillars. Two epigraphs are to be seen near this temple. The Vijayarangasvāmī temple is an old building in the Dravidian style with a Nolamba inscription of the 10th century on its base The principal image, called Vijayēndra is said to have been set up by Indra It is a seated figure styled *Virvirunda perumāl* in the Tamil inscriptions with consorts also seated at the sides There are also in the *navaranga* figures of Vijaya lakshmi and Ranganātha to the right and left

Bowringpet.

Bowringpet.—A taluk in the south-east, formerly called Betamangala Area 336 56 square miles Headquarters at Bowringpet Contains the following *hōblis*, villages and population.—

Hoblis	Villages	Villages classified				Population
		Government	Sarva-manyā	Jodī	Kayam-gutta	
1 Bowringpet	83	66	2	13	2	23,771
2 Dasarahosa-hall	79	69	1	8	1	30,248
3 Betamangala	70	57		12	1	11,400

Principal places, with population

No	Place	Population
1	Gold Mines	87,682
2	Bowringpet	5,553
3	Oorgaum	2,990
4	Budikote	1,196
5	Betamangala	1,532

The river Pālār runs through the taluk from north-west to south-east, and forms the large Betamangala and Rāmasāgara tanks The west of the taluk is crossed from north to south by the auriferous tract, generally uncultivated and marked by low flat hills, in which have now been formed the Kolar Gold Mines The southern borders of the taluk abut upon the Eastern Ghāts, and are rugged and jungly.

The revenue settlement was introduced in 1890 and the revision settlement with effect from 1925-26. The culturable area was distributed as follows.—

Occupied area.

Dry	..	50,575 acres
Wet	.	6,332 ..
Garden	..	3,274 ..

The total Revenue Demand for the year 1921-22 was Rs. 9,13,661-1-4, the demand under Land Revenue being Rs. 1,19,150-7-5

The Madras branch railway from Bangalore to Jalarpet enters the taluk in the west and turns south at Bowringpet which is the junction for the Gold Fields Railway. There are stations at Bowringpet and Kamasandra on the former and at four places Balaghat, Oorgaum, Champion Reefs and Mysore Mines on the latter. From Bowringpet there are roads north to Kolar, east to Betamangala, south west to Budikote and a loop road east south and west through the Gold Mines to Kamasandra. There is also a road from Bt̄mangala to Kolar.

Bowringpet.—A new town situated at the former Kolar road now Bowringpet station of the Bangalore branch railway to which it owes its origin. It includes the previously existing villages of Maramatlu and Hosingere and was established in 1861 on the opening of the railway being named after Mr Bowring then Chief Commissioner. It lies eleven miles south of Kolar, with which it is connected by narrow gauge railway. Head-quarters of the Bowringpet taluk and a Municipality.

Population in 1921	Males	Females	Total
Hindus	2,063	1,055	4,048
Muhammedans	803	598	1,401

Expenditure	31,979	20,285	23,505	20,358

Brahmagiri
or
Yargkonda

Brahmagiri or Yargkonda.—A hill of the Nandidrug range, rising to 4,657 feet above sea-level. It stands to the south-west of Nandidrug, being connected with it by a saddle. The trees on the hill, form part of the reserved plantations of the Forest Department

Budikote.

Budikote.—A large village in the Bowringpet taluk, eight miles south-west of the *lasba*, situated between the two branches of the Markanda river near their point of junction. Headquarters of the Budikote *hōbli*. Population 1,196

A small fair held on Monday is visited by about 600 people

Budikote, (*Śkt* Vibhūtīpura) fort of ashes, is said to derive its name from the immense holocausts performed there at some remote period

It is an ancient village as evidenced by a Bāna inscription of the 8th century found in it. Latterly, it was the birth-place of Haidai, a spot among the boulders in the fort is shown as the place where his cradle was rocked. It formed the *jāgu* of his father Fatte Muhammad on his receiving the appointment of Faujdār under the Subadār of Sira. The fort has a fine spring. The *navaranga* doorway of the Venkataramana temple outside the fort is sculptured with creeper work and has Gajalakshmi on the lintel. Another temple, the Sōmēsvara is to the north of the village. The figures usually found in the *navaranga* of Siva temples are in this case kept in the *prakāra* in small shrines looking like *Vīnara-gudis*. The figures are Dakshināmūrti playing on the *vīna* or lute, Saptamātrikah, another Dakshināmūrti bearing a rosary and a water-vessel in the upper hands, Vishnu, Mahishāsūramardini, Brahma, Chandikēsvara, Bhairava

and Surya. The Nandi pillar has Nandi in front, a linga on the back, a drum on the right side and a trident on the left.

Chennakesava batta or Chonnarayan-batta — One of the Nanduruk hills and the reputed source of both Northern and Southern Pinakini or Pennar. Height above the sea is 4763 feet. It is five miles south west of Chik Ballapur and contiguous to Nanduruk on the north west. The forest on it is one of those reserved by the State. At one part on the top is a large cave connected with a temple. The hill was also at one time called Hayes Hill after an officer who built a small bungalow there and died in 1807.

Chennakesava batta or Chonnarayan-batta

Chennarayapura — A village in Malur taluk. In the jungle near Chennarayapura which belongs to the Malur taluk stands a huge slab 7 feet by 5 feet which shows a man attacking a tiger. The sculptures are beautifully and realistically executed. The man must have died in the conflict as he is represented at the top as worshipping a linga. Tradition says that at one time a *pugara* fought with a tiger and killed it. At a distance of a few yards from this is lying another huge slab containing the Tamil inscription F. C. V. Valur 82. One of the two records at Bhaktorhalli near by is an inscription of the reign of the Ganga king Sivamara.

Chennarayapura

Chik Ballapur — A Sub Division comprising the taluks of Chik Ballapur Sidlaghatta Goribidnur Bagepalli and Gudibanda Sub-Taluk. Head-quarters at Chik Ballapur.

Chik Ballapur

Chik Ballapur — A taluk in the west. Area 219.85 square miles. Headquarters at Chik Ballapur. Contains the following hoblis, villages and population —

Hoblis	Villages classified					Population
	Villages	Government	Nayamanga	Jodt	Nayamgutta	
1 Chik Ballapur	71	51		18	2	25,010

No	Place	Population
1	Chikballapur	10,431
2	Nandi	1,033

The taluk, composed as it is of a lofty range of mountains, with rivers rising on either side, besides detached clusters of hills, presents a great variety of soil and aspect. The Nandidrug range runs north and south through the western side, the hills of Dibbagiri, Brahmagiri or Vargkonda, Channakēsavabetta, Hariharēsvarabetta and Kalavaradurga being included in the taluk, besides the lofty peak of Nandidrug itself. The valley between this mountain and Brahmagiri encloses the principal forest in the District, in a part of which coffee is cultivated. Of the passes through the chain, the Manchenahalli Ghāt, through which a road connects Chik-Ballapur and Goribidnur, is the chief. A road to Dodballapur runs through a pass called the Basavan Kanive to the north of Nandidrug, but a level road from Nandi has been carried round the base of the hills to meet the other beyond.

Around this spot and within a few miles of Chik-Ballapur, the South Pinākini rises on the east of the range, flows through the tanks of the town, and bends southwards to Jangamkote. The Chitrāvati rises in the north-east and continues that direction past Peresandra. The North Pinākani rises on the west and flows north-west into Goribidnur. The Arkāvati, rising near the same spot, takes a south-west course to Dod-Ballapur.

The soil on the table land about Chik-Ballapur and Nandi, and to the west of the range, is of great fertility and extremely favourable for the cultivation of the sugar-cane. Much of the Peresandra hobli, on the other hand, is unfavourable to husbandry, abounding with deep ravines and broken ground, through which the streams from the mountains and high lands westward fall into the low country about Sadali.

Besides the fortifications of Nandidrug there are several buildings in the taluk deserving of mention, among others

the temples of Umamahēswara at Nandi decorated with some delicate stone carving, and of Rangaswami at the Rangasthala, 2 miles west of Chik Ballapur

The revenue settlement was introduced in 1884 and the revision settlement with effect from 1921-22. The culturable area according to resettlement was distributed as follows —

Occupied area

Dry	30 601 acres

The total Revenue Demand for the year 1921-22 was Rs. 2,66 196-4-3 the demand under Land Revenue being Rs. 93,299-4-0

The old Bangalore-Bellary road crosses the taluk from south to north through Chik Ballapur, whence there are roads east to Sidlaghatta, west to Goribidnur and south west to Nandi and Dodballapur. A road from Kolar to Dod Ballapur passes through Nandi. A short branch connects the south-eastern foot of Nandidrug with the high road near Devanahalli.

Chik-Ballapur — A large town 36 miles north west of Kolar, on the old Bangalore Bellary road. Headquarters of the Sub-Division and of the taluk bearing the same name and a Municipality. Chik Ballapur

Population in 1921	Males	Females	Total
Hindus	4,253	4,320	8,574

Christians	108	90	207
Jains	6		6
Total	5,235	5 196	10 431

Chikka Ballapura, or Little Ballapura, is so called to distinguish it from Dodda Ballapura. In Hindustāni it is called Chota-Ballapur. and in Telugu, Chinna-Ballapuram. It was founded about 1479 by Malla Baire Gauda, youngest son of Baire Gauda, the leader of the refugees who settled at Āvatī. The village which originally occupied the site was called Kodī Manchanahalli, in the vicinity of which Malla Baire Gauda while hunting, observed a hare turn upon the hounds, and was led by this indication of *gandu bhūmi*, or male soil, to make proposals for the erection of a fort and *petta* there to Baiche Gauda and Baire Gauda, the joint patels. But permission of the Vijayanagar sovereign being necessary, Marī Gauda, the chief's son, was despatched thither and returned with a favourable reply. The moment determined on by the Brāhmans as the most lucky for laying the foundation of the fort was to be proclaimed when Malla Baire Gauda and the workmen were on the spot, by the sound of a conch such as is carried by beggars. But unluckily one of that fraternity passing at the time sounded his shell, which being taken for the signal agreed on, the work was commenced half an hour too soon, in consequence of which it was foretold that the government should continue in that family only for 300 years.

On its completion, Marī Gauda was appointed governor of the new state and ruled for 24 years. His son Dodda Baire Gauda succeeded. He reigned only 3 years and was followed by his son Rangappa Gauda, who held the government for 42 years. Dying without issue, he was succeeded by his brother Jōgi Baire Gauda, who ruled for 30 years, and was followed by his son Dodda Baire Gauda for 46 years. The latter left no issue, but his wife Venkatamma carried on the government with the aid of confidential officers for 15 years longer, and at her death appointed Marī Gauda a grandson of Jōgi Baire Gauda's whom she had brought up from an infant, to succeed her. Another account says he was a son of the Devanahalli chief and adopted by her. After a reign of 45 years, through some defect or imbecility in his

management, he was deposed, and succeeded by his eldest brother Anni Ganda he being only the fifth son. The new ruler, during a reign of 18 years, purchased Sidlaghatta for 1,00 000 *pagōdas*, annexed it to his territory and died after amassing a fortune of 20 lakhs of *pagōdas*. The brother who had been deposed appears to have been put in possession of Sadali and Itikalidurga as a *jāgīr*. Anni Ganda's son Havali Baire Ganda succeeded but after 4 months was deposed, on account of his tyranny and oppression, being succeeded by his nephew Baiche Ganda, who ruled 16 years.

During his time the Mysore army under Kantbirava the Dalavāyi attempted to reduce the fort. But the Mahrattas, to whom Baiche Ganda applied, forced him to raise the siege and in a severe battle near Kotikonda defeated and slew him by cutting off his head. Baiche Ganda soon after purchased and annexed Burdagunta. At his death he was succeeded by his son Dodda Baire Ganda, who during a reign of 2 years re-conquered those parts of the dominion which had submitted to Kanthirava during the siege of the capital. He was succeeded by his brother Venkata Narāyan Ganda who ruled 35 years, and was followed by his son Baiche Ganda. The latter after 9 months was deposed and his uncle Chikkappa Ganda took the government.

Three years after his accession, Haidar Ali appeared before the town, and after a siege of three months, during which many attempts were made to carry the fort by storm and mining which from the pālegar's knowledge of counter mining was unsuccessful, a treaty was concluded by which the Mysore army was to withdraw on condition of the chief's paying 5 00 000 *pagōdas* and a golden head in the room of Kanthirava's particularly insisted on by Haidar. Part of the sum was paid on the spot, and a confidential officer left to receive the balance. But no sooner had Haidar removed to Devanahalli than Chikkappa Ganda communicated with Murari Rao the chief of Gntti, who at once sent a reinforcement. Putting these troops in possession of the fort, the Ganda with his family took refuge at Nandidrug. Haidar,

immediately on hearing of it, retook the fort, severely punishing the defenders by mutilation, and shortly after sent a force to reduce Nandidrug, Kalavaradrug, Gudibanda, Itikaldrug and Kotikonda. The pālegar and his family were kept close prisoners in Bangalore, where Chikappa Gauda died, without issue. A report being circulated that a rescue would be attempted, the other prisoners were removed to Coimbatore

When Haidar visited Coimbatore some time after and desired them to be brought before him, they all attended except Baiche Gauda, the one that had been deposed, whose pride was averse to saluting the conqueror. Unwilling to hurt the old man's sensibility, Haidar ordered that he should be admitted through a low door, intending to accept the bending down with his head forward in passing through it as a salute and return the compliment. But the obstinate Gauda to prevent Haidar having even that gratification, presented one of his feet first, on which he was put into irons and close confinement

A younger member of the family, named Nārāyan Gauda was afterwards re-instated by Lord Cornwallis and put in possession of Chik-Ballapur, which Tipu's troops had evacuated in order to defend Nandidrug. He declined assistance, preferring to rely on his own resources, which Tipu hearing of, made a sudden attack upon the fort, took and demolished it after a feeble resistance. On the capture of Nandidrug by the British in 1791, the chief was again in possession for a short time, but on the conclusion of peace with Tipu could no longer retain his power.

The town has been improved of late years by several large buildings for Sub-Division offices, Munsiff's Court, etc. The London Mission have also made a principal out-station here. The silk industry is largely pursued.

Municipal Funds	1920-21	1921-22	1922-23	1923-24
Income	19,070	18,531	17,787	21,137
Expenditure	23,854	15,861	24,355	38,800

Most of the temples in the town are modern. The Snbrah manyēvara temple has three cella standing in a line, the south cell containing a figure of Lakshminarasimha the middle cell a figure of Sahrahmanya, and the north cell, a linga called Kukkelinga Snbrahmanya, about 2 feet high stands on the coil of a snake under a seven hooded canopy and has only one face and two hands the right hand holding an upright mace and the left hanging by the side. An inscription is to be seen on the south outer wall, as also a few modern ones on the temple vessels and lamps. One of the lamps called Nakshatrārṭi or the star-waving lamp has 27 cavities for holding oil with the initial letters of the 27 *nakshatras* or asterisms inscribed against each. On the slabs of the veranda in the Prasannanandēvara temple are to be seen a few modern epigraphs. The Chenna kēśava temple is an old structure. The god is a good figure about 2½ feet high, flanked by consorts. In the *nataranga* there are 5 figures of Ālvārs to the left besides a figure of Śrī nīlāsa in a niche. A short Tamil inscription is to be seen on the south base. The Virabhadra temple, known as Chinnappa temple after the name of the builder Mallikārjuna Chinnappa is a fine modern building profusely decorated with stucco figures. Pieces of glass are stuck in the plaster to add beauty to the structure. This mode of decoration appears to be a characteristic feature of modern Langayat temples in these parts. The image of Virabhadra, about 3 feet high is well carved. It has for its attributes a sword, a shield a bow and an arrow. At the right side a figure of the sheep-headed Dakṣa stands with folded hands as usual. The temple has a good tower. Opposite to it is a well built pond, named Chinnappa's pond in an enclosure, surrounded by verandas on three sides. But all this is now in ruins. To the right of the temple is a building containing the *gaddige* or tomb of Chinnappa who is said to have died about 62 years ago. About 2½ miles to the north-east of Chik Ballapur is a fine circular pond known as the Chitrāvati which rising in the Hariharēśvara hill to the west, is said to flow into this pond which is therefore looked upon as a holy *tīrtha*. The pond is well built with steps all round the outer diameter being about 158 feet and the inner about 91 feet at the present water level. There is also a circular well about 43 feet in diameter, in the middle of the pond. The steps are said to have been built by Dewan Pūrnaiya. The pond is popularly known

The taluk naturally divides itself into two distinct tracts. That which lies to the north of the roads from Chintamani to Bagepalli and to Cuddapah respectively, is a *kul sima* or stony tract draining to the north. All to the south of it is a *kempu bail sima* or open rolling country composed of red soil draining to the south. Though the latter is more favourable for general cultivation the former has greater facilities for storing the drainage, both tanks and wells in that part being very good. Sugar-cane is largely grown and thrives well. Cocos nut and areca nut on the other hand are raised in very small quantities and are poor. Of the crops produced on dry fields the ragi is of a superior description and highly esteemed. Fine topes of mango tamarind and other trees are common. The honge is abundant everywhere.

Blankets and coarse cloth are manufactured in some parts as well as a finer cloth for kamarbands.

Inscriptions show that the Banas the Vaidumbas the Pallavas the Chōlas the Hoysalas and the Vijayanagar kings have at various times occupied this part of the country until the Mahrattas in modern times gained an ascendancy for short periods.

The revenue settlement was introduced in 1887 and the revision settlement with effect from 1925-26. The culturable area according to resettlement was distributed as follows —

Occupied area

Dry	61,538 acres
Wet	10,441
Garden	8,000

Unoccupied area

Dry	8,962 acres
Wet	871
Garden	177
Kharab	1,99,750
Inam	14,451

The total Revenue Demand for the year 1921-22 was Rs. 2,21,816-9-6 the demand under Land Revenue being Rs. 1,14,696-7-7.

The old Bangalore-Cuddapah high road runs through the taluk from south-west to north-east being met at Muragamalla by one from Kolar through Srinivaspur. From Chintamani there are roads west to Sidlaghatta north-west to Bagepalli, north to Chelur and east to Srinivaspur and Mulbagal, with a short one south to the Cuddapah high road.

Chintamani

Chintamani.—An important commercial town, 27 miles north-west of Kolar, head-quarters of the Chintamani taluk and a Municipality.

Population in 1921	Males	Females	Total
Hindus	2,372	2,351	4,723
Muhammadans	730	680	1,410
Christians	9	9	18
Animists	3	7	10
Total	3,114	3,047	6,111

The town is named after its founder Chintāmani Rao, a Mahrāṭṭa chief, and is the seat of the Kōmatīs or banking class. Considerable trade is carried on in gold, silver and precious stones, besides other merchandise. Pomegranates grow here to a large size. A low hill commanding the town on the north-west was formerly fortified.

Municipal Funds	1920-21	1921-22	1922-23	1923-24
Income	20,033	22,116	33,005	20,055
Expenditure	23,564	35,217	30,685	31,576

Nekkundi

Nekkundi.—A village forming the northern portion of the town of Chintāmani, appears to be a place of considerable antiquity as the records found in it take us back to the 8th century. Population 36. It seems to have been the scene of several battles between the Gangas and the Bānas during the reign of the Ganga king Śrīpurusha. At Subbarāyanpēte to the

north west of Chintamani are to be seen two Nolamba inscriptions together with an old Tamil *viragal*. Ambajidurga, a fortified hill to the south west of Chintamani has a small Siva temple on the top. A structure resembling a powder magazine is known as *Pane kanaja* or the place where oil used to be stored. It is three feet below the ground level and is always filled with water. A cell with an arched doorway near the west gate is known as *Khajāna* or the treasury. The doorway has to the left the figure of an elephant and to the right that of a monkey. Traces are left of some buildings which once stood on the hill. From the top we get a view of hundreds of tanks in the surrounding tract of country.

Chitravati —An affluent of the North Pinakini. It rises in the Hariharēsvara hill north of Nandidrug and flowing north east between the Worlakonda hill and Bagepalli, leaves Mysore a few miles north of the latter. Thence entering the Anantapur District, it runs north past Kodikonda, after which turning north-east again, it supplies the Bukkapatna and Dharmāvaram tanks. Ends its course near Gandalur of the Cuddapah District, where it unites with the North Pinakini or Pennar. The stream is dammed near Bagepalli in several places, from which channels are led off which irrigate a considerable extent of paddy land in the Bagepalli taluk. Chitravati.

Dibbagiri —The terminal hill southwards of the Nandidurg range, properly Divigiri. Dibbagiri.

Dod-Kadatur —A village near Malur. Population 187. It is named Vishnuvardhana-chaturvēdi mangalam in a Tamil inscription at the place. Dod Kadatur.

Dod-Sivara —A village near Malur. Population 391. It appears to have been a place of considerable importance in ancient times. It has several old inscriptions of the time of the Ganga king Sripurusha. *B O X, Malur* 96, which is to be Dod-Sivara.

found here, is engraved on a slab of white granite. The sculptures and writing though more than 1,000 years old look so fresh as if they were chiselled only yesterday. The middle portion of the slab has a row of soldiers with the characteristic dress and arms of the 8th century, to which period the inscription belongs. Many other inscriptions are to be seen at this village, almost all in characters of the Ganga period

Dokkala-
konda or
Dongala
konda

Dokkala-Konda or Dongalakonda.—The Robber hills (Telugu), so named from their affording a shelter to the bandits who used to plunder the neighbouring country. The hills are on the Mysore frontier in the north of the Bagepalli taluk

Elaburige

Elaburige —A village in Bowringpet. Population 468. The Venkataramana temple at this place has 4 sculptured pillars in the *navaranga*, one of them being carved with figures of the ten incarnations of Vishnu. A noteworthy sculpture is a seated figure of Vishnu bearing a discus and a conch in the upper hands, the lower being in the *abhaya* and *varada* attitudes. In the *prākāra* is a grinding stone, about 3 feet in diameter, in which the grinding used to be done with the help of bullocks. Among epigraphs found at this village, 4 are *vīragals* of the 10th century and one a Tamil *māstikal* or *satī* stone of Rājēndra-Chōla's time. This seems to be the first Tamil *māstikal* that has yet been met with in the State.

Garudan-
pālya

Garudanpalya —A village near Malur. Population 37. To the east of this village is an eminence on which are found many *Pāṇḍavaraguli* or cromlechs with unusual gigantic slabs for the roof and comparatively smaller ones for the walls, the front having a small circular hole in the middle. The Jōḍidār of the village has removed most of the slabs and utilised them for building a well in his field. Some of the cromlechs seem to have been examined and old pottery, etc., unearthed. It is stated that some of the pots and other antiquities so unearthed are in the possession of the Jōḍidār who lives at Bowringpet.

Goribidnur —A taluk in the north west Area 343 10 square miles. Head-quarters at Goribidnur Contains the following hoblis villages and population —

Hobli	Villages	Villages classified			Kanyam gutta	Popula- tion
		Govern- ment	Sarva manya	Jodi		
1 Goribid nur	46	36	1	3	5	22,471

11	Mudagero	1,294

Principal
places, with
Population.

The taluk was extended in 1886 by the addition of some neighbouring hoblis. It is composed of the basin of the North Pinakini, which river runs through it from south-east to north being confined between the Nandidrug range of mountains on the east and a chain of hills from Makalidurga on the west. The Kumadvati or Kunder a tributary of the North Pinakini, rising on the west of Makalidurga

in Bangalore, flows through the taluk from south to north and then enters the Madhugiri taluk of the Tumkur District. A small stream from the east of Makalidurga waters the Tondebhavi hobli and joins the North Pinakini a little to the east of Bommasandra.

The level of the taluk is considerably lower than that of the neighbouring parts of the District, the descent being marked on the south by the Nagralpille kanave on the Dod-Ballapur frontier, and by the Manchēnahalli Ghāt on the east. The soil is loose and fertile, especially in the neighbourhood of the chief town, where water is easily procurable almost at the surface, not only from channels from the river but from shallow wells of never failing water, the sides of which are protected with wicker baskets to prevent their falling in. Sugar-cane, paddy, turmeric and ground-nut are extensively cultivated, cocoa-nut and areca-nut especially near Varavani. The wild custard-apple grows abundantly on the hills.

The revenue settlement was introduced in 1880 and the revision settlement with effect from 1921-22. The area according to resettlement was distributed as follows —

<i>Occupied area —</i>	
Dry	27,350 acres
wet	3,802 „
Garden	5,974 „
<i>Unoccupied area —</i>	
Dry	13,277 „
Wet	234 „
Garden	85 „
Kharab	43,514 „
Inam	3,384 „

The total Revenue Demand for the year 1921-22 was Rs 4,62,526-0-0, the demand under Land Revenue being Rs 1,77,610-0-0.

The Bangalore-Guntakal railway runs through the middle of the taluk from south to north, with stations at Tondebhavi, Goribidnur and Dod-Kurugod. The old road to Hindupur

is close alongside the railway, and from Goribidnur there are roads east to Gndibanda and south-east to Chik Ballapur. There is also a road westwards from Tondebbavi to Madhugiri.

Goribidnur—A town on the left bank of the North Pinakini, 56 miles north west of Kolar on the Bangalore Guntakal railway and the Dod Ballapur Hindupur road. Head-quarters of the Goribidnur taluk and a Municipality.

Population in 1901	Males	Females	Total
Hindus	850	783	1 633
Mohammadans	93	73	166
Jains	33	14	43
Total	972	760	1,842

It is stated to have been in ancient times the residence of Vidura, an uncle of the Pandavas, and thence called *Vidurur*. A peepul tree of great age, said to have been planted by him, is still an object of worship, under the name of the *Vidurasvatha* near Dod Kurugod, four miles to the north. In modern times the town became a possession of the chief of Dadinaikanapalya, eight miles to the east, who gave it as a dowry to his daughter and after her name it was called *Gauri Vidurur*. The Muhammadans corrupted it into *Gori-bidnur*, a form to which some *gōris* or tombs erected by them near the town seem to give countenance. The fine tomb at Hire Bidnur, the other side of the river, is that of Husen Shāh Mirza, one of the Bijāpur nobles (See below). The one at Goribidnur is of the same period in memory of a saint named Bakharī Vali.

The place lies low, 2,252 feet above the sea, and differs from all other parts of the District bearing a resemblance, it is said, in some of its features to Conjeeveram. The climate is hot, the soil loose and fertile, water abundant and easily procurable almost at the surface. The town has risen much in importance owing to the advent of the railway.

The Venkataramana temple here has a figure of the god, about 4 feet high, with 4 hands, the right lower hanging by the side pointing to the earth, the other three holding

a discus, a conch and a mace. A fragmentary inscription is to be seen at the entrance. The Navagraha temple has good figures of the nine planets standing in three rows on one pedestal. The Darga known as Jalal Bakhari Vali Darga is said to be an old structure, though of no architectural merit. The Darga and mosque at Hiribidnur are fine structures built of stone. The former is popularly known as Nyamat Bi Darga, though it is named Hussain Shāh Darga in official records. It is a square structure, measuring about 35 feet by 32 feet, with a narrow doorway, four minarets at the corners and a big dome on the roof. There are drip-stones all round. The Darga contains 4 tombs the first to the left, of Hussain Shāh, the next, of his wife Saidani Bi, the third of his daughter-in-law Nyamat Bi, and the fourth after some intervening space, of Sakina Bi, daughter of Nyamat Bi. The intervening space is said to have been reserved for the tomb of Hussain Shāh's son, who went away to Mecca leaving his parents and wife. On her husband's departure, Nyamat Bi renounced the world and came here, her father-in-law and mother-in-law also following her in search of their son. As stated above, the Darga is named after Nyamat Bi, and it is only her tomb that is worshipped by people who want their desires to be fulfilled. Hussain Shāh was one of the Bijāpur nobles. The mosque is known as Juma Masjid. It is a fine rectangular building, measuring about 44 feet by 22 feet, with three arched doorways and two large minarets, about 31 feet high, at the sides in front. The corner minarets at the back, about 11 feet high, are on the roof. The pedestals of the front minarets and the arches show ornamental work. The structure has a fine dome, about 14 feet high. Over the roof there are stone battlements all round, the front ones being carved with floral and geometrical devices. The building has a staircase to the right. Between the two structures is a pond which is now dry. Opposite to the buildings is a dilapidated Naubat-khana in two storeys. It is said that a *sanad* granted by Aurangazib is in the possession of the owners.

It is situated at the southern foot of a *banda* or rock of domelike shape, surmounted by a *gudi* or temple whence the name. Gudibanda with the jungle tract in its vicinity was given to Havalī Baire Gauda, on the capture of Dod Ballapur by Khāsm Khan. It was then the haunt of freebooters and little or no improvements were made in cultivation till some time after when he had addressed enough to conciliate them, and they became useful husbandmen. He first built the fortification on the rock called Old Gudi banda, and some time after fortified the present rock, and dying without issue was succeeded by his wife's brother Rama Gauda. This gave umbrage to Baire Gauda of Chikballapur the line of succession of his family being thereby interrupted, which he endeavoured to recover by

proposing a marriage between his son and Rāma Gauda's daughter, and requested Rāma Gauda to pay him a visit at Chik-Ballapur to settle the terms. But this he declined, agreeing, however, to meet him half-way between their respective capitals. They accordingly had an interview near Mandikal, attended by their forces. After several apparently friendly conversations, one of Rāma Gauda's servants, whom Baiche Gauda had gained over, on a signal given, stabbed his master in the back. Gudibanda was thereby annexed to Chik-Ballapur perhaps about the year 1689.

Gumanāya-
kanpālya

Gumanayakanpalya.—A village in the Bagepalli taluk, to which, till 1882, it gave a name, and was formerly the head-quarters. It is 10 miles east of Bagepalli.

Gumma-nāyahana-pālya is a small fortified circular rock in the midst of jungle, rising about 150 feet above the surrounding hilly tract, and to the eastward of the range. It appears to have been originally dependent on Patpālya, the residence of a Bedar named Papa Nāyak. A settlement was subsequently made there by Gumma Nāyak and Lakka Nāyak, two brothers from Dēvarājhalli, who discovered a hidden treasure, and induced some neighbours to join them. Asylum was also given to a band of freebooters from Cuddappa, on condition of receiving half the plunder they might obtain. For their protection Lakka Nāyak, about the year 1364, built a line of defence round the rock, naming the place after the brother. On a visit he paid to a neighbouring fair he was impressed with the state and retinue maintained by other palegārs and became desirous of increasing his own position in consequence. He accordingly encouraged immigrants from the neighbouring districts to join his standard on condition of enjoying three-fourths of the produce of their lands and added to his forces. On his death, in 1372, he was succeeded by his

son Maasal Nāyak who taking advantage of Papa Nāyak's death subdued Patpālya and other places. He was succeeded in 1412 by his son Kadrappa Nāyak to whose honour it is related that he introduced many wise regulations and appointed village accountants to superintend and encourage cultivation. The withdrawal of the robbers protected by the former rulers was the consequence of these politico measures. The estimable Kadrappa Nāyak died in 1472. Of his six sons Narasimha Nāyak, the eldest ruled 3 years. Kadrappa Nāyak, the second son 7 years. Maasal Nāyak the next son then succeeded. During his tenure of power he gained possession, by force or stratagem of some neighbouring pālyams, and died in 1500 of a mortification in his back. His brother Vira Nāyak succeeded and pursuing the same policy died in 1532 little esteemed or regretted. His son Vasanta Nāyak after a quiet rule of 5 years was followed by Lakka Nāyak son of the latter. He was shortly summoned to pay tribute to the Penngonda sovereign to which he consented. At the same time he strengthened the fortifications of Gmṇayakanpālya constructed a large tank to the west and improved the town.

Nothing of interest is related of the succeeding rulers, during whose time various conquests were made until the accession of Narasimha Nāyak. He is described as a weak prince on which account a *dalavāyi* was appointed named Sani Narasimaya. He was a man of ambitious views, and by his successful conquests, including that of Itikaldurga gained such an ascendancy in the state that Ramakka the Nāyak's wife regarded with apprehension his growing power. When therefore the Mahratta army of Morārī Rao appeared before the capital she opened negotiations with the view of getting rid of the minister. He, however, coming to know this, offered them battle and broke up their camp. Ramakka's situation now became daily more critical as she had gone too far to withdraw and was entirely in the *dalavāyi*'s power. She therefore secretly offered to all the neighbouring chiefs from whom conquests had been made an unconditional surrender of the places they had lost, provided they would combine against the minister. The latter opposed the confederate forces with his usual bravery. But they gaining intelligence that his resources were nearly at an end went on the bank of the tank and forced him to capitulate. He requested permission to retire

with his family and private property This the allies refused, but through the advice of Rāmakka the terms were ultimately agreed to, and Sami Narsimaya retired to Chik-Ballapur, where he died of a broken heart The pālyam was soon after reduced by the army of Haidar Ali, and Narsimha Nāyak with his wife Rāmakka were taken prisoners, first to Guramkonda and then to Seringapatam The chief died on his way, his reign having lasted 64 years

Hariharēs-
varbetta

Hariharesvarabetta.—A two-peaked hill rising to 4,122 feet above sea level north of Nandīdrug and one of the same range. It is the reputed source of the Chitrāvati

Hebetta

Hebetta.—A village in Srinivasapur taluk Population 489.

It is a place of great antiquity. It is called Perbetta in the old Kannada, and Pervettam in the Tamil inscriptions Two old epigraphs have been found here, one of them refers itself to the reign of the Ganga king Srīpurusha, and the other is a Nolamba record Another discovery of some interest at the village was a *Yantra* stone of the 10th century set up by order of the Ganga king Mārasimha (961-974) for the benefit of the cattle of the village The front of the stone has some mystical diagram carved on it with certain letters in the interstices and the syllable *hrim* repeated twelve times all round, while, on the back, we have in 32 small squares the 32 letters of what is called a *sarvatōbhadrā* verse Such stones are also called *Gōkul* or cattle stones and are found set up at the entrance of almost every village, though the diagrams on them may differ from one another It is interesting to note that the belief in the potency of such diagrams prevailed in the 10th century and that a great king of that period considered it necessary to have such a stone set up for the good of the washed It is generally believed that water with which the diagram is washed is efficacious in curing cattle of their diseases Another discovery of great historical importance made at Kallur was a stone inscription of the early Ganga king Srīvikrama Hitherto he was known only from copper-plate grants A lithic record of his son Sivamāra I was discovered some years ago at Tiruvallam (*Epigraphia Indica*, IV, 140) In view of the tendency to discredit the earlier genealogy given in some of the published

Ganga grants, this record has to be looked upon as one of especial value. On palaeographical grounds it has been assigned by Mr. Narasimhachār to the middle of the 7th century.

Hosur—A large village in the Goribidnūr taluk, 6 miles south west of the Hasabā. Population 2,912. Hosur

A fair held on Saturday is attended by about 500 people.

Under the name of Hosavīdū the new camp or residence it was for a time occupied by the Hoysala king Ballāla III who may have been its founder and may have named it with reference to Halēbid his old residence or capital of Dōrasamndra which had been destroyed by the Musalmāns. As Hosapattana it apparently formed in 1355 one of the boundary towns of the early Vijayanagar kingdom under Bukka Rāya I and was a royal residence. It probably lost its importance when the Bijapur power was overcome by the Mughals in 1687 and is now greatly reduced in population and extent from what it was even at 1871.

Hunkunda.—A village in the Dasarahosaballi hobli of the Bowringpet taluk about 8 miles north by east of the Hasabā, near the Kolar Botamangala road. Population 487. Hunkunda

It seems from the numerous inscriptions here to have been a frontier station down to 10th and 11th centuries where much fighting took place. It was successively in the possession of Mahāvīrī Banarasa, the Nolamba king Ayyapa and Dilipayya, the Gunga king Narasimha and Uttama Chōla Ganga. The Chandēsvurī temple at this place has in front several *uyyāle kambas* for swinging the goddess and several stone pegs known as *gōri kambas* or tomb-pillars to which ho-huffaloes and other victims are tied. The place is named Porkunram (Golden Hill) in the Tamil inscriptions. It is an ancient village containing several Bana and Nolamba records of the 9th and 10th centuries. On a small hill at the village is a Siva temple with a large lofty cave and a *donē* or spring near it.

Kaivara—A village in Chintāmanī taluk 8 miles from Chintāmanī, near the Bangalore-Cuddapah road. Head quarters of the Kaivara hobli. Population 1,506. Kaivara.

There are several old temples in the place which is said to have been formerly called Ēkachakrapura, celebrated in the history of the Pāṇḍavas, where the Pāṇḍavas resided for some time during their exile and when Bhīma killed the demon Bakāsura

In a hill close by called Chikkabetta, but named Chidambara-giri in the *Sthalapurāṇa*, a cave is pointed out into which Bhīma is said to have thrown the carcass of Baka and to have closed the entrance with a large boulder. On certain occasions water of a white or red colour trickles from the cave over the boulder, and this is believed to represent the pus or blood of Baka's carcass. Omens too are drawn from the flow which, if of a red colour on occasions such as the winter solstice or the Sivarātri, is supposed to portend evil for the village, while a mixture of white and red is believed to conduce to its happiness. A narrow spring on the hill named Tigadona in Telugu and Lata-sarōvara in Sāṅskṛit, is said to have been brought into existence by Hanumān by striking his tail on the rock. The Amara-nārayāna temple at Kaivara is a good specimen of Dravidian architecture. It appears to be an old structure, one peculiarity noticed in it being the absence of the usual *dvārapālakas*. Tradition says that the god was set up by Indra in the *Kṛtā-yuga*. The *navaranga* supported by 4 beautifully carved black stone pillars, has a ceiling, about 8 feet square, with a figure of Brahma in the centre surrounded by the *asthādīkpālakas*. The lower hands of Brahma are broken, the upper bear a rosary and a water vessel. Some of the pillars have minute figures carved on them from top to bottom. The figures on the north-west pillar illustrate the sports of Krishna. The capitals, too, show fine work with pendent buds on the four sides. To the right in the *navaranga* is a pierced window, resembling those in the Nandi temple, carved with a creeper with dwarfs in the convolutions. In a cell to the left is a figure of Rāma, known as Aranyā-Rāma, said to represent him when on his way to Lanka. It is a seated figure with Sīta and Lakshmana to the left, there being no figure of Hanumān in the group. Sīta is seated with a lotus in her right hand, while Lakshmana stands armed with bow and arrow. The porch in front of the *navaranga* is supported by two black stone pillars similar to the ones in the interior. The *navaranga* doorway is beautifully carved, the middle fascia

of the architraves being decorated with creeper work with human and animal figures in every convolution. The outer walls have pilasters and niches.

The Bhīmēśvara temple at Kuvvara is also a Dravidian building. Behind it stands the Sahadēśvara temple and to the north the Nakulēśvara. To the north-east once stood the Dharmēśvara which is no more in existence only the linga being now left on the site. There is also a ruined Arjunēśvara temple in a field to the north. We have thus five *lingas* here said to have been set up by the Pandava brothers when as stated above they resided at Kuvvara for some time during their exile. The Bhīmēśvara is the largest of the five. The *navaranga* has two entrances on the east and south the latter with a porch facing the *mahādēvāra* and is supported by 6 pillars sculptured in 3 panels on all the four sides. The sculptures on one of the pillars illustrate the story of Bhīma killing the demon Baka. In the top panel we see Bhīma carrying a linga and worshipping it. In the middle we see Dhārmaraṇa seated with his mother and brothers and in the bottom panel we see Bhīma conveying food in a curt closing with Bakn and killing him. Among other sculptures on the pillars may be mentioned the hunter Kannappa kicking a linga an elephant worshipping a linga with a lotus, Dakṣiṇāmūrti, a huntress getting a thorn taken out of her leg a *gandabhīrinda* with a human body holding an elephant and a *śarabha* in the two hands a five-headed figure holding a balance and the sage Vyāghrapada with a tiger's body worshipping a linga. The ceiling of the *navaranga* has Umāmahēśvara in the middle and the *aṣṭā-dīpālakas* around. Two inscriptions are to be seen at the temple.

Kalavaradurga or Skandagiri—The most prominent height to the north of Nandidrug, from which it is 5 miles distant forming part of the same range. The summit 4749 feet above the sea was formerly fortified and directly commanded the town of Chik Ballapur. The Papāghni river is said to have its source in this hill. The fort was taken by the British in 1791 and has been dismantled.

Kalavaradurga or Skandagiri.

Kandavara—A village in Chik Ballapur Taluk. Population 1047. The large tank at Kandavara has two good

Kandavara.

sluices, the south one having at the bottom on both sides figures of an elephant and a lion, which is peculiar. The top stone has on the east face a figure of Gajalakshmi in the middle and figures of dancing women and drummers at the ends. It is worthy of notice that the west face of the stone has a figure of Ganapati flanked by elephants.

To the north-west of the Jvaraharēsvara temple here is a fine Garudagamba (or pillar sculptured with a figure of Garuda, the vehicle of Vishnu), about 40 feet high, on an ornamental pedestal sculptured with perpendicular bands of scroll work on all the sides. The pillar, which is rather slender for its height, is ornamented on all the four faces with scrolls containing figures in every convolution. Opposite to it once stood a Varadarāja temple, whose materials were, it would appear, removed and utilised for the Chitrāvati pond. At the entrance to the Mutyālamma temple is a good figure of a horseman with an umbrella-bearer behind.

Kaundinya

Kaundinya.—An affluent of the Pālār. It rises in the Kurudumale hill near Mulbagal. Taking an easterly course, after feeding some smaller tanks, it falls into the large one at Nangali. Thence crossing the frontier near the village of Pote-nagavara it turns south-east near Palamnēr, and flows into the Pālār near Gudiyāttam.

Kumādvati
or Kundar

Kumadvati or Kundar.—A tributary of the North Pinā-kini. It rises in the Bangalore District, west of Makalidurga, and in its course northwards flows through the Goribidnur taluk, whence it enters the Tumkur District in Madhugiri taluk.

Kolar

Kolar.—A taluk in the centre towards the south. Area 3 149 square miles. Head-quarters at Kolar. Contains the following hobhs, villages and population —

Hobhs	Villages	Villages classified				Popula- tion
		Govern- ment	Sarva- manya	Jodi	Kayam gutta	
1 Kolar	62	53	2	5	2	25,958
2 Vakkaleri	56	43	1	9	3	10,029

Hobli	Villages	Village classified				Population
		Government	Sarva manva	Joda	Kayam gutta	
3. Vemagal	70	33	1	5	0	17,598
4. Sugatur	44	37		5	2	10,069
5. Holur	51	40		9	2	10,904
6. Huthur	50	34		13	3	12,419
Total	315	144	1	46	21	50,990

No.	Place	Population
1	Kolar	13,239
2	Vakkaleri	1,028
3	Kyalanur	1,917

Principal places with population.

The Palar runs through the northern and eastern parts of the taluk, the western side is occupied with the ranges of the Kolar and Vakkaleri hills. It is generally well cultivated including even the table land on the Kolar hills. There are 300 tanks, of which at least ten may be called large. There are also numerous fine wells, especially in the south with water close to the surface. The dry crop soils are generally red, mixed with sand. The best soil is found in Holur and the old Dalsanur hobli where also stretches of black soil are met with. Silk worms are reared in many of the villages the silk being exported.

The revenue settlement was introduced in 1889 and the revision settlement with effect from 1925-26. The cultivable area was distributed as follows —

Occupied area —

Dry	49,657 acres
Wet	9,457
Garden	4,543

Unoccupied area —

Dry	5,050 acres
Wet	209
Garden	26
Kharab	82,786
Inam	12,803

The total Revenue Demand for the year 1921-22 was Rs 358,428-12-4, the demand under Land Revenue being Rs 1,52,339-11-11.

The old Bangalore-Madras road passes through Kolar running west to east, from Hoskote to Mulbagal. From Kolar there are also roads south to the railway at Bowringpet north to Srnivaspur, north-west to Nandi, south-west to Malur and south-east to Betamangala. There is also a short road from Vemagal leading to Malur.

Kolar

Kolar —The chief town of the district, situated in 13° 6' N. lat., and 78° 7' E. long., 43 miles east north-east of Bangalore by road, but connected with it by the Mysore State Railways from the station at Bowringpet, 11 miles to the south.

Population in 1921	Males	Females	Total
Hindus	4,692	4,563	9,255
Muhammadans	1,805	1,650	3,455
Christians	257	318	575
Jains	60	15	75
Animists	3	4	7
Total	6,818	6,550	13,368

Kolar is a place of great antiquity, but has passed through so many vicissitudes, and been so devastated by warfare in modern times, that but little now remains in it that is ancient. It was founded by the Gangas early in the Christian era, if not in existence before. Though Talkād was their capital, the title "Lord of the city of Kuvalala" (or Kōlālā the old names of Kolar), is assumed by all the Ganga kings down to the 11th century, and also by the Chālukya princes whose mother was of the Ganga family. When the Ganga power was overthrown by the Chōlas in about 1001, Kolar passed into the hands of the latter, and from inscriptions it would appear that the existing temple of Kōlāraṁa may have been erected in the time of Rājendra Chōla. Early in the next century the Hoysalas drove out the Chōlas from

Mysore, and Kōlala is specially mentioned among the conquests of Vishnuvardhana. When in the latter half of the 13th century, a partition of the Hoysala dominion took place between the two sons of Sōmēsvara Kolar was included in the Tamil districts and fell to the share of Ramasastha. But even up to this time a family of Chōla Gangas continued in power there who still bore the title Lord of the city of Kūvalala.

Passing over the early Vijayanagar period, we come to the 15th century, in which Timma Ganda with the title of *Chikla Rāya* received authority to repair the fort of Kolar. Bijapur next subdued the place and in 1639 Shahji, father of the celebrated Sivaji, became the Governor of this with other Districts and often resided there. The Moghals took it fifty years later, and so about 1720 Fāte Muhammad, father of Haidar Ali, became Fāujdar of Kolar, under the Subadar of Sira, who had a residence on the Kolar hills. After various fortunes, Kolar was ceded to Haidar Ali in 1761. It was subsequently at times again lost to Mysore. In 1768 it was taken by the English under Colonel Donald Campbell. In 1770 it was taken by the Mahrattas under Madhu Rao. In 1791 it was again taken by the English under Lord Cornwallis but at the peace of 1792 was restored to Tipu Sultan, and since then has been included in the Mysore territory.

Of the fort, Mackenzie, writing in 1801, says — 'The fort of Kolar is far from being strong or tenable to any degree. It is throughout built of mud, with a kind of *fausse braye* and a very shallow ditch round it. The western gateway is very intricate, and as long as one good half of the whole fort but the eastern one is hardly protected at all. There is a cavalier near to the west gate which commands the fort and surrounding tract. The works were in perfect repair at the time I surveyed them.'

The fort walls were levelled about 78 years ago and the ditch filled up. Many new streets were at the same time laid out. The Kolar tank on the east is a fine sheet

of water. The town contains the usual District offices for Deputy and Assistant Commissioners, School, Dispensary, Barracks, etc. There is also an orphanage, now under the Methodist Episcopal Mission. The *Makbara* or tomb of Haidar Ali's father is one of the principal old buildings, and is still maintained with an endowment.

The old roads by the Mugli and Naikaneri passes from Madras and the districts east of the Ghāts to Bangalore united at Kolar, and before superseded by the railway, brought a continual influx of travellers and pilgrims to the town from both sides. The result was frequent outbreaks of Cholera, as a hot-bed for which fell disease Kolar was long notorious. The diversion of this heterogeneous stream of humanity, no less than superior sanitary arrangements, have entirely freed it of that scourge for many years. Scorpions abound, whose sting is usually venomous and often fatal. A pit under the entrance to the Kōlāramma temple is full of scorpions, which make a hissing noise on being disturbed, and among the offerings presented at the temple, it is customary to include the figure of a scorpion in silver. The mulberry is cultivated for the rearing of silk worms. Turkeys are reared in large numbers for export to Bangalore, Bellary and other places. *Kamblys* or coarse blankets are also manufactured. A large fair takes place on Thursday, attended by about 2,000 people, and 700 cattle.

The Kōlāramma temple here has more than a local reputation. It is an ordinary structure in the Dravidian style of architecture, though the *mahādvāra* has an imposing appearance with a well-carved doorway. It appears that the *mahādvāra* and the *mukha-mantapa* had lain buried under the earth to a depth of about 7 or 8 feet, the upper portions alone being visible, so that it was with some difficulty that people could get into the temple. The heaps of earth were removed as part of relief work during the distress of 1909-1910 and this was thus instrumental in bringing to the light of day several inscribed stones which had not been seen up to date. These consist of six large slabs forming the lower course of the wall to the left of the *mukha-mantapa* and contain fragments of a number of Rājendra-Chōla's

Tamil inscription The slabs appear however, to have been displaced at some former time when that portion of the temple was renovated thus accounting for the fragmentary nature of the epigraphs on them The same remark applies also to the stones of the basement of the *mukha mantapa* a large portion of which has also been lately unearthed They contain fragments of Chōla inscriptions in Tamil without any continuity the first portion coming last the middle portion coming first and so on There have also been unearthed four more slabs which were found lying near the temple One of them at the back of the temple contains a Kannada inscription the others are sculptured and look like *ciragals* Among the latter there is a large slab about 6 feet by 4 feet representing a spirited scene of a battle of probably the Ganga period For the space of about 4½ feet from the top of the slab is covered with sculptures of horses, elephants soldiers celestial nymphs celestial cars (*vimān*) etc., with the lower portion left quite vacant This space was apparently intended for an inscription which for some reason or other was not engraved In the centre of the slab there is a big standing figure of a man with a peculiar dagger like weapon in the right hand and what looks like a shield in the left Behind it there are three attendants one holding an umbrella and the other insignias of royalty Opposite to this figure is represented a king riding on an elephant with a number of horsemen behind Each of the other slabs has only one standing human figure sculptured on it

Inside the temple there are images of the *Saptamātrikā* (the Seven Mothers) and the image of Kōlāramma in the form of Mahishasuramardini with 8 hands and a demon under its feet In another room to the right we have exact copies of all these images in mortar There is also here a stone image about 6 feet high which according to the *pūjari*, is Kapala bhairava but which people call Mukanaucharamma owing to its nose having been broken off by the Muhammadans at some former time According to some, this is the real image of Kōlāramma which owing to its mutilation, was removed from its place, some other image being set up in its stead Be this as it may the image is of interest as it is supposed to be associated in some mysterious way with scorpions It is stated that on the 5th lunar day of the bright fortnight of *Vaisākha* every year a scorpion issues forth from a hole from below the

pedestal of the image, stays near its foot for about half an hour and then disappears. To escape scorpion stings, people make as stated above, votive offerings of silver scorpions to this goddess. The outer walls of the *garbhagriha* of the Kōlāramma temple are covered from top to bottom with Tamil inscriptions of the Chōla period.

The other temples here are the Sōmēsvara, Ānjanēya, Nanjundēsvara, Venkataramana and Kōdandarāma temples. The last two contain no inscriptions. The Sōmēsvara temple is a good specimen of Dravidian architecture. The *mahādvāra* is a fine structure with an ornamental doorway and ceiling. The *mukha-mantapa* or front hall is a fine structure supported by carved pillars like those at Rangasthala and Nandi. There is a row of elephants on the basement all round the temple with here and there a *linga* or some other object interposed. The *kalyāna-mantapa* in the *prākāra* of the temple is a fine piece of workmanship both in design and execution. It is built of black stone unlike the other parts of the temple which are built of granite. The temple has also a lofty *gōpura*, the top portion of which is gone. It is no doubt a building of some antiquity, going back at least to the Hoysala period. It is strange that such a fine temple does not contain any old inscriptions. Two Kannada inscriptions of the Vijayanagar period are, however, to be seen on the walls of the storehouse and *Yāgasāla*. But these are modern. A Kannada inscription is to be seen on the Ānjanēya temple and another in the Nanjundēsvara temple. Two Persian inscriptions engraved on tombs near the Darga are also worthy of note.

The Darga has a large establishment and receives a monthly grant from the Muzrai Department. It appears that among the stipendiaries are some Hindus including a few Brāhmins also.

Municipal Funds	1920-21	'1921-22	1922-23	1923-24
Income	31,713	27,006	26,152	27,828
Expenditure	33,598	27,670	19,732	27,318

Kolar-betta or hills, also bear the name of Satasinga parvata, or the hundred peaked hills. The range extends

along the north west of the town of Kolar the highest point being 4,026 feet above the sea. The hills present a barren and rocky appearance on all sides but on the top is an extensive plateau occupied by villages and irrigated fields. A perennial spring on the east side named the Antara Ganga or subterranean Ganges is esteemed sacred.

Kolar-betta—The legends connected with these hills have been referred to in the historical summary. Two centuries ago they were fortified, and here the Mughol general Khasim Khan the first Subadar of Sira for some time resided. The fort was destroyed by the Mohrattas. Kolar betta.

Kolar Gold Fields—These are in the south of the Bowringpet taluk to the east of a low ridge of hills of which Betarayan hill 3 199 feet above sea level is the most conspicuous point. They are connected by the Gold Fields Railway with the Bangalore Madras line at Bowringpet and a road runs through them from Bowringpet to Kamasandra where there is also a railway station. Information regarding the geology and the recent history and development of these gold fields has already been given in Volume I. Upwards of 35½ square miles have been leased for gold mining in the district, and the following thirteen companies are now at work (arranged alphabetically) Kolar Gold Fields.

Company	Capital in £.
Balaghat	2,00,000
Champion Reefs	2,20,000
Gold Fields of Mysore	2,75,000
Indian Consolidated	—
Kolar Central (East)	2,00,000
Mysore	2,50,000
Mysore Reefs	2,00,000
Mysore West	1,50,000
Mysore Wynaad	1,50,000
Nine Reefs	62,500
Nundydrug	2,20,000
South East Mysore	—
Urigan (Oreogum)	2 65,000

The original Kolar Concessionaires' Company has gone into liquidation and the blocks held by it are either owned

by the Companies abovementioned or sub-leased to the Gold Fields of Mysore Company Mysore, Ooregum, Nandidrug and Champion Reef are the only mines where operations have so far been attended with satisfactory results.

Kuruda-
male

Kuruda-male.—Kuruda-male or more correctly Kūdu-male, is the hill 4 miles north-west of Mulbagal, at the foot of which are the ruins of several large temples, with sculpture attributed to Jakanāchārī, but apparently restored by Ilavanji Rāya and his companions from the south, mentioned in the account of Āvanī The principal are those of Sōmēsvara and Ganēsha. The elevation of the hill is 3,312 feet above the level of the sea

The Sōmēsvara temple, though small, is a splendid specimen of Dravidian architecture It is built of black stone and presents a very elegant appearance without excessive ornamentation It faces south with a fine porch in front supported by sculptured pillars The outer walls are decorated with beautifully carved pilasters and niches, the work on those of the *navaranga* being more artistic than that on the walls of the *garbhagriha* and *sukhanāsi* This is accounted for by the statement that the former was the handiwork of Jakanāchārī's son, while the latter was executed by the father It may be stated here that the stories popularly related of a sculptor named Jakanāchārī appear to be purely imaginary The word is merely a corruption of Dakshināchārya, a southern sculptor or mason, and does not denote any particular sculptor The *linga* faces east with only a perforated window opposite to it instead of an entrance as usual Near the window stand three figures which are said to represent the later Chōla chief Ilavānji Vāsudēva Rāya and his consorts The chief belongs to the 13th century and is said to have built or renovated the temple The male figure is similar to the ones in the Pārvatī temple at Āvanī Over the window are sculptured two small standing figures supposed to represent Jakanāchārī and his son, who built the temple The interior is dark The pillars of the *navaranga* are carved with sculptures representing in some cases scenes from the *Sarva Purānas* The figure of the sage Kaundinya after whom, according to the *Sthala-purāna*, the place is called Kaundinya-kshētra is pointed

out in the lowest panel on the west face of the south-east pillar. Opposite to the south entrance is a *linga* called Kūtandēvara enclosed in mud walls said to have been set up by the *Pujari*. This ugly structure mars the beauty of the *nayaranga*. In the *mahadvara* the basement has a frieze of black stone amidst others of granite which enhances its beauty. The oldest temple in the village is the Mahāganapati temple with a huge figure of Gaṇēśha about ten feet high with pedestal. In front of it is the figure of a big rat with housings seated on a pedestal. The Chennaravasthāmi temple now in ruins is also a fine structure with its *garbhagriha* built of black stone the other parts being in granite. The images of this temple which are well carved are now kept in the Mahaganapati temple. It is said that the correct name of Kurudumale is Kūdumale because the gods assembled (*kudu*) here for worshipping and obtaining boons from Mahaganapati, and that the place had the names Canachagiri, Kutachala and Yādavachula in the past three *yugas* its name in the present *yuga* being Kanundinya kshetra. The Kanundinya a tributary of the Palar has its source here which is said to have been the site of the hermitage of Kanundinya rishi.

Kushavati—There are two streams in the district of Kushavati this name only a tributary of the Papaghni, and the other of the Chitravati. The former rises from the Vuli Isvara hill near the boundary of the Punganur Zamindari and after forming the Yerakalave tank in this district crosses the frontier north westwards near Mursanpalli. It then goes to Tippasandra tank of Mandannpalli in the Cuddapa District and ultimately falls into the Papaghni.

The other Kushavati rises from Avalu konda or cow hill to the north of Nandidrug and after forming the Bairasagara tank before the town of Gudibanda runs in a northerly direction almost parallel to the Bangalore Bellary high road, and falls into the Chitravati some miles beyond the frontier.

Madivala.—A village near Mnlur. There are several Madivala places, however, so called in this district, and in the east of

the Bangalore district, each of which has a large Siva temple with many inscriptions in Grantha and Tamil characters. The name is a euphemism for a washerman. The following are those in Kolar district —

<i>Taluk</i>	<i>Hobli</i>
Bowringpet	.. Bowringpet
Do	.. Kyasambah
Kolar	Vemgal
Do	Vokkaleri
Malur	Malur
Mulbagal	Mallanayakanhalli

This Madivala appears to be one of the oldest. It has many inscriptions in it dating from the Chōla times. One of them is of the Hoysala king Rāmanātha, who belonged to the 13th century. Most of the others record grants either by Chōla, Hoysala, or Vijayanagar kings.

The Gangādhārēsvara temple here appears to be an old structure, going back to the Chōla period. The remark in the last Edition of this *Gazetteer* (II, 139) that Madivala has inscriptions dating in A.D. 988 appears to be incorrect, the earliest inscription here being dated in A.D. 1112 in the reign of Kulōttunga-Chōla I. It may also be mentioned here that Madivala is a Kannada corruption of the Tamil *Madavilagam* (or temple precincts) and has nothing to do with the Kannada word *madivala* which means a washerman.

Malur

Malur.—A taluk in the south-west. Area 266 56 square miles. Head-quarters at Malur. Contains the following hoblis, villages and population —

Hoblis	Villages	Villages classified				Popula- tion
		Govern- ment	Sarva- manya	Jodi	Kayam- gutta	
1 Malur	88	48	2	31	7	16,568
2 Masti	63	68		14	1	12,129
3 Lakkur	57	41		15	1	13,852
4 Narasipur	62	37	5	16	4	12,047
5 Tyakal	84	37		11		13,063
Total	374	267	7	87	13	47 659

No.	Place	Population
1	Malur	37,50
2	Masti	1,525
3	Lakkur	1,623
4	Narasapur	14,5
5	Santehalli	491

Principal places with population.

The taluk was abolished in 1881 but restored in 1886. It lies along the watershed separating the valleys of the Palar and South Pinakini. The elevated tracts are bare or covered with low jungle. The most fertile part extends along the eastern side from Narasapur down to Masti through which flow streams which are tributary to the South Pinakini. One of these rising south west of the Vokkalari hills, is named the Marlands. There are as many as 385 irrigation tanks of which 55 are of good size. Excellent potatoes are grown in the taluk. The predominant soil is red, of considerable depth, but much mixed with the sand. It is best in Malur and Lakkur hoblis, but towards the hills of Narasapur and Tyakal becomes inferior changing to gray and falling off in depth. This is the case also in the south where rocks moreover, crop up at intervals.

The taluk is crossed from east to west by the Bangalore branch of the Madras railway which has stations at Malur and Tyakal. From Malur there are roads to Hoskote, to Narasapur to Kolar to Masti, and to Hosur in the Salem, District.

The Revenue Settlement was introduced in 1890 and the resettlement with effect from 1925-26. The culturable area according to resettlement was distributed as follows —

Occupied area —

Dry	42,031 acres
Wet	4,542
Garden	3,196

Unoccupied area —

Dry	2,717	'
Wet	103	"
Garden	2	'
Kharab	60,917	
Inam	8,368	

The total Revenue Demand for the year 1921-22 was Rs 2,19,922-8-6, the demand under Land Revenue being Rs 1,11,345-5-1.

Malur

Malur.—A town 18 miles south-west of Kolar, on the Bangalore branch railway. Head-quarters of the Malur taluk, and a Municipality.

Population in 1921	Males	Females	Total
Hindus	1,618	1,613	3,231
Muhammadans	275	246	521
Christians	13	10	23
Jains	2	2	4
Total	1,908	1,871	3,779

A fair held on Thursday is attended by about 1,000 people, and an equal number of bullocks are brought for sale.

It is said to have originally borne the name of *Mallikā-pura* or jasmin town, from being surrounded with the gardens which supplied garlands to the Mārkaṇḍēśvara temple on the Vokkaleri hill, the village forming part of the endowments of the temple. In the 16th century it was one of the possessions of Timme Gauda, the chief of Hoskote. From him it was captured by the Bijāpur army and held as *jāgu* by several mansubdārs. Subsequently, it was stormed from the Mahrattas by Hrida Ram Singh, a Rājput Zamindār, who enlarged it and gave it the name of *Malur*. His descendants continued in possession until the subjection of the country by Haider Ali.

The Sankaranārāyana temple at this place has a linga which is said to be marked with the attributes of Śiva and Viṣṇu. The *utsava-vigraha* or metallic image, called *Sōma-skanda-mūrti*, is a fine seated figure with four hands, two of them holding an antelope and an axe, the other two being in the *abhaya* or fear-removing and *varada* or boon conferring attitudes with Pārvatī standing at the side, both the figures

being on one and the same pedestal. The ruined Kurubara devara-gudi or temple of the shepherds, which is now converted into a *garadi* or gymnasium has in front of it two long rows of *cirara-gudis* or hero-shrines, which are built of four large slabs of stone, three of them forming the walls and the remaining one the roof. The slabs at the back are sculptured with figures of heroes and their wives.

Municipal Funds	1920-21	1921-22	1922-23	1923-24
Income	5,750	3,345	5,913	3,813
Expenditure	5,507	3,683	5,078	5,203

Manchanabale—A village in Chik Ballapur taluk. Population 1016. The Ānjanēya temple at this place has a fine four pillared *mantapa*. The pillars are very neatly dressed and sculptured on all the four faces. The ceiling panel has lotuses carved on it. It is noteworthy that the *mantapa* has ornamental arches in the Saracenic style above the beams on all the four sides. It is said to have been erected about a hundred years ago.

Manchanabale

Manchenahalli—A village in the Goribidnur taluk, on the right bank of the North Pinakini 9 miles east of the *kaaba* on the Chik Ballapur-Goribidnur road. Head-quarters of the hobli of the same name. Population 2,446.

Manchenahalli

The car festival of Rāmadēvaru is held for 6 days from full moon in *Chaitra* and is attended by about 800 people.

Markanda—A tributary of the South Pinakini, is formed by two branches, one rising from the south west of the Vakaleri hills and the other from the Tyakal hills. Both unite on the south-east of the town of Budikote in the Bowringpet taluk. The stream then strikes towards the south and soon after leaves the District, descending the Ghāts towards the east of Ankusgiri, where it joins the Vṛṣabhāvatī.

Markanda

Masti

Masti.—A village in the Malur taluk, 9 miles south of the kasba, with which it is connected by road Head-quarters of the Masti *hobli*. Population 1,898.

A fair held on Wednesday is attended by about 600 people

Masti appears to have been founded in the 16th century by Chokka Babati, a petty chief from the neighbourhood of Conjeeveram, who fled to save his daughter from disgrace by the ruler of that country He was summoned to Vijayanagar, where, having rendered some important military service, he was confirmed by Achyuta-Rāya in the possession of a territory yielding a revenue of 20,000 pagōdas, and made Masti his capital. His successors subsequently acquired Ankusgiri, with which the family became identified On the capture of Kolar by the Mahrāttas, Masti was united to Hoskote and shared in the after fortunes of the district, until annexed to Mysore by the conquests of Haider Ali

Melur

Melur.—A village in the Sidlaghatta hobli, of the Sidlaghatta taluk, about 6 miles south of the kasba Population 1,001.

A cattle fair takes place in connection with the Gangādēvi *parishe*, held for 10 days from full moon in *Charitra*. It is attended by about 10,000 people and bullocks to the same number are brought for sale

Mulbagal

Mulbagal.—A taluk in the east Area 326 98 square miles Headquarters at Mulbagal Contains the following hoblis, villages and population —

Hoblis	Villages	Villages classified			Kayam gutta	Population
		Government	Sarva-manyā	Jodi		
1 Mulbagal	58	50	5	2	1	14,060
2 Dugga-sandra	65	54	2	4	5	14,524
3 Avani	74	61	1	10	2	14,634
4 Mallanai-kanahalli	83	72	5	4	2	9,826

2	Thayalur	1 65*
3	Nangali	1,512
4	Agara	1 130

Principal
places,
with popu-
lation.

The taluk is drained on the west by the Palar, the streams on the east also running into that stream below the Ghāts in the North Arcot District after an easterly and southerly course. Excepting the range of hills extending north from Mulbagal the taluk is well cultivated especially eastwards towards Nangali. The chief feature of the taluk is the quantity of rock cropping up everywhere in the shape of rocky hills and hillocks, composed of loose boulders of gneiss. Large boulders are promiscuously scattered about everywhere and masses of sheet rock all over the country. There are some rocky hills of considerable altitude near Mulbagal and Avani. The watershed runs nearly north and south through the centre of the taluk, the fall of the land to the west being gentle and to the east abrupt and steep. To the west there are rolling downs, broad valleys, and generally shallow tanks, to the east there are narrow valleys deep tanks, much broken ground and rocky ridges. The number of tanks, large and small, is no less than 460. Irrigation from tanks is greatly supplemented by water from wells which are usually open pits only built up with stone where the *yāta* is placed, and with the water close to the surface often flush with it.

The dry crop soil is generally poor grey and sandy. In the wet lands there is much sand and clay, and efflorescence of potash is not uncommon.

The Revenue Settlement was introduced in 1887 and the revision settlement with effect from 1924-25. The culturable area according to resettlement was distributed as follows.—

Occupied area —

Dry	48,501 acres
Wet	11 062
Garden	4 949

Unoccupied area —

Dry	18,336 acres
Wet	985 „
Garden	230 „
Kharab	1,13,812 „
Inam	12,194 „

The total Revenue Demand for the year 1921-22 was Rs 2,03,398-3-9, the demand under Land Revenue being Rs 1,61,476-10-9

Mulbagal

Mulbagal — Mulbagal or more properly *Mūdla-bāgalu*, eastern gate, so called from being situated at the eastern pass from the tableland of Mysore to the temple of Tirupati. The name also appears as Muluvāyi in old inscriptions, which conveys the same meaning. It is an important town, 18 miles east-north-east of Kolar on the old Bangalore-Madras road by the Mugli pass. Head-quarters of the Mulbagal taluk and a Municipality.

Population in 1921	Males	Females	Total
Hindus	1,911	1,1,984	3,895
Muhammadans	939	821	1,760
Christians	8	6	14
Jains	2		2
Total	2,860	2,811	5,671

Some ancient temples exist near the town and the tomb of a saint named Haider Wali attracts great numbers of Muhammadans to the place on the celebration of his anniversary. Pilgrims to Tirupati who pass through Mulbagal from all the western countries go through the preliminary ceremony of purification by shaving their heads and bathing in a pond named Narasimha tirtha. Sugar-cane and fine paddy are cultivated in the neighbourhood, Mulbagal sugar and Mulbagal rice being esteemed the best in the district.

The taluk formed part of the Mahāvah or Bāna territory from early in the Christian era. Towards the close of the

10th century, the Pallavas became the overlords and the Vaidumbas held some of the north. It was the seat of government for the Kolar country when first brought under the sway of the Vijayanagar kings who were represented by two officers named Lakkana Dinnayak and Mādana Dinnayak. It subsequently came under the control of Timme Gauda of Hoskote, and shared in the fortunes of the District as elsewhere related. It was besieged by the British in June 1768 under Colonel Campbell, and betrayed by the killedar. The British field deputies afterwards took it upon them to put Muhammad Ali's troops in charge, who in their turn again betrayed it to Haider. But it was recovered in October by Colonel Wood, who after very severe fighting amidst the congeries of granite rocks and boulders scattered over the whole surface of the plain defeated all the efforts of Haider and his vastly superior force to prevent its recapture.

The Anjaneya temple at this place is a large structure with a spacious compound neatly kept with flower plants etc. A few modern inscriptions have been found here on the brass plated doorways. An inscription on the parapet over the front *mandapa* tells us that it was repaired in 1874. There are also a few labels below the mortar figures of Vishnu on the parapet giving their names. Several other temples are also found in the enclosure. The Śaṁśvara temple has a *sino largo* figure of Sūbrāhmanya seated on the peacock with 12 hands the faces being shown thus—3 in front, 2 at the sides and 1 on the back. On the Mulbagal hill are to be seen a couple of epigraphs one in Tamil and one in Kannada. The hill is fortified and commands a good view of the surrounding landscape. There are two gigantic boulders at the top known as Mahādēvanagundā and Babaiyagundā. The former has a ruined brick building at the top. The latter, loftier than the other, is held sacred by Muhammadans. There are two reservoirs on the hill called Rāma tirtha and Lakshmana tirtha. The *brindāraṇa* or tomb of Śrīpādarāya situated at a distance of about a mile from Mulbagal, is also a place of visit. Śrīpādarāya was a great Mādhva guru who flourished in the latter half of the 15th century and had a *matha* at Mulbagal which is even now in existence. He and his pupil Vyāsārāya are the only two among Mādhva gurus who are

distinguished by the title *rāya*. Tradition accounts for this by saying that the two *gurus* sat on the Vijayanagar throne for short periods and ruled the kingdom. From the *Vyāsaviyaya*, a work giving an account of Vyāsarāya, we learn that the king being warned of an evil *muhūrta* approaching and advised to put some one else on the throne for the time, Vyāsarāya, who was chosen by the state elephant, was anointed to the throne for that period. This was during Krishna-Dēva-Rāya's time. In a stanza of the *Srīpādārāyāśataka* a small work in praise of Srīpādārāya, it is stated that he absolved king Vīra-Narasīnga from the sin of having killed a Brāhman and sat on the throne at his request. The stanza runs thus —

Srīmad-Vīra-Narasīnga-Rāja-nripateḥ bhū-dēva-hatyavyatham

durikṛitya tad-aṅgīt-ajjvala-mahā śimhāsane samasthitaḥ.

The king referred to here is apparently Sāluva-Narasīnga-Rāya, the supplanter of the first Vijayanagar dynasty. On the *brindāvana* is sculptured a seated figure of Srīpādārāya which is daily worshipped. A small silver *brindāvana* of the *guru* is carried in procession on a car every year. The place is held very sacred by the Mādhyas. To the right of the *brindāvana* is a temple of Narasīmha, in the *pradakṣhina* of which is a small cave-like shrine with a seated figure of Vyāsarāya.

The hillock near Mulbagal is known as Hanchukalbetta.

Municipal Funds	1920-21	1921-22	1922-23	1923-24
Income	5,272	5,648	5,111	6,255
Expenditure	4,754	4,030	5,055	8,641

Nandi — A village in the Chik-Ballapur taluk, at the north-eastern base of Nandidrug. Head-quarters of the Nandi hobli. Population 1,033.

It contains a large temple dedicated to Bhōga Nandīvara, which is surrounded with Chōla inscriptions in the Grantha character. The foundation of the village is attributed to Bairr Gauda of Āvati, but the temple is much older. A Pallava and several Chōla inscriptions are in the courtyard. The village was for some years a British military station, till the troops

were removed in 1808. Writing in 1809, Colonel Welsh says — 'The Pettah (that is, the present Sultanpet) is extensive, and was formerly connected with the foot of the hill by a line of works and deep ditch now out of repair and useless. It had very good bazars in it, and the place altogether is famous for the best potatoes and soft sugar in the Peninsula while the gardens abound in almost every fruit and vegetable of Europe and Asia combined. A large annual fair takes place at the *Sivaratna* festival, attended by 20 000 people. The best bullocks reared in the country are brought for sale then and as much as Rs 1,000 is said to have been offered for a pair of draught bullocks. A cattle show was held by Government at this season for several years, and prizes were distributed, but in 1874 the show was transferred to Bangalore.

The temple here is perhaps the finest and the most ornate of the Dravidian temples in the State. It measures 370 feet by 250 feet. The *Sūmēśvara* temples at Kurudumale and Kolar the *Lakṣhmaṇēśvara* and other temples at Āvanī and the *Vaidyēśvara* temple at Talkād no doubt show some good work but none of them can stand comparison with this temple. It somewhat resembles the *Hoysalēśvara* temple at Halebid in being a double temple consisting of two separate shrines standing in a line with two *Nandi* mantapas in front and in having a small intervening shrine. The north shrine is dedicated to *Bhōganandīśvara* and the south shrine to *Arunāchalēśvara*. Each consists of a *garbhagriha*, a *sukhānāṭi* and a *navaranga* and has two pierced windows opposite to each other in both the *sukhānāṭi* and the *navaranga*. To the left in the *navaranga* of the north shrine is a seated figure, about 3 feet high, with a bare head, which is said to represent a *Chōla* king. It is decorated with ornaments and is in the posture of meditation. There is also to its left a standing figure of *Sūrya* holding lotuses in the two hands. The four pillars of the *navaranga* are carved with fine small figures on all the sides. The ceiling over them, about 7 feet square has, *aṣṭadīpālakas* in their proper directions with *Siva* and *Pārvatī* in the central panel. The sculptor appears to have made a mistake in showing the bull below *Pārvatī* and the lion below *Siva*. In front of the *navaranga* entrance is the *Nandi* mantapa mentioned above with doorways on the east, north and south and with two intervening pillars in place of the doorway on the west. The south

and east doorways are inscribed on both the sides as also the basement of the *mantapa*. The inscriptions on the basement are now concealed by the basement of a later structure being joined to it. The epigraphs belong to the Chōla and Hoysala periods. To the right in the *navaranga* of the south shrine is a curious figure of Ganapati, about 3 feet high, with a small lion face and a lean proboscis. The pillars are plain, and the ceiling over them with only two figures of the *dikpālakas* bears evidence to the renovation of this portion of the shrine. On the floor are a few prostrating figures with labels over them, one of them representing the Āvati chief Bayrappa. Similar figures are also found on the *navaranga* floor of the north shrine. In front of the *navaranga* entrance there is the Nandi-mantapa as in the other shrines, but with uninscribed doorways in all the four directions. Between these two shrines comes the small shrine mentioned above. It consists of only a *garbhagriha* and is situated in a line with the back portion of the *navaranga* of the north and south shrines, with an open space of about 2 feet all round intended for the *pradakshina*. It is styled the Umāmahēsvara shrine and contains the metallic images of Siva and Pārvati belonging to the north shrine, the south shrine having no such images. On the outer walls runs a frieze, about 2 feet wide, of large images representing the marriage of Siva and Pārvati, with a smaller frieze of swans above it. Behind the shrine runs a fine screen wall adorned with two pierced windows and sculptured in the centre with a figure, about 2 feet high, of Dakṣiṇāmūrti with matted hair and sandals in the act of receiving alms from women shown in a row on either side. The women seem to represent the wives of the sages of the Daruka forest who, according to the *Purāṇas*, were captivated by the beauty of Siva and rivalled each other in their eagerness to show him hospitality. In front of the shrine stands a magnificent four-pillared *mantapa*, called Kalyāṇa-mantapa, built of black stone. The pillars are beautifully carved from top to bottom. The delicacy of work and the elaboration of details are simply marvellous. Nowhere else is such exquisite workmanship to be seen, not even in the fine Hoysala temples of the State. Birds, beasts, foliage and human figures are perfectly chiselled. Not even an inch of space is left vacant. Each pillar has two female figures, about $2\frac{1}{2}$ feet high, standing on two sides in front of pilasters which are surmounted by

elegantly carved miniature turrets, the other two sides having vases with creepers above on which tiny birds are perched in a variety of poses. There is also between the female figures a third pilaster surmounted by a similar turret. The whole is carved out of one block of stone. The ceiling over the pillars, about 5 feet deep, has figures of the *ashṭadīkṣpālakas* etc., carved on the different tiers. On the inner face of the beams of the *mantapa* are sculptured with attendants on both sides these figures, west beam Siva and Pārvatī, north beam, Viṣṇu and Lakṣmī, east beam Agni (or the god of Fire) with two heads and his consort Svaha, south beam, Brahma and Sarasvatī. In front of this *mantapa* is a beautiful open *mukha mantapa*, supported by 12 black stone pillars which are very neatly dressed and sculptured in three panels all round. Eight of the pillars have, however, on one side a well-carved female figure, about 3½ feet high standing in front with only one sculptured panel above. The figures on the pillars are well carved and sharp in outline. As a rule the lowest panel has a lion. Among the figures worthy of notice may be mentioned Hanumān playing on the vina or lute, the Matsya or Fish incarnation of Viṣṇu killing Śōmaka, Hanuman pulling up the *sakata-linga* (linga made of sand) worshipped by Rama, Kinnara male and female with the form of a bird in the lower half playing on the *ṭintu* Vyāghrapada with the form of a tiger in the lower half worshipping the linga, Viṣṇu as a drummer, Rāvana as an ascetic, Viṣṇu with folded hands with a boar shown at the side in allusion to his going in that form in search of the base of Lingodbhava murti, a form of Siva, sculptured on the adjoining panel, Nārada playing on the *ṭintu*, and Child Kṛṣṇa removing butter from a pot. Above the six pillars of the front two *onkanas* runs a frieze, about 1½ feet wide of black stone figures in niches separated by well-carved pilasters. The figures represent Siva and Pārvatī with attendants, the seven sages, Sūrya and Tāṇḍava with attendant musicians among whom Brahma and Viṣṇu are shown as drummers, etc. A similar frieze is to be seen at the Gūṇākrishṇa temple at Patrenhalli, but this frieze shows better work. The plinth of the *mukha-mantapa* has a row of elephants at the bottom. The *mantapa* is clearly a later structure built in continuation of the porches and Nandi mantapas of the north and south shrines, as evidenced by the caves of the Nandi mantapas and the concealment of the

inscriptions on the basement referred to above. In the *pātālankana* or structure on a lower level adjoining the *mukha-mantapa* stands to the left of the steps leading to the latter a fine stone umbrella, about 5 feet in diameter, with a shaft about 10 feet high and $1\frac{1}{2}$ feet in diameter. This *pātālankana* is surrounded by an open veranda which stands on an ornamental plinth, about 3 feet high, and has three entrances on the north, east and south. Of the front pillars of the veranda, the end ones have three pilasters each and the others one pilaster each, as at Rangasthala.

The outer walls of the north and south shrines have pilasters, turrets and pierced windows, with a few figures here and there. The base has for the greater part a frieze of elephants, *yāls* and lions interspersed with each other. The pierced windows are a fine feature of the temple. Altogether there are 10 of them, 4 in the south shrine, 4 in the north shrine and 2 on the screen wall behind the middle shrine. They are not like the perforated windows of other temples, each has a fine figure or figures with holes in the interspaces to admit light. The south window in the *navaranga* of the south shrine has a figure of Tāndavēsvara with an old inscription on the pedestal which appears to give the name of the sculptor, while the north window has a creeper with a dancing female figure and a male attendant musician in each of the three convolutions. The south window in the *sukhanāsi* of the same shrine has a creeper with three dwarfs in various poses in the three convolutions, the north window having a figure of Subrahmanya seated on the peacock. The south window in the *navaranga* of the north shrine is similar to the one in the *navaranga* of the south shrine, while the north window has three rows of three dwarfs each separated by plain horizontal bands. The south window in the *sukhanāsi* of the same shrine is similar to the one in the *sukhanāsi* of the south shrine, the north window having a figure of Mahishāsūramardini standing on the head of a buffalo. The wall behind the middle shrine shows beautiful work. The two pierced windows on it, which are similar to each other, have well executed male figures standing on *yāls*. There are also two rows of large figures, about 2 feet high, on the wall, the upper row having a seated figure of Pārvatī in the middle flanked by three female figures on either side, while the lower has figures of Vīrabhadra and his consort, Ganapatī flanked by two male figures carrying

jack fruits on their heads a sage with a *lamandalu* or water vessel in his hand and Bhairava. The figures are in panels separated from each other by sculptured pilasters. The frieze of dwarfs at the top is specially good. The north and south shrines have fine towers built of white granite which are mostly similar in design. They are sculptured all round with figures canopied by *simhādāṭas* or lion's heads and have at the bottom a frieze of dwarfs in all sorts of postures, some very comic indeed. The top portion of the south tower is now renovated with mortar the original stone work having perhaps gone to ruin. The north tower though similar in design to the other has in addition four stone black stone Nandias at the corners and four fine images about 3 feet high, also of black stone standing in the four directions. The *Lalasa* or finial which is also of black stone is well executed. This variety of colour enhances the beauty of the tower. There are also figures above the parapet over the walls. Even the stone drains are artistically executed. Generally speaking the figures in the temple show vigour. The pose and movement of some of them testify to the skill of the artists. Though some bear evidence to the exuberance of fancy of the sculptors there are others which clearly show that they followed nature ignoring conventions and disregarding restraints. The material used being granite the workmanship reflects great credit on the artists.

The *prākāra* or enclosure has a veranda all round supported by sculptured pillars. In fact there is no plain pillar anywhere in the temple except the four in the *narāṅga* of the south shrine which appears to have been recently renovated. There are two shrines of goddesses in the *prākāra* one of Apitakuchamba consort of Aruṇāśalesvara and the other of Prasanna Pārvatī, consort of Bhūganandīvara. The latter goddess is a fine figure about five feet high. Both the shrines have like the middle shrine a row of large figures on the outer walls representing the marriage of Śiva and Pārvatī. To the north outside the enclosure is a hall known as Vasantha mantapa a fine structure supported by 16 pillars the end ones having three pilasters, the middle ones gāṇis and lions with riders and the central four vases and figures all round. Opposite to it is a four pillared lofty mantapa which is called Tulābhara mantapa. The whole is surrounded by a veranda. To the north of this enclosure again is a large square pond known as Śrīṅgi tīrtha,

also surrounded by a veranda, which has three entrances on the north, east and south. Over the veranda are fine stucco figures in niches. It is said that the Dakshina-Pinākini (South Pennār) flows from this pond. The *mahādvāra*, which is about 16 feet high, has two sets of jambs, the inner ones have on the west face *dvārapālakas* and on the north and south faces female figures opposite to each other with a creeper and scroll work above, while the outer ones have *dvārapālakas* on the east face and female figures as on the inner ones. It may be noted here that the first convolution of the scroll above the female figure on the right outer jamb shows a woman in the act of kicking a linga. It is not clear what this represents. To the right of the *mahādvāra* is a fine *mantapa* called Pārvatte-mantapa, supported by sculptured pillars, the front row of which has lions with riders. Near it are the shrines of Virabhadra and Venkataramanasvāmī, as also a pond known as Tottī-tārtha or Gare-kola, which is supposed to be supplied with water from the Nandi Hill. In front of the *mahādvāra* is a very spacious courtyard, measuring 353 yards by 146 yards, enclosed by an open veranda with three gateways and containing a well built pond. A complete survey of the temple has been made by the Archæological Department. A number of new records were discovered in it. Two of these are labels over prostrating figures on the floor of the *navaranga* of the north shrine, which represent the Āvatī chief Bayirapa, who is also referred to in *E. C. X, Chik-Ballapur 27 and 28* at Nandi. A *jātra* on a grand scale takes place every year at Nandi, at which fine cattle are sold at very high prices.

The temple here is not only the finest of the Dravidian temples in Mysore, it is also one of the oldest temples in the State. The oldest record in the temple, *E. C. X, Chik-Ballapur 26*, belongs to the close of the 9th century. It refers itself to the reign of the Nolamba king Nolambādhirāja and appears to record some repairs done to the temple. Certain copper-plates in the possession of Dodda Mastan's widow at Chik-Ballapur give us the important information that the temple was built by Ratnāvalī, consort of the Bāna king Bānavidyādhara, and records a grant to it in A. D. 810. One of the copper-plate inscriptions unearthed in a well at Nandi registers a grant to the temple in A. D. 806 by the Rāshtrakūta king Gōvinda III (793-814). As Bānavidyādhara's time is about the close of the 8th

century we may conclude that the temple built by his consort belongs to about the same period (See *M.A.R.* 1913-14, para 17). The oldest portion of the temple appears to be the north shrine which is dedicated to Bhōganandīśvara. This is very probably the temple built by Ratuāvali. The Nandi mantapa in front of this shrine has Chōla inscriptions of the 11th century. The south shrine dedicated to Arunachalīśvara though similar in design and execution to the north shrine, appears to be a later structure, judging from the characters of the inscription on the pierced window which appears to belong to about the 10th century. The inscription refers to the construction of the south shrine the name of the sculptor Kāsava being also given. The temple is of great interest as giving an example of south Indian sculpture of about the 8th century. It is fortunately in a good state of preservation.

Nandidrug, Nundydroog — A famous fortified hill in the Chik Ballapur taluk, 31 miles north of Bangalore at the termination of a range of mountains, of which it is the highest point, running north to Penngonda and the Bellary District. There is an extensive plateau at the top sloping to the west in the centre of which is a large hollow containing a wood and a well-constructed tank called the *Amritasarōvara* or lake of nectar, fed by perennial springs. The four sides are built round with stone steps, which diminish as they descend, until they meet in a point at the bottom, where there is a small shrine.

Nandidrug
(Nundy
droog)

From the earliest period, and throughout their time the Gangas had the title Lord of Nandagiri and the hill was then a Jain place. Owing to subsequent changes, and the extensive quarrying of stone in recent times for the fortifications and buildings, all traces of this have disappeared except perhaps the name Bravana tirtha, given to a deserted and now inaccessible well at the edge of the precipice on the south. But in the Gōpī nātha hill, on the north-east, is an ancient Jain inscription whose opening words are like those of the Ganga grants, and which claims that the *chaitya* there was founded by Rāma, the son of Dasaratha, and subsequently repaired by Kuntī, the mother of the Pāndavas. The name Nandagiri (hill of pleasure) was changed to Nandidrigi (hill of Nandi, the bull of Siva) in the

Every fortified place the English had hitherto seen in Mysore exhibited evidence of the extraordinary attention paid by Tipu Sultan to the repair and improvement of this important branch of national defence but the works of Nandidrug a granite rock of tremendous height seemed to have engrossed in a peculiar degree his design of rendering it impregnable and its defence was committed to Latif Ali Beg, an officer who had always merited the highest distinction both from Haider and Tipu. There was no choice with regard to the face to be attacked, because except on the west the precipice was inaccessible. That point had been strengthened by a double line of ramparts and the foundation was laid for a third which ultimately aided the assailants in forming their last lodgement. The defence was highly respectable the ammunition of the cannon was well reserved and the jinjals or wall pieces, were served with peculiar steadiness and skill the labour was excessive of working regularly up the face of a steep and craggy mountain to breaching distance, and dragging cannon to the batteries but in twenty-one days two breaches were effected, one in the exterior rampart, and the other in an outwork, and it was resolved to give the assault and form a lodgement for the farther operations against the interior works. The assailants received, however a particular direction for endeavouring to enter with the fugitives, while the division allotted to forming the lodgement should be employed in providing cover and in order that every possible impression might be made on the minds of the garrison Lord Cornwallis moved the army to the immediate vicinity, some additional flank companies were ordered in to lead the assault and General Meadows, with the usual spirit which animated him on such occasions, desired to take the immediate direction of the service. Shortly before the assault, while all were waiting the signal in silence, one of the soldiers inadvertently whispered something about a mine. 'To be sure there is said General Meadows and it is a mine of gold a smothered laugh ran along the ranks and produced the proper impression.

The assault was given by clear moonlight on the morning of the 19th of October the arrangements of defence were excellent, and particularly the masses of granite reserved till this period to be rolled down the rock with tremendous effect, but the lodgement was within one hundred yards of the breach and although the garrison was perfectly alert, the ardour and rapidity

of the assailants surmounted every obstacle, and they pressed the fugitives so closely as to prevent their effectually barricading the gate of the inner rampart. It was forced after a sharp conflict, and the place was carried with the loss in the assault of only thirty killed and wounded, chiefly by the stones tumbled down the rock, and in the whole siege one hundred and twenty "

A regiment was stationed at the foot, between Nandi and Sultanpet, from 1799 to 1808. It was during this period that the fruit-garden near the large tank was planted by Colonel Cuppage. The present dwelling houses on the *droog* were created in about 1848 by Colonel Hill (Glentilt), Sir Mark Cubbon, and his Secretary, Captain Cunningham (Oaklands), also one lower down, by the Sheristadār, between the inner and outer fortifications, looking over the pass, the remains of an old tower or fort on the highest point being removed for the site of the principal one. The salubrity of the spot led to its becoming a resort in the hot season for European officials from Bangalore, and the large house at the summit was long the favourite retreat of Sir Mark Cubbon. The temperature, especially at nights is on the average ten degrees cooler than that of the plain 1,800 feet below.

Except on the west, where it is united to a certain height with the adjoining range, Nandidrug presents an almost perpendicular rocky face. The present name is composed of *Nandi*, the sacred bull of Siva, and *durga*, hill-fort. The principal old pilgrim ascent was by regularly formed steps beginning on the north side, and continuing on the west, connecting the temple in the village below with the temple at the top. The steps have now been taken entirely up the north side. A bridle path has since been carried from the bottom of the saddle on the south up the western face, the ascent by which is 4 miles long. At one point another bridle path meets it from the Basavañ Kanive, or Bull pass, on the north-west, where there is a large stone bull. A rude flight of steps on the south side, known as the coolie path, forms a short cut for pedestrians. There is also a very steep foot path from the north-east angle.

The summit 4 851 feet above the level of the sea commands an extensive view over the Kolar and Bangalore districts the hundreds of shining tanks scattered over the country of which it is said 400 can be counted, forming a marked feature in the scene Kalavaradurga or Skandagiri (4 749 feet) is a conspicuous height to the north formerly fortified Brahmagiri or Vargkonda (4 657 feet) on the south west and Chenna Kāsava or Chenna Rāyan betta (4 762 feet) on the north west are partially connected with Nandidrug The following rivers radiating in all directions have their sources in either this hill or those in the immediate neighbourhood The Northern Pennar or Uttara Pōākini rises to the north west in Chenna Kāśava betta and can be traced for a long distance through the Manchēhalli valley to Goribidnur The Southern Pennar or Dakshina Pōākini rises in the same hill and flows south through the large Jangamkote and Hoskote tanks The Arkavati rises in a well to the south west of Nandidrug between the two lines of fortification and flows south west to Doddabailapur The Pālār is said to rise in the well near the eastern summit On the north east the Pāpāghni and Chitrāvnti may be discerned the former of which rises in Kaiyara-durga and the latter in the Hariharēsvara hill

On the first heavy fall of rain following upon a long period of dry weather, myriads of lights are seen at night along the valleys of the Northern Pennār and towards the north resembling the lamps in the streets of a great city, a phenomenon which has not been satisfactorily explained By some they are called *corpse candles* Others consider them to be (and this seems the right explanation) the lights of the village used in the capture of the winged white ants which issue from the ground at such times in countless profusion and are cooked and eaten by the poorer classes as a great delicacy Large coops of open wicker work are placed around the holes, surmounted by torches formed of the stem of an inferior kind of sugar cane The insects attracted by the light, fall in thousands into the hollows scooped below, where as their wings drop off they remain heaped together till gathered up Mr Walhouse has suggested that the effect

may be due to the mole cricket (*gryllotalpa vulgaris*), which emits a light that is often confounded with the *ignis fatuus*

In the large cave on the south, almost inaccessible, black tourmaline is found in considerable quantities. The forest surrounding the mountain, as well as that on the neighbouring hills, is reserved by the State. It contains an occasional cheeta or panther, and numbers of wild pig, also pea-fowl and jungle-fowl.

The temple on the Hill, dedicated to Yōganandīsvara, is a pretty large structure consisting of a *garbhagriha*, a *sukhānasi*, a *navaranga* and a *kalyāna mantapa*.

The *sukhānasi* has an ornamental brass doorway of very fine workmanship with rows of small female figures, lions, foliage and chain work. The lintel has rows of separate figures of men, women and birds. At the sides of the *sukhānasi* entrance are fine metallic figures, about 5 feet high, of *dvārapālakas*. To the right in the *navaranga* are kept figures of Sūrya, Chandra, Bhairava, Ganapati and Kushmānda-rishi. The last is said to have had his hermitage on the hill and worshipped the god. In the *Sthala-purāna* the hill also named Srīngi-parvata and Kushmānda-parvata. The floor of the *navaranga* has numbers of prostrating figures with labels. Some of them represent the Āvati chiefs and other personages of some consequence. The *navaranga* has two entrances on the north and south, the former leading to the *kalyāna-mantapa*. The latter is a fine structure supported by four sculptured black stone pillars which resemble those of the *mukha-mantapa* in front of the middle shrine in the temple at Nandi. Some of the noticeable figures on the pillars are Durga, Mahishāsūramardini, Śiva as Līngōd-bhava-mūrti flanked by Viṣṇu and Brahma, Śiva as Gaṇā-suramardana, Viṣṇu seated in the posture of meditation with folded hands, and dancing Ganapati. The bottom panels have lions all round as at Nandi. This *mantapa* has likewise two entrances on the north and west, the former leading to the shrine of the goddess. There is a pond in the temple enclosure known as Doddamma's *donē*. A reservoir at the back of the temple is called Narasappa's *kuntē*. On the rock near the Āṇjanēya temple are sculptured a foot and a female figure. Above the foot is engraved *E. C. X Chikballapur 31*. A label over the female figure names her Honama. Two inscriptions are

to be seen on the rock to the right and left of the steps leading to the Yoganandisvara temple *Chilballapur* 3, of about the 10th century is the oldest record on the hill. Near it is another epigraph. It is rather strange that the hill has no inscription relating to the Canga. Considering their distinctive title Nandigiri nātha one would naturally expect some record of their rule. The Virahbadra temple is in a large cave near the fort gate, the overhanging boulder being about 70 feet high. A sacred well on the south of the hill which is now inaccessible is named Sauvaka tirtha. This appeared under the name of Sravasa tirtha in the last edition of this work (*II* 145). As far as I can see," writes Mr. Narasimhaiah "there is no indication of the hill having once been a Jaina settlement. Tipu's palace and Cuthbert's bungalow have marble tablets fixed on the walls. About half way up the hill is a small cave to the right with an overhanging boulder known as Bānautigundu (the boulder of the puerperal woman) since according to tradition a pregnant woman who was climbing the hill was delivered of a child there. The Gōpānātha temple on the Gōpānātha hill is in a large cave sheltered by a gigantic boulder measuring about 100' x 50' x 70'. On the boulder is built of brick and mortar a tower intended to serve as a *vimāna* for the temple below. It is not clear how the workmen went up the steep cliff and built the tower. The old Jaina inscription *E C V Chil Ballapur* 29 is on the east face of the cliff. The god Gōpānātha about 4 feet high stands with the legs crossed like *Vaṇa-gōpāla* but there is neither the flute nor the cow, the usual accompaniments of the latter. The figure has four hands, the upper ones holding a discus and a conch, the lower ones being in the *abhaya* (or fear removing) and *cāin mudra* (or teaching) attitudes. This is rather peculiar. There is also a shrine to the left in the same cave containing a seated figure of the goddess. An inscription is to be seen on the Garudagamba in front of the temple. There is also another temple on the hill dedicated to Naraṇmha, the object of worship here being a shapeless stone. The hill is also known as the Naraṇmha hill after the name of this god. The Gallakāyi hill is situated between the Chennarāya and Kalavara hills. It is also known as Haldar Ali's hill. A small cave on the south is pointed out as the place where Hyder used to confine his European prisoners. On the top of the hill is a huge boulder about 70 feet high on which

is built a *mantapa* which commands a fine view of the surrounding parts. The boulder has very precipitous sides. It is said that Haidar's prisoners were sometimes hurled over this cliff, the spot being known as Hyder's Drop. This is supposed to be the place described in Meadows Taylor's *Tippu Sultan*.

The following is a description of the Nandi hill by Mr. Bowring (*See Eastern Experiences* by L. Bowring, C S I, 2nd Edition). It is dated Nandidurg, February 21, 1869 —

“The view from the bottom is wonderful, the great rocky mountain rising in a precipitous manner, and its gigantic sides looking ready to fall and crush you. It is a natural fortress, and its strength has been increased by a double wall and bastions, wherever it was capable of ascent, so as to render it quite impregnable. All this time the sun has been getting up, and is blazing, so I was grateful for a hood over the tonjon, from which hangs a scarlet cloth. Eight men lift the pole on their shoulders with a sort of whoop, and shouting and singing at the top of their voices, away they go. It was a fine study of the human form divine, as they only sported turbans and fig leaves. They went very fast, only stopping to change men from time to time, one man seeming to command the others, and slapping them all round in turns. Here and there we went short cuts, and did the four miles in an hour and a half, very good going, considering the steepness of the ascent, and as we got higher and higher, the air became cooler and cooler. We passed within the two walls, and leaving a pretty woody hollow on the right arrived at the highest plateau, with the great grey house in front of us. It is fully exposed to the powers of the air, is very substantially built, and is very handsome having cost Sir Mark Cubbon 40,000 rupees. We were told it was all so clean, whereas it was deep in dust, the accumulation of years, all the bedding was dropping to pieces, as also the furniture, and everything was in its wrong place. It was an amusement getting it all in order but the servants object to the Durg entirely, owing to the cold, so there was a general distribution of blankets and coats, but they sit curled up, looking like martyrs, and shiver with great effect whenever I look at them. The thermometer was 62° this morning indoors, while at Bangalore it was 87°.

“The rock falls away precipitously from the house, and looking over the wall down on the plain below, you have a grand

view Near the house there is a little postern gate whence there is a lovely scene for, from this spot you see for miles and miles the little villages dotted about numerous tanks, and hills covered with jungle lighted up by sun gleams There are hundreds of wild roses, and at the house belonging to Captain — where pains have been taken with the garden the flowers are in great profusion '

Nangali —A village in Mnlbagal taluk close to the eastern frontier on the Kolar Chittur Road Population 1512 It was an important frontier station from the time of the Hoysalas in the 12th century and is constantly enumerated among the conquests of Vishnuvardhana Some large tanks exist in the neighbourhood Nangali.

Ooregum or Urigam —A village in the Bowringpet taluk of Kolar District Mysore situated in 12° 58' N and 78° 17' E 7 miles by rail east from Bowringpet Population (1901), 6387 The village contains Tamil inscriptions of the Hoysala king Ramanatha, dating from the middle of the thirteenth century, in which the name appears as Urigaiyam It was here, in 1875, that the first shaft was sunk for gold, and since 1885 the neighbourhood has been entirely transformed by the development of the gold mines and the foundation of a new town (now named Robertsonpet) Ooregum or
Urigam

Palar —A river said to rise in a well near the summit of Nandidrug on the east where the water of the little spring reputed as the immediate source used formerly to flow as in the natural way through a small stone bull since mutilated If however this be accepted as the source it follows that the stream must at some point cross the South Pinakani—a difficulty which the villagers easily set aside by the hypothesis, for which there is no evidence that it runs underground at that place The river more probably springs from the neighbourhood of Karvara to the west of Ambāji durga and Rahmanghur It first becomes visible it is PALAR

said, at Gautama gudda, a small hill south-ward of Kaivara. From Jangamkote it flows east-ward, until ten miles beyond Kolar, at the village of Yenandahalli, it receives an important tributary and directs its course south-south-east. Flowing through the Bowringpet taluk, where it forms the large Betamangala and Rāmasāgara tanks, it leaves Mysore and enters North Arcot district, near the village of Gundlapalli in the Kangundi Zamindāri. Running southwards to the west of Kangundi, it bends to the north-east past Vānambādi and flows through the North Arcot and Chingalpet districts, passing Vellore, Arcot and Kānchivaram (or Conjeeveram), and falls into the Bay of Bengal, south of Madras.

The name Pālār, which means milk river, is rendered in Sānskrit into Kshira-nadi, the designation of the stream in the *Purānas*. Its length in the district is about 47 miles, the entire drainage of its catchment basin, or 1,036 square miles being utilized for cultivation.

Pāpāghni

Papagħni.—An affluent of the North Pinākini. It rises in Kalavaradurga or Skandagiri, north of Nandidrug, and taking a north-easterly course, flows through the Bagepalli taluk into the Cuddapa district, where, after forming the Vyāsasamudram and other large tanks, it unites with the North Pinākini near Kamalapur. The name *Pāpāghni*, signifying sin-destroyer in Sānskrit, denotes the purifying efficacy of its waters. A dam is carried across the stream near Burudukunte, whereby irrigation is provided for 180 acres of land. The famous large tank of Vyāsa-samudram is a few miles below this point, on the Cuddapa frontier and is said to have been constructed by Vyāsa Rāyasvāmī, the *guru* of the Mādhva Brāhmins. The discharge of the stream in maximum flood has been gauged as 5,244 cubic feet per second.

Pāparājanahalli.

Paparajanahalli —A village in the neighbourhood of Kolar. Population 229. Situated on the top of a hill, the ascent to it is rather difficult. On the way to the village

near the Pātālamma temple is a Kannada epigraph incised on a big rock. The village which contains only 8 or 10 houses is picturesque, situated in a valley surrounded by hills on all sides. There is a Śiva temple and a Darga said to be of Uman VI. In front of the Śiva temple is a sun stone umbrella with a carved base, the shaft being one foot in diameter and about six feet high with stone ornament at the top. The umbrella is about five feet in diameter. The whole stands on a rock on which is engraved a Tamil inscription which is mostly defaced. In a field close by is a curious sculpture representing an elephant in the centre attacked by two dogs, one seizing the trunk and the other the tail. It is not clear what this symbolises. May it be a representation of the overthrow of the Gangas whose crest was the elephant? Close to it is Bhūtaganda's cave situated near a rock called Koti-kalla, with a Kannada inscription which appears to have been once occupied by a *Linṣāyat guru*. At some distance to the east of the cave is the fortified hill called Darga which was once the residence of the Afghan Subhadar Kasim Khān. Remains of the fort and residence are to be seen even now.

Patrenhalli—A village in Chik Ballapur taluk. Population 516. The Gōpalakrishna temple at this place is a pretty large structure in the Dravidian style with a small *mahādrāra* and a fine front hall or *mukha-mantapa* consisting of 16 *ankanas* and standing on an ornamental plinth. The latter resembles that of the Ranganatha temple at Ranganthala, the pillars being, however, shorter and there being no veranda. The central ceiling has a lotus. Above the lintels of the central *ankana* runs on all the four sides a panel containing well carved figures representing scenes from the *Ramāyana*. The west panel has figures of Rama, his three brothers, Sita and Hanuman flanked on the right side by the *aṣṭa-dīkpalakas* or regents of the eight directions and on the left by the *saptarishis* or the seven sages. Rama has four hands, which is rather peculiar, and holds Sita in his right hand with his left. The panel seems to represent Rama's marriage.

or coronation The south and north panels have a seated female figure, probably Sīta, in the middle with several female figures on both sides The east panel represents a music party The panels have intervening pilasters and are surmounted by an ornamental cornice The temple stands in the middle of a cloistered court-yard The god Gōpāla-krishna is a four-handed figure, about 3 feet high, flanked by consorts All the three figures stand on one and the same pedestal, measuring about $5' \times 1\frac{1}{2}' \times 1'$, which is artistically executed The tank mentioned above is named after the god of this temple

Pinākini.

Pinakini.—The Northern or Uttara Pinākini, the Northern Pennār of European geographers, rises in the Chenna-Kēsva hill, north-west of Nandidrug, and flowing north-west past the town of Goribidnur, enters the Penugonda taluk of the Anantapur District Thence, crossing a projecting angle of Pavagada taluk, it re-enters the Anantapur District, and turning eastward, passes through the Cuddapah and Nellore Districts finally discharging its waters into the Bay of Bengal near the town of Nellore

Its principal tributaries from this District are the Pāpāghni and the Chitrāvati The total length of the main river and its chief affluents within the Province has been estimated at 167 miles, with a catchment basin of 2,280 square miles, of the drainage of which 85·35 per cent has been intercepted for purposes of cultivation

From an inscription at Kallodi we learn that the water supply of Penugonda was drawn from this part of the river Bukka-Rāya, the son of Harihara-Rāya, ordered his chief engineer, Singaya Bhatta, in 1389 to “bring the Henne river (the Pennār or Hennār) to Penugonda” And he accordingly led a channel, remains of which may still be seen, to the Siruvara tank, naming it the Pratāpa-Bukka-Rāya channel

Rahman
Ghur

Rahman Ghur.—A conspicuous hill-fort in Chintāmani taluk, rising to 4,227 feet above the level of the sea, which

surrendered to the British in 1791. A large boulder on the western side near Kaivara, is crossed by belts of a brown colour and from a crevice in the side a liquid resembling blood is said to issue at the time of *Sivarātri*, which kites and crows eagerly eat. The story is that Bhīma, one of the Pandava brothers imprisoned a giant under the mountain, who yearly turns upon his side and causes his wounds to bleed afresh. Tipu Sultan mortified at the capture by the British of Nandidrug which he had deemed impregnable proposed to abandon it and strengthen Rahman Ghur instead, but the design was not carried out.

Ramenhalli—A village near Malur. Population 95. To the north of Sivaraipattana close to this place is inscribed on a boulder resting on the rock to the east of the village (*E C X* Kolar 11), a fine record of the Ganga king Sripurusha's reign. Rāmenhalli.

Rangasthala—A village in the Chik Ballapur taluk. The Ranganatha temple at this place is a large Dravidian structure of some architectural merit with a lofty *mahādvara*, about 18 feet high, facing south. Rāngasthala.

It stands in the middle of a cloistered courtyard which has doorways in the other three directions also. There are also four pillared *mantapas* in front of all the doorways except the east. The temple consists of a *garbhagrāha*, a *sukhanāsi*, a *nararanga*, a *mukha mantapa* and a veranda running round the last. The *mukha mantapa* or front hall, a fine structure stands on an ornamental plinth supported by 24 sculptured pillars. The veranda which is on a lower level has 14 sculptured pillars which are loftier and larger in size than those of the front hall. The front veranda has 8 pillars. The end ones, bigger than the others, have in the upper portion 3 fine pilasters, 2 in front and 1 at the side, and riders in front, all carved out of one block of stone. The next pillar on either side has only one pilaster and the middle two have no pilasters but have horsemen jutting out. The side verandas have 3 pillars each, omitting the end pillars of the front veranda, the end pillar being similar to that of the front veranda and the middle two having one

pilaster each Above the dripstones in front runs a veranda in the Saracenic style supported by small pillars This is worthy of note The front hall has a row of 6 pillars in front, the end ones having three pilasters, the next ones one pilaster and the middle ones lions with riders without pilasters All the pillars are sculptured in three panels on all the sides There are two elephants at the sides of the steps leading to the front hall The *balipītha* and the pedestal of the *dhvaja-stambha* or flag-staff, which are similar in design, are artistically executed The *mahādvāra* has two inner and two outer pairs of well carved jambs with male and female figures surmounted by scroll work The first inner pair have at the bottom on the north face *dvārapālakas* facing the temple, and on the east and west faces female figures standing on *yālis* with scroll above The second pair have male figures facing each other with cows below licking their feet The first outer pair are similar to the second inner pair only the right male figure has a lion below in place of the cow The second outer pair are likewise similar to the first inner pair only with the *dvārapālakas* at the bottom on the south face The *garbhagriha* has a fine reclining figure of Ranganātha about 4 feet long, with the head to the west, canopied by a five-hooded snake, the figures of Srīdēvi and Bhūdēvi being seated at the feet Around the inner wall run two panels containing figures of Vishnu, his attributes, the seven sages, etc The *vimāna* or dome over the *garbhagriha* resembles that of the temple at Srīrangam, being in the shape of a basket, and is carved with figures, etc, a Ganapati being shown in one place, perhaps in allusion to Vibhīshana's entrusting the basket containing Ranganātha to Ganapati as stated in the *Srīranga-mahātmya* The god is said to have been set up by the seven sages In the *navaranga* are kept metallic figures of Ranganātha with consorts, Vishvak-sēna, Rāmānujāchārya, Nammālvār and Chakrattālvār (or the discus of Vishnu) Two cells facing each other in the *pradakshina* of the *garbhagriha* have 10 and 3 figures respectively of the Ālvārs and Āchāryas (Srīvaishnava saints and sages) An inscription is to be seen on the third step in front of the *navaranga* doorway and four written in red ochre, on the ceiling of the front veranda The latter, consisting of four Sānskrit verses, are mostly quotations from the *Srīrangarāja-stāva* a work in praise of the god Ranganātha of Srīrangam by Parāsara Bhatta, a younger contemporary of Rāmānujāchārya Outside

the temple enclosure to the east are two ponds one octagonal and the other square. The former is well built.

Sadali—A village to the north west of the Sidlaghatta taluk 18 miles north of the kasba, on the road to Bagepalli. Population 1311.

A great antiquity is attributed to this village. It is said to have been founded by Sahadēva, the youngest of the Pandava brothers, and thence called Sahadēva pata, since abbreviated into Sadahalli or Sadali. The spot was selected by Saka rishi whom he had come to visit, and with whom he had an interview where Gomayakanpalya now stands. The village changed hands several times until annexed to the Sira suba and bestowed as a *jāgir* on two Muhammadan chiefs who to prevent its falling a conquest to the Cuddapah Nawāb, privately disposed of it about 1459, to Dodda Bai the Gaurā of Chikballapur.

Sidlaghatta.—A taluk in the centre towards the north. Area 329.40 square miles. Head quarters at Sidlaghatta. Contains the following hobli, villages and population —

Hobli	Villages	Villages classified			Kayam gutta	Population
		Government	Sarvamanya	Jodi		
1 Sidlaghatta	97	70		10	11	21,760
2 Basettihalli	76	67		2	7	8,810
3 Jangamkote	60	46	4	6	13	16,605

5 Chikakannurpu	60	40		10	1	9,782
Total	336	280	5	36	33	67,034

No.	Place	Population
1	Sidlaghatta	3,607
2	Jangamkote	1,891
3	Sadali	1,311

Principal places with population.

The taluk forms the valley of the Pāpāghni, which river crosses it in a north-easterly direction. The south Pnākini drains the south-west angle and forms two large tanks at the kasba. The northern parts of the taluk, marking the continuation of the Dongalakonda hills, are stony and rugged. The remaining parts are fertile and well cultivated. In the former, the dry crop soils are, as a rule, poor and stony or sandy. In the vicinity of the rivers, however, black soil is not uncommon. To the south of Sidlaghatta the dry crop soil is usually reddish, of fair quality. The irrigated lands are generally superior, rich brown loam being very common. Wet cultivation receives special attention in the north, and the abundance of honge trees there provide in their leaves and branches, the manure required for the rice fields. In the south, on the contrary, ragi is the staple crop, but potatoes also occupy a considerable area, as well as sugar-cane. The manufactures consist principally of ordinary women's cloths, kambles, glass bangles, sack cloth and thread.

The revenue settlement was introduced in 1885 and the resettlement with effect from 1923-24. The culturable area according to resettlement was distributed as follows:—

<i>Occupied area —</i>	acres
Dry	46,850
Wet	7,377
Garden	6,558
<i>Unoccupied area:—</i>	
Dry	11,177
Wet	1,406
Garden	155
Kharab	1,30,462
Inam	11,230

The total Revenue Demand for the year 1921-22 was Rs 1,83,961-10-5, the demand under Land Revenue being Rs 1,43,632-11-7.

From Sidlaghatta there are roads west to Chik-Ballapur, east to Chintamani, and south to Jangamkote and Hoskote. The Bangalore-Cuddapa high road passes through the south-

east angle and the Chintamani Bngepalli road crosses through the taluk a little above the middle. The Kolar Nandi road runs along the southern limit through Jangamkote.

Sidlaghatta —A large town, 30 miles north west of Kolar. Sidlaghatta on the Srinivasapur-Chik Ballapur road. Head-quarters of the Sidlaghatta taluk and a Municipality.

Population in 1921	Males	Females	Total
Hindus	1,310	1,445	2,055
Muhammadians	304	335	719
Christians	1	0	1
Animists	2		2
Total	1,627	1,609	3,007

For about five miles round Sidlaghatta there occurs a kind of laterite called *chattu* which differs from ordinary laterite in allowing of the growth of large trees as on a hill south of the town. Reduced to clay it forms a very durable plastering for walls, and applied to roofs makes them permanently water tight.

According to the local chronicle Sidlaghatta was founded in 1526 by Halasūramma, wife of Kempe Ganda, who came with his pregnant wife from Ujanipattana and settled at Ahlodu to the north of Sidlaghatta. Kempe Ganda having been killed during a raid on Vellore, his wife securing a hidden treasure fortified Ahlodu and took possession of a few villages in the neighbourhood. She gave birth to a male child named Sivane Ganda in 1514. Sidlaghatta was so named after Sidla Ganda, her father-in-law. It had also another name Sivanabdhū after her son Sivane Ganda. The latter was crowned in 1529 at Sidlaghatta and extending his power on all sides by conquest he ruled for 47 years. Of the two tanks at the village the one to the south west, known as Ammana kere, was built by Halasūramma, while the other to the south-east known as Gandana kere, was built by Sivane Ganda. His wife was Sivajamma. The old taluk *kachēra* is said to stand on the site of his place. A big slab measuring 6 feet by 5 feet and 10 inches thick, which

was once in the palace but now placed in the school compound, is said to have served as a seat for the Gauda when taking a shave. At some distance to the village are the tombs of the Gauda and his wife with canopies. His son Immadi Sivane Gauda, who succeeded him in 1576, ruled for 40 years. The place was subdued by the Mahrattas in 1616, when the Gauda was carried away to Bangalore. They held it till 1661 when it was taken by the Mughals. In 1679 it again passed into the possession of the Mahrattas who sold it to Annayya Gauda of Chikka-Ballapur in 1691. The latter held it till 1762 when it was captured by Hyder. The fort has been pulled down, only portions of the moat are visible here and there. The parapet over the roof of the Ānjanēya temple has some carved stones brought from some other ruined temple and built into it. The sculptures are of some interest as they illustrate the story of Daksha's sacrifice. One of the stones shows Daksha in the company of Brahma and Vishnu engaged in performing the sacrifice, Agni being represented by a figure with two hands, another shows Virabhadra in the act of cutting off Daksha's head, and the third shows the headless Daksha standing with folded hands while some one places the head of a ram on his neck. There is likewise a piece of stone built into the parapet containing figures of three *dakṣpālakas* or regents of the directions, the remaining five being on another piece kept in the veranda of the temple. In the Venkataramana temple, some of the slabs of the outer walls of the *garbhagriha* bear inscriptions giving the names of the donors of the slabs. The god is a fine figure, about 4 feet high, flanked by consorts. At Hosapete is the Bhadranakere tank said to have been built by a merchant named Bhadrappa whose image is set up on the bund. The Chennakēśava temple here has a *brindāvana* with the figure of Kēśava sculptured on the front face.

Expenditure	9,784	6,068	6,485	6,137

Siti.—A village in the Kolar taluk. Population 307. The place appears to have been one of considerable importance

during the Chōla and Hoysala periods. There are also a few records of the early Vijayanagar kings. The hill is a low one with the hamlet of Sitti and a number of temples in a dilapidated condition at its foot.

On the hill there are two large temples, the Sripattavara and the Kālabhairava, adjoining each other. In the former there are also shrines of Virabhadra and Mahāhasuramardini. The oldest inscription of the hill is a Tamil one of Rājendra Chōla of about 1024 A.D. engraved in bold characters on a projecting rock which extends from west to east from the Mahāhasuramardini shrine to a little distance beyond the *garbhagriha* of the Sripattavara temple. This *garbhagriha* is a natural cave with the above rock completely overhanging it. The epigraph is inscribed in five compartments of 14 lines each placed side by side with a short interval of space between. The first and last compartments can be read almost completely but the three middle ones only in part, as large portions of them are concealed by the walls and terrace subsequently erected. The concealment of the inscription by later structures leads us to the legitimate conclusion that originally the cave like *garbhagriha* alone was in existence. Only the first compartment and a portion of the second are printed as Kolar No. 44. The next in point of time a Tamil inscription of Kulōttunga-Chōla I of about 1071 A.D. is engraved on a big rock behind the Kālabhairava temple. The rock has peeled off to such an extent that only a few bits of writing are left here and there. With the greatest difficulty portions of this inscription were deciphered and copied by the Archaeological Department. The Kālabhairava temple is covered with inscriptions both inside and outside. The oldest of the newly discovered inscriptions is one of the time of the Hoysala king Vishnuvardhana. Of the others, a large number relate to the Tamil Gangas and a few to the Vijayanagar kings. One of the epigraphs of about the 14th century is of particular interest as it alludes to the practice of offering the finger to the god Kālabhairava. Kālabhairava is the most important deity on the hill. He is the tutelary deity of large sections of the cultivating classes such as *Moraru Vokkaligas Reddis* etc. The practice of offering the finger to this god was in vogue among the above cultivating classes till about 30 years ago when it was put a stop to by the

Government The origin of this practice goes back to the Purāṇic period The large hill to the south of the Sītī hill is known as Bhasmāsura-betta, because, according to the *Sthala-purāṇa*, it was here that the demon Bhasmāsura was reduced to ashes The hill is supposed to consist of the ashes of the demon and it is urged in support of this supposition that during the rains, however heavy, all the water gets absorbed in the hill, no water flowing down to the foot on any side Bhasmāsura, who had received a boon from Siva to the effect that anybody, on whose head he laid his hand should instantaneously be reduced to ashes, wanted to try the effect of the boon on Siva himself The latter, trying to evade the demon, was pursued by him wherever he went till at last he came to the hermitage of Gautama near Sītī and by the advice of the sage hid himself in a cave, the present *garbhagriha*, on the Sītī hill Missing the object of his pursuit, the demon enquired of a cultivator who was ploughing a field close by whether he saw a man running in that direction, whereupon the cultivator pointed to the hill with his forefinger Just then Viṣṇu showed himself to the demon in the form of a beautiful damsel (Mōhinī) and brought about his death by his own hand as related in the *Purāṇas* On Viṣṇu relating to Siva how the demon was disposed of, the latter requested Viṣṇu to appear to him in the very same form in which he brought about the death of the demon, and on his doing so Siva became so much enamoured of the Mōhinī that he forthwith embraced her, the result being the birth of Kālabhairava When Kālabhairava asked Siva what he was to do, he was directed to take his abode on the Sītī hill and, as a punishment to the cultivator who betrayed Siva's whereabouts to the demon with his forefinger, to receive as an offering the last joint of the offending forefinger from him and his descendants The custom of having the last joint of the forefinger cut off and offering it to Kālabhairava as an expiation continued, it appears, for some time But as this amputation of the right forefinger interfered seriously with the duties of the cultivator, it was subsequently agreed to propitiate the god by arranging to have two fingers the little finger and the ring-finger of the females cut off as a substitute for the one finger of the males This amputation of the last joints of the two fingers of females was in vogue till about 30 years ago The classes of cultivators who observe this practice are known as the 'finger-giving'

classes. There was till recently it appears a regular establishment in the temple for carrying on the amputation—a goldsmith for cutting off the finger and others for dressing the wound and for kneading the finger and holding it tight so that no blood might be shed at the time. The devotees had also to pay certain sums of money which were divided in certain fixed proportions among the *archakas* and other servants of the temple as well as among the *ayagars* of the village, such as the *shānbōg* patel goldsmith barber etc. They had moreover to bring a certain fixed quantity of rice per head. An inscription in the temple of about the 14th century fixed the proportions in which this rice was to be divided among the goldsmith and others. When the amputation was prohibited by the Government the finger giving classes raised a strong but unavailing protest against the prohibition. They have now adopted the harmless substitute of having the fingers wound round with flowers in the temple and unwinding the same with due ceremony on return to their village. It is said that the Sital hill is the only place in India where this curious custom of offering the finger has prevailed. The *linga* on the Sital hill is called *Sripatisvaru* because, it is said it was set up by *Sripati* or *Vishnu*. In the Tamil inscriptions the place is called *Sripati* or *Sapati* and in the Kannada ones *Sihatti* or *Sihuti* now corrupted into *Sital* or *Siti*. In the inscriptions the *Kālabhairava* is called *Tribhuvanavidanga* *Kahētrapala Pillaiyār*.

A long hillock near *Siti* is said to represent *Gautama's* hermitage to which *Siva* fled when pursued by *Bhasmasura*. The temples are situated only half way up the *Siti* hill. It appears that the top of the hill, which was once fortified was formerly occupied by a village. This is borne out by the flight of steps and the gateways (*torana-gambas*) leading to the top. There is a large cave close by about 35 by 12' which the people call *Bhūpatamma's* temple a *jātra* is held here every year in honour of the goddess. There are only a few mutilated figures in the cave. It appears that about 200 years ago one *Sadānandayōgi* had taken up his residence on the top of the hill.

Siti betta.—A hill in the *Vemgal* hobli *Kolar* taluk. It has a temple of *Kalu Bhairava* and is an important sacred

Siti betta.

place of the Morasu Vokkalu tribe, who preponderate in this district. Inscriptions at the place show that the name is contracted from Siripatī, through Sihatī. They are of the time of the Chōla kings, of Ganga Perumāḷ, the Hoysala king Ballāla III, and of the Vijayanagar period. (See *Sita*)

Sivara-
pattana

Sivarapattana — A village near Malur. Population 827. Has several old lithic records, most of them of the Ganga king Srīpurusha. The village appears to have been a place of great historical importance at one time. The name is apparently a corruption or contraction of Sivamārapattana and it is very probable that the place was once the residence of Sivamāra II, son of Srīpurusha. *E C X Kolar* 6 and 7, which are at this village, are very neatly engraved and excellently preserved. They look as if they left the sculptor's hands but recently. The place is noted for the manufacture of images in stone and metal. There are about half a dozen houses belonging to sculptors. Many unfinished images of gods and goddesses, Naga stones, etc., the work of these men, are strewn over the village. They are Pāñchālas, said to be of the Kasyapa-gōtra. It is learnt that their ancestors came and settled here about 212 years ago. Owning large tracts of land in the village, they are in well-to-do circumstances and do not depend on this craft alone for their livelihood.

Srinivaspur

Srinivaspur — A taluk to the east. Head-quarters at Srinivaspur. Contains the following hoblis, villages and population —

Hobli	Villages	Villages classified				Popula- tion
		Govern- ment	Sarva- manya	Jodi	Kayam- gutta	
1 Srinivaspur	87	81		4	2	19,230
2 Addagal	51	49		2		8,255

No.	Place	Population
1	Srinivaspur	3 110
2	Yeldur	1,357

Principal places with population.

The taluk is bounded on the north and north-east by ranges of hills connected with the Eastern Ghats among which are situated the two clusters of hills enclosing the elevated picturesque valleys of Mudimadagu and Sunnakal. The former is a circular basin, inaccessible on all sides except at the north and south where there are passes leading to the country around. The village of Mudimadagu is situated in the centre of the valley, and some twenty villages in other parts of it. The group to the south also forms a circle in the middle of which stands the village of Sunnakal. The only outlet now used is towards the west. There are four villages in the valley, and the scenery here is described as more picturesque than at Mudimadagu. Both these groups of hills are covered with thick jungle and have been the strong holds of petty chiefs who held sway over the surrounding country. From the neighbourhood of Yeldur commence the low flat hills which indicate the auriferous tract extending to the southern most limits of the district.

The total Revenue Demand for the year 1921-22 was Rs. 2,22,146-10-6, the demand under Land Revenue being Rs. 1 40 713-4-6.

The Bangalore-Cuddapa road runs through the taluk in a north-east direction and is joined at Tadgol by a road from Kolar through Srinivaspur. The Mulbagal-Chintamani road also passes through Srinivaspur. The Madanapalli and Chinnai Tippasamudram stations of the South Indian Railway from Vellere to Dharmavaram are close to the north-east angle of the taluk.

Srinivaspur—A town 15 miles north north-east of Kolar, with which it is connected by road. Head-quarters of the Srinivaspur taluk and a Municipality.

Population in 1921	Males	Females	Total
Hindus .. .	1,031	1,014	2,045
Muhammadans .	536	525	1,061
Christians .	7	6	13
Total	1,574	1,545	3,119

It is better known to the people of the District by its old name of Papanpalli. Dewan Pūrnaiya, when he visited the place on his return from a pilgrimageto Tirupati, gave it the present name, calling it after his son Srinivāsa Mūrti. Rough bits for horses and other articles of iron are manufactured here.

At Gulganpode, about two miles to the east, is pointed out as the site of an ancient city, said to have been called Haralu-kēte. Two Mahāvali inscriptions, of the time of Bānarasa and Vikramāditya, were excavated there some years ago, the first discovery of the Mahāvali or Bāna dynasty, and a Pallava inscription dating in 768 was also found.

The Chaudēsvari temple below the Amanikere tank at Srinivasapur has figures of the Saptamātrikah seated in a row. Chaudēsvari after whom the temple is named is a four-armed figure about 3 feet high, holding a drum, a snake and a cup in three hands, the remaining hand piercing a demon with a trident. The fine Bāna inscriptions *E. C. X.*, *Srinivasapur 5 and 6* at Guliganpode, are about two miles to the east of Srinivasapur.

Municipal Funds	1920-21	1921-22	1922-23	1923-24
Income	1,985	3,316	2,739	3,272

Sugatūr.

Sugatūr.—A village about 8 miles to the north-west of Kolar. Population 1,040. At one time the head-quarters of a line of local chiefs. They had the general name Tamme-Gauda. For some military service, the title of “Chikkarāya” was conferred on them by the kings of Vijayanagar. Their grants range from 1451 (*Mulbagal 241*) to 1669 (*Mulbagal 114*).

Tekal —A Railway Station between Mulur and Bowringpet Tekal.
on the Madras and Southern Mahratta Railway

The Vrudaraja temple at this place is a pretty large structure in the Dravidian style with a lofty *mahādrūra* or outer gate. It faces west and has a large number of Tamil inscriptions on the basement. The Singapperumāl temple though in ruins is a fine structure with sculptured pillars and neatly dressed lintels and capitals. At the Ānjanēya temple the figure of Ānjanēya about 7 feet high stands with folded hands. In the ruined Patulamma temple the goddess is a seated figure about 3 feet high with 4 hands: the right upper holding a drum the left upper a trident the right lower a sword and the left lower a cup. There are several more ruined temples in the village. The place appears to be an old one as it is named as a seventy six in an inscription of the 9th century recently discovered at Hulidenhalli. Tradition has it that the village once had 101 temples and 101 wells or ponds. The Tekal hill so well known to railway travellers by its conspicuous rocks and boulders has a cave known as *Bhīma āgaradi* (or gymnasium). It is a magnificent one measuring 150 × 70 × 50. But the approach to it is very difficult. One has to climb over rocks and boulders climb in several places and leap over declivities 50 to 100 feet deep. According to tradition Bhīma the Pandava prince used to practise gymnastic exercises here. The floor has a deep layer of fine soft earth with several holes, which are supposed to have been formed when Bhīma took up handfuls of earth from the ground to smear his body with. Gigantic boulders form the walls of the cave. They slope and meet at the top leaving an aperture in the middle which lets in light. It is a pleasant retreat. As soon as it is reached all fatigue is forgotten. On the boulder forming the left wall are some marks made with a chisel which have the appearance of Kannada characters. But no word can be made out. The hill to the north of Tekal is known as *Bhūpatiyamma's* hill. A narrow cave in the hill is called *Rokkada gavi* (or the cash cave). It is plastered over inside and is supposed to have contained the treasure of the former rulers of the place. There is a seated Jina figure, about 3 feet high below a tamarind tree in the village of Hulidenhalli, not far away from this place. It belonged to a *bast* or Jaina temple which once stood to the north of the village hut is no longer in existence.

The village Gōpasandra, also near to this place, is so named after the Saluva chief Goparaja, son of Tipparāja, who was the ruler of Tekal in the first half of the 15th century.

Teruhalli

Teruhalli —A village in the Kolar taluk, situated on the top of a hill

On the way to this place, a Persian inscription is to be seen near the sluice of Dasarathakunte. At the Antaragange are the temples of Nilakanthēsvara and Visvēsvara. The former is in ruins. It contains several inscriptions of the Tamil Gangas written in classical Tamil poetry, a rare feature in inscriptions which are not Chōla. The Antaragange flows through the mouth of a couchant bull and falls to a pond about five feet below. Close at hand is the Visvēsvara temple. This place is a favourite resort for the celebration of marriages among the lower classes of the population. Tradition has it that in response to the prayer of Muchukunda, the Ganges came over there in the form of the Antaragange in order that he might conveniently bathe in it every day, he being too old to undertake a journey to the Ganges. A small hill near Teruhalli is known as Muchukundagiri or Muchukundasrama, the place where Muchukunda is said to have performed penance. The god of Talagunda, a village about 4 miles from Teruhalli, is known as Muchukundavarada, *i e*, the bestower of a boon on Muchukunda. Past the Lingāyat *matha* called *Gavimatha* near the Antaragange is Teruhalli, a small hamlet consisting of 5 or 6 houses, situated on the top of a hill. The ascent is rather steep. The Gangādhārēsvara temple at Teruhalli is a pretty large building, the *mahādvāra* resembling that of the Kōlāramma temple in details of workmanship. The *kalyāna-mantapa*, situated to the left as we enter the temple, is a fine structure though unfortunately unfinished. The images of the *Saptamātrikah*, Bhairava, Ganapati, etc., in the temple are well carved. They are said to have originally belonged to the Kōlāramma temple and to have been brought here at some former time to save them from the fury of the iconoclastic Muhammadans. The south and west outer walls and bases of the temple are covered with Tamil inscriptions of about the 13th century. A small hillock to the south of the temple is called Muchukundāsrama, *i e*, Muchukunda's hermitage. It is referred to in the inscriptions as Muchukundagiri. To the west of the temple

is a good pond and to the south west of it at some distance are shown some walls which are said to represent an old village named Sivaganga. To the north of Teruballi is a large cave known as *Pāṇḍarava haṭṭira*.

Tirupati—A village near Malur, locally well known as a Tirupati place of pilgrimage.

The Śrīnivāsa temple at this place is a pretty large structure with a *prākāra* or enclosure and a spacious courtyard in front. The god of the temple Varada though named Śrīnivāsa is well carved. In the *nararaṅga* are kept figures of Rāmānujaśārva and Vedāntadeśika. It is said that the god was set up by Yajñavalkya and the temple renovated by king Janamejaya. The village is considered as a holy place of pilgrimage and many marriages are celebrated in the temple every year. Offerings which could not be taken to Tirupati in the North Arcot District are delivered at this temple. A fragmentary Tamil inscription is to be seen on the basement of the *garbhagrāha*. The stones bearing the inscription appear to have been displaced during the renovation of the temple. An annual *jātre* on a large scale takes place here in the month of *Chaitra* (April). The village has several *chattras* and *mantapas* for the accommodation of pilgrims. According to the villagers, there was a long inscription on a rock in Hirekalgudda a small hill to the west of the village but the rock has recently been blasted and the inscription destroyed.

Tornhalli—A village in Malur taluk. Population 745. Tornhalli.

To the west of the village is a shrine of the goddess Sappalamma so called because she is believed to cure the cattle disease known as *sappe jadya*. A *jātre* on a large scale lasting for 10 days, is held in her honour every year in the dark fortnight of the month of *Puṣya* (January) at which nearly 50 000 people are said to collect together many coming over from the Madras Presidency. People make vows to the goddess and attend the *jātre* for fulfilling them. Cattle are largely sold at the *jātre*. The village is a *śōḍi*.

Vanarasi

Vanarasi.—A village in the Holur hobli of Kolar taluk, seven miles north of Kolar Population 411

It is the seat of a large annual festival held for 15 days in April, in honour of Irallappa, when about 4,000 people assemble and a cattle fair takes place, to which about 10,000 bullocks are brought for sale

Virupaksha-
pura

Virupakshapura.—A village in Kolar taluk The Virūpāksha temple in this village is one of the largest temples, if not the largest, in the State, built during the reign of the Vijayanagar king Dēva-Rāya II The Pārvatī shrine here has the figure of a lion in front of it just like Nandi in front of Siva temples This is rather unusual

Vrishābha-
vati.

Vrishabhavati.—A tributary of the South Pinākini It rises from the east of the Vokkaleri hills, passes by Sulikunte, and crosses the railway at the Bowringpet station It then feeds the tank of Kuppam, and passing by Kendoti, leaves the district three miles beyond it The stream descends into the plains by the Singaralapalli pass, receives the waters of the Markanda near Ankusgiri and falls into the South Pinākini near Krishnagiri

TUMKUR DISTRICT

SECTION I—DESCRIPTIVE

SITUATION AREA AND BOUNDARIES

TUMKUR.—A District in the centre and north-east situated Situation.
between $12^{\circ} 45'$ and $14^{\circ} 6'$ North Latitude and between $76^{\circ} 21'$ and $77^{\circ} 28'$ East Longitude Its extreme length from North to South is 102 miles and its greatest breadth from East to West, 67 miles

The area is 4,076 80 square miles of which, excluding the Area.
area for which no returns exist, 2,181 72 square miles are cultivable and 1,056 76 unculturable. Of the culturable area, 1 977 88 square miles are under occupation with 1,370 44 square miles under actual cultivation

It is bounded on the north by the Anantapur District Boundaries.
of the Madras Presidency on the east by the Kolar and Bangalore Districts, on the south by the Mysore District and on the west by the Districts of Chitaldrug Kadur and Hassan

A considerable range of hills forming the eastern boundary Physical Aspects.
of the Krishna river system in Mysore, runs north and south, through the eastern parts of the District. Entering its limits from the north with Kamandurga (3 537 feet) and Nidugal (3 485 feet) in the Puvagada Taluk it is continued by Midigendurga (3 414 feet) and includes the prominent peaks of the Madhugiri durga (3,935 feet) Chennarayandurga (3 744 feet) Koratagere (2 906 feet) Devarayadurga (4,154 feet, and 3 940 feet at T B) Nijagal (3 569 feet) Hntridurga (3,713 feet) and Huliyardurga (3 086 feet) It is a part of

the range running through the west of the Bangalore District represented by Sivaganga and Savandurga.

The following are other prominent peaks and they, along with the Devarayadurga, represent the Trigonometrical Survey Stations in the District, which are ten in number —

(1) Rāmedēvarabetta, (2) Seethakal, (3) Dodanaramangala, (4) Byala, (5) Pavagada, (6) Bommenahalli, (7) Chowdenhalli, (8) Hemgiri, (9) Rangasvāmibetta

The streams issuing from these hills are of small size, the principal being the Jayamangali, which rises in Devarayadurga and flows north-east into the North Pinākini, and the Shimsha, which rises to the south of the same hill and flows southwards towards the Cauvery. The North Pinākini has a course of only a few miles across the extreme north-east corner of the district, in the Pavagada Taluk

West of the chain of hills above mentioned, a low range commencing near Kibbanhalli runs north-west past Chikknayakanahalli and connects with the central belt of the Chitaldrug District. The watershed separating the river system of the Krishna northwards from that of the Cauvery southwards may be defined by a line drawn east and west from Koratagere to Tiptur, while the main chain of mountains forms the western limit of the upper North Pinākini basin

The open parts of the district maintain a generally even level above the sea, the height at Tumkur being 2,678 feet. It is 2,520 feet at Kunigal, 2,734 at Kibbanhalli, 2,462 at Madhugiri and 2,479 east of Holavanahalli. But the situation of Sira is much lower, being only 2,160 feet above the sea level. This depression is evident to the eye from the neighbourhood of the Shibi temple

The elevation of the other taluk head-quarter towns is also noted below:—Koratagere 2,906 feet, Pavagada Hill 3,026 feet, Chikknayakanahalli 2,650 feet, Gubbi 2,569 feet, Tiptur 2,783 feet and Turuvekere 2,633 feet

The southern taluks except around Huliyurdurga, where the country is wooded and hilly, consist of undulating plains

interspersed with clumps of tall and well grown trees, where stone is scarce except on occasional ridges or hillocks. Cocoa nut and other palms are confined to the vicinity of tanks. Farther north, large plantations of cocoa nuts occupy even the dry lands, especially in the Taluks of Gulbarga, Tiptur and Chiknavakanhalli. After crossing Tumkur eastwards the park like appearance of that taluk changes north of Devarayadurga to the scenery of a hill country intersected by cultivated valleys, the hills and their skirts being for the most part covered with shrubs interspersed with trees which remain verdant through the greater part of the year.

To the north-east extends a very fertile tract, irrigated from perennial springs, reached at a depth of only a few feet below the surface. These springs called *talparis* one of the chief sources of water supply, form a marked and peculiar feature of the Madhuguri and Pavagada Taluks as well as of the adjoining Taluks of the Madras Presidency. The water obtained from the spring heads is either conducted directly by narrow channels to the fields or a *kapile* well is constructed from which the water is raised by two or four bullocks. Where the soil is not sandy, springs may be tapped at short distances from each other.

These *talparis* are said to dry up generally in the summer being useful only in the rainy season and not working now so satisfactorily as before. The reason assigned for this is want of sufficient and timely rainfall in recent years.

GEOLOGY

Excepting the Charnockites, most of the other rock groups of the State are represented in this district. For descriptive purposes the district may be roughly divided into three zones or regions as follows —

- (1) The schist region
- (2) The gneissic region
- (3) The granite region.

(1) *Schists* — The belt of schists extending north and south to the east of Huliyur, known to the earlier geologists

as the Chiknayakanhalli band, forms the chief schist region of the district. These schists include members of both the lower and the upper division of Dharwars, the dark hornblende schists, epidiorites and the dark amphibolites constituting the former division, while the lighter green Chloritic schists and green-stones in association with a varied suite of rocks of fine grained gritty and slaty schists, argillitic schists, phyllitic rocks, etc., the altered variants of the acidic lavas and tuffs of the Champion gneisses, together with the ferruginous quartzites, limestone and other secondary rocks forming the latter or the upper division. The manganese ores and the limonite or hæmatitic iron ores are found in lenticular patches or pockets in these fine grained altered acidic rocks in close proximity to the basic chloritic schists. Between Huliar and Bukkapatna, is a club shaped exposure of a mass of a grey hornblendic trap, found to be intrusive into the above chloritic schists, and this is called after a prominent village, as Bellara Trap, and is of some importance on account of the old workings for gold it contains.

(2) *Gneissic region* —Bordering the belt of schists on both the sides is the complex gneissic region consisting of a biotite granitic gneiss which has been shown of late to consist of the granitic members of both the Peninsular gneiss series and the Champion gneisses as well owing to the similarity of the constituent minerals, but for careful comparative study in the field, the two could hardly be differentiated from each other.

(3) *Granitic region* —About the eastern end of the district running north and south through the gneissic region, is the band of the porphyritic Closepet granite, with an average width of 15 to 20 miles, forming the conspicuous chain of hills of Devarayadurga, Siddhabetta, Madhugiri and Pavagada. These, as in the Bangalore district, consist of several types varying in texture from medium even grained to coarsely porphyritic and in colour from grey to pink. The colour of the rock is chiefly due to that of the coarsely crystalline felspars, which vary from white or pale grey to pink or brownish, attaining sometimes a length of 2 inches or even more.

Dyke rocks as usual consist of normal dolerites which are seen in numbers to the S E of Koratagere and also in the schist region. Enstatite or hypersthene bearing types are also occasionally found in the district and the one near Dodderi is partly pyroxenic and partly hornblende and has some resemblance to the pyroxenite dykes of the charnockite series.

Building stones —The medium even grained members of the porphyritic Closepet granitic series and also the finer grained normal granites are quarried in several places in the district the chief among them being the Kyatsandra and Karadi quarries.

The quartzitic rock near Dodguni and Kondali are quarried to a certain extent, and carved locally into stone cisterns and also used for making grind stones.

The dark grey potstone or the amphibolite of the Turvekere Trap takes a fine polish and has been used in the construction of the Mysore Palace.

The schists are the chief mineral producing rocks of the district. Mines and Minerals.

Iron Ores —Near Kondli, Dodguni and Karakurchi and also to the east and south-east of Bukkapatna are a number of bands of ferruginous quartzites. Some of these ores near Chiknayakanhalli and also the concentrates in the beds of streams in the Koratagere and Madhugiri Taluks appear to have been smelted previously.

Gold.—There are indications of gold in the Bellara Trap. Prospecting was carried on to a certain extent on the Bellara Reef and at one time the results appeared to be quite promising but the poor results obtained in depth caused the mine to be abandoned. An account of the results of the work done in that locality is given in the *Mineral Resources of Mysore* page 40.

Gold was also reported to occur in some of the quartz reefs to the east of Koratagere. But the analyses of a number of surface samples from these reefs have, however, failed to show any good indication.

Manganese is found to occur in fairly large quantities near Karakurchi, Dodguni and Janehar. There were four licenses current for prospecting for this ore during 1923-24 and the ores removed from 1905 to 1924 from all the blocks approximate to 36,513 tons, of which 25,767 tons have been exported

Limestone.—Bands of limestone varying in composition from a high calcium variety to magnesian or dolomitic limestone types occur to the north-west of Kondh and also fringing the western edge of the schists to the east and north of Huliyur. The exposure near Voblapur was worked to a small extent by the Geological Department, removing about 10,000 to 12,000 tons of limestone. These were departmentally tested for (1) the possibility of manufacturing calcium cyanamide, (2) the suitability as flux for iron smelting, and (3) after coarse crushing for using as a fertiliser for impoverished soils. The dolomitic limestone of the Shankargudda area (Shimoga District) being at present utilised as a flux for the Mysore Iron Works, the possibilities of utilising these limestone bands for other purposes have not been considered further.

Potstone —The altered amphibolite of the nature of a potstone is quarried to a small extent and made use of for carving utensils. The crushed levigated powder, of the fine grained forms of soapstone occurring near Banasandra, has been used for the manufacture of slate pencils and at present four small factories are producing these pencils at Tumkur.

Ochres —Yellow and red ochre, the altered and hydrated forms of iron ores, are being worked near Janehar, and the material after washing is manufactured into paints at Bangalore.

Other minerals —Corundum. A group of deposits of corundum exist in the Koratagere, Madhugiri and Pavagada Taluks. The mineral is not usually obtained from the matrix rock, but is picked up by the villagers in the cultivated fields after the first showers of monsoon. On account of the erratic occurrences of these loose crystals, when the ground is being covered by soil, it would be difficult to locate the corundum bearing rock.

Graphite —Small crystals of flakey graphite are found to

a small extent in the alkali types of siliceous rocks in the Koratagere Taluk

Earth Soda — Alkaline efflorescences have been noticed in the Sira Taluk at Nejanti and Tadakkur. The Geological Department conducted experiments in washing the earth soda and manufacturing sodium carbonate during 1920

Except the Taluks of Madhugiri, Chiknavakanhalli, and the eastern and northern parts of Sira and Koratagere respectively, the soil is described as generally hard and poor, requiring much labour and manure to render it productive. Acres on acres may be seen in some parts on which there is nothing but scattered stunted shrub without even a blade of grass. This has no reference to the superior land irrigated by tanks *nālas* and spring channels, as these soils of the taluks above referred to are exceptionally remarkable for their fertility. Pasture land is abundant but poor except in the Amrit Mahal *kacals* throughout the district.

The southern and western taluks may be described as most abundant in the red soil and contain large tanks. The eastern Taluka abound in sandy soil, the northern contain some black.

BOTANY

The principal forest in the district is on the slopes of the Devarayandurga hills. Farther north, the hills around Koratagere are clothed with good fuel jungle. Near Madhugiri the vegetation improves in appearance and variety. On the western range of hills running north from Kibbanhalli there is a forest of *karachi* (*Hardwickia binata*) extending from Bukkapatna northwards to Gangarapento.

The following are the reserved or State forests in the District —

	Sq. Mils.
Devarayandurga	30
Madhugiri	32
Bukkapatna	50
Huliyurdurga	36
Kudare-kanave	21
Kemplapura	1½

There are also nine Forest plantations, covering 963 acres, and three Revenue plantations. Of these, three are for sandal, and the others for casuarina and cassia.

The best wooded taluks are those which include the great eastern range of hills, namely, Tumkur, Koratagere, Madhugiri, and the old Huliyurdurga Taluk. In these too, sandal grows. The south-western Taluks are well occupied with trees in topes, and such as have planted themselves in valleys and hedges. Cocoa-nut gardens are numerous, and in some parts the *butca frondosa* grows abundantly in waste lands. The north and centre of the Sira Taluk is badly supplied with wood, but the wild custard-apple grows in profusion in the plains.

With the exceptions above noted, the tree vegetation resembles that of the adjoining districts on the east.

The following are the State Forests and Reserved Lands in the district —

No	Taluk	Name	Extent
1	Tumkur	Devarayadurga	10,3½
2	Do	Doddavadi Betta	1,04½
3	Kunigal	Handalkuppa	3,750 25

Trees are planted along the roads to afford shade to the travellers. The kind of trees usually planted are — *Ala Hunge Hippe Mango Nerle Byala Halasu Hunse Goni Bevu Jali Atti Basari and Jala* Avenue

Besides these 13 village forests covering an area of 4 651 Village Forest acres have been in recent years formed in the Taluks of Tumkur Tiptur, Chiknayakanhalli and Pavagada and the Sub Taluk of Turuvekere for the benefit of the villagers concerned and placed under the management of *lanchayats* constituted therefor. Necessary measures have been adopted for the expansion of such forests in all parts of the district.

The main roads are lined with avenues of tall and well grown indigenous trees.

The working of the system introduced during recent years of planting trees on the *Aibour* day every year is expected to contribute to the tree growth in the District in course of time.

The principal cultivation consists of dry crops the more Crops. important of which are mentioned below. Ragi is the staple food crop. The following table shows the food grains raised in the District during 1925-26 —

Food crops	Area under crop in acres
Ragi	293 017
Horse-gram	99 831
Cholam	38 762
Togari	2, 93
Cowpea	10 115
Bengal-gram	8 766
Cumhu	2 124
Others	63 08
Total area under crops	676 716

The chief crops, food and commercial, raised in the District are rice, ragi jola, togari, avaro kulthi Bengal gram ground nut castor, cocoa nut sugar-cane gingely, chillies and areca nut. Other miscellaneous food and non food crops are also cultivated. Indigo crop has ceased. Cotton, wheat and mulberry are grown to some extent.

The following statement shows the extent of crops raised in 1923-24 —

Name of the crop	Extent cropped in acres
1 Food grains and pulses	580,641
2 Oil seeds	133,591
3 Condiments & spices	5,498
4 Sugar	1,344
5 Fibre	5,095
6 Drug & Narcotics	6,585
7 Fodder	7,002
8 Miscellaneous	65,527

Horticulture

The names of vegetables and fruit raised in the district exhibit the variety of garden produce. Under the former may be mentioned brinjals, cucumbers, pumpkins, onions, garlies, potatoes, cabbages, beans, peas, ginger and the latter includes jackfruit, mangoes, oranges, figs, grapes, apples, gooseberries, pomegranates, plantains, limes, guavas, etc

The fruit industry consisting of figs and pomegranates for which Madhugiri was once famous, has been declining in recent years, owing to the failure of rains and the difficulty of adequate water supply

FAUNA.

Wild and Domestic Animals

The larger game is very scarce, and pretty nearly confined to the reserved forest tracts around Devarayadurga, where tiger, panther, bear, and wild hog are sometimes met with. In the jungly parts of the Sira Taluk, deer may sometimes be found and occasionally cheetas. There are also deer about the plantations in the Gubbī Taluk.

In the Madhugiri Taluk, cheetas are found in the Madhugiri State Forest and occasionally in Chandragiri gudda. There are also deer in the northern and eastern portions of the Taluk. In the Tiptur Taluk, there are cheetas in Konan Kaval and in Pavagada in the Pavagada Taluk. Small game consisting of deer and wild boar are common. Boar hunting, which was the principal pastime during new year day celebrations in the past, seems to be dying out.

Cows, bullocks, buffaloes, sheep and goats are the principal domestic animals. Good breeding bulls and buffaloes of a

fairly superior kind are maintained in some parts of the district

Among bullocks those of Madhugiri Turuvekere and parts of Kadaba are highly esteemed on account of their breed but the cattle generally resemble those of other districts on the east. Buffaloes are commonly used for both agricultural and dairy purposes. Cows are plentiful but poor in size, breed and yield of milk. Sheep kept in large flocks for wool and manure are not of the highest quality but a good breed is met with in Chiknayakanhalli and Tiptur and the Taluks to the south and west. Those of the Madhugiri and Midigera side are considered less valuable. Swine are numerous in certain localities.

CLIMATE AND RAINFALL.

In the south and south west parts of the district the climate Climate. generally resembles that of Bangalore and from Sirsi northwards the climate is similar to that of Chitaldrug. The eastern side of every range of hills is said to be perceptibly warmer than the western.

The average annual rainfall for the district is 26.15 inches Rainfall. spread over 42 days. About 10.5 inches can be expected in the months of September and October in a normal year, very little rain falls from December to March, the total for this period being only 0.73 inch. The annual average ranges from 35.19 inches at Tumkur to 18.36 inches at Arsikere in the Pavagada Taluk. The heaviest fall for a single day was 9.60 inches recorded at Badavannahalli in the Madhugiri Taluk on the 27th September 1897. The annual total is over 25 inches only in the Taluks of Tumkur and Kunigal and in the Turuvekere Sub-Taluk. Pavagada is the driest taluk in the district receiving on an average less than 20 inches in a year. The rainfall in the Sirsi and Madhugiri Taluks is also scanty being only a little over 20 inches in a year. During the past 31 years, the district average was over 30 per cent short of the average in three years and the deficit was over 15 per cent in nine years.

The following table gives the average annual and monthly
normal rainfall in inches at the rain-gauge

Rainfall at
Tumkur

The Table appended shows the annual rainfall at Tumkur since 1837. A periodicity is noticeable in the early records but the recent records do not show any such marked variation. From 1846 to 1870 the rainfall reached a maximum every sixth year and the period became one of four years from 1870 to 1886 and from 1893 to 1903 the period is one of five years. The rainfall was over 50 inches in eight years and the wettest year on record is 1874 when 62.00 inches were registered. During recent years, a fall of 53.21 inches in 1903 is remarkable. The annual aggregate was less than 20 inches in six years, the worst years on record were 1838 and 1875 with 13.80 and 8.98 inches respectively. During recent years, the amount for 1923 was very low, being only 19.60 inches. Out of 88 years, the rainfall in 51 years was below the normal.

Table showing the annual rainfall at Tumkur from 1837 to 1927

Year	Inches	Year	Inches	Year	Inches
1837	26.00	1867	34.23	1897	46.07

				1927	25.65

THE PEOPLE

The population of the district was 773,122 according to the Census of 1921, 394,897 being males and 378,225 females

Distribution.
(a) Number

The number of persons to the square mile is 190. The most thickly populated taluks at the time of the Census were Tumkur where the number was 276 to the square mile, Kunigal, Madhugiri including Koratagere Sub Taluk and Tiptur including Turuvekere Sub Taluk where the rate was 233, 221 and 202 respectively. The most sparsely populated taluks were Pavagada with only 126 and Chiknayakanhalli with 139 per square mile.

(b) Density

The following table compares the population of the district from 1871 to 1921 during the different Census periods —

Inter-censal
Variations.

Taluk and Sub-Taluk	1871	1881	1891	1901	1911	1921
Tumkur	116,910	70,176	90,463	107,512	116,854	1,25,291
Madhugiri	78,508	53,127	64,127	81,412	89,493	91,874
Koratagere	36,094	21,104	29,763	33,043	40,718	41,945
Sira	75,915	51,780	68,327	77,601	89,311	93,301
Pavagada	62,108	42,737	53,377	61,741	61,171	65,520
Chiknayakanhalli	54,544	32,743	44,067	51,286	57,484	60,404
Gubbi	91,423	57,854	73,500	87,464	90,870	1,02,067
Tiptur	53,642	39,090	47,377	54,354	61,518	63,031
Turuvekere	35,064	26,516	31,510	30,333	39,175	39,537
Kunigal	75,416	51,230	66,502	77,561	83,812	89,093
Total	680,965	447,100	573,465	670,377	735,346	773,122

During the decade preceding 1881 the population met with a severe check from the results of the great famine of 1876-77, and it took over 20 years to reach again the pre-famine figure. During the ten years from 1901, the population increased by 64,969 or about 9.69 per cent against a general increase of 4.8 per cent for the whole State.

Religion.

The following table shows the distribution of population in the District according to religion —

Religion	Above 15		Under 15		Total	Per cent
	Males	Females	Males	Females		
Hindus	227,732	213,127	141,919	141,887	724,665	93 73
Mussalmans	11,093	10,211	8,625	7,975	37,904	4 90
Jains	1,126	969	645	583	3,323	42
Christians	400	298	287	204	1,189	15
Animists	1,693	1586	1377	1,385	6,041	78
Total	242,044	226,191	152,853	1,52,034	7,73,122	

Occupation.

According to occupation or means of livelihood, the population may be classed as follows —

Exploitation of earth	148,173	Trade	8,328	Persons living on their income	280
Extraction of minerals	13	Public Force	1,138	Domestic service	2,017
Industrial Occupation	14,055	Public Administration	3,205	Insufficiently described occupation	275
Transport	658	Professions & liberal arts	3,345	Unproductive	2,730

TOWNS AND VILLAGES

Towns

The district contains ten municipal towns with a population of 51,528, composed of 41,252 Hindus, 8,980 Mussalmans, 820 Christians, 384 Jains and 92 Animists. The following is the list —

Tumkur	14,246
Chiknayakanhalli	6,432
Sira	5,596

Dodda Saggere	Ahobala Nara-simhasvami Car Festival.	5 days in March.	6 000	A cattle show is also held

The following are the more important weekly fairs where Weekly Fairs. extensive trade is carried on —

Place	Taluk	Day	Number of visitors
1. Bellavi	Tumkur	Monday	1 000
2. Gubbi	Gubbi	Monday	2,000
3. Tiptur	Tiptur	Saturday and Sunday	10,000
4. Nidasale	Kunigal	Monday	15,000

The weekly markets in other places are comparatively modest in scale and are useful in supplying local wants and also in affording facilities for the disposal of the surplus produce of the *rayat* class.

Vital statistics.

The birth rate of the District in 1922-23 was 19·18 per mille of the population, while the death rate was 13·33 per mille. The number of births registered was 14,820. The total deaths registered during the year were 10,217

The following were the causes of deaths registered :—

From Cholera 1, Small-pox 122, Plague 76, Malarial fever 5,156, other causes 4,862

It is reported that Madhugiri Taluk is not generally subjected to epidemic diseases and that even plague has not made its appearance for many years, *i.e.*, from 1905-06 and that in Midigesi and other villages, there was no outbreak of plague at all from the beginning

The following statement shows the variations in the number of births and deaths during the five years 1918-19 to 1922-23 —

Year	Deaths						Births
	Cholera	Small-pox	Plague	Malarial fever	Other causes	Total	
1918-19	21	1,228	188		51,801	53,238	15,742
1919-20	118	2,278	77	3,260	5,017	10,750	14,031
1920-21	5	748	108	4,450	4,204	9,515	13,877
1921-22	2	228	94	5,009	3,971	9,304	13,771
1922-23..	1	122	76	5,156	4,862	10,217	14,820

CASTES AND OCCUPATIONS.

Castes.

The castes or classes among the Hindus numbering over 10,000 come in the order as noted below —

1	Vakkaligas	1,88,805	8	Tigalas	21,783
2	Lingayets	19,019	9	Brahmans	20,276
3	Madigas	65,840	10	Vaddas	18,288
4	Bedas	58,311	11	Banajigas	15,099
5	Gollas	50,553	12	Agasas	13,444
6	Kurubas	46,024	13	Panchalas	13,213
7	Holeyas	38,207	14	Upparas	13,165

The following table shows the distribution of population Occupations, according to the occupation —

Occupation	Total including dependants	Actual workers			Dependants
		Males	Females	Total	
Exploitation of animals and vegetation.	6,50,358	2,22,073	28,100	1 48 173	5 11 '15
Exploitation of minerals.	55	12	1	13	42
Industry	48 920	12,286	1 760	14 035	34 874
Transport	1 701	647	11	658	1 133
Trade	27,523	0,232	2,150	8,382	19 141
Public force	4,229	1 004	44	1 138	3,001
Public Administration.	11 482	3,045	160	3,205	8,277
Profession & liberal arts.	0,870	3,055	200	3,245	0,534
Persons living on their income.	005	213	67	280	625
Domestic service	2,342	1 706	311	2,017	415
Insufficiently described occupation	1 001	228	47	275	024
Unproductive	5,310	1,375	1,355	2,730	2,580
Total	7 73,123	151 968	32,305	1,84,271	5,88,851

Percentage of actual workers to total population 23 82

Percentage of dependants to total population 76 18

CHRISTIAN MISSIONS

The Wesleyan Mission maintains four Night Schools, eight Elementary Schools, five Middle Schools a Boys Orphanage and Boarding School, and a flourishing industrial school The Union Kanarese Seminary for the training of Evangelists, the men's Normal Training School and a School for the training of Bible women are all located in Tumkur

The Wesleyan Mission.

SECTION II—HISTORY AND ARCHÆOLOGY.

A HISTORY

Legendary
Period

Omitting the legends that the Kadaba tank was constructed by the orders of Rāma, when encamped in the neighbourhood, that the emperor Nṛiga was cured of leprosy by bathing in the Nāgini, the stream that forms the Kunigal tank, and that Salivāhana was born at Hale Tanduga near Turuvekere, the place in this district claiming the highest antiquity is the village of Sampige in Gubbī taluk. It is said to be the site of Champaka-nagara, the capital of Sudhanva, son of a king named Hamsa Dhvaja. There was a Hahaya prince of this name, of whom the following account is given (*Central Provinces Gazetteer*, Int 1) —“ Tradition asserts that at the end of the Satyayuga a monarch named Sudhyumna presided over the destinies of the East. Of his descendants, one son, Nila Dhvaja, got the throne of Mahishmati, a second, Hamsa Dhvaja, became monarch of Chandrapur; and the third received the kingdom of Ratnapur.” In later times, the village of Kaidāla near Tumkur is said to have been a large city named Kridapura, and the birth-place of the famous sculptor and architect Jakanāchārī (see Volume II Chapter V). The legend regarding Devarayadurga and its capture from a robber chief, named Andhaka or Lingaka, by Sumati, son of Hēmachandra, king of Karnāṭaka, and the subsequent foundation of a city by Sumati near Nela-mangala have already been related in connection with the Bangalore District.

Gangas

The Tumkur country was from an early period in the possession of the Gangas, and an inscription of the tenth century spells the name as *Tummeguru*, which may mean the country of the *tumme* or *tumbe*, a common fragrant herb (*leucas indica*). Among other records of the Gangas, a grant by Nava Kāma, distinguished as *sishta-priyah*, beloved by the good, (679-713), was obtained at Hebbur, and inscriptions of Śrīpurusha

(726-777) occur at Midagesi and of Satyavākya Nolamba kulāntaka (963-974) at Kibbanhalli. The last of these was probably Mārasimha, who died in 974 A.D.

The Nolambas or Nonambas, who were of Pallava descent Nolambas. have left many memorials throughout the east of the District. They had a capital city at Penjeru or Henjeru, in Tamil called Pperuncheru which Mr. Rico has identified with Hemavati, situated on the northern border of Sira taluk in Madak sira. Its name occurs in a number of professedly very ancient inscriptions (see *E O III, Mysore I*, Introd. p. 2), as well as in certain legends, and the existing remains show that it must have been a place of considerable importance. The Nolambas had their stronghold at Nidugal which is only a few miles to the east, in Pavagada taluk. In the ninth century they were in matrimonial alliance with the Gangas. Nolambadhiraja having married Jayabbe, younger sister of the Ganga king Nitimarga. He also assigned to each of his other queens certain villages in the Sira country. His son was Mahēndra, who is said to have uprooted the Chōlas and all other rivals. Mahēndra's son Ayyapa Dēva or Nanniga seems to have fought with the Gangas. He had two sons, the second of whom Dilpa or Iravi Nolamba has two inscriptions to his credit, dated in 913 and 918 A.D. The latter of these mentions Lakulisa as having been re-born in the person of Muninātha Chilluka in whose favour a grant is made. Chālukya supremacy followed in or about 980 A.D. but it was largely nominal during much of the period. The Nonaba raiyats, who are more numerous in this District than anywhere else, are representatives of the subjects of the old Nonamba kingdom the Nonambavādi. Thirty-two Thousand of which a further account will be found under Chitaldrug District.

The Hoysalas, whose inscriptions are numerous, succeeded Hoysalas. the Gangas, and there are no regular Chōla remains in this District. But the Hoysalas subdued Irungola, a chief whose

capital was at Henjeru and his stronghold at Nidugal, and the line of kings to which he belonged had the title "Lords of Oreiyur," the ancient Chōla capital, now called Warriore, at Trichinopoly, and styled themselves Chōla kings. They profess to be descended from Karikala Chōla, through a king called Mangi or Kal Mangi. His successors were Bobbi, or Bichi, Gōvinda, Irungola (I), Malli Dēva or Bhōga, Brahma or Barma whose wife was Bachala Dēvi, and their son Irungola (II), called Irungola-Dēva Chōla-mahārāya. A representative of the line, named Vīra Bomma, who had a minister Baichēya or Chaichēya, seems to have been still in power at Nidugal in the thirteenth century.

From Turuvekere, the king Nārasimha I appears to have obtained his wife Lōkamma or Lōkāmbika, whose name is perpetuated in that of the neighbouring village of Lōkammanhalli, granted by her as an endowment to a temple. It is in his reign that we first meet with the singular name Ānebiddasari or Anebiddajari, meaning "the steep where the elephant fell," as that of the *nād* or district which included the Dēvarāyadurga hills and the central and southern parts of the Tumkur taluk. It must have been in use, however, before that, and continued in use during the Vijayanagar period. The steep itself seems to have been on Dēvarāyadurga at a spot called Ānegondi. Kumāra Chikka Kōtaya Nāyaka was ruling at this place in 1269 A.D. When, after the death of Sōmēsvara, a partition was made of the Hoysala dominions between his two sons, the share which, along with the Tamil districts, fell to Rāmanātha did not extend west of the Dēvarāyadurga hills, and a line from Urudigere to Hebbur, with one from there east to Lakkur in Malur taluk (Kolar District), would pretty well define the western and southern limits of his territory in the Mysore country.

Chālukyas

The later of the Henjeru Chōla inscriptions and the earliest of the Hoysala inscriptions in the District acknowledge the supremacy of the Chālukyas, and the records of this line are met with throughout the western taluks Tiptur and

Chiknayakanhalli Under them the Hoysalas Vinayaditya and Vishnuvardhana (at the beginning of his reign) are represented as ruling over the Gangavadi Ninety six Thousand and Narasimha as ruling over both that and the Nonambavadi Thirty two Thousand

The Vijayanagar empire arose in the fourteenth century and many traces exist of the rule of its kings throughout the district. Inscriptions of the time of Bukka and of Sadasiva Raya, Sri Ranga Rāya and Vēṅkatapati have been found in the District. It was under this sovereignty that several feudatory States arose of local interest. The Nidugal chiefs were descended from Harati Tippa Raja or Tippa Nayaka whose possessions were in the north-east of the Chitaldrug District under which an account of him will be found. Pavugada 51, dated in 1487 A D, traces the genealogy of this chief. It describes him as ruling from Nidugal hill fort and as becoming the master of many other hill forts. One of his titles was *Kathāri Rāya*. He built a temple and made a tank in the name of his wife Lakshmi Devi. At his death he divided his territory among his seven sons. But on the invasion of the country by the Bijapur army the descendants of these were driven out of their estates and Timmanna Nayak, who had lost Doddāri retired to the hill of Nidugal which he fortified. There the family long remained paying to Srir a tribute of 3 000 *pagodas*. On the capture of Srir by Haidar Ali in 1761, the Nidugal chief, also called Timmanna Nayak, submitted to the conqueror who imposed on him a tribute of 7,000 *pagodas* and the supply of 300 men. Subsequently while accompanying Tipu Sultan in the expedition against Mangalore he fell ill and when at the point of death was compelled to sign a letter relinquishing his territory and ordering his son Hottanna Nayak to deliver it up to the governor of Chitaldrug. Possession was at once taken, and Hottanna Nayak and his brother were sent as prisoners to Chitaldrug and thence to Seringapatam where they were put to death when the British army ascended the Ghāts. That of

Vijayanagar
Empire:
Local Chiefs

Holavanhalli or Korampur, in the east, was founded by Baire Gauda or Vira Gauda, one of the band of refugees that settled in the fifteenth century at Āvatī, Dēvanahallī taluk and whose history is so prominent in connection with the Bangalore and Kolar Districts. The newly acquired territory of Holavanhalli does not seem to have been long enjoyed by this family, when it was conquered by the chief of Magadī, who gave it to his own brother Ankana Gauda. The Baire Gauda then ruling, with his eldest son Dodda Baiche Gauda, repaired to the Mussalman court at Sīra, where he was not only well received but was invested with an important command. Meanwhile, the younger son, Sanna Baiche Gauda, apparently preferring his own people, sought protection from the chief of Dod-Ballapur, who, after a time, sending a force, reduced Holavanhalli. Sanna Baiche Gauda was placed in the Government and Ankana Gauda with his family was imprisoned at Hulikal. But within two years the Sīra army attacked Dod-Ballapur and captured it. Baire Gauda fell in the siege, and in recognition of his services the eldest son, Dodda Baiche Gauda, was invested with the Government of Holavanhalli, with an increase of territory. Subsequent members of the family fortified Koratagere, subdued the neighbouring *hōbls* belonging to Dēvarayadurga, Mākālidurga and Channarāyadurga, and waged war successfully with the chief of Madhugiri. The successes of the Mysore army soon reduced those possessions, which were finally annexed by Haider Ali. *Maddagiri* 31 of 1656, 45 of 1680 and 30 of 1726 give the succession of these chiefs. The *Maddagiri* line of chiefs arose in a similar manner, and extended their possessions over the north of the district, fortifying Madhugiri, Channarāyadurga and other points. In 1678 the joint rulers, Rāma Gauda and Timma Gauda, on the capture of their capital by Dēva Rāja, the Dalavāyī of Mysore, were taken prisoners and conveyed to Seringapatam. They were afterwards released and granted Midagesī as an estate. The *Hāgalvādi* chiefs appear to have had their origin from a *talārī* of Yerrakatta, afterwards known as Sāl Nāyak, who, on the overthrow

of the Vijayanagar Government, became the leader of a band of free-booters, and succeeded in capturing Kaandikere and Shettikere. He afterwards assisted the Ponukonda army with a force on condition of being confirmed in his conquests, and when that army was defeated escaped to his own country with such plunder as he could secure, including it is said twelve elephants. Chiknāyakanhalli, the seat of Government had been founded and named after his brother when Honnavalli, Taruvkere and Nonavinkere were added to their possessions. It was on the completion of these enterprises that he is said to have taken the name of Sal Nayak from the idea that his conquests extended in a *sālu* or line. From Chiknāyakanhalli 38 of 1669, it may be inferred that the chiefs of this line received their estate from the Vijayanagar king Vēṅkatapati Rāya. The succession mentioned is Sālī Nayaka his son Sangappa Nayaka, his son Chenna Basavappa Nayaka and his son Mudiappa Nayaka. The Chiknāyakanhalli country changed hands several times being held alternately by the Muhammadans and the Mahrattas, until reduced by the Mysore army in the time of Chikka Dēva Raja. At Hebbur a small zamindari was formed under Hale Gauda and Timma Gauda which being seized for a time by Kempe Gauda of Magadi who owned the southern parts of the District, and then by the Hagalvadi chief, was finally united to Mysore.

The overthrow of the Vijayanagar empire on the field of Talikota in 1565 opened the way for many invaders. The Bijāpur army under Rān-dulhā Khān overran all the north of the District in 1638 and Sira, with Doddballapur, Bangalore, Hoskote and Kolar forming what was called Karnātic Bijapur, was placed under the Government of Shahjī (see Bangalore District). As memorials of Bijapur rule over the district may be mentioned the Persian inscription (Sira 66 (b) dated in 1651 A. D.) on the tomb of Malik Rihan Subedar of Sira. It says that he came there in 1637 to increase the heanty of the country. He is described 'as

Bijāpur

a lord of riches and power ” and his characteristics “ those of a friend of God ” He died in 1651 His tomb is mentioned below.

Mughals

On the capture of¹ Golkonda and Bijāpur by Aurangzīb in 1687, and the conquest of their territories by the Mughal army, Sīra was made the capital of the new province—consisting of the seven parganas of Basavapatna, Būdihal, Sīra, Penukonda, Doddballapur, Hoskote, and Kolar—placed under Khāsim Khān as Subadār or Faujdār of the Karnātic This officer applied himself with energy and success to the task of regulating and improving the District In 1698, he was killed at Doddēri, and the distinguished general Zulfikar Khān succeeded Sheikh Farid, one of the rulers, built the big mosque at Sīra in 1696 (*Sīra* 66 [a]) Another Governor named Rustam Jang is said to have built the fort and *petta*, and by his wise administration of affairs to have obtained the title of *Bahadur* and the name of Karfiyat Khān In 1720, we have Nawāb Dusa Kulikhān as Subedār In 1742, Nawāb Dīlāwar Sahib was Subedār and he apparently put down certain disturbances (see 13) In 1757, Sīra was taken by the Mahrāttas, and restored two years after on the conclusion of peace with Mysore In 1761, it was taken by Haider, in alliance with Basālat Jang, who had conferred upon him the title of Nawāb of Sīra In 1766, it fell again into the hands of the Mahrāttas by the defection of Haider’s brother, and in 1774 was reconquered by Tipu. The Mahrāttas once more occupied it for a short time in 1791 on marching to join the army of Lord Cornwallis

The following is a professed list of the Subedārs of Sīra under the Mughal Government, as given in the Mackenzie MSS. —

Khāsim Khān	..	1686
Atish Khān	..	1694
Kurad Manur Khān	.. .	1697
Dhakta Manur Khān	.. .	1704
Pudad Ullā Khān	1706

Davud Khān	1707
Sadat Ulla Khān	1709
Amin Khān	1711
Ghalib Khān	1713
Darga Khuli Khan	1714
Abid Khān	1715
Mulahavar Khān	1716
Darga Khuli Khān	1720
Abdul Rasūl Khan	1721
Tayar Mahomad Khan	1772
Dilavar Khan	1724-56

The foregoing accounts have in order to present a continuous narrative of the history of each chiefdom, necessarily anticipated to some extent the steps by which the various parts of the District were brought under the rule of the Mysore Rājās. But it was Chikka Dēva Raja who at the end of the 17th Century, effected the conquest of all the territory which was not appropriated by the Bijapur Government established at Sirā. Thus Ketasamandra, Kandikero Handalagere, Gulur, Tumkur and Honnavalli, are enumerated among his conquests after which he seized Jadakanadurga and changed its name to Chikkadēvarāyadurga now Dēvarayadurga. Tumkur 45 dated in 1699 mentions this change of name. Chikka Dēva's connection with the district is mentioned in an earlier inscription (*Kunigal* 7) dated in 1674. Madhuguri, Midagesi, Bijjavara and Channarayadurga were also subdued in his reign. The remainder of the district fell to Mysore on the conquest of Sirā by Haidar Ali in 1761.

At the beginning of the present century the district was embraced in the Madhuguri Faujdari. After the British assumption in 1832, the Tumkur District was formed and with that of Chitaldrug constituted the Chitaldrug Division. At the reorganization of 1863, this Division was broken up and Tumkur became one of the districts of the new Nundydrug Division. In 1882 it was extended so as to include Chitaldrug as a Sub Division. In 1886, Chitaldrug was restored as a District, but Pavagada taluk remained as part of Tumkur District.

B ARCHÆOLOGY.

The inscriptions found in the District will be found included in *E C XII, Tumkur District* and in the *Mysore Archæological Reports*

The most important specimens of architecture in the district are the Muhammadan buildings remaining at Sīra. Of those now standing, the Juma Masjid (dated 1696) and the tomb of Malik Rihan (dated 1651) are the chief. The walls of the latter are of rustic stone-work, stones of all sizes and shapes being fitted together. But there is no doubt that Haider Ali, who received the title of Nawab of Sīra in 1761, was much impressed with the Mughal architecture of the place. The palaces erected by him and by Tīpu Sultān at Seringapatam and Bangalore were copied from one at Sīra erected by the Mughal Governor Dilāvar Khān. The Bangalore fort was in like manner built on the model of the fort at Sīra, and the Lāl-Bāgh in Bangalore was probably suggested by the Khān-Bāgh at Sīra. The fortifications on the Madhugiri hill are formidable erections, of the time of Haider Ali. Buchanan, writing in 1800, says—“The view of Madhugiri, on approaching it from the east, is much finer than that of any hill-fort I have seen. But for picturesqueness of situation nothing can exceed that of the Narasimha temple on Dēvarāyadurga, which was built in the time of Chikka-Dēva-Rāja (1672-1704). The group of rocky pinnacles, on a ledge of which it stands, reminds one of some scene on the Rhine. The building itself is not in any way remarkable.”

SECTION III—ECONOMIC

GENERAL AGRICULTURAL CONDITIONS

Soil

Except in the Taluks of Madhugiri, Chiknayakanhalli and the eastern and northern parts of Sīra and Koratagere, respectively, the soil is described as generally hard and poor requiring much labour and manure to render it productive.

Acres and acres may be seen in some parts on which there is nothing but scattered stunted shrub without even a blade of grass. This has no reference to the superior land irrigated by tanks, *nalas*, and spring channels as these soils of the taluks above referred to are exceptionally remarkable for their fertility. Pasture land is abundant but poor except in the Amrut Mahal *lārols* through out the District.

The southern and western Taluks may be described as most abundant in the red soil and contain large tanks. The eastern taluks abound in sandy soil while the northern contain some black cotton soil.

The crops that are generally grown in the District are — rice ragi jola horse gram ground nut, castor etc.

The following is a table of the chief agricultural statistics for the five years from 1920-21 to 1924-25 —

Chief Agricultural statistics and Principal crops

Year	Area of the District	Area available for cultivation	Cultivable waste not in occupancy	Cultivable area under occupancy	Current fallows	Net area cropped
1920-21	26,07,363	14,02,756	1,30,562	12,62,574	4,26,131	8,26,743
1921-22	26,09,189	13,96,290	1,30,457	12,65,843	3,43,000	8,82,513
1922-23	26,07,408	13,94,740	1,27,329	12,71,311	3,63,264	9,08,043
1923-24	26,07,407	13,94,504	1,22,969	12,75,535	4,75,677	7,99,670
1924-25	26,07,407	13,99,158	1,23,139	12,75,949	3,75,219	8,99,670

The following table shows the area of different crops raised in the district during the five years 1920-21 to 1924-25 —

Year	Food grains and pulses	Oil seeds	Condiments and spices	Sugar	Fibre
1	2	3	4	5	6
1920-21	6,78,870	1,11,220	1908	1301	3,286
1921-22	7,01,227	1,11,553	8,854	1,775	3,869
1922-23	7,20,310	1,30,793	7,343	2,068	4,003
1923-24	5,80,641	1,33,691	5,498	1,341	5,095
1924-25	6,93,411	1,30,084	5,753	1,123	75,40

Year	Dyes	Drugs & Narcotics	Fodder Crops	Miscellaneous
	7	8	9	10
1920-21		3,437	3,358	37,260
1921-22		4,262	62,522	62,522
1922-23		4,689	55,211	55,211
1923-24		6,585	7,092	65,527
1924-25		5,292	8,362	66,383

The following table shows the number and extent of different holdings under cultivation in the district during 1920-21 to 1924-25 —

Year	Holdings not exceeding one acre in extent		Exceeding one acre and not exceeding five acres		Exceeding five but not exceeding ten	
	No	Extent	No	Extent	No	Extent
1	2	3	4	5	6	7
1920-21	18559	48,296	48,428	2,29,952	26,077	2,60,273
1921-22	21466	21,157	51,135	2,65,331	25269	2,43,907
1922-23	21299	20,956	49,893	1,87,332	28145	2,64,690
1923-24	26490	46,110	47,956	2,29,301	29223	2,59,929
1924-25	23516	22,962	50,030	1,89,692	28709	2,64,864

Year	Exceeding 10 but not exceeding 50		Exceeding 50 but not exceeding 100		Exceeding 100 but not exceeding 500		Above 500 acres	
	No	Extent	No	Extent	No	Extent	No	Extent
	8	9	10	11	12	13	14	15
1920-21	25752	4 33,813	2570	1,47,350	434	1,16,323	2	1,120
1921-22	28162	4,55,066	3102	1,89,208	435	71,378	12	4,742
1922-23	29117	5,18,593	3042	1,74,238	448	73,860	12	4,742
1923-24	25959	4,35,550	2421	1,67,582	425	1,05,334	11	5,130
1924-25	29148	4,73,010	3029	1,88,319	431	1,07,057	10	5,110

The following table gives the number of holders classified according to the amount of revenue paid during 1920-21 to 1924-25 —

Year	Holders paying assessment or jodi of Rs. 5 and under		Holders paying assessment exceeding Rs. 5 but not exceeding Rs. 25	
	No.	Extent	No.	Extent
1	2	3	4	5
1920-21	55507	4,30,832	60785	5 12,237

AGRICULTURAL LOANS.

The following statement shows the different kinds of loans granted in the District during the years 1920-21 to 1924-25 :—

Name of Loan	1920-1921		1921-1922		1922-1923	
	No	Amount	No	Amount	No	Amount
1	2	3	4	5	6	7
1 Land Improve- ment and irriga- tion	42	8,550	34	5,220	30	4,850
2 Takavi	49	6,085	21	2,150	30	4,000
3 Sericulture		580	.	.		.
4 Fruit cultivation		225				..

Name of Loan	1923-1924		1924-1925	
	No	Amount	No	Amount
	8	9	10	11
1 Land Improve- ment and irriga- tion	L I 58 Irr 1168	6,162 8 0 1,82,476 0 0	5965	60415 Irr
2 Takavi	4193	1,13,291 8 0	.	.
3 Sericulture	.			
4 Fruit cultivation	.			

Remarks —Owing to the prevailing distress, Rs 10,000 was sanctioned for granting subsistence loans free of interest in the Taluk of Madhugiri and the Sub-Taluk of Koratagere. A sum of Rs 2,700 was also sanctioned as Takavi loans to give relief to weavers in the Madhugiri Taluk through Co-operative Societies.

IRRIGATION

The subjoined statement shows the total number of major and minor tanks and irrigation works in the district and the area irrigated by each —

Taluk	Tanks in action				Wells	
	Major		Minor		No.	Extent irrigated
	No.	Extent irrigated	No.	Extent irrigated		
Elra	57	14,379-0 Private tank 10	09	3,472-22 "00-0	25*	A 5
Koratagere	17	4,334-18	Govt 34 Pri. 13	1 130-20 155-5	604	21-0

Total	20,934	21 420	9,043	3,628	3,457	1,374

N.B.—There was no separate Maramat Department since 1923-24 since it has been amalgamated with the P. W. D.

FORESTS

Like those in other maidan districts of the State, the forests of this district contain only stunted tree growth fit for small timber and fuel suited for the agricultural and domestic requirements of the surrounding population. Kamara (*Hardwickia binata*) trees are found gregariously in the Bukkapatna Forest. Small bamboos are found in the Dēvaravadurga and the Madhugiri State Forests. Among the chief Minor Forest Products obtainable in the district may be mentioned Tangadi Kakke, Alale, Seegge, Tupre, Honge Lac, etc.

Timber Fu
and Minor
Forest
produce.

The casuarina poles, the chief product of the plantations in the Tumkur and Gubbi Taluka, are exported chiefly to Kolar Gold Fields.

Sandalwood

Sandal as the monopoly of Government is being collected departmentally and sent to the Bangalore Sandal Koti, where it is dressed and supplied to the Government Sandal Oil Factory, while the Minor Forest Produce is leased out to private enterprise.

Quantity of
Forest
produce

The following statement shows the quantities of Forest Produce removed departmentally and by licenses from the forests in the district during the three years from 1921-22 to 1923-24 —

Year	Sandalwood	Timber	Bamboos	Grass	Fuel
	Tons	c ft	No	Tons	Tons
1921-22	2	4,269	77,170		7,161
1922-23	7 $\frac{3}{4}$	3,976	1,00,175	4	8,458
1923-24		6,569	90,966	11,193	7,360

Revenue
from Forest
produce

The revenue derived by the sale of Forest Produce during the past four years from 1921-22 to 1924-25 is exhibited in the following table —

	1921-22	1922-23	1923-24	1924-25
	Rs a p	Rs a p	Rs a p	Rs a p
Sandal-wood	71 14 3	27,277 0 2	389 7 11

MINES AND QUARRIES

(See under *Geology*)

INDUSTRIES

The chief industries of the District are briefly described Talukwar below —

Areas and
Manufac-
tures.

The Wesleyan Mission Workshop at Tumkur manufactures some good furniture. Slate pencils, crayons, country carts and wooden furniture are manufactured to some extent in Tumkur town. Glass bangles are manufactured at Dibbur, brass utensils at Sitahal and Oomdagere and strong tape in a few villages in the taluk. There is also a rice mill working in Tumkur town.

1. Tumkur
Taluk.

Oil pressing and manufacture of oil cakes is carried on on a large scale at Madhugiri. Country shoes are also manufactured to a small extent. The manufacture of cotton cloths is carried on in various villages of the Taluk.

2. Madhugiri
Taluk.

Glass bangles are manufactured in Tovinkere and Koratagere. Dyes are prepared to a small extent at Koratagere.

3. Koratagere Sub-
Taluk.

Sira was once noted for its country shoes, which industry is still practised to a small extent. Manufacture of coarse woollen *kambli*s and strong tapes is carried on in different villages of the Taluk. Mats are prepared to a small extent.

4. Sira Taluk.

Coarse woollen *kambli*s are manufactured to some extent. Cotton cloths, checks and silk fabrics are made in Krishnapur village.

5. Pavagada
Taluk.

Manufacture of cotton cloths, checks, coarse woollen *kambli*s, silk fabrics, strong tapes and ropes is carried on in different parts of the Taluk.

6. Chiknayakanhalli
Taluk.

Pig iron is manufactured in small quantities at Davanada and Hosahalli

7 Gubbi
Taluk

The Taluk is chiefly noted for the cotton and silk weaving done on a large scale at Kallur village. Carts and other wooden articles are manufactured to a small extent at Gubbi. There is an oil mill and also a rice mill at Gubbi.

8 Tiptur
Taluk

Cotton weaving is carried on, on a large scale, at Annapura and a few other villages in the Taluk. Ropes and country carts, to a small extent, are manufactured in the Taluk.

9 Turuve
kere Sub-
Taluk

Manufacture of cotton checks is carried on in the Taluk. Dyes are also prepared to a small extent.

10 Kunigal
Taluk

The Taluk is chiefly noted for its silk production. Mulberry growing, silk-worm rearing and silk reeling are carried on in many villages of the Taluk. Manufacture of iron implements is done on a pretty large scale at Bidangere and Gottigere villages. Mats are prepared to a small extent at Kunigal and Amritur.

The subjoined two statements show the important mills and other concerns in the District and the rural industries pursued in the District. The following is a list of Large Industrial Establishments in the District —

Large Industrial establishments in Tumkur District.—

Name of Establishment	Class or Description of Industry	Average number of persons employed daily	Whether worked by mechanical power or Hand Power
Mr Thomson's Brick and Tile works	Manufacture of Bricks and Tiles	30	Mechanical Power

Statement of rural industries in the Tumkur District

Rural
Industries

Taluk	Name of Industry	Number of people occupied	Approximate value of the turnout for one year
Sira	Weaving 1 400 looms	5,500	Rs 70 000 in the shape of trade in kam- blis.
Koratagere	Glass Bangles at Torin kere	15	150
Turuvekere Sub- Taluk,	Weaving	52	20,500
Gubbi	Weaving Factory Gubbi	4 persons daily	1 872
Pavagada	Blankets	500	50 000
Do	Cotton Mill Cloth	300	30 000
Madhugiri	Weaving	577	
Do	Pottery	394

Tiptur			
Kundgal	Smithy works (381)	152	13,650
Chiknayakan- halli	Manufacture of Brasses & Copper Utensils	120	15000
Do	Weaving	500	5 000
Do	Silkworm rearing	300	4,000
Do	Pottery	500	1 000
Do	Repairing Combs out of Wood	25	1 000
Do	Manufacture of Slate pencils.	70	5,000
Do	Manufacture of tiles	60	20,000

COMMERCE AND TRADE

The trade of the district, though followed by many castes or classes is principally in the hands of the Lingayats. Their chief emporium is at Gubbi but there are also extensive marts at Bellary Turuvekere Tiptur and Chiknayakanhalli to which the trade of the Southern Mahratta country and of the Bellary Vellore and Madras districts is attached as well as that of the west and south of the Mysore country. The Lingayat merchants generally have either extensive connections or branch agencies at Dharwar and Nagar.

Weekly markets are held in almost all taluk head-quarters and at centres numbering about 37 in all, for the convenience of the people and at these places transactions are made on a large scale

The following statements show the different articles of trade dealt with and the approximate value of each as exported or imported in the several taluks of the district --

MEANS OF COMMUNICATION

The Madras and Southern Maharashtra Railway from Bangalore to Poona runs through the District for 59½ miles from east to west, with stations at Hirthahalli Tumkur Gubbi Vittur Yelladiagi Banasandra Kanli Tiptur and Konehalli.

The length of State Fund road is 16½ miles maintained at Rs. 20,775. District Fund roads cover 512½ miles, the cost of annual maintenance being Rs. 13,556. The particulars regarding each class of roads are given below. Two new roads viz. Hulivurdurga Amruttur road and Madhugiri Hindupur road 10 miles long are being opened.

(a) Provincial Roads

	Miles	Annual Maintenance
Fakir Bellary Road	4	100
Tumkur Bellary Road	6½	1,500
Bangalore-Mangalore Road	1	0
Bangalore Honavar Road	24	1,000
Total	119	20,775

FAMINE

Since the Famine of 1877-78 there have been six bad years, viz., 1891-92 1904-05 1905-06 1907-08 1908-09 and 1923-24 in three of which viz. 1st 5th and 6th the distress was so acute that relief operations had to be undertaken by Government. In the first of these years, the District did not get early *mungār* rains, with the result that sowing operations were postponed much beyond the usual season. A few showers later on permitted sowing but crops began to fade owing to insufficiency of moisture in the land. The north-east monsoon too thoroughly failed. There was no wet cultivation under the tanks in the greater part of the District. In 1904-05 also the situation was, owing to failure of rains, rather grave and this gravity was intensified in 1905-06 as the south west monsoon also failed in that year. The north-east monsoon in 1907-08 proved most disappointing and the south west monsoon too in the next year was scanty. The year 1908-09 will thus be seen to have been preceded by three bad years while there were many years of average prosperity before 1891-92. The distress in 1908-09 was decidedly more acute than in 1891-92 and it extended over a larger area also. While only three taluks viz. Siru Chiknayakanhalli and Turuvekere were the parts most affected in 1891-92 the affected tracts in 1908-09 constituted about 2 600 square miles i.e. nearly one half of the district. The distress was particularly severe in the taluks of Kunigal Gubbi Turuvekere Chiknayakanhalli, Tiptur and Pavagada.

The last of the years in the series above referred to had a scanty rainfall the average for the year being only 14.71 inches as against 25.72 inches during the previous 40 years. The year proved an anxious one and the taluks of Madhugiri (Maddagiri) Pavagada Koratagere and a portion of Gubbi passed out of a severe drought.

The outturn of crop in each of these three years was very poor, ragi, the staple food grain, yielding less than a 4 anna crop.

The relief measures undertaken by Government in these three years were almost the same. Tank beds were thrown open for cultivation and ryots induced to sow quick growing crops. Restoration or repairs of tanks, and the construction, repairs or improvements of roads were undertaken as the cooly classes required employment.

Loans were freely granted for irrigation and drinking water wells and other land improvements. People rushed in large numbers for the Takavi and Subsistence loans sanctioned, which were repayable in easy instalments. Fair amounts were sanctioned by Government for granting advances to particular classes of people who were mostly affected by the distress. Grain depôts were opened in several places and Burma rice was imported in large quantities. Private individuals and Associations helped the poor both pecuniarily and by sale of ragi in small quantities at reduced rates in addition to the distribution of gratuitous relief afforded by Government to the old, decrepit and *gosha* people. In spite of the severity of the distress, it is gratifying to note that there were practically few or no deaths from starvation.

But in regard to the fate of cattle, the district fared worst. Large numbers of cattle died for want of fodder, in spite of the preventive measures taken by Government, such as throwing open the District and State Forests and Amrut Mahal Kaval lands for free grazing and permission to cut remove and use date leaves as fodder for cattle.

Several other kinds of relief, such as the remission of water-rates for the use of tank water by ryots and dry and wet assessments were afforded to the people. Grain compensation allowance was granted to low paid officials and menials and remuneration paid to village officers—*tōtis*, *talawārs*, etc. The total amount spent under all heads in each of these three years comes approximately to 1,03,000, 2,90,000 and 3 lakhs of rupees respectively. Notwithstanding all this, the petty

khatedars poor officials and menials and cooly classes were put to much suffering on account of the prevailing high prices of food grains without a corresponding rise in wages

SECTION IV—ADMINISTRATIVE

This district is divided into 8 taluks and 2 sub taluks Divisions
The following statement gives details regarding area population number of villages, etc —

Name of the Taluk	Number of Hoblis	Area in Sq Miles	No. of villages	Population
1 Tumkur	7	454.00	407	123,204
2 Madhugiri	8	605.50	768	91,874

POLICE AND JAILS.

Police

For the purpose of Police administration, the district is placed under a District Superintendent of Police and is divided into 8 taluks, each in the charge of an Inspector and two sub-taluks, each under the charge of a Senior Sub-Inspector. Each Taluk is further divided into Ranges or investigating centres under the charge of a Jamadar or Sub-Inspector.

The Police force of the district consists of 92 officers including one District Superintendent Police, 13 Inspectors, 19 Sub-Inspectors, 4 Jamadars and 55 Daffadars, and 586 Constables. The cost of the force for the year 1922-23 was Rs 1,46,709. The rural Police as usual consists of the Patel, Tōtis and Talwars. There are established in addition 51 Ookads on the high road and in jungly tracts and these are manned by 87 Tōtis or Ookad watchmen.

Jails.

The following table shows particulars as regards the convicts admitted into Jails, Lock-ups during the year 1925:—

	Males	Females	Total
Convicts	168	12	180
Under Trial	246	12	258
Civil	.	.	.
Daily average No of each class—			
Convicts	4 61	37	4 98
Under Trial	16 90	72	17 62

EDUCATION

There were 1 370 schools in the District during 1923-24 with a strength of 44 115. Of these schools three were 3 High Schools for boys, 82 Middle Schools 1 111 Primary Schools, 7 Special Schools both for boys and girls and 167 Village Indigenous Schools. From the foregoing figures it will be seen that on an average there was one school for 2.9 square miles, 1.7 villages and 564 persons.

Number of
Schools and
scholars.

The following statement shows the numbers and the different grades of schools together with their strength —

Area	4 061 square miles.
Inhabited villages	2 371
Population	7,73 122
Males	3,94,897
Females	3,78,225

	No.	Boys	Girls
High Schools	3	710	1
Middle Schools	82	3,880	252
Primary Schools	1 111	28,978	7 061
Special Schools	7	425	2
Village Indigenous Schools	167	2,627	189
Total	1,370	36,620	7 496

No of square miles served by a school	2.9
No of Villages	1.7
No of Persons	564

Besides the Inspecting Officers, who had their head quarters at Mysore or Bangalore and inspected the Secondary and Special Schools of the district, there were one District Inspector for Middle Schools and five Assistant Inspectors solely for the Kannada Primary Schools of the district and one

Inspecting
Officers.

Assistant Inspector for Urdu Primary Schools A statement of Inspecting Officers is given below :—

Designation of the Inspecting Officer	Territorial Jurisdiction	Head-quarter	Kinds of schools under control
District Inspector, Tumkur.	Tumkur District	Tumkur Town	All Middle and Incomplete Middle Schools
Asst Inspector, Tumkur	Tumkur Taluk	Tumkur Town.	Primary Schools
„ Inspector, Madhugiri	Madhugiri and Pavagada Taluks	Madhugiri Town	do
„ Inspector, Sira	Sira and Korata-gere Taluks	Sira Town	do
„ Inspector, Gubbi	Gubbi and Kunigal Taluks	Gubbi Town	do
„ Inspector, Chiknayakanhalli	Chiknayakanhalli, Tiptur and Turuvekere	Chiknayakanhalli	do
Asst Inspector, Urdu Primary Boys' Schools, Tumkur.	Tumkur and Hassan.	Tumkur Town.	Urdu Primary Schools

MEDICAL.

Institutions

There were 14 institutions, including the District Hospital, Tumkur, working in the district during the year 1923-24. The Female Dispensary, Tumkur, is located in the buildings of the District Hospital, Tumkur, as per combined scheme. The Nonavinkere Dispensary, which was recently opened, is located in a rented building.

Staff

One Lady Apothecary, One Medical Graduate and fifteen Sub-Assistant Surgeons are working in this District under the District Medical Officer. There are fourteen Compounders, and one Relieving Compounder. There are 13 Midwives and one Relieving Midwife for the district. One Midwife,

sanctioned recently, is working at Halikunte Sira Taluk. There is no provision for a midwife to the Nonavinkere Dispensary. There are two Nurses attached to the District Hospital, Tumkur.

The total number of labour cases conducted during the year 1925 was 881. The total number of in-patients and out-patients treated during the year was 523 and 1,52,330 respectively.

Number of
patients
treated

The total cost incurred from the District Fund and Municipal Funds during 1925 was Rs. 12,117 and Rs. 2,535 respectively against Rs. 11,413 and Rs. 2,192 respectively in the previous year.

VACCINATION

The establishment for the purpose consists of 17 Vaccinators working under the supervision of the Chief Sanitary Inspectors. During the year 1925, 19,745 persons were vaccinated, of whom 10,765 were males and 8,979 females. The total expenditure incurred during 1925 on this account was Rs. 1,910.

SECTION V—GAZETTEER.

Agrahara—A village in Koratagere Taluk. Population 780. It has a small Virabhadra temple and some *lingamudre* stones without inscriptions. The latter are boundary stones marked with a *linga* to indicate that the land bounded by them was granted to a Siva temple or a Saiva institution. Similarly, stones marked with a *discus* indicate a grant to a Vishnu temple, while those marked with a *mullode* or triple umbrella a grant to a Jaina temple. The aromatic water plant *baje* (*Acorus calamus*) is largely cultivated in this village more than 50 acres of land being under this crop. The yield per acre is said to be from 150 to 250 maunds. The root sells at about Rs. 2-8 0 per maund and is exported to Bangalore.

Agrahara.

and other places. At this village, Patel Īsvarayya's manuscript library contains nearly one hundred palm-leaf manuscripts, several of which are unpublished Kannada and Sanskrit works bearing mostly on the Vīrasaiva religion and hagiology. There are also a few Kannada and Telugu poems, works treating of medicine and Kannada commentaries on Sanskrit works.

Alburu.

Alburu.—A village in the Nonavinakere Hobli, Tiptur Taluk. Population 797. This place has several inscriptional records which are all printed (*Tiptur* 42-49). Of these, two artistically executed *vīragals* deserve some notice. One of them near the Siva temple, *Tiptur* 44, dated 1395, is not only beautifully engraved but also beautifully sculptured with caparisoned horses, elephants, etc. The other in a field to the north-west, *Tiptur* 47, which is 7 feet high and may be assigned to the close of the 9th century, is adorned with sculptures in several panels, among which may be mentioned two elephants bearing the hero seated on a throne at the top.

Amritur

Amritur.—A village in Kunigal Taluk. Head-quarters of a hobli of that name. Population 2,182. The Chennakēśava temple at this place is a neat Dravidian building with well dressed sculptured pillars. The god, about 3½ feet high, is a good figure flanked by consorts. The central ceiling in the *navaranga* is carved with a lotus. The temple is in a ruinous condition. In front of the Sōmēśvara temple near the tank is a good but rather slender lamp-pillar about 30 feet high and 1½ feet square at the bottom. Behind the temple is an *uyyāle-kamba* about 20 feet high. The temple of Pattāladamma, the village goddess, situated at some distance from the village, has several painted stucco figures. Two of them, seated in the middle, represent the goddesses Pattāladamma and Lakshmi. They are about 5 feet high and are canopied by a seven-hooded serpent. The walls and the beams are painted with figures of the ten incarnations of Viṣṇu, scenes

representing the *lilas* or sports of Siva and so forth. The *jatre* or annual festival takes place in the month of *Vaisākha* (April-May). The *pūjāris* are Bektas or fishermen.

Arakankatto—A village in Turuvekere Sub Taluk. The Arakankatto Narasimha temple at this place has for the object of worship a pillar marked with a discus and a conch.

Aralaguppe—A village in Kibbanahalli hobli, Tiptur Aralaguppe taluk. Population 913.

The Chennakēśava temple at this place, about 4 miles from the Banasandra Railway Station, is a fine building in the Hoysala style, consisting of a *garbhagriha*, a *sukhanasi* and a *navaranga* to which is attached an entrance porch with verandas on both sides. The temple stands on a high terrace facing east and has at the sides of the entrance two empty pavilions on a lower level, the upper ones having disappeared. On both sides of the entrance runs around the entrance porch the usual *jagati* or called parapet. Judging from the palaeography of the labels giving the artist's name—fifteen of them mention the artist Honoja—the temple appears to have come into existence about the middle of the 13th century. Attached to the south wall and concealing its sculptures stands a temple of Narasimha which is evidently a later structure. The god known as Ugra (fierce) Narasimha is a seated figure about 3 feet high, killing the demon Hiranyakasipu.

The Kallesvara temple is an old Dravidian building facing east. The *navaranga* has a well-carved doorway with Gajalakshmi on the lintel and a row of dwarfs on the pediment, and a fine ceiling measuring 6 by 6 of *ashta-dikpālakas* supported by 4 good pillars, with an elegantly carved Tāṇḍavēśvara in the middle and 4 doubled up-hanging figures in the 4 directions, believed to be *śaktis* in difficult postures of penance. On the north and south walls are two fine pierced windows of scroll work. Behind the big Nandi in front is a shrine containing a figure, about 5 feet high, of Sūrya flanked by female archers. Opposite the north entrance is another shrine having a large figure about 6 feet high of Umāmahēśvara with a band above serving for *prabhā*, from which depend two Gandharvas. Opposite the Umāmahēśvara shrine stands outside a well-carved hut

mutilated figure, about 6 feet high, of Vishnu with his ten incarnations sculptured on the *prabha*. Close to the temple are several *linga* shrines in different directions. A *mantapa* in the village, known as Pālegār's *chāvadi*, is said to have been the *darbar* hall of a former chief.

Bechirakh
Rangapura.

Bechirakh Rangapura.—A village in Sira Taluk. Population 176. The Rangasvāmī temple at this place has a round stone (*udbhava-mūrti*) for the object of worship. In the *prākāra* are several small shrines containing figures with folded hands. In one of them is sculptured a couple seated with folded hands with an inscription on the side slab stating that the figures were consecrated by their son. Another slab just outside the *prākāra*, measuring 6 feet by 5 feet, represents Hanumān and Garuda as contesting the possession of a fruit which is split in the middle. There is a similar panel at Belur, but the object of dispute there is said to be a *linga*.

Bellavi

Bellavi.—A village in Tumkur Taluk 9 miles north-west of Tumkur and a Village Panchayet. Population in 1921 Males 933, Females 965, Total 1,898

The streets are wide with uniform shops on either side. A weekly fair is held here on Monday at which considerable trade is carried on.

Benakankere.

Benakankere.—A village in the Turuvekere Sub-Taluk. Population 1,098. In the Ānjanēya temple at this place, an inscription was found on both sides of the image of Ānjanēya. The image has been carved out of a thick inscribed stone of the Hoysala period, the front face being made into the image and the inscribed sides left as they were.

Bhangara-
nayakanab-
etta.

Bhangaranayakanabetta.—A hill in Pavagada Taluk. In the Kambadarāya shrine at this hill, the object of worship is a pillar, about 13 feet high, marked with a discus and a conch on the sides. The pillar has an iron lamp fixed on the top which is occasionally lighted by the villagers. No ladder

is to be used for this purpose. The villagers have to bathe and fast, and then, standing over the shoulders of one another without allowing their feet to come in contact with the pillar, they light the lamp. The hill near the village, which was once fortified, contains the ruins of several buildings.

Bhasmangi —A fortified hill in the Madbugiri Taluk 26 miles north of Tumkur close to the frontier. On the summit is the temple of Bhasmangēvara. The original fortifications are said to have been erected, by Budhi Basavappa Nayak of mind and stone. But when Haider Ali captured the place in 1768, he dismantled the old fort and erected a superior structure of stone and brick, with a *mahal* or palace. The hill has a perennial supply of water. Some Bedars live half way up, and cultivate the fields below. Bhasmangi.

Borankanve Lake —On the Siru Banavur Road 8 miles east of Hnliyer. It was constructed in 1896 at a cost of Rs. 2,81,003. It has an *achkut* of neres 1 163-0 and the assessment levied amounts to Rs. 5,035. The bund is 30 feet high and constructed across a gorge between two hills and is a magnificent structure, impounding 8682 aunts of water at Kōdi level. The waterspread is over 3,320 acres. Borankanve Lake.

Chennarayadurga.—A hill fortress in Koratagere Taluk situated midway between Koratagere and Madbugiri and rising to 3744 feet above the sea. Chennarayadurga.

This is a fine mass of rock beautifully fortified by the Madbugiri chief Chennappa-Gauda about the middle of the 17th century. In his family it remained for a long period when it was taken by the Mahrattas, and Rama Gauda at that time the chief took refuge in Madbugiri. In two years however, he retook it, but only to hold it for eight years longer. It was then captured by Komaraiya general of the Mysore Raja, and Dodda Arasu placed in charge. Its name was also changed to Prasannagiri. It was subsequently taken by Haider and after six years by the Mahrattas under

Mādhava Rao, and after a like period retaken by Tipu. At the entrance are inscriptions of the Mahrāṭṭa generals Sripant pradhan and Mādhava Rao Ballal pradhan. In the latter, dated in 1766, the hill is called Chandrāyadurga. It has two elevations. On the lower are situated the Chennigarāya and Īsvara temples, as also a fine semi-circular *done* with clear water. There are besides granaries and powder magazines. There are several gates leading to the higher elevation, which is also fortified with brick walls raised over stone walls. The ascent is very steep and there is no flight of steps. The village at the foot of the hill, with a population of 228, has also a few temples. A fine cave temple, rather large and neatly kept, is known as the *matha* of Murārisvāmi who is said to have been a great ascetic and is believed to have gone to heaven with his body. The object of worship here is a pair of sandals. The cave has also some *yōgamantapas* and cells. A *samādhi* or tomb near the cave is said to be that of Vaikunthappa, a disciple of Murāri. There is also lower down another *samādhi*, said to be of Annapūrnamma, a female disciple of Murāri, who was so named by her *guru*, because she fed a large number of people with a *seer* of rice.

Chiknayakan-
halli

Chiknayakanhalli.—A Taluk in the west. Area 435·94 square miles. Head-quarters at Chiknayakanhalli. Contains the following Hoblis, villages and population.—

Hobli	Villages	Hamlets	Villages classified				Popula- tion
			Govt	Sarva- manya	Jodi	Khayam- gutta	
Chiknayakanhalli	39	18	36		3		12,451
Huliyar	57	35	56	.	1	..	18,062
Handankere .	56	40	55		1		13,192
Kandikere	42	12	41	.	1	.	7,574
Settikere .	40	23	40	.	.	.	9,219
Total	234	128	228	.	6	..	60,498

Principal places with population —

Chiknayakanhalli 6 432 Huliya 1 985 Settikere 1 718
Kenkeri 1 689 Thimmenahalli 1 447, Kandikere 1 110 and
Yelanadu 938

The east of the Taluk is crossed by three parallel chains of low bare hills running north and south, the villages on both sides of which carry the storm water which runs into a feeder of Vēdavati in Sira Taluk. The Janchar range of hills contains deposits of manganese and red and white ochre. The lands in the valleys between these hills are fertile and contain many cocoa nut and areca nut gardens. A stream starting from the south of Settikere runs north to Huliya and one from Yelanadu runs north west of Budihal to the Vēdavati in Holalkere Taluk. From the humidity of the fogs which form on the range of hills the crops are often preserved from failure in the dry season. The principal export trade is confined to cocoa nut and areca nut.

The Revenue Settlement was introduced in 1879 and Resurvey Settlement was introduced for 126 villages in the year 1905-06 72 villages in the year 1920 and 30 villages during the year 1920-21.

The total Revenue Demand for the year 1922-23 was Rs. 1 82,018-3 10 and for the year 1923-24 was Rs. 1,82,924 14 11.

The average rainfall at Chiknayakanhalli for 28 years (1897 to 1924) and at the other places for three years (1922 to 1924 up to December) was as follows —

Rain gauge Station	Month						
	Jan.	Feb.	Mar.	April	May	June	July
1	2	3	4	5	6	7	8
Chiknayakanhalli	08	19	39	1 32	2 44	2 45	2 78
Huliya	07		25	1 86	3 25	1 35	2 65

Mathigatta ..	1.9	2 58	3 92	3 26	04	21.47

From Banasandra Railway station there is a road north to Chiknayakanhalli and Huliyar, from which place roads radiate eastwards to Sira, north to Hiriyur, north-west to Hosadurga and to Banaver, west and south-west to Honnavally and the Konehalli Railway station

Chiknayakan-
halli

Chiknayakanhalli.—A town situated in 13° 25' N. Lat, 76° 4' E Long, west-north-west of Tumkur, on the Turvekere-Huliyar road, 8 miles north of the Bangalore-Shimoga road, and 11 miles north of the Banasandra Railway station Headquarters of the Taluk of the same name and a Municipality.

Population in 1921	Males	Females	Total
Hindus including Jains .	2,905	2,828	5,733
Muhammadans .	359	319	678
Christians	12	9	21
Total .	3,276	3,156	6,432

Chiknayakanhalli derives its name from Chikka-nayaka one of the Chiefs of the Hāgalvādī house. The town was plundered

and the fort was destroyed by the Mahrattas under Parasu Rām Bhoṣe when marching to join the army of Lord Cornwallis before Seringapatam. The residents, it is said, foreseeing the treatment the town would receive, had hidden their most valuable effects and retired to the neighbouring hills. But they were not destined thus to escape. For when the Mahratta army returned to Srīra the wealthy inhabitants were enticed to return by assurances of protection and by a daily distribution of charity to Brahmans. The leading men were then seized and forced by torture to disclose where their treasures were hid. Plunder to the value of Rs. 5,00,000 thus fell into the hands of the Mahrattas.

The town is a prosperous one surrounded on all sides by plantations of cocoa nut and areca palms. Their produce together with the coarse cotton cloths white and coloured and kambhis manufactured in the place are largely sold at the weekly fair. Many of the inhabitants act as carriers to the merchants of Bangalore, Kadur and Hassan. Seven of the temples are endowed with land or money, the principal being one dedicated to Ānjanēya. The town is dependent on the tank for fresh water and wells in the Musafirkhana and near Thathayyana Gūri (the tomb of a Muhammadan Saint).

The Venkaturamana temple at this place is the largest and finest of the Dravidian structures in the town. It stands on a raised terrace like Hoysala buildings and is enclosed by a large *prākāra* of which only the plinth is now left. The pillars of the *nataranga* are sculptured on all sides, some of the sculptures being ingenious combinations of animals such as an elephant and bull with one head and so on. One of the pillars shows a chief seated on a throne holding a lotus in the right hand, the panel above having the figure of a seated *śaṅkṛā* holding the triple staff (*triṇḍa*). On two pillars of the porch facing each other are sculptured figures of Rāma and Lakshmana. The town has two Ānjanēya temples—the Huleyur Ānjanēya and the Brahmapuri Ānjanēya the latter so called because it is situated in the Brahman street. The former is a big temple richly endowed and visited by a large number of devotees. The

Rāmēśvara temple is also a large Dravidian structure said to have been built by a Hāgalvādi chief. The *sukhanasi* entrance has a figure of Ganapati to the right and Bhairava to the left. The left pillar in front of this entrance has a well carved seated figure, about $1\frac{1}{2}$ feet high, in the attitude of meditation, wearing a snake-ear-ring. Judging from the ornaments on the feet, hands and neck, it does not look like a *rishi*. The opposite pillar has a standing male figure, about $2\frac{1}{2}$ feet high, with folded hands, which is supposed to represent the chief who built the temple. There is also a similar figure on one of the pillars of the porch. Other sculptures worthy of notice are Vyāghrapāda worshipping a *linga* and the hunter Kannappa piercing his eye with an arrow and kicking a *linga*. The Rudrēśvara temple has a figure of Vīrabhadra flanked by Bhadrakālī and Daksha with a modern inscription on the brass-plate of the pedestal. The Kēsava temple bears an inscription stating that it was built to commemorate the installation of the Mysore king Chāmarājēndra-Wodeyar in 1881. The Kannappa shrine has an old wooden doorway elegantly carved with human and animal figures. To its left is a *linga* cell on the back wall of which is carved a figure of Kannappa armed with a bow worshipping a *linga*. The village goddess (*grāma-dēvate*), Hīrimavarada Yallamma, is a wooden figure, also known as Rēnukadēvi with a stone head set up in front. The processional image is a wooden figure of Parasurāma, son of Rēnuka. To the right of Yallamma is a seated stone figure, about 1 foot high, of Jāmadagni, husband of Rēnuka with two hands, the right in the *abhaya* pose and the left placed on the thigh. Outside the temple are two small shrines containing round stones said to represent Mātangi and her son Pātappa. It is stated that once a year a member of a certain family in the town is made to sit on a diagram drawn in front of Pātappa and that soon after, possessed by the goddess, he runs unconsciously to the particular house where the victim kid is kept, brings it to the temple and tears it to pieces with his teeth.

Municipal Funds	1920-21	1921-22	1923-24	1923-24
	Rs	Rs	Rs	Rs
Income	6,567	8,398	7,290	6,740
Expenditure	6,542	7,460	7,068	8,142

Dabbegatta —A village in Chiknayakanahalli Taluk Dabbegatta
Population 477

The Mahalingēśvara temple at this place, a brick structure of the 13th century, has three cells with *lingas*. In one of the two inscriptions discovered near it, the *lingas* are named Hoyasālēśvara, Brāhmēśvara and Machēśvara. The Marulasiddhēśvara temple has a panel carved with two standing male figures about 1½ feet high wearing long coats with an intervening head. The figure to the left is Marulasiddha, that to the right Rēvansiddha, and the head Allama. All the three were Virasaiva teachers of about the time of Basava. The processional god is a bull which is taken out in a car once a year. The temple has a Bilvavriksha vāhana that is a vehicle in the shape of a *bilva* or Bael tree. There are also in the village a number of *samādhis* or tombs of bulls dedicated to temples.

Devarayadurga —A fortified hill 9 miles east of Tumkur situated amidst wild and picturesque scenery and extensive forest. It consists of three distinct terraces or elevations and is well supplied with springs. Near the summit which is 3 940 feet above the level of the sea is a small temple, connected with the principal one on the lower level, dedicated to Durga Narasimha. On the intermediate terrace are three European houses forming a retreat for the hot weather. The fortifications are carried round the three elevations and must in former days have been of considerable strength. Devaraya-
durga.

Tradition relates that a robber chief named Andhaka or Langaka had his stronghold here and that he was subdued by Sumati a prince whose father Hēmaçhandra was king of Karnāṭa and ruled in Yndrapatna. On thus accomplishing the enterprise on which he had been sent, Sumati is related to have established the city of Bhūmandana near the present Nelamangala (Bangalore District) and taken up his residence there for the protection of that part of his father's kingdom.

Under the Hoyasalas there seems to have been on the hill a town called Ānebiddasari or Ānebiddajari which long gave its name to the surrounding district, especially the country to

the west and south. The name means "the steep where the elephant fell," and the incident out of which it arose appears to have happened at a spot on the hill now known as Ānegondi, or the elephant pit, below the peak called Karigiri, or the elephant hill. A rogue elephant, which the *Sthala Purāna* describes as a *Gandharva* who had assumed that form, suddenly appeared before the town, to the great consternation of the people, and after doing considerable mischief to the tank there, madly tried to walk up the steep rock on the west, when he slipped, fell back, and was killed. The hill is accordingly called Karigiri in the *Purāna*. Under the Vijayanagar kings, the use of the same name continued, and a large tank named Bukkasamudra, after one of the earliest of them, was formed by throwing an embankment across the gorge from which the Jayamangali river has its source. Remains of the embankment and of the adjacent town can still be traced.

The fortifications are pierced through by seven gates. On the lowest elevation are situated the village Malapattana and the Lakshminarasimha temple. The latter is a Dravidian structure facing east and is said to have been built by Kanthirava-Narasa-Rāja I. From the inscriptions *Tumkur* 41 and 42, we learn that the enclosure and tower were repaired in 1858 by the Mysore king Krishna-Rāja-Wodeyar III. An annual *jātra* or great festival takes place in the month of *Chaitra* (April) at which thousands of people collect together, and there are many cells and *mantapas* built for accommodating them. The temple has jewellery and other property of the value of Rs. 10,000. It has also large vessels presented by the *svāmis* of the Vyāsārāya and Kundaur *mathas*. It enjoys an annual grant of Rs. 848. There is also another temple, said to be older than the Lakshminarasimha, dedicated to Hanumān, also known as Sanjīvarāya, who stands with folded hands. On the wall of what is known as the Penugonda Gate is sculptured a figure holding a *vīna* or lute in the right hand with a label (*Tumkur* 40) in characters of about the 15th century stating that the figure represents the musician Virūpanna, son of Sukumāradēva. Near Āne-done or the Elephant-spring are seen the remains of the tomb of an elephant, said to have been built by a former chief. The place was originally known as Ānebiddasari or "the precipice where the elephant fell," then as Jadakanadurga, after a chief named

Jadaka and finally at Devarāyadurga after its capture in 1696 by the Mysore king Chikka Dēva Rāja Wodeyar. He erected the existing fortifications. On the slope of the hill is a pond which is said to be the source of the stream Mangali. Higher up is a small spring named Jaya tirtha which represents the source of another stream Jaya. Both the streams unite at Irukasandra at the foot of the hill and form the Javamangali. A small shrine in the jungle has a seated figure about 1 foot high of Rāmānjācharya locally known as Kannappadevaru or Kuntēmanedēvaru which is the tutelary deity of the Nāyaka makkala or hunters. On the intermediate elevation are situated the Government Travellers Bungalow and another bungalow owned by the Missionaries. Here are a well and two *domes* or springs, the latter known as Rāma tirtha and Dhanna tirtha. Near at hand is a large cave with figures of Rāma Sita and Lakshmana. There are also remains of dwelling houses and offices which once stood here. On the third elevation stands facing east a temple of Lakshminarayana known as the Kumbhi (summit) Narasimha temple which consists of a *garbhagriha* a *sulhanosi* a *nataranga* a *mukha mantapa* and a porch and is similar in plan to the temple below. Near the temple is a large *dome* to the south of which is a narrow cave with a flight of steps leading to a reservoir at the bottom known as Pāda tirtha, which is said to issue from the foot of the god. Higher up above the temple is a small shrine of Garuda near which is a big boulder known as Divagegunda (or the lamp boulder) on which an iron lamp with a long shaft is fixed. This lamp lighted occasionally by devotees in fulfilment of vows is said to be visible to Bangalore and other distant places. In the rampart on the hill a hole is pointed out as having been caused by a gun shot from the opposite hill known as Parangi betta.

At some distance from Devarāyadurga is situated, by the side of the Tumkur road the Forest Lodge near which is a tiny spring of pellucid water known as Nāmadu tirtha which issues from the living rock and fills and overflows a mortar cut in the rock.

Dodda-Bidaro—A village in Chiknayakanhalli Taluk. Dodda-Bidara.
Population 385

The Isvara temple at this place has in the *nataranga* several figures such as Sarasvati, Mahishasuramardini, Umamahēvara,

etc., among which a two-armed Durga with a sword in the right hand and a cup in the left and a fine Nāga stone deserve notice. The Pâte-linga temple has for objects of worship 101 small stones of irregular shape placed on the ground, known as Nūrondu (101) linga. In front of it is an open *mantapa* containing a rough stone called Pâte (for Pātāla) linga. In the porch of the Ānjanēya temple at Chikka-Bidare are set up against the wall figures of Ganapati, Bhairava and Vishnu and two fine Nāga stones, which apparently belonged to some Śiva temple.

Dodda-
Dalavatta

Dodda-Dalavatta.—A village in Madhugiri Taluk
Population 415.

The Lakshmīnarasimha temple at this place is one of the largest Dravidian structures with an extensive *prākāra*, measuring 125 yards by 70 yards, and a lofty *mahādvāra* surmounted by a *gōpura*. To the right in the *prākāra* is a *satra* or choultry for accommodating and feeding pilgrims during the car-festival which takes place on a grand scale in the month of *Āshāḍha* (July). Bullock carts can go inside the *mahādvāra* and stand in the enclosure. There is a fine pond near the outer gate. The god, said to be *udbhava-mūrti*, is a small round stone standing a few inches above the ground level and adorned with a crown. In the open *nararanga* of the Īsvara temple to the north, is kept a well carved Gajalakshmi panel, which evidently belongs to some other temple.

Dore Gudda

Dore-Gudda.—A hill in the Gubbi Taluk, of which there is a tradition that, owing to extensive excavations for the extraction of iron ore, it fell in, burying the miners of seven villages with all their cattle. It is still one of the principal sources whence the ore is obtained.

Dumman-
halli

Dummanhalli.—A village in the Turuvekere Sub-Taluk. Population 194.

It appears to be an ancient village. It was, according to tradition, the capital of a chief known as Dummi Wodeyar.

Gold coins are said to be occasionally picked up in a field to the west of the village. Among the ancient lithic records recently copied here by the Archaeological Department is a *ciragat* of the Ganga period.

Edoyur —A village in Kunigal Taluk. Population 511. Edoyur

The Siddhalingēsvara temple at this place, facing north is a pretty large Dravidian building containing the *gaddige* or tomb of Tōntada-Siddhalinga, a great Viśṇuśaiva teacher and author who flourished at the close of the 15th century. He was one of the *stāmis* of the Muruga *matha* and had a large number of disciples of whom several have written Kannada works bearing on the Viśṇuśaiva creed, his own being *Shatshalaṅkāśānāmasūramṛta*.

In the veranda to the right of the *maḥādṛāra* of the temple is the inscription E O XII Kunigal 49 which gives an account of the spiritual greatness of the teacher and records the construction of a *matha* the temple itself by Chennavirappa wodeyar of Danuvasa. To the right of the inscription stands a slab about 6 feet high carved at the top with a figure of Siddhalinga, a seated image with a *linga* in the left hand, the right hand being raised in the mode of offering worship and below with a standing couple with folded hands evidently representing Chennavirappa wodeyar and his wife Parvatamma mentioned in the inscription as the donors of the *matha*. The ceiling of the *maḥādṛāra* is decorated with paintings of the *aṣṭa-dīpalakas* or regents of the eight directions. In the east of the enclosure is an underground cell containing a figure of Rudrēsvara or Virabhadra which is said to have been there before the foundation of the *matha*. The ceilings of the *mukha mantapa* and the *patalankana* or hall on a lower level have painted on them scenes from the life of Siddhalinga and the *pañcaviṃśatī* or twenty five *līlas* or sports of Śiva with labels in Kannada in the form of explanatory notes. On the *gaddige* is a lump of *vibhūti* or sacred ashes in the shape of a *linga* covered by a silver *kolaga* or mask, above which is kept the processional image, a metallic figure of Siddhalinga, resembling the stone figure at the *maḥādṛāra*. The temple has a Rudrakṣa *mantapa* and several other *vāhanas* or vehicles and judging from the gold and silver jewels and vessels, seems to be a rich one. The inscriptions on the

bells are of some interest as they tell us that they were presents from a Muhammadan Amildar during Tipu's rule. One of them, however, tells us besides that the bell bearing it was presented by Minākshamma, wife of Dalavāyi Basavarāja-arasu, and there is a story that the bells were thrown into a well during a Muhammadan incursion and that they were subsequently restored to the temple by the Muhammadan Amildar with inscriptions newly engraved on them. The temple owns a good car with six stone wheels, the car festival taking place on the seventh lunar day of the bright fortnight of *Chaitra* (April).

There is also in the village an *uyyāle-kamba* about 20 feet high. Close to the temple is a *Lingāyat matha*, affiliated to the Balehalli *matha*, in which the Balehalli svāmi is said to take up his residence for a few months every year. Another *Lingāyat matha* at some distance is known as *Chitra-matha* because its veranda was once adorned with paintings. In front of this is a beautiful well built with well-dressed vertical slabs all round and adorned with a well-carved stone parapet.

There is also a *Varadarāja* temple here which is in a dilapidated condition.

Kaggere is the place where Siddhalinga is said to have been absorbed in the practice of *yōga* or meditation, so much so that ant-hills grew around him. There is a temple outside the village said to have been built over the spot where he practised *yōga* the place having once been a garden, which accounts for the word *Tōntada* (of the garden) prefixed to his name. In the *garbhagriha* is an embankment, known as *yōga-pītha*, on which is kept a small *linga* covered with a mask. The processional image, resembling that at Edeyur, is kept in a shrine at the village. In the *navaranga* is kept a good *Rudrākshi-mantapa*, said to have been presented by a lady of Coorg. In a niche over the roof of the veranda is a stucco figure, seated in the midst of ant-hills, of Siddhalinga, similar to the stone figure at Edeyur. The car festival takes place on the seventh lunar day of the bright fortnight of *Phālguna* (March).

Elanadu.

Elanadu.—A village in Chiknayakanhalli Taluk. Population 938.

The Siddharāmēsvara temple at this place is a large Dravidian building with two *mahādvāras* on the east and south. The ceiling of the south porch were once painted with

figures, most of which have now gone. The Virasaiva teacher Siddharama is said to have performed penance here. The god worshipped in the temple is an ant-hill which is decorated and given the appearance of a *linga*. The processional god is also a silver *linga*. The temple appears to be a rich one judging from the silver plated doors, doorways and palankeens and silver staves, *chauris*, vessels and other paraphernalia. It has also a fine Bilavriksha vahana in the shape of a car, adorned with painted images etc. The car mantapa surmounted by a tower is a neat structure with a flight of steps. The village has also a *Langayat matha* which is a branch of the *matha* at Godekere in the same taluk.

Elusuttinakote—A village in Madhugiri Taluk. According to tradition the Pandavas lived here for some time in a fort of seven walls built by them, and the inscription names them along with Abhimanyu. Elusuttinakote

Garudachala—A stream which rises on the frontier of the District south-east of the Dēvarāyadurga group of hills and flowing north into Koratigero, unites with the Jayamangali near Holavanahalli or Korampur. Garudachala.

Gonitumkur—A village in the Turuvekere Sub-Taluk. Population 545. Gonitumkur

This has a small Javara temple in the Hoysala style, consisting of a *garbhagriha*, an open *sulhanasi* and a *navaranga*. The two former have each a ceiling with a lotus bud, the latter having nine ceilings of the same kind. In the *navaranga* are kept figures of Ganapati and Sarasvati and a good Nāga stone. The outer walls have only pilasters. There is a stone tower over the *garbhagriha*. The village has three fragments of the Hoysala period which are completely worn, only a few letters here and there being legible.

Gubbi—A taluk in the middle. Area 552.27 sq miles. Gubbi.

Head-quarters at Gubbi. Contains the following hoblis, villages and population.—

Hoblis	Villages	Population
1 Chittanahalli . . .	51	14,967
2 Gubbi . . .	52	20,232
3 Chelur . . .	62	13,503
4 Hagalvadi . . .	54	8,289
5 Nittur . . .	80	15,712
6 Kadaba . . .	63	17,146
7 Dandināsivara . . .	61	13,092
Total . . .	423	1,02,941

Principal places with population.—

Chittanahalli 1,291. Gubbi 5,244, Chelur 1,426, Bidare 1,276, Hagalvadi 1,622; Nittur 1,182; Muganayakankote 1,321, Kadaba 1,621, Kallur 1,737; Kondajji 1,033, Dandināsivara 1,228.

The taluk till 1886 was called Kadaba. It is watered by the Shimsha, which flows through the middle from north to south, past Gubbi and Kadaba, where it forms a very large tank. At Kallur it is joined by the Nāga from the west, and continues south. On the north-west of the taluk are the chains of bare hills separating Hagalvadi from Chiknāyakanhalli, which belong to the auriferous tract. The remainder of the taluk is generally an open country and well watered. The soil is mostly a red mould, shallow and gravelly.

The revenue settlement was introduced in 1882 and the revision settlement into 93 villages in 1910-11.

The railway from Bangalore to Poona crosses the taluk from east to west, somewhat south of the middle, with stations at Gubbi, Nittur, and Yelladbagi. The Bangalore-Shimoga trunk road runs nearly alongside the railway, and at Nittur is crossed by a road running north to Sira, and south by Nelligere to Seringapatam. There is also a road from Gubbi south-east to Hebbur, and one from Hagalvadi, running east

through Chelur and Bellary to Tumkur. There is also a road connecting Hagahalli with the road to Hulivar.

Gubbi—An important trading place situated in 12° 19' N lat., 77° E. long., 13 miles west of Tumkur, on the Bangalore-Poona railway and the Bangalore-Shimoga road. Head quarters of the Gubbi taluk and a municipality. Gubbi

Population in 1911	Males	Females	Total
Hindus	2,257	2,705	4,962
Muhamedans	270	274	544
Christians	41	33	74
Jains	35	48	103
Total	2,703	3,060	5,763

It is the *entrepôt* for the areca nut trade between the Nagar Malnad and Wallajapet in the North Arcot District as well as for the *wolagra* or internal trade of the neighbourhood. It is said to have been founded over 400 years ago by the Gauda of Honahalli, two miles distant and called Amara gondapura. He claimed to be a descendant of Honnappa Gauda, hereditary chief of the Nonaba Vokkaligas, who lived 700 years ago and owned a district yielding a revenue of 3,000 *pagodas*. The family were first made tributary by the Mysore Rajas, to whom they paid 500 *pagodas* a year. Haidar increased the tribute to 2,500 leaving them little better than renters and Tipu dispossessed them altogether. They are now in the position of ordinary cultivators, but their rank is acknowledged in their own caste.

Gubbi formerly suffered much from the party spirit of the contending sects of Kōmatas and Banjagas or langavata, and was at one time in imminent danger of abandonment from this cause. During the administration of Purnaiya the erection of a temple by the Kōmatas to a virgin who had cast herself into the flames to avoid dishonour excited the previous animosity of the opposite party to such a degree

that the town was ordered to be divided by a wall in order to separate the quarters of the two factions. An Amildar was at length chosen from the party which appeared least in the wrong, and with the help of the Brāhmans and peaceably disposed inhabitants, order was gradually restored, although the extreme measure of slaughtering an ass in the main street was threatened, which would have compelled all Hindus to abandon the town.

At Gubbī is one of the chief annual fairs in the country frequented by merchants from great distances. The neighbourhood produces coarse cotton cloths, both white and coloured, blankets, sack-cloth, areca-nut of the kind called *volagra* (or neighbouring), cocoa-nuts, jaggory, tamarind, capsicum, wheat, rice, ragī, and other grains, lac, steel, and iron, all of which here find a ready sale or exchange, as the imports are large, and it is an intermediate mart for all goods passing through the peninsula in almost every direction.

Of the coarse cloths made in the vicinity by the Devangas, Togatas and Holeyas, 100 pieces on the average are sold at each fair, representing an annual value of about 15,000 rupees. There are, however, many other fairs in the surrounding country where these products are also sold to a considerable extent.

Gubbī is, according to tradition, Amaragundakshētra, the holy place where Amaragunda Mallikārjuna, a Vīrasaiva teacher who was a contemporary of Basava, is supposed to have lived for some time and died. It is stated that two *gubbachchis* or sparrows, which used to listen to him when expounding the *Purānas*, fell dead on the day that the exposition was concluded. Thenceforward the place acquired the name Gubbī, which has been Sanskritised into Chatakā-puri.

The oldest temple in the town is the Gadde Mallēsvara, so called because it was once situated in a *gadde* or wet field outside the village. Owing, however, to the subsequent extension of the village, the temple now stands within the village itself. It has three cells in the *navaranga* enshrining Dakshināmūrti,

Pārvati and Virabhadra. There are also two niches containing Ganapati and Smbrahmanva. Leaning against the south wall near the Dakṣiṇāmūrti cell are some curious figures, namely a rude male figure armed with a bow and an arrow said to represent a Saiva devotee named Ohla vulgarly called Vailappa who used to offer every day his own weight of *guggala* or bdellium to Siva a well carved seated female figure, about one foot high with some indistinct things in the two hands and two male figures, about one foot high standing endo by side with what looks a vessel between the hands placed one over the other two sticks or spears standing between them. A cell in the north of the *navaranga* has a *linga* called Rāmalingasvara said to have been set up by Rāma on his return from Lanka. To the left of the entrance to this cell is a small Basava or bull seated on the top of a short pillar known as Gubbabchihakkibasava which is said to have been set up to mark the spot where, as stated above, the two *gubbachhis* fell dead at the conclusion of Amaraḡunda Mallikārjuna's exposition of the *Puranas*. Gubbi was a place of great literary activity in the 15th and 16th centuries. Several Kannada works bearing on the Virasaiva cult were written during this period. Mallanna the author of the *Ganabhashyaratna* *māle* and other works, who flourished at the close of the 15th century was a native of Gubbi and a lineal descendant of Amaraḡunda Mallikārjuna. His grandson Gubbi Mallanārya, wrote the poems *Bhāvachintāratna* and *Vīrasaivāmṛita purāṇa* in 1513 and 1530 respectively. Prabbinga a disciple of Mallanārya wrote in about 1520 the *Chudanasthāna* and the *Vaidhāgraya sthāna* and Cherama another disciple of his, composed the *Cheramāṅka-charita* in 1526. Mallanārya's son Santa wrote the *Siddhēsvara-purāṇa* in 1561. Enquiries have been made as to the existence of any tradition with regard to the locality where Mallanna and his descendants lived but no information has been forthcoming.

The Vailappa (for Ohilappa) temple has a standing figure about 2 feet high, of the Saiva devotee Ohla holding a censer in the right hand and a bell in the left. Tradition has it that the tongue of his bell having fallen here the devotee took up his residence at Gubbi. The Gubblyappa temple is a large structure containing the *gaddige* or tomb of Gubblyappa or Chenna basavayya a Virasaiva teacher who lived during the rule of Mummaḡi Hounappa-Ganda the Paleḡār of Hosaball. The *gaddige* has a *linga* and above it a seated metallo figure, above

1½ feet high, holding a *linga* in the left hand, the right hand being raised over it in the mode of offering worship. This represents Chennabasavayya and is the processional image of the temple. The ceilings of the *mukha-mantapa* or front hall have paintings representing Siva's twenty-five *līlas* or sports. To the left of the temple is a large *kalyāṇi* or pond built, according to the inscription on the pediment of its doorway, by one Adavi-svāmi in 1896. The pond has niches on the surrounding wall intended for enshrining the 63 devotees of Siva, but owing to the death of Adavi-svāmi the work has been left unfinished. An annual festival on a large scale takes place in honour of Gubbiyappa. The Janārdana temple has a four-armed figure, about four feet high, of the god bearing in the upper hands a discus and a conch and in the lower left a mace, the lower right which is in the *abhaya* attitude holding a tiny lotus. In a cell to the right in the *navaranga* is kept a standing metallic figure, said to be Kanyakāparamēsvarī, holding a lotus in one of the hands like a *nāchchryār* or consort of Viṣṇu. The Bēterāya temple enshrines a figure, about 2½ feet high, of Viṣṇu, holding in the upper hands a discus and a conch, in the lower right an arrow and in the lower left a bow. Being represented as a hunter with the attributes, the bow and the arrow, the god has the word *bēte* (hunting) in his name. An old inscription of the Ganga period is to be seen at the first sluice of the Gubbi tank. A *sannad* issued by Pūrnaiya in 1801 to the Khāji of Gubbi is of some interest.

Municipal Funds	1919-20	1920-21	1921-22	1922-23	1923-24
Income	10,474	6,469	7,468	5,626	5,530
Expenditure	6,380	6,240	11,229	9,488	6,293

Gundalhalli

Gundalhalli.—A village in Pavugada Taluk. Population 864.

The top slab of the fine sluice of Doddakere at this place has a discus and a conch made of black stone fixed at the sides. On a rough boulder on the bund of the tank are engraved the inscriptions *E C XII Pavagada 11-13*. The date assigned of these records in the Tumkur volume of the *Epigraphia Carnatica*, viz., *Circa 1530*, is evidently a mistake, seeing that the characters are unquestionably of the 8th century as

evidenced by the square form of *ba* used in them. The cyclic year *Jaya* given in one of the records most probably corresponds to A.D. 754. The tank is named Akale-samudra after a lady Akaleṭi who built it. It is thus one of the oldest tanks in the State, though Panamankere at Talagunda Shikarpur Taluk is older still by about two centuries. In the *prākāra* of the Īsvara temple, on the bund of Chikkakere at the same village, stands a stone about 9 feet high with several curves in the form of a snake, and the villagers firmly believe that there is treasure below it. No such stone has been met with elsewhere. At the Ramadēva shrine which is a large cave containing some small stones dnbbed with white earth and red ochre two epigraphic records have been recently discovered. The Ānjanēya temple has a very large figure, about ten feet high, of the god.

Hagalvadi—A village in the Gubbī Taluk 25 miles Hāgalvādi, north-east of the kasba. Population 1022.

Langayats and Kurubas are the prevailing classes in the place. The chief produce of the neighbourhood is areca nut, and inferior *kumbis* are manufactured. It was the original possession of the line of chiefs named from it, who built Chiknāyakanhalli and owned all the west of the District. These chiefs are mentioned in *Chiknāyakanhalli* 38 dated in 1669 A.D. They received their estate from the Vijaya nagar king Venkatapati Rāya. The succession mentioned is Suli Nayaka his son Sangappa his son Chenna Basavappa and his son Badu Timmappa Nayaka. When subdued by the Mysore Raja these chiefs gave up the rest of their territory in order to retain Hagalvadi free of tribute. Haider Ali subsequently compelled them to pay for this also and his son dispossessed them altogether.

Hale Itakalota—A village in Madhugiri Taluk Hale-
Itakalota
Population 200

The god in the Ānjanēya temple at this place is a good figure with a small monkey shown to the left as eating

something To the left of the temple is a stone sculptured with a female figure seated with the right hand seizing on what looks like a pole fastened with ropes. The figure is said to represent Dombara-Chinni (or Chinni of the sect of Dombas or tumblers) who fell from the pole and died. It appears that even now when Dombas visit the village, they do not as usual fix a pole but perform on the ground after praying to the image.

Hanchihalli

Hanchihalli—A village in Koratagere Sub-Taluk
Population 475

This village has a ruined fort, as also the hill near it known as Urugutte. At some distance to the north of the village is a *māstikal* showing an arm and hand projecting from an upright post, with figures of the couple sculptured below. The villagers believe that the stone represents Vyāsa^{nā}-tōlu (or Vyāsa's arm). When only one hand projects from the post, the stone is known as Okkaimāsti, when two hands project, it is known as Ikkai-māsti, the number of hands representing the number of wives who became *satis*.

Hebbur

Hebbur.—A large village in the Tumkur taluk, 15 miles south of Tumkur, on the road to Kunigal. Population, 2,021.

The place is said to have been founded by two brothers named Hale Gauda and Timme Gauda. It was at first called Heb-huli (great or royal tiger), from the circumstance that a bullock attacked by a tiger had driven it off and pursued it, with the other cattle and their owners, until it was killed. The courage of the cattle was attributed to the peculiar virtue of the spot, pointing it out as suitable for the construction of a fort. Accordingly, the carcass of the tiger being burnt, the limits of the fort were marked out with its ashes, and the erection was completed with the countenance of the Vijayanagar king. The name was subsequently changed from Heb-huli to Hebbur, the great town, and Katti Kāmanṇa was appointed as the king's agent, Hale Gauda and Timme Gauda being made patels of Hebbur, Kallesapura and

Ramanahalli. The agent, however, instead of supplying his patron's exchequer, spent the public money in erecting temples forming tanks etc. For his insolence on being summoned to court to account for his proceedings he was condemned to have both his eyes put out and to be expelled from the royal territories. A descendant of the Gaudas was next placed in charge but after Vijayanagar was taken by the Muhammadans, Kempe Gauda of Nagadi captured Hebbur and held it for many years. It was then taken by the Chiknayskanhalli chief and from him by Chikka Dēvo Rājo of Mysore. A quarter of a century later it again changed hands falling a prey to the Mughal army but in course of time was regained by the Mysore Rajas. For two years before the usurpation of Haider Ali, again, it was in the hands of the Mahrattas. The place has thus seen many vicissitudes.

Heggere.—A village in Tiptur taluk. Population 410. Heggere
About seven miles from Hulivar

At this place, there are buildings in the Hoysala style—three Siva temples and a *basti*. Of the former, situated near one another and in a dilapidated condition the middle one known as the Kalleavara is the largest consisting of a *garbhagriha*, a *sukhanasi* and a *nararanga* the other two situated to its right and left, having only a *garbhagriha* and a *sukhanasi*. It faces south though the *linga* in it faces east, the east wall having a perforated window opposite to it. The *sukhanasi* doorway has perforated screens at the sides and Gajalakshmi on the lintel. The *nararanga* has only one ceiling about two feet deep in the centre which has a lotus band with three concentric rows of painted petals. The *garbhagriha* and *sukhanasi* have also similar ceilings. It is worthy of note that the paint is not gone though the temple goes back to at least 1232 A.D. (*Chikndyakano kalli*: 27) if not to an earlier period. The *nararanga* has a good figure of Sarasvati and a few fine Nāga stones besides two pedestals, one of Vishnu and the other probably of Mahisha suramardini. An inscription is to be seen on the figure of Sarasvati. The temple to the left known as the Galagēvara is the most ornate of the three. The *sukhanasi* has an exquisitely carved doorway with beautiful perforated screens at the sides.

the lintel having a well carved Gajalakshmi in the middle and lions pouncing upon elephants at the ends. The pediment has rows of minutely carved figures illustrating scenes from the *Rāmāyana*, while every square of the screens has tiny figures representing the ten incarnations of Vishnu, the regents of the eight directions and so forth. The *sukhanasi* ceiling, again, shows excellent workmanship. It is about two feet deep and has in the middle panel Tāndavēsvara flanked by Ganapati and Subrahmanya, in the upper, Pārvatī flanked by Sarasvatī and Lakshmi, and in the lower, Nandi flanked by Brahma and Vishnu. All the figures are represented as dancing. In the interstices in the eight directions, eight snake hoods are shown. The *garbhagriha* ceiling has a lotus bud. The temple to the right has a tower over the *garbhagriha* resembling those of the Lakshmidēvi temple at Dodda-Gaddavalli. The *garbhagriha* and *sukhanasi* have domed ceilings, about two feet deep, with lotus buds. The *lingas* have been displaced in all the three temples. These buildings have been under orders of Government conserved. The roofs have been made water-tight, the walls repaired and new doors set up. The Pārasvanātha-basti, built of black stone, is a fine specimen of Hoysala architecture, consisting of a *garbhagriha*, a *sukhanasi* and a *navaranga*. It is an elegant structure possessing considerable architectural merit, being perhaps the only *basti* of its kind in the State. The *sukhanasi* entrance has perforated screens at the sides, its pediment too being a perforated screen. The *navaranga* is supported by four good black stone pillars and its central ceiling, about two feet deep, has a lotus bud, and is similar to those of the *garbhagriha* and *sukhanasi*, the other ceilings being square and flat, adorned with lotuses of three concentric rows of petals surrounded by knobs, except the one at the entrance which has nine blown lotuses. The original Jina image is gone and in its place there is now a small figure of Anantanātha. The outer walls have no figure sculpture, but only a row of fine flowers of various patterns all round. The *basti* was built in 1160 (*Chaknāyakanhalli* 21) during the reign of the Hoysala king Nārasimha I by the *mahāsāmanta* Gōvidēva in memory of his deceased consort Mahādēvi-nāyakitti and appears to form a fit memorial to the lady by its simplicity and elegance. Near the Siva temples stands a good *māstikal* having a female figure, about three feet high, with the right hand raised and open holding a lime between the thumb and forefinger and the left

hand. Flames are shown around the head and a girdle or water vessel with a spout dangling at the side with a mirror is carved to the right at the bottom.

Holavanhalli —A village on the Jayamangali river, five miles east of Koratigere. Population 2183. Holavanhalli.

It is said to have been formerly called Horampur, the inhabitants being a few persons of low caste whose chief was Holava Ganda. To them Baire Ganda, one of the Kanchi refugees who settled at Avati (Bangalore District) or a descendant of the same name, proposed to establish a fort and *pete* at Horampur to which the people would agree only on condition that the place should be called after their Ganda whence its present name Baire Ganda became tributary to the Vijayanagar kings and obtained from them a grant of 33 villages in Holaballi and the neighbourhood together with other lands, yielding altogether 6000 *pagodas* a year. During seven years Baire Ganda greatly improved his estate, when it was seized by the chief of Magadi who placed his brother Ankana Ganda in charge of it. Seven years later it was taken by Havali Baiche Ganda of Dod Ballapur but in two years Dodhallapur was itself captured by the Nawab of Sira. Baire Ganda who had joined the Sira army was killed in this enterprise but Holavanhalli was restored to his eldest son Dodda Baiche Gauda, with additions to the estate on condition of paying a tribute. The fort and *pete* of Koratigere were built some time after by a member of this family and the hoblis of Gundakal, Iraksamudra Sageri Kōlala and Dasarahalli annexed yielding altogether a revenue of 26000 *pagodas* subject to a tribute of 3000 *pagodas* and the maintenance of a military force. Some of these chiefs are mentioned in inscriptions found in the District. In *Maddagiri* 32 dated in 1667 mention is made of Rana Baire Gauda II. *Maddogiri* 43 dated in 1631 is also of his time. In *Maddagiri* 31 dated in 1636 Dodda Rana Baire Ganda makes a grant of a village and of certain payments from the Pūchalas and various trading classes for the goddess Kālīka Kamatēsvara Durga. *Maddogiri* 45 dated 1680 gives the succession Rana Bayiche Ganda a grand son Dasarahalli Bayicha Ganda a son Immadi Rana Bayiro Gauda. The local chiefs continued in possession as tributary successively to the Mysore Rājas, the Mahrāttas and the Nawab

of Sira, and afterwards to Haider Ali, on whose death, in 1782, Holavanhalli was annexed to Mysore. In 1792 Lord Cornwallis reinstated one of the family, named Dodda Rāma Baire 'Gauda, but on the withdrawal of the confederate forces, Tipu reduced the place and resumed possession.

Honnavalli

Honnavalli.—A village in the Tiptur taluk, eight miles north-west of the kasba. Population 2,097

The place derives its name from Honnu-amma, the tutelary goddess, who in a vision directed Sōmēsvara, one of the chiefs of Harnhalli, (Hassan District), to found the town. It contains many Brāhmans, and is situated amid cocoa-nut plantations, which produce a rare kind, named, from the delicious milk contained in the young nut, the Gangā-pāni, or water of the Ganges. There is a village panchayet. The educational institutions are a Boys' Middle School, Hindu Boys' and Girls' schools, Girls' Kannada School and a grant-in-aid Sanskrit school.

Honnebagi

Honnebagi.—A village in Chiknayakanhalli Taluk. Population 384

At some distance from the village is a hill on which is situated a temple dedicated to Ranganātha. It is of some interest to note that the *pūjāri* of the god is a Lingāyat and that the Lingāyats of the village conduct the annual car festival of the god. The Timmappa temple at Dugudihalli has a good figure, about 1½ feet high, of Vishnu, which is likewise worshipped by Lingāyats.

Hoshalli

Hoshalli —A village in Turuvekere Sub-Taluk. Population 229

The Kallēsvara temple at this place is a Hoysala building consisting of a *garbhagriha*, a *sukhanasi* and a *navaranga*. The last has only one ceiling in the centre with a fine lotus bud, the others too having similar ceilings. The *navaranga* doorway is well carved and that of the *sukhanasi* has perforated screens at the sides. The village goddess, named Hosahalliyamma, is a coloured stucco figure.

Hulikunte —A village in Koratagere Taluk. Population 877 Hulikunte.

A well executed *māstikal* was recently found in Nanjappa's back yard at this place. It had been walled up leaving just the *linga* at the top visible. After dismantling the wall the slab was found to consist of three panels. The top panel has between the sun and moon two rearing cobras with a male figure standing to the left bearing a mace in the right hand and lifting up something with the left. The middle panel has a *linga* in the centre flanked on both sides by couples with folded hands, one of the male figures being armed with bow and arrow and the female figure of the couple to the right showing flames issuing from the head. The bottom panel has in the centre a standing couple with an intervening sword, the female figure holding a mirror in the left hand and a lime between the thumb and forefinger of the right hand. On both sides of the couple is a female figure on horse-back holding a mirror and a lime. This is very peculiar, the women too seem to have taken part in fight. Both must have become *satis*. The slab bears an inscription on it. The hill known as Mukundarangana-gudda has on the top a small temple adorned with a *gopura* or tower, the object of worship being a round stone in the shape of a *linga* (*lingākura*). An old *viragal* of the Ganga period is to be seen at Baruganahalli close by.

Huliyar —A town situated in 13° 35' N Lat., 76° 36' E long. 14 miles north by west of Chiknayakanahalli. Population 1,985 Huliyar

Huliyar was formerly the head-quarters of the Budihal taluk, but in 1886 was made the chief town of the sub-taluk named after itself. Inscriptions of the Chalukyas and other remains indicate that the place may, in early times, have been of some importance. Latterly in the sixteenth century it was included in the possessions of the chiefs of Hagalvadi. It then passed into the hands of the Muhamadans, and formed part of the province of Sira. Haider Ali subdued it in common with the rest of the District and thus annexed it to Mysore.

The Ranganātha temple at this place must have been a good Hoysala structure, judging from the *garbhagriha* which

is the only portion now left of the original building, the other portions being modern additions. The god, about five feet long, is a well carved figure reclining on Ādisēsha, with Brahma seated on the navel lotus and Śrīdēvi and Bhūdēvi seated with folded hands at the head and feet respectively. Above the god is the *prabhāvali* carved with the ten incarnations of Vishnu, Buddha being shown as the 9th incarnation. The ceiling of the *garbhagriha*, about two feet deep, is carved with a lotus. In the *sukhanasi* are kept a figure of an Ālvār and a small figure of Dakṣināmūrti with the hand in the *dhyāna-mudra*, flanked on the right by a female figure offering something and on the left by a male figure blowing some instrument. The processional image is also kept here on a stone pedestal which once belonged to a Jaina temple as is evidenced by an inscription discovered on it which states that it was the pedestal of a Jina figure set up by Śrīyadēvi, consort of Sāmanta-Gōva. This image, as the inscription on its pedestal informs us, was prepared quite recently, in 1903, the old image having been stolen. The Ganapati shrine close by has a well carved image, about five feet high, of the god with a spirited rat on the pedestal. The right lower hand bears a broken tusk and the left lower a fruit whose stalk is held by the trunk. The Mallēsvara temple is a small neat Hoysala building with the tower and walls recently restored, the former with sculptured pieces of granite and the latter with brick and *chunam*. At the sides of the *sukhanasi* entrance are perforated screens and figures of Ganapati. The *navaranga* has, besides, well carved figures of Saptamātrika and Sarasvatī to the right and of Nārāyaṇa flanked by consorts, Umāmahēsvara with the emblems Nandi and mungoose on the base and Sūrya flanked by female figures without bows, to the left. The ceilings, though mostly flat, are exquisitely carved with lotuses having three concentric rows of petals. They are large square panels adorned with knobs all round. The *garbhagriha*, *sukhanasi* and *navaranga* central ceilings, about two feet deep, have blown lotuses, the west ceiling has nine blown lotuses, and the one in the south-west, perhaps the finest of all, has a swan carved on the under surface of the lotus bud. Among the figures kept in the veranda of the temple may be noticed a *rishi* standing with a staff in the right hand, and a man wearing a *gonde* (knot of hair) and *uttariyam* and holding an elephant-goad in the right hand and a fruit in the left. It is not clear whom the second figure represents. The

village is strewn over with the architectural members and carvings of Hoysala buildings. A copper plate received from the Virakta matha has been transcribed by the Archaeological Department.

Huliyurdurga.—A town in the Kunigal taluk 40 miles south of Tumkur at the junction of roads from Kunigal and Nagadi. Head quarters of the *taluk* of the same name. Population 2061. Huliyur-
durga.

Till 1813, it was the head quarters of a taluk of the same name. The place is surrounded with jungles and derives its name from *Huli* or tiger, which animal used to abound in the neighbourhood. The town and the fortifications of the hill commanding it rising to 3006 feet above the level of the sea were, it is said erected by Kempe Gauda the chief of Nagadi. Muhammadans and Lingayats form the principal classes of the population.

Both the village and the hill commanding it are called Huliyurdurga. The hill is a mass of rock and has the peculiar appearance of an inverted cup. The fortifications on it are said to have been built by Kempe Gauda of Nagadi. The ascent is rather difficult there being only slight depressions in the almost perpendicular rock to do duty for steps in some places. We have also here as in other *durgas* the usual springs, ruined houses, powder magazines, granaries, palace, darbar hall and so forth. Among the springs may be named Chikkadēvi-donē, Akkataṅgiyara-donē and Injalele-donē. At the second gateway from the foot is a shrine of Ganapati carved on a boulder. To the west of the hill is the Cōṣṭākṛishṇa temple with several ruined houses in its proximity. It faces east and has three cells: the middle cell has a good figure about four feet high of the god; the south cell some Ālvāras; the north being empty. Unlike in other temples, the *dēvīrapālakas* stand in the porch at the sides of the *nararanga* entrance. There are two elephants at the sides of the steps leading to the porch. To the right of the temple is a separate shrine of the goddess. The latter is a good figure unfortunately broken into pieces by Muhammadans. In the Mallikarjuna or Jyōtirmayēśvara temple situated in the portion known as Halopete of the village is kept the processional image of the abovementioned Gōṣṭākṛishṇa temple. There

is also a stone figure of Lakshmi recently prepared to replace the mutilated one. The hill Hēmagiri, situated by the side of the Huliyurdurga, has on its summit a temple of Mallikārjuna. On its eastern slope is a shrine of Varadarāja, locally known as Hēmagiriappa, who is in the form of a round stone (*udbhava-mūrti*) and on the southern, a shrine of Bhairava. This hill is loftier than Huliyurdurga but not fortified.

Hutridurga

Hutridurga — A fortified hill in the south-west of the Kunigal taluk, rising to 3,713 feet above the sea. The fort was taken by Lord Cornwallis in 1792.

Hutridurga derives its name from Hutri, a village situated about two miles from its foot. The village at the foot of the hill is known as Santepete and that situated on the first elevation at about a third of the ascent, as Hutridurga. The latter has several temples, the Ādinārāyana, the Virabhadra, the Ānjanēya and so on. The god in the first temple is a good figure about 2 feet high. In the *sukhanasi* is kept another stone figure of Vishnu, said to be the god of the ruined Krishna temple on the hill. One of the pillars of the *navaranga* has the ten incarnations of Vishnu and another a rare figure of Matsya-Hanuma whose exploits are recorded in the *Manāvana-purāna*. The hill Hutridurga has eight gateways from the foot to the summit, and several outer gates known as Eleyuru-bāgilu, Balekatte-bāgilu, Magadi-bāgilu and so forth. On the summit, known as Sankara-kumbhi, is situated the Sankarēsvara temple, a small building with a spring called Dodda-donē in front of it. The *linga* is said to have been set up by Sankarāchārya. To the left in the *navaranga* is kept a good standing figure, about 2½ feet high, of Mahishāsuramardini with four hands, the upper bearing a discus and a conch, the lower left holding the mouth of the buffalo and the lower right piercing his neck with a trident. Several epigraphs are to be seen at the temple. From the summit we get an extensive view of the surrounding landscape, a large number of tanks and hills meeting our gaze. The Ranganātha temple at Trumale near Magadi is clearly visible. Among other springs on the hill may be mentioned Kopparige-donē, Akkatangiyara-donē, Akshatē-donē and Emme-donē. There are also here the usual powder magazines and granaries and the ruins of Pālegār Kempe-Gauda's palace, treasury and other buildings. There

is besides a large underground cell below a big boulder on the top. The highest peak is known as *Nisāni-gundu* because the flag (*nisāni*) of the *Pālegār* used to be hoisted on it. A platform below a figure of *Ganapati* carved on a boulder is known as *Kempe-Coude* a *hajara* or darbar seat. Near the ruined *Kṛṣṇa* temple is lying the lower half of a millstone about $3\frac{1}{2}$ feet in diameter. *Hutti-durga* is locally known as *Dodde betta* to its left are *Olagadara* and *Tirumaladevara betta* and opposite to it is *Basavana-durga* which is also fortified. *Olagadara* is so called because nautch parties used to be held on it during the *Pālegār*'s time.

Jayamangali —An affluent of the *N Pinakini*. It rises in *Jayamangali* *Devarayadurga*, in a gorgo called the *Jaledegondi* and flowing in a northerly direction into the *Madhugiri taluk* receives the *Garudachala* near *Holavanahalli* from the east and farther on near *Rampura* the *Suvarnamukhi* from the west. Thence, continuing its course through the east of the *Madhugiri taluk* it flows into the *N Pinakini* near *Pargi* in the *Anantapur District*. In the sandy bed are formed a number of *Kapile* wells and *Talpargi* or spring head streams are drawn from the channel.

Kadaba —A town in the *Gubbi taluk* on the right bank *Kadaba*, of the *Shumaha*, 7 miles south west of the *Kasba*, on the road from *Nittur* to *Mayasandra*. Head-quarters of the hobli of the same name. Population 1,621.

Till 1886 it gave its name to the taluk now called *Gubbi*, and was at one time the head-quarters of the taluk.

It is said to owe its name to *Kadamba rishi* who is said to have performed penance here on the banks of the *Shumashupa*, as the *Shumaha* is called in the local *Purāna*. *Rāma*, on his return from *Lanka* is said to have encamped here, and at the request of *Sita*, the river which was too narrow for the convenience of all the followers was dammed so as to expand into the present large tank. There is a settlement of *Sri Vaishnava Brāhmins* here which seems to have been formed in the time of the reformer

Rāmānujāchārya, who, fleeing from the Chōla country, took refuge with the Hoysala king

Kadaba is one of the *pancha-grāmas* or five settlements of the Hebbār Srīvaishnavas, the others being Nuggihalli, Mayasandra, Nonavinkere and Bindiganavale. The Tamil inscriptions of the place name it Dasaratharāma-chaturvēdi-mangalam. According to the *Sthala-purāna*, the place was once the hermitage of the sage Kadamba (see above) who received and honoured Rāma on his way back from Lanka and set up his image for worship. It derived its name from that of the sage. The Rāma temple here is a large Dravidian structure with a *gōpura* and a fine Garuda-pillar in front. The pillar is $2\frac{1}{2}$ feet square at the bottom and about 25 feet high and has an iron frame at the top for placing lamps. It has on the west face Garuda, on the south a lotus, on the east a discus and a conch with *nāmam* and on the north a swan. Though called the Rāma temple, there is no figure of Rāma in it at present. The figure is said to have been removed or destroyed by the Muhammadans and the cell remained vacant for a long time. Subsequently a stroke of lightning destroyed the *vimāna* or tower over the cell which has now disappeared altogether. It appears that a new image of Rāma was prepared some time back, but it was not consecrated owing to some supposed defect in it. It was, however, removed to Bangalore some years ago and set up in the Rāmēsvara temple in Chamaraġapet. The temple at Kadaba has three cells standing in a line, the middle cell enshrining Janārdana, the south cell Vēnugōpāla and the north Yōga-Narasimha. According to tradition, Janārdana was discovered in an ant-hill by a *gauda*, or head of a village, who used to offer worship every day, and without his knowledge the sage Kadamba also worshipped the same deity. One day both met together at the ant-hill and came to an agreement that the *gauda* should worship the god during the day and the sage during the night. Soon after, a temple was erected by the *gauda* for the god. The temple is in a neglected condition. The Tamil inscriptions Gubbē 19-21, which are all fragmentary, are on slabs built into the walls, in some cases upside down, in various places. The Kailāsēsvara temple seems to be an older structure. It has also in front a lamp-pillar, 3 feet square at the bottom and 20 feet high, with a framework at the top for placing lamps. It shows on the east face a *linga*

canopied by the hoods of a serpent, on the south a lotus on the west a awan and on the north *Nandi* with a couple with folded hands below it. The temple faces south though the *linga* faces east. Built into the north outer wall is a slab carved with a good elephant with a rider armed with a goad. The bund of the tank at the village has also a huge slab carved with an elephant. It is not clear what these slabs were meant to represent. At the east outlet of the tank is a temple dedicated to Hanuman to the east of which is a fine *uyyale kamba* in the form of a gate intended for swinging the god. It is about 15 feet high and beautifully carved on all sides with scroll work. At Ranipura near this place is an inscription *F C XII Gulbi 27* dated 1696 which is of great interest from a sanitary point of view. It states that it was decided at a meeting of the villagers that no corpse should be buried within an arrow shot of a well that had been newly built and that in case any burial took place the buriers and the buried should be outcastes in this world and the next. We have some evidence here of the ideas of sanitation which the villagers had about two centuries and a quarter ago. An inscription is to be seen at Aremanahalli and two at Prabhavanahalli.

Kadasur—A village in the Turuvekere sub taluk Kadasur
Population 148

The image of Bhairava in the Bhairava temple at this place is a fine figure about 3 feet high with four hands the upper ones holding a trident and a drum the right lower a sword and the left lower a skull and a decapitated head. The blood trickling from the last is shown as being licked by a rearing dog whose hind part is embraced by a goblin with another seated in front of it. Bhairava wears matted hair a necklace of skulls a snake ornament round the thighs and sandals his emblem being a scorpion. To his right stands a naked figure perhaps, his consort ornamented with a snake bearing in the right hand what looks like a disc, the attribute in the other hand being indistinct. The Lakshmi Idēvi temple at Māvinkere has two good figures one larger than the other of Lakshmi seated in the Lalitāsana (i.e. with one leg dangling) with four hands the upper ones holding lotuses the lower being in the *abhaya* (fear removing) and *varada* (boon-conferring) attitudes. There is likewise a figure of Kālī seated in the same posture with a trident, a drum, a sword

and a cup for her attributes In the *navaranga* of the Mallēsvara temple is a very fine figure, about three feet high, of Nārāyana

Kaidala

Kaidala.—A village in Gulur *hobli*, 3 miles south of Tumkur, containing the ruins of two fine temples
Population 692

It appears to have been formerly the capital of a petty State, and is said to have borne the name of *Krīdā-pura* It is also reported to be the native place of Jakanāchāri, the famous architect and sculptor, to whose wonderful skill is attributed all the finest temple carving in the State, as at Halebid, Belur, etc Tradition relates that Jakanāchāri's career began while Nripa Rāya was ruling in Krīdāpura He then left his native place and, entering the service of various courts, produced the works by which his fame is to this day upheld After his departure, a son, Dankanāchāri, was born to him, who, when grown up, set out in search of his father, neither having ever seen the other At Belur the young man found the Chennakēsava temple in course of erection, and—so the story goes—remarked that one of the images had a blemish As this would be fatal to its claim as an object of worship, the architect, who was no other than Jakanāchāri himself, hastily vowed to cut off his right hand if any defect could be found in an image he had carved To test the matter the figure was covered with sandal paste, which dried on every part except around the navel In this, on examination, was found a cavity the son had detected, containing a frog and some sand and water Mortified at the result, Jakanāchāri cut off his right hand, and inquiries as to who his critic was led to the unexpected discovery of their mutual relationship Subsequently Jakanāchāri was directed in a vision to dedicate a temple to the god Kēsava in Krīdāpura, his native place Thither he accordingly returned, and no sooner was the temple completed than his right hand was restored In commemoration of this incident, the place has ever since been called *Kaidala*, the restored hand

The Gangēsvara temple contains inscriptions stating that it and the Nārāyana temple were erected in 1150, in the reign of the Hoysala king Nārasimha, by a chief named Gule Bachu The name is there spelled Kayadala, and there is nothing in support of the above story.

The Chennakēśava temple at this place is a large Dravidian building with a *mahādvara* or outer gate surmounted by a *gopura* or tower. The god about 5 feet high with *prabha* or glory faces west and stands on a pedestal about 3 feet high flanked by consorts. The *nataranga* has two entrances on the north and south the former facing the *mahādvara*. The outer walls of the *mahādvara* which is supported by four well executed pillars with lions and riders, are carved with rows of elephants horses and *yūlis*. On a pillar to the right in the *mahādvara* is a figure of Chennakēśava similar to the one in the temple with consorts on the side panels. The pillar opposite to it has a fine figure about 1½ feet high standing with folded hands wearing an *uttariyam* or upper cloth and a dagger which is said to represent the celebrated sculptor Jakanāchān (See above). But this tradition does not appear to be worthy of credence. The existence of a sculptor named Jakanāchān who is supposed to have built all the artistic structures in Mysore and elsewhere is itself doubtful seeing that no such name has been met with in any of the ornate buildings so far examined though the names of numerous other sculptors have been noticed. It is very likely that the figure on the pillar referred to above represents a chief who caused the temple or the *mahādvara* to be erected. This is confirmed by the inscribed slab in the Gangādharaśvara temple. The Gangādharaśvara temple situated to the east of the Chennakēśava also appears to be a Dravidian structure though the *nataranga* has four beautifully sculptured black stone pillars decorated with bead work like the ones found in Hoysala buildings supporting a ceiling about 1½ feet deep carved with a lotus. The pillars are sculptured on the bottom panels on all the four sides with fine figures such as Śiva Brahma Vishnu Bhairava, Krishna Ganapati Virabhadra and so forth. In the *nataranga* is the inscription Tumkur 9 engraved on two slabs, one having a *linga* at the top and the other a standing figure of Vishnu with a figure of Jina under a *Mukode* or triple umbrella seated to its right, which tells us that the temple was built in 1151 by Sāmanta Bachī, a subordinate of the Hoysala king Narasimha I in memory of his father Sāmanta-Gangayya. We also learn that Bachī built besides Vishnu and Jina temples at the village and endowed them. The Vishnu temple is no doubt the Chennakēśava noticed above and the figure on the pillar of its *mahādvara* probably represents Bachī. The inscription

thus bears testimony to the cosmopolitanism of Sāmanata-Bachī

Kandikere

Kandikere.—A village in Chiknayakanhalli taluk Population 1,110 This village has a ruined fort surrounded by a moat

The Gōpālakrishna temple here has a fine figure of the god, about 5 feet high with *prabha* with cows, etc , carved at the sides There is also a *basti* here dedicated to Sāntinātha, a standing figure about 4 feet high At some distance to the north-west of the village is a good structure on an eminence, named Kalyāna-dēvara-matha, and a Siva temple, both of which have gone to ruin The buildings seem to have been deliberately dismantled, the architectural members such as pillars, beams and jambs, and *lingas* and Nandis lying pell-mell about the place It is said that a large number of stones were removed and utilised for the construction of the Borankanive dam Near this place are also to be found a number of tombs of temple bulls

Karikalgudda

Karikalgudda.—A hill in the south-east of the Tiptur taluk, containing an old quarry of fine black hornblende, which has been extensively applied to the construction of temples The quarry is situated about half a mile east from the village of Kadahalli

Kondavatti

Kondavatti.—A village in Kunigal taluk Population 561

There is here a Lingāyat *matha* known as Gavi-matha as it is situated in a cave (*gavi*) which is said to be connected by a subterranean channel with the Pātāla-Ganga of Kelagana-gavi *matha* at Sivaganga Close to the *matha* are a few *gaddiges* or tombs, of which the one that is most honoured is the *gaddige* of Chennavīra-svāmi, who is believed to have gone to Kailāsa with his body about one hundred years ago

Koratagere

Koratagere —A sub-taluk in the north-east Contains the following hobbs, villages and population —

Hobbs	Villages	Population
1 Koratagere	44	11,057
2 Channarayadurga	60	12,892
3 Holavanahalli	61	17,415

Principal places with population —

Koratagere 3 028, Tovinkere 1,270 Ramapura 1 541
Holavanahalli 2,183

Koratagere — A town situated on the left bank of the Koratagere
(Town) Suvarnamukhi, in 13° 21' N lat, 77° 17' E long 16 miles north of Tumkur, on the Tumkur Madhugiri road Head quarters of the Koratagere sub-taluk and a municipality

Population in 1901	Males	Females	Total
Hindus	1,378	1,207	2,585
Muhammadians	185	136	3 21
Christians		2	2
Animists	17	13	30
Total	1,580	1 449	3 028

The fort and *pete* were founded by one of the Holavanahalli chiefs, who removed the seat of government hither. The former is in ruins having been dismantled by Tipu Sultan. Glass bangles are manufactured in the town. The people are dependent for drinking on the river water which is procurable at all seasons. The well water is brackish.

The Koratagere hill was once fortified the remains of the fort wall being visible here and there. At about the middle portion of the hill is situated the Gangadharasvara temple consisting of three cells standing in a line with a hall in front. The cells enshrine Gangadharasvara, Parvati and Srinivasa flanked by consorts. In front of the Srinivasa cell at some distance are kept on a raised platform figures of the *Varagrahas* (or nine planets) in three rows with the sun in the centre facing east, while the others face all directions. Near the temple is a large *don* or spring and a structure newly built for the accommodation of visitors. The summit has a shrine of Basava to which the ascent is rather steep. A spot near one of the gates is pointed out as the *Tankasale* or *munt* of one of the former chiefs. It

appears that once gold coins used to be picked up here. Government have now prevented the removal of earth from the place. Some boulders behind the hill known as Dalavāyī-gundu are said to represent the heads of a Dalavāyī or general and his followers who turned traitors to a Pālegār princess named Bayyamma. A pond near the Gōkulada-Ānjanēya temple in the town, known as Bayyamma's pond, is said to have been built by this princess. Near this temple are also to be found a few good *māstikals* (or memorials of *satis*)

A *jātra* on a grand scale is celebrated every year in honour of Ānjanēya at Kemenhalli, about 4 miles from the town

Municipal Funds	1919-20	1920-21	1921-22	1922-23	1923-24

Expenditure	1,991	2,917	2,954	3,351	2,673

Kottagere

Kottagere.—A village in Kunigal Taluk. Population 652.

It appears to have been a place of considerable importance at one time, judging from the inscriptions and ruins of the village. It was also known as Sridharapura during the time of the Hoysala king Vishnuvardhana (*E. C. XII, Kunigal 1*)

The Kottēsvara temple, now mostly buried, is an old Dravidian building with two entrances on the east and south. It was from this temple that the image of Mahishāsūramardini was removed, as stated before, to the Sivaramēsvara temple at Kunigal. A Tamil inscription at the village (*Kunigal 2*), dated in the 31st year of the reign of the Chōla king Rājādhirāja (1048) registers a grant for a god named Rājēndra-Sōla-Isvaram-udaiya Rājādhirājavidangar, who was in all probability identical with the god of this old temple. Tradition has it that the temple was founded by one Kotappa, who, by the favour of some Bairāgis styled *Lipi-gosāyis*, had acquired immense treasure after killing a seven-hooded serpent. He is also said to have built the tank at the village and to have met with a sad end at the hands of the labourers who, enraged at his

merciless behaviour towards them, buried him alive. A ruined *basti* at the village has some mutilated Jina figures lying around on the pedestal of one of which is to be seen an inscription of the 12th century. On the site of another ruined temple are to be seen figures of Surya and Bhairavi. The latter is seated in *lalāsana* with flames around the head and the scorpion emblem on the pedestal the attributes being a trident a drum a sword and a cup.

Kuduvatti —A village in Madhugiri taluk

Kuduvatti

Situated at the foot of a hill of the same name is a *bechirakh* or uninhabited village enclosed by a lofty mud wall. No person now enters the enclosure lest he should lose his life because sometime back some one who dug the site for money vomited blood and died instantly.

Close to the village are three temples known as the Gōpala Krishna the Lakshmidēvi and the Kumbhadaraya and five old *virupakṣa* without any writing. The objects of worship in the Kumbhadaraya temple are two pillars standing side by side. The porch has on the right wall sculptures representing the coronation of Rama and on the left Rauganātha attended by Tumbura and Narada. The sculptures on the pillars supporting the porch show some ingenious combinations of female figures and *Yalis*. Near the Gōpala Krishna temple is a small pond known as Majjanada *bavi*, on the door post of which is carved a standing female figure about 1½ feet high said to represent one Jirale-Mallamma, who built the Gōpala Krishna and Lakshmidēvi temple as well as this pond. Tradition says that she made a large sum of money by selling butter and that she utilised the money in carrying out these pious and useful works. The villagers make an offering of butter to the image and bathe it with three handfuls of water.

Kundar or Kumadvati —A stream which rises near Makalidurga in the Dodballapur taluk, and flowing northwards through the Goribidnur and Madhugiri taluks runs into the north Pinakini just beyond the frontier of the State near the town of Hindupur in the Anantapur District. Its extreme length is about 30 miles.

Kundar or
Kumadvati

Kunigal.

Kunigal.—A taluk in the south-east. Area 382·17 square miles. Head-quarters at Kunigal. Contains the following *hoblis* and population.—

Hoblis				Villages	Population
1.	Kunigal	.	..	54	15,580
2	Yediyur	.	..	68	15,024
3	Amritur	.	.	55	14,648
4	Huliyurdurga	.	..	56	16,798
5	Kottagore	.	..	41	11,126
6	Hutridurga	42	15,917
Total				316	89,093

Physical
aspects

Principal places with population —

Kunigal 3,044, Kitalamangala 1,070, Amritur 2,182, Ujain 1,475, Nidasale 1,103, Huliyurdurga 2,065, Yehiyur 1,015

Except in the east, and south-east, the taluk partakes of the characteristics of the table-land of Mysore, with an undulating surface intersected by deep ravines. The Hutridurga and Huliyurdurga *hoblis* are hilly, the difference between the two being that, while the hills in the former are comparatively bare and barren, those of the latter are covered with jungle. The hills are a continuation of the Savandurga range in the adjoining Magadi taluk, and the highest among them are the peaks of Hutridurga and Huliyurdurga which rise to a height of 3,713 and 3,096 feet respectively, above the level of the sea. The drainage of the taluk is towards the west and the south. There is not much of forest in this taluk, portions of jungles in the Huliyurdurga *hoblis* have been reserved. They are, however, poor and contain no

tumber trees. Tho taluk, as a whole, is not a treeless tract, on the other hand, groves of trees are met with all over

The soil of the high lying fields is generally grey, sandy or gravelly but in the fields lower down it improves so that at the bottom of the valleys a good class of soil is nearly always found. The taluk depends mainly upon its tanks for irrigation. There are no river channels. The Shimsha owing to high banks does not admit of being utilised for direct irrigation. Wells are numerous and water is available in them for the greater part of the year. The principal dry crops are *ragi* and *kulthi*, other crops being *arare jola harka narane same*, *haralu togari* and *chenna*. Small patches of tobacco are also met with here and there. On wet lands the crop is either paddy or sugar-cane.

Early in the ninth century, the Kunigal country which apparently corresponded with the Kunigal taluk and neighbouring parts, was being governed by Vimalāditya Chālukya prince who was the nephew of Chakravarthi Raja the Rashtrakūta viceroy ruling the Ganga territories during the imprisonment of the Ganga king.

The revenue settlement was introduced in 1881 and the revision settlement in 1921-22. The area of the taluk was thus distributed—Cultivable (dry 1 05 604, wet 9 157 garden 3 770), total 1,18,531.

The Bangalore Has an road passes through Kunigal whence also there are cross roads to Tumkur and via Huliyurdurga to Maddur.

Although no railway passes through the taluk it is advantageously situated between two lines (the Bangalore-Harihar and the Bangalore-Mysore Railways) and within easy distance of three important stations via Guhbi and Tumkur to the north and Maddur to the south. Both the lines have succeeded in drawing the taluk out of its seclusion and enabled it to enjoy in a degree the benefits of swift and easy transport.

Kunigal

Kunigal.—A town situated in 13° 2' N. Lat., 77° 5' Long., 22 miles south of Tumkur on the Bangalore-Mangalore road. Head-quarters of the Kunigal taluk and a municipality.

Population in 1921	Males	Females	Total
Hindus	1,067	1,020	2,087
Mussalmans	458	432	890
Jains	5	1	6
Christians	31	30	61
Total	1,561	1,483	3,044

The derivation of the name is said to be *Kuni-Gal*, dance stone, Siva having danced here. But from early inscriptions it would appear that the original form of the name was Kuningil or Kunigil.

Three streams rising in Sivaganga whose names are Nalir, Nagini and Kamala, are said here to unite their waters. Their virtue is such that a king from the north, named Nriga Chakravarti is said to have been cured of leprosy by bathing in them, and to have constructed the large tank in consequence. A party of seven *Lipi jōgis*, it is said, subsequently came from the Himalayas and obtained a large treasure from the bed of the tank, after killing the seven-headed serpent which guarded it. The tank is estimated to be fourteen miles round when full. The foundation of the fort is attributed to a Vīra Kambala Rāya in 1290. It afterwards came into the possession of the Magadi chief, who enlarged the town and fort. Owing to a low type of fever, the place at one time became very unhealthy. The Stud Farm for the breeding of horses for the Mysore Sīlahdars, formerly at Closepet, has been long established here.

Kunigal is a place of considerable antiquity. In old Kannada and Tamil epigraphs, it is named Kunungil. In an old Kannada record, of about 785 A D, at Kuppepālya, Magadi taluk, the Ganga king Sivamāra is mentioned as the governor of Kunungil-nadu, i.e., the district of which Kunungil, the modern Kunigal, was the chief town. The same district was, according to the Kadaba plates, E C XII, Gubbī 61, governed by Vimalāditya, a

chief under the Rāshtrakūtas in 812. In the Chōla period Kunugal was renamed Rājendra-Sōlapuram. The Narasimha temple here is a large Dravidian structure though in a dilapidated condition. Though so named it has no image of Narasimha at present but has a figure of Kesava said to have been brought from Haliyūrdurga. In the *sulhanasi* are kept three sets of processional images Narasimha Venkataramana and Varada rāja. In the *prākara* or enclosure is the shrine of the goddess of the temple. In front of the temple stands a four armed figure of Garuda holding a discus and a conch in the upper hands the lower ones being folded as usual. Such a figure of Garuda is rather rare. The front portion of the temple has three cells on either side of those on the north the middle one has Rama and the others Vishvakṣṇa and Nammāivar. While of those on the south two have Venkataramana and the goddess the third being vacant.

The Sōmāvara temple is likewise a large Dravidian building with a *maṭṭadrūpa* in the south. The *linga* which is *udbhara mūrthi* i.e. a natural stone, not set up by any one faces east and is said to be bent a little towards the north and looking towards the south in the direction of Mahishāsūramardini in the front hall. The latter is a good standing figure about 3½ feet high with four hands the upper holding a discus and a conch the lower right a sword and the lower left a bow. It stands on the head of a buffalo and has below a lion to the right and a mongoose to the left. The image faces east with its head bent a little to the south looking towards the north in the direction of the *linga*. Tradition has it that the goddess was set up by Sankarāchārya. Among the figures in the *nararanga* may be mentioned Sūrya and a standing metallic figure of Ganapati. The former about 4 feet high is flanked by his consorts Samjna and Chhaya who do not however shoot but merely hold an arrow in the right hand and a bow in the left. The pedestal is carved with Aruna and seven horses and the *prabhā* or glory is sculptured with the figures of the eight remaining planets. In the north-east of the enclosure is the shrine of Pārvati a good figure about 4 feet high and to its right a small cell containing a well carved seated figure about 4 feet high, of Sarasvatī also said to have been set up by Sankarāchārya. This goddess bears in the upper hands a noose and an elephant-goad, the lower right being in the *abhaya* pose with a rosary and the lower left in the *varada*

pose with a book In a *mantapa* supported by sculptured pillars, situated to the south-east of the temple, stands leaning against the east wall a figure, about 4½ feet high, of Garuda on whose pedestal are carved a fish, an elephant, a scorpion, a tortoise and a crocodile The meaning of this symbolism is not clear The sculptures may perhaps be compared with those usually found on the moonstones of Ceylon

The Padmēsvara temple is a neat structure in the Hoysala style, consisting of a *garbhagriha*, a *sukhanasi* and a *navaranga* The ceilings of the *navaranga*, about 1½ feet deep, are carved with lotuses Of the two cells at the sides of the *sukhanasi* doorway, the right cell has a figure of Ganapati, the other being empty The outer walls are decorated with pilasters

The Venkataramana temple has three cells standing in a line The middle cell has a good figure, about 3½ feet high, of Srinivāsa, the left cell the goddess of the temple, and the right Ganapati In the *sukhanasi* of the middle cell are kept the processional image and a few figures of Ālvārs There is also kept here the processional image of the temple on the Rangasvāmi hill, the peculiarity about this image being that it also reclines on a serpent like stone figures of Ranganātha The Urturumala-dēva temple enshrines the processional image of a ruined temple at Muganpālya of the same taluk The Sivaramēsvara temple is a modern structure, the *linga* in it having been set up about a hundred years ago But the goddess of the temple, Mahishāsura-mardini, is an old figure brought from the ruined Kōttēsvara temple at Kottagere of the same taluk Trampling on the buffalo with one leg, she holds his tail with the lower right hand and stabs him with the trident in the lower left An inscription on the sluice of the Kunigal tank gives the interesting information that the sluice was built in 1394 by Irugapa, the Jaina general of the Vijayanagar king Harihara II and the nominal author of the Sanskrit lexicon *Nānārtharatnākara*

A number of palm leaf manuscripts are in the possession of Pandit Isvara Sāstri and of Basavalingappa, the manager of a *Lingāyat matha* known as Hiriya-matha, affiliated to the *matha* at Balehalli The manuscripts with Isvara Sāstri contain Sanskrit works bearing on the *Advaita-Vēdānta*, logic, ritual, etc., and those with Basavalingappa Kannada works bearing on the Virasaiva creed Several of the works examined by the Archæological Department have not so far been printed

According to the *Sthala purāṇa* once upon a time the emperor Ariga, his horse and dog all the three were cured of leprosy on bathing in a pond situated in the Kunigal tank.

The eastern half of the taluk is plain country, with undulations not of a striking character. The west half is scattered over with hills which form a link in the well-defined chain

traversing the State from south to north approximately. The two highest peaks within the taluk are at Madhugiri and Midagesi. The rocks are generally dark of colour and contain iron. There is no forest to speak of, the hills are covered with scrub jungle which nowhere attains the dignity of forest, but the taluk has an abundance of *topes* and shady trees. The north Pinākini or Pennār just skirts the taluk for a short distance in the east. The Jayamangali, an affluent of this river, runs nearly parallel to it. Between the two, the Kumadvati runs likewise. The lie of the country is generally from south-west to north-east. The taluk takes very high rank so far as soil is concerned with water easily obtainable at a few feet below the surface from *talapariges* or surface-springs. Loamy soil of all shades of darkness is the common feature of the east and the centre, along the streams it becomes good black *Regur*. Towards the west and the north, red soil with an admixture of sand predominates. The principal of dry crops is ragi, pulses, jola, horse-gram, navane, oil-seeds and tobacco come next in importance. In wet land, rice of course holds the first place. The gardens produce areca, betel, cocoa-nut and other common fruits such as plantain, mango, jacks and lime. Pomegranates and figs and other fruits of a superior kind are a speciality in some villages.

The revenue settlement was introduced in 1877 and the revision settlement in 1916-17. The total revenue demand for 1923-24 was Rs 1,95,670.

The average rainfall at Madhugiri station for 51 years is 23.51.

The Tumkur-Pavagada road runs through the taluk from south to north, by way of Koratigere, Madhugiri and Midagesi, crossed by a road from Madhugiri west to Sira and another south-east to the Railway Station at Thondebhavi.

Madhugiri.

Madhugiri.—A town situated in 13° 39' N. lat., 77° 6' E. long, 24 miles north of Tumkur, on the Tumkur-Pavagada road. Head-quarters of the taluk and a municipality.

Population in 19*1	Males	Females]	Total
Hindus	2 100	2 008	4 198
Musalmans	425	436	931
Jains	4	3	-
Christians	1	6	-
Total	2,600	2,543	5 143

It is surrounded on all sides by hills the continuation of the north and south range which traverses the east of the District. The town derives its name from Madhugiri, or honey hill, at the northern base of which it is situated. The two large temples of Venkataramanaswami and Malleswara standing side by side are conspicuous objects. A very graceful ornament is carried round under the eaves of the roof of the latter representing doves or pigeons of about life size in every natural attitude.

The erection of the original fort and town is ascribed to a local chief named Rāja Hira Gauda. The circumstance of a stray sheep having returned from the hill dripping with water led to the discovery that it was well supplied with springs of water. This being reported by the shepherds of the neighbouring village of Bijavara, the advantages of the situation were so apparent that the town was established and mud fortifications were constructed on the hill for its protection. About 1678 while Rāma Gauda and Thimma Gauda descendants of the founder were ruling in Madhugiri, they incurred the hostility of the Rāja of Mysore. The dalarāy Devaraj was therefore sent against it who after a siege of a year, took the place and led the Gaudas with their families captive to Seringapatam. They were however released and sent back to Midagesi which was left to them out of their lost possessions.

The fortifications of Madhugiri were greatly increased by Haidar Ali and the place was the seat of a valuable trade containing a hundred houses of weavers alone. Hither in 1763 on the conquest of Bednur he sent as prisoners both the Rani and her lover and also even the pretender Chenna Basavaiya, for whose rights he had ostensibly been fighting, and here they remained until the capture of the place by the Mahrāttas in

1767 The Mahrāṭṭa chief Mādhava Rao held possession of Madhugiri for seven years, and when forced by Tipu in 1774 to retire, plundered the town of everything he could carry away. With the usual exaggeration its wealth is said to have been so great that he disdained to remove anything less valuable than gold. Tipu bestowed on it the name of Fattehabad, city of victory, and made it the capital of a surrounding district yielding a revenue of six lakhs of pagōdas. But his exactions had nearly ruined the place, when the destruction was completed by the Mahrāṭṭas in 1791. Balvant Rao, one of Parasu Rām Bhao's officers, besieged it, though without success, for five months, having under his command a large army, according to local accounts, of 20,000 men. It was principally composed of bandits assembled by the Palegārs formerly driven from their strongholds, who had ventured back under the protection of Lord Cornwallis. On the conclusion of peace, they were speedily dispersed by the Sultān, but not before they had devastated all the neighbouring country. Of 500 Mahrāṭṭa horse who had joined this rabble, it is said that only 20 men with their chief escaped. On the conclusion of the Third Mysore War and the death of Tipu, Madhugiri was included in the new territory of Mysore.

Though its prosperity has somewhat revived since 1800, the town has never recovered from the ravages of the Mahrāṭṭa army. It has, however, an extensive trade in brass, copper, and silver vessels of every description. There are also manufactures of iron, steel, coarse cloth and *kumblis*, and weekly interchange is held with the markets at Tiptur, Bellary and Hindupur in the Anantapur District, as well as with Bangalore. The article of export is rice, especially that called *Chinnada Salāki*, or golden stick, which is much cultivated and eagerly sought by Bangalore merchants, as it is estimated to be the best in the State. The cattle here are finer than those ordinarily seen in other parts of the District. The town, as well as the whole taluk, owes its prosperity to the richness of the soil, and the springs peculiar to this region, which abound everywhere near the surface, so that in the worst of seasons an unfailing supply of water is obtainable for the crops, while the well-water is generally sweet.

The Madhugiri fort is one of the finest in Mysore. Portions of it are roofed and converted into Government offices. The Mallāvara and Venkataramann temples, which are similar in plan and stand in a line facing east are large Dravidian structures with lofty towers. The lamp-pillar in front of the Mallāvara temple about 20 feet high has a pavilion on the top for placing lamps. The porch of the temple has two niches the one to the left containing a figure of Harihara and the other a figure of Ganapati. In the *prākāra* are shrines of Parvatī Mahīśāsuramardini Śnbrahmanyn Tāndavavara and Krishna the last a fine figure and rows of *linga* cells on the north and south. On the pedestal of Parvatī is a label giving the names of two women who may have set up the image. In this shrine is also kept the metallic figure of Chandesvari whose temple has gone to ruin. This is a seated figure about 1½ feet high with 8 hands, 5 of them bearing a bell a shield a cup an axe and a sword one holding the head of a demon the remaining two being in the fear removing (*abhaya*) and dancing (*nāṭya*) attitudes. The *kalyāṇa mantapa* is a good structure supported by 4 pillars the front portions of which are carved into figures of Nārada Tumhura and two other *rishis* or sages. In the Venkataramana temple the god is about 6 feet high and there are two goddesses named Śrīdēvī and Bhūdēvī in separate shrines in the *prākāra*. The porch has two cells the one to the right enshrining Garuda and the other Hanumān. The temple has also stone and metallic figures of several Śrīvaiṣṇava saints and sages. The Mallinātha basti adjoining the fort wall has in front a good *vinastambha* about 15 feet high with a pavilion on the top but without the usual Jina figure. Besides Jina figures, the basti has two seated stone figures of Brahma and metallic figures of Sarasvatī and Padmavatī. A new inscription was discovered here and another at the Kāṣamma temple. The lofty west gate of the town, about 20 feet high is known as Dandūra bāgila. There are several fine wells at Madhugiri such as Janaiyana bāvi Arasana bāvi Pradhānara bāvi etc. stepped all round and adorned with sculptures here and there. Of these the first situated to the north of the Travellers Bungalow is perhaps the best. It has a beautiful gateway and well-carved figures of Rāma Lakṣmana Sītā and Hanumān trampling on a demon. The second well situated to the east of the Travellers Bungalow has figures of Hanumān Ganapati and Bhairava as also an

inscription (*E. C. XII*, Maddagiri 16) which tells us that it was built in 1699 by order of the Mysore King Chikka-Dēva-Rāja-Wodeyar and named Devarāyasamudra after him. From another inscription (Maddagiri 15) on a rock at some distance to the south of the Travellers' Bungalow, we learn that the same king built in 1690 a *mantapa*, a *brindāvana* and a pond known as Gōpala Sarassu, and that Gauramma of Talkād, his queen, built a pond. The *brindāvana* is a good structure with a canopy, but it is not known why it was built. Close to it stand 4 beautifully carved pillars, about 12 feet high, decorated with scroll work on all the sides. These are said to have once belonged to the sluice of a tank which is no longer in existence. At some distance to the town is a Lingāyat *matha* known as Gurrammanamatha, close to which is a *qaddige* or tomb of a Lingāyat *guru* named Sivalingasvāmī. To the south-east of the *matha* are some caves at the foot of Madhugiridurga, named Sādhu-gavi, Mēke-gavi, Pattāladammana-gavi and Siddhēsvara-gavi. An inscription was found at the third cave, which records a grant by the wife of the Madhugiri chief Chikkappa-Gauda.

Madhugiri-durga.

Madhugiri-durga —A bold fortified hill commanding the town of Madhugiri. The summit is 3,935 feet above the level of the sea.

This hill is one mass of rock strongly fortified. It has several *donēs* or springs, such as Naviladi-donē on the north slope, Bhīmana-donē on the south slope, Ittige-donē on the hill, Chandradonē higher up, and Navil-donē on the top. Several of these are stepped with bricks. Above Chandra-donē the ascent is very steep for some distance. It is said that the place of the Pālegār was situated near this *donē*. There are several gates leading to the top, such as the Antarālada-bāgilu, Diddi-bāgilu, etc. The Mysore gate is to the south. On the top is situated the Gōpāla-Krishna temple, which is now empty. Near it are the granary of *ragi* and the treasury. Grains of *ragi* are even

now available for examination. The treasury appears to have had rows of big pots hurried up to the neck close to the walls. There are likewise dome-like masonry structures with circular openings at the top for storing ghee and oil. Similar structures are also found lower down. They are called *kanajas* in Kaunada. The view from the top defies description. Any number of hills and tanks meet our gaze on every side, the hills looking like little mounds and the tanks like small pools of water. A risky descent of some distance on the almost perpendicular south slope of the hill takes us to Bhīmanā-donē. Here is a fine figure of Hanumān with an inscription to its left telling us that the figure was consecrated and the *donē* made by the Madhugiri chief Mummadi Chikkappa-Gauda in 1646. He is identified in inscriptions and literature with Bijjavara, a village about 3 miles to the east of Madhugiri, which was apparently his capital. A descendant of his is now living in poor circumstances at Samhuvanahalli, about 4 miles from Madhugiri. At some distance above the foot of the hill is a square basin with a small hole, on blowing into which a sound as of moving water is heard. This is probably a secret arrangement for the water-supply of the fortress. A stroke of lightning has split the mass of rock to a considerable distance causing a narrow crack all through. It has also thrown down the brick parapet in some places.

Mallekavu —A village in Koratagere sub taluk. Population 424. Mallekavu.

Close to this village flows a small stream known as Siddhabetada halla (the stream of the Siddhas hill). This hill, about three miles to the west of the village, is largely visited by pilgrims from the surrounding parts, especially on Tuesdays and Fridays. It has a cave temple enshrining a *linga* at the foot of which is a perennial spring in the form of a well, one yard square and four feet deep, which is said to be the source of the above mentioned stream.

Maralur —A village in Tumkur taluk. Population 388. Maralur.

The Rāmadēvaru temple at this place has for the object of worship a good stone panel, measuring 2' by 1½', sculptured with a horseman holding a spear in the uplifted right hand. In front of the horseman stand five female figures representing perhaps his wives, and behind him two male figures, probably his servants.

The semi-circular top of the panel is artistically executed with scroll work

Marule.

Marule.—A village in Chiknayakanhalli taluk

This place has some fine *māstikals*. In one of them the husband holds a sword in the right hand with the point turned towards the ground, the left hand being placed on the waist. His wife wears a crown surrounded by flames, her right hand with a lime on the palm hanging by the side and her left hand holding a mirror to the front. Another shows a well carved and richly ornamented couple, of whom the husband, adorned with an *uttariyam* or upper cloth, bears a sword under the right arm-pit, the hand being placed on the breast. The left hand hangs by the side. The wife has her right hand raised and open showing a lime on the palm, the left hand dangling with a mirror

Mayasandra

Mayasandra.—A village in Turuvekere Sub-Taluk
Population 1,165

It is one of the *Pancha-grāmas* or five villages or settlements in this part of the country of the Hebbār Sṛi-Vaishnavas. Kadaba in Gubbī Taluk is regarded as chief of these settlements, the others besides Mayasundara being Nuggihalli in Chennarayapattana taluk, Bindiganavale in Nagamangala taluk, and Nonavinkere in Tiptur taluk. About ten families of these Sṛi-Vaishnavas now live here. At the back of the Kollāpuradamma temple here are lying scattered mutilated figures of Ganapati, Nandi, etc.

Midagesi

Midagesi.—A town in the Madhugiri taluk, at the eastern base of the Midagesi-durga, 12 miles north of the *lasba*, on the Tumkur-Pavagada road. Head-quarters of the Midagesi *hobli*. Population 957

It is said to be named after a princess who was burned here with the corpse of her husband. (See below.) Rānī of the same family continued to govern it until conquered by Chikkappa Gauda, of whose family it remained the chief possession long after they had been deprived of Madhugiri and Channarayana-durga. In 1761 it was reduced by Haidar Ali, and six years later by the Mahrāttas, from whom it was

recovered by Tipu in 1774. During the invasion of Lord Cornwallis, a descendant of Chikkappa Gauda returned to the town but finding little that had escaped Mahratta capture, did not leave it until Kamr ud-din was approaching with a large force. Under the Muhammadan government, Midagegi was the residence of an Asūph, and afterwards the head-quarters of a taluk, which was finally incorporated with Madhugiri.

This place is said to have been so named by a local chief Nāgarēddi, after his wife Midagegi who was so called because her hair (*lāsa*) was so long that it touched her heel (*midi*). The Venkataramana temple which is similar in plan to the temple of the same name at Madhugiri is said to have been built by the chief Nāgarēddi. His palace was situated to the south of the temple, and an entrance in the south wall of the *prakāra* now closed is said to have been the gate through which the palace people went into the temple. A figure on this wall about 1½ feet high standing with folded hands is said to represent Nāgarēddi. There is also sculptured on the same wall a five-hooded snake about 5 feet long lying horizontally with a small figure of Krishna dancing on it. In the Garuda shrine in front of the temple is a square hole through which the rays of the rising sun are said to fall on the feet of the god. The *navaranga* entrance has at the sides two niches containing figures of Ganapati and Virabhadra. The *Garudagamba* is a fine pillar about 40 feet high decorated with scroll work on all the sides but unfortunately it has been broken in the middle by a stroke of lightning the upper portion lying below. The Mallēsvara temple is said to have been built by Vokkaligas of the Settenōru sect, the god being their tutelary deity. Tradition has it that a beautiful damsel of this sect named Chikka Mallamma was, during an attack by the Muhammadans, seized by them and confined in the fortress on the Midagegi hill and that on her prayer to God for her release the rock split and made way for her whereupon she descended the hill and entered fire in front of the god Mallēsvara. Her figure about 2 feet high, is sculptured on the rock to the right of the flight of steps leading to the top about the middle of the hill. It is in a walking posture holding a sword in the right hand and what looks like a lance in the left. The Vokkaligas referred to above were of three classes. Settenōru

Alpenōru and Gōnōru. A copper-plate inscription in the possession of the *pūjārī* of the Mallēsvara temple, of which only the last plate has been examined, mentions these classes of Vokkaligas and refers to the *agni-pravēsa* (entering fire) of the damsel. The god in the Jibi-Ānjanēya temple is a huge figure, about 9 feet high. The Midagesi hill is said to have been fortified by Nāgareddi mentioned above. Here also we have the usual granaries of ragi and paddy, dome-like structures for storing ghee and oil, powder magazines and *donēs*. Grains of old ragi can even now be had for examination, but the paddy-*kanaja* has only a quantity of husk. Two of the *donēs* are named Musare-donē and Kannerammanna-donē, the former situated on the top and the latter on the north slope. There is a fine mosque on the summit with two minarets at the sides and an ornamental parapet all round the roof. It has also flights of steps on both the sides. Close to the mosque stands a shrine dedicated to Hanumān. There are several gates leading to the top of the hill.

Muganaya-
kankote

Muganayakankote.—A town in the Gubbī taluk, 15 miles east of the kasba. Population 1,321.

It is strongly fortified with mud walls, and before the last incursion of the Mahrāttas contained a fine market, consisting of a wide street lined with cocoa-nut trees. A somewhat droll account is given of the Mahrātta attack on the place, which was repulsed by the inhabitants with the utmost gallantry. Parasu Rām Bhao while at Sira despatched, it is said, a force of 500 horse with 2,000 irregular foot and one gun to capture the fort. Its defence was undertaken by 500 peasants from the neighbourhood, who had two small guns and 100 match-locks, slings and stones being the only other weapons. The market was destroyed to prevent its giving shelter to the attacking party. The siege was maintained for two months, but though the Mahrāttas repeatedly fired their gun, they never once, says the local historian, succeeded in hitting the fort! Disheartened by their ill-success and the loss of two or three of their men, the enemy abandoned the siege and retired, not one of the defendants having been hurt.

Nagalapura.

Nagalapura—A village in the Turuvekere sub-taluk. Population 475.

At the entrance to this village is lying the slab on which E C 12, Tjstur 17 is carved. It has at the top these symbols—a discus a drum a dagger a gateway and a *śradika* the significance of which is not quite clear. The gateway is however found in several inscriptions of the Hoysala king Ballala III (1291-1342) in the Tumkur district and elsewhere, and the date of the present record is most probably 1336. As at Toruvekere there are also here two fine temples in the Hoysala structure dedicated to Vishnu and Śiva. They are similar in plan but mostly in ruins. The Chennakava temple which faces east consists of a *garbhagrha* a *sukhanasi* and *nararanga* and may have had a porch once. The *garbhagrha* and *sukhanasi* are each about 6 feet square and the *nararanga* about 20 feet square. The ceilings of the former are flat with a lotus in the centre and figures of the *Aśhtadikpala* or regents of the directions around. The door lintel of the *garbhagrha* had a figure of dancing Krishna with two hands. The original image Chennakēśava is not now forthcoming—we have instead a figure of Śrinivasa about 5 feet high. The *sukhanasi* doorway which is well carved has perforated screens at the sides and figures of Paravānudeva and dancing Krishna with four hands on the lintel and pediment respectively. It has also two niches at the sides which are now empty. The four pillars of the *nararanga* are elegantly carved with bead work the capitals too being finely sculptured. The sockets on the capitals bear evidence to the existence at one time of *maṇḍalās* or bracket figures but none is now left. At the corners on the abacus are figures of lions attacking elephants or *Yakṣi*. Of the ceilings of the *nararanga* 8 are about two feet deep with lotus buds and beautiful work around while the remaining one in front of the *sukhanasi* entrance is flat with 8 blown lotus. The outer walls have fallen down in parts and consequently many large images, torselets and portions of cornice and eaves are scattered around or holed. The walls have these friezes from the bottom—(1) elephants (2) horsemen (3) scroll work, (4) uncarved frieze intended for Purāṇic scenes, (5) *makaras* and (6) swans. Above these come in succession a row of large images a fine cornice a row of miniature turrets coming alternately over single or double pilasters, and eaves. Several of the large images are unfinished and many blocks are uncarved. Of the images that are now in position 32 are male and 35 female. Among the gods and goddesses represented are Viśṇu

in forms such as Paravāsudēva, Narasimha 3, Varaha, Lakshmī-nārāyana, Vēnugōpāla, Vithala, with hands holding bags placed on the waist, and Hayagrīva, with the attributes—a discus, a conch, a book and a rosary; Brahma, Garuda and Ganapati, Dakshināmūrti, Indra and Sachī, Lakshmi, Durga 2, Sarasvatī 2, Mōhini 2, Mahishāsūramardini; one of the Vishnu figures is seated with four hands, two of them holding a discus and a conch and the other two placed palm over palm in Yōgamudra or attitude of meditation, of the female figures, 28 are either attendants or *chauri*-bearers. The tower is completely gone. The other Hoysala temple in this village is Kēdarēsvara. It is similar in plan to the Chennakēsava temple, only it has the entrance on the south, though the *linga* faces east. Here too the walls have fallen down in parts along with the images, turrets, etc., and the tower too is gone. And the ceilings and the pillars here have the show of finer work than in the other temples. The *garbhagriha* and the *sukhanāsī* ceilings have Tāndavēsvara in the centre; the *sukhanāsī* doorway has Umā-mahēśvara on the lintel and the God Tāndavēsvara flanked by *makaras* on the pediment, and the fine niches on its sides contain figures, as usual, of Ganapati and Mahishāsūramardini; and the central ceiling of the *navaranga*, about five feet in diameter, is exquisitely carved and has a fine lotus bud, about two feet long, with figures carved around the lower end. Here too the *Madanakar* or bracket figures are missing. The *navaranga* has figures of Brahma, Nārāyana, Sūrya, with four hands—the upper holding lotuses and the lower being in the *varada* or (boon-conferring) and *abhaya* or (fear-removing) attitudes, Sarasvatī and Saptamātrikah, besides a good Nandi opposite the *linga*. The lower panels of the pillars and the inner walls have rude figures of some animals, etc., carved recently, there is likewise a roughly carved figure of Vēnugōpāla, on the wall opposite the entrance with a modern inscription which appears to state that the figure was carved by or under the direction of Sibi Narasimha-yōgi. The friezes on the outer walls are the same as those of the other temple. The name of the sculptor *Barchoja*, son of *Sigoja*, occurs in about 7 places in characters of the 13th century. It is very probable that he is identical with his name-sake who executed the images of the south wall of the Lakshminarasimha temple at Nuggihalli which was built in A D 1249. This peculiarity has not been so far observed in

any temple. It is worthy of notice that these labels are not incised as usual on the pedestals of the images, but on the turrets above them. Another peculiar feature noticed here is the representation on the outer walls of the regents of the directions with their consorts and vehicles in their proper positions. Of the images now found on the outer walls, 38 are male and 39 female. The gods and goddesses represented are Siva and his forms such as Gajāsūrāmardana, Tāṇḍavēśvara, Dakṣiṇāmūrti, Umāmahēśvara and Vṛṣabharudha. Brahma, Vishnu, Bhairava, 2 Bhṛngi, Gaṇapati, Subrahmanya, Garuḍa, Arjuna and Maṇmatha, Durgā, 2 Sārāvatī, 2 Mahiṣāsuramardini and Mōhini. Garuḍa is represented as bearing Kāśyapa and Kadru on the shoulder with a dagger in the right hand. Another peculiar sculpture consists of two monkeys holding a fruit between them endwise. Of the female figures 35 are either attendants or chauri bearers.

Nagehalli —A village in Koratagere Sub Taluk. Population 201. Nagehalli.

The temple of Mallappa to the north of this place known as Gntte-Mallappa is situated in a cave. To the west of it stands in the open a slab measuring $9 \times 6 \times 1$ carved with a fine figure of Hanuman called Bail Hanumanta. Two small monkeys at the sides are represented as eagerly eating some fruit.

Navilkurki —A village in Koratagere taluk.

Navilkurki.

To the north of this place is a fine *mūrtikal* containing figures of husband and wife standing side by side the latter holding a mirror in the left hand and a lime between the thumb and forefinger of the right hand. In some cases flames are shown as issuing from the head of the female figure, and the couple are represented as dancing as an indication of their joy after coming together in heaven.

Nidugal —Also called Nidugaldurga. A fortified hill in the Pavagada taluk, 14 miles west of the *kasba*, with a village of the same name on the south and east which was once a Nidugal.

prosperous city. Headquarters of the Nidugal *hōbli* Population 108

The lofty pointed peak of *Nidu-Gal*, literally the long or high stone or rock, rising to 3,722 feet above sea-level, is a conspicuous object throughout the north-east of the country, and it was at all times a formidable stronghold. In the ninth and tenth centuries it was held by the Nolamba kings, who were of the Pallava family, and whose capital was at Henjeru, now called Hēmāvati. Subsequently it was in possession of a line of kings of Chōla descent, prominent among whom was Irungola, acknowledging the supremacy of the Chālukyas, whose name occurs as one of the opponents of the Hoysala king Vishnuvardhana in the twelfth century. The Hoysalas appear to have finally captured the place in the time of Ballāla II. Under the Vijayanagar kings, a line of chiefs, whose progenitor was Tippa Rāja of Haratī, held Nidugal. In 1761 they submitted to Haider Ali on his conquest of Sira, and were finally ousted by Tipu, who took the last representative as a prisoner to Seringapatam, and put him to death when the British army ascended the Ghāts. A fuller account is contained in the history of the district.

A genealogy of the chiefs of Nidugal is given in *Pavugada* 54 of 1487, but a Holakal Bomma-Nāyaka appears ruling there much earlier, in 1337 (*Sira* 8). The genealogy begins with Abba-Nāyaka, whose son was Pāla-bhūpāla, whose son was Bomma-Nāyaka, whose son was Erabapa-Nāyaka, whose son, by Ammā-ambika, was Chikka-Tippanripa. Ruling the Nidugal hill-fort, the most inaccessible of the hill-forts of Karnāṭaka, he became the master of many hill-forts. Being guarded by the eight Durgis, the eight Bhairavas, the Ganapatis and the three gods, Nidugal could not, we are told, be subdued by Asvapati or Gajapati. The titles of the chief are—*Kathāri-rāya*, the champion who took the head of Mēsa (or Mēsana), *bhadra* (that is, *bahadūr*) *maluka*, subduer of the Hoysana army, splitter of the skull of Holakal Bomma, worshipper of the god Tīruvēngalanātha. He built a temple and made a tank in the name of his wife Lakshma-Dēvi. In 1515 we have a Jaka-Nāyaka (*Pavugada* 62). According to *Pavugada* 63 and 37, Timmanna or Timma-Nāyaka was the chief in 1560 to 1564.

The Haratī chiefs next held the Nidugal territory, with which they were invested by the Vijayanagar king Venkatapati-Rāya.

The list of places granted by him in 1640 is given in *Parugada* 46 which included Nidugal Dodderi, Hiriyur, etc. In about 1680, there was Rangappa Nāyaka. (*Sira* 53) In 1605 Siddana Nāyaka. (*Sira* 61) In 1607 Immedi Kenchappa Nāyaka (*Sira* 1) In 1612 Immedi Rangappa Nāyaka & son Hungahati Nāyaka. (*Sira* 81) In 1621 they assume the title of *Raja* and we have Sarāja Krishnappa Rājā & grandson Rangappa Rājā & son Kastūri Rangappa Rājā. (*Sira* 64) In 1626 was a third nr Mummadi Rangappa Nāyaka. (*Sira* 54)

Parugada 42 and 46 of 1643 and 1670 give the following genealogy —Tippa Rāja whose son was Kamaya whose son was Bmma whose son was Ādisurandra whose son was Hiri yodeya whose son was Chikka nripa whose son was Hotte-nripa whose son was Nandi bbūpa whose son was Hotte-nripa, whose son was Timma hhūpa whose son was Hnttendra whose son, by Chinna māmbe was Hotte-nripa whose son by Chikka māmbe was Timma nripa. Considering the Kālanjana hill (Nidugal) the best in the world the Kālahasti *linga* it is added came and rested on its summit and appearing to Harati Tim mendra instructed him in all wisdom. He therefore resolved to rebuild the temple of the *linga* set up by Rāmebbhadra which was old. Accordingly consulting with trusty men he summoned with haste five sculptors, and having plans drawn ordered the architects to carry them out at once giving them dresses of honour and betel leaf. In the *antarāla* (or interior) they erected a beautiful *ranga mantapa* and made a fine *chandra-sāla* nr gallery according to the Timmendra's directions. And in accordance with the rules, they erected a stone pillar and set up a spire nr tower also the *sāsana* which gives all this information in which are repeated his titles with some additions. These include the titles of the preceding Nidugal chiefs. But he especially calls himself Timma Vajir that is, the Arabic vazir a vazir or prime minister. In this relation he apparently claims to stand to the Vijayanagar king Sriranga Rājya. A list is given of the territories originally conferred on the family and of the names of his father and mother and his own nine wives. *Parugada* 59 of 1681 is a somewhat similar record of Hotte-nripa and *Parugada* 60 of 1705 winds up with the statement that a *nirūpa* granted by Mummadi Hnttenna Nāyaka in 1680 in connection with the building of a fort having been lost a copy was granted on copper.

Nidugal

Nidugal—A village in Pavagada taluk.

This place, once a prosperous city, is now a small unhealthy village containing about half a dozen houses. There is also a larger village of the same name on the first elevation of the adjacent Nidugal hill.

There are numerous temples both at the foot and on the hill, but most of them are in ruins. Of those at the foot, which seem to be comparatively modern, the Saravadēsvara temple, also called the Hottēsvara after the Haratī chief Hottēna-Nāyaka, was built in 1681 (*Pavugada* 59). The god is named Saravadēsvara after Saravad, a village in the Bijāpur country, which is said to be the birthplace of the progenitor of the Haratī family. The Rāma temple has a boulder carved with the figures of Rāma, Sita, Lakshmana and Sugrīva, with Hanumān and Garuda at the sides. To the right of this composition on the same boulder is a big figure of Hanumān, and to the left a figure of Mahishāsūramardinī. The Kāsivisvēsvara temple is a small neat structure with three cells in a line and a common *navaranga*. The central cell has a *linga*, the right cell Ganapatī and the left Pārvatī. The last is a seated figure, about 1½ feet high, holding a ladle horizontally with both the hands. Such a figure of Pārvatī is known as Annapūrṇa. On the back wall of the Ganapatī cell is carved a *linga* worshipped by an elephant on the right and by Vyāghrapāda on the left. To the left in the Ānjanēya temple stands a *rishi* or sage bearing a rosary in the right hand which rests in the fear-removing (*abhaya*) pose on a staff and holding what looks like a book in the left. The village has also a *labar* or tomb, said to be of Mirza Husēni Valī who came from Hyderabad, in honour of which a *jātre* or *urs* is held every year. A new record was copied at the village.

This hill has two or three distinct elevations. But the ascent is very steep and difficult, there being no steps at all to help the climber. It takes nearly an hour and a half to reach the top, that is, without any stoppages on the way. But when once there, you forget all your fatigue and enjoy one of the grandest views of the surrounding landscape. You see any number of hills and lakes as far as the eyes can reach. The inscription *Pavugada* 52, of 1232, says that the hill was named Nidugal (lofty rock) because it touched the skies with its formidable peak, and *Pavugada* 54 of 1487 tells us that it was the

most impregnable of all the hill fortresses in the Karnatak country. It is also called Kālanjana in the inscriptions. There are several lines of fortifications known as Kalāsvara kōṭe Bhairavana kōṭe Arc-kōṭe, Nūgarasvara kōṭe etc. and a number of gates known as Maṭannuru baḡilu Singārada baḡilu Sūmalayana-diddi and so on. The hill has likewise the usual granaries, powder magazines, *donḡa* palace ruins, etc. On the top the chief Hottenna Nayaka built a small Basava shrine in 1653 (*Pavugada* 42) and had an inscription engraved. The shrine is now in ruins. A new inscription was discovered on the pillar in front of it. By the side of the shrine is an iron lamp with a shaft about 6 feet high fixed on the rock which is lighted once a year or oftener by the people of the surrounding villages in fulfilment of their vows. A little lower down is the Kalahastisvara temple which according to *Pavugada* 46 had its *linga* set up by Rama and was renovated by the Harati chief Timmanna Nāyaka in 1670. This seems to be at some distance where are lying three pieces of old cannon one of which about 18 feet long is known *Flu-makkala-tayi* or "the mother of seven children". The palace has only a few walls now left. A portion scooped out at the top of a huge boulder with holes for steps is said to have served as a seat for the chief during *darbārs*. The palace garden has a pair of ornamental black stone pillars known as *Barikallu* or "well stones" with holes for the cross bar surmounted by figures of bulls and curved at the top. There is also a dark underground cell (*nelamūlige*) attached to a boulder. The ruined Nāgēsvara temple near a pond known as Hokkarane is a Hoysala building which according to *Pavugada* 53 of about 1150 was founded during the reign of the Chālukya king Jagadekamalla II. The *navaranga* has 5 niches on both sides as also figures of Śnbrahmanya and Sūrya, a beautifully carved but headless female figure and a fine Nāgakanyaka with a female figure at the side. The Nāgēsvara appears to be the oldest of the existing temples on the hill though mention is made of a temple founded by Budihōtarasa of the Pallava family in an inscription of the 8th century (*Pavugada* 45) built into the left wall of the porch of the Kalahastisvara temple. There is an underground canal supplying water to the Hokkarane mentioned above. The god of the Chennakēsava temple has been removed and set up in a new temple at the village Bellibattalu. Near this temple is a small shrine containing an elegantly carved

seated figure, about three feet high, of Bhairava, with ten hands. There is also a buried Siva temple here of good workmanship. The ruined Lakshmanēśvara temple at the Matanūru gate was built in 1487 (*Pavugada* 54) by the Harati chief Chika-Tippa-Nāyaka in memory of his deceased wife Lakshmidēvi. *Pavugada* 54 also tells us that there were shrines of Durga, Bhairava and Ganapati in each of the eight directions on the hill. The above-mentioned Bhairava shrine may be one of these. At the village on the first elevation is a temple of Durga and a small shrine surmounted by a tower known as Rangadhāmana-mantapa which is now empty. Two modern inscriptions on bells were copied at the Durga temple. Two more "well stones," similar to those noticed in the palace garden, are also to be found near the village. At some distance from the village are the Virabhadra, Pārsvanātha, Ādinārāyana, Lakshminarasimha, Nāgarēsvara, Male-Mallikārjuna and Sōmēsvara temples scattered in different directions. In the Virabhadra temple the god, about five feet high, is a two-armed figure holding a sword and a shield. The Pārsvanātha-basti probably came into existence in 1232 according to *Pavugada* 52 in which it is named Jogavattigea-basadi. The god, about five feet high, faces east, while his Yakshi, Padmāvati, a seated figure, about two feet high, is enshrined in a cell facing south. There is also a figure of Brahma on horseback, which was once over the pillar in front. Two inscriptions were found on the pedestals of images, as also two modern ones on a bell and a gong. Ādinārāyana is a good figure, about five feet high. In the *navaranga* of the Lakshminarasimha temple are kept a figure of Sūrya and a panel depicting the coronation of Rāma. On both sides of the outer entrance are cells containing big figures of Hanumān. The Nāgarēsvara temple has two cells enshrining *lingas* named Nāgarēsvara and Gaurīsvara, and the *navaranga* has figures of Vishnu, Mahishāsūramardini and Saptamātrikah together with a few well-carved Nāgakanyakas. The inscriptions *Pavugada* 47-50, which are wrongly stated in the Tumkur Volume of the *Epigraphia Carnatica* to be in the Kālahastīsvara temple, are here. This temple goes back to 1248 (*Pavugada* 50). There are two *vīragals* in the *prākāra* of the temple. The Sōmēsvara temple, probably founded in 1292 (*Pavugada* 53), seems to be the finest Dravidian structure on the hill. It has an elegantly carved *navaranga* doorway of black stone with jambs consisting of four fascias—the innermost adorned

with scroll work the next with figures in every convolution of the scroll the third carved into an ornamental pilaster and the last sculptured with spirited lions and *yōlis* in all postures. The pediment has Tāṇḍavāsvara with attendant musicians, the lintel Gajalakṣmī and the bottom of the jambs *dvarapālakas* or door keepers and female figures holding a lotus and a *kalasa* or water vessel. The *sukhanasī* doorway is also of black stone, but plain. The *navaranga* has besides Maheśhāsuramardini two seated female figures, about 1½ feet high one holding a child in the left hand and a fruit in the right the other holding a fruit in the left hand and some indistinct object (? a short staff) in the right. It is not clear what these two figures are intended to represent. Recently two new inscriptions have been discovered at this temple.

Nittur—A village in Gubbi taluk. Population 1 182 Nittur

This appears to have been a place of great importance at one time. In *E O XIII Gubbi* 11 of 1226 it is called the southern Ayyavale (Aihole) the navel of the Gangavadi Ninety six thousand and the crest-jewel of the Heruṇa-nādu. The Santisvara basti at the village is a Hoysala structure of about the middle of the 12th century, consisting of a *garbhagriha* a *sukhanasī* a *navaranga* and a *mukha mantapa*. The *navaranga*, supported by black stone pillars has nine beautifully carved ceilings, about 2½ feet deep with projecting circular panels sculptured with the figures of the *aṣṭa-dīpālakas*. The beams too are sculptured with ornamental work. The elegantly carved *navaranga* doorway has five *śaṅkas* in each architrave and bears an inscription on the lintel giving the name of the artist who prepared the doorway. The *garbhagriha* which contains the original figure being in a dilapidated condition, a new figure has recently been set up in the *sukhanasī*. A cell to the left in the *mukha mantapa* has a figure of Padmāvatī. The outer walls which are here and there supported by props are decorated with single or double pilasters surmounted by well-carved turrets. There are also intervening Jina figures, either seated or standing, but most of them are mutilated or chiselled out, a few being unfinished. On the north and south outer walls of the *navaranga* are two fine but empty niches with female figures at the sides. There are several *nishidhis* or epitaphs

around the *basti* with the figures of the dead carved at the top. Two new inscriptions at this place have been recently copied by the Archaeological Department here. A few palm leaf manuscripts in the possession of the *archaka* of the *basti* contain some unpublished Jaina works in Sanskrit and Kannada. The temple of Māriyamma, the village goddess, has an ant-hill for the object of worship, and a box-like pavilion with painted wooden figures serves the purpose of a processional image. On this box is kept a painted wooden head, known as Sāma, which a particular individual puts on and dances during the annual festival.

Nonavinkere

Nonavinkere.—A village in Tiptur taluk. Population 1,552

This place is one of the *pancha-grāmas* or five settlements of the Hebbār Śrīvaiṣṇavas, the others being Kadaba, Mayasandra, Nuggihalli and Bindiganavale. The Bēterāya temple here is a large Dravidian structure enshrining a fine figure, about 4½ feet high, of Śrīnivāsa. The god is said to have been set up by Prasanna-Kōṇēriayyāṅār, whose figure, wearing a beard and a cap, stands with folded hands on a pillar of the *navaranga*. He was a great devotee of the god Śrīnivāsa of Tirupati and used to go on pilgrimage to that holy place every year. When he was unable to undertake the annual trip owing to old age, the god appeared to him in the guise of a Vaiṣṇava mendicant and disappeared after telling him that he would take up his abode in that village. The managers of the temple and the *archaka* are said to be his lineal descendants. The processional image is a very handsome figure. There are also stone and metallic figures of some Ālvārs and sages. The Gōpālakrishna temple, said to be older than the Bēterāya, is also a Dravidian building with three cells, the main cell having Kēśava, the north cell Yōga-Narasimha and the south Vēnugōpāla. The last is an elegantly carved figure standing under a *honne* tree flanked by consorts with figures of cows, etc., at the sides. The temple is named after this deity. This building has to be looked upon as an instance of a *trikūṭāchala* in the Dravidian style, this feature being very common in Hoysala structures. Here too the processional image is a very handsome figure. Two modern inscriptions were copied here. According to the *Sthala-purāna*, the place was once a jungle, and the

presence of the image of Gōṣulakṛishṇa which had been buried under an ant hill was revealed by a cow dropping milk on the spot every day. There are also five Siva temples in the village—the Santēśvara the Nenabēśvara the Chandēśvara the Kalkēśvara and the Gaurīśvara. In the south of the compound of the Nenabēśvara temple are lying mutilated figures of Durgā Bhairava and Saptamatrikā and Nandi. The village goddess, named Ubāṣilamma is a seated stucco figure with the usual attributes, namely a trident a drum a sword and a cup. No victims are sacrificed to her. On the occasion of the annual festival she is worshipped by a Brahman. In a small shrine on the tank bund is the goddess Gellamma a standing figure about 3 feet high with 4 hands, the upper holding lotuses, the right lower in the *abhaya* attitude and the left lower placed on the waist. A small four pillared *mantapa* is pointed out as the *goddess* or tomb of the last Palegar of the place. His palace is said to have once stood on the site opposite to the tomb and his pleasure garden behind it.

Northern Pinakini—The *Uttara Pinākini* or Northern Pennar has a course of only a few miles through the extreme north-east corner of the District in Pavugada taluk. For a fuller account of the river, see *Kolar District*. Northern Pinākini.

Oderhalli—A village in Chiknavakanhalli taluk. Popula Oderhalli
tion 73

The Santamallappa temple at this place has in front a fine lamp-pillar about 2 feet square at the bottom and 40 feet high with a lamp in the form of a stone cup on the top. The pillar has on the east face a *linga* on the south the three-legged Bhṛngī bearing a *vina* or lute and dancing on the west Vyāgrā pada with a censer in the right hand and a bell in the left and on the north Nandi. Near the temple are the *samādhis* or tombs of the Lingayat *swamis* of the Kallu matha at Settikere.

To the north west of this place is an important temple situated on an eminence dedicated to Henjērappa. Henjērappa is a form of Bhairava worshipped at Henjēru or Hemāvati in the Madakura taluk of the Anantapur district, and it is not clear why the god at this place is known by this name. As far as enquiries go there are no other places in Mysore where Bhairava is so named. The god of the Henjērappa temple

at this village is a well-carved figure, about 3 feet high, with *prabha* or glory, seated in *lalitāsana* with the right leg dangling, bearing a trident, a drum, a sword and a skull and wearing sandals and a necklace of skulls His emblem, the scorpion, is shown on the pedestal To the right in the *navaranga* is another seated figure, about 2 feet high, of Bhairava, which is known as *Chēlu* (scorpion) Bhairava, and woe to him who offends the god his house will be full of scorpions in every direction The *sukhanasi* has to the right a *linga* known as Siddharāmēsvara set up on an embankment which is said to have been the seat of penance of the Virasaiva teacher Siddharāma The temple is said to have been built or renovated by a Hagalvādi chief It has also a Bilvayriksha-vāhana Two modern inscriptions were found on bells Behind the temple are two mud platforms enclosing the roots of a country fig-tree and a banyan tree, which are worshipped as Attamaradamma (goddess of the fig tree) and Āladamaradamma (goddess of the banyan tree)

Pankajan-
halli

Pankajanhalli —A village in Chiknayakanhalli taluk. Population 83.

The Mallikārjuna temple at this place, vulgarly known as Kangasanhalli, is a fine Dravidian structure of large proportions, consisting of a *garbhagriha*, a *sukhanasi*, a *pradakshina*, a *navaranga*, a porch, a *pātālankana* or hall on a lower level, a Nandi-Mantapa with a tower, a *mahādvāra* and a *prākāra* It faces east and has an open veranda attached to it all round The *linga* in it is a conglomeration of pebbles said to represent 101 *lingas* Near it are two metallic images of Umāmahēsvara, one larger than the other In the *pradakshina* are kept figures of Vishnu, Bhairava and Ganapati, as also another nude figure of Bhairava which is wrongly supposed by the villagers to represent a Jina The *mahādvāra*, about 12 feet high, is a good piece of work, the pillars and doorways being well executed To the right of the inner doorway, *i e*, the one facing the temple, is a figure of Siva and a figure of Sūrya flanked by female figures holding a lotus in the left hand; and to the left, a figure of Siva, a female figure with the right hand raised holding what looks like a fruit in the palm and the left hand dangling pecked by a parrot, and a smaller female figure with a similar right hand but with the left hand placed on the waist The meaning of these figures is not clear The outer doorway has at its sides

Ganapati and Bhairava. On both sides of the two doorways are pairs of well carved elephants, some facing each other with their trunks intertwined. In a line with these the north and south walls also have four elephants each. Among the sculptures on the pillars may be mentioned Kannappa armed with a bow piercing his eye with an arrow and kicking a *linga* canopied by a three-hooded snake. Sakti-Ganapati i.e. Ganapati with his consort seated on the thigh and a tall *linga* representing the form of Siva known as *Lingodbhavamūrti* with a boar (Vishnu) at the bottom and a swan (Brahma) at the top. There is a fine lamp-pillar in front about 2 feet square at the bottom and 40 feet high with a pavilion at the top. To the left of the temple is the shrine of the goddess a pretty large building with a prostrating figure about 5 feet long in the middle of the *pātālankana*. The goddess about 4 feet high is a standing figure with four hands, the upper holding a noose and an elephant goad the lower being in the fear removing (*abhaya*) and boon conferring (*varada*) attitudes. The Virabhadra temple to the south has a figure about 5 feet high of that god with six hands the attributes being a sword a shield a trident a drum a bow and an arrow. Bhadrakali to the left has a lotus for her attribute. To the north of the temple is a large pond with a small neat *mantapa* in the centre. The Ranganātha temple has a standing figure, about 3 feet high, of Vishnu flanked by consorts and two figures of Ālvars in the *sukhanasi*, but the *pūjāra* is a *Lāṅgāyat*. Near it is a shrine with a huge figure, about 8 feet high of Hanumān. Two new inscriptions were found at the village, as also two modern ones on the temple vessels.

Pavagada.—A taluk in the most north northeasterly projection of the State. Area 523·55 square miles. Head quarters at Pavagada. Contains the following *hoblis* villages and population —

Hoblis	Villages	Hamlets	Villages classified				Population
			Govt.	Sarvamanya	Jodi	Khayamgutta	
Hoskote	33	5	32			1	14,298
Mugadabetta	23	20	23				11,583
Nagalmadike	30	11	30				14,155
Nidugai	33	26	32	1			10,774
Pavagada	26	31	23		2		14,719
Total	145	83	140	2	2	1	65,529

Principal
places with
population.

Gummagatta 1,370; Pavagada 2,529; Venkatapura 1,164, Kannamēdu 1,092; Byadanur 1,422; Mangalavada 1,133, Arasikere 1,115; Sasalakunte 1,071, Hoskote 2,228; Kyataganacherlu 1,093; Kamanadurga 1,046, Racharlu 1,030, Ryappa 1,333; Volluru 1,094.

This taluk till 1886 was attached to the Chitaldrug district. It represents a very irregular and tortuous oblong 20 miles east to west. It would be fairly compact but for two spurs, one in the extreme north-east and the other in the south-east. The large number of hills covered with scant vegetation forming part of the Tumkur-Pavagada-Molakalmuru granite range, and lying to the south, south-east, west and north of the region round about Pavagada, also the range of hills between the north-east spur and the Dharmavaram taluk, form the chief physical characteristics here. Pavagada and Nidagal are the prominent fortified hills in this taluk. The formation of these hills mostly consisting of boulders of all sizes, almost devoid of vegetation, gives to the hills in the central and southern portions of the taluk a wild beauty of their own. Many of the hills look as if "this had been thrown up in the throes and convulsions of nature which accompanied the birth of this land."

Nearly three-fourths of the taluk is in the basin of the Uttara Pinākini or Northern Pennār and the drainage of about one-fourth in the extreme west finds its way into the Hagary or the Vēdāvati.

The whole taluk is diversified with picturesque valleys in the south-west and north, where conditions for tree growth are favourable. The cocoa-nut, areca-nut and other gardens are found chiefly in the south-west valleys.

The revenue settlement was introduced in 1872 and the revision settlement from 1909-10. The areas of the different descriptions of land according to the revision survey are as follows —

Arable dry crop	2,09,468 acres
Rice or wet land .	..	8,597 „
Garden land	10,751 „
Unarable land	91,605 „

The average rainfall for 20 years (1903-1921) was as follows in inches —

1. January	0.10	7. July	2.5
2. February	0.42	8. August	2.0
3. March	0.33	9. September	4.41
4. April	0.57	10. October	3.33
5. May	1	11. November	2.5
6. June	1.2	12. December	0.14

The chief road is one from Madhugiri through Madakaira to Pavagada and the north. There is also a road from Pavagada east through Rodda to the railway at Penugonda, and one west to Chellakere. A road from Madakaira to Penugonda also crosses the south-east of the taluk. The old Bangalore-Bellary road ran through Racharlu. Communi-
cation

Pavagada — A town situated in $14^{\circ} 16' N$ lat., $77^{\circ} 21' E$ long, at the southern base of the hill so named 60 miles north of Tumkur, on the road from Madhugiri and 19 miles west of the railway at Penugonda. Headquarters of the taluk and a municipality. Pavagada

Total	1,276	1,253	2,529

Pavagada or *Pāmu-Gonda*, snake hill, is said to have been so named from a remarkable stone that was discovered there, with the figure of a snake upon it.

The place was the haunt of a body of freebooters, who subsisted by plundering the neighbouring country when it was

captured by Balappa Nayak, the founder of the Pavagada line of Pālegārs. He was one of three brothers of the Yerra Golla caste, who, about 1585, coming from Gutti, entered into the service of Hayali Bura Gauda, Pālegār of Chik-Ballapur (Kolar district). This chief, having no children, adopted Balappa Nāyak, and when summoned to aid the king at Penugonda in an attack upon Gutti, sent him in command of the contingent. Balappa Nāyak, from his local knowledge, was enabled to surprise Gutti, and was rewarded with a grant of Pallavola and other villages. It was after obtaining this estate that he seized Pavagada and fortified the hill. At a later period, a conflagration broke out at Penugonda, owing to a powder magazine being struck by lightning. Venkatapati Rāya was absent at the time, but Balappa Nāyak, hastening to the place, extinguished the spreading flames, for which service he was invested with the title of *Pālegār*, and received a large accession of territory. This—with occasional losses from attacks by the Pālegārs of Rithigiri, Nidugudi and Raydurga, and the Mahrāttas—his descendants continued to govern until the place was taken by the forces of Haidar Ali, when the chief, Timmappa Nāyak, and his family, were sent as prisoners to Madhugiri. In 1777, when engaged in operations against Chitaldrug, Haidar visited Pavagada and ordered the erection of the present fortifications. The Pālegār of Racharlu was at the same time made prisoner and sent to Penugonda, his territory being annexed to Pavagada. When Madhugiri was taken by the Mahrāttas, cooperating with Lord Cornwallis against Seringapatam, Timmappa Nāyak obtained release, and took possession again of Pavagada, but on the conclusion of peace, could not keep the place against Tipu.

The hill of Pavagada rises to 3,026 feet above the level of the sea.

Both the town of Pavagada and the hill near it are beautifully fortified.

The hill is not one mass of rock like those at Madhugiri and Midigesi, but is made up in the higher portion of a number of gigantic boulders, some of them being nearly 100 feet high. There are ten gates leading to the top. At some distance from the foot is the Kammaramantapa, higher up, Bettada (or the

hill) Anjaneya a good figure about 7 feet high with a well carved *uttariyam* or upper cloth and a little monkey seated to the left eating something further up a circular *don* called *Koneri* and a *mantapa* known as *Konerimantapa* near which stands a dome-like structure for storing ghee (*tuppada kanayi*). Going further we see a rock with some small holes which are believed to be the hoof marks of a horse which leapt from the top. Near by is a well now closed from which water is said to have been drawn to the top of a *honder* about 80 feet high. On the top is the Sultan *batteri* (battery) occupying the highest point and to its west *Suhbarava's batteri*. Besides the one already mentioned the hill has several more *don*s known as *Akkaminana-don*, *Bahavanasakere*, *Ilimana-don* and so forth. The last is a fine reservoir with clear and deep water situated between two huge boulders. We have to descend some 70 steps to reach the water. This *don* is said to be connected with another at the foot of the hill known as *Kelagaver don*. A square slab containing a defaced Persian inscription which was fitted into a cavity in the boulder to the right is now kept in the Archaeological Office. A spot is shown on the hill where from undesirables were once hurled down to the bottom of the precipice. We have here also the usual granaries of ragi paddy and powder magazines. The summit has an incomplete mosque which is said to have been built with the materials of a Gōpālakrishna temple which once stood there. A Persian inscription is to be seen here. There is a small shrine at the foot of the hill called the Gōpālakrishna in which the metallic image of the Gōpālakrishna temple used to be kept when that temple was on the hill. We have now a Gopala krishna temple in the town itself. From an inscription newly discovered on the hill we learn that the fortress was built in 1405 by Gōpanna a general under the Vijayanagar king Dēva Rāya.

Rampura

Rampura.—A village in Koratagere sub-taluk. Population 1,541.

The Venkataramana temple at this place is a large Dravidian structure with a *gōpura* and *prākāra* which present some features of the Saracenic style. It is said to have been renovated during Haidar's time. To the left of the outer entrance is sculptured a standing male figure, about $1\frac{1}{2}$ feet high, wearing a cloak and leaning on a staff, resembling the Kempe-Gauda figures noticed at Magadi and other places. The god is known as Kari-Timmappa. There is likewise a figure of Paravāsudēva kept in the *navaranga* as also figures of Vishvaksēna, Rāmānujāchārya and Nammālvār. The pedestal of Anantanātha in the Anantanāthabasti at the village bears an inscription of three lines. The *basti* does not appear to be an old one.

Ranga-samudra

Rangasamudra.—A village in Pavagada taluk. Population 620.

Near this place was noticed a big heap of *moras* or winnows below a tree, and on enquiry we were told that these were the offerings of the village to the goddess Moramma (the goddess of winnows) who was being carried from village to village, and that they had to be removed to the next village along with the goddess. The village has a small elegant shrine surmounted by a tower, which is called Mallēsvara's *mantapa*, though there is nothing inside.

Sampige

Sampige.—A village in the Gubbi taluk, four miles west of Kadaba. Population 871.

It is stated to be the site of Champakanagara, the capital of Sudhanva, of whom an account is given in the *Jaimini Bhārata*.

Settikere

Settikere.—A village in Chiknayakanhalli taluk. Population 1,718.

The Yōga-Mādhava temple at this place which faces east is a *trīkūtāchala* or three-celled Hoysala structure, with a stone tower over the main cell. It consists of three cells, a common *navaranga* and a porch, the main cell alone having a *sukhanasi*. Latterly, however, a *mukha-mantapa* or front hall in the Dravidian style has been built with the materials of a ruined Siva temple.

now submerged on the tank. The goddess of this Śiva temple a good four armed figure about 3 feet high is now kept in a cell to the right in the front hall. The *sukhanasī* doorway and that of the *nataranga* and its pillars are well executed. The ceilings, about 2 feet deep are 14 in number 3 in the 3 cells, one each in the *sukhanasī* and porch and 9 in the *nataranga* and all have lotus buds surrounded by rows of petals. The oar in front of the north cell shows crossbars and that of the porch painted petals. At the sides of the *sukhanasī* entrance are beautifully carved figures of Ganapati and Mahāśarasvatinī. The god in the main cell known as Yōga Mādhyama is a seated figure about 5 feet high with *prabhāvalī* or glory with 4 hands, the upper ones bearing a discus and a conch, the lower placed palms over palm exactly like those of a Jaina Tīrthankara without the *dhyānamudra* or meditative pose usually noticed in representations of this deity. Such a figure does not seem to be found elsewhere. The north cell has Lakshminarayana and the south Venugopāla both about 5 feet high. The latter stands under a *koṇṇa* tree flanked by consorts. There are also as usual cows, cowherds, cowherdesses and sages sculptured at the sides. All the three images are well executed and their *prabhāvalis* sculptured but only pilasters and miniature turrets. From the inscription in the *nataranga* (*Chakrāyānākhali* 2) we learn that the temple was built in 1201 by Gōpala-dandanāyaka during the reign of the Hoysala king Narasimha III. It names the village Bharataprakāśapura and the god Yōganātha. At the top of the śālā is a small figure of Yōga Mādhyama resembling the image in the main cell. The temple, which is in a state of disrepair deserves conservation. The roof has to be water-proofed and some arrangement made to let in light to the dark interior. Of a metallic figure found here and acquired for the Archaeological office, Mr Narasimhaachar the late Director writes — Krishna machārya the *orchaka* of the temple presented to my office a metallic figure about 9½ feet high of a warrior armed with a sword and shield which he said he had picked up on the road from Birur to Kadar about 2 years ago. The image attracted my particular attention because I had noticed similar stone figures about 1½ feet high in a shrine at the entrance to the village. The present figure may be looked upon as the processional image of that shrine though it is not clear what these figures are intended to represent. The Ranganātha temple which is said to be older than the Yōga Mādhyama, has a standing figure about

3 feet high, of Vishnu, holding a discus and a conch in the upper hands and a bow and an arrow in the lower ones. A similar figure found at Chennagiri is called *Bête* (or hunting) Ranganātha. There are two goddesses named Sṛīdēvi and Bhūdēvi, both in *lalitāsana*, in two cells at the sides of the *garbhagriha*.

Sibi

Sibi—A village in the Tumkur taluk, 15 miles north of Tumkur, on the Tumkur-Chitaldrug road. Population 778

It is remarkable only for the temple of Narasimha, at which there is a great annual festival in the month of *Māgha*, attended by about 10,000 people. The origin of the temple is thus related—In the days when there were no roads and the place was covered with jungle, a certain merchant carrying grain on pack bullocks halted at Sibi. But when his pot of rice was set on to boil on a small projecting rock, its contents turned to the colour of blood and he with his attendants and bullocks fell down in a swoon. While in this unconscious state Narasimha appeared to him in a vision and revealing that the stone was his abode, commanded the merchant to build a temple over it in atonement for the desecration committed.

The small temple then erected was replaced by the present large building during this century under the following circumstances—Three brothers living at Tumkur, who had enriched themselves by farming the revenue of the district in the days of Tipu, subsequently sought to atone for their oppressions by works of charity. To Nallappa, the eldest, Narasimha in a vision offered eternal happiness on condition of his building and endowing the temple at Sibi. This was accordingly accomplished in ten years by the three brothers. It is an ordinary structure, surrounded by a high stone wall. The approach is lined on either side with mean stone sheds for the accommodation of visitors to the annual festival.

Shimsha

Shimsha—An affluent of the Cauvery, also called the Shimshupa, the Kadamba and the Kadaba-kola. It rises to the south of Devaraydurga and flowing south-west through the Gubbī taluk, forms the large Kadaba tank. Thence running south-wards, it unites near Kallur with the Naga, which feeds the Turuvekere tank, and further on, in

the Kunigal taluk with the Nagini from the Kunigal tank. Afterwards, turning east, it skirts the hills west of Huliyūr durga and pursues a southerly course into the Mandya taluk of the Mysore district.

Siddapura—A village a mile north west of Madhugiri. Siddapura. Population 937.

Has a fort which, according to an inscription at the village (*Maddagiri* 21) was built in 1593 by the *mahā-nadu-prabhu* Chikkappa Gauda of Bijjavara during the reign of the Vijaya nagar king Venkatapati Raya I. The village has a well built Lingavat *matha* known as Balaradhiyara *matha*. Balaradhiya was probably the *guru* of Chikkappa-Gauda.

Sira.—A taluk in the north. Area 599.33 square miles. Sira. Head-quarters at Sira. Contains the following hoblis, villages and population.—

Hoblie	Villages	Pechiracks	Villages included				Population

The taluk was transferred to this District from Chitaldrug in 1866. It is at a considerably lower level than the rest of the District. It is crossed from east to west by a stream which flows into the Vēdavati, and whose course is marked

by cocoa-nut gardens. The tracts adjoining Madaksira are fertile and well watered. The soil in other parts is mostly rocky and hard. Along the west there is a good deal of jungle, from Bukkapatna northwards.

The revenue settlement was introduced in 1870 and the resettlement in 1910-11. The total revenue demand for 1922-23 was Rs 1,69,312-14-1 and for 1923-24 was Rs 1,66,160-8-6

The average rainfall in the taluk gauged at the several stations is shown below —

		In inches
1	Sira ..	16.76
2	Bukkapatna ..	19 50
3	Kallambella .	17 57
4	Baragur	13 17

Sira

Sira.—A town situated in 13° 44' N lat , 76° 58' E long , 33 miles north-north-west of Tumkur, on the Tumkur-Chitaldrug road Headquarters of the Sira taluk, and a municipality.

Population in 1921	Males	Females	Total
Hindus	1,831	1,734	3,565
Mahomedans .	992	1,036	2,028
Christians . . .	1	2	3
Total	2,824	2,772	5,596

The foundation of the town and fort is attributed to Rangappa-Nāyak, the chief of Ratnagiri, the selection of the site being due, as is commonly related of other forts in the country, to the turning of a hare upon the hounds while in pursuit—an indication of heroic soil. Before the fort was completed, Sira and its dependencies were conquered by Ran-dulha Khān, general of the Bijapur state. Mālīk Husein, then appointed governor, completed the fort and enclosed the town with mud walls. Mālīk Rihān was Subadār from 1638 to 1650.

The capture of Bijapur by Aurangzib in 1687 was speedily followed by the conquest of the Karnātic districts dependent

as it Siru was made the capital of the new province south of the Tangabhadra — composed of the seven *parganas* of Basavapatna, Budihal, Siru, Penukonda, Dod Ballapur Hoskote, and Kolar, with Harpanahalli Kandarpi Anegundi Bedaur Chitaldrug, and Mysore as tributary states. Khasim Khan was appointed as the first governor under the designation apparently of *Faujdar Dimu* a title however which was often altered according to circumstances. He introduced the Muhammadan revenue system, elsewhere described and governed with ability until 1698, when being surprised by the Mahrattas and the chief of Chitaldrug nt Dodderi while in the conveyance of a large treasure he either committed suicide to avoid disgrace or was killed by them. Zulfikar Khan succeeded, but a governor named Rastam Jang ar Chak appears to have most distinguished himself by his administration gaining the title of *Bahadur* and the name of Kasfiyat Khan. The last of the Mughal governors of Siru which shared in many of the contests between the rivals for the Subadari of the Dekhan was Dilavar Khan from whom the place was taken in 1757 by the Mahrattas.

In 1761, Haidar, having entered into alliance at Hoskote with Basalat Jang and received from him the title of Nawab of Siru, nt once took the place and thence extended his conquests all over the north. In 1766 the brother in law of Haidar was induced by the Mahrattas to yield up Siru which remained in their hands till retaken by Tipu in 1774 since which time it has been attached to Mysore, except for a short period when it was occupied by the Mahratta army co-operating with the British against Seringapatam.

Siru attained its highest prosperity under Dilavar Khan and is said to have contained 50 000 houses. An elegant palace erected by him now all ruined, was the model on which those of Bangalore and Seringapatam were built. A fine garden was also made, called the Khan Bagh which was kept up by Haidar and may have suggested the Lal Bagh at Bangalore. The ruins of a large quarter to which tradition assigns the name of Latapura may yet be seen to the

north-west of the fort Tīpu forcibly transported 12,000 families from Sira to form a population for his new town of Shahar Ganjam on the island of Seringapatam These vicissitudes and the inroads of the Mahrāttas reduced the town to 3,000 houses There are now only about 700, much scattered The Juma Masjid, of hewn stone (date 1696), is deserving of mention, as also the tomb of Malīk Rihān (date 1650). The fort, well built of stone, is surrounded with a moat and a fine glacis

A large tank to the north irrigates the subjacent lands The soil around is favourable to the growth of the cocoa-nut, the dried kernel of which is the staple article of export The population consists largely of Kurubars, who manufacture *kumblis* or coarse blankets of wool imported from Davangere, Kankuppa and Madaksira These are exported to Walaj, Kaudial or Mangalore, Bangalore, Mysore, Ganjam, Nagar and Coorg The prices range from Rs 1-8-0 to Rs 15 according to quality and texture, the entire trade being of the annual value of Rs 50,000

The Juma Masjid and the Darga of Malīk Rihān, above mentioned, are fine structures of the Saracenic style The former is said to have been built by Shaik Farid Sāheb whose tomb together with that of his brother Shaik Kabir Sāheb, is pointed out in the enclosure of the mosque The date of construction is indicated in the chronogram *bartul mokaddas*, A D 1108 (A D 1696) Two new Persian inscriptions were recently discovered here The Darga is a square building with a big dome with 4 black stone minarets, about 8 feet high, at the corners over the roof Inside is the tomb of Malīk Rihān, who was Subadār of this place from 1637 to 1650 The Darga seems to have been erected in 1651 Its plan is given on Plate III Behind the building is an old mosque in which Malīk Rihān is said to have prayed, and to the north-east a rectangular structure known as Diddi with 4 minarets on the roof, the front two taller than the hind ones, which he is said to have used as a study To the south-east, a tomb under a canopy is shown as that of a seven-year-old daughter of Aurangazib An inscription on it simply names Allah and Muhammad Another new Persian inscription was found here, as also one on the outer

wall of the outhouse attached to *Chilla Ma idi* or the little mosque. The Baraki mosque containing the inscription Sira 71 is in a dilapidated condition. Near it is the tomb of Mahamud Khān a fine stone structure with minarets, battlements and an ornamental plinth. At some distance to the north is a Darga popularly known as *Chinnadagore* owing to the dome having a gold *kalasa* or finial containing the tomb of a Fakir named Farid ulla Shah Huseni who is said to have come from Bijapur and performed severe penance here till an ant hill grew around him. He is held in great respect by all classes of Mahomedans his *maḥal* being looked upon as a *Chaukhanda maḥal*. An annual *urs* takes place in his honour. The Darga is a small square stone building with a large dome and minarets. It was presented with the gold *kalasa* it is said by a *Lālegar* of the place in fulfilment of a vow. Its custodian Sayyad Hāsim who is about 80 years old said that he was the 7th in descent from Farid ulla and gave his pedigree thus—Farid ulla his disciple Ma um Shah his disciple Maguli Shāh his disciple Lutpulla Shāh his disciple Yadulla Shāh his great grandson Sayyad Hāsim. According to him, Fakirs are of 4 classes Khadri Chishtiya Sarvadiya and Majaddadiya. The first class may wear either *dhōti* or trousers but the second only *dhōti* and they have to get clean shaved. Sayyad Hāsim has in his possession a good number of *sannads* relating to the *maḥal* issued by Aurangzib Alamgir II the Nizami the Mahomedan Governors of Sira Haidar and the Mahrattas. Of these 4 in *sannads* have been transcribed by the Government Archaeological Department—1 of Haidar 1 of the Mahrattas, 1 of Iradiam Venkappaiya of Mysore and 1 of Nawāb Lal Muhammad Khan. The town is said to have once possessed 10 mosques and it is studded all over with Mahomedan tomb.

The god of the Gujalakrishna temple has been removed to the newly built Narayana temple in the town and a good figure of Hanuman brought from some other place, has been set up instead. The object of worship in the Durga temple is an ant hill. In the *mantapa* to the south of it was found a new inscription. There is also an inscription on a tomb situated in the compound of the Travellers Bungalow which tells us that a European lady named Ellen died of Cholera in 1816 in Sira. To the north of the town is said to be situated the site of an ancient city called Lātapuri that portion occupied by a few

mean-looking houses being even now known as Lātapuri-hatti. Recently a broken cannon was unearthed in a quarter of the town known as Kumbāra-hatti to the north of the fort. It is lying there even now. The fort is a fine stone structure with a moat all round. It once had two more enclosing mud walls also with moats, traces of which exist. The inner fort is almost intact, but not inhabited though traces of former houses and offices are visible. There are two fine gates on the north with a side doorway in each case. A hall is attached to each, the first supported by six black stone pillars and the second by four sculptured granite pillars, though the sculptures are deliberately mutilated or chiselled out. The side doorway of the first gate is of carved black stone. There is a ruined mosque in the fort and a stepped well in which the wives of the Pālegār are said to have drowned themselves when the fort was invested by the Mahomedans. To the south-west of the Travellers' Bungalow is a spacious cave divided into two compartments to the right and left. The villages of Nadūru, Kereyarahalli and Kallukōte and Hulkūru possess inscriptions. One at the last place has to be looked upon as a find of some historical importance, as it happens to be the only lithic record so far discovered of the Ganga king Śrīpurusha with a date in the *Saka* era. This inscription is on a big pillar-like black stone which was immersed in water.

In the fort is the tomb of T. T. Temple (2nd regiment-N. C.) who died on 14th March 1800.

Municipal Funds					1923
Income	8,404
Expenditure	6,673

Sitakal

Sitakal.—A village in the Kolala hobli of the Tumkur taluk. Population 915.

Brass utensils are manufactured by Bhōgars or braziers, and there is an extensive trade in cotton.

Sravanagudi.

Sravanagudi.—A village in Madhugiri Taluk. Population 151.

This place has a number of old *vīragals* (*Maddagiri* 92-101) standing near one another. At some distance from them is

an-uninscribed *cirajal* which is worthy of notice. It has in the upper portion a hero in the arms of celestial nymphs while in the lower portion is seen a tiger pouncing on a bull. Probably the man fell fighting with the tiger.

Sravandanahalli—A village in Madhugiri Taluk. SRAVAN-
halli
Population 1,109

An old inscription probably of the period of the Nolamla king Ponnera (close of the 8th century) has been recently discovered at this place. The engraver's name is given in it as Dhanapati-āchari. An uninscribed *cirajal* by the side of this epigraph has a prostrate figure lying at the bottom with the left hand severed, the cut off hand being placed at the side. The meaning of this is not clear.

Sulekere—A village in the Turuvekere Sub taluk. Suleker
Population 200

There is a very small *Ivara* temple at Sulekere in the Hoysala style, consisting of only a *garbhagriha* and a *sikhanaṣi* both of which have ceilings with lotus buds. The *garbhagriha* which is surmounted by a small stone tower has a good figure about two feet high of Dhairava near the *linga*. The outer walls have only pilasters. The Virabhadra temple at the same village has a front veranda of 3 *onkanams* supported by four sculptured pillars containing figures of Arjuna fighting with Siva the hunter Kannapa kicking a *linga* etc. Another sculpture worth noticing is an ingenious combination of an elephant and a bull with only one head for both. The *nataranga* has likewise a curious sculpture in which two female figures with their braids of hair decorated with ornaments stand opposite to each other a spear like thing supporting or piercing their armpits. It is not known what this sculpture is intended to represent.

Suvarnamukhi—A stream which rises in Channarayana SUVARN-
mukhi.
durga. Flowing at first south east, on emerging from the hills it turns to the north-east, and passing Koratagere, after a course of about 15 miles runs into the Jayamangali

Tandaga—A village in the Sub taluk of Turuvekere. Tandag
Population 754

This is the reported birth-place of Sāhivāhana, who was begotten of a potter woman of this village by a Brāhman. The Chennakēsava temple here is a good specimen of the Hoysala style, finer and larger than those noticed at Turuvekere and Hulikal, though the plan is the same. One peculiarity of the temple is that every architectural member and piece composing the structure bears an inscription giving its position, directions, etc., in the building. The *garbhagriha* and the *sukhanasi* are of about the same dimensions, measuring 7 feet by 6 feet, the porch is 5 feet square, and the *navaranga* 15 feet by 13 feet. All the doorways are well carved. The lintel of the *garbhagriha* doorway has a figure of Garuda and the jambs a *dvārapālaka* and a female figure each, the latter holding a fruit in one hand and a *chauri* in the other. The original figure of Kēsava is kept outside owing to mutilation, a new image being set up in its place. In the *sukhanasi* are kept two figures of Ālvārs or Śrī-Vaishnava saints. The *sukhanasi* doorway has on its lintel a figure of Gajalakshmi flanked by *mahanas* with Varuna seated on their back, and at the sides ornamental screens and two niches enshrining Ganapati and Lakshmi. The *navaranga* has nine domed ceilings, about two feet deep, with lotus buds, the central one being as usual better executed than the others. The *garbhagriha* and *sukhanasi* have likewise ceilings of the same kind, but that of the porch is the largest and the best of all. It has a grand lotus bud, about two feet long, with two concentric rows of elegantly executed knobs. The porch has likewise a prostrating figure about 4 feet long in relief, but it is not known whom it represents. The outer walls of the *navaranga* have only pilasters and turrets without any figure sculpture, but those of the *garbhagriha* and *sukhanasi* have figures also between pilasters surmounted by turrets. Among the figures noticed are Vishnu 5, Narasimha killing Hiranyakasipu, Brahma and Umāmahēśvara with Nandi and mungoose shown as vehicles. Some of the turrets show fine work of creeper design. The stone tower over the *garbhagriha* has rows of figures from the bottom to the top in the four directions with carvings at the sides. The temple is fortunately in a good style of preservation. The Mallēsvara temple is a modern structure built of the materials taken from some ruined Isvara temple. In the *navaranga* is a seated female figure, about 1½ feet high, holding a drum and a trident in the upper hands, the lower hands being broken.

On both sides of the outer entrance are found several well-carved figures besides two *ringils*. All the female figures are seated and are about the same size being about $1\frac{1}{2}$ feet high. One of them with a noose, an elephant gourd, a fruit and a lotus for its attributes may perhaps represent Paravati. Of the others two hold in the upper hands a trident and a drum and one a bow and an arrow the lower hands being broken. They do not appear to be members of the *Saptamūrti* series.

The Isvara temple at this place is a Dravidian structure facing east. It has a veranda of three *ankamams* on the east and a small porch on the south. The veranda is a good structure supported by four sculptured pillars with lions and rulers. Among the figures on the panels of the pillars may be mentioned langadbhayanmūrti of Siva with Brahma flying up in the form of a swan to reach the top of the *linga* and Vishnu endeavouring most to reach the base. Gajasiramaiddana Tandavayana with Vishnu and Brahma shown on the adjoining panels as drumming and beating time respectively, the sage Vyaghrapada in the form of a tiger with a human face, the hunter Kannappa one of the 63 devotees of Siva kicking a *linga* and Arjuna engaged in religious austerities. Another sculpture worthy of notice is a four handed figure of Siva standing with Parvati at the side and supporting with the right upper hand a seated female figure evidently Ganga from which a stream of water is shown as issuing and entering into the mouth of the *linga* seated below the left lower hand being placed on the breast of Parvati. It is not clear which *lila* or sport of Siva this is intended to represent. To the right in the *nataranga* stands a well curved though horribly mutilated figure about 5 feet high with 8 hands all of which are broken. It is difficult to say which god is represented by this figure. It is locally known as Kanchina dēvara.

Tattekere—On a hill known as Ranganathasvami betta Tattekere near here stands a temple called the Ranganatha though the object of worship in it is a pillar marked with the discus of Vishnu with the *vajrāṇṇi* of Narasimha in front as at Suggan halli. This form of Narasimha, which appears to be rather peculiar to these parts, is also to be seen at Neralkere. There is a good Garuda pillar, about 20 feet high in front of the

temple. It has as usual, a Garuda on the side facing the temple, the sculptures on the remaining sides being Rāma on the east, a conch-blower on the north and a vase on the south Mālingana-betta, a hill about 2 miles to the north of Tattakere, had once a figure of Sankole Virabhadra in a shrine on its slope. The god was so named because, according to tradition, he had to be fettered (*sankole*) owing to his mischievous pranks with the women of the surrounding villages

Tiptur

Tiptur.—A taluk in the south-west Area 313 square miles Head-quarters at Tiptur Contains the following *hōblis*, villages and population —

Hoblis	Villages classified						Population
	Villages	Hamlets	Government	Sarvamanya	Jodi	Khayam-gutta

Principal places with population

The taluk, till 1886, was called Honnavalli, and at the same period Turuvekere, transferred from the old Kadaba taluk, was made a sub-taluk.

The taluk is an undulating table-land, except in the extreme north, where there are rocky hills bare at the top. In a country of this kind, it would be vain to look for large streams or rivers and in fact, there are none of them here. But the character of the surface is eminently suited for the

construction of tanks. In trees the taluk is remarkably poor, possessing nothing better than low scrub jungle of which large stretches may be seen all over. Black brown and red soils are met with but the black soil is very scarce and not of any special importance in the eyes of the ryot. The prevailing kind is the red mixed with sand in varying proportions. The soils in the northern parts are generally poor being more or less gravelly. In the centre and south they are reddish in the high lying and dark brown in the low lying lands. On the other hand near Ichalur and Setti halli there are large areas of stony ground where stones used as pillars were at one time quarried. Leaving out extreme cases the soil generally is fertile enough to repay the cultivator for his labour and expense. On dry lands the crops generally grown in all parts of the taluk are ragi, avare, togar, kulthi, chilli, castor, gingelly, ground nut and tobacco. Raiyats have recently taken to growing cotton in some parts. The wet crop is chiefly paddy of the coarser kind raised on lands under large tanks. Sugar-cane is not generally cultivated, though soil and water are favourable under some of the large tanks as the raiyats are more for cocoa nut gardens which bring in good relatively certain profit. The greatest measure of attention is paid to the cultivation of cocoa nut and the area under this cultivation is extending every year. Cocoa nuts grown at and near Honnavalli are considered to be the best on account of their good flavour. The taluk suffered very much in the famine of 1877-78.

The revenue settlement was introduced in 1880 and the revision settlement in 1921-22. The area of the taluk was thus distributed at the time

The trunk road from Bangalore to Shimoga runs through the middle of the taluk from east to west *via* Tiptur. From Tiptur there are roads south-west to Hassan *via* Lingadahallī, south to Channarayapatna *via* Nuggihallī, and south-east to Turuvekere *via* Nonavinkere and this latter continues on to Mayasandra whereat meets Gubbi-Seringapatam road with a branch to Yediyur.

From Turuvekere a road runs north to Banasandra railway station, Chiknayakanhallī and Huliyar. From Konehallī Railway Station in the west, there is a road north to Honnavallī and Huliyar. New roads have also been formed so as to connect almost all the villages with one another and these are in fair weather, as good as made roads.

Tiptur

Tiptur—A large trading place, situated in 13° 15' N. lat, 76° 32' E. long, 46 miles west of Tumkur, on the

Bangalore Poona railway and the Tumkur-Shimoga road
Head-quarters of Tiptur taluk and a municipality

Population in 1911	Males	Females	Total
Hindus	1,720	1,619	3,339
Musalmane	490	431	921

Christians	18	9	27
Total	2,244	2,064	4,311

It is the seat of a fortnightly Shandy which lasts from Saturday morning till noon on Sunday and is attended by merchants and raiyats of the neighbouring taluks also. Transactions amounting to Rs. 30,000 are effected in this market. Immense business is carried on in copra with Bombay, Delhi, Cawnpore and other distant trade centres. Tiptur having become an important trade centre a branch of the Mysore Bank has been opened to facilitate trade. There is a charitable institution called Veerasaiva Ananda Ashram where many Lingayat students are given free lodging and boarding. There is an English High School. In addition to the Honorary Bench Magistrates Court a Special 2nd Class Magistrate's Court is located in the town with jurisdiction over the taluks of Tiptur, Turuvekere and Chiknayakanhalli.

Tumbadi—An ancient village in Korntagere Sub Taluk. Tumbadi
Population 524

An inscription at this place (*Maddur* 27) gives the name of the village as Tumbevadi. It is evidently identical with Tumbepadi mentioned in Baugalore 83 of about A.D. 900 as the place where, by order of the Ganga king Erevappa Nagatara fought with the Nolambas and fell.

Tumkur

Tumkur.—A taluk in the east Area 454 69 sq miles
Head-quarters at Tumkur Contains the following *hobls*,
villages and population.—

The east of the taluk is occupied by the Devarayadurga hills, which are surrounded with forest The Jayamangali rises in them on the north, but during its short course in this taluk is of little benefit, owing to the rocky and rugged nature of the country surrounding its banks. The tracts south of the hills are well supplied with tanks, fed by streams which ultimately unite to form the Shimsha The country around Tumkur is very fertile and highly cultivated , to the westward it is less fruitful The undulating nature of the country being favourable to the formation of tanks, there are extensive gardens of areca-nut and cocoa-nut, as well as the usual paddy cultivation The streams, though none of them large enough to supply channels, are yet of great assistance to agriculture, the water after the rains being distributed from them to the adjoining fields by *Yāta* and *Kapile* wells

The revenue settlement was introduced in 1871 and the revision settlement in 1910-11 and 1922-23. The area of the taluk at the time was thus distributed —

Culturable —

Dry	1 43 037	1 65,409

The Bangalore Poona railway runs through the taluk from east to west with stations at Hireballi and Tumkur. The Bangalore-Shimoga road is close alongside the railway. From Tumkur there are trunk roads north west to Chitaldroog and north-east to Madhugiri and Pavagada with a road south to Kunigal, connecting at Hebbur with one from Gubbi on the west.

Tumkur—The chief town of the district situated in Tumkur 113° 20' N lat, 77° 9' E long, 43 miles north west of Bangalore with which it is connected by rail and road.

Population in 1921	Males	Females	Total
Hindus	5,948	5,344	11,292
Muhammadans	461	971	2132
Christians	372	245	617
Jains	118	87	205
Total	7,599	6 647	14,246

It is prettily situated at the north western base of the Dēvarāyadurga group of hills, on elevated ground near the

waste weir of a large tank Owing to the successive droughts from the year 1905-06, which appeared periodically, the Tumkur tank rarely filled and the garden and wet cultivation n and around the town cannot be said to be quite prosperous as in the good old days of plentiful rainfall The place is getting drier and drier, so much so that there is dearth for water almost throughout the year The Mydala tank is now fixed as the source of water supply to the town and the municipality of Tumkur proposes to get water supply from this tank The town has enlarged itself by extensions in the west, north and south A couple of rice mills, slate pencil and tile factories have since come into existence

In recent years, owing to the opening of one more Munsiff's Court, District Normal School, Panchama and other schools and to the raising of the local High School into a Collegiate High School and the establishment of Special Magistrates' Courts, the floating population of the town has greatly increased

Tumkur is said to have originally formed part of a territory whose capital was Kaidala, now an insignificant village three miles to the south of it Its name is said to be derived from *Tumuku*, a small drum or tabret, the place having been granted to the herald or tom-tom beater of the Kaidala Rāja But the earliest form of the name, as given in an inscription of the tenth century is *Tummegūru* It formed part of the Ānebiddajari district Kante Arasu, one of the Mysore family, is said to have formed the present town, consisting of a fort, the walls of which have now been levelled, and a *pete* to the east of it

The Deputy Commissioner's court is a conspicuous circular building of three storeys The town contains the usual District offices, a High School, and other public buildings It is the residence of a European Missionary of the Wesleyan Society, who have here a chapel and several schools

The Lakshmikānta temple at this place which faces east, is a Dravidian structure consisting of a *garbhagriha* or adytum,

Its ancient name is said to have been Narasimhapura. It contains three fine temples, in two of which, dedicated to Chennigarāyasvāmī and Virabhadra, are inscriptions making gifts of *agrahāras* in the time of the Hoysala king Narasimha, of whose queen Lōkamma or Lōkāmbika it appears to have been the native place (see below). Facing the temple of Gangādhārēśvara is a recumbent bull of large size, elaborately carved in black hornblende from Karekal-gudda, and still retaining a brilliant polish. About 30 years after its foundation, Turuvekere appears to have been captured by the Hagalvādī chief named Sal Nāyak, who committed the government to his brothers Chikka Nāyak and Anne Nāyak. By them the outer fort was built, the tank enlarged and other improvements made. In 1676 it was taken by Chikka Dēva Rāja of Mysore and has ever since been a part of the Mysore territory. Lingāyats form a principal part of the population.

The inhabitants depend for water entirely on the tank, which is fed by a stream called the Nāga and contains much lotus.

The eastern end of this place shows a number of house-sites in ruins and there is a Basava temple with a frame work in stone in front of it. This frame work is called *Chintalukambha* (weighing balance) and consists of two pillars fixed side by side and a cross beam with iron rings over them. It is said that Turuvekere was once a great cotton centre and that this part of the town was called Aralepete. All the cotton sent out was being weighed in front of the temple and the weight made on each bale here was accepted as the hall-mark of accuracy throughout the cotton world.

temple faces the east. Besides the entrance *mantapa* it consists of *Garbhagudi*, *sukhanasi*, *nataranga* and a front veranda about eight feet deep. There is a small portico attached to the north wall of the *nataranga* and to the south wall of the same there is a small room for keeping the *Utsava* *vigraha* (processional image). In front of the verandah and on a lower level is the *Patalankana* consisting of 9 *ankanas* and supported by 12 pillars. These latter are of two kinds. Six are octagonal and the remaining six are sixteen sided. These are elegant in design and look decent for the height which is 14.0 from the ground to the bottom of the ceiling. The shrine of the goddess is at the south west corner of the compound and consists of *garbhagudi*, *Sukhanasi*, *nataranga* and an open veranda. In front of the last there is a *Patalankana* of fifteen *ankanas*. Altogether the temple is a pretty large structure with a *prakara* or enclosure and a lofty *mahadwara* or outer entrance. It faces east. On the left inner pillar of the *mahadwara* is sculptured a figure about $4\frac{1}{2}$ feet high with folded arms which is said to represent Chaudappayya afterwards known as Varada Beteraya who erected the temple. His lineal descendants are still the *sthambikas* or managers of the temple. These consisting of 4 or 5 families though Smarta Brahmins wear *namam* on the forehead like the Srivaishnavas. The god Beteraya is a good figure about 1 foot high with 4 hands holding a discus, a conch and a mace in three hands the remaining hand being in the *abhaya* or fear removing attitude. According to the Puranic account of the place contained in a long roll of paper styled *Rayare* *he* which is in the possession of Beto Rangappa a descendant of the above Varada Beteraya and the Parupatya Jar or Superintendent of the temple the god acquired this name because he came here at the entreaty of the deva gods in the Dvapara Yuga to hunt *Rakshasas* or demons in the shape of wild beasts. The *Utsava* *Vigraha* or metallic image of the ruined Chennakaisava temple is also kept here for safety.

The Beteraya temple above mentioned has an old or amentamental wooden cot used for the repose (*vayanotsava*) of the god which is said to have been presented to the temple by Katte Gopala raja arasu a Mysore general who lived about the middle of the 18th century. Tradition has it that the general was using the cot when encamped at this place that on trying to remove it when he was about to leave the place it could not be moved,

and that on being told by the god in a dream that it was required for his use, the general gladly left it behind and went his way. The processional image of the Kēsava temple in the front is kept here. The car festival takes place in the month of *Phālguna* (March). The Mūle-Sankarēsvara temple is mostly similar to the Sadūsiva temple at Nuggihalli in the formation of its tower and outer walls (see below). There is a tradition that the interior of the temple was once set on fire by the Muhammadans, which appears to derive some support from the injured state of the pillars and beams, now replaced by rough ones.

Turuvekere appears to have been founded as an *agrahāra* or rent-free village about the middle of the 13th century under the name of Sarvajña-Siṁhājaya-Narasimhapura after the Hoysala king Narasimha III by his general Sōvanna-dannāyaka, the same that established Somanathapur in T-Narsipur Taluk and built the celebrated Kēsava temple in it in A.D. 1268. The town has two small but neatly built temples in the Hoysala style of architecture, mostly similar in design and execution, dedicated to Vishnu and Siva, judging from the inscriptions found in them, it may be presumed that both of them came into existence about the middle of the 13th century during the reign of the Hoysala king Narasimha III and that most probably his general Sōvanna-dannāyaka caused them to be built. One of them, the Chennakēsava temple which faces east, consists of a *garbhagriha* or adytum, a *sukhanāsi* or vestibule, a *navaranga* or central hall, and a small porch with verandas at the sides. Of the 9 ceilings in the *navaranga* 8 are about 1½ feet deep with lotus buds while one in front of the *sukhanāsi* entrance is flat with 9 blown lotuses. The *garbhagriha*, *sukhanāsi* and porch have also deep ceilings with lotus buds. The *sukhanāsi* entrance has plain perforated screens at the sides. The god Chennakēsava is a fine figure about 4½ feet high, flanked by consorts. The *Prabhāvali* or halo has the ten incarnations of Vishnu sculptured on it. The outer walls have pilasters alternating with miniature turrets, and the *garbhagriha* is surmounted by a good stone tower with uncarved blocks. Altogether the temple presents a very neat appearance. The other temple in the Hoysala style, called the Mūle-Sankarēsvara, is in most respects similar in plan to the Chennakēsava temple, only it has the entrance and porch on the south instead of on the east, though the *linga* faces east. The tower, however, differs from

that of the other temple in design having rows of turrets from the bottom to the top at the angles. To the right in the *nairanga* are figures of *Saptamatrikah* and *Ganapati* and opposite to the entrance figures of *Bhairava*, *Virabhadra* and *Subrahmanya*. There is also a finely carved but badly mutilated seated figure about 2 feet high with tusks. It is not clear what this represents. There is no figure sculpture on the outer walls but only pilasters with intervening turrets. On the basement were found four short inscriptions giving the names of the sculptors who built the temple. These are *Saroja*, *Jakanna* and *Isvara*. The second name occurs twice. These sculptors must have lived about the middle of the 13th century that being as stated above the period of the temple.

A few other details of the *Rajarathie* may also be noticed here. In the *Diapara yuga* a sage of the name *Krikandu* who resided in *Badari Kshetra* came to the south on a pilgrimage to holy places and finding this spot peculiarly sacred owing to the presence of 5 self manifest *lingas* namely *Sambhu Linga* on the bank of the *Naga* river to the east *Brahma linga* at *Aralikere* to the south east *Kalliesvara* at *Chikka Turuvekera* to the west *Sankaresvara* at *Anckere* to the north west and *Malliesvara* at *Forenavanahalli* to the north took up his residence on the bank of the *Naga* river near *Turuvekera* and performed penance. God appeared to him and at his request resided there under the name of *Boterava* and having subsequently granted salvation to him disappeared into the *Pakshyavahana* pond saying that he would again manifest himself to the devotees in the *Kali* age. The pond was so called because *Brahma* used to bathe in it everyday in the shape of a swan. We are then introduced to the *Kali Yuga* King *Parikshit* and after him *Janamejaya*, *Makutavardhana*, *Rajendra Kshatriya*, *Saranga* and other kings ruled at *Hastinavati*. After the lapse of 3034 years of the *Yudhishtira* era *Vikramaditya* began to rule at *Ujjain* and after 145 years of his era and 3179 years of the *Kaliyuga* *Salivahana* began his rule. He was born of a potter woman by a brahman father at *Hale* (or old) *Pandaga* to the south west of *Turuvekera*. At the age of 12 years he routed the army of *Vikramaditya* who had marched to the south to kill him chased it as far as the *Godavari* and ascended the throne of *Ujjain*. Then began the *Salivahana* era. In this era a *Chōla* King who caused a Brahman to die

of a broken heart by forcibly seizing the philosopher's stone which was in his possession and who in order to expiate his sin, built temples in holy places all over the country, came to Turuvekere and erected the Chennigarāya and Sankarēsvara temples. Afterwards Sōvanna-dannāyaka made Turuvekere an *agrahāra* and fortified it. Subsequently, during the reign of Vīra-Narasīnga-Rāya of Vijayanagar, the God Bēterāya who had disappeared into the Pakshivāhana pond in the Dvāpara-Yuga appeared in a dream to Chaudappayya, the Hebbaruva of Turuvekere, and directed him to put on *nāmam* on his forehead and devote himself to his service. Thereupon, Chaudappayya changed his name into Varada-Bēterāya, erected a stone temple and set up the god in it. Vīra-Narasīnga-Rāya made a present of the metallic images in the possession of his daughter to the temple, erected the front *mantapa* of three *ankanas* and made a grant of five villages of the revenue value of 300 *varahas* for the god, while his queen Lōkamma granted to the temple the village Hosuru naming it Lokammanahalli after herself. Subsequently several villages were granted to the temple by successive rulers such as Sankanna Nāyaka, Krishna Dēva Rāya, Narasanna Nāyaka of Mayīsamudra during the time of Rāma-Rajaiya and Hiri-Bhairē Nāyaka, ruler of Hagalvādi, Chiknayakanhalli, Honnavalli, Turuvekere, and Kadaba. A village was also added during Mahk Rihān's governorship of Sira under the Bijāpur Sultāns. Turuvekere was then captured by the Mysore king Kantirava-Narasa-Rāja-Wodeyar and the endowments of the temple continued intact till A D 1,686 when some of the endowments in the name of the Sthānikas were ordered to be resumed. Thereupon a petition was made to the queen of Mysore in A D. 1705 through Trumalaiyengar and Perumālaiya which resulted in the cancellation of the order of resumption. In 1784, however, Tipu resumed all the endowments; and during Pūrnaiya's regency a small money grant was sanctioned which was subsequently reduced. When in 1831 Krishna-Rāja Wodeyar III, having set out to punish the insurgents, was encamped near the Malaghata tank, the Sthānikas made petition to him through Lingammāji of Toremanahalli near Turuvekere, who was a lady of the king's harem, and procured for the temple an annual money grant of 120 Kanthirāya *Varahas* which was subsequently reduced to 100 *varahas* by Dāsappāji Arasu. So ends the *Rāyarēkhe*. The

statement that Salivabana was born near Turuvekero is rather curious. It is however clear that the Baleriya temple came into existence during the rule of the Vijayanagar king Vira Narasimha, son of Narasa.

The other Dravidian temple at Turuvekero is the Ganga dhanavara, a good structure facing north. Opposite to the temple, outside the enclosure stands a lamp pillar on which are sculptured figures of a man and a woman with folded hands which are said to represent the Mahar Vyyanna Nayaka the builder of the temple and his wife. In a fine *mantapa* in the Patalankana (or front hall on a lower level than the central hall) of the temple is a beautifully carved *Saudi* of black stone about 7 feet long $1\frac{1}{2}$ feet broad and 7 feet high which though several centuries old still retains a brilliant polish. It deserves to be preserved from harm by putting up a railing around it. The *navaranga* has also an entrance on the east with a fine porch supported by two well carved pillars with lions and riders. To the right in the *navaranga* is a figure of Ganapati with arms too slender for its size. The *Utsava Vighraha* or metallic image of the god is flanked by two consorts known as Parvati and Dakshayani the latter holding what looks like a *kundala* or ear ornament in the right hand. This peculiarity is accounted for by the statement that Dakshayani thus held the ornament when about to enter the sacrificial fire at Daksha's sacrifice. The *linga* in the temple is a very fine piece of work. The *jata* or matted hair is beautifully shown with a seated figure of Ganga on the tiara holding a rosary in the right hand. In a shrine in the *prakara* is the goddess of the temple a well carved figure about 4½ feet high holding a noose an elephant goad and a rosary in three hands the remaining hand being in the *abhaya* or fear removing attitude. These attributes are usually associated with Sarasvati but the pedestal bears the lion emblem which is Parvati's. Though the figure does not represent the usual form of Parvati it represents a peculiar form of that goddess known as *Adharasakti* which is given these attributes in Hindu works on iconography. In this shrine are also kept the metallic images of the Mule Sankaravara temple. Vira raja Arasu father of Sita Vilasa Sannudhana one of the queens of Krishna Raja Wodeyar III served as an officer at Turuvekero for some time and from this circumstance his descendants are known as Turuvekero Arasus.

Vignasante

Vignasante. A village in Tiptur taluk Population 512

The Lakshminarasimha temple at this place is a good building in the Hoysala style. It is a *trikūtachala* or three-celled structure facing north. The main cell, which alone has a *sukhanāsi* and is surmounted by a tower, enshrines Kēsava, the left cell Lakshminarasimha, and the right Vēnugōpāla. All the figures are well carved, their *prabhas* being sculptured with the ten incarnations of Vishnu. The door-lintels of the *garbhagrha* and *sukhanāsi* of the main cell have Gajalakshmi and Lakshminārāyana respectively, that of the left cell Yōga-Narasimha and that of the right cell Vēnugōpāla. At the sides of the *sukhanāsi* doorway are figures of Ganapati and Mahishāsura-mardini. The temple has a small porch and the remains of a *mukha-mantapa* at some interval. The *navaranga* pillars together with the beams over them are elegantly carved with bead and scroll work. The ceiling of the porch and the central ceiling of the *navaranga*, about 3 feet deep, are domed and adorned with fine lotus buds, while the others, about 1½ feet deep are square with small lotus buds. The porch is supported by two beautifully carved pillars, the capitals too being sculptured and adorned at the corners over them with lions attacking elephants. The inscription stone (*Tiptur* 40) in the porch has at the top miniature figures of Kēsava in the middle, Vēnugōpāla to the right and Narasimha to the left, the last standing like the others, though inside the god is a seated figure. The outer walls have no figure sculpture, but only a row of flowers of various patterns as in the *basti* at Heggere with here and there a few turrets and elegant pilasters. The plinth has several mouldings with rows of lions, bead work, etc. There are some figures and carvings over the caves all round. The tower is carved from top to bottom and has rows of four figures one over the other in the four directions and rows of *kalasas* or finials at the angles. From the inscription referred to above we learn that the temple

was built in 1250 during the reign of the Hoysala king Narasimha III by his generals Appayya Gopala and Madhava who were brothers and sons of the general Mallideva. The village is named Iganasante. The temple deserves conservation. There is a crack in the south wall of the Kesava cell which demands immediate attention. The Bilalingaswara temple is a plain Hoysala building with a stone tower adorned with four figures one over the other in the four directions and a Hoysala crest in front. The *nataranga* has only one ceiling in the centre with a lotus bud. The *jyothirjyoti* and *sukhanis* have also similar ceilings. The front hall appears to be a later addition. The Binayakani temple has a well carved though mutilated figure about 3 feet high of the goddess, seated in *lilasana* with eight hands, several of which are broken the attributes now visible being a trident a drum a sword and a shield. The Bhairava shrine has a panel carved with two goddesses one larger than the other seated in *lilasana* and bearing the usual attributes a trident a drum a sword and a cup.

Yediyur—A village in the Kumgal taluk 12 miles south west of the Irlaba on the Bangalore Hassan road. Headquarters of the Yediyur hobli. Population 511.

A large festival called *Siddeswari jatre*, is held here for five days from *Chaitra Suddha 7th* at which about 10 000 people assemble.

MYSORE DISTRICT.

SECTION 1 DESCRIPTIVE.

SITUATION, AREA AND BOUNDARIES.

Situation

The Mysore District forms the southernmost portion of the State, and is situated between $11^{\circ} 36'$ and $13^{\circ} 35'$ north latitude, $75^{\circ} 55'$ and $77^{\circ} 20'$ east longitude. The greatest length from east to west is about 97 miles, from north to south, the extreme distance is about 102 miles.

The area of the district is 5,497.82 square miles of which 2,074 square miles are under cultivation and 1,895 square miles not available for cultivation and the rest are culturable waste.

Boundaries

It is bounded on the north by the Hassan and Tumkur Districts, east by the Bangalore District and the Coimbatore Collectorate, south by the Nilgiri and Malabar Collectorates, and West by Coorg.

PHYSICAL ASPECTS

The river Cauvery besides forming the boundary for some distance both on the western and eastern sides, traverses the district from north-west to east, receiving the tributaries Hemavati, Lōkapavani and Shimsha on the north, and the Lakshmanatūtha, Kabbani and Honnu Hole or Suvaranāvati on the south. At Kannambadi, North-West of Mysore City, a dam has been thrown across the Cauvery and the Krishnarajasagar with a maximum water spread of 1602 square miles has been formed which forms an important new feature in the landscape and physical environment.

Lofty mountain ranges covered with vast forests, the home of the elephant, shut in the western, southern and some parts

of the eastern frontier. The only break in this mighty barrier is to the south east, where the Cauvery takes its course towards the Ghāts and hurls itself down the falls of Gagana Chukki and Bar Chukki at the island of Siva amudram. The principal range of hills within the district is the Biligurangan in the Yelandur Jūgir at the south eastern extremity rising to a height of 5,091 feet above the level of the sea. Next to these the isolated hills of Gopalaswami in the south near Gundlupet 4,770 feet above sea level and of Bettadpur in the north west (4,389 feet) are the most prominent heights with Chamundi hill (3,189 feet) south of Mysore. The French Rocks (2,882 feet) to the north of Seringapatam are conspicuous points of a line culminating in the sacred peak at Melkote (3,589 feet). Short ranges of low hills appear along the southern parts of the district especially in the south west. On the east in Malavalli Taluk are encountered the hills which separate the valleys of the Shimsha and Arkāvati among which Kabhin-durga (3,507 feet) has gained an unenviable notoriety.

An undulating table land fertile and well watered by perennial rivers whose waters dammed by noble and ancient *anicut*s, enrich their banks by means of canals such has the Mysore District been described. Here and there granite rocks rise from the plain which is otherwise unintermittent and well wooded. There is a gradual fall in the level of the country from west to east Yelval being 2,826 feet above the sea Mysore 2,525, and Seringapatam 2,337. The extreme south forms a terai of dense and valuable but unhealthy forest occupying the depression which runs along the foot of the Nilgiri mountains the lowest part of which is the remarkable long steep trench like ravine sometimes called the Mysore ditch which forms the boundary on this side and in which now flows the Moyar.

GEOLOGY

The southern portion of the Mysore district differs in its geological features from the other three districts noted

before in the absence of any big body of Dharwar Schists, and in the occurrence of fairly wide areas composed of charnockite series of rocks, one of such being at the eastern border of the district to the east of Yelandur, constituting the Biligirirangan range of hills and the other forming a portion of the western border of the district from Fraserpet to near Hanagod (Hunsur Taluk). The intervening ground consists essentially of granite gneiss and gneissic granites, with thin beds, lenses and elongated runs of various hornblendic rocks, pyroxenites and dunites containing chromite and magnesite, and members of the basic granulites of the charnockite series. To the west of Chathanhalli the gneissic ground to an average width of 6 to 8 miles is characterised by the occurrence of bands of highly altered rocks of the nature of Kyanite-Staurolite-siliceous schists, biotite-steatite-graphite schists and also bands of limestone and quartzites, associated and sometime interbanded with hornblende granulites, amphibolites and pyroxenites and occasionally dunites. The original nature of these metamorphic siliceous schists is still an open question, but they are of economic importance since in the former rocks are found graphite, corundum and garnets. They run from near Bilikere in a S & S S W direction for nearly 25 to 30 miles up to very nearly the southern borders of the State.

The region north of the line joining roughly Periyapatna and Malvalli, forming the northern portion of the district constitutes essentially a gently undulating gneissic plain in which stand out abruptly ranges of granitic hills like those at Tannur, Melkote, Shindghatta and Narayandurga. The one noticeable feature in the gneissic plain especially in the Krishnarajpet Taluk is the occurrence of a number of long sinuous ridges of unctuous talchloritic amphibolites and bands of dark hornblendic rocks of varying characteristics. These apparent dyke-like exposures of the amphibolites in the gneiss are believed to be older remnants of the Dharwar schists, which are explained to have been cut out and enclosed in that fashion; it is not yet known if the

same explanation holds good for the darker hornblendic bands

Apart from these isolated bands of schists there are three well defined zones of Dharwar rocks described under the names of Bellibetta Hadnur and Sitapur belts respectively. The Bellibetta belt forms the westernmost patches of these schists and runs for a length of about 15 miles with varying widths. The maximum width of these schists is attained in the region of Bellibetta and Hennagiri while narrowing southwards they terminate near the northern bank of the Cauvery river.

The second belt runs to a distance of 25 miles to the east of Krishnarajpet passing through the village of Hadnur and Shindgatti and near Bukinhere. The belt scarcely attains a width of more than half a mile anywhere.

The third belt is situated on the northern banks of the Cauvery to the east of the village of Sitapur.

In the first and portions of the second belt, the dark hornblendic runs make a very small feature forming only narrow fringes while the bulk of the rock consists of unctuous talcose tremolitic rocks the altered amphibolites or pyroxenites with some patches of altered peridotites. The southern portion of the Hadnur belt and the Sitapur belt consists mostly of dark hornblendic rocks of varying texture. Apart from these there are other isolated hornblendic runs which appear to consist of memoirs of different series some being of Dharwar age others forming the hornblendic granulites of the charnockite series while a few appear to be crushed later dykes.

Dyke rocks —Hornblendic dykes and epidiorites occur near Chathanhalli Mysore Taluk.

Hornblende and pyroxene granulites of charnockite affinities are found in the region of Sagarkatte and hypersthene granulites of varying texture occur in many places. Felsites and Porphyry dykes of quite a great range of texture and colour outcrop conspicuously in the Seringpatam and Mandya Taluks. When cut and polished they form

ornamental building stones, and some varieties have been used in the construction of the new palace at Mysore.

Dolerites are seen in large numbers to the west of Hunsur and also to the west of Gundlupet and in Malvalli Taluks

Building
Stones

Granite is quarried in many parts of the district, chief among which being the quarries near Chinkurli from where slabs and stones are carted to Mysore. Felsites and porphyries form beautiful ornamental stones but they are not utilised to any considerable extent.

Clay

Black clayey soil is found near Sargur and also in parts of Chamarajnagar Taluk where it is mixed with nodular kankar. They are only locally utilised by potters

Minerals

The Mysore district has shown the occurrence of a great range of minerals, but very few of them have been found profitably productive on a large scale

Asbestos

Asbestos has been reported to occur near Mandya, at Konur (Nanjangud Taluk), Tirukanambi, Chettanahalli and at a number of points in the Hadnur and Bellibetta belts of schists. In all these places, the outcrops consist of hard brittle stained fibres of very little tensile strength. None of them have been prospected excepting the thin chrysotile veins near Chettanahalli which was found to be of very small extent

Corundum

Corundum occurs in groups of deposits in the Hunsur, Heggaddevankote, T-Narsipur and Mandya Taluks. The quality and appearances vary. Ruby corundum is found near Kupya (T-Narasipur Taluk). These deposits excepting the few in the Mysore Taluk, are not regularly worked. The loose crystals are annually picked up by local people and sold to corundum contractors usually at the rate of $1\frac{1}{2}$ to 2 annas per measuring seer.

Garnet occurs as unbedded crystals in the various Garnet hornblende granulites. Near Sargur and Chattenhall the disintegrated and transported crystals are segregated to a small extent in the nullas flowing through these regions. Such crystals are usually granular and are translucent varying in colour from pale rose red to deep pinkish red.

In the Amblo and Valgere areas (Nonjaugud Toluk), the Gold reefs occurring in a thin band of hornblende schist were prospected for gold and after a considerable amount of development work were abandoned as unprofitable. There are also old workings near Hemagiri Chinkere Hunjokere and other places in the district.

Small flakes of crystalline graphite are found disseminated Graphite evenly in the siliceous gritty schists in some of the bands in the zone of metamorphism already mentioned. The deposits were prospected to a small extent near Sargur and Mavinhalli with the result that the former place showed a very poor concentration of the mineral in the rock the percentage of distribution seldom exceeding 1 to 14 while the latter, though containing the mineral to the extent of 17 per cent of the rock was found to be confined only to the margins of a very small lens of an enstatite peridotite the graphite bearing portions of which were estimated to be less than 3 000 tons.

Ferruginous quartzites occur at a number of places Iron Ores in the S W portion of the Mysore district and also near Halagur in the Malvalli Toluk. There are indications of ancient smelting in these places and especially the Malvalli ores seem to have attracted attention till recently.

Kankar occurs in a group of isolated deposits in the vicinity Kankar and Limestone of Krishnarajasagara chief amongst which being the Jetta hundi deposit. Similarly near Dodkanya on the banks

of the Gundal river, and in parts of Mandya Taluk, the nodules are collected and burnt into lime

Limestone is found in two or three places in small bands. To the east of Undavadi is a small run, while about 6 or 7 miles west of Chattenhalli (Mysore Taluk) are two fairly big bands of magnesian limestone

Magnesite and Chromite

The important groups of deposits of these minerals are found between Kadakola and Chettenhalli. They occur in the weathered ultrabasic rocks probably dunites, which are in isolated lenses in the gneisses running with a north and south strike

Magnesite

The following are the different areas where magnesite has been worked

Shinduvalli, Solepur, Dod Kattur, Chick Kattur, Dod Kanya, Chick Kanya, Talur, Nachanhalli, Gurur, Choganhalli, Masanbayinhalli, Kiralu, Sathahalli, Nadanhalli, Chattenhalli

The total quantity of magnesite extracted from 1913 to 1914 is 13,957 tons, of which 10,203 tons have been exported

Chromite

Chromite has been worked chiefly in the following areas -- Shinduvalli, Dodkanya, Dod Kattur, Talur, Gurur, Nachanhalli and Waddarpalya.

The total quantity of chrome ore extracted in this district from 1907 to 1924 is 39,213 tons, of which 28,855 tons have been exported, the Shinduvalli Mine being the chief producer

Mica

In many places, the pegmatites of this region bear small books of muscovite. Large pits were sunk in the Tagadur and Chinnamballi blocks but the license terminating in the year 1918, it has not been renewed and consequently work has been abandoned. At Vadesamudra near French Rocks, some mica has been won and during 1922-23 about 3,500 lbs of rounds were obtained. No work has been done during 1923-24.

Apart from these at a number of other points, some work was done in the mica bearing pegmatites but they being found unproductive were abandoned soon. The total quantity of mica extracted in this district from 1911 to 1921 is 35 353 lbs of which 25 042 lbs have been exported.

Coarse varieties of soapstone are found in patches in parts of the Bellihetta and Hadnur schists and also in distinct bands in the vicinity of Sagaur and Manhalli (Heggaddavan kote Taluk). Near Varnua the material is quarried and carved into utensils. Soap stone

Saline earth is found along the banks of Suvarnāvati and Mugur rivers in the Chamarajnagar Taluk from which after lixiviating and evaporation common salt is obtained locally. Earth salt and Earth soda

Earth soda is found to a large extent in the Mandya and Chamarajnagar Taluks. At the former place experiments were conducted by the Mysore Geological Department during 1917-18 with a view to test the possibility of manufacturing sodium carbonates on a large scale. The results arrived at show that it could be worked profitably on a small scale. The deposits have been scattered about and earth will have to be collected and extracted at a central place which is being done at present by private agency.

Kaolin is found to a small extent at Melkote where the material after washing and levigation is pressed into small balls or sticks and used by some people for their caste marks. Kaolin

Indications are also found of the existence of iron pyrites, arsenical pyrites and sulphides of metals in the southern parts of the district.

BOTANY

The District has some of the largest and most valuable timber yielding forests in the State. The forest belt beginning in the west of the Hunsur Taluk spreads along the frontier into the south and passes to the north becoming (a) Vegetation

thinner In this State, it goes into the Malvalli Taluk in about the eastern boundary of the District The thickest and richest forests of Bissalvadi, Kakankote, Begur and Amur-Marigudi, are in the Heggaddevankote Taluk, which is also the most important field of Khedda operations in the State The District is split into two forest divisions The extent of the State Forest and plantations in each is as given below

Mysore West Division		Mysore South Division	
	Sq Miles		Sq Miles
State Forest	320		329
Plantations	5 3		1

The principal species are Teak, Honne, Nandi, Rosewood and Dindiga Karachi is found in Basavanabetta Hill in Malvalli Taluk Jalaru is found near Melkote.

(b) Arboriculture

In the Mysore Taluk, there are several planted topes of mangoes and banyans, and the Jamun-tree grows well in many parts Some thriving cocoa-nut and areca-nut gardens are scattered throughout the taluk The taluk of Seringapatam is well irrigated by channels, and grows much rice and sugar-cane as does the taluk of T-Narasipur in the east, but trees, except in planted groves, are scarce Yedatore, another rice growing taluk, is also bare of forest or large tracts of jungle The taluk of Mandya is very thinly wooded, and Maddur tracts are not much better Gundlupet and Chamarajnagar in the south are well off in this respect The latter is a well-watered land, full of paddy fields and rich gardens strongly fenced in The Nanjangud taluk is also of the same type Several very fine specimens of mangoes, tamarinds and banyans grow round the villages in the Hunsur Taluk where the rainfall is comparatively heavy Parts of Periyapatna are covered with thousands of date-palm growing in the waste lands

Kanarese	Botanical	English
<i>Cereals</i>		
Baragu	<i>Lanicum mliaceum</i>	Common millet

The crops both wet and dry are classed under two heads (c) Crops according to the season in which they are grown *hamu* and *Laru*. The season for sowing both wet and dry ham crops opens in July that for sowing kar wet crops in September and that for kar dry crops in April. It was not uncommon in former times for the raiyats to obtain annually both ham and kar crops from their wet lands, the ham being

the better of the two. It may however be doubted whether their aggregate out-turn in the year was greater than it is at present, as, without plentiful manuring, two crops a year tax wet land very severely. Now, owing to the yearly repair of the channels, and also in part to want of water, it is only under a few rain-fed tanks in the east of the District that both hain and kar crops are obtained on the same wet lands in one year.

On dry lands, it is usual to grow two crops in the same year, the latter being a minor grain if the land is fertile enough to admit of it. Thus horse gram, Kadale, hesaru, etc., are often put in immediately after jola has been reaped. But of grains which form the staple food of the people, such as ragi and jola, the land will only admit of one crop a year as a rule, consequently, the raiyats are obliged to choose between a hain or kar crop. In the northern taluks, Yedatore, Mysore, Seringapatam, Mandya and Malavalli, hain crops are preferred, because their growth is then more influenced by the monsoon. But in the southern or Malnad taluks, the raiyats generally find kar crops more desirable because while their jungle springs and the rain, which there falls more frequently, afford them a tolerable supply of water all the year round, the south-west monsoon, which falls with greater force on the forest land, would render ploughing operations in June laborious.

The kar crops of paddy are further divided into Tula kar, Kumbha kar crop and Mesha kar. When the raiyats are well supplied with bullocks and labour, then the Kumbha kar crop is sown at the most favourable season, that is at the end of September. But sometimes, owing to deficiency of the aforementioned requirements, part of the crop is sown before and part after the proper season. The former is known as Tula kar and the latter as Mesha kar. The Tula kar is an inferior crop. Under rain-fed tanks especially, which require sometime to fill, the rice harvest is often very late, for many raiyats are averse to trusting to future rain, and will not put in their seed until the tank is full.

All crops can be grown as either *hain* or *kar* with the exception of certain sorts of paddy, cotton, wheat, grain (which however is sometimes grown as *hain* for a wet crop), *harika*, *karu jirige*, *kadale*, *idagani*, *hulchellu*, coriander, chillies and turneps which are grown as *hain* only.

The extensive system of irrigation channels gives special prominence to paddy and sugar cane cultivation and other wet crops. Owing to the richness of the soil a liberal crop usually rewards the rayat without that constant manuring which is necessary in most other districts. The following is a list of varieties of rice known in the district: *dodda bhatta* or *dappa bhatta*, *keimbhatta*, *keani*, *putraj bhatta*, *chunbe*, *kavada*, *kari bhatta*, *punugurij*, *bol mallige*, *gandla jirige*, *chunna jirige*, *keudalu*, *sukadas*, *bile bhatta*, *karekuru jirige*, *sanna*, *haladinanna*, *arimra sanna*, *kar sanna*, *kalyur sanna*, *salakinanna*, *golinanna*, *saklatinanna*, *bangarkaddi mundaga* or *murdaga* (*kara bhatta*). The last named is grown by *bergar* or dry cultivation and only needs a moist situation and a fair supply of rain. It has been found impossible to define exactly the season at which each is grown on account of the different observances of each taluk in this respect. The usual period which elapses before the paddy arrives at maturity is six months but two or three varieties, *karekuru* for instance, require only $3\frac{1}{2}$ months while others such as *dodda bhatta* and *mundaga* require seven months. The *sanna* paddy is of superior quality to the others and from it table rice is cooked.

As is the case throughout India there are three methods of rice cultivation both in *hain* and *kar*: the *barbhatta* or *punaji* in which the seed is not sown dry in the field; the *mole bhatta* in which the seed is not sown until it has sprouted through being soaked in water and packed in leaves; and the *nat* by which method the seed is first sown very thick in a small plot of ground and transplanted into the field when the shoots are a foot high. The last is the most common and yields the best crop.

All the varieties of rice can be cultivated according to the *nati* or transplantation mode, with the exception of one, that one the coarsest of all, which is known in different taluks under the several names of mundaga, muradaga, kannel bhatta and bara bhatta, being subject to the rules laid down for the bara bhatta (broad cast) or punaji method

Ragi (*eleusine corocana*) is the staple food of the District. The poorer classes and those who gain their bread by manual labour are here greatly prejudiced against rice, and fully appreciate the strengthening qualities of ragi. The varieties of ragi are kempa or yelchegan, hulupare, kari, boliga, hasargambi, kari banduga, bili banduga and kari kadı. Of these, the two first are the most esteemed and the two last held in least repute. The different kinds are not usually separated, three or four being often sown in the same field. Owing to the exhaustive nature of ragi, the land on which it is sown will not ordinarily support another crop during the same year. There are, however, exceptions to this rule. Ragi straw is reckoned the best fodder for cattle, and they will thrive and work on it alone without requiring gram, which is not the case with respect to paddy straw. It also supplies a very nourishing but too heating fodder for horses when grass is scarce. This gram thrives best on a rich red soil, and grows either in the hain or kar season.

Tobacco is grown extensively in Hunsur and Yedatore taluks and is of a superior quality at Bettadpur. Cotton is grown in the rich black soil which is most abundant in Chamaajnagar, Nanjangud, Tirumakudlu Narsipur and Mandya. Coffee cultivation has been tried but apparently with most success in the region of the Bilgirirangan hills. Much attention was paid to promoting mulberry cultivation in the eastern taluks for the support of silk worms but the same fatality for long, attended the efforts to rear healthy insects as in other parts. This has now been overcome.

The following figures show the number of areas cultivated in 1923 with the chief crops in the several taluks of the district — (1) Principal Crops

Extent cropped in 1923	Rice	Ragi	Jola	Herse Cram	Sugar cane
Mysore	3 6000	30 600	18 500	8 600	10
Yedatore	504	23	1403	281	1

REMARKS —Fruits and Vegetables including root crops are Items Nos from 1 to 4, Garden produce are Items Nos 3 and 5

FAUNA

Wild animals

The range of elephants extends through nearly the whole belt of jungle which fringes the south and part of the east and west of the District. They are supposed to breed chiefly in the Biligurangan hills. In former years, they were a constant source of ruin to the raiyats in most of the southern taluks, and even now they sometimes cause considerable damage to the crops in Heggaddevankote, Hunsur and Chamarajnagar. But their numbers were found to be decreasing so fast, owing to increased cultivation, that extinction appeared imminent, and on the recommendation of Colonel Elliot, C B, Commissioner of Ashtagram, the indiscriminate killing and snaring of elephants was provided against by an order of the Chief Commissioner which appeared

in the year 1868. It is now illegal to destroy elephants unless they prove destructive to the crops in which case a special license must be obtained. An account of the Khedda department formed in 1874 for the capture and taming of elephants and of the operations under this head since has been given in Volume I. Notwithstanding all the captures made the numbers do not seem to diminish so much as might be expected.

Tigers are most numerous in the Heggaddevankote and Hunur Taluks, in the former being met with everywhere. But except in some portions of the north they are found wherever there is sufficient jungle to give them cover. Their numbers have greatly decreased within the last 100 years owing to the spread of firearms among the inhabitants and increase of cultivation. Buchanan gives a curious account of Periyapatna in this respect. In his time tigers had taken possession of the inner fort and especially of the temples to such an extent that it was unsafe to enter it even in the day time and the inhabitants of the outer fort were compelled to shut themselves up at sunset.

The usual method of destroying tigers is to mark one down in a thick patch of jungle and surround it with a strong net about 100 yards in circumference. It is then easily despatched. Great skill is shown by the *shikaris* who are generally of either Bedar or Uppahga caste in following this plan. Another way is to hang up a loose net across where the tiger is expected to go. He is then driven towards it and as it falls on him as soon as touched gets entangled in its folds when he is killed with spears.

Panthers are common all over the District. Bisooks are abundant throughout the ranges frequented by elephants. Bears are found in the highlands but not now in very great numbers. Sambar are not uncommon and spotted deer are numerous in the south of the District. Antelopes are now scarce owing to the great numbers shot and soared and it is to be feared that unless preserving is restored this animal will become extinct in the District.

Birds

Peafowl and jungle fowl are common in most of the jungles, and bustard on the plains.

Fish

The following are the Kannada names of the larger fish found in the District; Kurab, or handi, gende, bale, beli, kochal, muchal, ravu, avul, havu, aigin, kal-kove, kal-korma, giral, kun, godle, chani, kotu, kari, kechal, charl, chupped, and bachanige. Most of these make good eating, some are found only in particular localities, but many are found in rivers and tanks as well.

Domestic animals

The Amrut Mahal, Hallikar and Madesvara betta cattle, a full description of which has been given in Volume 1, are met with in this District. The rearing of Hallikar cattle receives special attention in the Nagamangala Taluk, particularly in about Kardihalli. The finest specimens of this variety are to be met with at Ganjam in Seringapatam Taluk.

The ordinary cattle seen in villages are of a poor description. This is partly owing to want of care and to starvation, and partly to the indiscriminate system of breeding in vogue. Special efforts are now being made to improve the breed of cattle through the help of the Live Stock Expert. Buffaloes, sheep, goats, swine and asses are numerous.

CLIMATE AND RAINFALL

Climate

This district is hotter than the Bangalore District, the excess of the annual mean temperature being nearly 15° . During the past 31 years, the temperature during the day exceeded 100° only four times during summer and only once the thermometer registered 50° in winter. The relative humidity ranges from 68 per cent in February to 82 per cent in November. Rainfall is over 25 inches over the whole district except in the south-eastern part of it. The following tables give the mean and extreme values of the various weather elements obtained at the Mysore Observatory since 1893. -

TABLE I.—Mean values of Meteorological records obtained at Mysore —

Month	Barometer at Mysore	Temperature in degrees Fahrenheit				Humidity aqueous vapour pressure in inches

April is the hottest month in the year with a mean maximum temperature of 91.3° and the highest temperature on record since 1893 is 100.9° registered on the 16th April 1906. January and December are the coldest months in the year, the mean minimum temperature for these months being respectively 60.1° and 60.5° . During the past 31 years the temperature has not fallen below 50° the lowest temperature on record being 50.0° registered on the 12th December 1895. The diurnal range of temperature is greatest in the month of March and least in July. The highest monthly and annual ranges obtained till now are respectively 39.8° and 18.1° .

The mean annual rainfall is 25.16 inches distributed over 49 days. In a normal year good showers can be expected in the months of May, September and October, the total for these months being over half the annual mean. The rainfall from December to March is only 1.15 inches. The yearly aggregate for the Hunnur and Heggaddevankote taluks is over 30 inches and the total for Kankankote is nearly 51 inches. The annual total falls below 25 inches in parts of the Chamarajnagar and Gundlupet taluks, this is probably due to the interception of the monsoon winds by the Western Ghats and the Nilgiris. The heaviest fall in 24 hours was 80.50 inches registered at Kankankote on the 16th October 1916. Since 1893 the deficiency in rainfall in no year exceeded 30 per cent of the normal and the deficit ranged from 15 to 30 per cent in 6 years.

The subjoined table gives the mean monthly and annual rainfall of the various rain gauge stations in the Mysore district —

TABLE III Normal rainfall in inches at the rain-gauge

THE PEOPLE

The total population of the District according to the census of 1921 composed of 6,59,118 males and 6 60 220 females excluding the Mysore City in which there are 43,783 males and 40 168 females

(2) There are 210 persons to a square mile. The following table indicates the density of population in the several taluks of the district

Name of Taluk	Population per Square Mile
	1921
1 Mysore City	8837
2 Mysore Taluk	92
3 Yedatore	374
4 Hunsur	165
5 Heggaddevanhote	94
6 Gundlupet	145
7 Chamaraajnagar	956
8 Nanjangud	319
9 T. Narasipur	42
10 Seringapatam	349
11 Mandya	303
12 Nagamangala	901
13 Krishnarajpete	66
14 Malavalli	309
15 Yelandur (Jagir)	315

The population of the City of Mysore which numbers 83 951 slightly affects the result. excluding this we obtain 226 persons per square mile. T. Narasipur is the most densely populated taluk containing 422 persons to the square mile the rate in Yedatore is 374 in Seringapatam 349 in Yelandur 315

CHRISTIAN MISSIONS

The Roman Catholic Mission maintains a Church and a school at Mysore with 87 pupils. There are two Orphanages separately for European and Indian girls with 148 and 62 orphans respectively. At Settiballi there is an Orphanage and a Hospital and Dispensary. There is an Industrial School for boys maintained by the Mission at Mysore. The Head stations in the District are Mysore, Settiballi, etc. with a number of sub stations.

The Roman Catholic Mission

The Wesleyan Mission maintains 9 Day Schools (including a Collegiate High School) and 2 Night Schools for boys with a total of 2 000 scholars. There are 7 Day Schools for girls with 750 scholars. The Holdsworth Memorial Hospital was opened in 1906 and is one of the largest Mission

The Wesleyan Mission

Hospitals in India. The Mission Press publishes a weekly Newspaper, *the Vrittanta Patrika*. The Hardwicke College is a Boarding School for Christian boys. Evangelistic and educational work is carried on at Mandya, French-Rocks, Nanjangud and Hunsur. In these towns there are 3 Boys' Schools and 3 Girls' Schools.

SECTION II - HISTORY AND ARCHÆOLOGY

A. HISTORY.

Legendary
History

A District traversed by the sacred stream of the Cauvery is assuredly not wanting in *puranic* legends, associated with every rapid, bend, island and hill in its course. Next to the Pāndu expedition sent by Yudhisthira, and Sahadēva's attack on Mahishmati, described with such singular details in the *Mahābhārata*, one of the oldest legends of an historical character, and not connected with the Cauvery, relates to a city named Manipura, in Kannada Haralukōte, the site of which is pointed out three miles south-east of Chāmāraj-nagar. It is stated to be the Manipura mentioned in the *Mahābhārata*, the princess of which named, Chitrāngada, was married by Arjuna, one of the Pāndu princess (*Ādi Parva*, 7826-7883). Babhruvāhana, the son of this marriage, in course of time became king of Manipura. A fight afterwards took place between father and son, owing to the horse destined by Yudhisthira for the *asvamēdha*, the defence of which devolved on Arjuna, having in the course of its wanderings to the Dakshina or south country come to Manipura (*Asvamēdhika Parva*, 2303-2431). Babhruvāhana, according to the local account ruled the country wisely and all his people were happy. The rains fell at the right seasons and the crops were abundant. Thus was Manipura equal to Indraprastha. This prosperity invited an attack from two giants named Nivāta and Kavacha, who bore a grudge against Arjuna. But Babhruvāhana applying to his father for assistance, the latter came to the rescue and destroyed

them. He then appointed Ānjanēya or Houmontha as guardian of the place and set up his image at each of the gates. The city is said to have been six miles square with a gate on every side the position of each being still indicated by an image of Ānjanēya. The inscriptions at the place are of the Hoysala kings 800 years old.

The earliest mention of Mysore or Mohishur is referred to the time of Asoka in 215 B.C. when on the conclusion of the third Buddhist convocation a *thero* was despatched to Mahishomondla as to Bonovūsi and other countries for the purpose of establishing the religion of Buddha. Of other events of those early times so far as they are connected with this District we have no certain knowledge until the rise of the Gongs. But an old Jain work of the 10th century says that Bhadrabahu when he came to the south in the 3rd century B.C. with Chandra Gupta and died on the journey at Srovana Belgōlo was on his way to the Punnata country. This must be the Punnad described below and corresponds with the Punnata mentioned by Ptolemy whence beryl was obtained in the Roman period.

The Ganga dynasty appears to have been established in the 2nd century and the Ganga kings ruled over the greater part of Mysore till about 1004 their principal territory being known as the Gongavadi Ninety six Thousand. They claim Kuvallala or Kolar as their original City in this country, but tradition credits them with a capital called Skandopura which is supposed to have been at Gajolhatti on the Moyar near its junction with the Bhavani beyond the south of the Chamarajnagar taluk west of Satyaman galom. However, in the 3rd century the capital was established at Talkod on the Cauvery, in Tirumokudal Norsipur taluk. At this period the south of the Mysore District was occupied by a kingdom called the Punnad Ten Thousand whose capital was at Kittipura identified by Mr. Rice with Kitar on the Kahban in Heggaddevankote taluk. This Ten Thousand country may correspond with the Padanad

or Ten-nād country of later times, of which the name survives in Hadinād. In the 5th century the Ganga king Avinīta married the daughter of the Punnād Rāja, Skandavarma, and his son Durvinīta seems to have absorbed Punnād into the Ganga dominions. Though Talkad continued to be the Ganga capital, the royal residence was apparently removed to Makunda (Channapatna taluk) in the 7th century, and in the 8th century to Manne (Nelamangala taluk).

Early in the 9th century the *Rāshtrakūtas*, whose capital was Manyakheta (Malkhad in the Nizam's Dominions), seized and imprisoned the Ganga king, and appointed their own viceroy to administer the Ganga territories. An inscription of the *Rāshtrakūta* prince Kambharasa, or Ranavaloka, probably the first viceroy, occurs in Heggaddevankote taluk.

Eventually the Ganga king was restored to power, and in the 10th century there were matrimonial alliances and the greatest intimacy between the Gangas and the *Rāshtrakūtas*. This was especially the case in the time of Būtuga, who married the *Rāshtrakūta* king's sister and whose son married the *Rāshtrakūta* king's daughter. He had secured the Ganga throne by putting to death the rightful heir, Rāchamalla, his brother, or half-brother. But an inscription in Heggaddevankote taluk shows that the chiefs of Bayal-nād and other parts refused to recognize his claims and fought for Rāchamalla. At this period the Chōlas were at war with the *Rāshtrakūtas*, and, led by their king Rājāditya, apparently entered the Mysore country in order to attack them, when Būtuga killed the Chōla king at a place called Takkōla (near Arkonam) and brought the war to an end. This was in 950 A.D.

Cholas

But in about 1001 a formidable invasion by the Cholas took place under the command of Rājendra Chōla, son of the reigning king Rājarāja. They succeeded in capturing Talkad and overthrew the Ganga power, which had ruled over Mysore for nearly a thousand years. Giving to Talkad the name of Rājarājāpura, the Cholas speedily possessed

themselves of all the country in Mysara south of the Cauvery together with that east from Srirangapatam, along with the Bangalore and Holur Districts. In accordance with their usual policy they imposed their own names on the conquered provinces and the south of the Mysore District thus became the Mudikonda Chola mandala the part in which Talkad was situated being called the Rājendra Cholaśālanād. Towards the west, partly in Mysore and partly in Coorg they subdued the Changalva kings of Nanjarayapattana and Puriyapattana who in consequence received the name Kulōtunga Chōla-Changalva.

Meanwhile the Hoysalas whose capital was at Dora Hoysalas. samudra (Halebid in the Belur taluk) had been gradually increasing in power. Vinayaditya who came to the throne in 1017 subdued the Malapas or hill chiefs who may be identical with the Danāyaks of Bettadakote (on the Gōpal-swami hill Gundlupet taluk). From the account given in Vol. II *Historical* it will be seen that during the confusion that ensued on the break up of the Ganga power nine brothers called the Nava Danāyak established themselves at Bettadakote and after splitting into two hostile parties the four victorious ones got possession of Nanjangud and avellan all the hill region from the south of Coorg to Goa and from Satyamangala to the Bisalo Ghat.

But soon after 1101 the Hoysalas gained a much greater accession of power under Bitti Deva (afterwards called Vishnuvardhana) who retook Talkad and drove the Cholas out of Mysore. The capture of Talkad itself was effected by his general Ganga Raja who was a representative of the old Ganga kings. Vishnuvardhana recovered all the Ganga dominions and took the title of Vira Ganga. In 1117 he claims to be ruling over a territory extending from Nangali (Mulbagal taluk) in the east to Barkanūr (in south Kanara) in the west and from Kangu (Salem and Coimbatore) Chora (Travancora) and Anamale (the hills of that name) in the south to Savunala (in Dharwar) in the north. The career

of the Hoysalas is given in detail in the general chapter on *History*. It will suffice here to say that on the final destruction of Dorasamudra by the Muhammadans in 1326, it was to Tondanūr (Tonnūr in Seringapatam taluk) that the Hoysala king retired

Vijaya-
nagar

In the 14th century, the Hoysala dominion came to an end, and the Vijayanagar sovereigns next became paramount throughout the south. Narasa, the founder of the third dynasty, captured Seringapatam in about 1495. A viceroy known as Srī Ranga Rāya, who ruled from Srīrangapattana (Seringapatam) the seat of his government, levied tribute in their name on the neighbouring chiefs and had under his direct jurisdiction the districts of Patna Ashtagrām and Mysore Ashtagrām, with outlying territories to the west. In the 16th century, Jagadēva Rāya of Channapatana (Bangalore District) held sway over the eastern and some of the northern parts of the District. At the same time, a line of kings was ruling Padinād, in the south of the District, with a city at Yelandur. There were also chiefs at Ummatur, Mugur and other places.

Mysore
Rajas

Among the feudatory chiefs, the Rājas of Mysore, the account of whose origin is given in the Second Volume of this work, rapidly rose to a position of independence. After evading the payment of tribute on various pretexts, Rāja Wodeyar, in 1610, succeeded in gaining possession of Seringapatam. The mode in which this was accomplished is involved in some obscurity. "The prevailing tale states that the viceroy Tirumal Raj, or Srī Ranga Rāya, as he is sometimes called, being afflicted with the *Rājpora*, or royal boil, the disorder most fatal to opulent and luxurious Indians, retired to the holy temple of Talkad, with the view of being cured by the interposition of the idol, or breathing his last before the sacred shrine, and that previously to his departure he had selected Rāja Wodeyar of Mysore for the confidential trust of administering the government in his absence, and

in the event of his death of transferring it to his kinsman and heir the Wodeyar of Ummattur. But on adverting to the animosities and jealousies which had prevailed for many years between these two persons and the recent attempt of the viceroy, only three years before, to remove Raja Wodeyar by assassination we must reject as contrary to all probability the tale of this singular bequest of confidence and friendship. Seventy six years had now elapsed since the subversion of the empire from which the viceroy had derived his original powers. This sinking and fugitive State, foiled in the attempt to re-establish its government at Penukondo, had now renewed its feeble efforts at Chondragiri. The viceroy himself was worn down with age and disease, his government long destitute of energy had fallen into the last stage of disorganization, faction, and imbecility. It is not improbable that foreseeing its impending destruction he concluded the best compromise in his power with his destined conqueror and the manuscript of Nagar Pootia even details the names of the persons probably of his own court who had combined (as it is stated with the permission of Vēṅkatapati Rāja who then reigned at Chandragiri) to compel him to retire. All that can be determined with certainty is the quiet retirement of Tirumal Rāja to Talkad where he soon afterwards died and the peaceable occupation by Raja Wodeyar of the fort of Srīngapatam which thenceforth became the seat of the government of his family. It is certain that until this period the Rājas of Mysore openly professed the religion of the Jōngam but many circumstances afford room to conjecture that it was about this time that they adopted the insignia and ceremonies of the sect of Vishnu and as the whole of the old court had been of that persuasion it is highly reasonable to suppose that the real or ostensible conversion of the new Rāja was one of the fundamental conditions of their conspiring to depose the viceroy. (Wilks *Hist. S. I.* 27)

The extensive possessions of Jagadēva Rāja of Channapatna were absorbed in 1630 and the subsequent conquests of the

Mysore Rājas speedily brought within their dominion, a territory which, at the death of Chikka-Dēva-Rāja in 1704, extended from the Palni hills, south of the Coimbatore country to Midagesi in the north of the Tumkur District, and from the borders of Coorg to Vaniambadi and Karnātic Ghur. That sovereign had with judicious policy maintained a friendship with Khāsīm Khān, the Mughal general from whom he had purchased Bangalore, now governor of Sirā, and through him with the court of Aurangzeb. On the death of Khāsīm Khān, in 1699, he sent an embassy to the emperor, then at Ahmednagar, with the view of obtaining a recognition of his extended authority, on which occasion it is alleged that the privileges were conferred of sitting on an ivory throne and of using a signet bearing the title of *Jagat Dēva Rāja*.

It is unnecessary in this place to follow the fortunes of the royal family throughout their subsequent career up to 1761, the date of Haidar Ali's usurpation of power, or to describe the conquests whereby this ruler enlarged the Mysore territories, including that of the rich capital of Bednur, the various wars in which he and his son Tipu Sultan engaged, the siege of Seringapatam by the British in 1792; its capture in 1799, the fall of Tipu and the restoration of the Hindu Rāj. These events have found full and able historians and will be found briefly described elsewhere, in Volume II.

After 1799, Mysore became the capital in place of Seringapatam. In 1809, owing to the increasing unhealthiness of the latter, the British troops were removed to Bangalore. A native regiment was quartered at Hirōd, or the French Rocks, a healthy spot a few miles to the north until 1867, when it was removed to a new cantonment at Mysore. But the site chosen for this, about three miles to the north, proved so feverish that the troops reverted to French Rocks, until the regiment was withdrawn altogether, in 1881.

The District formed at first part of the Patnada Rāyada or Subāyana, and afterwards of the Ashtagrām Faujdārī. The latter, in 1862, merged in the Ashtagram Division, which

included the Districts of Mysore and Hassan Divisions had been abolished before the Rendition in 1881 and the island of Seringapatam was then made over to Mysore. In 1882 the District was extended by the addition of several taluks from the Hassan District which was also abolished. There were thus fourteen taluks and three sub taluks besides Yelandur *jāgīr*, included in the Mysore District of which five taluks and one sub taluk were formed into the French Rocks Sub Division. In 1886 the Hassan District was restored but the limits of the Mysore District remained as they now are embracing the French Rocks Sub Division.

B ARCHÆOLOGY

The inscriptions relating to this District are included in *E C Mysore District Parts I and II*, and in the *Mysore Archaeological Reports* from 1900 to 1926. Among Hoysala temples of note are that at Basaralu Kikkeri Govindanahalli Somanathpur and Hosa Holalu. These are referred to at length in Vol II Chapters V and VI. The Mahalingeswara temple at Varuna in the antique Jaina style is also described in those chapters. The more famous among temples in the Dravidian style are those of Sriranganatha at Seringapatam the Nanjundēsvari at Nanjangud and the Chamundēsvari on the Chamundi Hill at Mysore. The temple of Terakanambi also belongs to this style. They will be found referred to at length in Vol II Chapters V and VI. The more notable Muhammadan buildings include the Gumbaz of Haider at Ganjam and the Summer Palace in the Darya Doulet. These are also described in Vol II, Chapter VI. The deserted image of Gommatesvara at Sravanagutta near Yelwal in Mysore Taluk is also deserving of notice. It stands on the top of a small rocky hill and seems nearly 20 feet high. It probably belongs to the 14th century (see Vol II Chapter V).

SECTION III ECONOMIC

GENERAL AGRICULTURAL CONDITION

Of the total extent of 13,39,433 acres under cultivation in this District during 1922-23, 87,571 acres or 6.5 per cent are irrigated by the channels drawn from the Kaveri and its tributaries and they are relatively speaking more independent of the variations in the seasonable distribution of rainfall than the other lands. Of the remaining extent, 36,802 are commanded by tanks and 12,15,060 acres depend entirely on timely rains.

The District depends on three seasonable rains, the Mungar in March and April, important for preliminary ploughing, and also for a catch of crop of Ragi and Jolm, the south-west monsoon in June and September, yielding the freshes and floods in the rivers and also facilitating the sowing and growth of paddy, ragi and other grains and the north-west monsoon in October and November sustaining and bringing the crops to maturity. The District average for three rains are 1.02 inches, 6.92 inches, and 12.72 inches respectively in 1922.

Agricultural stock is better than average in quality, and there is generally no lack of food or fodder for cattle, except in parts of Malvalli, Mandya and Nagamangala Taluks. Manurial facilities exist and leaf manure is resorted to for the rice fields, as also green manuring by growth and ploughing of manurial crops under river channels.

The average out-turn of the principal crops per acre ranges from 4 pallas in Heggaddevankote Taluk to 14 pallas in Mandya for paddy, from $1\frac{1}{2}$ pallas in T-Narsipur to $4\frac{1}{2}$ pallas in Mandya for Ragi and from 1 palla in Chamarajnagar to 4 pallas in Gundlupet for jolm.

Chief Agricultural statistics and principal crops

(1) The following table shows the statistics for the three years 1922-23 to 1924-25.

	1922-23	1923-24	1924-25
Area of the District	35,17,486	36,00,303	35,31,110
Area available for cultivation	16,21,060	15,58,231	15,65,861
Cultivable waste not in occupancy	1,40,819	77,421	79,121
Cultivable area under occupancy	14,80,841	14,80,810	14,86,137
Current fallow	1,11,108	1,45,265	1,10,563
Net area cropped	13,39,433	13,35,545	13,15,571

(2) The following table shows the area of different crops that were raised during the three years 1922-23 to 1924-25 —

	1922-23	1923-24	1924-25
Food grains and pulses	13 71 403	13 0 036	13 30 098
Oil seeds	93 041	51 571	80 96
Condiments and spices	15 286	16 6 5	14 400
Sugar	5 013	5 318	5 310
Fibre	4 093	4 263	4 407
Dyes			
Drugs and narcotics	14 459	15 041	16 718
Fodder crops	11 36	7 185	5 460
Miscellaneous	71 64	64 4 0	60 448
Total	15 97 024	15 34 160	15 76 150

(3) A table showing the number and extent of different holdings under cultivation in the District during 1922-23 1923-24 and 1924-25 is given below —

Year	Holdings not exceeding one acre in extent		Exceeding 1 acre and not exceeding five acres		Exceeding 5 but not exceeding ten	
	No	Extent	No	Extent	No	Extent
	1	2	3	4	5	6
1922-23	19 54	16 803	36 068	2 69 419	65 499	4 13 095
1923-24	20 194	16 628	1 2 234	2 91 500	73 158	4 87 319
1924-25	20 397	17 110	1 33 553	3 75 374	67 144	4 47 987

Year	Exceeding 10 but not exceeding 50		Exceeding 50 but not exceeding 100		Exceeding 100 but not exceeding 500		Above 500 acres	
	No	Extent	No	Extent	No	Extent	No	Extent
	7	8	9	10	11	12	13	14
1922-23	61 973	6 61 009	1 100	76 506	111		2	1 469
1923-24	3 646	5 60 499	1 73	86 628	173	5 824	3	164
1924-25	28 446	5 09 347	1 20	73 976	174	59 580	3	104

The following table gives the number of holders classified according to the amount of revenue paid during 1922-23, 1923-24 and 1924-25

Years	Holders paying assessment or Jodi of Rs 5 and under		Holders paying assessment exceeding Rs 5 but not Rs 25	
	No	Amount paid	No	Amount paid
1	2	3	4	5
1922-23	1,04,351	2,58,463	1,08,266	7,28,439
1923-24	86,144	2,51,798	1,15,715	7,17,015
1924-25	93,338	3,47,148	1,23,028	8,96,907

Years	Holders paying Rs 25 but not exceeding Rs 100		Holders paying Rs 100 but not exceeding Rs 500		Holders paying above Rs 500	
	No	Amount paid	No	Amount paid	No	Amount paid
	6	7	8	9	10	11
1922-23	23,285	5,47,921	898	1,64,875	8	6,057
1923-24	25,207	5,00,136	1,070	1,76,987	13	8,915
1924-25	21,491	5,17,282	851	1,42,655	8	8,390

AGRICULTURAL LOANS.

Different kinds of loans granted in the District are (1) Land Improvement Loans (2) Takavi Loans (3) Subsistence Loans and (4) Loans for irrigation wells

The following table shows the amount of loans granted for different purposes during the years 1920-21, 1921-22 and 1922-23.

Year	Takavi Loan Amount sanctioned	Subsistence Loans Amount sanctioned	Loan for irrigation wells		
			Amount sanctioned	No of Applicants	Amount sanctioned
1920-21	2,825	1,180	505		
1921-22	4,050	2,060			
1922-23	4,125	560			
1923-24	4,410	3,046			
1924-25	59,017	25,807			1,000

IRRIGATION

There are 191 Major tanks and 1274 Minor tanks in the District and the area irrigated by each is 62,809 and 23,312 acres respectively

The following table gives details of the various means of irrigation in the District —

Taluk	Tanks in action					
	Major			Minor		
	No	Extent Irrigated		No	Extent Irrigated	
		A	G		A	G
Mysore	11	1 010	21	86	554	3
Hunsur	2	1 508	15	535	857	34
Heggad devanhote.	0	1 005	2	49	517	18

ARTS AND MANUFACTURE

Manufac-
tures

The articles manufactured in the district are cotton cloths, Camblis, Woollen Rugs and coatings, essential oils, bricks and tiles. Other industries which are being carried on a small scale are, manufacture of furniture, silk reeling, manufacture of steel trunks and asbestos boards. There are many rice mills working in the district.

A Government Sandalwood Oil Factory has been established in Mysore for the distillation of oil out of the wood found in the State. There is also a silk filature at Mysore under Government management. The Essencflour Products of Mysore have established a reputation for the manufacture of essential oils which have been finding a large sale in the foreign countries. The Krishnarajendra Mill Ltd, at Mysore is the largest textile concern in the district.

The following statements give the large industrial establishments in the District and in Mysore City.

List of Large Industrial Establishments in *Mysore City and the Mysore District*.

Name of Establishment	Class or Description of Industry	Average number of persons employed daily	Whether worked by mechanical power or by hand power	Remarks

(b) Rural Industries.

The articles manufactured in the District are cotton cloths, *lamblis*, earthenware and jaggory both cane and date. A little silk-weaving is also carried on. Coarse country paper used to be made at Ganjam and Yedatore, but the manufacture has long ceased. The cloths of the

best quality are made in Mysore and Ganjam, but in nearly every village the ryots manufacture sufficient to supply their own wants. At Hunsur country carts are built. The old Government tannery here is now in private hands, while a leather factory is turning out boots, knapsacks, etc., of good quality which are much in demand. Excellent *lambis* also continue to be made at this place though foreign competition has tended to throw them out of the market.

COMMERCE AND TRADE

The principal exports of the district are rice, ragi, jola, chenna, horse gram, betel leaves, oil seeds, silk, tobacco, hides, sugar, sandalwood and sheep and the imports, hardware, piece-goods, ghee, cotton, wheat and salt. But this list is liable to variation every year as the seasons are bad or good. There is a great demand for grain from the west coast and Coimbatore and the Nilgiri market derives a portion of its supplies from the Mysore District. There is also considerable trade with Bangalore and Madras and to some extent with Bombay. Commerce is not confined to any one caste and a large number of the traders are Muhammadans, there are also a great many Lambanis employed principally on the Nilgiri road. There is a great demand for Mysore teak especially for use at the Kolar Gold Fields.

Exports
and Imports

The large merchants are chiefly residents in the town of Mysore and are for the most part of the Kunchigar caste. They may employ agents throughout the district to purchase up the grain in many cases giving half the price in advance before the harvest is reaped. By this means a few men of large capital are able in a certain minor degree to regulate the market.

Much of the trade of the country is carried on by means of weekly fairs or *santes* which are largely resorted to, and at Chunchankatte in the Yedatore taluk there is a great annual fair which lasts for a month. It is upon these that the rural population are mainly dependent for their supplies.

Accounts maintained by Railway authorities show that goods weighing from about eight to nine lakhs of maunds are annually received into Mysore City and about as much despatched from it. The value of these exports and imports is estimated approximately at about Rs 55 to 65 lakhs.

Marts

The largest weekly fairs are the following

Place	Taluk	Day	No of visitors
Santemarahalli	Chamaraj-nagar	Tuesday	3,000
Satanur	Malvalli	do	1,000
Nidugatta	Mandya	Wednesday	2,000
Ganganur	Tirumakudlu-Narsipur	Thursday	1,000
Hirod	Seringapatam	do	2,000
Mandya	Mandya	do	1,000
Terakanāmbi	Gundlupet	do	3,500
Malvalli	Malvalli	Friday	1,000

MEANS OF COMMUNICATION

- (1) Railways The Mysore State Railway, Metre gauge, runs through the district for about 117 miles. The Mysore-Bangalore section entering east of Maddur, passes on south-west through Mandya, Yelhyur and French-Rocks Stations, where it turns south and continues through Seringapatam, Paschimavahini, Mysore, Chamarajpuam and Kadakola, to Nanjan-gud. In the Arasikere-Mysore Section, entering Mandagere, it passes through Akkihebbal, Hosa-Agrahar, Hampapura Yedatore, Lalandevanhalli, Sagarkatte, Belagula to Mysore.

FAMINES.

Since the year 1891-92, there has been no famine declared of a serious nature. Now and then there has been failure of rains affecting the out-turn of crops and resulting in high prices of food grains and scarcity of fodder for cattle and water for both men and cattle. The years marked with failure of rains as above are 1891-92, 1898-99, 1901-02, 1908-09, 1918-19 and 1922-23. The Mysore District has decided advantages over other districts in matters of irrigational facilities under the channels drawn from the Cauvery and its tributaries. The distress or scarcity was not therefore at any time wide-spread and when present was confined chiefly to the dry taluks of Mandya, Nagamangala, Krishnarajpet and Malvalh.

In the year 1891-92 the North East monsoon failed with the result that the later crops suffered severely, fodder supply failed and the water supply became scanty. The outlook at the end of 1891 and the early part of 1892 was very gloomy and fears of a severe distress if not famine, were entertained. Prompt measures were taken under the orders of Government to alleviate the anticipated distress. Village relief works costing in all Rs. 1,500 were carried out in the taluks of Mysore, Gundlupet, Chamarajnagar, Naujanugud, Mandya and Malavalli which consisted chiefly of earth work to tank bunds. State Forests and Amrut Mahal kavals were thrown open for free grazing of cattle and as a means of enabling the raijits to provide themselves with food grains tank beds wherever applied for were given for cultivation in the taluks of Chamarajnagar, Naujanugud, Mandya and Krishnarajpet and water was allowed in the channels till after the 10th January for raising quick growing crops on wet lands. Relief was also afforded by grant of loans to the Weavers of Melkote, Mysore and Chamarajnagar the products being purchased by Government feeding the indigent classes in Mysore at the Maharaja's Chattram and providing labour to the cooly classes in the collection of Tangadi bark and bamboos in Government jungles.

The next years of inadequate rains 1898-99, 1901-02 and 1908-09 did not affect the condition of the people to any great extent and the situations were relieved by the rains immediately following. In the taluks of Mandya, Naganagala and Krishnarajpet however, there was a certain amount of scarcity of water and fodder.

As the result of the Great War the prices of certain necessities of life considerably increased requiring Government interference. An Officer to control their supply and prices was therefore appointed in 1917. Coupled with this the adverse and very unfavourable seasonal conditions in the following year and the prevalence of Influenza seriously affected the markets and the condition of the poor was anything but satisfactory. Thanks to the prompt and

wholesome measures adopted by Government, the situation was tided over without much difficulty and the rains towards the close of the year brought a thorough change for the better

The distress of 1922-23 was restricted to Nagamangala Taluk and that too to the 9 villages of Anche Chittanahalli, Cholasandra, Ankasapura, Mullakatte, Tyapanahalli, Ramadevanahalli, Sri Ramanahalli, Takkanahalli and Kelagere. It was only temporary in nature and relief measures were adopted in the shape of grant of Takavi and Land Improvement Loans, grant of tank-beds for cultivation, sinking of temporary wells to overcome water difficulty, throwing open of State Forests for free grazing of cattle, establishment of fodder depôt at Nagamangala and starting of relief works which consisted chiefly of tank maintenance and Village Improvement Works

SECTION IV ADMINISTRATIVE

DIVISIONS.

The district is composed of 13 Taluks and one Jagir. There are three Sub-Divisions. Four Taluks, Nanjangud, Chamarajnagar, Gundlupet, and T-Narsipur form the Nanjangud Sub-Division and Mysore, Hunsur, Heggaddevankote and Yedatore go to form the Mysore Sub-Division. The remaining 5 Taluks, *viz*, Seringapatam, Mandya, Malavalli, Nagamangala and Krishnarajpet Taluks form the French-Rocks Sub-Division. Maddur which was formerly a Sub-Taluk is only a hobli under Mandya, and French-Rocks till recently another Sub-Taluk is part of Seringapatam Taluk.

The following table shows the names of Taluks Hoblis etc —

Taluk	Area in Sq Mile	No of Hoblis	No of villages and Towns		Population in 1911	Population per Sq Mile
			Govt	Inam

JUDICIAL

There is one District Judge's Court and one Subordinate Judge's Court in the Mysore City and there are four Munsiffs Courts one at Seringapatam one at Nanjangud and two at Mysore. All these Courts try cases of a civil nature (1) Civil Courts

Criminal
Courts
including
Bench
Courts

Administration of criminal justice The District Judge tries all the criminal cases committed to sessions

The Deputy Commissioner, being the Chief Executive Officer of the District, is the District Magistrate, who supervises and controls the work of all other subordinate Magistrates He exercises appellate powers

There is one City Magistrate, with First Class powers whose jurisdiction extends over the whole City area He also exercises appellate powers.

The Special First Class Magistrate of Mysore, who has his jurisdiction over the Taluks of Mandya, Malvalli, Naga-mangala, Seringapatam and Kishnarajpet, also exercises appellate powers He also exercises II and III Class powers over the Taluk of T-Narsipur

There are four special Second Grade Courts at Hunsur, Nanjangud, Mandya and French-Rocks. Of these, the first two courts exercise the powers of the Magistrate of the 1st Class

All the three Sub-Division Officers are *ex-officio* First Class Magistrates by virtue of their offices The District Treasury Officer, Mysore, is also an *ex-officio* First Class Magistrate

All the Amildars, fourteen in number, are *ex-officio* Second Class Magistrates But the Amildar of the Yelandur Jagir is a Magistrate of the third class

The Amildar Magistrates of Chamarajnagar and Hunsur Taluks are empowered to try cases coming under the Breach of Contract Act

There are 15 Bench Courts, one in each of the Taluks and one at French Rocks

Village
Panchāyets

There are no Village Panchāyets in this district, exercising judicial powers But there are 44 Village Munsiffs' Courts which try cases of a Civil nature These are presided over by a committee consisting of 5 or 7 persons, the Patel of the village being the Village Munsiff of the Court.

The strength of the Taluk Boards varies from 16 to 20 and each Taluk Board consists of *ex-officio*, elected and nominated members

There is no appointment of non-Official Presidents for the Local Boards in the District but all the Local Boards have got their elected non-Official Vice-Presidents

The strength of the Village Panchāyets varies from 5 to 7, the Patel of the village being the *ex-officio* member of each Village Panchāyet.

The District Board has got jurisdiction over the local area placed under the charge of the Deputy Commissioner for the revenue administration of the district

Each Taluk Board has got jurisdiction over the Taluk which has been declared as such under the Mysore Land Revenue Code and includes the Sub-Division of a Taluk notified by Government in the *Mysore Gazette* including the Municipal area

Each Village Panchāyet has got a local area recognised by Government as a village for purposes of collecting the land revenue excluding the area constituted into a Municipality.

The total area of Local Boards excluding the municipal limits is 5,357 square miles. This total area includes also the jurisdiction of the Village Panchāyets

Functions of Local Boards

The functions of the District Boards are

(a) The construction, repair and maintenance of public roads and other means of communication

(b) The establishment, management, maintenance and visiting of schools, hospitals, dispensaries, markets, travellers' bungalows, musafir-khanas, rest-houses and other public institutions and the construction and repair of all buildings connected with these institutions

(c) The planting and preservation of trees on the sides of roads and on other public grounds.

(d) The construction and repair of public wells, tanks and water works, the supply of water from them and from other sources and the preservation from pollution of water for drinking and cooling purposes

(e) The establishment and maintenance of such relief works in times of famine or scarcity as may be entrusted to the charge of the District Board by the Government

(f) The establishment and management of cattle pounds including such functions of the Government and the Magistrate of the District under the Cattle Trespass Act 1871 as amended by Regulation VIII of 1892 as may be transferred to the District Board by the Government

(g) The management of such public ferries as may be entrusted to its charge

(h) The maintenance of any building or other property which is vested under the Local Board Regulation in the District Board or may be placed by the Government under the management of that Board

(i) Any other local works or measures likely to promote the health comfort convenience interest or welfare of the public

The functions of Taluk Boards are —

(1) Subject to the control of the District Board and to such rules as may be framed by Government in this behalf every Taluk Board shall within the area subject to its authority have the control and administration of all purely local road works and buildings maintained at its cost and also of all local services and institutions except such as the District Board may think fit to take under its own direct control and administration

(2) In respect of roads works buildings, services and institutions in the control and administration of the District Board every Taluk Board shall if the District Board so desires be the Agent of the District Board and as such agent shall exercise such authority and perform such duties as the District Board may from time to time in writing delegate to it under the rules framed by the Government in this behalf

The functions of the Village Panchayets are —

(a) The construction repair and maintenance of village roads including cart-tracks

(b) The planting and preservation of trees on the sides of roads and public grounds

(c) The lighting of the public roads

(d) Cleansing the public roads drains tanks wells and other public places in the village

(e) Carrying out the improvement works such as

(i) Constructing and repairing such tanks and wells and other works as will supply the inhabitants of the village with a sufficient supply of water for domestic use

(ii) Taking of measures tending to the economic improvement of the village in matters of education, agriculture, rural industries and trade

(iii) Providing facilities for travellers

(iv) Any other matter which the Government may declare to be fit and proper to be taken under the control and administration of the Village Panchāyets

The following table shows the particulars of receipt and expenditure of the Local Boards of the district for the last 5 years .

	1918-19	1919-20	1920-21	1921-22	1922-23

I There are three town Municipal Councils in the district ^{Municipa} excluding the Mysore City Municipality (this has been ^{lities} explained separately under Mysore)

- 1 Nanjangud
- 2 Chamarajnagar
- 3 Seringapatam

II There are 19 Minor Municipalities viz Yedatore Saligrama Hunsur, Periyapatna Heggaddevankate Saragur Gundlupet T Narsipur Bannur Mugur Talkad Mandya Maddur Malavalli Krishnarajpet Nagamangala French Rocks Melkate and Ramasamudra

The strength of the Municipal Councils varies from 9 to 18 and the total area of all the town and minor Municipalities is 36 25 square miles

The Sub Division Officers of Nanjangud and French Rocks Divisions are the Presidents of Nanjangud and Seringapatam Town Municipalities respectively and the latter is the President of the French Rocks Municipal Council also The Taluk Amildars are the Presidents for all the remaining Municipalities

Excepting the Mugur Ramasamudra Periyapatna Bannur and Talkad Municipalities the remaining Municipal Councils have their elected non Official Vice Presidents At Bannur and Periyapatna the local Medical Officers are the Vice Presidents and the Municipal Councils of Mugur Talkad and Ramasamudra have nominated non official Vice Presidents

The following table shows the receipts and expenditure of the Municipalities in the district in total for the years 1918 19 19 20 20 21 21 22 and 22 23 —

Year	Receipts	Expenditure	Total
1918-19	8° 855	1 03 406	1 17 491
1919-20	1 05 495	1 03 786	1 16 805
19 0-21	1 0° 704	91 138	1 9 007
1921-2	1 07 846	1 00 537	1 38 365
19 2- 3	1 16 802	1 17 083	1 38 184

POLICE AND JAILS

Police

The District consists of two circles, *viz*, Mysore, and French Rocks administered by the District Police Superintendents. There is one Assistant Superintendent of Police appointed to look after the administration of the Mysore City area.

Strength of the Police

The following statement shows the sanctioned strength of the Police in each of the circles during 1923-24

Name of the circle	Officers	Men
District Superintendent of Police, Mysore	77	418
Do do French Rocks	45	272
Assistant Superintendent, Mysore City	47	275
Total	169	965

In the administration of the sanctioned strength of the Force in the French Rocks Circle, there is a temporary force stationed at Krishnarajasagara works consisting of one Sub-Inspector, 3 Daffedars, and 25 men. Four Constables have been given to the Bluff for guarding the Treasury.

Two Prosecuting Inspectors and 2 Daffedars and 14 constables are attached to the Special Courts situated in each of the circles, *viz*, French Rocks and Mysore.

Cost of the Force

The total cost of the force with District Police work in rural parts amounted to Rs 2,80,367 in the year 1923-24 as detailed below

	Rs
Mysore Circle	1,23,927
French Rocks	84,843
Mysore City	71,597
Total ..	2,80,367

There is one District Jail situated in the Mysore City and 14 Lock ups in the District one in each Taluk Head Quarter and one in French Rocks

The following table shows the number of persons admitted in the lock ups in the District during 1923 and also the daily average number of each class

Name of class	Admitted during 1923			Daily average number of each class admitted		
	Males	Females	Total	Males	Females	Total
Convicts	430	10	440	163.87	50	168.87
Under trial	13	3	197	0.7	0.51	1.8
Civil	80			3.00		5.00

4 EDUCATION

This is the largest of all the Districts in the State in respect of extent and consequently of the number of schools and scholars also having 1 890 schools and 62 910 pupils. This is one of the two Districts which contain all grades of Educational institutions in them Bangalore being the other. Of the schools 3 were in 1923 1921 Oriental Colleges and 1 a Training College 9 High schools of which 7 were English and 2 Kannada. Again of the 9 High schools 2 were for girls and 7 for boys 109 Middle schools 1 182 Primary school 28 Special schools and 258 Village Indigenous schools both for boys and girls. From the figures furnished it will be seen that each school in the District served 2.9 square miles 1.4 villages and 696 population. A table showing the numbers and grades of the several institutions is given below —

	Sq. miles
Area	5 497.82
Inhabited Villages	2 730
Males	6 59 148
Females	6 60 220
Population Total	13 19 368

Name of school	No of Schools	Boys	Girls	Total
Colleges	4	216	Nil	} 62,910

INSPECTING OFFICERS.

Designation of the Inspecting Officer	Territorial Jurisdiction	Head-Quarter	Kinds of schools under control
<i>Mysore District</i> District Inspector	Mysore District	Mysore City	All middle and I C M schools
Assistant Inspectress of Hindustani girls' Schools	Mysore, Tumkur, Hassan and Kadur	Mysore City	All Hindustani and Middle Primary Girls' Schools,
Assistant Inspector, Malvalli	Malvalli and T. Narsipur taluks	Malvalli	Primary schools
Assistant Inspector, Mandya	Mandya	Mandya	do
Assistant Inspector, Nagamangala	Nagamangala and Seringapatam taluks	Nagamangala	do
Assistant Inspector, Krishnarajpet	Krishnarajpet and Yedatore taluks	Krishnarajpet	do
Assistant Inspector, City Range	Mysore City and Taluk	Mysore City	do
Assistant Inspector, Chamarajnagar	Chamarajnagar and Yelandur	Chamarajnagar	do
Assistant Inspector, Nanjangud	Nanjangud and Gundlupet	Nanjangud	do

Designation of the Inspecting Officer	Territorial Jurisdiction	Head quarter	Kind of schools under control
Assistant Inspector Urdu Primary schools.	Mysore District	Mysore City	All Urdu Primary schools in the District do
Assistant Inspector Kannada Primary schools, Hunsur	Hunsur and Heggaddivan kote	Hunsur	
Assistant Inspector of Kannada girls schools	Mysore District	Mysore City	Primary school for girls

There is a school for deaf mutes and the blind in Mysore City. This institution was founded in 1901 and is managed by a local committee with substantial aid from Government. Mysore City is the Head quarters of the Indian Association of Workers for the Blind which was started in 1917.

MEDICAL

This District stands next to Bangalore in regard to facilities for medical aid. The important major institutions situated in the City of Mysore are the Krishnarajendra Hospital, the Palace Dispensary and the Princess Krishnammamma Sanatorium. The other institutions situated in the City are —the old Agrahar Dispensary, the Brangere, the Nazarbad and the Weaver's Lane Dispensaries and the E. D. Hospital, Mysore. The Female Dispensaries are the Wesleyan Mission Hospital, Mysore and the Vani Vilas Hospital.

There are Local Fund Dispensaries in all the Taluk Head Quarters and other important stations, their number being 24.

There were on 31st December 1925 thirty eight dispensaries in the district as a whole, the total number of patients treated in them during the year being 4,98,361, both in door and out door, as against 4,68,543 in 1924. The total expenditure incurred in 1925 (calendar year) on establishment, medicine, etc. was Rs. 2,77,385 as against Rs. 3,01,078 in 1924.

VACCINATION.

The control over the Vaccination Department in the District is exercised by the Presidents of District Boards under advice by the Sanitary Commissioner. The establishment for the purpose consisted of 28 Vaccinators during the Calendar year 1924. The total number of persons vaccinated during the year was 26,799 and the total expenditure incurred Rs 10,303.

SECTION V GAZETTEER.

Agara.

Agara Agara, a village in the Yelandur taluk in the Mysore District. Population 4,261. It has four old temples dedicated to Rāmēśvara, Narasimha, Varadarāja and Durga all of which are in a dilapidated condition except the Narasimha which has been recently renovated.

In the Tamil inscriptions, the village is named Durgayār-agaram and in the Kannada Durgāgrahāra, thus showing that it derived its name from the goddess Durga of the place, though latterly the first portion was left out and the place came to be known as merely Agara. It will be seen from the Kannada and Tamil names of the village as given in the inscriptions that *agara* is only a Tamil corruption of the Sanskrit *agrahara*. But the *Sthalapurāna* gives a different derivation. It says that a king of the name of Vishnusarma, who, when on a visit to the place, was bitten by a cobra, got rid of the poison by his prayers to the deities Rāmēśvara and Narasimha, and that thenceforward the village became known as Agara (free from *gara* or poison). Of the four temples in the village, the Narasimha appears to be the oldest. The goddess in the Durga temple is a standing figure, about four feet high, with four hands, the upper holding a discus and a conch, the right lower in the *abhaya* attitude and the left lower hanging by the side. Outside, the base is decorated with a frieze of what look like *yālis*. In the recently restored Narasimha temple, the *garbhagriha* and *sukhanāsi*, which appear to belong to the original structure, are of an oval shape (*samputākāra*). The *navaranga* has two entrances with porches on the west and north, and opposite to the north entrance

is a cell in which the metallic image of the god is kept. Nara-
simha is a fine figure about four feet high with *śrabharāṭṭha* or halo
seated in the posture of *yoga* or meditation. The image is said
to represent five kinds of Narasimha a peculiarity not found
elsewhere, it represents *Yoga Narasimha* being seated in the
yoga posture. *Lakṣmi Narasimha* by reason of having a figure
of *Lakṣmi* sculptured in its chest. *Ugra Narasimha* on account
of the presence of a third eye on the forehead. *Jwala Narasimha*
as having flames represented near the ears and *Prabhlada Nara-*
simha on account of the presence of a figure of *Prabhlada* at the
side. The god in the *Varadaraja* temple about four feet high
holds in the upper hands a discus and a conch the right lower
being in the *abhaya* attitude and the left lower placed on the
waist. In the *navaranga* of the *Ramesvara* temple which has
two entrances with porches on the east and south are kept
figures of *Surya*, *Ganapati*, *Chandesvara*, *Virabhadra*, *Narayana*
and *Dakṣināmūrti*. The last is a seated figure about two feet
high bearing a snake an antelope and a book in three hands
the remaining hand being in the *abhaya* attitude. In a shrine
in the *prakara* is the goddess of the temple known as *Parvata*
vardham a standing figure about five feet high with four hands
the upper holding a noose and an elephant goad and the lower
in the *varada* and *abhaya* attitudes. This goddess is similar
to the one in the *Gangadhara*vara temple at Turuvekere.

There are nearly fifty *Tamil* inscriptions in the four temples
at *Ugara*. During the restoration of the *Narasimha* temple
many inscribed stones have been broken or chiselled out several
have been displaced and some more left on the site in an injured
condition so that there is scarcely any epigraph at the temple
which is complete. One of the fragments mentioning the god
which may on palaeographical grounds be assigned to the close
of the 10th century bears testimony to the antiquity of the
temple. There are also other fragments recording grants to the
temple by the *Huysala* king *Vishnuvardhana* and the general
Vishnu dandadhīpa. The car mantapa to the right of the temple
has also a large number of fragments built into it in different
places. The *Ramesvara* temple has also several inscribed
slabs scattered in the compound and several more built into
the roof of the shrine of the goddess. Fragments which have
fallen from the walls have been replaced by others thus adding
considerably to the difficulty of decipherment. The displacement

of the stones, even of the basement in some places, leads to the conclusion that the temple must have undergone restoration at some former time. The oldest record here seems to go back to the 11th century. All the walls of the Durga temple are engraved from the top to the bottom, but many slabs have fallen from the walls and are now scattered here and there or are buried in the *debris*. The earliest record here belongs to Kullōttunga-Chōla I. At the Varadaiāja temple, several stones of the inscribed basement have been removed from their places and thrown here and there.

There are at this place a number of private libraries containing valuable palm-leaf manuscripts. A good many of them are written in Grantha and Nāgarī characters. Some of them have been examined by the State Archæological Department.

Agrahāra-
Bachahalli

Agrahara-Bachahalli. A village in Krishnarajpet Taluk. Population 397.

To the south-east of the Hunisēsvara temple at this place stand three pillars, each about twelve feet high, bearing on their capitals figures of elephants. The elephants are about two feet high and face north. Each of them has a figure of Garuda seated on the frontal globes, which is shown as engaged in a tussle with a male figure seated on the back with some figures behind it. The male figure on the middle pillar has a female figure seated behind it, while those on the other two pillars have three male figures seated behind them. The pillars bear at their bases the inscriptions *E C IV* Krishnarajpet 9 and 10 and a new one discovered, all of the 13th century, which relate metaphorically how a line of chiefs who were the faithful servants of the Hoysala kings took upon themselves a vow not to survive their masters and at the decease of the successive kings committed suicide along with their wives and servants, male and female. The chiefs are said to have fought with Garuda and fulfilled their vows. The idea appears to be that these men thought that they were not in any way inferior to Garuda in their devotion to their masters, Garuda, the servant of Vishnu, being generally supposed to be a type of such devotion. One of the inscriptions is on a *vīragul* which is figured on Plate IX in the Mysore Archæological Report for 1914-15 as a specimen of this class of memorial

nes The two lower panels represent battle scenes In the
rd the hero who fell in battle is represented as being conveyed
celestial car with two hanours and in the fourth as engaged
worship near the linga

Algedu —A village near F Narsipur Population 2161 **Algedu**
The Gargyeshvara temple at Gargeshvari and the Janardana
naadevi and Virabhadra temples at Soale bear no inscrip
s on them The Mysore Archaeological Department has
ed many in the villages in this vicinity including Benakana
h and Nilsole In the Siddheswara temple at Algedu two
bs containing old records of the Ganga period one of them
ripurusha are found built into the ceiling In the Chennig
a temple an old inscription is to be seen on the basement

iddle of a verse Below the inscription are sculptures repre
ting a battle between two chiefs seated an elephants
gedu appears to be a place of considerable antiquity seeing
t almost all the epigraphs discovered here though frag
ntary are engraved in characters of the Ganga period

Ankanhalli —A village in Krishnarajpet Taluk Popu **Ankanhalli**
an 204 At this place are to be seen three *masthals* one
white granite and the other two of black stone The
mer is in the form of a post from which projects a
man's arm with the hand raised The other two have well
ved female figures, about two feet high, richly dressed
d ornamented

Ashtagram —Before the Rendition this was the name **Ashtagram**
a Division which included the Mysore and Hassan
istricts Till 1882 it was also the name of a Taluk then
anged to Seringapatam
There were formerly two taluks Pattana Ashtagram and
usur Ashtagram each of which originally contained eight
lages or townships bestowed upon the Brahmans as

charitable inams, whence the name *ashta-grama*, eight villages. The tract north of the Kaveri was called Pattana Ashtagrama, as attached to Seringapattana (Seringapatam) and that south of the Kaveri, Maisur Ashtagrama, from its connection with the City of Maisur (Mysore)

Attikuppa

Attikuppa - -The name of a taluk and town changed in 1891 to Krishnarajpet. (See Krishnarajpet)

Balagola

Balagola. A village in the Seringapatam taluk. Population 2,051

At the ruined Janārdana temple here, many inscriptions have been discovered by the State Archæological Department. To the south-west of the temple is a small shrine of some architectural merit, dedicated to Bhaktavatsala, a form of Vishnu. The structure is circular, about six feet in diameter and ten feet high, ornamented with three projecting bases and two cornices above, the whole once surmounted by a dome in brick and mortar similar to that of the main temple. Outside the latter is lying in a mutilated condition a huge Ganesa, and in front of it stands a lofty stone pillar, known as *Garudagamba*, about 40 feet high, with two iron windlasses placed within a cage-like iron structure on the top. The windlasses were apparently intended for hauling up lamps from below. An inscription on a similar pillar to the east shows that it once stood in front of a Kailāsēvara temple which is no longer in existence. On two pillars in front of the shrine of the goddess are sculptured a male and a female figure with folded hands which appear to represent either Pradhān Subbā Pandita, who built the front *mantapa*, and his wife, or some royal personage and his queen. The Nāga stones below the pipal tree here are very fine specimens of their class, several of them having a dancing figure of Krishna or a *linga* within the top coil.

Badanavalu

Badanavalu. A village in Nanjangud Taluk. Population 1,344.

At this place is lying mutilated a Jain figure about $3\frac{1}{2}$ feet high, with a well carved *prabha*, adorned with a mukkode or triple umbrella and flanked by male chauri-bearers. Near the Siddappa temple to the west is also lying a figure, about $3\frac{1}{2}$ feet high, of Nambi-Nārāyana. These figures bear

evidence to the existence at one time of a Vishnu temple and a Jain basti here

Bannur — A municipality in the Mysore District about 12 miles almost due east of Mysore City. Population 1157 Bannur

Among the temples here are the Kosakavara Hanumanthaswara Janurājya and the Sarovararajanya. The first temple is in ruins. There is a Tamil inscription on its south wall. To the west is a fine structure though now in a dilapidated condition. The Hanumanthaswara temple appears to be the oldest in the village because on its basement we have an inscription (T. Narasipur No. 122) of the Chola king Rajaraja who began to rule in 985 A.D. The Tamil introduction is written in Kannada characters. Tradition has it that the *linga* of this temple was set up by Hanuman the monkey god. The name Janmanjaneya temple is accounted for by the statement that the *Ānjaneya* of the temple was set up by the Madhva guru Vyasarajaswami who was born on the very spot where the temple now stands. The Sarovararajanya temple is so called because it is situated near a pond. The Hava temple is the largest in the place. T. Narasipur Nos. 129—131 are said to be found in a Janardana temple which is no longer in existence. Not a vestige of it is now to be found on the site which is locally pointed out as the one on which the temple once stood.

Bannur seems to be a place of considerable antiquity. It was apparently the residence of the Ganga king Sripurusha about the middle of the 8th century A.D. (T. Narasipur 115). Though called *Vahnipura* in modern inscriptions its name in old Kannada inscriptions is given as *Banniyur* and in the Tamil ones as *Vannur*. It is likewise called *Jananathachaturvedi manāḷa*.

The *jaṭre* of the goddess Hemadramma is celebrated here. The goddess is a four handed gold image about 15 inches high with glory holding a discus and a conch shell in two hands while the other two are in the boon-conferring (*varada*) and fear removing (*abhaya*) attitudes. Tradition has it that the original image of the goddess was being worshipped by Viḍyanāya who on becoming a *sanyasi* handed it over to a Vijayanagar king. But about a century ago the original image having been stolen the present one was substituted. The image is kept in the *laluk* Treasury and is handed over to the party concerned at the time

of the annual *jātre* The *jātre* commences on the 13th lunar day of the bright fortnight of Magha and continues for five days One curious incident in the *jātre* is worthy of note The goddess is worshipped by the Brāhmans, but, on a formal invitation attended with great ceremony by the Holeyas on the 14th lunar day, the goddess is carried in procession on the full-moon day to the Holeyas-quarters to accept the offerings of rice prepared by them with great ceremonial purity The goddess is, however, purified on the following day by the Brahmins This privilege of the Holeyas is said to have been procured thus The goddess had taken her abode at a place about five miles from Bannur, and on being invited to go to Bannur, agreed to do so on condition that a head was offered to her at every step Naturally people hesitated to accept this condition, but the Holeyas, nothing daunted, came forward ready to offer the desired heads, and as soon as the first head was cut off, the goddess, being pleased with the sincere devotion of the Holeyas, directed, out of her mercy, that tender cocoanuts might be offered in place of the heads In this manner, she was brought to Bannur When directed to ask for a boon, the Holeyas begged of her to accept offerings of rice at their hands once a year This was agreed to

The following table shows the income and expenditure of the municipality for 1921-22 and 1922-23

Year	Income	Expenditure
1921-22	3,270	2,166
1922-23	3,054	2,905

Basarhal

Basarhal A village about 15 miles to the north of Mandya Population 1,203

The Mallikārjuna temple here is a good specimen of Hoysala architecture, built in the 13th century, during the reign of the Hoysala king, Narasimha II It resembles in many details the Būchēsvara temple at Kōramangala, Hassan Taluk, and is in a good state of preservation At the two entrances in the north and south, there are two elephants and two small tower-like structures in front, with several screens on either side on the walls There is only one *dvārapālaka* left at the south entrance, while at the north both are missing We have on the outer walls

the usual horizontal rows of elephants, horsemen etc. in succession. Then comes the tower resembling that of the Hñchavara temple in design and execution. Only a few tiers below the *kalasa* are not sculptured. There is also in front of the tower the sculpture representing *Salā* in the act of stabbing the tiger as at *Kotamaugala* but the workmanship is decidedly inferior. Every one of the images on the outer walls has suffered mutilation. Fortunately the images inside the temple *Narayana*, *Ganapati*, *Sarasvatī*, *Chamundesvari*, *Saptamatrikā* etc. — are left intact. The ceiling panels in the *nataranga* show good work, the central one being the best of the lot. The temple is a three-celled one *Trikutachala* with the *linga* facing east. *Narayana* facing north and *Krishna* (so they say, but there is no image now) facing south. The temple is thus described in one of the inscriptions there — With wonderful painted sculptures from the bottom to the pinnacle with representations of pleasant scenes from the *Bhārata* and other works, the *Mallikarjuna* temple is an object of wonder as if it were Mount Meru itself studded with images on all sides. To the south of the temple is a large *mantapa* with a big ceiling panel containing in their proper positions figures of the *aṣṭadīkpalakas* (i.e. the regents of the eight points of the compass). To the east of the temple stands a round pillar, about 16 feet high, on the capital of which at the south and north ends stand respectively the figures of a man and a woman, both mutilated, the former appearing to attempt a fall to the ground. This pillar though uninscribed may be similar to the one near the Hoysaleswara temple at Halebidu around the base of which is engraved an inscription (*Belur* 112) recording the self-immolation of prince Lakshma. A similar incident is also recorded in *Shikarpur* 152 of 1060 A.D. It is stated that there is a similar pillar at Machalagutta, Nagamangala Taluk.

Rao Bahadur R. Narasimhachar has described this temple at length in one of his Archaeological Reports. He writes —

The temple faces east and has three cells, the main cell alone having a *sukhanasi* and a fine stone tower with the Hoysala crest in front. This main cell has a *linga* and the right cell a figure of *Surya*. The left cell though now empty must have had a figure of *Vishnu* as indicated by the figure of *Garuda* on the pedestal left in the cell and by the *diarapalakas* on the jambs.

of its doorway The *garbhagriha* of the main cell measures 6' by 6' and the *sukhanāsi* 6' by 5', which is also the measurement of the side cells The height of the building inside is only 6½ feet All the cells as well as the *sukhanāsi* have artistically executed dome-like ceilings The doorways are well carved, the *sukhanāsi* doorway having also perforated screens at the sides At the sides of the latter are two fine niches containing, as usual, figures of Ganapati and Mahishāsūramardini There are likewise Saptamātrikah to the right and fine figures of a Nāga and a Nāgini to the left Two more niches facing each other on the north and south have both figures of Sarasvatī, the one in the south niche being exquisitely carved The *navaranga* measures 15' by 15' with an inner porch or passage measuring 10' by 8' attached to it There are 9 domed ceilings in the *navaranga* and one in the inner porch The central ceiling, the best of the lot, has recently been removed with the object of admitting light All the ceilings are well carved, one differing from the other in design, and some showing traces of having been coloured once The four central pillars of the *navaranga* which are well carved have each an elegantly sculptured piece above the capitals There are also two smaller pillars in front of the side cells, which appear to have been subsequently set up to support the broken lintels above Beyond the side cells runs a veranda all round with perforated screens above on both sides of the inner porch The stylobate on either side of the inner porch has three well carved pillars, so that the number of pillars in the *navaranga* is in all 14 The *navaranga* doorway has a figure of Tāndavēsvara on the lintel and *dvārapālakas* at the sides The porch in front of the *navaranga*, measuring 10' by 5', has also a good ceiling and two entrances on the north and south with perforated screens at the sides The *dvārapālakas* at the sides of the north entrance are missing, while at the south entrance only the right *dvārapālaka* is left The front porch has, attached to it, a Nandi-shrine, measuring 10' by 8', supported by 4 pillars with a fine domed ceiling above The shrine contains a beautiful Nandi and has verandas with perforated screens above on the three sides, the front being left open The horns of the Nandi are joined to the head by iron nails inserted inside The north and south entrances of the porch have two fine elephants at the sides in front and a little distance beyond two fine pavilions The latter had once images in them, but they are now empty except the left

one at the south entrance which has a mutilated figure of Subrahmanya. A jagati or railed parapet runs below the perforated screens around the front face of the temple and around the Nandi shrine though portions of it are now gone. It has from the bottom upwards these friezes—(1) elephants (2) horsemen (3) lions with warriors at intervals sometimes a warrior being represented as stabbing the lions on both his sides (4) Puranic scenes (5) *makaras* (6) swans (7) miniature turrets and (8) a rail with occasional indecent figures as usual. It will be noted that the third frieze here has lions instead of the usual scroll work. Around the walls occur the same six friezes from the bottom above which comes a row of large images surmounted by a fine cornice. Above this again we have miniature turrets over single or double pilasters surmounted by the eaves. There are also figures above the eaves all round over the roof. Before noticing in detail the row of large images it has to be mentioned here that repairs recently done to the temple have well nigh destroyed its beauty. Eight huge sloping buttresses of brick and chunam measuring 9 x 9 x 2 have been built around the temple concealing a good number of the sculptures blocking the view and disfiguring the structure. Many carvings over the roof have been overlaid with chunam. A temporary stair of brick and mud to get to the roof also hides a number of figures on the south wall. Among the gods and goddesses represented are Vishnu 3 the same as Narasimha 2 as Kaliyamardana 2 as Rama 1 as Venugopala 1 as Trivikrama 1 as Sūrya narayana 1 as Vithala 1 as Lakshminarayana 1 and as Varaha 1, Brahma 3 Siva 6 the same as Umamahesvara 22 as Tandavesvara 1 and as Gajasuramardana 1. Ganapati 1 Bhairava 3 Hanuman 1 Harihara 1 Sarasvati 3 Durga 2 and Mohini 1. One of the figures of Brahma has for its attributes a goad a noose a rosary and a bird. Sarasvati has either 4 8 or 10 hands and Durga 4 or 16 hands. There are also three female figures with four hands holding a goad a noose a fruit and a rosary like Sarasvati 5 holding the first three attributes with a lily in place of the rosary and 1 holding a discus a conch a water vessel and a lotus. Among other figures worthy of notice are a male figure holding a three hooded snake a winnow an axe and a trident. Narasimha flanked by consorts a male figure holding a trident and a skull with a hell tied to the waist and Brahma seated with Sarasvati on the lap. Over the north entrance are

two seated figures of Vishnu, one of them holding a discus, a conch, a fruit and a rosary and the other, also with the first two attributes, having the other hands placed palm over palm. The latter figure has already been noticed when speaking of other temples at Ho:aholalu and Gōvīndanahalli. The former, which is rather peculiar, is also carved on the south side of the tower. The other figures on this side of the tower are Paravāsudeva and Brahma with Sarasvatī on the lap. The Puranic frieze illustrates scenes from the *Rāmāyana*, the *Bhārata* and the *Bhāgavata-purāṇa*. The entrance porch to the south of the temple is a fine lofty structure supported by 32 well carved pillars of which one is now missing. To the right is a niche of Ganapati with a good doorway and to the left a linga. Over the four central pillars is a well carved ceiling, $7\frac{1}{2}'$ by $7\frac{1}{2}'$, of *ashta-dīkṣālakṣaṇa* with Tāṇḍavēśvara in the middle. The beams over these pillars are decorated with bead work. To the south-east of the temple at some distance is a slab containing sculptures which are of interest as illustrating the meaning of the expression *sīdī-tale godu* (to offer the springing head). The reference is to a custom frequently alluded to in inscriptions, according to which a devoted servant took a vow that he would not survive his master and sacrificed himself on the occurrence of the master's death. This was done in several ways. But in the present instance, a bowed elastic rod was set up near the person with its end attached to the top-knot of the hair, so that the head, when cut off, sprang up with the rebound of the rod.

Bellur A village in Nagamangala Taluk. About 10 miles due north of Nagamangala. Population 1,723.

Contains several temples built in the Hoysala style of architecture, namely, the Gaurēśvara, the Mūle-Singēśvara and the Mādhavarāya. It has also a few temples in the Dravidian style besides a *baṭi* dedicated to Vimalanātha. In inscriptions of the 13th century, the village is called Udbhava-Narasimhapura. The Gaurēśvara temple faces south. The linga cell which faces east is surmounted by a stone tower with the Hoysala crest (a man stabbing a tiger) in front. The *sukhanāsi* has a good lotus ceiling with perforated screens and figures of Ganapati and Bhairava at the sides of the doorway. In the *navaranga* stands a figure, about $1\frac{1}{2}$ feet high, with 4 hands, two of them

being folded and the other two holding a trident and a drum. The porch too has a flat ceiling of 9 lotuses. The temple was erected in A.D. 1199. A finer structure in the same style is the Mule Singesvara now in ruins and half buried in the earth which faces east and has three cells surmounted by three fine stone towers. All the cells have a *sulhanasi* with perforated screens at the sides. The main cell has a linga, the left cell a figure of Lakshminarayana and the right a figure of Venugopala. The *garbhagriha* and *sulhanasi* of each cell have deep ceilings with lotuses. At the sides of the main cell are Ganapati and two fine Naga stones. The *nataranga* has four well carved pillars and nine ceilings, some flat and some deep with one four or nine lotuses. There is likewise in the *nataranga* a good figure of Bhairava. The porch too has a good ceiling. Of the 3 towers only one is intact with a beautifully executed *kelasa* or finial ornament in the shape of a water vessel. The outer walls have only pilasters. The figures in the temple which are all well carved deserve to be removed to the Madhavaraya temple and preserved there. They are sure to be injured if left where they are. This temple was built in A.D. 1221. The Madhavaraya temple is a larger structure in the same style with a good *mukha mantapa* and *patalankane* or hall on a lower level attached to it in front. It faces east and has 3 cells: the main cell has a figure of Vishnu named *Idi Madhavaraya*, the left cell a figure of Varadaraja and the right a figure of Venugopala. All the three figures are well carved. Madhava about 1½ feet high stands on a high pedestal flanked by consorts with 4 hands—the right upper holding a discus, the right lower a mace, the left upper a conch and the left lower a lotus. Only the main cell has a *sulhanasi* and is surmounted by a stone tower. At its sides are figures of Ganapati and Mahishasuramardini, not in niches as usual. The *nataranga* has 1 circular pillars and 9 well executed deep ceilings with single lotuses. The plan of the temple is star shaped. The outer walls have fine pilasters and turrets but no figures. A modern inscription is to be seen here. The ruined Kallesvara temple to the south is a Dravidian structure with a rectangular *nataranga* supported by two rows of 5 pillars each and a porch. The *nataranga* has mutilated figures of Ganapati and Subrahmanya. To the left of the temple is a shrine containing a fine though mutilated figure about 2½ feet high of Sarasvati standing with 4 hands—2 of them holding

a noose and a goad, the other two being in the *abhaya* and *varada* attitudes. The Virabhadra temple has an elegantly carved figure of the god with the usual attributes, flanked on the right by Daksha and on the left by Bhadrakālī. The Vimalanāthabastī has a standing figure, about $2\frac{1}{2}$ feet high, of Vimalanātha, the 13th Tirthankāra, on the pedestal of which are to be seen two inscriptions.

dapur

Bettadapur. A village in the Hunsur Taluk, 20 miles north-west of the kasba, on the Pīriyapatna-Hassan road. Population 1,530.

The isolated conical hill of Bettadapur, 4,389 feet above the level of the sea, is a conspicuous object to all the country round. The place is the principal seat of the Sankēti Brāhmans. It is said to have been in former times a Jain principality, founded in the tenth century by Vikrama Rāya, a fugitive from the inundation of Dvāraka. He, by treachery, overcame some Bēdar chiefs who opposed his settlement, and established himself in Vikramapatna, having subdued a territory yielding a revenue of 7,000 pagodas. He was succeeded by his son Chengal-Rāya, regarding whom some curious tales are related. His right ear, it is said, was like that of an ass—a secret known to none but himself and the barber who shaved him. The possession of the secret so troubled the latter that to relieve himself he whispered it to the sandal-tree in the courtyard of the palace, under which the king was accustomed to be shaved. Some time after, the king being pleased with the performance of some tumblers, at their request, presented them with the sandal-tree in the courtyard for the purpose of making a drum. They cut down the tree and made the drum. But when it was beaten it gave forth no other sound than the words the barber had whispered to the tree, and thus the secret became everywhere known. Other stories about Chengal-Rāya are that his arms reached down to his knees, and that the soles of his feet were covered with hair from his never putting them to the ground for fear of killing some living creature, which, according to the Jain faith, would be a heinous sin.

Chengal-Rāya was evidently a powerful king. He built Bettadapur in consequence of a dream of his brothers, extended his territory till its revenue amounted to 12,000 pagodas, and

formed with Nanjunda Arasu the Lingayat ruler of Piriyapatna an alliance which was cemented by the marriage of Vira Raja son of the latter to Mallajamma the daughter of Cheagal Raya. On this occasion he is said to have renounced the Jain faith for the tenets of the Lingayats. Nanja Raja of Piriyapatna 180 years afterwards took the possession and granted the chief a few villages as a jagir. In 1645 Piriyapatna and Bettadapur were taken by the Mysore army under the *Dalavayi* Dodda Raja. The jagir of the Bettadapur chief was however continued until resumed by Tipu.

The village is now not in a flourishing condition. The tobacco grown in this place is considered to be of the best quality. On the hill near by is a Trigonometrical Survey Station.

There is an Ājāncyā temple on the western slope of the smaller hill close to the hamlet called Koppal. The temple is of no architectural importance as it is only a small hut with a tiled roof. But the figure of Ājāncyā is interesting enough. It is a huge image carved on a slab measuring about 15 × 6 and it faces to the right. Its left hand holding a mace is placed on the waist. Its right hand is raised. On the right shoulder of the Ājāncyā sits Lakshmana fighting with Indrajit carved higher up on the slab. Below the Ājāncyā figure are carved a tiny figure similar to Ājāncyā called *Uparadhvaja* and also a fish and a tortoise. The name of the image is *Vira Hanumantha*. A few feet lower down the hill there is a path leading to a cave with a small opening of about 2 × 3. The cave is irregular in shape measuring about 15 × 20 and is utterly dark inside. At the left hand corner of the farther end of the cave there is a platform built in stone. To the right of the platform there is a small opening which leads to another cavity smaller in size than the front one. On the top of the platform two lingas are placed one in front of the other on a single *pitha* or seat. The lingas are very interesting and are of different sizes. The seat or *pitha* measures 1-9 × 1-0.

The bigger linga 4½ diameter and 7½ in height is behind the smaller one which is 5½ high and 3½ in diameter. On the top of the bigger linga are carved five tiny lingas in a circle while a figure of Parvatī is carved within a slit in the smaller linga. The *pitha* has got figures carved on all its four sides. The figures carved are—the five Paadava brothers Rama Krishna Lava Kusa Garuda Virabhadra Bhairava Harihara Brahma

Vibīṣhana, Balī-Chakravartī, Chann basava, Nīlālōchana, Ganapathī, Harischandra and Chandramatī. A few animals and birds such as a fox, dog, crow, elephant, mouse, and lion are also carved. A figure of the head and face of a female with earrings, necklace, and other ornaments surmounted by a serpent of seven hoods is prominently carved on the side of the *pīṭha* opposite to which water poured over the Lingas flows out. On the *pīṭha* above the hold there is written the name, Subramanyadēva. To the left of the serpent hoods a figure of Uchchhīṣṭa Ganapatī or Saktī Ganapatī as it is otherwise called, with a nude female on its lap is carved. A nude squatting figure with the name Jina written below can also be seen among the group. The significance of this group of figures, Hindu and Jaina coupled with the figures of animals and birds is, however, not clear and is therefore well worth a study from the Iconographical point of view. Such lingas with such figures have not been so far discovered anywhere else in the State, nor is any description of the carvings found in any of the well-known Āgama works.

To the right of Ānjanēya temple there is another cave measuring $10' \times 5'$ divided into two rooms measuring $4' \times 5'$ and $6' \times 5'$. On the eastern side is a hall measuring $17' \times 12'$ with two rooms $6' \times 6'$ and $8' \times 7'$, on the left side. This hall leads into another hall $17'$ by $18'$, the rock forming the roof sloping towards the north. This second hall opens into a third room, $8' \times 8'$ containing an image of Virabhadra. To the left of this innermost room there is yet another room measuring $15' \times 10'$ in front and $6' \times 7'$ behind. This contains a linga and a number of images on a platform to the left of the entrance. Directly behind this cave and about a $100'$ above it there is another cave called Kanakana Gavī having for its entrance a hole $1\frac{1}{2}'$ in diameter. To approach the entrance of this cave one has to ascend a steep rock firmly keeping one's feet one after another on twenty foot-holes made on it to facilitate one's mounting. In the inscription on this rock the four-holes are said to have been made by one, Kanakala-dēva of Haradur for the use of the ascetics that lived in the cave. On the western side of the hill and close to the steps leading up the hill there is another cave called Kalladevra-gavī. It contains a room measuring $3' \times 6'$ and opening into a smaller room within. These and others on the sides of the hill are said to have afforded secure shelter to women, children and valuable property of the villagers.

against the roads made by enemy about two centuries ago. The lofty hill to the South East of the village which is popularly known as Bettadapura Hill contains a temple dedicated to Mallikarjuna. There is a gateway with a lofty *gopura* at the foot of the hill. Just where the opening of the gateway is by the north wall a large serpent with seven hoods and a linga on its coils is carved out of the single rock. Similarly by the side of the south wall a huge tortoise has been carved. The walls and ceilings of the gateway show signs of some old painting. Two small shrines stand a few feet away in front and on either side of the gateway one of which contains Mohushasuramardini and the other a figure of the Bhairava. There are big bulls made in stucco on the top of both shrines. The metal figure of Todakasvara in the temple on the top of the hill is a very fine piece of South Indian workmanship in bronze and is well worth the attention of students of art. The temple (of Mallikarjuna) appears to have been struck by lightning at some period whence the common story that the lightning once a year pays a visit to Savara on the hill.

Biligiri-rangan hills — A range of hills in the south east of the Yelandur jagir running north and south for nearly 10 miles Biligiri
rangan hills

On the highest point 5091 feet above the level of the sea is the temple of Biligiri Rangaswami from which the hills take their name—in Sanskrit Sveta-dri. They are ascended on the Yelandur side by two Ghats one of which is three miles long very steep and only practicable for pedestrians the other now overgrown was nine miles long and just passable for horses. The slopes are tolerably thickly wooded the following being the principal trees found teak sandalwood bonnie matti bite kule kollubeḷi dadestu jeldu mira hannu bejlu kuggi. Long grass everywhere covers the hills often reaching from 10 to 18 feet in height which at the commencement of the hot season is fired. The only inhabitants are the wild aboriginal tribe of Soligas who occupy isolated hamlets composed of five or six huts made of mud and wattles and thatched with grass. Of wild animals elephants are generally numerous bison and sambar are common tigers panthers and bears are occasionally met with.

At the top of the *ghat* is a bungalow near which is a cinchona plantation. A deep trench surrounds the garden to protect it.

from wild elephants, which are continually threatening it With the exception of a small but thriving coffee estate, owned by the *shānbhog* of the temple, there is no other plantation on this side of the Biligiri-rangan hills, although the soil and climate offer great advantages Fever, which is prevalent at certain seasons, is one obstacle to settlers, and bad water, which at present has to be brought from tanks at some distance from the bungalow is another. The temperature of the Biligiri-rangan hills is moderate, the thermometer seldom falling below 60° or exceeding 75°

The temple, which is at a short distance from the bungalow, is a shrine of great antiquity, but except from its situation, close to the brink of a precipice, presents no point of interest It is said to have been repaired by Vishnuvardhana-Rāja Some copper-plates at the temple record a grant in 1667 by Muddu Rāja of Hadinād (See Yelandur) for the god, here called Bilikal Tiruvēngalanātha The revenue of the temple is derived from two villages granted by Pūrnaiya On the summit of a hill, 12 miles north from the bungalow, are the ruins of an old fort named Kanchi Kote, said to have been built by Ganga-Rāja of Sivasamudram for his son-in-law

To the left at the foot of the hill is a *brindāvana* known as Tolasamma's shrine and higher up in the middle is a cave, known as Kanakadāsa's Cave, in which the devotee Kanakadāsa of the 16th century, is said to have sung the praises of God The temple on the hill is a pretty large Dravidian structure with a *prākāra* or enclosure The god, though known as Ranga, is really Srīnivāsa It is a fine figure, about 4½ feet high, with 4 hands, the upper bearing a discus and a conch, the right lower in the *varada* attitude and the left lower placed on the waist Among the decorations are a girdle and a dagger The god is said to have been set up by the sage Vasishtha To the right in the *navaranga* are three cells in a line containing respectively the metallic figure of the god, a figure of Hanumān and a figure of Manavālamahāmuni, the last being a Srīvaishnava teacher and author who flourished in the 14th and 15th centuries Adjoining the temple of the god on the right stands the temple of the goddess who is known as Alarmēmangai (the Lady on the flower) In a shrine to the left in the *navaranga* are kept figures of Nammālvār or Sathakōpa and Rāmānujāchārya, and in another to the right of the entrance a figure of Vēdāntāchārya Sathakōpa was a Srīvaishnava saint who wrote *Tiruvāymozi*

and other Tamil hymns, and Vedantacharya was a Srivaishnava teacher and a voluminous author who flourished in the 13th and 14th centuries. The car festival takes place in the month of Vaishakha every year and on that occasion as also on Saturdays the Panchamas are admitted into the temple enclosure and allowed to pay homage to the god standing near the *dhya santha* or flagstaff. The Madigas of Bilhittu prepare with great devotion and ceremonial purity large leather sandals and offer them to the god once in every two years. The sandals measure 19 long 19 broad in front and at the heel respectively and 3 high. From the top of a precipitous boulder known as hamarikallu outside the *prithura* a grand view can be had of the surrounding landscape. A large number of tanks hills including the Nilgiris and the rivers Cauvery and Kapur are seen from here. At a distance of about 10 miles from the temple is a huge *champak* tree which is worshipped by pilgrims. Three big branches of the tree are said to represent the *trimurti* or triad of Brahma Vishnu and Siva and the round stones imbedded in its trunk are believed to be Salagramas (or round black stones symbolising Vishnu). Near at hand flows a stream known as the Bhargava. It is so called because according to the *Sihala purana* a bath in it absolved Bhargava or Parasurama from the sin of matricide. The spot is considered very holy.

Bindiganaval — A village in Nagamangala Taluk. Population 710. Bindiganaval

The Kesava temple at this place is a plain Dravidian structure. A wooden Garuda vehicle here is considered to be of special sanctity. It has many devotees who make vows to it and present it with jewels and cloths. Many Srivaishnava men and women of the Hebbar sect name themselves after this vehicle. It is now in a ruined condition. The head is gone and one of the shoulders is broken. It is said that the eyes of this Garuda are formed of two *sakramu* stones. Arrangements are being made for setting up a stone Garuda in its place.

Cauvery — See Kaveri.

Cauvery

Chamarajnagar Taluk — A Taluk in the south east. Area 174 Square Miles. Head quarters at Chamarajnagar. Chamarajnagar Taluk.

Contains the following villages and population.

Name of Hobli	Villages classified						Population of each Hobli
	Villages	Hamlets	Government	Sarva-manyas	Jodi	Kayam-gutta	
Chamarajnagar	25	8	25				24,137

Harave	42	8	38	4			22,230
Santhemarahalli	34	12	32	1	1		22,141
Chandakavadi	30	13	30				16,610
Ummatthui	20	23		17	3		20,912
Floating population							127
Total	191	69	163	23	5		121,614

Principal places with population

Amachavadi 2,167, Alur 1,218, Bagali 1,677, Badanaguppe 1,582, Bendaravadi 1,412, Chandakavadi 2,022, Ganaganur 1,984, Honganur 2,751, Haradanahalli 2,327, Harave 1,777, Jotigowdanapura 2,029, Kagalavadi 2,318, Kothalvadi 1,946, Kadulur 2,138, Kudeiru 1,889, Nangala 2,070, Nagavalli 2,236, Ramasamudra 4,751, Saragur 1,966, Sagade 1,320, Santhemarahalli 1,001, Thammadahalli 1,558, Ummathur 2,463

The taluk is watered by the Honnu-hole or Suvarnavati, which, rising beyond the southern frontier, flows with a north-easterly course past Ramasamudram and Alur into the Yelandur Jagu. Near Attikalpur it is crossed by the Gajanur dam, whence springs the Bandigeri channel, and by the Hongalvadi dam, from which a channel of the same name runs to the large tank of Ramasamudram near Chamarajnagar. Temporary dams are constructed by the raiyats of stakes, mats and sand after the monsoon is over and when the water of the river is consequently low. By these means are fed the Homma, Alurhalla, Alur Hosahalla, Saragui and Maralhalla channels. There are besides many large and small tanks.

Taken as a whole, the taluk is remarkably rich and fertile, consisting of a fine, well-watered, and level plain stretching away north-westwards from the slopes of the Bilgiri-rangan

hills, which form its eastern and southern boundary. The low forest land at the foot of this range was probably well populated in former times. The soils are of great variety ranging from black and rich red to poor and gravelly. The poorer soils are on the slopes and watersheds towards the west rapidly improving in depth and quality towards the east and in the valley of the Honnu hole.

Jola is the staple dry crop among the others. Absence of cotton cultivation is remarked. The black soils produce almost all crops peculiar to such soil including mulberry without irrigation, double crops in dry soil are not uncommon. In the wet lands comparatively little sugar cane is raised. The gardens of areca, cocoa nut and betel on the banks of the Honnu hole are very fine. Date groves abound in all the hollows when otherwise unoccupied the tree being here very prolific. A very short neglect of gardens is sufficient to convert them into dense date tops. There is some coffee cultivation under European management. The original elephant *kudilaks* are in the forests to the south east.

The area of the Taluk was thus distributed —

Cultivable (dry 98,200 + 10 14 garden 4 00)	— 1 11 618
Uncultivable (in taluk illak and rules etc)	63 643
State Forest	63 164
Inam Villages	43 327

Total 93 643

The total unoccupied area was 1 207 acres. The total Revenue Demand of the Taluk for 1922-23 was Rs 1 75 187 and for 1923-24 Rs 1 68 627 0 0.

The trunk road from Nanjangud connects Chamarajnagar with the railway there and continues on to Combatores by the Hasanur Ghat. A road from Gundlupet crosses this at the kasba and is carried on to Tirumakudal Narsipur. A branch from the Nanjangud road runs through Unimattur to Yelandur.

Chamarajnagar — A town situated in 11° 55' North lat 77° E long 36 miles south east of Mysore, on the Hunsur Ghat road and 22 miles from the railway at Nanjangud. Head quarters of the taluk of the same name and a municipality. Chamaraj
nagar

Population in 1921	Males	Females	Total
Hindus	2,972	2,975	5,947
Muhammadans	479	403	882
Christians	4	1	5
Jains	46	54	100

It is situated in a plain composed of black cotton soil and is a thriving place. The principal Jain *basti* was erected in 1117, under the Hoysala king Vishnuvardhana, by his general Punisa-Rāja, who claims to have terrified the Tōdas, captured Nilgiri, and made himself master of Kerala or Malabar. Its present name was bestowed in 1818 by the Maharaja Krishna Rāja Wodeyar of Mysore, who, on learning that his father, the unfortunate Chāmarāja Wodeyar, was born there, resolved to dedicate the town to his memory. He accordingly changed the name from Arkotara to Chamaraj nagar, and in 1825 founded there a large temple to Chāmarajēsvara. This he endowed in 1828 with *sarvamanyam* villages yielding a yearly revenue of about Rs 17,000 and an establishment consisting of an Amildar and 157 subordinates.

The Chāmarajēsvara temple is a large structure in the Dravidian style built in 1826 by Krishna Rāja Wodeyar III in memory of his father Chāma Rāja Wodeyar. Inside there are 3 cells standing in a line, the central one having a *linga* named Chāmarajēsvara after Krishna Rāja Wodeyar III's father, the left one a figure of Pārvatī named Kempananjamāmba after his mother and the right one a figure of Chāmundēsvari, the tutelary goddess of the Royal family. To the right and left in the *navaranga* there are 6 cells with *lingas* named after the 6 other queens of Chāma Rāja Wodeyar. At the inner sides of the *navaranga* entrance are figures Sūrya and Chandra. Inside the *prākāra*, there are small shrines all round containing images or *lingas*. The south shrines have figures of the 63 Saiva devotees, the north ones figures of Śiva representing his 25 *līlās* or sports and the west ones *lingas*, set up in the names of the king, his queens and other relatives. Every one of the shrines has a label over the door-way and every brass-plated door-way has an inscription on it. Altogether 50 such labels and 33 such inscriptions have been noticed. Some of the *līlamūrtis* of Śiva are well executed. In a shrine to the right are found statues

as well as metallic figures of Krishna Raja Wodeyar III his four queens and Nanjaraja Bahadur standing with folded hands with labels on the pedestals, the statue of the king having also a Sanskrit verse engraved on its pedestal. The top parapet round the temple contains mortar figures representing varieties of Gan sa etc. with labels below. Altogether 56 such labels have been noted. In the Virabhadra temple stands a big figure of Virabhadra with sword and bow and arrow for its attributes. There is also a figure of Bhadrakali his consort standing at the side with the same attributes. Such figures were also seen in the Gangadhareswara temple at Seringapatam. There is a seated figure of Paravatha in the Paravatha temple with his Yaksha Dharavendra seated in a separate niche and his Yakshi Padmavati standing in a separate cell to the left. The latter is said to have been brought from Terakanahli. There is also another standing figure of Paravatha canopied by the seven hoods of a serpent said to have been brought from Haralakote. The structure known as *janani mantapa* built to commemorate the birth in A.D. 1774 of Chama Raja Wodeyar father of Krishna Raja Wodeyar III at Arkotara the former name of Channarayana has a pretty appearance with paintings on the walls and a flower garden in front. The pond known as Dodde Arannakolu which supplies drinking water to the town was built by Kanthirava Narasa Raja Wodeyar (1638-1669) and named after his father-in-law Dodde Urs of Arkotara.

Two miles east of the town is the populous suburb of Ramasamudram containing 1693 people near to which are the ruins of an extensive city of antiquity whose name according to tradition was Manipur.

Munisipal Funds	1911	1912-13
Income	8314	15030
Expenditure	6194	12065

Chamundi — A rocky hill two miles south east of the fort of Mysore rising to a height of 3189 feet above the level of the sea. Owing to its isolated position and precipitous sides it renders the position of Mysore conspicuous from afar. The oldest temple on the hill is that of Marbbala or Mahabaleswara which was endowed by the Hoysala king.

Vishnuvardhana in 1128, and in 1620 by the descendant of the Vijayanagar kings, ruling at Chandragiri. This temple stands to the south of the Chāmundēsvarī Temple.

The hill takes its name from the goddess Kālī or Chāmundi, the consort of Śiva, held to delight in blood, who is worshipped in a temple on the summit. Human sacrifices were common here in old times, but were rigorously put a stop to by Haidar. Krishna Rāja Wodeyar III repaired this shrine in 1827 and furnished it with a tower. The temple is a fine quadrangular structure and is a landmark for many miles round the city. In 1848 he presented it with the *Simha-vāhana* and other animal cars used in processions. A flight of stone steps leads to the top of the hill, and two-thirds of the way up, cut out of the solid rock, is a colossal figure of Nandi, the holy bull on which Śiva is mounted in the mythological sculptures. The height of the figure is not less than 16 feet, the animal is represented in a couchant posture and hung with trappings and chains of bells. Although the carving is in no way extraordinary, yet the gigantic size, the correct proportions of the statue, and the labour that must have been expended on it render it inferior to no work of art of the kind in South India. Dodda Dēva Rāja, who ascended the throne in 1659, and of whose character religion was the chief feature, was the author of this remarkable monument of devout zeal.

The building of the steps, 1,000 in number, is likewise attributed to him. The Chāmundēsvarī temple on the top is a pretty large building with a fine *gōpura*. One of the gold jewels, called Nakshatramālīke, a present from Krishna Rāja Wodeyar III, is of interest as having 30 Sāṁskṛit verses inscribed on it. The inscription on another tells us that it was presented to another temple namely, the temple at Uttanhalli. We have also here in a shrine statues of Krishna Rāja Wodeyar III and his queens with the names engraved on the pedestals. The king's statue, about 6 feet high, is well executed. In the *prākāra* of the Mahābalēśvara temple, two old epigraphs of the Ganga period have been discovered near a Bilva tree. Five more have also been found on the temple vessels and brass-plated door-ways. Further discoveries include a Tamil record near the *mahādīāra* and a Kannada one on a rock to the south-west. The oldest record so far discovered on the hill goes back to *Cnca* 950 A.D. The Isvara temple at Hale Bogadi is worth inspection. In the *naraiṅga* are figures of Bhairava, Durga and Sūrya, the last flanked,

as usual by female figures armed with bows. There is also a slab here containing in the upper panel a figure on horse back with an uplifted sword in one of the hands attended by an umbrella bearer while the lower one has the figure of a pig attacked by dogs both before and behind. There is a small shrine to the north containing separate figures of *Saptamatrikah*.

There is a small village on the hill consisting of about 100 houses. To the east of this is the beautiful *Ishidri Hill*. From this side there are several beautiful roads and a fine bridal path leading up to the Hill. The approach on the northern side of the hill is a flight of steps about 1000 in number. At convenient distances electric lights are placed which are lighted every night and form an additional splendour to the city. On the top of the Hill is a residence of His Highness the Maharaja used on the occasions of his visits there. A Travellers Bungalow has been newly constructed for the use of travellers.

Chinkuruli — A village in Krishnarajpet Taluk. Popula- tion 1027.

Near the Anjanéya temple at this place are three *Matsi* gudi or *Mabasati* shrines built in honour of a *matsi* or woman who immolated herself on the funeral pyre of her husband. They consist of a sculptured slab at the back which is the object of worship with other slabs for the roof and sides. The sculptured slab is known as *matsi kal* (i.e. *mabasati kal*) the sculptures usually found on it being a woman's arm bent upwards at the elbow with or without the figure of the woman. But in the present instance we have not only raised hands but also figures of *Ganapati* *linga* elephants etc. The slabs too are unusually large 2 of them measuring $3\frac{1}{2} \times 2\frac{1}{2}$ and the remaining one $5\frac{1}{2} \times 4$. The broader slab represents the self immolation of 4 wives the others of one or two.

It was at this place that *Haidar Ali* was attacked by the *Mahrattas* and his army totally *disorganized* and utterly routed with great slaughter on the 5th of March 1771. *Haidar* fled on horseback to *Seringapatam* and *Tipu* escaped in disguise.

Cholasandra — A village in Nagamangala Taluk. Popula- tion 79.

To the north of this place is situated on an eminence a ruined basti of 3 cells. It is a good structure in the Hoysala style built in A D 1145, according to an inscription (see *E C* IV, Nagamangala 76) at its entrance

Chunchan-
katte

Chunchankatte A dam across the Kaveri, in Yedatore Taluk, built in an advantageous position, a short distance from the head of a narrow gorge called Danushkoti, and a few hundred yards above the spot where the river falls from 60 to 80 feet in a succession of cascades. The Rāmasamudram channel led off from this dam, together with the anicut itself, was constructed by Chikka-Dēva-Rāja Wodeyar, who came to the throne in 1672. The rapids in the river invest the spot with great sanctity. Hence a large festival and a cattle show is held here annually in January lasting for over 15 days, attended by upwards of 30,000 people.

Dodda
jataka

Doddajataka A village in Nagamangala Taluk. Population 367.

The Sōmēsvara temple here is a Hoysala structure erected in A D 1179.

Devalapura

Devalapura A village in Mysore Taluk. Population 651.

The inscription *E C* III, *Mysore* 25 found here takes us back to the reign of the Ganga king Śrīpurusha of the 8th century. There is a small shrine at this place containing the *gaddige* or tomb of Mantesvāmi. A stout cane known as *Kandaya* is kept inside along with a few other things. *Kandaya* is said to be of two kinds—*alagu-kandaya* and *Basavanna-kandaya*—according as it is surmounted by a blade (*alagu*) or a figure of Basava. It appears that on certain occasions a man of the village possessed by the god, enters into the shrine, takes hold of the *kandaya* and wears the spiked sandals kept there.

Devanur

Devanur. A village in Nanjangud Taluk. Population 2,134.

The village has several small temples. The Nārāyana temple has a good figure, about 3 feet high, of Nambī-nārāyana flanked by consorts. The Puradayya temple to the

south of the village has a bull seated on a pillar (*upparige basava*) This portion of the village is said to be the site on which an old village named Pura once stood Similarly the site near the Malleswara temple is said to have once been occupied by a village named Bagūru

Elaval - (also called *Ilavala*) - A village 9 miles north west of Mysore, at the junction of the roads from Mysore and from Seringapatam to Coorg Head quarters of the Ilavala hobli Population 1155 Elaval

On the rising ground to the west is the Yelwal Residency erected in the time of the Hon Arthur Cole on designs taken from the Lanniskillen seat in Ireland The extensive stables and out buildings have lately been partly dismantled and the materials taken to Mysore to be used for some of the new offices there The large park had become overgrown with *lantana* and advantage has been taken of this to sow a great quantity of sandal seed to the plants from which it acts as a nurse until they are grown up A mile or two to the south was the old Hikal race-course with several bungalows (now in ruins) erected for the occupation of the chief officers and guests at the races About 3 miles north is *Sravana gutta* with an abandoned Jain statue of Geminari which resembles the colossal one at Yalur (South Kanara) in being represented with a grave dimpled smile

French Rocks - A town formerly a military station, 4 miles north of Seringapatam on the Mysore-Nagaimangala Road It is now the head quarters of the French Rocks Sub Division There is a Special 2nd Class Magistrate's Court It is a Municipality French Rocks.

Population in 1921	Males	Females	Total
Hindus	966	812	1 778
Muslimans	36	9	45
Christians	85	19	104

The French in Haidars and Tipus service were encamped here wheaco its European name A regiment of Madras Native Infantry was quartered in the cantonment until 1881, when it was given up as a military station

by an entrenchment, the remains of the old walls carried round its sides. It is generally enveloped in clouds and mist whence its name of Ilimavail Gopalswami betta, but when the weather is clear, it commands a most extensive view of Mysore and the Wund. Inside the old fort is a temple dedicated to Gopalswami who is said to be heard blowing on his flute on certain occasions. Allusion has already been made to the history of the place. It was fortified by Somana Danayak and bore the name of Bettida kote or hill fort. The scene of the perilous leap by one of the Danayaks on the north side on the occasion of its capture is still pointed out. At present the hill is uninhabited except by two Brahmans belonging to the temple. An annual car festival is held there.

A few of the inscriptions found in the Mysore District (F C III and IV) give further particulars about the chiefs of the kote. Since kote being the shortened form for Bettida kote. In Nanjangud 47 dated in 1504 A D it is called Mudan kote or Eastern Fort. The chief city of the principality seems to have been Hara, in the south west of the Nanjangud taluk. The following table indicates the succession of the chiefs of this line as gleaned from inscriptions —

Immadil	va Wodeyar	
Nanja Rāya	Wodeyar	1459
Deva Rāja	Wodeyar	1507
Śravanna	Wodeyar	1504
D	odeyar	151
Simappa	Wodeyar	
Chenna Rāja	Wodeyar	151
Kōte	Wodeyar	1513
Mādhava Nāyaka		1530 1548
Dodda Mallarāja	Wodeyar	1559
Mādhava	Nāyaka	
Linga Rāja	Wodeyar	1650 1654
Clennod	ya	
Nanja Rāja	Wodeyar	1669

Their titles, where given, are very distinctive, being—*mahā-mandalēsvara Chera-Chōla-Pāndya-mūvanu-nāyara-ganda* (Champion over the three kings Chēra, Chōla and Pāndya), *Nilagiri-sādanakodeya*, *Nilagiri-nādālva* or *Nilagiri-uddhaina* (subduer, ruler, or protector of Nilagiri, or the Nilagiri country) But in *Heggaddevankote* 41 dated in 1569, Mādhava Nāyaka is given the title of supreme ruler Nilgiri is the highest point in the Western Ghats overlooking Malabar, and is situated on the western border of the plateau to the whole of which it gives its name of Nilgiri mountains

The inscriptions themselves are of no importance But *Heggaddevankote* 71, which has been assigned to 1572, states that it was a grant to provide for the *ashta-bhūti*, or eight kinds of ceremonies for the god Bhairava of Bayalnād

Gōvīndan
halli

Govindanhalli. A village in Krishnarajpet Taluk, about 4 miles north-east of Kikkeri Population 718.

The Panchalinga temple at this place is a grand rectangular structure in the Hoysala style, measuring 140 feet by 45 feet If we include the porch and Nandi-mantapa on the east, the width would be 63 feet It faces east and consists of 5 cells standing in a line surmounted by good stone towers There are two doorways on the east flanked by *dvārapālakas*, opposite to the 2nd and 3rd cells from the south, with a covered porch and an adjoining Nandi-mantapa in front The porches have two entrances on the north and south Every cell has a *garbhagriha* and a *sukhanāsi*, and both of them have deep ceilings with lotus buds The *sukhanāsi* doorways are well carved, they are flanked by perforated screens and have a figure of Umā-mahēsvara on the lintel The door-lintel of the cells has a figure of Gajalakshmi A rectangular hall, 120' by 20', consisting of 3 rows of 18 *ankanas* and supported by 3 rows of 17 piers, runs in front of the cells There is an additional pillar in the centre, built of mortar, set up as a prop to a broken beam The east wall of the hall has perforated screens all through with an adjoining inner veranda Each cell is flanked by two good niches, the right one containing, as usual, a figure of Ganapati and the left one a figure of Mahishāsūramardini The niche to the left of the 5th cell from the south is now gone We have in its place a seated figure of Sarasvatī, and the figure of Mahishāsūramardini

which ought to be there is now kept in a niche adjoining the north wall. Other figures adjoining the north wall are Subrahmaṇya in a niche, Bhairava and Mahiṣasuramardīnī. Adjoining the south wall we have Virabhadra in a niche and Saptamatrikā. Other figures between the cells are Sarasvatī, Saptamatrikā, two fine Nagas and Umamahesvara in a niche. Each cell has a Nandi in front in the 3rd *ankana* except the 2nd and 3rd from the south whose Nandis are in the front Nandi mantapas. Of the ceilings in the hall 13 are deep with single lotus buds, 23 flat with 1 blown lotus each and 9 flat with 9 blown lotuses each. The porches and Nandi mantapas have also deep ceilings with lotus buds. The sculptures on the outer walls mostly resemble those of the Brahmesvara temple at Kikkeri. Here too the figures are all defaced and whitewashed in addition. The pilasters with turrets have sometimes figures carved on them. Some figures have no turrets over them while others have instead elegantly carved small triangular canopies. In some cases the figures are between two pilasters with only one turret over them. The sculptures which are well executed do not occur in continuous sheets as at Halebidu and other places but with proportionate intervals as at Kikkeri. The east outer wall has at the south end a fine figure of Gaṇapati surmounted by a beautiful turret and a similar figure of Mahiṣasuramardīnī at the north end. Between Gaṇapati and the first porch occur 12 of the 24 *murtis* or forms of Viṣṇu with labels below giving their names. Between every 2 Viṣṇu figures stands a figure of Garuḍa with folded hands. There are besides female figures at intervals carved on pilasters with turrets over them. Between the 1st and 2nd porches are depicted the 10 incarnations of Viṣṇu, Buddha being shown as the 9th incarnation. Here also occur female figures as before. From the 2nd porch to Mahiṣasuramardīnī we have as before Viṣṇu figures with Garuḍas and intervening female figures. There are instead of the remaining 12 only 9 figures of Viṣṇu and these too without labels. But it has to be mentioned here that this portion of the wall as well as portions of the west wall has several blocks left uncarved. We may now notice the figures on the west wall in some detail. Here there are sculptures on the three outer walls of every cell and also on the connecting walls between the cells. The latter have as a rule an empty niche with female *chauri* bearers at the sides. Beginning from the east end the south wall including

the south wall of the first cell, has these figures—Paravāsudēva, standing Sarasvatī with 4 hands, Indra and Sachī on Airāvata, Garuda bearing Lakshmi and Nārāyana, Bali making a gift to Vāmana, Trivikrama, Kāliyamardana, standing Sarasvatī with hands, Narasimha killing Hīranyakasipu, Prahlāda, accompanied by a male and a female figure, Vishnu and Garuda with folded hands. The figures on the west and north walls of the first cell are respectively Tāndavēsvara flanked by Ganapati and Brahma to the left and by Subrahmanya and Vishnu to the right, and Umāmahēsvara flanked by dancing Sarasvatis with Vēnugōpāla and Mahīshāsūramardini at their sides. The second cell has on the south wall Bhairava, Durga, Rāvana lifting up Kailāsa, dancing Ganapati and dancing Sarasvatī, on the west wall Rāma, Lakshmana, Sīta, Hanumān and Gōvardhanadhārī, and on the north wall, Durga, 2 drummers, a dancing female, and two monkeys holding a fruit in a vertical position. The figures on the south wall of the third cell are Harihara, Paravāsudēva flanked by female figures, and Lakshminarasimha, on its west wall, Yōga-Narasimha, Vēnugōpāla, Umāmahēsvara, a female chauri-bearer, and Nambi-Nārāyana, and on its north wall, dancing Sarasvatī, a dancing female, Varāha lifting up the Earth, a warrior armed with a sword and a shield, and Garuda. The fourth cell has on its south wall Vithala with the two hands placed on the waist both carrying small bags, Vēnugōpāla, Mahīshāsūramardini, Kāliyamardana and Arjuna shooting the fish, on the west wall, a female figure, Harihara, Gajāsūramardana, Umāmahēsvara with a mungoose shown as Pārvati's vehicle, and standing Sarasvatī flanked by Ganapati and Subrahmanya, and on the north wall, a female figure, Brahma, Umāmahēsvara seated on Nandi, Vishnu and a female figure. The figures on the fifth cell are—on the south wall, Narasimha killing Hīranyakasipu, Prahlāda, and Dakṣiṇāmūrti with the usual coat, hood, staff and disc, but without sandals, on the west wall, Mōhini, and on the north wall, including the north wall of the temple, two figures of Tāndavēsvara and a seated figure of Vishnu with a discus and a conch in two hands, the other two being placed palm over palm. The walls of this cell, as well as the north wall of the temple, have numerous uncarved blocks. The above details will give an idea of the wealth and variety of the figure sculpture in the temple. The stone towers over the cells are all intact but uncarved, those over the 2nd and 3rd cells

being somewhat larger than the others. The fine inscription set up in the temple I C K Krishnarajpet 63 which has in the semi circular panel at the top a standing figure of Vishnu flanked by Lakshmi and Garuda does not relate to the temple at all. It records a grant to some Brahmins in A D 1237 by two generals of the Hoysala king Somavara (1233-1251). Though this epigraph does not help us with regard to the period of the temple it is satisfactory to note that two signed images in the temple give us a clue to its period. These are the *diara palakas* of the porches which bear labels on their pedestals stating that they were executed by the sculptor (*sururi*) Mallitamma. This is the Mallitamma who worked at the Nuggihalli temple in about 1249 and at the Somnathpur temple in about 1268. The temple may therefore be assigned to the middle of the 13th century. It is very probable that it came into existence at about the date of the above inscription during the reign of Somavara. As it represents a rare specimen of the Hoysala style it has been conserved under the orders of Government. The roof has to be made watertight and doors fixed to the doorways on the east. Another temple which bears some resemblance to this though without sculptures on the outer walls is the Mallavara at Aghalaya of the same Taluk noticed in the Archaeological Report for the year 1913. To the south east of the Panabalinga temple is a small Siva temple also in the Hoysala style which is known as Gauda gudi owing to its situation near an oil mill (*gana*). It is a neat structure though gone to ruin and mostly buried. The *naturanga* has an elegantly carved doorway and a fine deep ceiling with a lotus bud. The village is also another ruined temple in the same style known as the Gopalakrishna. The god about 44 feet high is a good figure with a *prabhatala* on which are sculptured the 10 incarnations of Vishnu. Buddha beings shown as the 9th incarnation. The door lintel of the *garbhagriha* has a fine figure of Gajalakshmi while that of the *sulhanasi* has a figure of Vishnu flanked by consorts. There are pilasters and lotuses on the outer walls.

Gundal —The Gundal or Kaundinya river is formed by Gundal streams issuing from the southern hills stretching east from Gopalswami betta. With a course due north past the chief town through the Gundlupet Taluk, it enters the Nanjangud

Taluk, where, continuing in the same general direction, it forms the Narasambudhi tank and discharges itself into the Kabbanu at Nanjangud. Though scarcely more than a monsoon stream, its waters are much utilized for irrigation. It is crossed by an anicut at Halhalli. The revenue below the tank and its sluice channels amounts to Rs 4,906 from 470 *kandis* of land.

Gundlupet
Taluk

Gundlupet Taluk A Taluk in the south Area 544 Square Miles Headquarters at Gundlupet Contains the following Hoblies, Villages and population

Name of Hobli	Villages	Hamlets	Villages classified				Population of each Hobli
			Govern-ment	Sarva-manyu	Jodi	Kayam-gutta	
Gundlupet Kasba	38	11	38				22,122
Hangala	40	13	40				15,559
Begur	39	15	38			1	21,499
Terakanambi	38	11	38				19,895
Those who live in forests							456
Total	155	50	154			1	79,531

Principal places with population.

Begur 1,026, Bachahalli 1,611, Bommalapur 1,412, Gundlupet 4,594, Hangala 2,033, Horiyala 1,078, Kabbahalli 2,338, Kelsuru 1,924, Kadasoge 1,609, Padagur 1,548, and Terakanambi 3,057

The west and south of the Taluk are occupied by extensive forests, covering 180 square miles, and including the Berambadi and Bandipur, reserved by the State. But these parts were probably more populous formerly. Pierced by good roads, affording egress both westward and southward, these forests present no inconvenience to the well-populated tracts lying east and north, except perhaps in being considered somewhat prejudicial to health. The inhabited portions of the taluk are separated from the vast forests beyond by a range of hills running parallel to the west and south boundary.

lines and culminating in the Gōpālwami hill which is situated at the angle where they diverge. There is also a range of hills to the north of Hāngāl hobli intervening between it and Terakanmhi and Gundlu hoblis.

The soils of the Taluk vary considerably running from good black or brown cotton soil to poor, shallow and rocky the gradations being more marked in dry than in wet lands which are more uniform in quality. The good soils generally are to the east and south east becoming more shallow as the forests and hills westward are approached.

Jola is the staple dry crop. Ragī is also largely grown but its cultivation is limited by the quantity of manure available of which it requires a liberal allowance. Cow dung is the principal manure and it is not so much used for fuel as elsewhere. A second crop of pulses or grain is commonly obtained on dry lands. Fogari and avaro are sown independently with castor oil and not with jola or ragī. The area under wet crops is small. A very superior kind of rice is raised under the Vijayapur tank but the rest is quite ordinary, and the little sugar-cane grown is of poor quality. No leaf manure is used even in rice cultivation. The gardens contain little or no areca nut or cocoanut but betel leaf is extensively grown and is of special quality and value. Along the banks of the Gundal river and its feeders are large groves of the toddy palm.

This river flows through the Taluk from south to north, and falls into the Kabbani at Nanjangud. A masonry dam built across it near Komorvalli irrigates the lands in the neighbourhood. Along the southern boundary of the taluk runs the Moyar which unites with the Bhovani in the east beyond.

The revenue settlement was introduced in 1891. The area of the Taluk was thus distributed —

Cultivable (dry 1 23 170 wet 1 193 garden 809)	1 25 772
Uncultivable	1 07 329
Inam Villages	1 616
Forests	1 13 528
Total	3 48 245

The extent of unoccupied area was 1504 acres. The total Revenue Demand for 1922-23 was Rs 1,02,429 and for 1923-24 it was Rs 98752.

The Mysore-Ootacamund and the Mysore-Gudalur roads run through Gundlupet whence also there are roads eastwards to Chamarajnagar and westwards through Sultān's Battery to Cannanore. From Begur 9 miles north of the kasba, there is a cross road to Sargur and Heggaddevankote.

Gundlupet

Gundlupet A town situated in 11° 49' N lat, 76° 45' E long, near the left bank of the Gundal river, 36 miles south of Mysore on the Mysore-Ootacamund road and 24 miles from the railway at Nanjangud. Head-quarters of the Gundlupet Taluk and a municipality. The following table shows the Income and Expenditure for the years 1921-22 and 1922-23.

Year	Income	Expenditure
1921-22	5,758	6,440
1922-23	6,679	5,978

Population in 1921	Males	Females	Total
Hindus	1,982	1,930	3,912
Muhammadans	352	299	651
Christians	17	14	31

The ancient name of Gundlupet was Vijayapura, and under this name it appears to have been held by the rulers of Terakanāmbi for a long period. Chikka-Dēva-Rāja gave it its present appellation and first made it a place of note in 1674. This prince appears to have acquired an interest in the Gundal territory from the fact that his early life had been passed in confinement at Hangala, an obscure fort to the south of Gundlupet. There his father died, and no sacred stream being at hand, the body was conveyed to the Gundal river at Vijayapur and there burnt. Chikka-Dēva-Rāja, after performing the last rites under the eye of his guards, returned to his prison at Hangal. He afterwards built an *agrahāra* near the site of his father's burning-place, enlarged

the fortifications of the town and constituted it the great commercial emporium of this part of his dominions. Over his father's tomb he founded a *pagoda* of Apiramantha Paravira Deva which he richly endowed and which remained in a flourishing state till the accession of Tipu Sultan who withdrew its allowances. Nothing now remains of the *agrarahara* and the fine old temple has been allowed to fall into decay.

The rising town of Gundlupet gradually eclipsed the old fort of Terakanambi in importance and has ever since remained the chief town of the taluk although often depopulated by fever. The fort of Gundlupet a rude mud and stone structure, still remains though somewhat ruinous. It was last repaired under the Government of Krishna Raja Wodeyar III. The town has been benefited by the opening of the railway to Nanjangud and considerable transit passes through it to the Nilgiris by the Segur and Gudalur ghats and to the Wainad and Malabar.

Among the temples here there are a few deserving of mention. The Vijayanarayana temple is a small structure. The image which is much smaller than those at Belur and Talkad holds a tiny lotus with its stalk between the thumb and fore finger of the right hand. There is a tradition that this god also was set up by Vishnuvardhana. The images of the Paravasudeva temple now in ruins are also kept here. Paravasudeva is seated on the coils of Adiasaba with his consort standing at the sides. The goddess of the Paravasudeva temple which is a seated figure is named Kaimulavalli. The temple also contains figures of Anantha, Garuda, Vishvakarna, Hanuman and a number of *Ullars*. The *utsava murti* of Paravasudeva is a handsome figure with the usual discus, conch and mace in the 3 hands the 4th being in a peculiar attitude neither boon conferring nor fear removing but slightly slanting with fingers joined and made a little concave. This pose is called the attitude of granting deliverance to Brahmakapala and is said to be found nowhere else. The image is said to have been originally at Hastinavati. It was then removed to Sivasamudram whence it was brought to this place. There is also another mutilated metallic image called Varadaraja which is said to have originally belonged to the temple of Varadaraja or Allalanutha at Maddur.

and to have subsequently become the *utsava-vighraha* of the Paravāsudēva temple. But owing to mutilation it was replaced by the other image. The consorts of the mutilated image are also said to have been taken to the Prasannakrishnasvāmī temple at Mysore. The Paravāsudēva and Rāmēsvara temples, situated about a mile to the east, are in ruins. The former as mentioned above, was built by Chikka-Dēva-Rāja Wodeyar in memory of his father who died here. It is a large structure of some architectural merit. The pillars of the *navaranga* are sculptured on all the 4 faces and the 4 pillars of the front veranda are beautifully carved with figures of lions with riders in front. The door-ways likewise show good work. The *mahādvara* is a lofty structure with verandas extending to a great distance on both sides. There is also a pretty large temple of the goddess to the left of the main temple. The Rāmēsvara temple close by also shows pretty good work. The inscriptions on its basement are engraved in excellent Kannada characters. Gundlupet has a ruined fort. It is called Vijayapura in the inscriptions and current local tradition confirms the story of its departed greatness (See above).

Hadīnāru

Hadinaru More properly Hadī-nādu, a village in the Nanjangud Taluk, 5 miles north-east of the kasba, headquarters of the Hadīnāru hobli. Population 2,557.

It is historically interesting as having witnessed the first step to power of the ancestors of the Mysore Rājas. Two young men, belonging, it is said, to the Yādava tribe, being induced to push their fortunes in the south, halted at Hadīnāru, probably in the 15th century. At that time the Wodeyar of the place, being of unsound mind, had "wandered forth into the wilds," and the pālegār of the neighbouring village of Karugahalli, who was of the Toreyar caste, had taken advantage of the defenceless state of Hadīnāru to demand a daughter of the house in marriage. To this request the Wodeyar's family had been compelled to yield a reluctant assent, when Vijaya and Krishna, the two young adventurers from the north, appeared on the scene and espoused the cause of chivalry. By a stratagem they succeeded in slaying the low-caste pālegār of Karugahalli, and the daughter of the Wodeyar, delivered from her persecutor, became the bride of Vijaya, who thereupon assumed the

Government of Hindiaaru and Karugaballi and is the ancestor of the Mysore Rijas. These two villages may therefore be considered as the nucleus of the Mysore State.

Whatever the truth of this story the village is one of considerable antiquity judging from the number of Ganga records found in it. It appears that some remains of a fort wall to the south of the village existed some years ago. The village is named Adiruru in the inscriptions (see Nonjongud 21 and 129 132) and was the head quarters of a small district consisting of 12 villages. So the present name is clearly a corruption of the old name and the suggestion that it stands for Hodi nadu has no basis to stand upon. In the Viraragudi or hero shrine near the tank bund is a four armed richly ornamented standing figure about 3 feet high wearing sandals and bearing a discus in the right upper hand, a bow in the left upper the right lower holding the hilt of a dagger stuck in the waist band and the left lower resting on a mace. To the right stands an attendant holding an umbrella with a very long shaft. The figure is said to represent Siddheswara but it is more probable that it represents a chief who fell in fight. Around the shrine are set up several small panels sculptured with a horse bearing a couple on the back with an umbrella bearer behind. There are besides a few panels carved with a male figure seated or standing on a two wheeled cart drawn by two bullocks holding a whip in the right hand and the ropes of the bullocks in the left. It is not clear what these figures are meant to represent.

Of the modern line of chiefs connected with the place in the 16th and 17th centuries Mr. Rice gives the following succession list based on inscriptions —

Devappa Gauda

Rāja Nayaka 1030

Bacharasayya 1531 1540

Jagadckarava Wodeyar 1563 1661

Singa Depa

Rāma Rāja Nayaka 1668

Tirumala-Rāja Nayaka 1550

Muddu Raja 1654 1667

Channa Wodeyar Channanjeru

Nanja Rāja Wodeyar 1604 1610

Of the chiefs mentioned in the above table, Bācharasayya was probably not a chief (See *Chamarajnagar* 38 and 74) The same remark possibly applies to Jagadēka Rāya, whose nāyaship is mentioned in *Yelandur* 29 dated in 1564 According to *Yelandur* 1, dated in 1654, Yelandur was founded as their capital From the same inscription it is clear that Singe-Depa had two sons Rāma and Channa Accordingly Channa Wodeyar who is shown above as a son of Rāma-Rāja, should be shown as his brother Rāma-Rāja had two sons, Tirumala and Nanja-Rāja, the latter of whom is (incorrectly) shown as Channa Wodeyar's son in the above table The Gaurīvara temple at Yelandur (where the inscription referred to is to be seen on a stone in a *mantapa* to the south, in the enclosure of the temple) was founded by Singa-Depa, who and his successors granted many villages for its maintenance Muddu-Rāja, to whose reign the inscription belongs, added a *gōpura*, several shrines, on outer wall and a *mantapa* (apparently the one in which the inscribed slab is to be seen) and set up five *lingas* and donated "a splendid car" also to it Rāja-Nāyaka caused the repairs of two breaches in the Honnu-hole dam (*Yelandur* 2, assigned to 1580) His successor Bācharasa established the fair at Naguvalli and invited cultivators to sell in Hayanur on favourable terms (*Chamarajnagar* 74 and 38) Rāma-Rāja-Nāyaka and Tirumala-Rāja-Nāyaka apparently so named themselves after the then Vijayanagar ministers (*Nanjangud* 141 dated in 1586) The chiefs of this line are designated "Kings of Padinād" without any special titles

Hale Alūr

Hale Alur About 8 miles north-east of Chamarajnagar There is here a deserted Arkēsvara temple, the materials of which have been put together in subsequent times from old ruins Out of four pillars, three are elaborately carved and one is plain These pillars and the sculptures on them will be found described in Volume II, Chapter V

Haradan-halli

Haradhanalli. A village 3 miles from Chamarajnagar
Population/2,326

The village has a ruined fort and appears to have been once a place of some importance.

The Divyalingesvara temple here is an old structure with a big *gopura* and a stout lofty lamp pillar in front. The ceiling of the *mahadevara* has in the middle an oblong trough like concave panel which has not been seen in any other temple. In the *navaranga* there is a fine figure of Virabhadra in a shrine to the right. Near the *dravapalakas* is a large ceiling panel containing figures of *astadikpalakas* with Tandavesvara in the centre. At the right inner side of the entrance is a figure of Surya. In the *prakara* there is a shrine of Sarasvati. To the right of the shrine of Kamakshi the goddess of the temple is a figure of Subrahmanya with only one face seated on a peacock. The front ceilings of the *linga* shrines in the west have paintings at least one hundred years old representing scenes from *Sauva puranas*. One of the *mantapas* in the *prakara* is said to have been dismantled and the materials removed to Chomorojnagar for building the *Janana mantapa*. The temple was apparently a very rich one judging from the list of gold and silver vessels jewels precious stones gold cloths, etc. which as recorded in a *ladita* (i.e. a book of folded cloth covered with charcoal paste) produced by the *shambhog* were carried away to the *toshikhane* or treasury at Srirangapatana in A.D. 1787 by order of Tipu. The list includes even brass vessels lamps and silk cushions. The same fate overtook almost all the temples in the State during the rule of Tipu. The *ladita* also contains copies of the inscriptions in the temple and supplies detailed information about the endowments made and the jewels etc. presented to the temple by various persons. It was at this village that the Lingayat guru Gosala Channabasava had his *matha* where Tontada Siddhalinga another great teacher and author of the same sect who flourished at the close of the 15th century was initiated in the tenets of the Virasaiva faith. It is said that Chikka Deva Raja Wodeyar dismantled the *matha* and built the Gopalakrishna temple with the materials. Some of the pillars in the latter have Saiva figures on them. An inscription has also been found on one of them recording a grant to the *Lingayats*. The figure of Gopalakrishna is well executed. In the *navaranga* there are figures of Varadaraja Srinivasa Sathakōpa Ramanuja charya and Vishvakṣeno as also two standing figures of Lakshmi in two separate cells. In a shrine in the *prakara* are lying in confusion several figures of the *Ālvars* or Srivaishnava saints.

Hatna

Hatna. A village in Nagamangala Taluk Population 252

The Vīrabhadra temple at this place was once a Jaina *basti* dedicated to Pārsvanātha Vīrabhadra is now made to stand on a Jaina pedestal The temple is a Hoysala structure consisting of a *garbhagriha*, an open *sukhanāsi* and a *navaranga*, and according to the inscription, *E C IV, Nagamangala 70*, at its entrance, was founded by a merchant named Sōmi-setti in 1178 during the reign of the Hoysala king, Ballāla II The central ceiling of the *navaranga*, about 3 feet deep, has a well carved lotus bud, while the others, which are flat, are decorated with blown lotuses, those at the corners having a single blown lotus, the others six

Hedatāle

Hedatāle. A village in Nanjangud Taluk. Population 2,008

The Lakshmīkānta temple at this place which faces east is a three-celled structure built of granite in the Hoysala style It comprises besides the three cells a *navaranga*, a porch and a *mukha-mantapa* The main cell, which alone has a *sukhanāsi* and a stone tower, enshrines Lakshmīkānta in the form of Nambī-Nārāyana, the north cell Lakshmīnarasimha and the south cell Vēnugōpāla The pillars in the *navaranga* are well moulded, and the ceilings, except the central one, are about 1 foot deep and carved with blown lotuses The central ceiling, about 3 feet deep, is beautifully carved with a long pendant lotus bud The porch has a large flat ceiling of nine lotuses At an interval of a few feet from the porch stands the front hall, a grand structure supported by 24 pillars, of which the central four are elegantly carved, and adorned with 11 ceilings, about 3 feet deep, of hanging lotus buds It has a veranda all round and three entrances on the east, south and west The northern portion is said to have served as the seat of a former chief who could see from there the faces of all his sixteen sons-in-law seated on different portions of the veranda leaning against the rounded back stones Hence the hall is known as Hadināru-mukhada-chāvadi or the durbar hall with sixteen faces or openings Here we have a rare instance of a Hoysala temple with all its parts built of granite The building deserves conservation From the inscription *Nanjangud 92* here, we learn that the temple existed before 1292 An old Tamil epigraph is to be seen here.

The Nagaresvara temple situated on the bank of the Cundal (kaundini) is also a Hoysala building in granite with a stone tower. It consists of a *garbhagriha* a *sukhanasi* a *nataranga* a *mulha marapa* and a porch the last two looking like later additions. The *nataranga* ceilings are similar to those of the Lakshmikutra temple described above. The temple is in a dilapidated condition. Several stones of the *garbhagriha* wall have been washed away by the river. An old Tamil inscription is to be seen near the temple. A good Vishnu figure about 1 foot high was found standing near a hedge to the west of Gaumada Rauganayaka's field at some distance to the village.

Heggaddevankote—A Taluk in the South west Area 621 square miles. Head quarters—Heggaddevankote. Contains the following hoblis villages and population —

Name of Hobli	Village	Hamlet	Villages classified				Population of hobli
			Government	Sarvamanya	Jodi	Kavamutta	
Head devankote	66	1	6			1	10236

 Mullur 1921 Malah 1269 Nerale 1186 Saragur 2265
 and Sagare 910

Principal places with population

A large portion of the Taluk is covered with forest especially in the west and south. In several places are situated the Elephant *Keddahs*. Good tiger sport is obtained here.

The river Kabbani, rising in north Wainād, has a tortuous course through the Taluk from south-west to north-east, passing near the town of Sargur. The west of the Taluk is watered by the Nugu, which also has its source in Wainād, and with a northerly course falls into the Kabbani in the north, near the village of Hampapur. The Nugu is crossed by a dam at Lakshmanpura, whence springs an irrigation channel, 4 miles in length. But the principal irrigation channel is one drawn from an anicut on the Lakshmanatirtha in Hunsur Taluk.

Wherever land is cultivated, it is found fertile and produces fine crops of ragi. Except when the soil is poor, it is customary to raise two dry crops in the year. Red and dark brown soil is general. Wet cultivation is limited, partly owing to the unhealthiness of the irrigated tracts. There is little or no garden cultivation.

There is evidence that the taluk was probably far more populous in ancient times than it is now. Kittūr, called in an inscription of 1027 "the royal residence, the immense great city Kirttipura," was the capital of the Punnad Ten-Thousand, which occupied the south of the Mysore District from the earliest times (see above P 220), and this must have exerted a great influence over all the neighbouring country. At a later period, some part of this country was called the Bayal-nād, which was under the government of Kadamba chiefs, until subdued by the Hoysala king Vishnuvardhana, early in the 12th century.

The revenue settlement was introduced in 1884. The area of the Taluk was thus distributed:

Cultivable (dry 78,259, wet 4,449, garden 318)	83,026
Uncultivable	17,126
Inam Villages	17,669
Forests (2,60,869) Kavals (11,716)	2,72,585
Total	3,80,406

The unoccupied area was 10,058 acres. The total Revenue Demand for the year 1922-23 was Rs 73,057 and for the year 1923-24 was Rs 84,624.

The Mysore Manantolli road runs through from north east to south west and is crossed by a road from Hunsur through Heggaddevankote and Sargur to Begur on the Mysore-Ootacamund road

Heggaddevankote —The chief town of the taluk which bears its name and a municipality It is situated in a wild forest tract 36 miles south west of Mysore on the Sargur Hunsur road The taluk head quarters were at one time at Sargur during the monsoon and for some years permanently But in 1886 the head quarters were re established at Heggaddevankote

Population in 1911	Males	Females	Total
Hindus	68	51	119
Muhammadans	61	38	100
Christians		1	1

The average rainfall at Heggaddevankote for 26 years (1840-95) was as follows —

January	February	March	April	May	June	July
1	-	3	4	5	6	7
	0.08	0.37	1.10	3.95	2.51	3.11

Year	Income	Expenditure
1911-19	1103	1000
1922-1923	979	1081

Hēmāvatī

Hemavati. This river rises in the south-west of the Kadur District, and flows principally through the Hassan District (under which it is more fully described) In the Mysore District it runs from north to south in the west of the Krishnarajpet Taluk, and flows into the Cauvery near Hoskote. There are five dams on it in this district, and as many channels, irrigating 4,264 acres. The Mandigere channel is taken off on the right bank from an anicut near the village of that name in Akkihebbal hobli, and is now 27 miles long, discharging into the river near the village of Alambadi. It was at first only 15 miles in length, was extended 2 miles further in 1873, 6 miles in 1879, and 4 miles in 1881. The last 12 miles are thus known as the Hosanāla. The Akkihebbal channel, 7 miles long, is on the same side of the river, and is drawn from an anicut in two sections, abutting on the island of Hosapattana, where there is an old deserted fort. The Hēmagiri channel, 17 miles long, is taken off from an anicut at the foot of the Hēmagiri hill. The land under it is mostly inam, and many complaints having arisen from raiyats cultivating the other lands, regarding the management of the channel, which was in the hands of the *namdars*, Mr. Bowring, the Chief Commissioner, persuaded the latter to assign one of his villages, Yachenhalli, for the purpose of the upkeep and improvement of the channel. The revenue derived from the village, about Rs 1,000, is therefore paid into the treasury, and the channel is looked after by the Irrigation Department, with much benefit to all concerned. The Kalhalli channel, 8 miles long, is taken from an *anicut* near the village of the same name. The land under it is all assigned for the support of the Parakālaswāmī. The Kannambādi channel is taken off from the Dannāyakan-katte, near the junction of the Hēmāvatī with the Cauvery. It is 11 miles long, and flows through the Krishnarajasagara (Kannambādi) tank.

Hemmaragala

Hemmaragala. A village in Nanjangud Taluk. Population 1,773.

The Gopalakrishna temple at this place is a Hoysala structure with a later *navaranga* added on to it. The god about 1 foot high with *prabha* stands below a *kanne* tree with a discus and a conch sculptured at the sides. The processional image known as *Janardhana* is a good figure. In the *navaranga* are two modern cells enshrining the goddesses Rukmini and Satyabhama. In the *prakara* is kept a stone cot measuring 7 feet by 6½ feet with four ornamental legs decorated with a large lotus flower in the centre, lotus buds at the four corners and a two lined border all round. In the *Bheda* shrine are two *lingas* one known as *Siva* and the other marked with *namam* as *Vishnu*. Near them is kept a figure said to be of Kumaraswami of Vijaya who built the shrine. In the *prakara* is a shrine of Balamankali a standing figure, about 1½ feet high holding in the upper hands a trident and drum and in the right lower a sword the left lower being placed on the waist.

Honnu Hole or Suvarnavati—Both meaning golden stream the name of a river which rises in the mountains to the south east of the District near the Gyalhatti pass and flowing north through the Chamarajnagar taluk and Yelandur Jagir enters the Coimbatore country whence passing to the west of Kollegala it falls into the Cauvery opposite Kakkur near Talkad. The fertility which it spreads on either bank of the rich tract through which it flows is indicated by its name. It is crossed in Chamarajnagar taluk by two permanent dams the Gajpur near Attikalpur giving rise to the Bandigere channel 9 miles long and the Hongalvadi with channel of the same name 16 miles long which feeds the large Ramasamudra tank close to the town of Chamarajnagar. By means of temporary dams constructed when the water is low of stakes mats and sand several smaller channels are fed namely the Honnu the Alurhalla and Hosahalla the Sargur and Maralhalla. The revenue derived from all the above is upwards of Rs 38 000. Besides these the stream is dammed in the Yelandur Jagir by the Ganganur anicut and feeds six channels as well as seventeen large and eleven small tanks.

Honnu Hole
or Suvarna
vati

is, as usual large and more artistically executed than the others has on the circular under surface of its central pendant a figure of Kalyanamarāṇa or Krishna trampling on the serpent Kalya. The entrance porch of the *nataranja* has also a big dome like ceiling, here the central pendant has a swan carved on its circular under surface. Beyond the side cells runs all round a narrow veranda with three fine pillars on both sides of the porch. The temple stands on a raised terrace about $1\frac{1}{2}$ feet high which is supported at intervals as at Somanathpur by figures of elephants of which there are only five two being in an unfinished condition. There is likewise as at Somanathpur a *jagati* or railed parapet extending only to a short distance on both sides of the entrance with perforated screens above. A portion of the north *jagati* is broken and a portion of the south *jagati* is enclosed in the temple kitchen which was probably built when the *mukha mantapa* came into existence. On the *jagati* we have these friezes from the bottom—(1) elephants (2) horsemen (3) scroll work (4) Puranic scenes (5) *mularas* (6) swans (7) seated figures between pilasters surmounted by eaves (8) miniature turrets with intervening lions and (9) a rail between exquisitely carved bands divided into panels by single columns and containing figures representing in brief the *Bhagavata* story on the south and the ten incarnations of Vishnu on the north. Buddha being shown as the ninth incarnation. There are also on the rail a few obscene figures as usual. Where the *jagati* ends a row of large figures begins on the walls the friezes below being the same as (1) to (6) on the *jagati* only in the elephant frieze seated figures in niches occur at intervals. Above the row of large figures runs a beautiful cornice with bead work and above this again a row of miniature turrets unmounted by eaves. There are also figures and carvings all round above the eave but these are mostly concealed by a newly built mortar parapet. The Puranic frieze depicts on the south *jagati* the churning of the ocean on the south wall the story of Prabalada and the destruction of the three aerial cities on the south and west walls the story of Rama in detail he being represented as worshipping the *linga* at Rameswaram on his way back and on the north wall the *Bharata* story in brief. Around the main cell there are in the three directions three well carved ear like niches in two storeys their tops being joined to the tower. The row of large images breaks off at these niches and continues on the other

side The lower storeys of the niches have a cornice with bead work, female *chauri*-bearers at the sides of the doorways and figures of gods and goddesses with attendants on the outer walls The left wall of the south niche has 1 figure of Vithala with the two hands placed on the waist, one of them also holding what looks like a small bag, and 3 female figures, while the right wall has on it figures of Rāma, Lakshmana, Narasimha and a woman The west niche has on its left wall Sarasvatī and 3 female figures, and on its right, Brahma, Sarasvatī and 2 female figures The left wall of the north niche has sculptured on it Sarasvatī, 2 female figures and a seated male figure with two hands holding a lotus and a fruit, and the right wall dancing Ganapatī, two male drummers and a female figure beating time with *tāla* or cymbals These figures on the niches, which are smaller in size than those in the row, have pedestals of scroll work The upper storeys have miniature turrets on the walls The niches have on their base the first four friezes found on the temple walls The continuation of the Purāṇic frieze on the *jagati* and the niches is a peculiarity of this temple The number of large images around the temple is 126, of which 51 are male and 75 female Their position on the walls is as follows From the east wall to the south niche 53, 20 male and 33 female, from the south niche to the west niche 10, 6 male and 4 female, from the west niche to the north niche 10, 4 male and 6 female, and from the north niche to the east wall 53, 21 male and 32 female Among the figures representing gods and goddesses are Viṣṇu in his 24 forms and also as Paravāsudēva, Lakṣmīnārāyaṇa 4, Gōvardhanadhārī, Vēnugōpāla 2, Narasimha 2 and Kālīyamardana with the Jamna shown below, Brahma, Sarasvatī, dancing or seated, 4, Durga, standing, dancing or seated, 5, Indra seated with Sachī on the Airāvata, and Garuda standing with folded hands 6 Sarasvatī is represented with 4 or 6 hands and Durga with 6 or 8 hands The attributes in the 4 hands of Sarasvatī are a noose, a goad, a rosary and a book The six-handed figure has the first three together with a fruit for its attributes, the remaining two hands being in the *nāṭya* or dancing pose Durga has for her attributes a discus, a conch, a sword, a trident, a drum and a cup, or the first three together with a shield, a water-vessel and a lotus The eight-handed figure has in addition to the first mentioned 6 attributes, a bow and an arrow The same in a dancing posture has 2 hands in the *nāṭya*

pose 2 hands in the *abhaya* and *varada* poses and holds in the remaining hands a discus a conch a lotus and a fruit. There are also figures of Dakshinamurti dressed in a long coat with a belt wearing sandals and holding a staff in the right hand and a cup and a disc (*chakra*) in the left hand and a Mohini a female nude figure with snake ornaments wearing sandals and holding a disc in the left hand always associated with it. Among the other figures a few worthy of notice are Garuda bearing on his shoulders Lakshmi and Varavana and holding a thunderbolt in his right hand a seated figure with a conch and a disc sculptured at the sides holding a water vessel and a fruit in its two hands and another seated figure with 4 hands two of them holding a discus and a conch and the other two placed palm over palm in the *yoganidra* or attitude of meditation. Similar figures are also found at Somnathpur. The tower over the main cell is beautifully carved from top to bottom. In the frieze of swans around the temple a solitary label *Basava* occurs. This is probably the name of one of the artists. There is unfortunately no inscription in the temple to give us a clue to its period. A modern inscription on one of the steps leading to the *mukha mantapa* gives the names of two individuals who may have erected that structure. An epigraph (B.C. IV. Krishnarajapete 3) in the Paravanatha basti of the village was found on examination to be dated in A.D. 1118 during the reign of the Hoysala king Vishnuvardhana. May this be the period of the other temple also? The basti has a small figure about 1½ feet high of Paravanatha. There is also another seated marble figure of the same line set up about 12 years ago. The *nataranga* has figures of Dharavendra and Padmavati the Yaksha and Yakshi of Paravanatha. Two inscriptions are to be seen on the pedestals of two images. The ruined Haribara temple near the fort gate has a well carved figure about 3½ feet high of Haribara. There is also a mutilated Vishnu figure about 2 feet high standing in an adjoining cell. There is also an *Anjaneya* temple near the north fort gate with a good lamp pillar in front. A *yatre* called *Rangala habba* is held in honour of Anjaneya every year about the month of April in which all the villagers take part. This resembles the Hol festival in some respects. The villagers put on various disguises sing the praises of the god and dance the whole night squirting at intervals saffron water (*vasanta*) over each other. The village has about 60 families of weavers. Good

cloths for men and towels are manufactured and exported from here in pretty large quantities

Hunsur

Hunsur. A Taluk in the west, till 1882 called Periyapatna Area 660 square miles Head-quarters at Hunsur Contains the following hobhs, villages and population

Name of Hobli	Villages	Hamlets	Villages classified				Population of each Hobli
			Government	Sarvamanya	Jodi	Kayamgutta	
Hunsur Kasba	56	27	55	1			22,802
Bihkere	77	15	72	3		2	13,510
Hanagud	67	11	65	1		1	7,747
Periyapatna	82	36	62	8	8	4	19,205
Haranahalli	60	10	59		1		9,781
Bettadpur	41	47	40		1		19,926
Chulkunda	33	16	31	2			16,223
Total	416	162	384	15	10	7	1,09,194

Principal places and population

Bannikuppe 1,459, Bettadpur 1,530, Bihkere 1,109, Gandagere 1,123, Hunsur 5,721, Kattemalalvadi 1,827, Kampalapura 1,413, Kallukunte 1,481, Kittur 1,833, Kuttavalli 1,690, Makod 1,823, Periyapatna 3,404 and Ravandur 1,009

The Cauvery forms part of the western and northern boundary The river Lakshmanatirtha runs through the south and east, a few miles within the limits of the taluk in those directions. It is crossed by several dams, which, with the channels issuing from them, are described in connection with the river The principal hill is that of Bettadpur, rising to about 1,600 feet above the plain, and to 4,389 feet above sea-level Thence westwards are some low ranges from which commences the great belt of forest which extends through the south-west of the District

The surface of the country is very undulating and from this cause not well adapted for irrigation from channels. But the soil being generally of a rich red description ragi and other dry crops thrive remarkably well on it. The northern part is most open except on the extreme west where it approaches the confines of Coorg. The centre and east are also open, but in places especially in the *lāvals* or grazing lands of the Amrut Mahal scrub jungle is met with and the *ralas* generally are covered with trees and bushes of wild date. The west and south are thickly wooded.

The soils vary from a loose greyish or reddish sandy soil to a tinner red and to a rich black loam of great fertility and depth. This prevails mostly in the north. Even the poorest soils, such as those in the Bihkeri hobli though shallow, yield excellent crops owing to a good sub soil. It is customary to grow two dry crops in the year especially in the south west. Tobacco of a superior quality is grown near Bettulpur. Rice cultivation is subject to the malarious fever which prevails in the irrigated lands. Sugar cane is not now cultivated though formerly it used to be. The grazing is exceptionally good.

The revenue settlement was introduced in 1881. The area of the Taluk was thus distributed —

Cultivable (dry 175 672 wet 10 091 garden 3 192)	1 88 958
Uncultivable	1 28 362
State Forests and havals	31 071
Inam villages	25 694
Total	3 71 088

The unoccupied area was 23 063 acres. The total revenue demand for 1922-23 was Rs. 1 91 327 and for 1923-24 was Rs. 1,75 113.

The trunk road from Srirangapatna branches 2 miles west of Hunsur to Mercara via Piriyappitua and Fraserpet and to Cannanore via the Periyambadi Ghat. From Hunsur there is a road south to Heggaddevankote and Sargur, and

one to Hanagod; also one north-east to Yedatore From Piriapatna there are roads north to Bettadpur and Ramanathpur, west to Siddapur and Virarajendrapet in Coorg, and south to Anechaukur on the Cannanore road

Hunsur

Hunsur. A town situated in $12^{\circ} 19' N$ Lat, $76^{\circ} 20' E$ Long, on the right bank of the Lakshmanatirtha, 28 miles west of Mysore Since 1865 it is the head-quarters of the Periyapatna Taluk, and from 1882 called the Hunsur Taluk It is a municipality

Population in 1921	Males	Females	Total
Hindus	1,719	1,670	3,389
Muhammadans	556	446	1,002
Christians	37	35	72

Municipal Funds

Year	Income	Expenditure
1921-22	10,492	6,855
1922-23	8,771	7,647

The trunk road from Seringapatam here branches off to Mercara and to Cannanore The importance of the place is due to its being the head-quarters of the Amrut Mahal cattle-breeding establishment, an account of which will be found elsewhere Besides this, a tannery, a *kumbl* manufactory and timber yard were, until 1864, maintained by the Madras Commissariat Boots, knapsacks, and pouches are manufactured to a large extent *Kumbls* of a better quality than are to be found elsewhere in the District are also produced, although these latter have been to some extent thrust out of the market by the importation of cheap English blankets The wool of which they are made is obtained from a strain of the merino sheep, which the Government formerly maintained at Hunsur On account of the large manufacture of the country carts to which the brisk traffic

through Hunsur between Mysore Mercara and Cannanore has given rise, the town has received from the local people the cant name of Gudi-palya. Extensive coffee pulping works have been erected where the berry received from estates in Coorg is prepared for shipment to England.

In the European cemetery here are buried a number of persons connected with the old Commissariat and Public Cattle Departments once located here. The dates of the tombstones range from 1821 to 1901.

Immayu — A village in Nanjangud Taluk. Population 521. Immayu

This place has a temple of Rama containing four armed figures of Rama and Lakshmana. Rama with four arms is occasionally met with but not Lakshmana.

Kabbaldurga — A fortified conical hill in Malavalli Taluk rising to 3507 feet above the sea. Owing to its precipitous sides it would if properly victualled and supplied with water be almost unpregnable. It is accessible only on one side, and even there the ascent is very laborious, the steps cut in the solid rock for part of the way not exceeding six inches in width. A Palegar named Gathek Raja is said to have built the fort. It was used as a penal settlement under the Hindu and Muhammadan dynasties and also under Mumtaz Krishna Raja's government and as the bad nature of the water which appears almost poisonous renders the hill pestilential, troublesome. State prisoners were generally sent there. Colonel Wilks speaks of Kabbaldurga as a place of imprisonment 'where the dreadful insalubrity of the climate was mercifully aided by unwholesome food to shorten the sufferings of the victims.' It was here that the hereditary Raja Chama Raja was sent to end his days by the Dalavayi Deva Raja. In 1864 the guns and ammunition were destroyed and a small establishment of peons which had theretofore been maintained in the fort were removed so that the strong hold is now uninhabited. Haider Ali, who repaired the fort re-named it Jafarahad but in nearly all cases where

Kabbal
durga

Muhammadan names were substituted for Hindu by Haidar and his son, the former is forgotten and the latter has reasserted itself

Kabbani
Kapini, or
Kapila

Kabbani, Kapini or Kapila. A tributary of the Cauvery It rises in the Western Ghats in North Wamnad and enters Mysore at its south-western angle in Heggaddevankote Taluk Emerging from the dense jungles of Kakankote, it flows north-east past Nisana and Maggi, and winds its way to Sargur and Muttikere Thence, turning eastwards, it receives the waters of the Nugu near Hampapura, and at Nanjangud those of the Gundal Passing Tayur it falls into the Cauvery at Tiru-makudlu near Narsipur in Tirumakudlu-Narsipur Taluk, the confluence of the streams being esteemed a spot of preeminent sanctity

It is a fine perennial river, averaging from 150 to 200 yards in breadth During the dry season, its body of water is not less than that of the Cauvery There was formerly only one stretch of wet cultivation irrigated by the Kabbani jodi land, about 9 miles above Nanjangud, on the left bank But the recent extension of the Rāmpūr channel for 32 miles has brought 1,367 acres under irrigation At Nanjangud the river is spanned by a broad but rudely constructed bridge, built by the *Dalavāyi* Dēva-Rāja about the middle of the 18th century

Kadamba

See Shimsha

Kakankote

Kakankote. This has a thick forest and an extensive teak plantation *Kheddās* are often held here

Kalale

Kalale About 5 miles from Nanjangud, close to the Mysore-Ootacamund road, was the capital of a line of chiefs known as the Kalale chiefs Population 2,530 An old structure, locally known as the Pattada-chāvadī, is said to have been their coronation hall, and the plain in front of it is said to be the site on which their palace once stood

The Lakshmikantha temple at the village is a good Dravidian structure with stucco figures in fine niches over the roof. The god known as Lakshmikantha though Nambinarayana in form is a fine figure about 3½ feet high with *prabhavali* or halo flanked by consorts sculptured at the sides. Rumar is said to have been the household god of Dalavayi Dvarajaya and to have been handed over to the temple on his death. The god has a beautiful *prabhavali* adorned with figures of the ten incarnations of Vishnu etc. The *nataranga* has a porch on the south. In the *prakara* are cells enshrining Nannivar Paravasudeva the other *Uvars* etc. There is also in the *prakara* the shrine of the goddess of the temple. It is interesting to note that the temple has some of the insignia of the Mysore Royal Family such as the discus the conch the fish and the *yali*. Three of them bear inscriptions stating that they were presented to the temple by the Kalale chief Nanja Raja son of Kantaiya. There are also inscriptions on several of the silver vessels belonging to the temple. From these we learn that the vessels were presents from Dalavayi Nanja Raja Lakshmanammanni Chahve Arasu and Tipu. An inscription on a bell tells us that it was a present from Lakshmanammanni queen of Chama Raja Wodeyar father of Krishna Raja Wodeyar III. There is a fine lofty *mantapa* outside the temple. Opposite to the Pattada chavadi mentioned above stands a *Sati* shrine raised to the memory of the consort of a Kalale chief named Lakshmikantha Wodeyar who became a *sati* when her husband was killed by the enemies. Her name is not known but from the circumstances that the shrine is built of brick and mortar she is styled Ittigemabgammma or the Lady of the Brick house and her shrine Ittigemaligammauagudi. The shrine has a sandalwood door with a panel carved with figures about 3 feet high of the husband and wife represented as embracing and kissing each other. The carvings depict the happy meeting of the couple in heaven.

The union of the two families of Mysore and Kalale between whom inter marriages were freely conceded being of equal rank was vouched for by a *Bhāshāpatra* issued by Krishna Raja Wodeyar in 1758 A D (E C IV Mysore District Nanjangud 267). The *Nambige Nirūpa* issued by the same sovereign in 1758 allows free inter marriages between the two families. Between the Kalale and the Ummattur chiefs

a strong rivalry existed, and on one occasion the Ummattur chief by a treacherous massacre nearly extinguished the Kalale family. But one in fact escaped, who subsequently restored the fortunes of his house. The following is the succession of the Kalale kings as gathered from *Yedatore* 58 dated in 1741 and *T-Narsipur* dated in 1748

Timma Rāja, his son Śrīkanta (or Kanta), whose sons were Nanja Rāja, Doddaiyya (*m* Gauramma) and Malla Rāja, after Śrīkanta, Nanja Rāja succeeded him, he was succeeded by his son Basavarāja, whose son was Nanja Rāja, Doddaiyya's son Vīra Rāja (*m* Channajamma) had two sons, Dēva Rāja (*m* Chelvojamamba) and Nanja Rāja (1767). Dēva Rāja became commander of the army to Krishna Rāja and subdued Mīdigeśi, Magadī, Savandurga, and many other places. At the same time his cousin Nanja Rāja became the *saivādhikārī* and Venkata-patī, who became chief Minister (Pradhāna) is described as being the lips to Nanja Rāja and Dēva Rāja. Nanja Rāja established the *agrahāra* of Nanjarājasamudra at Kannambādī, which the king bestowed with liberal gifts. The younger Nanja Rāja, brother of Dēva Rāja, was surnamed Karachūrī. He presented the Nanjangud temple with 61 metal images of the Śaiva saints for processional purposes (*E C* IV, Nanjangud 200-265 and *Yedatore* 32). For information on these images, see Volume II, Chapter V.

Kaliyur

Kaliyur. A village in T-Narsipur taluk. Population 1,375

At this place is the stone containing the important inscription *T-Narsipur* 44, which gives an account of a battle in A.D. 1006 between the Hoysalas and the Chōla general Apramēya. It has at the top a panel, about one foot wide, containing sculptures of horsemen, warriors, etc., representing a spirited battle scene.

Kambadahalli

Kambadahalli. A village in Nagamangala Taluk. Population 340

This place is looked upon as a holy place by the Jains. It derives its name apparently from the tall Brahmadēva pillar (*kamba*) set up in it, which is about 50 feet high with proportionate girth, having on the top a seated figure of Brahma facing east and bells all round. This is perhaps the loftiest Brahmadēva

pillar that is to be seen in the State. The old inscription I C IV, *Najamangala* 19 is engraved on the four sides at its base. To the south of the pillar is a Jain temple in the Dravidian style known as *Pancha basti* or *Panchakuta basti* having five cells surmounted by five stone towers. The latter are fine structures partly sculptured having four well carved lions each at the corners though some of the lions have now fallen off. The main cell facing north has a seated figure of *Idinatha* flanked by male *chauri* bearers. The *sulhanasi* has two figures of *Paravanatha* standing at the sides. In the *navaranga* to the left is a seated figure of *Vishatparamesvara*. The ceiling of the *navaranga* has a flat panel 7 x 7 of *ashla-dilpalakas* with *Dharanendra* in the centre. The latter stands with a conch in the right hand held near the mouth as if in the act of blowing and a staff or bow in the left hand. Of the side cells which have open *sulhanasi* the right cell has a figure of *Neminatha* and the left a figure of *Santinatha* both seated. All the cells have *Yakshas* and *Yakshis* at the sides. Attached to the *trikuta* or the 3 cells mentioned above are 2 cells to the north facing each other forming together the *pancha kuta* or 5 cells. These cells have likewise a panel about 3 feet square of *ashla dilpalakas* the central figure being *Dharanendra* as before. The outer walls of the cells have niches containing figures of standing Jina though several of them are now empty. To the north of the *Pancha basti* is another large *basti* also in the Dravidian style dedicated to *Santinatha*. It is a large building facing east with ornamental doorways on the north and east. The figure of *Santinatha* is about 12 feet high. At the sides of the cell in the *navaranga* are two seated Jina figures the right one flanked by male *chauri* bearers. There are also good figures of *Yaksha* and *Yakshi*. The *mukha montapa* has a fine panel about 7 feet square of *ashla dilpalakas* the central figure in this case being a seated Jina with four flying *Gandharvas* in relief at the corners. The temple has no tower. Outside the base has at the top a good frieze of lions, elephants and horses with some human figures at intervals. The temple is popularly known as *Bhandara basti*. Four new inscriptions are to be seen here from one of which we learn that the *basti* was erected by *Boppa* son of *Ganga Raja* the famous general of *Vishnuvardhana* and that the architect was *Drohagharattachari*. The period of the *basti* is therefore the early part of the 12th century. A small

hill to the south of Kambadahalli, known as Bolare-betta, has at the top the ruins of a *basti* with a seated Jina figure. It appears that the stones of the *basti* were removed and used for the bund of the Bindiganavale tank. An old worn out inscription and two names of visitors or pilgrims have been found on the hill. From an inscription to be seen on Donneboranere, a rock situated at some distance, we learn that the *basti* on the hill was dedicated to Chandraprabha.

Kannambādi,
now Krishna-
rajasagara

Kannambadi, now Krishnarajasagara A village in Krishnarajpet Taluk. Population 189

Kannambādi is according to the *Sthala-purāna* Kanvapuri, because the sage Kanva had his hermitage here and set up or worshipped a *linga* since known as Kanvēsvara after him. A mound is shown in the bed of the Cauvery as representing the site of Kanva's *āśrama* or hermitage. The village is likened to Kāsi Kanvēsvara, Gōpālakrishna and the Cauvery, being taken to represent respectively Visvēsvara, Bindumādhava and the Ganges. The Kanvēsvara, Gōpālakrishna and Lakshmidēvi temples are therefore of special interest. The first is situated on the bank of the Cauvery and appears to be a structure of great antiquity. In the *navaranga* there are two niches at the sides of the *sukhanasi* entrance which contain figures of Ganapati and Mahāshāsura-mardini as usual. In another niche to the right is a fine figure of Umāmahēsvara flanked by Ganēsa and Subrahmanya, the mongoose being shown as the vehicle of Uma. The temple is called Kannēsvara in an inscription dated A D 1114, and since reference is made in another inscription, of A D 1118, to a grant made to the temple by Kannara, *i e*, Rāshtrakūta king Krishna, there is ground for supposing that this may be the Kannēsvara temple mentioned in the Kadaba plates (*Gubbī* 61) of A D 812, as having been built by the Rāshtrakūta king Kannara or Krishna I. If this supposition is correct, the period of the temple is carried back to the close of the 8th century. It has 4 old inscriptions, *Krishnarajapete* 31-34. The Gōpālakrishna temple is a large structure, about 100 yards by 60 yards, being a mixture of the Dravidian and Chālukyan styles. It is a symmetrical building of considerable architectural merit enclosed by two *prākāras*. The *mahādvāra* or outer gate has verandas on both sides. To its right and left

The Lakshmidēvi temple is a modern structure, built in A D 1818. It has 3 cells standing in a line, with Mahālakshmi in the middle and Sarasvatī and Mahākālī in the right and left cells. All the figures are seated with 4 hands and are about 4½ feet high with *prabhāvalī* or glory. Mahākālī is well carved. She has a crescent on the crown and holds a noose, an elephant-goad, a *kalasa* or water-vessel and a rosary in her hands. These attributes are peculiar. In *Krishnarajapete* 25, reference is made to the Mahākālī of Ujjain, and it is stated that the Mahākālī of Kannambādi was made on the model of the one at Ujjain. Mahālakshmi holds lotuses in two of her hands, while Sarasvatī plays on the *vīna* or lute with two hands and holds a book and a lotus in the others. A figure of Avēsadamma, who built and endowed the temple, is kept in a niche to the right in the *navaranga*. An inscription in the temple states that she was a virgin of the fourth (or Sūdra) caste, named Nanjamma, that the goddess Mahākālī became manifest in her, which accounts for her name Avēsadamma which means a 'possessed woman', and that through her agency cholera and small-pox, which had been raging in parts of the country, were stamped out. It is said that on her fame reaching the capital, Krishna Rāja Wodeyar III sent for her and made a grant for the temple founded by her.

At the Hiridēvate temple, a *jātre* takes place on a large scale every year. It appears that formerly human sacrifices were offered to the goddess, but now, as a reminiscence of the old practice, it is said that a man selected out of the villagers is tortured till he becomes quite unconscious and that when he regains consciousness after a long interval, the villagers cry out *bahge jīva bantu*, which means "the victim has revived," and then proceed with their other work. Another curious custom in these parts consists in setting up images of the men who have died unmarried in the village and marrying a bull to a cow in front of them with certain ceremonies. This is done to propitiate the spirits of the unmarried dead, so that they may not envy and molest the married people of the village.

The Persian inscription, which is close to the spot where the water engine is working, refers to an *ancient* or embankment, about 70 feet high, built across the Cauvery at considerable expense by Tipu Sultān in A D 1794. People say that the *prākāra* of the Kanvēsvara temple was demolished by Tipu in order that he

might easily procure stones for the embankment. It is of interest to note that the Reservoir is practically at the site selected by Tipu Sultan for his own embankment. The inscribed Persian slab was found a few hundred feet up stream while clearing the site for starting the works in 1911. It is now set up at the front of the Dam on the southern bank near the under sluices.

Since the above was written the temples described above, three on the left bank at Kannambudi and two on the south at Anandur have been submerged. It may also be remarked that the historic ford which existed here where the Mahabatta and British armies crossed the Canvery in the famous wars of the 18th Century has also been submerged. (See under Krishna rajasagara)

Karapur —13 miles from Mysore on the Mysore Manan Karapur
toddy Road, Karapur is situated in the midst of thick jungles in which elephants, bisons, tigers and other wild animals exist. About a furlong from the river Kibbi and on a rising ground substantial picturesque buildings have been constructed for temporary residence during *Khaddas*. During Royal and Viceregal Visits, gardens are laid out and the camping ground is studded with rows of tents forming a lovely view. The camp is then lighted up with electric lights.

Karbail —A village in Nagamangala Taluk. Population 101. Karbail

A fine *virgal* of the time of the Ganga king Vitimarga Permanadi is to be seen to the north of this place. Besides the usual sculptures the *virgal* has at the bottom to the left figures of two men represented as carrying a corpse. This is rather peculiar.

Karighatta —A hill rising to 2,697 feet in the Sringeri Karighatta
patam Taluk east of the point where the Lolapavani joins the Canvery. The annual festival (*Jatre*) held for one day in February or March attracts an assemblage of about 20,000 people. This place figured in the fights connected with the advance on Sringeripatam of Lord Cornwallis.

Kāvēri, also
Cauvery

Kaveri (also Cauvery). The *Kabæris* of Ptolemy and the Greek geographers, the principal river in the Mysore State. It rises in Coorg, in the Sahyadri or Western Ghāts, the reputed source being at Tala Kāvēri. Flowing eastwards through Coorg as far as Siddapur, it there turns to the north, and touches the Mysore territory near Fraserpet, from which, as far as Kannagal, it forms for 20 miles the boundary between Mysore and Coorg. Continuing northwards for a few miles through the Arkalgud Taluk of the Hassan District, near Konanur it turns to the south-east, which direction it maintains throughout the Mysore District.

Re-entering the latter near the *anicut* of Saligram, it runs through a deep narrow gorge, suffering a fall of 60 to 80 feet in the rapids at Chunchankatte. With a short bend to the north from Yedatore to meet the Hēmāvati near Tippur, it resumes its south-east course and receives the Lakshmanatirtha near Bhairapur. Lower down, where the stream branches to form the island of Seringapatam, the northern arm is fed by the Lōkapāvani. The growing river thence flows on to Naisipur, where its waters are replenished by those of the Kabbani. From this point, with a bend eastwards and southwards, it arrives at the ancient city of Talkad, all but buried in hills of sand. Again turning east, it is joined by the Suvaināvati or Honnu-hole, and thence forms the boundary between Mysore and Coimbatore for 40 miles. From near Talkad to the island of Sivasamudram it runs northwards.

The branches of the stream which enclose that island form the picturesque falls of Gangana Chukki on the Mysore side and of Bar Chukki on the Coimbatore side. The re-united stream, with a bed 300 feet lower, passes thence eastwards through a wild gorge, receives the Shumsha and the Arkāvati from the north, and narrowing at one place to what is called the *Mēke-Dātu* or Goat's Leap, quits the State at the point where the Coimbatore and Salem boundaries meet. In its further course, it runs southwards, forming the boundary between those two Districts and receiving the Bhavāni and other streams. Thence, entering the Trichinopoly District in an easterly direction, it

forms the island of Srirangam and then spreads in a rich delta of fertility over the Tanjore District. The principal arm under the name of the Coleroon flows north east separating Trichinopoly and South Arcot from Tanjore and falls into the Bay of Bengal near Devikotta.

The average breadth of the Cauvery in Mysore is from 700 to 100 yards but from its point of confluence with the Kabbani to the Srirangam Iron Falls it swells into a much broader stream. The maximum flood discharge as gauged roughly at Hannur is 230,000 cubic feet per second. The ordinary monthly discharge calculated at 4 feet in depth is 180,000 cubic feet per second but 6, 8 and 10 feet are not uncommon. The bottom of the river is for the most part composed of rocks generally of granite character which renders it unfit for navigation. In some places however where there is sufficient soil to admit of it the bed of the river is laid out in vegetable gardens during the dry season when the water is very low. These gardens of melons and cucumbers have an exceedingly pretty effect. The first fresh in the river generally occurs about the middle of June. In August the flow of water begins to decrease but the river is not generally fordable till the end of October. Its water is in some parts considered unwholesome by the local people and at Sennapatam they attribute the fever which is there prevalent to its influence being prejudicial against even bathing in it during certain months.

During the greater part of its course it is bordered on each bank by a rich belt of wet cultivation. There are however several breaks occasioned by the inadaptability of the country and deficiency of irrigation. The first of these is from the Sali gram anicut to Chunchankatte about 5 miles on the right bank, the second from Vedaturo to the Tippur anicut a distance of 4 miles on the right bank and the third from Narasipur in the Tirumakudlu Narasipur Taluk to the boundary of the Coimbatore District about 12 miles also on the right bank.

The waters of the Cauvery are dammed by no less than twelve anicuts from each of which one or more channels have been led off for purposes of irrigation. Two of the anicuts are situated in Hassan and will be described with their channels under that District.

Kāvūrī, also
Cauvery

Kaverī (also Cauvery) —The *Kabaris* of Ptolemy and the Greek geographers, the principal river in the Mysore State. It rises in Coorg, in the Sahyadri or Western Ghāts, the reputed source being at Talā Kāvūrī. Flowing eastwards through Coorg as far as Siddapur, it then turns to the north, and touches the Mysore territory near Fraseipet, from which, as far as Kennagel, it forms for 20 miles the boundary between Mysore and Coorg. Continuing northwards for a few miles through the Arkalgud Taluk of the Hassan District, near Konanur it turns to the south-east, which direction it maintains throughout the Mysore District.

Re-entering the latter near the *ancut* of Saligram, it runs through a deep narrow gorge, suffering a fall of 60 to 80 feet in the rapids at Chunchankatte. With a short bend to the north from Yedatore to meet the Hēmāvatī near Tippur, it resumes its south-east course and receives the Lakshmanatīrtha near Bhairapur. Lower down, where the stream branches to form the island of Srīngapatam, the northern arm is fed by the Lōkapāvatī. The growing river thence flows on to Naisipur, where its waters are replenished by those of the Kabbam. From this point, with a bend eastwards and south-wards, it arrives at the ancient city of Talkad, all but buried in hills of sand. Again turning east, it is joined by the Suvannāvatī or Honnu-hole, and thence forms the boundary between Mysore and Coimbatore for 40 miles. From near Talkad to the island of Sivasamudram it runs northwards.

The branches of the stream which enclose that island form the picturesque falls of Gangana Chukki on the Mysore side and of Bar Chukki on the Coimbatore side. The re-united stream, with a bed 300 feet lower, passes thence eastwards through a wild gorge, receives the Shumsha and the Arkāvati from the north, and narrowing at one place to what is called the *Māle-Dātu* or Goat's Leap, quits the State at the point where the Coimbatore and Salem boundaries meet. In its further course, it runs southwards, forming the boundary between those two Districts and receiving the Bhavāni and other streams. Thence, entering the Trichinopoly District in an easterly direction, it

forms the island of Srirangam and then spreads in a rich delta of fertility over the Tanjore District. The principal arm under the name of the Coleroon flows north east separating Trichinopoly and South Arcot from Tanjore and falls into the Bay of Bengal near Devikottai.

The average breadth of the Cauvery in Mysore is from 300 to 400 yards but from its point of confluence with the Kabban to the Srirangamudram Falls it swells into a much broader stream. The maximum flood discharge as gauged roughly at Bannur is 239 000 cubic feet per second. The ordinary monsoon discharge calculated at 4 feet in depth is 18 000 cubic feet per second but 6 8 and 10 feet are not uncommon. The bottom of the river is for the most part composed of rocks generally of granite character which renders it unfit for navigation. In some places however where there is sufficient soil to admit of it the bed of the river is laid out in vegetable gardens during the dry season when the water is very low. These gardens of melons and cucumbers have an exceedingly pretty effect. The first fresh in the river generally occurs about the middle of June. In August the flow of water begins to decrease but the river is not generally fordable till the end of October. Its water is in some parts considered unwholesome by the local people and at Seringapatam they attribute the fever which is there prevalent to its influence being prejudiced against even bathing in it during certain months.

During the greater part of its course it is bordered on each bank by a rich belt of wet cultivation. There are however several breaks occasioned by the inadaptability of the country and deficiency of irrigation. The first of these is from the Sahagam *anicut* to Chunchankatte about 5 miles on the right bank the second from Yedatore to the Tippur *anicut* a distance of 4 miles on the right bank and the third from Narsipur in the Trumakudlu Narsipur Taluk to the boundary of the Coimbatore District about 12 miles also on the right bank.

The waters of the Cauvery are dammed by no less than twelve *anicut*s from each of which one or more channels have been led off for purposes of irrigation. Two of the *anicut*s are situated in Hassan and will be described with their channels under that District.

The first dam thrown across the Cauvery in the Mysore District is the Alale Katte, Yedatore taluk, a long straggling structure of rough stone and of irregular section, length 570 and breadth 4 yards, it supplies the Sahgram channels on the left bank, which run for a distance of 21 miles, passing the large village of Sahgram. The revenue realized is Rs 18,361.

The next dam in order down the river is the Hanumantha Katte, giving rise to the Mirle channel. It is irregular in section and built of rough stone, with a weir in its northern end. The channel is led off on the left bank and, after running for about a mile, divides into three branches, viz, the Hosanāla, 12 miles, and the Attikatte, 6 miles. The drainage of these unites in the valley, and is led off by a channel called the Hampapura, which, after a course of 16 miles, ends in the Gullige tank. The revenue derived from these channels is Rs 20,811. The dam and channels were constructed by Chikka-Dēva Rāja-Wodeyar, and improved by Dewan Pūrnaiya.

Chunchankatte dam lies about two hundred yards below the last mentioned. It stretches tortuously across the river, and has back facing. The dam is built in an advantageous position, a short distance from the head of a narrow gorge, and a few hundred yards above the Chunchan rapids, which are from 60 to 80 feet in height. The Rāmasamudram channel led off from this dam has a course of 11 miles and runs near to the important town of Yedatore. The cultivated area is about 4,300 acres, yielding a revenue of Rs 25,809. Both dam and channel were constructed by Chikka-Dēva-Rāja-Wodeyar.

The fourth *anicut* on the river is the Adagur Katte, giving rise to the Tippur channel. It is composed of two separate dams of rough stone which abut on an island in the middle of the river. The channel has a course of 22 miles, and at its end joins the Anandur by means of an aqueduct thrown across the Lakshmantīrtha river near the village of Sagarkatte, Mysore taluk. The greater part of the land below the channel is *ināmti*, the revenue derived by Government being Rs 4,089. Both dam and channel were constructed by Gōvinda Nāyaka, a Pālegār chieftain.

Close to the village of Sitapur, in the Seringapatam taluk, is the Madadkatte dam, a low straggling structure of rough stone, 776 yards in length and averaging 15 yards in breadth. From this dam the Chikkadēvarāyasāgar is led off, the finest

channel in the Mysore country it runs for 72 miles on the left bank of the river irrigating an area of 11737 acres from which a revenue of Rs. 89571 is derived. In its course it crosses the Ancho Halla and Mokal Halla streams and a small monsoon river called the Lokapavani near the station of French Rocks. Towards its end it feeds four important tanks the Huchalli, Kodagalli, Madagalli and Bannur the last situated near the town of the same name. The channel passes the villages of Haravi, Ketanahalli, Nelmane, Patomanahalli, Sethalli and Arkere in its course. Both dam and channel were constructed by Chikka Devo Raja Wodeyar.

A few yards below the Madakatte is the Devaraya dam giving rise to a channel of the same name on the right bank of the river. Its length is 18 miles and the revenue derived amounts to Rs. 12767.

Near the temple of Balmuri a mile from the village of Belgula is the Balmuri dam giving rise to the Varjanadi channel on the right bank of the river. The channel is the second in importance in Mysore, running for 11 miles through the Seringapatam taluk. It passes the large villages of Palholli, Kalaswadi, Noganhalli, Nuganhalli and Hebbich and ends near the Aukahalli tank. The revenue derived is Rs. 15888 and the area irrigated is about 7330 acres. By means of this channel the former sugar and iron factories at Palhalli used to be worked.

The eighth channel drawn from the Canvey in the Mysore District is the Bangar Doddi. The dam is thrown across the Paschimavahini branch of the river. The channel after crossing the Paschimavahini island is led over a second branch of the Canvey into the Seringapatam island by means of an aqueduct. It then divides into three branches: one enters the fort by means of an underground duct, a second terminates at the Daryo Daulat garden and the third after traversing the island ends at the Lal Bagh near the mausoleum of Haidar and Tipu. The revenue derived from irrigated land amounts to Rs. 5632.

Next in order down the river is the Ramaswami dam giving rise to two channels: the Ramaswami on the left bank in the Seringapatam taluk and the Rajparameswari on the right in the Tirumokundlu Narasipur taluk. The Ramaswami has a course of 31 miles for 12 miles it runs through the Bannur hobli then passing the large town of Sosile ends about 8 miles from the town.

of Talkad The revenue derived is Rs 16,793, and the irrigated area is 3,104 acres The Rājparamēsvari runs for a distance of 21 miles and passes the villages of Rangasamudra, Gargesvari and Tirumakudlu, irrigating an area of 1,848 acres, from which a revenue of Rs 9,771 is derived The land under the last three miles of the channel is *sarvamanya* Dam and channels were constructed by Dewan Pūrnaiya

The last dam on the river in the District is the Mādhava-mantri, situated near the village of Hemmige, about two miles above the town of Talkad The main channel formerly ran through the town, but in consequence of the influx of sand during high winds from the celebrated sand hills, the course has altered to a few hundred yards north of the town After running for about two miles, the channel divides into three branches, the total length is 18 miles The revenue derived is Rs 13,677, the acreage 2,939 The main branch of the channel ends in the Jahgir of Sivasamudram, a few miles above the celebrated Falls of the Cauvery

The river is spanned by bridges at Fraserpet, Yedatore, Seringapatam and Sivasamudram Those for the roads at the two latter places are interesting specimens of Indian construction Yedatore, Seringapatam and Talkad are the principal towns on the Cauvery The phenomenon of the sand dunes which have enveloped the latter has been noticed elsewhere

Alligators are numerous, but they have been seldom known to attack the fishermen, and the local people in general stand in no dread of them Some of the varieties of fish found in the river are described under that head Shoals of large fish are daily fed at Ramanathpur and Yedatore by the Brāhmins

In point of sanctity, the Cauvery, also called the Dakshina Ganga, is perhaps inferior only to the Ganges, but this sanctity does not extend to the tributaries in the same degree The reverence with which Hindus regard the Cauvery is exemplified in the *nullah* which was the work of, and bore the name of, the celebrated Dewan Pūrnaiya This canal, which was drawn from the Cauvery about 30 miles above Seringapatam, was upwards of 70 miles in length and terminated at Mysore It was carried over the Lakshmanatīrtha river by means of an aqueduct, so that although the *nullah* was partially available for irrigation,

it is clear that not the least of Purnaiya's object was to bring sacred water into the city of Mysore. Immense labour was expended on excavation and in many places cuttings upwards of 100 feet deep were made through solid granite. But this ambitious work was after all ineffectual for the accomplishment of the end proposed for the difference of levels made it impossible that in the absence of mechanical aids the Cauvery waters themselves could ever reach Mysore. The *nullah* which in the crowded parts of the city had become little better than a deep and noisome sewer has now been filled up within municipal limits and sites have thus been provided for handsome streets and buildings. At the same time the coveted conveyance to the city of the sacred waters of the holy river has with the help of modern science been successfully effected by the erection near Anondur of turbines by means of which the river water is forced up to a special reservoir at Mysore. The scheme was completed and the water made use of for the first time on the occasion of the installation of the present Maharaja.

The supposed divine origin of the river is related in the *Kaveri Mahatmya* of the *Igneya* and *Slanda Puranas*. She was first Vishnumoya, a daughter of Brahma. By his direction she became incarnate in Lopamudra, a girl formed by Agastya (with the view of her becoming his wife) of the most graceful parts of the animals of the forest whose distinctive beauties (*mudra*) as the eyes of the deer etc. were subjected to loss (*lopa*) in her superior charms. Brahma gave Lopamudra as a daughter to Kaveri muni, whence she acquired the name Kaveri. In order to secure beatitude for her new father she resolved to become a river, the merit of whose waters in absolving from all sin and blessing the earth should accrue to him. But when she became of age Agastya proposed to marry her. To reconcile the conflicting claims Lopamudra or the mortal part of her nature became the wife of Agastya while Kaveri or the celestial part flowed forth as the river.

Ketamanhalli —A village in the Mysore Taluk with a large number of *virgals* none of which is inscribed. Population 1 220.

Ketaman
halli

The goddess of the village, a stone pillar about two feet high with a human head, is called Huliyamma because according to the tradition she was brought from Huliyurdurga. She

has many devotees among the Bestas or fishermen, who form the majority of the population of the village. At the sides of the entrance to her shrine are hung up heads of wild boars mounted on wooden boards. The Bestas of this village are said to be abstainers from alcoholic drinks and as such superior to their caste-men in the city of Mysore with whom they do not intermarry. On the way to the village, a mutilated Jina figure, about 2 feet high, is found lying to the right.

Kikkeri

Kikkeri. A village about 8 miles from Krishnarajpet, midway between Krishnarajpet and Channarayana. Population 1,915. It has a fine tank.

The Brahmēśvara temple at this place, in the Hoysala style, is a specimen worthy of notice. It has certain distinctive features. At the entrance is an elegant open gallery on each side, with a porch supported on fluted columns. The sides of the temple are convex viewed from the outside, and bulge out so as to widen the interior dimensions beyond the base. Another feature, and one which adds considerably to the effect, is the deep indentation of the horizontal courses in the basement, and the knife edge to which the cornices have been brought.

The temple is situated in a courtyard and consists of a *garbhagriha*, a *sukhanasi*, a *navaranga* and a porch to which is attached a Nandi shrine. The temple has only one cell surmounted by a fine lofty stone tower and faces east. The *garbhagriha* doorway is well carved. There is a figure of Gajalakshmi on the lintel and *dvārapālas* flanked by archers at the bottom of the jambs. Above the lintel there are fine miniature turrets with intervening lions. The plain *sukhanasi* doorway appears to have been newly set up. The *sukhanasi* has an elegantly carved deep ceiling with a square panel of nine lotuses, each lotus being enclosed by ornamental knobs. This appears to be the best of the ceilings of the temple. There are several good niches in the *navaranga*—two at the sides of the *sukhanasi* entrance containing, as usual, figures of Ganapati and Mahishāsura-mardini, one adjoining the south wall now having a *linga*, though it must originally have had some image, and two adjoining the north wall, one of them containing a figure of Subrahmanya seated on a peacock, and the other a magnificent figure of Vishnu, about 4 feet high, under a fine ceiling carved with a blown lotus with

three concentric rows of petals. Each of the 4 pillars of the *navaranga* which are beautifully carved with head work has on its capital exquisitely carved female *madanalo* figures. Originally there were 4 such figures in the 4 directions on the capital of each pillar but now there are only 11 left—4 on the south east pillar 1 on the south west pillar and 3 on each of the remaining pillars. These figures are superb works of art. One of them is represented as singing and beating time with *tala* or cymbals. There are 9 dome like ceilings in the *navaranga* 8 in the 8 directions having a projecting square panel in the centre carved with the figures of the regents of the directions and the central one having a square divided into 9 panels containing figures of the 9 planets. The walls on both sides of the *navaranga* entrance consist of perforated screens from top to bottom. Outside the temple has a moulded base of 5 courses all round of which the 5th course is carved with figures of lions and human figures in panels at intervals. The walls have figures and miniature turrets over small pilasters and figures as at the Belur temple. The figures are all well carved but unfortunately all of them are literally defaced sometimes out of recognition. Altogether there are only 10 figures on the walls 31 male and 9 female. The figures representing gods and goddesses may thus be analysed—Siva as Tandavesvara 3 as Dakshinamurti with conch etc. 1 as Umamahesvara 1 and as Ardhanarisvara 1. Vishnu 3 the same as Venugopala 1 as Vamana 1 as Trivikrama 1 as Narasimha 1 as Govardhanadhari 1 as Varaha 1 and as Lakshminarayana 1. Brahma 1. Bhairava 2. Ganesapati 1. Harihara 1. Surya 1. Chandra 1. Sarasvati 1. Durga 1 and Mahishasuramardini 1. There is also the figure of the nude Mohini and figures of Arjuna and Bala. Worthy of particular notice is a figure which is a combination of the three gods Vishnu, Siva and Surya with 6 hands holding the attributes of the three gods in the three pairs of hands the vehicles of the three gods being also shown on the pedestal. Another figure of some interest is Brahma with Sarasvati seated on his lap. The figure is Varaha lifting the Earth. The figure to its right wearing sandals is Mohini. In the turret over Mahishasuramardini on the outer wall is shown a standing female nude figure. The same appears to be the case with the niche of the goddess inside. The meaning of the symbolism is not clear. A *jagati* or railed parapet runs to some distance on both sides of the *navaranga*.

entrance The rail has figures in panels between double columns But most of the blocks are uncarved, which is also the case with the *jagati* running round the Nandi shrine and the tower of the temple The covered porch in front has entrances both on the north and south To the south of the temple stand some good Nāga stones The bull in the front shrine, though partly mutilated, shows very good work Behind the bull stands in a niche a good figure of Sūrya There is also kept here a small figure of Sarasvatī To the north-east of the temple is a ruined shrine containing a fine figure of Bhairava To the left of the temple stands the shrine of the goddess which appears to have been built or renovated some centuries ago The architectural members of this structure have, in place of the usual masons' marks, long sentences inscribed in characters of the 13th or 14th century giving their names and indicating their position This is rather curious No labels giving the names of artists are found in the temple But we know from an inscription at the temple, *EC IV, Krishnarajapete* 53, that it was erected in A D 1171 by a lady named Bammave-Nāyakātī during the reign of the Hoysala king Narasimha I An inscription of about the 13th century is to be seen on a pillar to the right of the entrance, stating that the pillar was set up as a prop owing to the breakage of the lintel above

The Janārdana temple, also in the Hoysala style, is now in ruins It has only one cell surmounted by a stone tower and the outer walls have figures and pilasters surmounted by turrets There are many uncarved blocks on the tower and the walls The god Janārdana is now kept in the Chikka Narasimha temple

The ruined Mallēsvara temple, situated below the tank, is also in the Hoysala style The *navaranga* has a good doorway in front of which stands a fine *mukha-mantapa* supported by 16 pillars An inscription was found here *Krishnarajapete* 49 which is at this temple, is found to be dated in A D 1111

There are two temples in the village dedicated to Nārasimha which are known as the Dodda Nārasimha and the Chikka Nārasimha, the former being the older of the two It is said that the image of the Dodda Nārasimha temple was during some political trouble removed and immersed in water and that a new image was got from some other place for the temple Meanwhile the existence of the old image having been revealed in a

dream it was also brought to the village. But the cart in which it was being conveyed to the older temple could not be got to move beyond the Chikka Nara imha temple. So it was set up in that temple as such appeared to be the god's wish, and the new image in the older temple. Besides the image of the ruined Janardana temple is stated above the Chikka Narasimha temple also contains the image of the ruined Tirumaladeva temple. The latter though named Tirumaladeva is a figure of Rama with 4 hands the upper two holding a discus and a conch and the lower a bow and an arrow. Figures of Rama with 4 hands are rare.

The temple dedicated to the village goddess Kikkaranima is a large structure with an open veranda all round. The goddess is a standing figure about 3 feet high with 4 hands the attributes being a discus, a drum, a sword and a cup. The *utsava vigraha* has likewise the same attributes. No animals are sacrificed to the goddess. Her ear festival takes place in April every year. There are about 10 families of *Vokkaligas* who serve as *pujaris* by turns. Two modern inscriptions are to be seen on the lintels of the west veranda and an old one to the south west of the temple. The Uppange Bava temple consists of a lofty four pillared *mantapa* with the figure of a bull on the top of a well carved central pillar. The bull is approached by a ladder. The *mantapa* has a tower over it.

Kikkeri has a ruined fort. The place is a well known centre for weaving cotton cloths there being a large number of resident weavers in the locality.

Kittur—A large village on the right bank of the Kabbani Kittur
in Heggaddevankoto Taluk south of the Kasha. Population 1,336.

It is historically interesting as being identified with Kittipura or Kirthipura which was the capital of the Punnad Rajas. An inscription of the 11th century describes it as the Royal residence the immense great city Kirthipura.

Krishnarajpet—A Taluk in the north west till 1891 Krishna
rajpet
called Attikuppa till 1882 forming part of the Hassan District.
Area 425 square miles. Head quarters at Krishnarajpet.

Contains the following hobhs, villages and population

Name of Hobli	Village	Hamlets	Villages classified				Population of each Hobli
			Government	Sarvamanya	Jodi	Khayangutta	
Akkihebbal	49	6	40	8	1		13,697
Chinkurli	70	16	60	7	2	1	20,121
Kasaba	72	10	61	11			26,995
Kannambādi	55	7	48	7			17,665
Kikkere	57	5	56			1	16,672
Santhebachahalli	72	9	68	1	2	1	17,446
Total	375	53	333	34	5	3	1,12,596

Principal places with population

Akkihebbal 1,390, Bukanakere 1,694, Gummanahalli 2,182, Hosahalli 1,997, Kikkere 1,043, Krishnarajpet 3,226, Madavankodi 1,421 and Sindhaghatta 2,065

A number of villages from Channarayapatna and Hole-Narsipur taluks were added to the Kikkere hobli in 1882, while the Melkote hobli was transferred to Seringapatam Taluk, and some villages of Santebachahalli to Naga-mangala

The drainage of the Taluk is from north to south in a westerly direction, most of the streams discharging into the Hēmāvati, which runs along near the western border and joins the Cauvery in the south, on which side this latter river forms the boundary. On the eastern border are several rocky hills. There are some 284 tanks, at least 10 of which are of the first class. But the chief means of irrigation are the channels drawn from the Hēmāvati, of which there are five: the Mandagere, 27 miles long, irrigating 2,720 acres, the Akkihebbal, 7 miles long, irrigating 2,724 acres, the Hemagiri, 17 miles long, irrigating 1,460 acres, nearly all *nam* land, the Kannambādi, 14 miles long, irrigating 1,245 acres, the Kalhalli, 8 miles long, irrigating 328 acres

The dry crop soils vary considerably from good red in the low grounds to grey and sandy in the uplands especially in Saatebachahalli and Chinkuruli hoblis. Black soil is rare and in small patches. The crops taken from the red and sandy soils are better than might be expected. The rice lands under tanks are fairly good and in the east a coarse kind of rice *Doddi* or *Karibhatta* is raised without artificial irrigation. The gardens especially those for cocoa nuts betel leaf and plantains are productive. But land under the river channels though somewhat inferior in quality is more sought after on account of the perennial water supply. The irrigated tracts are also free from the fever which prevails in such lands in the Taluks to the west. The cultivation of sugar cane is general especially *Maralabba*.

Silk cloths of various kinds are manufactured at Sinda ghatta. The raw silk brought from neighbouring Taluks is here spun into thread dyed and woven.

The revenue settlement was introduced in 1886. The area of the Taluk was thus distributed —

	Acres
Cultivable (dry 1 05 632 wet 10 522 garden 3 161)	1 19 315
Uncultivable	89 176
Inam villages	31 333
State Forests 5 365 Kavalis 313	5 678
Total	2 48 802

The unoccupied area was 11 429 acres. The total Revenue Demand for the year 1922-23 was Rs. 2 12 060 and for 1923-24 was Rs. 2 12 871.

The main road from Srirangapatam to Channarayana runs through the Taluk from south east to north west passing by Krishnarajpet, from which there are roads north east to Nagamangala and east to Melkote. There is also an unfinished road west to Akkihebbal and Bherya. A road from Freach Rocks runs to Kannambadi and continues westward as a cart track.

There is also an unfinished road west to Akkihebbal and Bherya. A road from French Rocks runs to Kannambadi and continues westward as a cart track.

Krishna-
rajpet

Krishnarajpet. A small town situated in $12^{\circ} 41' N$ Lat, $76^{\circ} 33' E$ Long, 23 miles from the railway at French Rocks station, and 35 miles north-east of Mysore, on the Seringapatam-Channarayapatna road. Till 1891 it was called Attikuppa. Head-quarters of the Krishnarajpet Taluk, and a municipality.

Population in 1921	Males	Females	Total
Hindus	1,111	1,486	2,930
Muhammadans	147	147	294
Christians	2		2

Year	Income	Expenditure
1921-1922	2,583	2,679
1922-1923	2,819	2,014

Krishnarāja-
sāgara (See
Kannam-
bādi)

Krishnarajasagara After it is named the great Dam, until recently it was known as Kannambādi, the Camambādi of Wilks. The present name was given in 1917 in honour of the ruling sovereign H. H. Sri Krishna Rāja Wodeyar Bahadur during whose reign the Dam at the place was constructed.

The place was captured in 1606 by Rāja Wodeyar from Doddaiya Prabhu and annexed to Mysore. The ford here was a well known one in olden days and was the one by which Lord Cornwallis crossed the Cauvery to besiege Seringapatam in 1792. It was at this ford too that Captain Floyd with the English Cavalry and some of the Allies met Lord Cornwallis before he marched on to Seringapatam. Crossing over the same ford in 1799, Tipu Sultān by forced marches attacked General Stuart before the final fall of Seringapatam. This ford no longer exists, having been submerged. A curious story of a girl of this village is told in *Krishnarajpete* 25 dated in 1828. There was, we are told, an epidemic of small-pox and cholera, and the people were dying all around, when, in order to remove these dreadful calamities, the goddesses Mahālakshmi of Kolhāpura and Mahākālī of Ujjain became incarnate in Nanjamma, a virgin

of Kannamhadi a Gauda girl of the fourth or Sudra caste. The names of her father and mother grandfather and great grandfather are all duly given. Through the miraculous powers of healing with which she was endowed these diseases and other troubles were at once cured wherever she went and with the thank-offerings made to her throughout the country Nanjaya who must have been her manager or agent had a new temple erected at Kannamhadi to the goddesses above named. In *Krishnarajapite* 24 we have a further notice of this girl 16 years later when with Timma perhaps a brother or husband she had the *ranga mantapa* rebuilt.

For many years past the Government of Mysore had under consideration a project for a reservoir across the Cauvery river for extending irrigation in the State.

In 1902, the falls at Sivasamudram were harnessed to generate electric power for use in the Gold Mines of Kolar and in the Cities of Mysore and Bangalore. The river brings in a flood of about 200 000 cusecs in the monsoons but the flow in summer sometimes dwindles to less than 100 cusecs. The output of power being necessarily governed by the least dependable supply could not be increased nor even protected unless the natural flow was supplemented by storage.

The construction of the reservoir now in progress at a site situated 12 miles to the north west of Mysore was accordingly undertaken in 1911 with the three fold object of—

(1) Keeping up adequate supply of water for hot weather crops

(2) ensuring a constant supply of water for the already existing electric power installation at Sivasamudram and also to increase the output of power by new installations and

(3) increasing the irrigation in the valley

The project provides for—

(i) a masonry dam 121 feet high above the river bed and 6 550 feet long a reservoir of 11 500 m cft capacity with 1 700 feet length of waste weir

(ii) a canal system to irrigate 125 000 acres of land in the Sub Taluk

(iii) extensions and improvements to the power installation at Sivasamudram by which the out put will be increased

approximately from 13,500 to 32,000 H P The scheme is estimated to cost Rs 450 lakhs in all

In the last ten years, the masonry of the dam has been brought up to nearly 107 feet above bed on both the banks A temporary weir gap of a length of 900 feet is left in the river portion of the dam with its crest at 80 feet above bed Foundations for the permanent weir have been partly laid A set of deep level sluices have been built to pass the required supplies for existing irrigation in Mysore and Madras, while three other sluices have been provided on the north bank for the High Level Canal proposed to be opened. It is also under contemplation to guarantee 3,000 H P immediately below the dam for which four turbine sluices have been erected Two new canals, one on either bank, have been opened from the reservoir 40 feet above bed to irrigate 5,000 acres of land, chiefly to settle the population whose lands were submerged by the reservoir. The storage already effected has enabled increasing the output of power to 2,25,000 H P The outlay so far has been Rs 164 lakhs on works of the dam and canals and Rs 30 lakhs on the additional power works

The work remaining to be done is raising the dam to 124 feet above bed and completing the waste weir A length of 1,200 feet of the latter has to be provided with gates on crest. Some of them are intended to be made automatic in action so that when water rises above full reservoir level they may open, and close as the water falls, while others will be regulated by electric power Twenty sluice gates 10' \times 20' with sill at 80 feet above bed will also be provided adjacent to the weir for surplusing at times of maximum floods

The High Canal proposed, which is estimated to cost Rs 245 lakhs, is just being (1926) taken up The reservoir now under construction when completed will be the largest artificial lake in India and second to the Assuan Dam in Egypt which is the biggest in the world.

The dam has been projected in two stages The first stage is designed for a storage of 80' feet of water above the bed

and in the second or final stage 118 of water above sluice level. The first stage of the dam was sanctioned in G. O. No. C 1319—84-90 dated 12th October 1911 at an estimated cost of Rs. 81 lakhs and a revised estimate for Rs. 103.13 lakhs was subsequently sanctioned by Government in the year 1916. The height of the first stage dam is 88 feet. At present the dam has been raised to a height of 80 feet in the river bed portion over a length of about 895 feet. The flanks immediately on either side have been raised to a height of 108 feet nearly.

12 villages in the Mysore Taluk, 16 villages in the Krishnarajpet Taluk, 2 villages in Hunsur Taluk and 14 villages in Yedatore Taluk will be affected by the 88 contour lines involving the submersion of a total extent of 10,026 acres and 24 guntas as detailed below—

	Acres	Guntas
1 Mysore Taluk	2 68	6
Krishnarajpet Taluk	4 07½	2
3 Hunsur Taluk	4	33
4 Yedatore Taluk	3 6½	3
Total	10 0 6	44

Two canals have been opened from either side of the Dam for irrigation—Right Bank Low Level Canal and Left Bank Low Level Canal. These are fed by two irrigation sluices built at 40 feet above the river bed. The length of the Right Bank Low Level Canal (main) is 18 miles from which several branch channels emanate covering a distance of 9½ miles. Both the main and branch channels which run through the Taluks of Seringapatam and Mysore irrigate an extent of 1945 acres yielding an annual revenue of Rs. 9,500 to Government. The Revenue derived so far since water was let in the channels in the year 1916-17 amounts to Rs. 32,358. The amount of contribution recovered from the holders of lands rendered irrigable by this canal aggregated to Rs. 47,647.

The left Bank Low Level Canal covers a distance of 13 miles and irrigates an extent of 1,344 acres of land in Krishna Rajpet and Seringapatam Taluks. The annual revenue derived

being Rs 6,777 The Government has already realised a revenue of Rs 25,593 since water was made available in this canal for irrigation purposes The contribution recovered from the holders amounted to Rs 34,097

Three channels above the reservon, *viz*, the extension of Mandagere and of Hemagiri Channels and the new Chāmarāja Right Bank channel have, either fully or partially, been opened for irrigation. Portions of Yedatore, Hunsur and Krishna-rajpet Taluks are commanded by these channels The area irrigated by them and the annual revenue are noted below —

	Area irrigated	Annual Revenue
	Ac g	Rs a p
(1) Chāmarāja Right Bank Channel	6,998 27	22,894 10 11
(2) Mandagere Extension	3,337 34	8,647 10 7
(3) Hemagiri	791 13	4,033 3 7

The revenue already derived under these channels amounted to Rs. 1,79,264 while Rs 2,38,805 was recovered in the shape of contribution

As a large extent of cultivated land was coming under submersion by the first stage of the reservon, as also a number of villages, Government thought it advisable to provide the expropriated ryots with new lands which could be cultivated and irrigated, instead of giving them money compensation The total extent of lands submergeable is about 10,000 acres exclusive of *kharab*, etc., of which an area of 9,775 acres has been acquired to Government and the lands granted in exchange under the Land Compensation Scheme to 10,359 acres 8 new villages have been already formed for settling the displaced ryots and proposals for the formation or extension of 24 villages are under consideration

The total expenditure under compensation has up-to-date amounted to Rs. 12,51,270

Lakshmantirtha. A tributary of the Cauvery It rises in the Western Ghāts, in the Brahmagiri which forms the

snuthern frontier of Conrg Its whole course is north east entering Mysore two miles snuth of the village of Chikka Hejjur in Hunsur Taluk it flows past Hanagod Hunsur and Katte Malalvadi into the Yedatam Taluk where it falls into the Cauvery near the village of Sagarkatte It is a perennial stream and though a smaller river than the Kabbani is considerably more utilized for irrigation The following lands are irrigated from it The right bank from Hanagod to Katte Malalvadi the left bank from Katte Malalvadi to the Seriyur anicut both banks from the Seriyur anicut to Marchahalli the left bank from Marchahalli to Sagarkatte the right bank from Sagarkatte to the confluence with the Cauvery It is crossed by seven dams

The first dam thrown across the river is the Hanagod below the village of the same name It is built in the ordinary manner of rough rubble stone its strength being greatly augmented by the rocky formation of the river bed The channel which bears the same name is led off on the right bank of the river and after running for nine miles divides into three branches viz the Nellur 7 Hanumantapur 24 and Wudur 20 miles in length The Nellur follows the course of the river and ends in the Elephant tank near Hunsur The Wudur and Hanumantapur however passing through a deep cutting enter the watershed of the Kabbani river the Wudur running in an easterly the Hanumantapur in a southerly direction Six tanks are fed by the Hanumantapur in its course viz the Pudukote Nanjanhalli Sowe Harrupur Belliganhalli and Gudamanhalli The total revenue derived from the Hanagod and branches altogether 66 miles in length irrigating 4 101 acres is Rs 18 245 The dense jungles which surround the channels interfere with extensive cultivation The drainage from the Wudur and Hanumantapur channels is taken up by the Dasanpur and Maikalwe the latter feeds the Karigal Hollehundi and Parvatam tanks on the banks of the Kabbani

The Ramenahalli an old breached dam is the next about three miles up the river from Hunsur the channel was led off on the right bank and ran for 20 miles passing through the town of Hunsur

The Katte Malalvadi situated near the village of the same name about 4 miles below Hunsur is the third dam on the river

The channel has a course of 11 miles along the left bank. The irrigated area is 509 acres, while the revenue derived is Rs 2,500.

Near the village of Hundwādī is the Hangarhallī dam, giving rise to two channels, the Siriyūr and Husenpura. The former, on the left bank, runs for 11 miles, and yields a revenue of Rs 1,753, the latter, on the right bank, has also a course of 11 miles, with a revenue of Rs 3,246.

The fifth dam is Marchahallī, giving rise to a small channel of the same name. The dam breached in 1864 and a new dam was constructed at a short distance above the site of the old one. The channel which runs along the left bank is 10 miles long and yields a revenue of Rs 2,392.

The Sagarkatte dam, built by Dewan Pūrnaiya near the village of the same name, gives rise to the Anandūr channel on the right bank. This channel was originally carried as far as Mysore, it having been the constructor's intention to supply the town with the river water, the design however failed, and the channel is in order for only 20 miles. The revenue derived is Rs 7,278, on an irrigated area of 1,317 acres.

The Cholanhallī is the last dam on the river, about half a mile above its confluence with the Cauvery, the dam breached in 1864, but the irrigation under the channel is kept up by the drainage of the Anandūr, under which channel it runs for its whole length.

Lōkapāvani
(world-purifier)

Lokapavani (*World-purifier*) A small stream running to the Cauvery. It rises to the west of Nagamangala, and flowing with an easterly course past the French Rocks, receives the stream from the Mōtī Talāb, and enters the Cauvery opposite the Karighatta peak, off the north-eastern point of the island of Seringapatam.

Madapura

Madapura. A village in Krishnarajpet Taluk, about half a mile from the Hēmāvati. Population 762.

Has several temples. The Triyambakēsvara, situated to the east of the village, is a small temple enclosed in a mound. It appears to be an old structure in the Hoysala style. There is a fine figure of Ganapati in the *sukhanasī*. The ceilings of the *garbhagr̥ha*, *sukhanasī* and *navaranga* are well executed,

that of the *sukhanasi* showing a unique design and looking as if it were made of iron bands fixed with nuts and bolts. The ceiling of the *garbhagriha* has a fine lotus with three concentric rows of petals. The work resembles that at Navuttanahalli. The *sukhanasi* door sill and jambs consist of the broken parts of an old *viragal* the lowest panel of which shows a man kneeling and tearing up a hoar by its mouth. The fragmentary inscription on the *viragal* was copied by the Archaeological Department in the year 1914-15. The ruined Mahalingesvara temple also in the Hoysala style had a good stone tower now gone to ruin with *nandis* at the corners and niches surmounted by *simha lalatas* in the four directions. Above the niches were small figures on all sides which have now fallen off. The outer walls have a few niches between pilasters. The Chennigaraya temple consisting of a single cell has a figure about 3½ feet high of Chennigaraya or Kesava. Outside is kept a good though mutilated figure of Vishnu. The Virabhadra temple which is comparatively a modern structure has in its *nataranga* small neat figures about 1½ feet high of Surya, Bhairava and Bhringa. An inscription on a stone beam belonging to a well which is now filled up tells us that Muddukrishnamma wife of Krishna Raja Wodeyar III built the well. It appears she was a native of this place. The village situated about half a mile from the Hemavati contains about 25 families of Smartha Brahmans.

Maddur—A town on the right bank of the Shimsha 36 Maddur miles north east of Mysore on the Bangalore Mysore railway and the Bangalore Srirangapatam road. It is a municipality and till 1875 was the head quarters of the separate Maddur Taluk. This was for a time formed into a sub taluk under Mandya Taluk but in 1886 was absorbed in that Taluk.

Population in 1921	Males	Females	Total
Hindus	1 053	900	2 043
Mussalmans	408	3 9	737
Christians	21	14	35

Maddur, properly Marudur, appears to have been formerly a place of importance, but has never recovered from the destruction to which it became subject during the war of Tipu with the English, and is unhealthy. There are two large Vaishnavite temples, dedicated to Narasimha and Varadarāja (see below) which draw a nominal allowance from Government. A fine brick bridge of seven arches, constructed in 1850, spans the Shimsha, and has now been used for the railway as well as the road. Tradition claims for Maddur a great antiquity. According to the story referred to below, it was originally named Arjunapura after Arjuna the Pāndu prince, who arrived there on pilgrimage. The Shimsha also bears the name of the Kadamba, from a *rishi* who resided on its banks. Under the Gangas, it formed part of the province of Chikka Gangavādi, and in later times Vishnuvardhana of the Hoysala line is stated to have given Maddur in *nam* to the Srīvaishnava Brāhmans. He is also stated to have built the Maddur tank and the temple of Varadarāja. The *agrahāra* was called Nārasimha-chaturvēdi-mangalam, after his son. The fort was taken in 1617 by the Dalavāyi of Mysore, during the reign of Rāja Wodeyar, and was rebuilt by Haidar Ali. It was dismantled by Lord Cornwallis in 1791 on his march to Seringapatam.

About three miles west of Maddur are the remains of an old fort named Nāgarakere, which was inhabited 600 years ago by a Pālegār named Mugurta Rāja. According to the popular legend, he was the son-in-law of Ganga Rāja of Sivasamudram, and his wife was perpetually boasting of her father's splendour, declaring among other vaunts that she could hear her father's fort-gate, which was made of bell-metal, shut every evening at sunset. Incensed at this, her husband determined to prove his power superior to that of Ganga Rāja, and marched an army against Sivasamudram, which he took and destroyed.

Four miles from the town is an unfinished tank, known as the Sūlekere. It was commenced about 700 years ago by a woman of the dancing-girl caste, who died before it could

be finished. It is estimated that its completion would cost a lakh and a half of rupees and would bring more than a thousand *landis* of wet land under cultivation.

There are cross roads from Maddur to Mulvali and the Cauvery Falls southwards and to Huliyurdurga northwards.

The Narasimha temple referred to above is a Hoysala building facing east with later additions in the Dravidian style with a *gopura*. The *mahadwara* is surmounted by a lofty *gopura* or tower. The outer walls are decorated with pilasters and miniature turrets. Around the *garbhagriha* are three niches in the three directions. There are also two more on the outer walls of the *nataranga* on the north and south. The *nataranga* is supported by four well carved black stone pillars adorned with bead work. The central ceiling which must have been a good one has been recently removed and glass windows set up to let in light. The image of the god though elegantly carved is a terrific seated figure about 1 foot high represented as tearing out the entrails of the demon Hiranyakasipu lying on the lap. Of the eight hands of the god four bear the attributes a discus a conch a noose and an elephant goad two are engaged in tearing out the entrails and two in lifting them up for wearing around the neck as garlands. The *prabha* or glory has the ten incarnations of Vishnu carved on it. To the right of the god stands Lalitida with folded hands and to the left Garuda. In the *sukhanasi* are kept along with the processional images of the temple those of the Varadaraja and Rama temples also. Of these the images of the Narasimha and Varadaraja temples are very handsome figures. The front hall has on either side three cells facing one another. The first cell to the left is the store room the second and the third containing Ramanujacharya and Vedantacharya. The first to the right has Yasoda with child Krishna as also Srinivasa. The second Vishalaksha and Nammakur and the third Manavalamamuni or Jiyar. The *prabha* of Yasoda has sculptured on it the *ashta dikpalakas* or regents of the eight directions. The temple has two godesses in separate shrines in the enclosure the one in the south shrine known as Saumyanayaki and the other in the north known as Narasimhaayaki. In the north of the enclosure is a shrine containing well carved figures of Rama Lakshmana

Sīta and Hanumān, the last standing in a peculiar posture with the right hand raised to the nose, as if anxiously awaiting the orders of his lord Rāma. A new Hoysala inscription, dated 1325, is to be seen on a slab built into the ceiling of the temple kitchen. The image of the god in the Varadarāja temple, about 10 feet high, is exquisitely carved, but has no *prabha*.

One of the inscriptions in the Narasimha temple is dated in 1150 A D. Another at the outer entrance has been set down to the 10th century. In the *navaranga* of the temple, there are four well-carved pillars of black hornblende similar to the ones usually found in temples of the Chālukyan style. Besides that of Narasimha, the temple contains also images of Yasōda with child Krishna on the lap, Srīnivāsa, Rāma, Lakshmana, Sīta and Ānjanēya. The last four were originally in the Rāma temple from which they were removed and set up here some years ago. An image of Lakshminarasimha was subsequently set up in their place. All the images in the Narasimha temple are made of black stone and are more or less beautifully carved.

A palm-leaf manuscript of the *Sthala-purāna* which professes to be an extract from the *Brahmānda-purāna* and consists of 12 *adhyāyas* has been examined by the Archaeological Department. In it Maddur is called Arjunāpuri and also *Kadambakshētra*. The god Narasimha is stated to have been set up by Brahma and worshipped by the sage Kadamba. The Maddur river is called Kadambanadi after the sage Kadamba. Arjuna is said to have gone to Maddur accompanied by Krishna, worshipped the god and built the *vimāna*, etc., of the temple. The following are mentioned as the 8 *tīrthas* at Maddur — Padma, Brahma, Rishi, Prahlāda, Ānanda, Narasimha, Yādava and Pāndava, and a festival named *Ashtatīrthōtsava* is said to take place on the 12th lunar day in the bright fortnight of *Āsvayuja* (September-October) every year.

In the inscriptions, Maddur is called *Marudur* and also *Narasimha-chaturvēdimangala*. The god in the Varadarāja temple is also known as Allālanātha, Allāla being a Kannada corruption of the Tamil Arulāla which is a synonym for *Varada*. The god Varadarāja at Conjeevaram is also known as Arulālap-perumāl. The image of Allālanātha, about 10 feet high, is a

wonderful work of art characterised by a marvellous elaboration of details both in front and on the back. The rich carving on the back of this image was so well known among the people that it has given rise to a common saying in Kennode viz. *Ella devara munde nodu Allalanathana hinde nodu* which means see all the (other) gods in front but Allalanatho on the back. There is a tradition that the Hoysale king Vishnuvardhana set up this image here in order that his mother who was too aged to go to Kanchi might worship Varadaraja every day. There is also a ruined Isvara temple at Maddur the materials of which were being removed for rebuilding in a more central place. The pillars beams and capitals show pretty good work but bear no inscriptions.

The Maddurammoo temple is dedicated to the village goddess. Maddurammoo is the goddess presiding over Maddur as Hasanamma is the goddess presiding over Hassan. The goddesses said to be seven sisters are represented by seven natural stones which are in a line in the open ground and protrude a few inches above the ground level the central ones being bigger than those on the sides. It appears they refused to be in houses so they are in the open in a pond like basin in front of a *mon-tapa* an oblong platform in mortar being built around them. A *jatre* is held every year. The devotees of the goddesses are generally the lower classes of the people.

Malvalli	51	18	48	3			27,291
Total	235	119	207	24	4		1,19,942

Principal
places with
population

Chottanahalli 1,478, Belakavadi 5,820, Boppagowdana-
pura 1,108, Doddarasinakere 2,220, Halagur 2,603, Kal-
kurni 3,167, Kaddakotanahalli 1,369 Kiragaval 2,063,
Malvalli 7,402 and Purigal 1,535

The Cauvery forms the southern boundary, and receives
towards the east the Shimsha, or Maddur-Hole, into which
all the waters of the taluk flow At about the middle of the
southern boundary, the Cauvery divides into two branches,
forming the island of Sivasamudra, and precipitating itself
into deep ravines in the picturesque Cauvery Falls The
course of the Shimsha is at first east, but from the village of
Sargur, where it is joined by the Kanva from the north,
it runs south into the parent stream Neither of these
rivers is at present a source of irrigation, some channels
which were formerly drawn from the Kanva having fallen
out of repair The latter part of the Rāmasvāmi channel,
drawn from the Cauvery near Bannur, irrigates lands in
Purigal hobli, but they chiefly belong to the Jahgirdar of
Sivasamudram All the remaining irrigated land is below the
few tanks The two largest, the Malvalli and Maranahalli
tanks, are in the immediate neighbourhood of Malvalli,
and their waters, uniting into one channel, irrigate land to a

distance of 9 miles. A large tank has also been recently formed by a dam across the Hebballa a tributary of the Shimsha at Arasinkere.

The taluk generally is an undulating plain except on the south-east which is occupied by the Basavana betta State Forest and by hills of inconsiderable height of these the principal are Habbaldurga (3 507 feet) Basavana betta Bemina landi betta, Tayalur betta Singrajpur betta and Achala betta.

The soil in the south-eastern quarter of the Taluk is mostly rocky and shallow also in parts of the north west. In the remaining parts it is generally red with more or less admixture of sand. Towards the south west the soil increases in depth colour and fertility until the rich soils including patches of black soil on the border of the Tirumakudlu Narsipur Taluk are met with. The crops vary with the soils jola cotton and Bengal gram being grown to some extent in the better soils while only ragi, ave ave togar and other pulses are grown in the poorer soils. The wet lands may be described as generally inferior and there is almost entire absence of sugar cane cultivation. Mulberry is the chief crop in gardens and it is grown even in dry lands but in the latter case is poor. Rice, coconut and plantains are sparsely represented. Silk and hides are the principal articles exported from the Taluk. Halagur was once the seat of a considerable iron industry, but owing partly to lack of fuel and charcoal, and partly to the competition of foreign iron, smelting has been almost abandoned.

The revenue settlement was introduced in 1893. The area of the Taluk was thus distributed —		Acre
Cultivable (dry 1 10 613 wet 1 497 garden 2 594)		1 17 703
Uncultivable		68 102
Inam villages		39 702
Forests		21 154
Kavals		608
Total		2 19 771

The unoccupied area was 1 166 acres. The total Revenue Demand for 1922-23 was Rs 1 05 687 and for 1923-24 was Rs 1 00,531.

The Bangalore-Mysore road *via* Kankanhalli runs through Halagur and Malvalli, and is crossed at Malvalli by the road from Maddur to Sivasamudram. There is also a road from Sosale through Belakavadi to Sivasamudram, with a branch from near Purigal to Talkad.

Malvalli.

Malvalli A town situated in 12° 23' N. lat, 77° 7' E long, 28 miles east of Mysore, at the intersection of the Mysore-Kankanhalli and Maddur-Sivasamudram roads, 18 miles south of the railway at Maddur. Head-quarters of the Taluk of the same name, and a municipality.

Population in 1921	Males	Females	Total
Hindus	3,404	3,298	6,702
Muhammadans	343	311	654
Christians	29	15	44

An inscription of 1,685, in the time of Chikka-Dēva-Rāja, describes it as abounding in fruit-trees and filled with learned men. It formerly possessed a large fort, built of mud and stone, which is now in ruins.

Haidar gave Malvalli in Jahgir to his son Tipu, so that it then enjoyed considerable prosperity, although it does not appear that the population was greater than it is now. Below the Malvalli tank is the site of a fruit garden which Tipu planted, now occupied by paddy-fields. About two miles from the town, and close to the new Mysore road, is the scene of the only engagement which took place between the British army under General Harris and Tipu Sultān, during the march of the former on Seringapatam in 1799. Bullets, etc., are frequently found in the neighbourhood after a heavy shower of rain. After the action, Tipu sent and destroyed Malvalli to prevent its being of any use to the British army.

Mamballi — A village in Mysore Taluk. In the Tamil inscriptions of the place this place is surmised Mamballi pattanam. In the *nannanjan* of the Vaidyaswara temple at the village is kept a good figure about 4 feet high of Subrahmanya, seated on the peacock with 12 hands 3 of his faces being to the front and the other 3 at the back. In front of the temple stands a curious figure wearing a garland of Tulasi (*osimum sanctum*) beads and holding with the hands the hilts of a double-handled sword placed on the neck. In a separate shrine is the goddess of the temple a fine figure about 2½ feet high. A set of copper-plates containing an incomplete inscription of one of the Punnad Kings has been forthcoming from this place. Punnad or Punnata was an ancient kingdom situated in the south of Mysore. It is mentioned as Paunnata by Ptolemy in the second century. As only one record of this line of Kings has been known till now (see I & XVIII 766) this inscription though incomplete has to be looked upon as an important find. It mentions a king Rashtravarman who was of the Kshyapagotra and who ruled a kingdom which was watered by the Cauvery and the Kapila. Judging from the palaeography the plates appear to belong to the middle of the 6th century.

Mandya — A Taluk in the north east. Area 119 square miles. Headquarters at Mandya. Contains the following hoblis, villages and population —

Principal
places with
population.

Besagarahalli 1,592; Budnoor 1,747, Guttalu 1,698, Holalu 1,221; Honnalagere 1,513, Keragodu 2,482, Kestur 1,832, Kottathi 1,188; Kowdle 1,333, Maddur 2,754, Mandya 4,784, Nidaghatta 1,120, Santhekasalgere 1,642, Sathanoor 1,196 and Yelachakanahalli 1,331

The Taluk was increased in 1875 by the addition of the Maddur Taluk, with the exception of the Arasinkere hobli, joined to Malavalli; and in 1882 by the addition of the Koppa hobli from the Kunigal Taluk

The eastern portion is watered by the Shimsha or Maddur-Hole, which is crossed 9 miles above the town of Maddur by the Maddur *anicut*, recently re-built by cut stone. It gives rise to the Maddur Ane channel, running altogether for a distance of 12 miles to the Maddur tank, and irrigating 1,090 acres. This also branches into the following channels —

Chamanhalli, $2\frac{3}{4}$ miles, Barian, 2 miles, Vaidyanathpur, $3\frac{1}{4}$ miles, and Kemman, $5\frac{1}{2}$ miles, altogether irrigating 1,910 acres. The remains are visible of another channel from the Chikka Hole to the Kestur tank, but this has been out of repair and not used for about 80 years. The western portion of the Taluk is occupied by chains of rain-fed tanks, the drainage being south-easterly, towards the Shimsha. There are altogether over 200 tanks used for irrigation, of which Maddur tank is the largest, and 29 others are large. The wells are of no importance.

The country is gently undulating, and is only moderately wooded with banyan, *ippe* and other trees, there being no jungle, and only some small scrub on the eastern and north-western boundaries.

The soils for dry crops are as a whole poor, being sandy and gravelly, shallow and in some places very stony, especially in the uplands in the north. Black soil is rare. Good red soil occurs in the centre, and east of the Shimsha in the south. The soils in the wet lands are pretty uniform and of fair quality, except in those reclaimed under the new Maddur channel, and even here they are gradually improving from being brought under cultivation.

The usual dry crops are grown. The principal wet crop is rice. There is not much sugarcane but there is a good deal of mulberry in the east. The oreca gardens were ruined in the famine. The gardens that now remain are not very good and contain chiefly cocoa nut, plantains and mulberry with minor crops of chillies, vegetables etc. The *honge* trees are not here utilized for supplying manure to rice fields as in districts to the east. But *huchchellu* or other inferior crop is grown in rice lands after the harvest and is then ploughed in. Silt from tanks is largely used for manure both in wet and dry soils.

Sheep are numerous. A superior kind of *Kumbla* is made at Mandya, Satanur, Mudagere and other places. Silk worms are largely kept by both Muhammadans and Hindus who send the cocoons principally to Channapatna where the silk is reeled.

The revenue settlement was introduced in 1888 except in Keppa hobli which was settled with Kunigal Taluk in 1881. The area of the Taluk was thus distributed —

	Acrea
Cultivable (dry 1 33 936 wet 10 58½ garden 3 171)	1 47 692
Uncultivable	91 938
Inam villages	23 976
Total	2 63 60½

The unoccupied area was 3 822 acres. The total Revenue Demand for 1922-23 was Rs 1 91 531 and for 1923-24 was Rs 1 87 047.

The Bangalore Mysore railway runs through the south of the Taluk from east to west with stations at Maddur, Mandya and Yelhyur. The Bangalore Seringapatam Trunk road is close alongside the railway. From Mandya there are roads north to Basaral and south to Bannur. From Maddur there are roads north to Huliyurdurgo and south to Malvali, Sivasamudram and the Cauvery Falls. There is also a road from Lingarajachattru to French Rocks.

Mandya

Mandya A town situated in $12^{\circ} 32' N$ lat, $76^{\circ} 57' E$ long, 25 miles north-east of Mysore, on the Bangalore-Mysore Railway and the Bangalore-Seringapatam road Headquarters of the Mandya Taluk, and a municipality

Population in 1921	Males	Females	Total
Hindus	2,255	2,158	4,413
Muhammadans	147	132	279
Christians	25	26	51
Jains	69	75	144

The following is the mythological account of Mandya as contained in the local *Purāna*. In the *Kṛita Yuga*, when the country was covered with thick jungle, a *ṛishi* who made *Tapas* here, was in the habit of teaching the wild beasts to pronounce the sacred word *Vēda*. On this account, he named the place *Vēdāranya*, and established therein the god Janārdana or Varadarājasvāmī, whose temple is still standing. During the same age, another *ṛishi* set up the god Sakalēsvara-svāmī there. Vishnu appeared to him, and hence the place was re-named Vishnupura. Towards the end of the *Dwāpara Yuga*, a king, by name Indravarma, who was without issue, removed here in the hope of obtaining a son. His prayers were answered, and his son, whose name was Sōmavarma, built a fort and *agrahāra*, and nominated the site Mandāvēmu, which has since been corrupted into Mandya.

But Mandya appears to be named after the native place, near Tirupati, of the first Brāhman families who settled there, the village having been granted by Krishna-Rāja of Vijayanagar, in 1516, to Gōvinda-Rāja, twelfth in descent from Anantāchārya, a disciple of the reformer Rāmānujāchārya and a distinguished devotee of the idol Venkatēsa at Tirupati. Mandya continued to remain a *sarvamānyam* village for Sri Vaishnava Brāhmins until the time of Tipu Sultān, who withdrew the allowance. He also removed the Taluk cutcherry from Mandya to Keragod, but Pūrnaiya retransferred it to Mandya.

Near the south outlet of the Mandya tank is a Viraragudi or hero shrine containing a sculptured slab measuring 6 by 1. This *viragal* possesses some features not usually found in specimens of this class. It contains 5 panels of which the lowest shows warriors fighting on foot and the next higher has men engaged in fight. The third panel has a *vimana* or celestial car in the centre flanked by female *chauri* bearers and elephants with riders the latter apparently stretching out their hands in surprise. There are besides two more standing figures at either end. The fourth panel represents a music party consisting of drummers etc. with a seated Garuda in the centre while the top panel has a figure of Venugopala above the Garuda of the next panel with standing figures to the right and a *linga* with a hull etc. to the left. The top panel probably represents both Vaikuntha and Kailasa to which the fallen heroes according as they are Vaishnavas or Saivas are supposed to go. Chikka Mandya also contains several *viragals* in 4 panels the lower two representing battle scenes the third showing a *vimana* flanked by female *chauri* bearers and elephants with or without riders and the fourth a *linga* etc. It is not clear why the elephants are shown at the ends of the third panel.

Manipura —An ancient city of which the ruins are pointed out three miles south east of Chamarajnagar. The legend regarding it has been given in the section on the history of the District. Manipura

Marahalli —About a mile from Malvalb. The Narasimha temple at this place appears to be a structure of the close of the 10th century. In an old Kannada inscription dated A.D. 1014 the temple is called Rajasraya vinnagaram. As *Rajasraya* was a title of the Chola king Rajaraja (985-1012) we may perhaps conclude that the temple was founded by him or during his reign. Marahalli

Mēlkōte

Melkote or Melukote A celebrated sacred town in the Seringapatam Taluk, situated in 12° 40' N Lat, 76° 43' E long, 20 miles north of the kasba, built on the rocky hills named Yadugiri, overlooking the Mōta Talāb and the Cauvery valley It is a municipality

Population in 1921	Males	Females	Total
Hindus	3,061	3,148	6,209
Muhammadans	75	14	89
Jains	4		4
Total	3,140	3,162	6,302

Mēlkōte, high or superior fort, is one of the principal sacred places in Mysore When the Vaishnava reformer Rāmānujāchārya fled from the persecution of the Chōla king, early in the 12th century, he took up his residence at Mēlkōte and lived there for 14 years It thus became the chief seat of the Sri-Vaishnava sect of Brāhmans, who reaped the benefit of the conversion by their apostle of the Hoysala king Bitti-Dēva, thence forward called Vishnuvardhana, in obtaining assignment of all the most fertile tracts of land in the neighbourhood, especially of the *Ashta Grāma* (see above p 235) on either bank of the Cauvery

The place suffered at the hands of the Muhammadans who wиеcked Dōrasamudra in the 14th century, as it was to Tondanur, now Tonnur, at the southern foot of the hill, that the Hoysala king at first retired It was subsequently restored, in about 1460, by Timmanna Dannāyaka, lord of Nagamangala, who was the minister of the Vijayanagar king Mallikārjuna or Immadī Praudha Dēva Rāya The buildings must have been on a grand scale, as the remains of the Gōpāl Rāya gate on the south are of immense proportions The former approaches are flagged with stones for a considerable distance There is now a good road

In 1771, the Mahrāttas having encamped to the south of the hill after their victory over Haidar Ali at Chinkuuli, the Brāhmans deserted Mēlkōte, which was as usual plundered For the sake of iron, the immense wooden cars belonging

to the temples were set on fire and the flames spreading to the religious buildings, some of them were entirely consumed. The principal temple is a square building of great dimensions but very plain dedicated to Krishna under the name of Cheluvapulle Raya. As to the name Cheluvapulle Raya Buchanan, (in his *Journal* 1 312) writes as follows —

Although the image represents Krishna it is commonly called *Chilla Pulla Raya* (Chelvapille Raya) or the darling prince for *Chillapulla* (Chelvapille) is a term of endearment which mothers give to their infants somewhat like our word darling. The reason of such an uncommon appellation being given to a mighty warrior is said to be as follows — On Ramanuja going to Melukote to perform his devotions at that celebrated shrine he was informed that the place had been attacked by the Turc king of Delli who had carried away the idol. The Brahman immediately set out for that capital and on his arrival he found that the king had made a present of the image to his daughter for it is said to be very handsome and she asked for it as a plaything. All day the princess played with the image at night the god assumed his own beautiful form and enjoyed her bed for Krishna is addicted to such kinds of adventures. This had continued for some time when Ramanuja arrived, and called on the image repeating at the same time some powerful mantras on which the idol immediately placed itself on the Brahman's knee. Having clasped it in his arms he called it his *Chillapulla* and they were both instantaneously conveyed to Melukote. The princess quite disconsolate for the loss of her image mounted a horse and followed as fast as she was able. She was no sooner near the idol than she disappeared and is supposed to have been taken into its immediate substance which in this country is a common way of the gods disposing of their favourites. A monument was built for the princess but as she was a Turc it would have been improper to place this building within the walls of the holy place it has therefore been erected at the foot of the hill under the most abrupt part of the rock.

The original name of the presiding deity appears to have been Rama priya.

A more striking edifice is the temple of Narasimha placed on the very summit of the rock. The large temple is richly

endowed, having been under the special patronage of the Mysore Rājas, and has a most valuable collection of jewels. (See below) As early as 1614, we find Rāja Wodeyar, who first acquired Seringapatam and adopted the Vaishnava faith, making over to the temple and Brāhmins at Mēlkōte the estate granted him by the Vijayanagar king Venkatapati Rāya (See below) There is also an inscription of 1785, showing that even Tipu Sultān granted some elephants for the temple The *Varamudi* festival, which is the chief annual celebration, is attended by 10,000 people The *Guru* of the Srī-Vaishnava Brāhmins, styled the Parakālasvāmī, lives at Mēlkōte and Mysore The site of a ruined palace of the Mysore Rājas, adjoining the great temple, has now been laid out as a public garden

The inhabitants are nearly all Brāhmins, 400 of whom are attached to the great temple and receive thence a daily allowance, some of them being men of learning There is also a class of temple servants of Sūdra extraction, consisting of musicians, dancing-girls and Vaishnava or Sātānanas The only persons in the place who live by industry are a few families of weavers and some shopkeepers Two classes of Holeyas, called the Tirukula and Jāmbavakula, are credited with having assisted Rāmānuja in recovering the image of Krishna when it was carried off to Delhi, as related above Hence they have the privilege of entering the temple once a year to pay their devotions The houses are roofed with tiles, and have an old look from being carved with thorns This is to keep off the monkeys, which are very numerous, and which, bearing a sacred character, it would be a grievous sin to destroy

A strata of schistose mica which has decayed into a fine white clay is considered sacred It is said to have been discovered by Emberumānār or Rāmānuja and is used by the Srī-Vaishnava Brāhmins for making the *nāma* or sectarian marks on their foreheads It is in such demand for this purpose, on account of its purity, that it is transported to distant places, even as far as Benares It is fabled to have been brought to Mēlkōte by Garutmān, the bird of Vishnu, from Svētī-dvīpī (the white island) in the Kshīrasamudra (the milk ocean)

On one of the pillars of the *nataranga* of the Nārāyaṇasvāmī temple here is a bas-relief, about 1½ feet high, of the Mysore

king Raja Wodeyar (1578 1617) standing with folded hands, with the name inscribed on the base. He is said to have been a great devotee of the god and a constant visitor to the temple. A golden crown set with jewels was presented by him to the god. It is known as Raja mudi after his name and is used even now for the god during one of the annual festivals. Tradition says that on the day of his death he was observed entering the *sanctum* and was seen no more afterwards. From the inscriptions on some of the gold jewels and gold and silver vessels in the temple we learn that they were presents from Tipu Krishna Raja Wodeyar III and his queens. With regard to a golden jewel presented in 1812 by Lingajammanni of Krishna vilasa Sannidhana queen of Krishna Raja Wodeyar III to the god Narasimha on the hill at Melkote this story is related. During a visit to Melkote along with his pregnant queen Lingajammanni Krishna Raja Wodeyar III left her at the foot of the hill and went up to pay homage to the god Narasimha. While eagerly looking at the royal party going up the hill the queen by a false step fell from a height of 60 feet but miraculously escaped injury. She then presented the above jewel as a thank offering.

The Private Library of His Holiness the Yathirajaswamikal of Melkote contains a large number of Sanskrit and Tamil works bearing on the Visishtadvaita school of philosophy a few works bearing on logic rhetoric mathematics astronomy astrology ritual architecture Pancharatra Dharmasastra and Grihya and Dharma sutras and commentaries on a good number of Sanskrit works. There are also a few Kannada and Telugu works. Several of the works contained in the manuscripts are authoritatively reported to be unpublished.

Cloths of good quality are made here and ornamental *punkahs* or fans of the fragrant roots of the *kushus* grass. There are many different kinds of rock on the hill.

Mōti Talāb

Moti Talab. or lake of pearls A large tank at Tonnur in Seringapatam Taluk It is formed by an embankment carried across a gap between two rocky hills, which stems the water of the Yādavanadi and other mountain torrents that there unite their streams The mound, whose dimensions are given as 78 cubits high, 150 long, and 250 thick at the base, is said have been constructed by Rāmānujāchārya, the Sri-Vaishnava Brāhman reformer, who had taken up his abode at the neighbouring town of Mēlkōte He is said to have named the tank Tirumalasāgara The superfluous water is let off through a channel which has been cut with great labour through one of the hills, at such a height as to enable it to water a great portion of the subjacent plain, which is three or four miles in extent When the tank is full it contains a sufficient quantity of water to supply the cultivators for two years, but owing to failure of rain, the water frequently continues lower than the opening of the outlet Although the torrents bring down much sand, it so happens that the tank is never affected by that circumstance, for the two streams enter in such directions as to force all the sand towards the extreme corners, without diminishing the main depth Nasir Jung, son of the Subadar of the Deccan, who visited it in 1746, gave it the name of Mōti Talāb or lake of pearls, an appellation to which its clear and beautiful water perhaps entitles it The bank was breached and the water drained off by Tipu Sultān in 1798, to prevent its being used by an enemy besieging Seringapatam

Moyar

Moyar A river which forms the southern boundary of the Mysore State It rises in the Mūkartī hill in the Nilgiris and flows north-east, having there the name of Paikarē On reaching the edge of the plateau, it turns west and falls in a succession of cascades, known as the Paikara Falls (the upper 180 feet, and the lower 200 feet), to the tableland below It then, for the rest of its course, flows east, running at the bottom of the singular gorge called the Mysore ditch from its presenting the aspect of a long deep moat as seen from

the crest of the Ghats. Finally after separating the Nilgiris from the Eastern Ghats at the Gajalhatti pass it joins the Bhavani in the Coimbatore District at Devanayakankote below the Rangaswami peak.

Muduk dore — A sacred hill near Talkad on the banks of the Cauvery where the river takes a sudden turn to the south. On the hill is a temple dedicated to Mallikarjuna whose *jatre* held for fifteen days in January or February is attended by about 10 000 people. Muduk dore

The hill is not very high but the temple on it with its *gopura* presents a pretty appearance when viewed from below. The *linga* here known as Mallikarjuna is one of the *pancha lingas* of Talkad (para 26). In the *prahara* is a *mantapa* said to have been built some 70 years ago which is known as *Chitra mantapa* on account of the paintings on its walls which represent scenes from the *Santa puranas*. There are also Kannada passages explaining the scenes as well as labels giving the names of individual figures. A *jatre* on a grand scale is held here every year in the month of *Mugha* at which many thousands of pilgrims from various parts of the country collect together. It lasts for 15 days during which period an *agamika* from Mysore discharges the duties of the officiating priest though at other times a *tammada* of the Lingayat sect worships the *linga*. The image representing the consort of Tandavishvara is brought from the Vaidyashvara temple at Talkad and kept here during the *jatre*. On the last day a bull race takes place the winner receiving a garland from the *archal* in the presence of the god. He has also the privilege of being taken to Sriparvata in the Kurnool District. Excellent bulls are brought from various places to compete in the race. The village contains a large number of *mantapas* built by charitable people for the accommodation of pilgrims during the *jatre*.

Mugur — It is a Municipal town in T Narsipur Taluk situated 6 miles south by east of Narsipur head quarters of the hobli. Population 3 540. Mugur

It has a temple of Tibha Dēvi which is the scene of an annual festival in December or January resorted to by about 2 000 people.

The Dēsēsvara temple at this place is a large building with a fine *gōpura* and a lofty lamp pillar in front. Opposite to the south *navaranga* entrance stands in a niche on the wall a figure with folded hands, which is said to represent the builder of the temple. The *Pancha-linga* shrines in the *prākāra* have well-carved door-ways and lintels. There is a well executed sugar-cane mill in stone which was formerly used to get sugar-cane juice for the *abhishēka* or anointment of the god. A similar one, but rough in make, was also seen at the Vaidyēsvara temple at Talkad. A number of modern inscriptions on brass-plated door-ways, vehicles and bells are to be seen in the Tibbadēvi or Tripurasundari temple mentioned above. *T-Nasipur* 88 has been made out to be an old Jama epitaph. The top parapet round the temple contains mortar figures of various forms of Pārvatī, Lakshmi and Sarasvatī, as also figures of the *ashta-dīkṣpālakas* or regents of the directions, the 10 *avatāras* of Vishnu, the *Saptamātrikah*, etc., with labels below giving their names. Several of the labels have, however, become illegible, the number of the legible ones being 57. In front of the temple is a beautiful *mantapa* built in the Saracenic style in brick and mortar. It has 4 pillars joined together at each corner surmounted by ornamental arches and parapets and stands on a high base. The house of Dēvarāja Urs to the left of the temple is a quaint old structure.

Mutsandra

Mutsandra A village in Nagamangala Taluk. Population 111.

At this place also is a Nāchchāramma temple in which a *brindāvana* is worshipped. At this temple gather together every year hundreds of *dāsarīs* or Vaishnava mendicants of the Sūdra caste on their way to Tirupati. The villagers feed them and hand over their *mudupus* (or bundles the contents of which, mostly money, are dedicated to some god) for being delivered at the Tirupati temple.

Principal
places with
population

The Taluk was extended by the addition of the Navasbiabar and Varakod hoblis from Mysore Ashtagram Taluk in 1871. It lies between the Cauvery on the north and east and the Kabbani on the south though these rivers are beyond the boundaries and actually touch the Taluk for a very short distance. The drainage is principally from north to south to the Kabbani. The nature of the country is undulating. There are few hills the only one of importance being the Chamunda hill overlooking the city of Mysore from the south east and rising to about 1 000 feet above it. In the south west there is a little scrub jungle and wild date trees abound in all *nalas* and low lying places.

The low level channel taken from the Krishnarājasāgara irrigates a few villages in the north. There are 92 tanks of which 11 are of the first class.

The revenue settlement was introduced in 1887. The area of the Taluk was thus distributed

Culturable (Dry, 84,090, wet, 2,134, and garden 3,388)	89,612
Unculturable	60,373
Inam Villages (28,180)	
Amrut Mahāl Kāval 3,706	28,180
Total acres	1,78,165

The unoccupied area was 11,079 acres. The total revenue demand for 1922-23 was Rs 1,25,965 and for 1923-24 Rs 1,25,282.

The Mysore State Railway passes through the Taluk from north to south with stations at Mysore, Chamarajnagar and Kadakola, and from north to north-west with stations at Belgola and Sagarakatte.

The Bangalore-Ootacamund road passes through Mysore, whence there are also roads to Bannur north-east, to Malvalli east, to Tirumakudlu-Narsipur south-east, to the Wynad south-west, and *via* Yelwal on the north-west to Coorg and to Hassan.

Mysore

Mysore. The Capital of the State and residence of the Mahārāja situated in 12° 18' N Lat, and 76° 42' E. Long, at the north-western base of the Chāmundi hill, is 2,525 feet above the level of the sea. The city is built in a valley formed by two ridges running north and south. It is about 9.50 square miles in area.

It contains four suburbs, *viz*, 1 Kannegowdana Koppal, 2 Vontī Koppal, 3 Paduvarahalli village in the West and Kurubarahalli in the east, and covers an area of 9½ square miles. The population numbers 83,951 of whom 43,783 are males and 40,168 females.

The number of inhabited houses is 15 093 of which 627 are terraced 13 936 tiled and 530 thatched The population is composed of the following classes —

Population in 19 1	Males	Females	Total
Hindus	34 8	31 9	66 6 3
Muhammadians	7 308	6 344	13 6 2
Christians	1 31	1 486	2 798
Others	43	313	748
Total	43 783	40 068	83 8 1

The population of the city was 68 111 in 1901 and 71 306 in 1911 It increased by 12 615 during the decade 1911 21 and by 15 841 during the twenty years ending with 1921

The principal portions of the city may be briefly referred to here

The Fort in which the Palace stands is situated almost in the centre of the city and is surrounded by the finely laid out park, called Curzon Park (after His Excellency Lord Curzon Viceroy of India) on the north and west East of the Fort is the Doddakere tank which is used by the inhabitants of the city for washing purposes Further east near the Race Course is the Karanji tank which formerly used to supply drinking water to the inhabitants On the west of the Fort far away is situated the Kukkarahalli reservoir which for a time was a source of water supply to the city before the installation of the pumping plant at Belgola The thickly populated portions of the city are situated mostly to the north west and south of the Fort the eastern portions being mostly occupied by the Summer Palace Vasanthamahal Palace the Palace Stables the Chamundi Vihar the second Maharaja Kumari's Mansion the Doddakere and Karanji tanks and the Race Course and Gardens Chamarajpuram Lakshmiapuram the Edgah the Jalapuri the Chetnahalli the Chamundi extensions the Weavers Lines the new Holageri etc are recent additions

The Doddapet Santhepet Devaraj Market the Lansdowne Bazaar and Chikka Angadi Street are the centres of trade They are well stocked with country provisions and piece goods

Streets and Avenues

The streets in the city have been laid out on broad and generous lines with regular foot-paths on either side for the convenience of pedestrians. Special check drains have been cut across these foot-paths to divert the storm water from flowing along the main roads away from the storm water drains. Some of these roads, such as the *Srī Narasimharāja Boulevard* and *Mirza Road*, form a notable feature of new Mysore. The great extensions of the city, *Chāmundi Extension* in the south, *Edgah Extension* in the North and *Jalpurī Extension* in the north-east, especially in the south-east towards the *Lalitādri* and north-west towards the *Vānivilās Mohalla* where the Mysore State Railway Officers' quarters are constructed during recent years, and the immense improvements introduced on all sides, including the installation of the Electric lights in the year 1907, have so completely transformed the place that persons who knew Mysore as it was twenty years ago would hardly recognize the present handsome and growing city, with its magnificent wide roads and imposing buildings.

The Curzon Park

Of great interest are the public gardens, the *Curzon Park*, the *Gordon Park*, *Nishad Bāgh*, the *Madhuvana gardens*, the *Zoo Gardens*, and the *Srī Narasimharāja Boulevard*. Of *Government Gardens* proper, there are quite a number in the Mysore City. The *New Palace Garden* is one of the sights of Mysore. Of these the *Curzon Park* was opened in 1900 in commemoration of the visit of His Excellency *Lord Curzon*, then Viceroy and Governor-General of India.

The Gordon Park

The *Gordon Park* is named after the late *Sir James Gordon*, tutor and guardian to His Highness the late *Maharaja*, *Srī Chamaraja Wodeyar Bahadur* and subsequently British Resident in Mysore. Within it are situated the *Public Offices of Government*, including the *District Office*, the *Jubilee Institute*, the *Maharaja's College* and *Students' Homes* attached thereto, and the *Cosmopolitan Club*. A handsome statue of *Sir James Gordon* is placed near the entrance to the *Public Offices*. Nearly the whole Park is used as a playground for football, cricket, hockey, etc. In the evenings it is interesting to see hundreds of boys congregate here for play. The *College*, the *University Library*, the *University Union Building*, the *University Library* containing 9,882 volumes are all located within the precincts of this Park. Near by is the *University Hostel*, which accommodates about 150 students.

The Civil buildings of note lying about the centre of the City are the Government Collegiate High School Central Railway Offices Chamarajendra Technical Institute the Krishnarajendra Hospital the Jagann Mahon Palace Quarters for the Representative Assembly Members Maharaja's Sanskrit College Bonumiah's Collegiate High School the Palace Dispensary and the appurtenant buildings Maharani's Women's College the Marimollappa's High School the New Palace Offices the Coronary a two-storeyed range of buildings extending along the west of the fort called the Lansdowne Bazaar in the front of which a beautiful fountain plays the new Municipal Office the Town Hall and the Devaraj Market with the Dufferin Fountain in front of it

Civil Buildings

The fort is quadrangular in form The gates are situated on the north south and west and in the east a new entrance is under construction The ditch round the fort is now completely filled up and converted into a beautiful garden The interior of the fort was twenty years ago crowded with houses The interior has now been entirely cleared out and beautiful gardens and roads have been laid out round the new Palace

Conspicuous on the high ground to the west in Gordon Park are the Public Offices surmounted by a dome Close by are the Victoria Jubilee Institute and the pile of the Mysore University Buildings the Maharaja's College and other buildings

Public Office

In the older parts of the City the changes have been equally striking The most important perhaps has been the filling in of the portentous great drain known as Purnaiya's Nullah (See under Improvement of the City) Its place has been taken by a five wide road called Sayaji Rao road after the Gaikwar of Baroda Other distinguished visitors have been similarly commemorated One fine road is thus named the Albert Victor road the new Devaraj Market has in front of it the Dufferin Fountain and the Sayaji Rao road is flanked by the Lansdowne Bazaar a picturesque two storeyed range extending along the west of the Fort

The following is a description of the Palace as it was before the disastrous fire of February 1897 which destroyed much of what was its western part —

The palace of the Maharaja which is situated inside the fort facing nearly due east is built in the Hindu style and with

The Palace
The old
Palace described

the exception of a few paintings executed by European painters at various times in the palace employ, contains little trace of the influence of European art. The front, which is gaily painted and supported by four elaborately carved wooden pillars, comprises the Sejjē or Dasara hall, an open gallery where the Maharaja is in the habit of showing himself to the people on great occasions, seated on his throne. This throne is one of the articles of interest in the palace. The original structure, which was of fig-wood overlaid with ivory, is generally stated to have been sent by Aurangzib to Chikka-Dēva-Rāja in 1699, but some doubt has been thrown on this assertion by Colonel Wilks. The palace legend runs that it was discovered buried at Penu-gonda, by the founders of the Vijayanagar empire, Hakka or Harihara and Bukka, to whom its locality was revealed by an ascetic named Vidyāranya, and that it was handed down from dynasty to dynasty until it came into the possession of Rāja Wodeyar. According to the same legend, it had once been the throne of the Pāndus, who reigned at Hastināpura, and Kampula Rāja is said to have brought it thence and buried it at Penu-gonda. It is certain, however, that the ivory throne was used by Chikka-Dēva-Rāja and his successors up to the accession of Tīpu Sultān, that it was discovered in a lumber room of the Muhammadan palace after the downfall of Seringapatam, and employed at the coronation of the restored Rāja. Since then, it has entirely lost its original character, the ivory which covered the fig-wood of which the throne is made having been in its turn overlaid with gold and silver plating, which is carved into figures relating to Hindu mythology, the *simha*, or popular Hindu representation of a lion, whence the Sanskrit term for throne derives its name, being predominant, while the *hamsa*, a mythic bird, regarding which the legend runs that the head on which its shadow falls will once be encircled by a crown, surmounts the structure. As the crown in Travancore, so the throne is the peculiar emblem of royalty in Mysore, and on this account the Mysore Rāja is distinguished by the appellation of *Simhāsanaādhipati* or ruler enthroned. Another seat known as *Bhadrāsana* or the auspicious seat is used for minor ceremonies.

To revert to the palace, its principal gate opens on a passage under the Sejjē, leading to an open yard. At the further or west side of this courtyard is the door leading to the women's apartments, which occupy most of the western portion of the palace.

The northern side comprises various offices such as the armoury, library, etc. and on the south are the rooms occupied by the Maharaja. Of these the most interesting is the Amha Vilasa an upstairs room sixty five feet square and ten feet high with a raised ceiling in the centre. It was here that the former Raja received his European guests and transacted the ordinary business of the day. A wooden railing separated that portion of the room in which the Raja's seat was placed from the rest and the adjacent wall was hung with pictures principally of officers connected at different periods with Mysore which His Highness was accustomed to uncover and point out to his European visitors. The floor was of *chunam* and with the exception of the doors which were overlaid with richly carved ivory or silver there was no attempt at magnificence or display. This hall has been recently entirely renewed in more modern style and the ceiling raised on handsome iron pillars. The sleeping and eating apartments of the Raja which are for the most part small and confused all opened upon the Amha Vilasa and just outside it was the stall in which was kept the cow worshipped by His Highness. The chapel is adjacent. Although the palace had been almost entirely built since the year 1800 it was in very bad repair and many of the tenements attached to it were crumbling to ruin. The only remaining portion of the palace of the old Hindu dynasty which Tipu Sultan had demolished is a room in the interior with mud walls of great thickness and stability. This is known as the Painted Hall owing to the decoration of its ceiling and is said to have been the state room of the old palace which was a much less pretentious building. As with most oriental courts there was no attempt at isolation and except in front where there is an open space the palace was pressed close on all sides by the dwellings of the poorest inhabitants.

After the destruction by fire of the eastern and northern wings of the Old Palace in 1897 it was proposed to raise a new structure on the site where the old one existed. Suitable designs admitting as far as possible of the utilisation of local materials were settled. The adoption of fire proof methods of construction was made an essential feature of the new design which was entrusted to Mr Henry Irwin late Consulting Architect with the Government of Madras.

The New
Palace

The work was started in 1897 and completed in 1911-12 at an aggregate outlay of Rs. 41,47,913

This grand and imposing structure measures 245 feet by 156 feet and is 145 feet high from the ground level to the topmost point of the finial of the main dome. In the centre of its front or eastern face is a carriage porch measuring 66 feet by 21 feet. From this porch there is a passage 15 feet wide, flanked on both sides by the *Sajje* or the Piazza and leading at its western end through the corridors to the marriage pavilion on the south and to the residential apartments on the north. The passage opens into an inner court-yard or quadrangle. At each end of the *Sajje*, there is a staircase leading to the first and second floors. The open court-yard, the corridors running all round its sides, and the marriage pavilion take up most of the ground-floor. The southern block consists of *Ambavilās* (ground first floors). On the ground floor of the north block are the Armoury, the Library, the Annexe with the electrical lift room and the servants' staircase. The Drawing and the Music rooms are on the first floor, while the second floor is occupied by bed rooms. On the first floor in the front, immediately over the *Sajje*, is the Durbar Hall which measures 135 square feet, while study rooms are formed on the second floor. The third, fourth and fifth floors formed only on the centre block do not contain any principal apartments, but form the supports for the main cupola.

The general appearance and the outline are Indo-Saracenic but the details of decoration of panels, friezes, niches, etc., are distinctly Hoysala in character. The central dome is the dominating feature while the rest are all subordinate to it. The mode in which the principal face is broken up and varied by cupolas, minarets, balconies, verandas and porches, so as to secure light and shade, is marvellous in effect. The porch in front with high pillars and the richly carved stone cantilever verandas are a feature in themselves. From the basement to the base of the main dome, the surface is adorned with rich sculptures of the very best class of Indian Art. Horizontal mouldings, vertical off-sets breaking up the surface into many projections, recesses, niches and panels relieved with superabundance of deep, sharp and fine carvings of scrolls, foliage, birds, animals and statuettes of very chaste and elegant design.

are the chief characteristics of this Hoysale style of decoration. It is the combination of this fine sculptured style with the lofty grandeur and magnificent proportions of Serenian art that gives to the structure a very pleasing appearance and produces striking effects of light and shade.

The interior decorations are no less noteworthy. The carvings in stone, wood and ivory, stone inlaying, stucco work and paintings are rich in patterns and varied in design. The stone carver has shown his patient labour in elaborating the details of his fancy, the wood carver the facility with which he could turn his chisel to work out beautiful carvings in wood, and the decorator and painter as to how far his brush can excel other decorations. The combined efforts of all classes of artists have made the building what it is.

Many varieties of granite, porphyry, gneiss and trap have been used in the various parts of the structure. The porphyries have variegated spots of appropriate tints which lead to a cool and charming effect to their polished surface. The trap and the pot stone have been largely used in the sculptures and the enrichment of pannels, recesses, etc. The former is of greenish blue colour and the latter light grey. The colour combination as a whole with the highly artistic and very elaborately wrought work adds to the marvellous grandeur of the edifice.

Nor are the utilities neglected in the new construction. A complete scheme for the supply of filtered and unfiltered water, warm and cold, to the principal apartments has been installed. A system of high class electric illumination has been provided and connected with the Convery power. An up to date steam plant to generate the necessary power has also been installed to serve as a stand by plant. A very satisfactory scheme for fire protection of the Palace has been devised and executed. Drainage and sewerage arrangements on the most up to date sanitary standards have been completed.

Schemes for the improvement of the north and south gates of the Fort in which the Palace is situated have been sanctioned and are in progress. A comprehensive design for the final lay out of the surroundings of the Palace and the whole of the interior of the Fort has been prepared. When this lay out is completed the new Palace will be a building of great beauty and splendour.

The Palace
Library

The Palace Library is valuable for its splendid collection of old manuscripts, etc. At one time it possessed many rare manuscripts which were consigned to flames for boiling "Kulti," horse-grass, under the order of Tipu. It is known as the Sarasvatī-bhandāram Library. Its contents include several unpublished Kannada poems, treatises bearing on religion and philosophy, hymns and commentaries on Sanskrit and Kannada works.

Palace
Armoury

The *Āyudha-sāla* or Armoury of the Mysore Palace contains a fine collection of old weapons of all kinds, numbering about 1,300.

The weapons to be seen here bear serial numbers and labels giving their names inscribed on them in Kannada characters during the rule of Krishna-Rāja-Wodeyar III whose name also appears on every one of them. Several of them are of interest both from an historical and an artistic point of view. An elastic sword bearing the number 186 and named *nimcha* which can be worn as a belt, is said to have belonged to the Mysore king Kanthīrava-Narasa-Rāja-Wodeyar (1638-1659). This is one of the oldest weapons in the armoury. A knife bearing the inscription *chura De 2* is said to have belonged to another king of Mysore, Chikka-Dēva-Rāja-Wodeyar, who ruled from 1672 to 1704. A sword named *nimcha* and bearing the number 36 and another heavy one named *sanva* are said to have been used by Hyder and Tipu respectively. From the inscription on a knife labelled *pesh-kabza* we may infer that the weapon was used by Krishna-Rāja-Wodeyar III. Another knife named *hanga-katti* (delivery knife) bears the inscription *khūsa*, the king's own, being perhaps the one used in the palace during that king's time. It may be stated here that "delivery knives" are not intended for any surgical operations, they are merely worshipped in the lying-in chamber for bringing about safe and speedy delivery. Among the names that occur on the weapons may be mentioned *mudgara*, *surayi*, *buraya*, *jambha*, *balu*, *pancha kathari*, *sol-bar*, *birudangi chura*, *churi*, *tabbar*, *bagu-nakha*, *gaddara*, *Handar*, *abhasi*, *sarpa*, *madu*, *sosaa*, *aleman*, *parang*, *singoti* and *blaze*. Many of the weapons bear Persian inscriptions. There are several "State gun models" in the armoury. Three of the

bear inscriptions stating that Krishna Raja Wodeyar III was placed on the *masnad* of Mysore on the 30th June 1799. The inscription on another names the above king along with Hander Tipu Purnaiya Nanda Raja Deva Raja Ially and Mir Muhammad Sadak. Another has an inscription telling us that the gun on which it is engraved represents the Moolke Maidan of Bejapore captured by Arthur Wellesley in 1803. There are likewise kept in the armoury two *chauris* one of which bears an inscription stating that they were sent as presents to Krishna Raja Wodeyar III by Lord Dalhousie. Another object worthy of notice is a tiny four pillared mantapa of black stone surmounted by a turret with a seated figure of Ganesha in the

In front of the northern gate of the fort a Marble Canopy on a grand scale is being constructed to contain the statue of the late Maharaja

late
Maharaja's
Statue

Another of the Royal Buildings is the Summer Palace situated some distance east of the fort. Adjoining it are the Royal Stables and the Zoological Gardens. A little distance from the Stables is the Palace Motor Garage. A new glass Band Stand is constructed in the Nishad Bugh.

Summer
Palace etc

The former Residency is now known as the Government House and is reserved for European guests. The front portion of the building which possesses a large and handsome portico was erected in 1805 under Major Wilks and is of the Doric order of architecture. The back was added a few years later by Sir John Malcolm and comprises one of the largest rooms without pillars in Southern India. It was designed by De Havilland. It was while living at this Residency that Sir John Malcolm began to write his well known *History of Persia*. Writing to Lord Wellesley in January 1806 he said —

European
Court House

I have resumed the charge of this Residency and have removed to the City of Mysore where I am happy to say the Dewan and all the Public Officers of the *Circar* are now permanently established. It is my intention to take advantage of the

leisure which I shall enjoy at the Residency, to digest the materials that I have collected respecting the Persian Empire into some kind of form, and I feel confident that I shall be able to add considerably to the information already before Government respecting that important quarter, which must soon become an object of the most serious attention to Great Britain ” (Sir John Kaye’s *Life and Correspondence of Sir John Malcolm*, P 301)

There is a Commemorative Stone tablet here bearing the following inscription “This house was occupied by Sir John Malcolm when Resident in Mysore, 1803-1807 ” The Egyptian Princes were entertained here in 1914

The Lalitādri Palace

Towards the south-east of the City lies the beautiful Lalitādri Hills amidst lovely scenery, and fine circles of paths, some of which lead to the Royal Mansion situated at the highest point on the top of the Chāmundi Hills, commanding a magnificent panorama of the view of the City, lying at its foot The road leading to the Lalitādri has been made especially beautiful and excellently maintained Near by is being constructed the new Guests’ Palace, which when completed would be one of the notable sights of Mysore The new extension which is being laid out near this Palace excels all other extensions, in its artistic conception and magnificent execution.

The Zoological Gardens

The Zoological gardens owe their origin to His Highness the late Sir Srī Chāmarāja Wodeyar Bahadur, but they have been greatly enlarged and improved by His Highness Sir Srī Krishnarāja Wodeyar Bahadur, whose property they are The gardens adjoin the Pleasure Palace and are one of the finest sights in Mysore, being greatly appreciated both by the people of the City and visitors They were opened in 1892 and have since been greatly improved, so that to-day they are second to none in India There are a fine collection of animals including lions, tigers, giraffes, lamas, hyaenas, alpacas, fallow deer, buck, panther and a large tribe of monkeys. There are also a band stand and artificial lake.

The Jagannathan Palace is one of the most attractive places in the City. In the front of the building a spacious ornamental pavilion was added at the time of the marriage of His Highness the Maharaja. The marriage of His Highness the Yuvaraja was also celebrated in this pavilion. The pavilion also served as the Durbar Hall in which His Highness held the annual Birthday and Dasara Durbars till the completion of the new Setje in the new Palace in 1910. Here also took place the installation of His Highness the Maharaja in 1902 when His Excellency Lord Curzon, Viceroy and Governor General of India was present. This palace has a number of paintings giving the genealogy of the Mysore kings and other matters of great interest. The letter press given in these as well as in some of the portraits deserves to be copied out and preserved or printed. Some of the games painted on the walls such as Devsayujya and Srikrant sayujya which are calculated to direct the thoughts of the players heavenward are full of interest. The game of chess is very largely represented. Krishnaraja Wodeyar III was an adept at it and some new features of the game invented by him have been greatly admired.

The Jagannathan
Palace

The Plasura Palace was built in 1842. It was here that the special schools for the education of Their Highnesses the late Maharaja and the present Maharaja were located.

The Plasura
Palace.

Government House is well situated on rising ground to the east with an extensive view over Mysore. It was originally the residence of Dr Campbell the Durbar Surgeon in Sir Mark Cubbon's time. But Sir James Gordon who had occupied it when guardian to the Maharaja converted it into the Residency in 1881.

Government
House

Of the other European houses one opposite the west gate of Government House awakes interest from the fact that it was built and for some time occupied by the great Duke of Wellington then Colonel Arthur Wellesley.

Wellington
House

There is a Memorial tablet at this building giving its historic association. The inscription on it is to the following effect —
 “ This house was occupied by Col Arthur Wellesley, afterwards Duke of Wellington, when in political charge of Mysore, 1799-1801 ”

Rangachārḷu
Memorial
Hall

The Rangachārḷu Memorial Hall is a fine building which stands almost in the centre of the City, built by subscription and a Government grant, in memory of the late Mr C Rangachārḷu, C I E, who was the first Dewan of the Mysore State after the Rendition. The foundation stone of the building was laid by His Highness the late Sn Sri Chāmarājēndra Wodeyar Bahadur on 1st April 1884. The building stands in the Curzon Park. It has a theatre in the centre which is available for public purposes. The Municipal and the City Improvement Trust Board offices were until recently located in this building.

Race Course

The Race Course is situated to the south-east of the Pleasure Palace, near the base of the Chāmundi Hill. There is a grand stand which commands a very good view of the races. The Race Course skirts a fine polo ground in the centre and its position near the Chāmundi Hills lends to the whole place a pleasing picturesqueness. Attached to this, on the west side, stand the Mysore Chāmundi Gyamkhana grounds which are beautifully laid out.

The First
Kumārī's
Mansion

The First Maharaja Kumārī's Mansion is a fine edifice and is called the Jayalakshmi Vilās Mansion.

It is situated on a high ridge at a distance of about two miles to the west of Mysore City, and commands a fine and uninterrupted view of the country all around. Between the grounds of the mansion and the town there is a fine sheet of water in the form of a lake, known as Kukkarahalli Kere. The estate covers an area of over 800 acres. The grounds are undulating, ridges and valleys alternating, which greatly enhance the charm of the view. The mansion itself is made up of three different buildings, but so connected as to give the whole the appearance of a single massive structure. The finest views of the mansion

are obtained at the eastern and western ends which graced with ornamental pediment extend to a length of nearly 400 feet. On the pediment at the northern elevation is placed a beautiful moulding of *kapalak* but the Hindu Goddess of wealth and happiness.

The outer facades of the mansion are embellished with Ionic and Corinthian columns with corresponding entablatures and dome arches connecting the main block with the wings. The interior decorations especially in the dining room are of purely Hindu style. The general plan of the building exhibits an open quadrangle in the centre thus allowing plenty of light and air to reach the inner apartment which is placed behind spacious veranda enclose the quadrangle on all sides. The main building is on a similar plan but the front of the quadrangle is covered over providing a fine reception hall nearly 10 feet high, and the back portion known as the *Bhuvanevari* is similarly covered and surmounted by a dome with a gilt finial on the top. In the *Bhuvanevari* there are some fine carvings to be seen. The doors, windows, pillars and pillars supporting the dome are all richly carved and are fine specimens of the ancient Indian art of carving. The mansion is chiefly built of brick and mortar timber and iron. There are several smaller buildings which serve as out houses to the main part of the mansion. At the north east is the *agraha* or quarters for Brahmins, and the *karohatti* or cow stall. Lying on rising ground at the north are the tables and at the north west the quarters for high caste Hindu servants and others. Fine roads in the grounds connect the several buildings and the grounds include the old *Hinkal Race Course* which with its past associations gives additional interest to the domestic.

The Second Maharaja Kumara's Mansion is situated in the high ground to the east of the Fort in Nazirbad Mohalla. This occupies an area of 38 acres and a sum of Rs 4,27,610 has been incurred on it up to date. The building was commenced in 1902 and is built in the Indo-Saracenic Renaissance style.

The Second
Maharaja
Kumara's
Mansion

The Third Maharaja Kumara's Mansion is known as 'Chaluvamba Vilas'. It is situated on the north west

The Third
Maharaja
Kumara's
Mansion

of the Fort on the site of the old Paduvarahalli village, and near the railway station. This is a fine pile of buildings with an imposing appearance. The grounds cover an extensive area.

The Public
Offices

The Public Offices—is an imposing structure situated in the Gordon Park, and contains the offices of the Deputy Commissioner, Mysore District, and other district offices, and also the Representative Assembly Hall, where the Assembly until 1923 held its annual sittings. At the entrance to the building is the handsome statue of Sir James Gordon. The grounds are well laid out and the scenery around is the loveliest in the city. The offices were built in 1895. They occupy an area of 29,588 square feet, and the surroundings occupy an area of 92½ acres. The cost incurred on the building was Rs 1,75,500. There are altogether two halls, 27 rooms, one treasury room, veranda all round outside and two corridors. There is a cone shaped dome in the centre with a *kalasam*.

The Victoria
Jubilee
Institute

The Victoria Jubilee Institute, more generally known as the Oriental Library, was founded in commemoration of the Jubilee of Her Gracious Majesty the Queen-Empress Victoria. It is situated in the Gordon Park, close to the Public Offices, and is well stocked with ancient and rare Sanskrit and Kannada manuscripts, and provides facilities to scholars for original research. There is also a Library of English and Sanskrit works attached to it. A special establishment is engaged in translating into English and publishing rare and old Sanskrit and Kannada manuscripts.

The Law
Courts

The Law Courts are located in the spacious block of buildings to the south-west of the Victoria Jubilee Institute and accommodate the courts of the Sessions Judge, the Sub-Judge and the Munsiffs.

The construction of these buildings appears to have been completed about the year 1895, and the Law Courts, which were

formerly located in the Public Office buildings were shifted to the Law Court buildings in that year. The Court House it appears is built after the model of the Chicago Exhibition Buildings. It forms the main block and stands on a high level in the western part of the City at a distance of about 300 feet from the high road leading to the Public Offices. Stretching from north to south it faces the eastern square of symmetrical houses known as the Chamaraja Agrahar and has the Chamaraja puram Railway Station in its close vicinity to the south. To the north west of the Buildings at a distance of nearly two furlongs are situated the Industrial Exhibition grounds and to the south west lies a populous hamlet known as Kanno Gowdana Koppal.

The District Court House forms the central portion of the main block and commands from its high terraced top an extensive view of the city. It has a fairly spacious veranda in front running continuously both to the right and the left wing of the premises and contains ten rooms.

The northern wing of the main block is occupied by the Sub Court.

The southern wing contains the Court Houses of the First and the Second Munsiffs, Mysore.

Close to the Central Record Room runs the Mysore Nanjangud Railway line.

What are popularly called the Exhibition Buildings were originally the lines of the Reserve Police. These are situated just below the Kukkarahalli tank. The whole block was adapted for the Exhibition which until recently was annually held here during the Dasara.

The Exhibition Buildings University Offices etc

The origin and development of the Exhibition need only be briefly referred to here. It was suggested in the Mysore Representative Assembly of 1906 that an exhibition of local Industrial and Agricultural products during the Dasara in Mysore City would be a suitable opportunity for showing the extent of local industrial activity to a large concourse of people who usually visit it then. Government took up the proposal and in their order dated 23rd December 1906 directed the Revenue Commissioner to formulate a scheme in consultation with the Deputy Commissioners for holding an exhibition of the kind

at Mysore A scheme was duly worked out The Revenue Commissioner arranged for the holding of the first exhibition of local and foreign articles in Mysore City He conducted the exhibition during 1907 and 1908 acting as its President Its management was then transferred to the Economic Botanist, who with the co-operation of the Heads of Departments and Deputy Commissioners of Districts and the local non-official gentlemen conducted the show successfully during a period of five years In March 1914, the management of the exhibition was transferred to the Industries and Commerce Committee The exhibition ceased to exist as an annual function in 1921

Opposite to these buildings are the new University quarters and above them past the cricket field are the University Offices

Chāmarājēndra
Technical
Institute

The Chāmarājēndra Technical Institute is a fine pile of buildings situated on the Sayāji Rao road, and commands a good view The Engineering, the Industrial and Arts Schools and a Workshop, which form the Technical Institute, are located here

The foundation stone of this building was laid by His Gracious Majesty the King-Emperor, during his visit to Mysore in 1906, when he was the Prince of Wales The building was commenced in 1910 and completed in 1913 The building consists of three floors, *viz*, the ground floor which contains 14 rooms, the first floor which also contains 14 rooms, and the second floor which contains only one room, with mansard roof over it Attached to the main building are the work sheds, *viz* —

- 1 The rattan and weaving sheds with 17 bays
- 2 Carpentry and weaving sheds with 27 bays
- 3 Raw material sheds with 18 bays

Apart from the above, there is one building for stores of the Engineering School and two guard rooms, one near each gate on the north and south of the building

The style of architecture is a modification of early French Renaissance

The cost of the building was Rs 2,41,214

History of
the City

The present town of Mysore can boast of a respectable antiquity The place seems to have been known by its present name from the remotest times For it corresponds

with the Mahabharata of the Pandava prince Sahadeva's expedition mentioned in the *Mahabharata* and is the Mahasabha to which the Maurya king Asoka sent a missionary in the 3rd century B. C. to proclaim the religion of Buddhism. Though this view has been recently disputed the better opinion seems to support it.

The archaeological records unearthed up to date show that the city's antiquity goes back to the 10th century if not earlier. The old records in and around the present city such as the inscriptions at Halavitta (Mysore 6 of about A.D. 750) Varanasi (Mysore 20 of 750 Mysore 36 of A.D. 800) Hale Bagodi (Mysore 13 of A.D. 811) Kukkariballi (Mysore Archaeological Report 1908 Paras 33 to 34 of A.D. 900) Chamundi Hill (Mysore Archaeological Report 1912 para 75 of A.D. 950) and Devalapura (Mysore 25 of A.D. 750) seem to point in this direction. Nor are old inscriptions wanting which make definite references to the Mysore nadu or district. An inscription at Kuppehallu (Kadur 9 of about A.D. 990) mentions among the witnesses to the grant recorded in it the officials of the Mysore nadu seventy. Another at Nandigunda (Nandigunda 131 of A.D. 1021) tells us that Nandigunda was one of the villages included in the Mysore nadu. The spurious Tanjore plate (I. 1 VIII 212 dated A.D. 218) supposed to be fabricated in the 10th century states that Varakodu was situated in the Mysore nadu seventy. The expression Mysore nadu of 10 villages presupposes the fact that Mysore was the chief place of the nadu. There is thus conclusive evidence to show that Mysore existed as a city as far back as the 10th century. During the Chola rule in the 11th century the district was designated Mudigonda Chola mandala. The next reference to Mysore City that has been met with is in an inscription in Cole's Garden which is dated A.D. 1499 and records a grant for the God Lakshmi Ramanaswami of Mysore by a subordinate of Narasa the father of Krishna Raya of Vijayanagar. The period of this inscription is anterior by several years to that of Hire Bettada Chama Raja Wodeyar with whom it is usual to commence the genealogy of the Mysore kings. After this period we come to modern history.

The Yadava princes from Dvaraka in Gujarat who according to inscriptions coming to worship their family god at Yadugiri

or Mēlkōte, became the founders of the Mysore House, are said to have been attracted by the beauty of the country to settle in the town of Mahishūr. But at the beginning of the 16th century its site was occupied by a village named Puragere. At this time the dominions of the Rāja of Vijayanagar, the ancient city on the banks of the Tungabhadra, extended really or nominally over nearly the whole of South India. The tradition regarding the origin of the present Mysore dynasty is given under Hadināru. The first of the line took the title of *Wodeyar* and his successors gradually extended their little dominions until one of them, named Bettada-Chāma-Rāja divided his country between his three sons. Wilks says — “A grant is extant, dated in 1548, from Tim Rāj, probably the same to whom Hemanhally was assigned.” To Chāma-Rāja, surnamed Bōl or the bald, he gave Puragere. Here a fort was either constructed or repaired in the year 1524, to which, from Mahishāsura or the buffalo-headed monster whose overthrow was the most noted exploit of Kālī or Chāmundi, the name of Mahishūr (buffalo town), or in its anglicised form Mysore, was again given. Fort after fort was subdued, and the limits of the country followed the progress of invading armies to the south. But till the beginning of the 17th century the Wodeyars of Mysore recognized the suzerainty of viceroys of Seringapatam, who derived their power from the Rāja of Vijayanagar. But in proportion as the power of the viceroys became more and more ineffective, that of the Mysore Wodeyars grew stronger and stronger. The latter gradually evaded payment of tribute to the former, and in 1610 obtained possession of Seringapatam itself, and with it what remained of the power and influence of the viceroys. Thenceforth Seringapatam became the seat of government of the Wodeyars.

It does not fall within the scope or purpose of this part of the work to follow the gradual expansion of the Mysore State under the Wodeyars, who in 1731 became subservient to the ends of the Dalavāyī or hereditary State minister and general nor to describe the transformation of Mysore to a Mussalman State under the usurper Haidar Ali, who kept the representatives of the Hindu dynasty in the position of State prisoners in their own palace at Seringapatam. Haidar's son Tīpu attempted to obliterate all traces of the Hindu-rāj, and in pursuance of this policy caused the town and fort of Mysore, the ancient residence

of the Rajas to be razed to the ground and deported all the inhabitants to the neighbourhood of Seringapatam. The stones of the old fort he employed in building another fortress on a slight eminence about a mile to the east, in which he gave the appellation still retained by the site of Nazarahad, or the place visited by the eye of the Almighty and the remains of this fort are still to be seen.

The work which according to Major Wilks could not have been of the slightest use in defending the country was still unfinished at the fall of Seringapatam in 1799 and when it had been determined that the inauguration of the Raja then a child of four years should take place at Mysore it was discovered that owing to the almost universal demolition of the place by Tipu, the workmen's huts at Nazarahad formed the only accommodation available for the performance of the ceremony. Into the best of these the young Raja was conducted and placed on the throne while the work of rebuilding the palace of his ancestors was going on. The restoration of the fort was commenced at the same time and for this purpose the stones which Tipu had removed to Nazarahad were brought back again. Owing to the presence of the court the town grew rapidly and in time drew to itself much of the population of Seringapatam which decreased as Mysore increased in importance. The Maharaja at first through the Dowry Purnaiya continued to govern the country till 1831 when the government was vested in a Commission composed chiefly of British officers and subordinate to the Government of India.

The Maharaja still continued to reside in his Palace at Mysore. He died at Mysore on the 27th of March 1868 aged 75 the eldest sovereign at the time in India. It seemed almost hard to believe that the Raja who so short a time ago was on his throne in full possession of his faculties was a man whose early childhood had been subject to the caprice of Tipu Sultan and who remembered the great Duke of Wellington while yet in his prime so completely had he outlived associations. Immediately after his death, his adopted son by name Chama Rajendra Wodeyar a child four years old was proclaimed Maharaja and in 1881 the country was restored to him and again placed under Hindu Government. During his reign of 13 years took place the gradual transformation of Mysore into the handsome city it now is. And after his lamented death at the close of 1894

his eldest son, then 10 years of age, was proclaimed Maharaja, under the regency of his mother, the Maharam

Temples in
the City

The City has a number of temples, the earliest of which probably dates from about the 15th century A.D.

The Varāhasvāmī temple is a fine Hoysala structure, especially the shrine of the goddess, which has a finely carved doorway and well executed pillars. The towers show good work. In the *navarāngas* there are stucco niches at the sides of the entrance. The temple has images with inscriptions on their pedestals, *prabhāvalis*, etc. One of them, around the feet on the pedestal, mentions Chikka-Dēva-Rāja-Wodeyar (1672-1701) as the donor. Chikka-Dēva-Rāja-Wodeyar is said to have procured the stone image of Svēta-Varāhasvāmī from Srīnushnam (in the present South Arcot District) and set up the god in a newly built temple at Seringapatam, but as the temple was demolished by Tipu, the god was removed to Mysore and set up in this temple in 1809. It is stated that Dewan Purnaya had this temple built with the materials of a Hoysala building in the Shimoga District. In the temple are kept two inscribed images representing the *āchāryas* (or sages) Dēsikar and Jiyar. The former, also known as Vēdāntāchārya, was a Srīvaishnava teacher and author, who flourished in the 13th and 14th centuries, while the latter, also known as Varavaramuni and Manavīlāmāmuni, who was likewise a Srīvaishnava teacher and author, flourished in the 14th and 15th centuries. The inscriptions on the figures not only give their names but also state that they were presented by the Mysore king Krishna-Rāja-Wodeyar III to the Prasanna-Krishnasvāmī temple at Mysore which he built in 1829. About the niche on the south outer wall of the shrine of the goddess in this temple is an inscription—*Māya bhadra* in characters of the 12th or the 13th century. It is not clear what the expression means, whether it refers to the niche itself or to the artist who made it. There are also masons' marks and letters in several places in the building.

The god in the Lakshmīramana temple is Nambi-Nārāyaṇa, a form of Vishnu holding the discus and the conch to the front in the lower hands. The cell to the right contains the goddess of the temple. Here is likewise a good figure, about 4 feet high, of Vēnugōpāla, which is said to have been a special object of

worship before the Prasanna Kri bhavani temple was built. To the right in the *prakara* is a standing figure about 2 feet high with folded hands of Raja Wodeyar. An inscription in the temple states that he built the tower over the *mahadvara* or outer gate and that for him the god of the temple changed poison into nectar. The latter statement is in allusion to tradition which says that Raja Wodeyar to whom the *archaka* of the temple served poisoned *tirtha* at the instigation of some of his enemies swallowed it and was not harmed in the least owing to his firm faith in the god. The temple appears to be the oldest in the City as evidenced by an inscription in Cola Garden which records a grant for the god in A.D. 1193 by order of Narasana Nuvaka father of Krishna Deva Raya of Vijayanagar (see below).

The Trincavara temple in the fort is a large Dravidian structure facing west with a *prakara* or enclosure and a lofty *mahadvara* or outer gate. Inside the *mahadvara* are two niches at the sides enshrining figures of Ganapati and Bhairava. In the north west of the *prakara* are numbers of Linga stones set up under a *pipal* tree some of which are well carved with a *linga* or a figure of Krishna at the top. Around the *prakara* are several *lingas* and shrines of Parvati, Channundesvari, Surya, Narayana and Sankaracharya. The last is a good marble figure lately set up. The *nataranga* has two entrances, one on the west and one on the south. To the left of the *sulhanasi* entrance is a figure about 1½ feet high of the *Yago* Trinabindu who is said to have worshipped the god. The god is named Trincavara after him though also known popularly Trinayanavara. Facing the south entrance is a cell which contains the metallic figure of the god. It is flanked by two niches containing figures of Ganapati. On the south outer wall of the *nataranga* are two niches enshrining figures of Virabhadra and Dakshina murti. The latter seated under a tree in the posture of meditation has 4 hands—the right upper holding a rosary, the left upper a Rudravina and the left lower a book, the right lower being in the *chinnudra* or teaching pose. The pedestal is sculptured with the figures of the seven sages. In a niche in the *prakara* facing the south entrance are two figures standing side by side with folded hands which are said to represent the Mysore kings Kanthirava Narasa Raja Wodeyar (1638-1659) and Dedda Deva Raja Wodeyar (1659-1672) who renovated or

enlarged the temple. A magnificent portrait statuette of the former king, enshrined in a cell in the Narasimha temple at Seringapatam, which was erected by him, has been thus described

“The statue, which is about $3\frac{1}{2}$ feet high, stands on a high pedestal with folded hands and is richly ornamented. It wears a long robe with a sword, shield, and dagger on the left side, large ear-rings and a *vīrapendeya* or hero's badge on the right foot. The figure is beautifully carved and has a life-like majestic appearance. The name of the king is engraved on the pedestal.” (M A R 1912)

In the Prasanna-Kṛṣṇasvāmī temple, which was founded by Kṛṣṇa-Rāja-Wodeyar III in 1829, a dozen modern inscriptions are to be seen on brass-plated door-ways, vehicles, silver vessels, etc. Labels are also to be seen on the pedestals of metallic figures of gods, saints and sages, about 39 in all, the king's name being also given. We have likewise here in a shrine statues and metallic figures of the king and his queens with labels, 7 in number on the pedestals. This temple has nearly 40 inscribed metallic images of gods, goddesses, saints and sages. The inscription in each case gives the name of the image and states that it was presented to the temple by the king. In the *prākāra* or enclosure of this temple is a small cell enshrining a figure of the sage Atri, the reason given for its existence being that the sage was the *gōtra-rishi* of the *āgamika* who set up the god in the temple. The sage is also the *gōtra-rishi* of the Mysore Royal Family. Almost all the metallic figures of this temple bear inscriptions on their pedestals stating that they were presents from Kṛṣṇa-Rāja-Wodeyar III who built the temple. In the shrine of Rāmānujāchārya are kept three small stone figures of Paravāsudēva, Anantasayana and Rājamannār (a form of Kṛṣṇa).

The Prasanna-Venkataramanasvāmī temple has three lithic inscriptions in it. One of them, dated 1836, gives a long account of the piety and peregrinations all over India of a Mādhva devotee named Subbarāyadāsa *alias* Gōpāla-dāsa who founded the temple, and who was honoured and patronised by Kṛṣṇa-Rāja-Wodeyar III of Mysore. His portrait statuette, about 3 feet high, represented as surrendering everything, even his body, to God, stands in front of the shrine with an inscription at the sides giving his name and explaining his attitude. He

bears the musical instrument called *tambura* and holds in the left hand a water vessel from the spout of which falls a libation of water indicating that he is giving away everything that he can call his own. There is also an interesting painted wooden panel with figures on it fixed in the wall of a room over the *Anjagyn* shrine in the same temple. The upper portion shows *Vyasa* in the middle seated on the coils and canopied by the five hoods of a serpent flanked on the right by *Madhvacharya* and *Garuda* and on the left by *Bhiksha* and *Isaannan* while the lower portion exhibits four standing figures of which the first represents *Dewan Lurnaya* the second *Krishna Raja Wodeyar III* the third *Suhharaya dasa* and the fourth his elder brother *Sinappa*. The temple has a copper plate inscription and a number of old papers consisting of *sannads* and letters addressed to *Subbaraya dasa* and *rajarajas* or passports granted to him by various governments during his travels in different parts of India. These range in date from 1821 to 1858. The *Chitra mantapa* or painted hall in this temple contains the painted *Vyasa* panel has also paintings on the walls and the ceiling. There are likewise four painted doors two single to the right and left of the *Vyasa* panel and two double on the right and left walls said to have once belonged to the *Mysore Palace* which contain in the upper portion portraits of twelve *Mysore* kings in all with inscriptions giving their names and the period of their reign and in the lower portion figures of elephants. The period of the reign is given not only in years and months but also in multiples and fractions of *pallas* a *pala* denoting a reign of twelve years. The following table gives the names of the kings in the order of succession and details of their reigns —

No	Name	Reign		
		Palla	Years	Months
1	Raja-Odeyar	3½	30	5
2	Ch. marāja	1½	0

Besides the doors mentioned above, there are also paintings on the walls representing places, temples, etc., with labels on the right wall we have Ālvāru-utpatti-sthala (the birth place of Nammālvār, Tirunagari in the Tinnevely District), Nava-Tirupati (nine holy places in the same district), the Virūpāksha temple at Hampe, Mēlkōte, Seringapatam, Ganjam and so forth, and on the left wall the Chakrapāni temple at Kumbakōnam, Chennapattana (Madras), Belur, Nanjangud, Sivaganga, Kānchi, Chāmundēsvari hill and so on. The ceiling depicts places, rivers and mountains in Northern India such as Kāsi, Pandrapur, Srīnagara, Alakananda, etc.

The Visvēsvara temple in the old *agrahāra* is a modern structure caused to be erected by Sir M. Kantaraja Urs, K C I E, C S I, about twenty years ago. It is a small neat building with a *prākāra* or enclosure. Four inscribed slabs ornamented with floral borders, which are built into the base of the temple, attracted my notice. They measure 5 feet by 2 feet. The inscriptions on them have nothing to say about the temple, but give some geographical information. One of them, built into the north base, names the five continents and gives their area and population. A rough stone by its side bears the inscription "Kaliyuga 5000". Another built into the east base to the left of the entrance gives the area of Mysore as 28,000 square miles and the population as 49 lakhs. The first portion of the inscription is concealed by the flight of steps leading into the temple. Another also built into the east base, but to the right of the entrance, names 22 languages, mostly foreign, such as Swedish, Armenian, Burmese and so on. The fourth, built into the south base, consists of two parts. The first part gives the number of Chakravartis as 5, of Mahārājas as 35, and of Rājas as 38, these items being put in brackets, while the second part names 19 Indian

languages such as Kannada Tamil Uriyo and so forth A rough stone at the side gives the number of years that have elapsed since the creation of the world There are besides ten more such slabs around the base seven plain and three with similar ornamental borders but bearing no inscriptions From the inscription Kalyuga 5000 mentioned above the period of these epigraphs can be made out but the purpose for which they were put on stone is not clear Evidently the slabs have been brought from some other place and built into the base Outside the temple is a good pond with a pillared veranda all round with three niches in the three directions enshrining figures of Ganapati Durga and Parvati

The Somesvara temple situated in the north east of the fort consists of three cells standing in a line The middle cell has a *linga* the right cell the goddess Somasundari and the left Narayana In front of the Narayana shrine are set up on a raised embankment figures of the nine planets All the figures except the *linga* which is said to be very old were set up by Her Highness the Maharani Vanivilasa Sanmudhana about thirty years ago The south outer wall has a niche enshrining a good figure of Dakshinamurti To the south of this temple stands a shrine dedicated to Bhairava known as Kudi Bhairava or Bharava at the outlet of the tank This temple is of interest as according to tradition it was here that the brothers Yadu Raya and Krishna Raya the progenitors of the Mysore Royal family who came from Dvaraka stopped for some time before going to Hadinaru to fight the Karugaboli chief The image of Bhairava about 3 feet high has for its attributes a trident a drum, a skull and a sword It is flanked on the right by a female *chauri* bearer and on the left by a female figure apparently Bhadrakali with a bill hook in the upturned right hand The Darga close by is a fine building with stucco decorations situated about half a mile to the north east of the fort It is said to contain the tomb of a Muhammadan lady and to have been erected in about 1830 at the instance of the Mysore Resident J A Casanajor

In Jaggu Lal's choultry situated in Doddapete there are a few interesting sculptures These consist of a standing figure of Hanuman about 5 feet high the pedestal on which the god once stood and a cylindrical pillar about 1 foot high, resembling

Sculptures in
Jaggu Lal's
Choultry

a *linga*, standing on a pedestal, about $1\frac{1}{2}$ feet high. The pillar is sculptured all round with figures in bas-relief, the upper portion showing a five-faced figure (either Subramanya or Siva) and figures of Ganapati, Sūrya, Sarasvatī, and Lakshmi for Pārvatī, and the lower portion seven *rishis* or sages, some with a beard. The top of the pillar has seven holes stopped with round black stones which are said to represent *Sālagrāmas*. From enquiries it is ascertained that these sculptures belonged to an old institution known as Palari *matha* which once stood near the modern Power House and that the *matha* having been pulled down, the images, etc., were removed to Jaggu Lal's choultry to which the institution had belonged. The figures are to be enshrined in a building said to be under construction out of the funds of Jaggu Lal's charity. To the south of the Police Station in Doddapete, Mysore, is a shrine containing a figure of Panchamukhī (five-faced) Hanumān. The god has three-faces in front, one on the crown of the middle-face and one on the back, and ten hands, five in front, and five in the back. The figure is said to have been set up during Dewan Pūrnaiya's time.

Inscriptions
in the
Oriental
Library

The inscriptions in the Oriental Library, located in a building situated in the Gordon Park, are 12 in number, 6 built into the walls inside and 6 outside. Of the inside inscriptions, 3 are on the east wall facing west and 3 on the west wall facing east. Of the former, the first is a Tamil record of Vijayanagar, dated 1411 (Hoskote 149 of the Bangalore District), the second is a Nolamba record, dated about 960 (Chintamani 43 of the Kolar District), and the third a Hoysala record, dated 1063 (Kadur 161 of the Kadur District). Of the latter, the first is a Hoysala inscription bearing the dates 1078 and 1107 (Tiptur 105 of the Tumkur District), the second, a Chālukya record dated 1130 (Tiptur 104), and the third a Chōla record, dated 1035 (Kolar 14 of the Kolar District). Of the outside epigraphs, one is on a pillar, a Chōla record, dated 1029 (Nelamangala 1 of the Bangalore District), and five are built into an embankment in front. Of the latter, one is a record of a Senavara chief, dated about 1060 (Chikmagalur 76 of the Kadur District), another, a Chālukya inscription, dated 1012 (Shikarpur 287 of the Shimoga District), another also a Chālukya record, dated 1043 (Davangere 19 of the Chitaldurg District), another a Hoysala record, dated 1218 (Kadur 129), and the fifth, also a Hoysala inscription,

dated 1184 (Tarikere 15 of the Kadur District) It is a pity that the slab containing an old record of the Ganga king Sri purusha (E C III Tirumukudlu Narasimha) which was kept in the Oriental Library is not now forthcoming Fortunately we have impressions and facsimiles of this epigraph

In its inscription is to be seen on the ornamental stone set kept in this Library The set which measures 7½ by 6 is well carved and ornamented on all the four sides and has a flower in the middle of the upper surface The legs which are separate pieces about 2 feet high are also well executed It is said that the set once belonged to Kempe Gowda of Magadi

The inscription in Cola's Garden of Narasa father of Krishna Deva Raya of Vijayanagar records a grant in 1499 A D for the god Lakshmiramana of Mysore (*Moisurpuradhitasaya Lakshmi Lantoya*) and gives the name *Maisur* just as it is pronounced and written in the present day

Inscriptions
in Cola's
Garden

The Jain temple known as Santisvara basti has also a few inscriptions on the pedestals of images and on vessels etc which are nearly 100 years old Some of the latter were presents from Devirammani queen of the Mysore king Chama Raja Wodeyar IX (1776-1796)

Inscriptions

mundēśvari
Temple

The oldest tomb stone in the European Cemetery bears the date April 1 1857 A monument of curious interest is the one erected by a few of his many friends in memory of Marquis Diego Viviani Di Ferrazhano born at Ehoeh Italy 1st January 1832, and died at Mysore 1st August 1901 The Marquis having left Italy for political reasons became a coffee planter in Coorg, but not succeeding in that pursuit settled at Mysore where he had an appointment under the Palace as Superintendent of Parks and Gardens

The European
Cemetery

In St. Bartholomew's Church there is a tablet, erected by his brother officers and other friends to the memory of Lieutenant-Colonel A H Macintire, Madras Staff Corps, and the Military Secretary to the Maharaja of Mysore, who died in 1897, aged 50

Industries and Trade

A large quantity of paddy comes into the City from the neighbouring rice-producing taluks of Seringapatam, T-Narsipur, Yedatore and Nanjangud, and a brisk trade is carried on in this commodity. The greater part of the paddy is converted into rice locally and then exported. For this purpose, there are a number of power worked rice mills established in the City.

Weaving of cotton, silk and woollen cloths of a good quality is done at hand-loom factories.

The Government Industrial School turns out good work in metal and wood, and trains students in these industries.

Besides the above, there are the usual smithies, comb-makers, rattan workshops, fancy workers, wood workshops, ivory carvers, fan makers, and workers in leather goods. These carry on work on a small scale, and meet local requirements to some extent.

There are also two taxidermists, *viz.*, Messrs Theobald Bros, and Messrs Van Ingen and Van Ingen. These do superior work in mounting *shikar* trophies, etc.

Imports and Exports

The value of the imports and exports is estimated at about Rs 60 lakhs.

Municipal Administra- tion

The present Hale-Agrahār, the Fort, Dodda Petta and the Lashkar Mohalla mainly constituted the limits of the old town of Mysore in the early days of the 19th century. Some very fine additions still extant, in the shape of eastern and western wings, owe their origin to the days of the rule of His Highness the late Maharaja Sri Krishnarāja Wodeyar III.

Municipal activities in Mysore are now more than half a century old. According to the instructions issued by the

Government of India for the constitution of Municipalities in April 1861, a Committee was formed about July 1862 in the city of Mysore with the then Superintendent of the Ashtagram Division as President and five official and three non official gentlemen as members the latter including a Hindu and a Mahomedan

The five Official Members were —

- 1 The Deputy Superintendent
- 2 The Executive Engineer
- 3 The Officer Commanding the Division
- 4 The Amildar Mysore Taluk
- 5 The Sar Ameen Mysore

To begin with the *Kachara Terigay* levied for sanitary purposes was abolished the Municipal funds being made up chiefly of town dues or *Octroi*. The improvement of the roads and drains claimed first attention a market was also soon built and some street lights provided. Attention was also at the same time paid to conservancy in so far as it was possible. To enable the Municipality to extend its operations the Government kindly transferred the local *Mohatarfa* collections to it from the Government Revenues in 1869 1870 on condition of the Town Police being maintained and paid from this source. In the course of the first decade the Municipal Revenue which amounted at the commencement to about quarter of a lakh doubled itself and the interest of the townsmen in their civic concerns under the fostering care of the Government began to manifest itself in several useful ways.

During the second and the third decades improvement became gradually perceptible the Government having revised the *Octroi* taxation so as to define its proper scope and confine its operation to productive articles and afforded several other local facilities. Arrangements were set afoot to relieve the Fort of its congestion of houses. A Regulation to govern Municipal work was also introduced in 1888. Under Regulation III passed in that year the Municipal Regulation

then in force in Bangalore City was extended to Mysore. An amending Regulation was passed in 1890 and Regulation VII of 1899 gave the power to levy Octroi and to assess a water rate. Relieved of the burden of Police charges, the Municipality, since 1890-91, contributed towards the grants-in-aid to the local Educational Institutions to some extent and in 1922 took over the administration of Primary Education in the City, subject to certain conditions.

The fourth decade, commencing with the privilege of election, extended by the Government in regard to the constitution of the Municipal Road, witnessed further progress, which, however, suffered owing to the subsequent calamitous advent of plague in 1898. Under the arrangements sanctioned by the Government to combat this dire disease, the city has since been fast recovering from its disastrous effects.

The Mysore City Municipality is now governed by Regulation No. VII of 1906, the "Mysore Municipal Regulation" as amended by later Regulations (See under *Bangalore*). The President is also the Chairman of the Board of Trustees for the improvement of the City of Mysore. Suitable rules prescribing the qualifications of voters and candidates at elections have been issued. The Municipal Council has also constituted several committees, viz., the Managing Committee, the Schools Committee and the Health Committee. The Managing Committee consists of nine members with the Vice-President as Chairman, and exercises all the powers of the Council under the Regulation, except those reserved by Government, or the Council, or delegated to the Schools and the Health Committees. The Municipality has framed bye-laws on various other matters.

Under the Regulation above mentioned, the Municipal administration of the City is vested in a Council which consists of thirty members who hold office for a term of three years. The Council has the privilege of electing the Vice-President, but the President is appointed by the Government. Of the total number of councillors, twenty are elected by rate-payers in the City and the rest are nominated by the

Government with a view mainly to maintain adequate representation of minorities. The registered list of voters contains 1 100 names of whom more than 2 500 voters took part in the last general election held in December 1924.

The City is divided into the following seven *mohallas* for purposes of Municipal administration —

- 1 Fort
- 2 Lashkar
- 3 Devaraj
- 4 Krishnaraj
- 5 Mandi
- 6 Chamaraj and
- 7 Nazarbad

The Chief Officer the Health Officer and an Assistant Engineer are the principal executive officers employed by the Municipality.

With the help of liberal grants from the Government, considerable improvements have been effected in the sanitation and health of the City during the past 45 years more especially since the constitution of the Trust Board in 1903 under the Mysore City Improvement Regulation III of 1903. During the year ending 1925-26 the Board consisted of 9 Trustees of whom 4 were *ex officio* 2 were elected by the Municipal Council and the rest nominated by Government. More than 7 497 insanitary houses have been removed and wide roads and conservancy lanes formed in most parts of the old City. City extensions on modern lines have been laid out to provide house sites for the displaced population as detailed below —

City
Improvement
Trust

<i>Names of Extensions</i>	<i>No of Sites</i>
Chamundi Extension	1 082
Narasimharaja Mohalla	205
Vani Vilas Mohalla	286
New Lakshimpuram Extension	75
New Idga Extension	594

A comprehensive system of drainage was adopted in 1910 providing for the construction of underground pipe sewers for the whole City with the necessary outfall works. Already 56.8 miles' length of pipe line has been laid and three out of eight areas into which the City is divided for drainage purposes have been completely sewered on this up-to-date system.

The creation of public parks which form a special feature of the eastern portion of the City has been achieved by the combined efforts and resources of the Trust Board and the Palace Authorities. (For an account of the improvements effected see below.)

The total length of roads in the City is 180 miles, of which over 50 miles consist of roads exceeding 40 feet in width and 25 miles are provided with avenues.

Water is supplied to the City by pumping it by means of electric power from the Dēvarāj Channel, down the Cauvery river, near Belagola, a village 7 miles from Mysore, to the reservoir, near the City Railway Station, where it is filtered and conveyed in pipes for service in the City. The Water Works are named after Her Highness the Mahārāni Vānī Vilās Sannidhāna, C. I., during whose Regency of the State the original Works were constructed. The management of the Works is in the hands of the D. P. W. and the annual cost of maintenance is about Rs. 50,000. The capacity of the pumps is about $1\frac{1}{2}$ million gallons per day. The total number of public fountains is about 400. To answer the growing demands of the City, extension works at an estimated cost of 4 lakhs of rupees are in progress.

The principal markets of the City are known as the Dēvarāj and Mandi Markets. These are being improved further at a cost of Rs. two lakhs. It is proposed to build a third market in the Chāmarāja Mohalla at a cost of Rs. 70,000.

A new building estimated to cost Rs. 3 lakhs for locating the Offices of the Municipality and Improvement Trust Board is nearing completion.

The whole City including the Chamunda Hill is lit by electricity. The electric lighting of the streets was successfully inaugurated on September 26th 1908 the lights being switched on by His Highness the Maharaja from the throne in the Jagannohan Palace. The power is supplied from the Cavery Lower Works at Sivsamudram. The following is a brief description of the system of lighting adopted in the City —

The system adopted for street lighting is termed The Municipal Series Incandescent Electric Lighting Scheme. It consists of 60 to 120 lamps of 40 to 60 C P being connected in series and the current maintained constant. There are six such circuits at present for lighting the town of Mysore. Current for these lamps is supplied by means of six 17.5 k w constant current transformers connected to 220 cycles 2200 volts a.c. buses. There are at present 317 lights maintained at Municipal cost. The consumption of power by these lamps is 60 to 75 volts for lamps of 40 to 60 c p Mazda. The continuity of the series circuit is maintained by the simple device known as The Automatic Film Cut Out. Along the Karkali Thotta road lamps are provided for each post at 150 feet apart. In Chamraj and Doddapet roads lamps are provided for every alternate post at 100 feet apart. In other roads lamps are provided every 3rd post, i.e. 400 feet apart. The lighting service is daily at 6.30 P.M. and is off at 6 A.M. The average life of these lamps is 800 to 1000 hours. Lamps require renewal every quarter on an average. Additional lights have been sanctioned for the city and steps are being taken to install them.

The income of the Municipality is derived from the following sources —

Rate on buildings, tax on all vehicles or animals used or kept within the limits of the Municipality or a toll on vehicles and animals entering it, an Octroi on animals and goods brought into it (purposes of consumption), a general water rate on the rental of buildings, rent from Municipal properties, market and fairs, contributions from District Funds and the Government, miscellaneous receipts such as sale of sites and tree-fines etc.

The incidence of Municipal taxation during the year 1920-1921 was Rs 32.11 in the Mysore City as against Rs 41.8 in the Bangalore City.

The following is a statement of the income and expenditure

Hospitals and
Dispensaries

There were in the City 12 hospitals and dispensaries during the year 1925 .

- 1 The Krishnarajendra Hospital
- 2 Her Highness the Maharani's Hospital for Women and Children (Vanivilas Hospital)
- 3 The Holdsworth Memorial Hospital for Women and Children, maintained by the Wesleyan Mission
- 4 The Princess Krishnammam Sanatorium
- 5 The Local Fund Dispensaries (six)
- 6 Palace Dispensary
- 7 Epidemic Diseases Hospital

Beds are available for plague and other infectious diseases Incurables are also housed There are besides four Ayurvēdic and Unāni hospitals at which indigenous medicines are dispensed

Of these, the Krishnarajendra Hospital was originally known as the General Hospital It was started in 1876 Its name was changed to Srī Krishnarājēndra Hospital in April 1918, when a new building was constructed at a cost of about Rs 5 lakhs The new building has its exterior worked in with a harmonious blending of a variety of ornamental panels, mouldings, entablatures and cornices of different types of architecture with a predominance of the Ionic type It is a two storeyed building consisting of spacious wards surmounted by a high circular dome in the centre and a subservient turret dome at either end The building is fitted up with up-to-date electrical and sanitary fittings, fully equipped operation theatres, and clinical laboratory Besides the General Out-patients' Departments for men and women separately, there are the special departments such as the Eye Department, Ear, Nose and Throat Department, and the Electro-Therapeutic Department including X-Ray

During 1927, the daily average number of in-patients and out-patients was 155 26 and 471 72 respectively

The Holdsworth Memorial Hospital, a handsome and commodious building, is situated on the Idga Extension to the north-west of the city, and is one of the first buildings seen as one enters the city by train from Bangalore

This hospital occupies a site of about seven acres the gift of the Government of His Highness the Maharaja. The foundation stone was laid on June 3rd, 1904 by Mrs. Calvert of Hastings, England and the building was opened by His Highness the Maharaja on August 21st 1906 when at the close of his most sympathetic speech His Highness was pleased to announce the grant of a donation of Rs 10 000 by Her Highness the Dowager Maharani in aid of the funds of the hospital. The building cost nearly Rs 1 50 000. The staff consists of two English lady doctors and a lady apothecary, an English nursing Superintendent with an assistant and a considerable staff of Indian nurses. The cost of upkeep is about Rs 1 000 a month the whole of which with the exception of a Government grant of Rs 200 is raised by voluntary subscriptions. There are several wards in the hospital with accommodation for about 70 inpatients and provision is made for all classes of the people irrespective of caste and creed. There is a large up to date operation theatre and one of the chief features is the ward provided for the use of *gorkha* patients where every bed is surrounded by curtains so that the patients may be visited by their friends who are unable to see any of the other occupants of the ward. There are also several family wards small separate rooms which are given up to the use of patients coming in from distant places with one or two friends. The hospital is deservedly popular and many of the patients come from great distances often from the outlying parts of the State and from Coorg.

When visiting Mysore City Their Royal Highnesses the Prince and the Princess of Wales now Their Majesties the King Emperor and Queen Empress were much interested in the work and to evince their sympathy sent large autograph portraits of themselves for the opening ceremony. Subsequently Her Majesty Queen Alexandra sent autograph portraits of her self and King Edward and His Highness the Maharaja has also given to the hospital a large handsome picture of himself. The hospital bears the name of Mary Calvert Holdsworth who with her husband the Rev W W Holdsworth M A lived several years in the city and took a never failing interest in the welfare of the women and children.

There are besides a number of charitable institutions the Hindu Abalashrama, the Anathulaya the Wesloynn

Orphanages
and homes
for the
destitute

Mission Orphanage and Girls' Home, and the Convent of the Good Shepherd, the number of inmates in each being 32, 47, 70, and 225 respectively.

The Hindu Abalāsrama provides lodging and boarding to the inmates, and also instruction, both Primary and Lower Secondary. They are also taught sewing, knitting, rattan work, fancy work, etc.

The Anāthālaya, or orphanage, provides boarding and lodging to the inmates, who are orphan boys having no means for their sustenance and education. The institution is maintained by public subscription, a Government grant and other charities. The inmates are given Secondary education in English, Kannada and Sanskrit, with special reference to the Vēdic rituals.

The Wesleyan Mission Orphanage and Girls' Home is situated in a new and commodious building in Nazarbād. Provision is made for about seventy inmates. It is supported entirely by voluntary contributions.

Improve-
ment of the
City

Much has been done during the last 10 years to improve the sanitation and the health of the city. There are three distinct stages in the Sanitary History of Mysore City. The first stage is from 1884 to 1902, when, to remove the unsanitary condition and the unhealthiness of the city, which had long been a matter of grave concern to the Government, a Sanitary Division, under Mr Standish Lee, was established by the then Dewan Sir K. Sheshadri Iyer. The second stage dates from 1902 to 1910, and commenced with the creation of the present Improvement Trust Board to improve the city on more comprehensive lines. The third stage commenced from 1910, when a complete underground drainage system, on modern lines, for the whole town was adopted at the suggestion of Mr (now Sir) M. Visvesvaraya, who was then the Chief Engineer.

What was done from 1884 to 1902, i.e., before the creation of the Improvement Trust Board, may be briefly summarised as follows.

2 The sewerage of the Fort and the Palace by a system of underground pipe sewers

3 The diversion of the sewage of Iashkar and Mandi Mohallas through a tunnel across the Government House Compound to the valley at the north-east corner of the city with a view to reduce the flow of the sewage in Captain Purchase's open masonry main drain which ran along the ditch to the east of the Fort

4 The laying of a pipe main for the sewage of the Dharmaraja Mohalla

5 The laying of a main sewer serving the Krishnaraja Mohalla

6 The construction of the western extension of Chamarajapuram called after His Highness the late Maharaja. This was the first important and successful measure carried out in the direction of extending the town

7 The filling of the ditch around the Fort and its conversion into a Park

8 The supply of wholesome drinking water by a system of water pipes firstly from the Kukkorahalli Reservoir situated at an elevation to the west of the city and subsequently from the Cauvery by pumps worked by turbines. This was a material step in the interest of the general health of the city

The above measures were adopted piecemeal and were so far as they went only palliative in character but the work of improving and remodelling the city on comprehensive lines remained to be dealt with

Plague broke out in the city in 1898 and raised the death roll alarmingly. With the help of the Plague Commissioner the Municipality made some efforts to combat the ravages of the disease by opening out lanes and streets in congested localities and creating extensions to remove the congestions in the city. It was soon evident that the resources of the Municipality were inadequate to the demands of the situation. The Government of His Highness the Maharaja therefore came to the rescue and issued Government Order (No 4168 79 L F 3602) dated Bangalore, the 18th September 1902 in which a Committee was appointed with the Chief Engineer as the President to consider the whole question and formulate proposals for the improvement of the city. The following

extract of the above quoted Government Order shows the general lines on which improvements were subsequently carried out.

“ It is unfortunate that the city of Mysore, notwithstanding the large sums spent upon it for improvements, should still be subjected to outbreaks of plague each successive year. Government consider that nothing but sustained exertions for carrying out a carefully prepared programme of sanitary improvements can establish the health of the place. Congested portions should be opened up, not simply by demolishing houses and sending the inhabitants adrift, but by devising suitable extensions and affording facilities for building houses. It is unlikely that the Municipality will be able to find all the money required for improving the city. But taking its general importance as the capital of the State into consideration, His Highness the Maharaja considers that the State may properly bear a large part of such extraordinary outlay. How much of the expenditure required may be fairly expected to be met out of Municipal resources is a question that can be settled only after obtaining an approximate idea of its total amount.

“ The general lines on which improvements could be usefully designed seem to be the following —

“ The slums of the city, wherever they exist, should be first improved by knocking down unsanitary buildings, providing against overcrowding, bad drainage and otherwise defective sanitation. Proper quarters should be found for surplus population from such localities, and such assistance as is possible and reasonably practical should be extended to poor Indian people for building proper houses. A comprehensive scheme for proper drainage should be devised not necessarily with a view to attain theoretical but unpractical perfection, but to meet the reasonable needs of the city.”

were formed to provide room for the displaced population. Drainage facility was made possible practically for every house.

Drainage works on a combined system were also undertaken. Up to 30th June 1928 the Trust Board acquired about 7,637 properties including open areas and paid about Rs. 30.5 lakhs as compensation, and spent about Rs. 20.2 lakhs on drainage works and about Rs. 1.4 lakhs on other improvements. The improvements effected have proved of the highest beneficial value and added much to the comforts and convenience and the health of the public. Those only who can recall the hopelessly unsanitary conditions of Lalbar and Mandi Michallas before the creation of the Hyderabad Trust Board can realise the wonderful change brought about in these areas by the improved sanitary conditions. In the place of narrow winding alleys and dark ill-ventilated low houses closely packed together new streets and lanes and better housing conditions are visible. The appearance of plague has been rare in recent years though it cannot be said to have totally left it.

When the population per acre of built area is considered the city cannot be said to be congested or overcrowded when compared with cities like Bombay or Calcutta. But when the manner in which houses have been constructed in many parts of the city without regard to any alignment huddled together obstructing light and ventilation and rendering drainage or sewerage impossible is considered if there was no co-ordination proper there was a condition very much akin to it requiring demolition and rearrangement. In particular areas also a population of about 150 per acre was considered sufficient congestion in a town where buildings are in the main single storeyed huts and not tenement houses from three to seven storeys high. Time honoured housing requirements in Mysore, where each family needs a house with a compound or hickyard attached for out-houses, cattle etc. necessitated the creation of extensions for housing those displaced by the demolition and rearrangement of parts of the city. The work of acquisition and demolition of

Hyderabad
Trust Board

properties, for opening conservancy lanes, leaving air spaces, admitting light, and removing congestion, was completed by the Board in Nos I and II drainage areas, in Nazarbād and Ittigegud, and to a great extent in No III drainage area and the Fort, while on No V drainage area, what is known as Lakshmipuram extension is built on what was the site of the old Dodda Holageri, for some time a most insanitary area and the hot-bed of plague and other fell diseases. In Krishnarāja Mohalla, or No IV drainage area, there have been considerable clearings done in the Missels and on the north of Chāmarāja road. Areas cleared in the city have in many instances been reallocated for building purposes, while in others they have been left to recuperate, with the help of the sun's rays, before being allotted.

The Programme of
Drainage
Works

The programme of drainage works in the areas cleared by the Board and in the extensions includes

- 1 Surface concrete drains of the semipeg top pattern with the appurtenances, silt traps, gratings, leaping weirs and flush tanks
- 2 Laying the arterial underground pipe lines of the city to tap the sewage from surface drains
- 3 Improvements of storm-water main drains
- 4 Construction of dust-bins and latrines
- 5 Construction of roads and lanes, road culverts and coverings at road crossings
- 6 Out-fall works

Formation of
Extensions

Besides the extensions at Jalapuri and Idga on the north of the city, brought into existence in connection with plague preventive measures, the Board extended the old Idgah Extension and formed the new Dodda Holageri and Lakshmipuram extensions on the south of the city, and constructed roads and concrete surface drains to drain the aforesaid extensions. Chatnahalli Extension was also formed and sites were allotted for the population displaced in No IV drainage area, or Krishnarāja and Chāmarāja Mohallas and roads were cut and graded drains constructed. In recent

years, other extensions as above mentioned have been laid out with the necessary amenities

With the advent of Sir M Visvesvaraya K C I E M I C I Underground drainage system as Chief Engineer of Mysore the system of drainage underwent a complete change. He decided in favour of a complete underground system for the city in place of open surface drains and artificial pipe lines. Projects were prepared accordingly by the Board for a complete underground system and were sanctioned by the Government in 1911. About 56 miles of pipe line has been as stated above laid out and three out of the eight areas into which the city is divided have been completely served on. The sewage water from every house in this system is directly connected to the underground street sewer and not through the open surface drains. The whole system is a gravitation system except two very small areas which cannot gravitate into the main out fall without pumping, and which have separate septic tanks of their own.

In this new system the whole sewage is brought down to one common out-fall in the valley below Doddakere about three miles away from the City. Here the sewage is treated for purification in a septic tank and the effluent is proposed to be utilized for agricultural purposes. About 180 acres of land are available for a sewage farm.

Mysore City is the head quarters of the Mysore University. The University was founded in 1916. Its offices are situated in the Gordon Park. The residences of the Vice Chancellor and of the Professors are also in the same Park. Mysore University and its Colleges

This University has some features which distinguish it from the older Indian Universities. The Vice Chancellor is a full time officer and has control of the executive. The Colleges are adequately represented both in the Council and in the Senate of which latter every professor designated as University Professor is a member. Till recently the school course leading to the University was extended by one year during which special preparation for the University was made in certain recognized

schools, known as Collegiate High Schools. The University course was reduced from four to three years, and there was no Intermediate public examination to break the continuity of the B A course. In 1927, the University Courses of study were reorganized and the Intermediate Examination was introduced. Other features are the reduction of the amount of English taught and its practical character, the increased emphasis laid on the vernaculars, and the special attention paid to the optional languages of Sanskrit and Persian. For those who wish to specialize in Science, there is a B Sc course in addition to the B A Science course.

The University Unions afford opportunities to the students, the members of the College staff, the Fellows of the University and the registered graduates, for enjoying best club life, and for coming into intimate social relations with one another.

The institution of the system of University Extension Lectures and of a Publication Bureau is evidence that the University is conscious that its activities should not be confined to the four walls of its Colleges, but should extend its benefits to those who are not members of the University.

The University is State-supported except for the income derived from fees and from the endowments for the award of some of the prizes and scholarships.

At present there are five Colleges—the Maharaja's College and the Maharani's Women's College for Arts at Mysore, the Central College for Science, the Engineering College, and the Medical College at Bangalore. At the Maharaja's College, the optional subjects taught are History, Mental and Moral Philosophy, Experimental Psychology, Economics, Political Science, Mathematics, Statistics, Sanskrit and Persian. There is also a Commerce course leading to the B Com Degree, a teaching course leading to the B T Degree and there are courses also for the M A Degree in English, History, Economics and Political Science, Philosophy and Sanskrit. At the Maharani's Women's College, the optional subjects taught are History, Economics and Political Science. At the Central College, Physics, Chemistry, Natural Science and Mathematics are taught. There is both a B A Science course as well as a B Sc course here. The Engineering College provides for Civil, Mechanical (including Elementary Electrical Engineering) and Electrical Engineering. The Medical College provides instruction for the L M P and M B, B S courses.

The following languages are common to the Arts Colleges—English and Kannada Tamil Telugu Urdu Sanskrit Persian and French as second languages

The University has besides a Library of its own which has about 75 000 volumes and three Hostels for boy students and another for women students and a University Union at Mysore Provision has been made for University lodges Grants are made to these lodges and arrangements have been made for the supervision of licensed lodgings as well With a view to securing that certain conditions as regards accommodation sanitation and food are enforced The Hostel committee undertake this duty

There are two Colleges three high schools and 60 other institutions for boys and girls in the city wherein about 10 000 boys and girls receive instruction Of these institutions the Maharaja's College is a first grade College teaching up to the M A standard The Maharani's College also a constituent University College is an institution chiefly for Hindu girls and ladies teaching up to the B A standard The three high schools are the Wesleyan Mission the Marimallappa's and the Banu maya's High Schools The Maharaja's Sanskrit College provides instruction in higher departments of Sanskrit learning The Chamarajendra Technical Institute provides technical instruction in the following branches —

1	Engineering	5	Tilo making
2	Carpentry	6	Rattan work
3	Smithy	7	Typing
4	Drawing	8	Manufacturing iron safes

The Ayurvedic College trains students in the system of Hindu Medical Science

The Municipality controls Primary Education in the City There is also a school for the deaf dumb and blind situated in Church Road About 10 such affected students are being instructed there in reading and writing in the Braille system singing weaving basket and mat making Most of the Boarding houses are as above stated attached to these institutions There are also boarding houses for Jains Muhammadans the deaf and dumb school students, and the Panchamas

Of the educational institutions mentioned above the Maharani's College is the first of its kind in Southern India This

institution which bears the honoured name of Her Highness the Mahārāṁ Vāṇivilās Sannīdhāna, C I, was started in January 1881, as a private school for the education of high-caste Hindu girls, by Rai Bahadur A. Narasimha Iyengar, a pioneer in female education in Mysore. It was at first supported partly from liberal grants by Government and partly from charity funds, as well as from the private resources of its philanthropic founder. In 1889 a European lady, Mrs. Thornton, was appointed as the Lady Superintendent. The object of the institution was to reconcile Western methods with Hindu views in regard to the subject of female instruction. The success of this object has to a very great degree lessened the popular prejudices against female education in general.

The institution was taken under Government management in 1891, and a responsible committee was appointed to manage its internal affairs. It was raised from the Middle School to the High School standard in 1895, and three girls passed the Matriculation Examination for the first time in 1896. In 1901 it was raised to the status of a second-grade college and affiliated to the Madras University in Group III, Logic and History. Since the foundation of the University of Mysore, in 1916, it has been reorganized and called the Maharani's Women's College. There is a hostel common both to the College and the High School which is managed entirely by the latter. There is a Resident Superintendent as well as a Warden. It is now open to the children of all respectable caste Hindus, Europeans, Eurasians, Indian Christians, Muhammadans, Jews and Parsis. No fees are charged for instruction, and liberal University scholarships are paid to poor and deserving girls.

Fairs and Festivals

No account of the City can be considered complete without some description of the principal fairs and festivals that take place in it and which attract large crowds of people into it. These are (1) His Highness the Maharaja's Birthday Week Festivities, (ii) The Dasara Durbar Festivities, (iii) The Chāmundi Jātra.

The Birth-day Festivities

His Highness the present Maharaja having been born on Jyēṣṭha Suddha Ēkādaśī of the Hindu cycle year Thārana, 4th June 1884, the anniversary of the Birthday falls, according

to the variations of the Hindu calendar, towards the end of May or early June. The festivities with its celebration are usually as follows —

On the morning of the Birthday every year a salute is fired the number of guns corresponding to His Highness' age on the occasion. Durbar is then held in the first floor or Amba Vilas in the Palace. Afterwards the religious ceremonies for the Birthday are observed and His Holiness Sri Parakula Swami is duly met. Honours from the principal temples and mutts are presented as also cocoa nuts (phala) and coloured rice (manthra-kshate) by the Vaidika Brahmans in the Durbar Hall. All the State Officers, Ursu noblemen, local merchant, etc. assemble there and pay their respects (muzre) to His Highness.

On the same evening His Highness moves in State procession on horseback from the Palace and proceeds to Government House where a review of all troops. Government and Palace is held. On his return a durbar is held in the Amba Vilas at night. On the second and the third evenings durbars are held in the Amba Vilas. *Yasas* by all Civil officers and merchants and others taking place on the second evening and by the Military on the third. If the third day happens to fall on a Tuesday or Friday then the durbars continue for two more days.

The Dasara in Mysore is observed as a semi-religious function. It falls usually in October but sometimes towards the close of September. The following is a description of the festivities as observed in Mysore —

The Dasara
Festivities

On the morning of the first day His Highness after the observance of the necessary religious ceremonies partly at the shrine of Sri Chamundeswari in the Palace and partly in the Sejj (Durbar Hall) first floor takes his seat on the historical throne (which faces east in the centre of the front wing) under a salute of 21 guns and showers of flowers as also presentation of arms by the Palace and the State troops assembled in the arena square below. Honours from the principal temples and mutts are presented followed by the presentation of cocoa nuts (phala) and coloured rice (manthra-kshate) by the Vaidika Brahmans invited to the Durbar. All the Civil officers, local merchants and others after doing *muzre* offer *namas* to His Highness. Then comes the *feu de joie* and *morch post* by all

the troops Before the close of the durbar, the *zenana* ladies are afforded an opportunity to pay their respects to His Highness

Thereafter, durbars are held in the evenings during the period which, according to the variations in the Hindu calendar, extends to 8, 9 or 10 days at the most Wrestling and sports in the arena and also pyrotechnic displays form part of the evening programme of durbars. *Nazar* is offered by the Military officers on the evening of the first day

On the morning of the last day (Mahā Navamī) of the period, *pūja* is performed to the State sword and arms as also the State elephant and the State horse, etc The same evening the European guests, including the Hon'ble the British Resident, take part in the durbar

On the following morning, the State sword, arms, elephant and horse are sent to the palace building in the Old Cantonment grounds, north of the city The next event is wrestling which His Highness witnesses

In the evening, His Highness, with His Highness the Yuvaraja, moves in State procession, seated in a golden *howdah* mounted on one of the palace elephants On arrival at the Cantonment grounds, Their Highnesses descend from the *howdah*, and on horse-back they review the troops

On returning to the Palace, a durbar is held in the Amba Vilās at night

The next evening's durbar takes place in the Amba Vilās, when, after *muzne*, *nazar* is offered by all Civil officers, merchants and others

During the durbar on the following evening with which the Dasara functions close, Military and Police officers and the members of the Representative Assembly offer *nazars*, and His Highness very kindly listens to the report of the results of the Vidvath Examinations in the Maharaja's Sanskrit College, and distributes prizes to the successful candidates

After the Vijaya Dasami day, the sittings of the Representative Assembly begin in the Jagan Mohan Palace and continue for a week or so

Closely following the Dasara, the *Jātie* on the Chāmundi Hill takes place, on the Pournamī or full moon day Thither His Highness the Maharaja and the Royal Family go to pay their devotion to the tutelary goddess of the Royal House

of Mysore. Nearly 10 000 people gather to witness the *Jatre*. The goddess is taken in a car in procession on the hill

Nagamangala — 1 Taluk in the north transferred from the Hassan District in 1882. Area 101 square miles. Head quarters at Nagamangala. Contains the following *hoblis* villages and population —

Name of Hobli	Villages	Hamlets	Villages classified				Population of each Hobli
			Government	Sarvamanya	Jodi	Kayamutta	
Bilalajinavale	75	1	1			1	14 816
Devalapura	63	3	38	1	4		14 746
Honzalero	8	34	69	1	10	1	18 065
Nagamangala	64	36	60		4		14 536
Villero	83	3	8		1		15 73
Total	367	107	341	2	21	3	7 336

Bellur 1 678, Chinya 1 017 and Nagamangala 3 982

Principal places with population

The Shimsha forms part of the eastern boundary and receives nearly all the smaller streams of the Taluk. The *Lokapavani* has its source in the south west. The country is generally pretty level except for some low rocky hills in the north and west more or less covered with scrub jungle. The principal point is called *Chunchangiri*. To the west of Nagamangala is a hill of *talcose argillite* closely resembling potstone and used by the local people in the same way as pencils. The number of tanks is about 130 of which some 30 are of considerable size but many of them shallow from being silted up. There are no other means of irrigation.

The dry crop soils are mostly indifferent sandy gravelly and shallow soil being common. But good red soil is also met with. Black soil is very uncommon. The soil of the

wet lands is fairly good, but rather too sandy. Ragi is the staple crop. In the vicinity of the rocky hills, a coarse kind of rice is grown in situations where, from percolation of moisture, ordinary dry crops cannot be raised. Rice is almost the only wet crop, sugai-cane being rarely grown. The gardens are poor, and the famine of 1876 destroyed all the areca-nut trees, leaving only a certain amount of cocoa-nut trees.

Sheep are everywhere abundant, and a sheep farm was at one time maintained by Government at Heriganhalli. But it was given up in 1863. The cattle, as a rule, are small, but fine draught bullocks, which are bred locally, are met with in most villages and fetch a high price. Kaiadihalli is the centre of a tract specially given to the breeding and rearing of Hallikar cattle. Brass work of various kinds is an industry of Nagamangala.

In the middle of the 15th century, there was a family of chiefs who called themselves Lords of Nagamangala. They were of the Lōhita family, and inscriptions mention the following: Singanna Wodeyar, whose wife was Sitāmbika, his son, Timmanna Dannāyaka, whose wife was Rangāmbikā or Ranga Nāyaki, he was minister to the Vijayanagar king Mallikārjuna or Immadi-Praudha-Dēva-Rāja (1116-1167), and rebuilt Melkote. He was apparently the first who erected a fort in the island of Seringapatam. Dēva-Rāja, son of Singanna Wodeyar, built a new dam on the Cauvery and led a channel from it to Harahu, now called Haravu. This family apparently did not survive the disaster which broke up Vijayanagar empire. For at the end of the 16th century, we find Nagamangala included in the territory bestowed upon Jagadēva-Rāja of Channapatna (Bangalore District) for his gallant defence of Penukonda against the Muhammadans. From him it was taken by the Rāja of Mysore in 1630. Being in the line of march of the Muhrattas to Seringapatam, it more than once suffered during the century from their depredations, which have left their mark upon the Taluk.

The Revenue Settlement was introduced in 1888 The area of the Taluk was thus distributed —

	Acres
Culturable (dry 92 533 wet 1 726 garden 1 358)—	98 617
Unculturable	1 15 481
Inam villages	18 902
Forests 933 Kavalas 6 485	7 118
Total	2 40 118

The unoccupied area was 4 127 acres The total Revenue Demand for 1922-23 was Rs 1 32 139 and for 1923-24 was Rs 1 31 709

Nagamangala—A town situated in 12°19' N Lat, 76° 49' E Long, on the Seringapatam Sira road 24 miles north of the railway at French Rocks and 39 miles north of Mysore Head-quarters of the Nagamangala Taluk and a Municipality

Population in 1911	Males	Females	Total
Hindus	1 159	1 0	2 385
Muhammadians	571	509	1 080
Christians	4	3	7
Jains	0		

It contains the remains of some fine temples and royal buildings The inner fort was erected in 1,270 by Chaimi Dannayak and a line of chiefs of the Lohita family continued to be lords of Nagamangala till the end of the 15th century or longer The outer fort was erected in 1578 by Jagadīva Raya of Channapatna (Bangalore District) of whose dominions Nagamangala was one of the chief towns It was captured in 1,630 by Chama Raja Wodeyar of Mysore The town was reduced to ruins in 1,792 by the Mahratta army under Parasu Ram Bhao and 150 000 palm trees were destroyed Brass artistic work is made at Nagamangala

There is a lofty *mantapa* to the left of the Saumya kesava temple here which is in a good state of preservation

The place is spacious enough to serve as an Assembly Hall. Nagamangala was renovated in *Saka* year 1057, *i e*, 1135 A D by Bammaladēvi, wife of Vishnuvardhana. To the north of the main temple is the shrine of the goddess in which an image of Sarasvatī in seated posture is set up and worshipped. Nagamangala being famous for its metal work, some of the processional images that are in the temples are claimed to be of local manufacture. All these are highly artistic and are beautiful examples of figure sculpture. The art, however, has considerably deteriorated of late for various reasons, and the images said to have been cast recently are anything but elegant.

The Saumyakēśvara temple above referred to is a large structure in the Hoysala style with a *pātālankana* and a lofty *mahādvāra* surmounted by a *gōpura* in front. It faces east and has in front one of the finest Garuda-pillars, known in the State. The latter, about 55 feet high and $2\frac{1}{2}$ feet square at the bottom, is sculptured with fine scroll work on all the sides from top to bottom and has the necessary appliances such as iron chains, etc., for placing lamps on the top which is provided with an iron frame work for the purpose. It is said to have been set up by Jagadēva-Rāya, the chief of Nagamangala, who is also said to have built the *gōpura* in front. On the pillars at the sides of the *mahādvāra* are sculptured Ganapatī, now enclosed in a niche with a small porch in front, and Mahīśāsuramardini. The *dvārapālakas* on the jambs have a standing female figure holding a lotus on the adjoining pillar at the side. In the *prākāra* are cells enshrining figures of Paramapadanātha and the Ālvārs Chakrattālvār, the goddess Saumyanāyaki and Rāmānujāchārya, their positions corresponding to those at the Melkote temple. There are also shrines of Pillalōkāchārya and Manavālamahāmuni, the great Śrīvaishnava teachers and authors who flourished in the 13th and 14th centuries. In the *sukhanasi* of the shrine of the goddess stands a good figure, about $4\frac{1}{2}$ feet high, of Āndāl or Godadēvi. The temple has three cells, only the main cell having a *sukhanasi* and a tower. This main cell has Saumyakēśava, a fine figure, about 5 feet high, flanked by consorts. The god in the left cell is Lakshmīnarasimha with a small canopy of 5 snake-hoods, while that in the right

is Venugopala with Rukmini standing at the side. The *nataranga* is a grand hall of 12 *ankanams* with 12 well carved ceilings of which the four at the corners have unfortunately been removed with the object of letting in light. The ceiling in front of the *sukhanasi* of the main cell is flat with 9 lotuses all the others being about $\frac{1}{2}$ feet deep with single lotuses. The *nataranga* is supported by 12 fine pillars the central four and two each on the sides being similar in design and make. Attached to the *nataranga* is a veranda of 3 *ankanams* with deep ceilings carved with single lotuses. The outer walls have no figure sculpture but only pilasters and turrets surmounted by well carved caves. There is however a solitary figure of *Narasimha* on the south wall which is enclosed in a niche with a small porch in front. Iron clamps used for joining the stones have been found in some places. The *Bhuvanesvara* temple is a plain Dravidian structure with two entrances on the east and south. In front of the *sukhanasi* entrance is a fine ceiling of *ashin-dilpalakas* with *Tandavavara* in the middle. Among the figures kept in the *nataranga* may be mentioned seated *Bhairava* with the attributes—trident, a drum in cup and a sword. *Brahma* seated on the swan, seated *Sarasvati* with 4 hands of which 3 bear a goad, a noose and a lotus the remaining one being in the *varada* attitude. *Chandikesvara* standing with folded hands armed with an axe. *Surya* flanked by female archers, and *Ardhanarisvara* with an eor ring in the lobe of the left ear. The *Narasimha* temple is a large Dravidian structure with a *gopura* in front. In the *prakhara* are shrines of *Chakrattar* or Hanuman seated Rama with *Sita* on the lap and *Lakshmana* standing to the right goddess *Prasannanayaki* and *Raomnujacharya*. The first is a fine figure with 8 hands the back also being sculptured with a figure of *Yoga Narasimha* with four heads. The *utsava vigraha* is a very fine figure. There is also kept in the *sukhanasi* another fine metallic figure about 3 feet high of Venugopala. According to tradition the *garbhagriha* and *sukhanasi* of this temple were overgrown with an ant-hill and on the presence of the god being revealed in a dream to Jogadevo Raya he came here and saw a snake going round the place and hiding itself in a hole. Hence it is said the place was known as Nagamandala now corrupted into Nagamangala. This is of course fanciful etymology. In the *nataranga* to the right is a cell with a *Naga* stone and a hole in front which is believed to represent

an ant-hill People make vows to the Nāga stone and have it anointed It is said that however large may be the quantity of water used for bathing the Nāga stone, it is not capable of filling the hole in front There is a dry piece of wood, about 20 feet long, in the temple which is said to represent the shaft of a *hangaral* tree (*Dodonaea viscosa*) which once grew over the ant-hill sheltering the god under it The Rāma temple, recently restored, is said to be the oldest temple in the village It contains well carved figures of Rāma, Lakshmana and Śīta, all standing, with Hanumān sculptured on Rāma's pedestal The Virabhadra temple is a neat structure in the Dravidian style having a small figure of the god, about $1\frac{1}{2}$ feet high, holding a trident, a drum, a skull and a sword There is also a fine seated metallic figure, about $1\frac{1}{4}$ feet high, of Dakṣināmūrti with 4 hands, three of them bearing a rosary, a book and a lute (*vīna*), the remaining one being in the *abhaya* attitude In a separate cell to the left, stands Bhadrakālī, the consort of Virabhadra, having for her attributes a trident, a drum, a sword and a shield

The village goddess is called Badagodamma because her shrine is situated near the north outlet of the tank Her *utsava-vigraha*, kept in a shrine in the village, is known as Arasamma It is about 2 feet high and holds in its hands a trident, a drum, a cup and a sword The epigraph seen near this shrine has been registered by the Archæological Department The Kālamma temple, which belongs to goldsmiths, is a large Dravidian building with a lofty *gōpura* The *pātālankana* has to the right a huge figure, about 5 feet high, of Ganapati, and to the left a figure of Bhairava The goddess, a seated figure with 4 hands, has one of her hands in the *abhaya* attitude and holds in the other three a trident, a drum and a water-vessel The metallic figure has a noose in place of the trident and carries a rosary in the *abhaya-hasta* or hand in the *abhaya* attitude

The palace of Jagadēva-Rāya is said to have been situated between the Saumyakēśava and Narsimha temples A closed doorway at the back of the Narasimha temple is pointed out as the entrance used by the ladies of the palace for going to the temple

About a mile from Nagamangala is a fine circular pond, about 60 feet in diameter and only 3 feet deep, which is said to have been built in the middle of his pleasure garden by Jagadēva-Rāya

for *jala krīde* or sporting in water with his wives. The pond has a *mantapa* in the centre.

A Ganga inscription dated in the first regnal year of Marasimha is to be seen in front of the Travellers Bungalow at this place.

1912-13	₹ 403	₹ 2,208

Nagarle — A village in Nanjangud Taluk, Population Nagarle 1,105

The Durga Paramesvari temple at this place has a four armed figure about 3 feet high of Durga seated on a lion trampling on a decapitated buffalo and holding in the upper hands a discus and a conch the left lower holding a demon and the right lower piercing him with a trident. The village goddess Malagarasi is a seated stucco figure about 3½ feet high bearing in the upper hands a discus and a conch and in the lower a sword and a cup. There is also a ruined Parvathanatha basti here of some architectural merit. The god about 5 feet high is canopied by the seven hoods of a snake whose coils are well shown on the back. The front hall has a well carved large ceiling of a square shape. An epigraph of the time of the Chōla king Rajadraya has been recently found here.

Nalkundi — A village in Nagamangala Taluk, Population Nalkundi 236

This place has a small shrine of Gopalakrishna with a small figure about 1½ feet high, of the god standing in front of a *brindavana*. The rays of this and the surrounding villages sing what are known as *bhagavatige* songs. These relate in brief the stories of the *Ramayana*, the *Bharata* and the *Bhagavata purana* and are said to have been composed for the benefit of the Sudras by Tirumalarya, the learned minister of the Mysore king Chikka Deva Raja Wodeyar. The rays carry pictures of Rama, Lakshmana, Sita, Hanuman and Garuda suspending red silk cloths on those of Rama and Sita and white

cotton cloths on the others, and dance singing the above songs to the accompaniment of drums and cymbals Boys too take part in this musical march with great enthusiasm

Nanjangud
Taluk

Nanjangud Taluk. A Taluk in the centre south-wards. Area 379 square miles. Head-quarters at Nanjangud. Contains the following *hobls*, villages and population —

Name of Hobli	Villages	Hamlets	Villages classified				Population of each Hobli
			Government	Sarvamanya	Jodi	Kayangutta	
Bilgere	25	22	22	1	2	.	10,699

Kasaba	42	25	33	6	1	2	23,215
Kaulandi	36	20	32	4		.	27,691
Railway Station						.	88
Total	189	126	159	24	4	2	1,11,305

Principal
places with
population

Alganchi 1,652, Badanavalu 1,362, Bailagali 1,780 ; Dasanur 1,270, Debur 1,100, Devanur 2,135, Hadinaru 2,537, Hedathale 2,013, Hemmaragala 1,769, Hoskote 1,807, Hullahalli 1,961, Kalale 2,622, Karya 1,116, Kirigunda 1,075, Kodulandi 1,053, Kudlapur 1,559, Nanjangud 7,971, Nerale 1,865, Rampura 1,492, Tagadur 3,738, Tayur 1,662, Tumbanarale 1,312 and Veeredevanapura 1,562

The Taluk was extended in 1882, by the addition of Tayur hobli from Talkad Taluk, and Devanur and Dasanur hoblis from Chamarajnagar Taluk

The Kabbani runs west to east along the north of the Taluk, and at Nanjangud receives from the south the Gundal, which waters the central and eastern portions. Formerly there was not much wet cultivation, what there was depending upon rain-fed tanks. But the recent extension of the Rampur channel has brought more lands under irrigation. The largest tank

is the Narasambudhi, two miles south of the Kasha. A considerable quantity of jola is grown.

In the north west of the taluk are some quarries of potstone intermixed in layers with schistose mica. Gold mining was carried for some time at Woolgure to the s w of Nanjangud but it has ceased now.

Nanjangud was until recently the terminus of the Mysore State Railway from Bangalore. In August 1926 the Railway was extended to Chamaraajnagar. The Mysore Trichinopoly road via the Hasanur ghat runs through Nanjangud near which the high road to Ootacamund branches off. There is also a road from haulandi to Yelandur. A road runs from Nanjangud east to Tirumakudlu Narasipur and west to Hullahalli turning south to Hura. The road from Begur to Heggaddevankote crosses the south west of the Taluk.

The area of the Taluk was thus distributed —

	Acres
Culturable (Dry 1 22 377 wet 10 678 garden 3 332)	1 36 387
Unculturable	54 251
Inam villages	10 168
State Forests 9 134 Kaval 2 310	11 444
Total	2 42 253

The unoccupied area was 2 503. The total Revenue demand for the year 1922-23 was Rs 1 12 965 and for 1923-24 was Rs 1 90 102.

Nanjangud — A town situated 12 7 N Lat 76° 41 E Long on the right bank of the Kabbani 12 miles south of Mysore at the point where the trunk road from Mysore branches to Ootacamund and to the Hasanur Ghat. Head quarters of the Nanjangud Taluk and a Municipality. Until 1926 the terminus of the Mysore State Railway.

Population in 1921	Males	Females	Total
Hindus	733	7310	8043
Muhammadians	419	372	791
Christians	12	5	17
Jains	2	1	3

The Temples

The early history of the place has been already related. It is now noted for its temple dedicated to Nanjundēśvara, or Śrīkantēśvara, an appellation given to Śiva on account of one of his exploits in swallowing poison, and it is from this attribute of the god that the town derives its name. A temple of small dimensions is said to have existed from time immemorial. In one part of the temple are 66 images of Śaiva saints, which may be of Chōla origin, of the 11th century. But Karachur Nandi Rāja, and afterwards Pūrnaiya, enlarged the temple to its present size. The former prince made Nanjangud his favourite place of abode and fortified it. A celebrated car-festival, which lasts for three days, and is resorted to by thousands of devotees from all parts of South India, is held here at the end of March. The temple is 385 feet long by 160 feet broad, and is supported by 147 columns. Some of the images are carved with great perfection of finish. Surrounding the outside of the temple are the figures of various deities with their names below, so that each votary can find his patron saint. The *gōpura* was erected in 1845 by Mummadi-Krishna-Rāja-Wodeyar, and various shrines were added by the royal ladies down to 1853. This temple is inferior in point of sanctity to none in the Mysore District, and receives an annual allowance from Government of Rs 20,197. At the point where a stream called the Chūrnavatī from the tank runs into the Gundal or Kaundinya river is the Parasu Rāma Kshētra, with a temple of Parasu Rāma. The moist earth around, called *Mṛtika*, is considered an effective application for various skin diseases, and is being continually carried away to be used for such purposes. But the excavations speedily fill up again.

The Śrīkantēśvara temple referred to above is a large building in the Dravidian style with a fine *gōpura* and a veranda in front supported by 8 huge but well carved black stone pillars. It appears that some of the shrines have been removed with their inscriptions with the object of giving more light to the interior of the temple. In the *navaranga* there are cells to the right and left, as in the temple at Chāmarājnagar, containing *lingas* set

up by the queens and relatives of Krishna Raja Wodeyar III. There are also in a shrine as there statues as well as metallic figures of Krishna Raja Wodeyar III and his four queens standing with folded hands with labels on the pedestals the king's statue having also a Sanskrit verse inscribed on its pedestal. In the *prākara* we have again as there shrines all round the south ones containing figure both in stone and metal of the 63 devotees of Siva the west ones *lingas* and the north ones figures of Siva representing his 24 *lilas* or sports. Many of the figures here are however much better carved than those at Channarayana. Parvati the goddess of the temple is a fine figure as is also Narayana with his consorts. In a shrine in the north is a figure of Subramanya the Dandayudhapani variety with a hare head, seated on a peacock and sheltered by the 7 hoods of a serpent holding a staff in one of the two hands. Besides the 9 labels on the pedestals mentioned above 20 modern inscriptions are to be seen on brass plated door ways, vehicles, etc. The smaller vehicles are mostly made of silver and gold some of them being artistically executed. The larger ones such as the Gajaratha, Kailasa and Turogo (horse) are fine pieces of workmanship. These have wheels and can be easily moved the Gajaratha being drawn by an elephant. The larger vehicle are all gifts from Krishna Raja Wodeyar III. The top parapet round the temple has mortar figures as at Mugur and Channarayana representing varieties of Ganapati etc with labels below giving their names. The total of such labels is about 30. An inscription of the 15th century is to be seen on the *balipitha*.

The top parapet of the *prākara* around the Srikanthaswara temple has well executed stucco figures with labels below giving their names. Though not of great historical importance these labels possess some value from a religious and iconographic point of view as they furnish the names of different kinds of Bhairava, Ganapati, Subramanya, Dakshinamurti, etc. The labels below some figures are gone the figures themselves being damaged in some places.

The object of worship in the Parasurama temple is an inscribed slab measuring 3 by 2 containing the inscription EC III Nanjangud 17. The middle of the stone is rendered black by smearing oil. The temple has many devotees including Lingayats who are said to receive *tirtha* or holy water here.

According to the *Sthala-purāna*, a visit to the holy place Nanjangud without a visit to the Parasurāma temple is perfectly useless. There is a silver *virāṅgi* or mask, measuring $3\frac{1}{2}'$ by $2'$, kept in the *archaka's* house, which has a figure of Parasurāma holding an axe in the right hand, the left hand hanging by the side. An inscription at the bottom tells us that the mask was presented to the temple in 1861. An examination of the jewels and vessels belonging to temples kept in the taluk treasury and of the valuable articles in the treasury of the Srikantēsvara temple brought to light more than a dozen inscriptions nearly 100 years old. Of the silver vessels, etc., in the taluk treasury, one was a present from the Mysore king Krishnarāja Wodeyar III to the Onkāreśvara temple at Sinduvalli, three from Biga-Mallārājaiya, Mallājammanṇi and Hampē-arasu to the Mallikārjuna temple at Hura; three from Lakshmammanṇi to the Kaivalyādēvi temple near Kalale, and two from Dalavāyi Nanja-Rāja to the Lakshmīkānta temple at Kalale. The temple treasury has, besides, numerous silver articles, a number of gold vehicles, vessels, and ornaments set with precious stones. Among these many be noticed a gold *kolaga* or mask (for the *linga*) weighing $1\frac{1}{4}$ maunds, two large gold plates and 11 cups, jewelled gold *vajrāṅgis* for the processional image and its consort, gold ornaments for the goddess such as bracelets, anklets, crown, *jadebhangāra* (worn over plaited hair) and *sira-kuchchu* (folds of cloth) and gold, pearl and emerald necklaces with jewelled pendants. From the inscriptions on them we learn that a gold snake vehicle (Sēsha-vāhana), 2 gold plates, 3 silver vessels and a silver lamp-stand were the gifts of Krishnarāja Wodeyar III, and 2 gold ornaments, of the Srīṅgeri *guru* Narasimha Bhārati. Among other donors are Jāgīrdār Nanjappa, Venkatalakshamma and Marīnanjavve. It is interesting to note that a silver cup set with five kinds of precious stones at the bottom was a present from Tipu Sultān. There is also a tradition that an emerald necklace in the temple was presented by Haidar Alī as a thank-offering for the cure effected by the god of the eye-disease, pronounced incurable, of a favourite elephant of his. A temple vehicle, known as Rudrākshimantapa, was the gift of Tāṅgājammanṇi of Krishna-vilāsa-Sannidhāna, queen of Krishna-Rāja-Wodeyar III. A large number coins, consisting of silver and copper pieces, are kept in the Taluk Treasury. They are mostly coins of Mysore and the British East

India Company There are also a few belonging to Hyderabad and Burma

The *matha* of the Raghavendraswami at Nanjangud has a long and interesting history connected with it This Madhva *matha* came into existence at the close of the 15th century, the first *stāmi* being Vibudhendratirtha disciple of Ramachandratirtha It has been presided over by a regular succession of *swāmis* up to the present day

One of the greatest among the successors of Vibudhendratirtha was Raghavendratirtha who sat on the spiritual throne from 1624 to 1671 and it was after him that the *matha* acquired its present designation The *matha* owns 29 copper plates containing in all 17 inscriptions engraved in Telugu Tamil and Nagari characters and ranging in date from A.D. 1490 to 1774 One of the inscriptions however is not connected with the *matha* it records a grant in 1543 to the Virasaiva teacher Emmabasava by Tirumala Raja son of Salaka Raja and it is not clear how these plates came into its possession Of the other records three of which are incomplete one dated 1490 registers a grant by the Vijayanagar king Krishna Deva Raya two dated 1575 and 1576 by Sri Ranga Raya I two dated 1513 by the Araviti chief Rama Raja one dated 1680 by the Tanjore chief Chavappa two dated 1614 by Chinna Chavappa one dated 1663 by the Mysore king Dodda Deva Raja Wodeyar one dated 1679 by the Madra Nayaka Muddalagudri one dated 1698 by the Mudra queen Mangamma one dated 1680 by the Chanji chief Rangappa Kalakatola Vadayan one dated 1699 by Uttama Raagappa Kalakatola Vadayan one dated 1746 by the Anyalur chief Vijnayavoppala Malava Rayn one dated 1774 by a chief named Soma Raja and one dated 1678 by an individual named Kummnyvnu These records give us an idea of the esteem in which the *stāmis* of the *matha* were held by the rulers chiefs and other people all over Southern India

The spiritual succession of the *stāmis* of the *matha* as given in the records is as follows —

Vagisa Ramachandra (1) Vibudhendra (2) Jitamitra (3) Raghunandana (4) Surendra (5) Vijayendra (6) Sudhindra (7) Raghavendra (8) Yogiandra (9) Surindra (10) Sumatindra

According to the *Sthala-purāna*, a visit to the holy place Nanjangud without a visit to the Parasurāma temple is perfectly useless. There is a silver *virāṅgi* or mask, measuring $3\frac{1}{2}'$ by $2'$, kept in the *archaka's* house, which has a figure of Parasurāma holding an axe in the right hand, the left hand hanging by the side. An inscription at the bottom tells us that the mask was presented to the temple in 1861. An examination of the jewels and vessels belonging to temples kept in the taluk treasury and of the valuable articles in the treasury of the Srikantēsvara temple brought to light more than a dozen inscriptions nearly 100 years old. India Company There are also a few belonging to Hyderabad and Burma

The *matha* of the Raghavendraswami at Nanjangud has a long and interesting history connected with it This Madhva *matha* came into existence at the close of the 15th century, the first *swami* being Vibudhāndratīrtha disciple of Ramachandratīrtha It has been presided over by a regular succession of *swamis* up to the present day

One of the greatest among the successors of Vibudhendra tīrtha was Raghavendratīrtha who sat on the spiritual throne from 1624 to 1671 and it was after him that the *matha* acquired its present designation. The *matha* owns 29 copper plates containing in all 17 inscriptions engraved in Telugu Tamil and Nagari characters and ranging in date from A D 1490 to 1771 One of the inscriptions however is not connected with the *matha* it records a grant in 1513 to the Virasaiva teacher Emmabasava by Tirumala Raja son of Salaka Raja and it is not clear how these plates came into its possession Of the other records three of which are incomplete one dated 1490 registers a grant by the Vijayanagar king Krishna Deva Raja two dated 1575 and 1576 by Sri Ranga Raja I two dated 1513 by the Araviti chief Rama Raja one dated 1580 by the Tanjore chief Chavappa two dated 1614 by Channa Chavappa one dated 1663 by the Mysore king Dodda Deva Raja Wodeyar one dated 1679 by the Mudra Nayaka Muddalagudri one dated 1698 by the Mudra queen Mangamma one dated 1680 by the Channu chief Rangappa Kalakatola Vadayari one dated 1699 by Uttama Rangappa Kalakatola Vadayari one dated 1746 by the Ariyalur chief Vijayavoppula Malava Raya one dated 1774 by a chief named Soma Raja and one dated 1678 by an individual named Kumarayyan These records give us an idea of the esteem in which the *swamis* of the *matha* were held by the rulers chiefs and other people all over Southern India

The spiritual succession of the *swamis* of the *matha* as given in the records is as follows —

Vagisa Ramachandra (1) Vibudhendra (2) Jitāmītra (3) Raghunandana (4) Surendra (5) Vijayendra (6) Sudhendra (7) Raghavendra (8) Yogiandra (9) Surindra (10) Sumatindra

(11) Upēndra, (12) Vādīndra, (13) Vasudhēndra and (14) Varadēndra. The dates recorded for some of the *svāmis* are 1490 for (1), 1513 for (4), 1575, 1580 and 1614 for (5), 1576 for (6), 1663 for (7), 1679 for (8), 1698 and 1699 for (10), 1746 for (13), and 1774 for (14). It is satisfactory to note that the succession list given above agrees in every respect with the one published in the *Satkatha*, but the dates differ, especially those assigned to the earlier *svāmis*. For instance, the date given for (1) and the origin of the *matha* is 1376, more than a hundred years before the date (1490) given in the inscription, the date given for the accession of (6), 1595, appears to be too late by nearly 20 years, while that given for that of (5), 1539, appears, on the other hand, to be too early by about the same number of years. Many of the *svāmis* appear to have been voluminous authors of works on the *Dvaita* philosophy and of commentaries. One of the grants, dated 1580, gives the interesting information that Vijayīndra, Appayyadikshita and Tātāchārya used to meet together at the court of the Tanjore chief Chavappa and enter into a debate about the merits of their respective schools of philosophy. Vijayīndra is said to have vanquished an Ayya at Kumbakonam and to have taken possession of his *matha*. He wrote 104 works and died at Kumbakonam. Rāghavēndra studied under Sudhīndra at Kumbakonam. He died at Mantrālaya (Manchal) in the Bellary District. A grant in his favour, dated in 1577 A. D., will be found referred to in *E. I. XII*, 340. Pilgrims from several parts of India go to Mantrālaya to worship his *brindāvana* or tomb there. A car festival also takes place there in the month of Śrāvana every year. The place is held very sacred by the Mādhvas.

The *matha* library contains a large number of paper and palm-leaf manuscripts. The manuscripts contain several unpublished works dealing mostly with religion and the *Dvaita* school of philosophy. There are also works bearing on Logic, Grammar, Mīmāṃsa, Vēdic ritual and poetics, besides several dramas, *Sthala-purānas* and a large number of commentaries on the *Vēdas*, the *Upanishads*, the *Bhagavadgīta* and several standard works by distinguished authors of the *Dvaita* school. Among what appear to be rare works may be mentioned *Nyāya-mukura* by Vijayīndra (16th century), *Nyāyachampakamālaka*, *Sārādāgama*, *Sāhityasāmānya*, *Chandrikādushanabhūshana*

by *Sujanendra* and *Gita bhashyatnakosa* by *Sumatindra* (17th century)

About a mile from Nanjangud is a fine bungalow attached to the Mysore Residency near to which is a rude stone bridge across the Kabbani, constructed about 120 years ago by Deva Raj the Dalavayi of Mysore

There is a new Library called the Sri Krishnarnajendra Public Library which is resorted to by the public The town is supplied with drinking water by means of a recently erected pumping plant water being conveyed through pipes

The following table gives the income and expenditure of the Municipality for the years 1921 22 and 1922 23 —

Year	Income	Expenditure
19 1-19	18 167	18 180
19 ° 1923	20 307	4 778

Narasimangalam —A villoge in the Chamarajnagar Taluk Population 99 Narasi
mangalam

The ruins of an old Ramesvara temple here show that it was a very massive building of blackstone The *linga* and pillars are of unusual diameter There is a fine seated figure of Parasu Rama larger than life on one side within and a praportionate Ganesa on the apposite side But the whala placa has been purposely destroyed and mutilated images are lying about all round. A *vimana* seems to have been put on the temple in later times on which were stucco figures life size of celestial nymphs etc in various attitudes and it must have presented a rather lively appearance

Nerale —A village in Nannjangud Taluk Population 1 859 Nerale

The Virabhadra temple at this place has a four armed figure about 4½ feet high of the god with the usual attributes the shield resting on the cut off head of a demon In the *navaranga* is kept a *Nandi lolu* or Nandi pole about 20 feet long consisting of a bambao pole on which are strung alternately 12 each of what are called *harades* (protuberant pieces) and *chandragodas* (discs)

with a large *chandragoda* at the top and a pavilion containing a Nandi at the bottom, all made of brass. The village is named *Niruli* in the inscriptions. A number of *sanads* are in the possession of Chennabasavadēvaru, a descendant of Chikkayya, the builder of the *chatra* or choultry known as Chikkayyana *chatra* near Nanjangud. Chikkayya was a contemporary of Haidar. He built, besides the choultry, a temple and a *matha*, making endowments for the upkeep of all. Of the *sanads* examined, 3 were issued by the Mysore king Krishna-Rāja-Wodeyar II, 2 by Haidar and 1 by Kalale Nanja-Rāja.

Nidugatta

Nidugatta. A village in the Mandya taluk, 18 miles north-east of the kasba, on the Bangalore-Mysore road.

A large fair is held here on Wednesday every week, attended by about 2,000 people.

Nugu

Nugu. Also called the Bhrigu, an affluent of the Kabbani. It rises in Wainād and, entering the Mysore District in the south-west of the Heggaddevankote taluk, runs in a northerly direction, joining the Kabbani near the village Hampapura on the Mysore-Manantody road. It is dammed by the Lakshmanpura *anicut*, from which issues a channel of the same name, 5 miles in length. The cultivation under the channel is of small extent, 297 acres, in consequence of the jungle surrounding. The revenue obtained amounts to Rs 1,401. Gold dust in small quantities has been occasionally found in the bed of the stream, but never sufficient to repay the trouble of searching for it. It is supposed to be washed down from the source of the river in the Nilambur hills in Malabar.

Paduvalapatna

Paduvalapatna. A village in the Nagamangala Taluk. Population 602.

About 2 miles to the west of this place is a huge boulder known as *Pāndavara-kallu*, so called, because, according to tradition, the Pāndavas lived there for some time during their exile. On the under surface of the boulder are written in *chunam*, in characters about 162 years old, 2 inscriptions stating curiously enough that Rāmānujāchārya performed penance there.

Palagrahara —A village in Nagamangala Taluk Popu 1 alagrahara
lation 505

Situated at the foot of a hill known as Kotchetta on whose summit is a large temple of Srinivasa. Here is a temple dedicated to Nacheharamma or Lakshmi, the object of worship in it being merely a stone *brindavana*. The *utsava vigraha* however, is a standing figure about 2 feet high with 4 hands two of them holding lotuses and the other two being in the *abhaya* and *varada* attitudes. The village is likened to the far famed Tiruchchanur (at Tirupati) where there is a temple of Lakshmi under the name of Alarmal mangai nachehiyar, the consort of Srinivasa on the Tirupati hill.

Palhalli —A village in Seringapatam Taluk on the right 1 alhalli
bank of the Cauvery 3 miles west of Seringapatam on the Seringapatam Mercara road. Head quarters of the Palhalli hobli. Till 1871 it was the *kasba* of the then Mysore Ashtagrama Taluk. Population 1791

It used to be well known for the now abandoned factory of the Ashtagram Sugar Works. The factory was established in 1874 by private enterprise. It was closed about 1891 on the death of the proprietors. Jaggery produced by the ryots from the sugar-cane and from the date palm was here brought and refined into sugar on a large scale. Prizes medals and other honours were awarded to the produce of the Works at the Universal Exhibitions of London Paris etc. The factory had while in operation an important influence on cultivation in the neighbourhood especially of wet lands.

Between the 80th and 82nd mile stones from Palhalli are a few European tombstones going back to 1799 the year of the last siege of Seringapatam.

Paschimavahini —A sacred spot on the Cauvery adjoining 1 aschima
Seringapatam on the south west and a railway station vahini
The river here makes a bend to the west whence the name *Paschuma Vahini* the western stream sometimes shortened into *Pachi-van*. The royal bathing ghat of the Mysore

Rājas is here, together with many other bathing ghats. The Bangāraddi dam is on this stream, and gives rise to the channel of the same name, which waters the island of Seringapatam (See Seringapatam Taluk)

Periya-
pattana

Periyapattana A town situated in 12° 21' N. Lat , 76° 9' E. Long , on the Mysore-Mercara road, 13 miles west by north of Hunsur. Formerly the head-quarters of the Taluk which bore its name, now called Hunsur Taluk Population 3,404. A Municipality.

According to tradition, the place was visited in the mythological ages by Agastya, the first Brāhman teacher who crossed the Vindhya mountains Its ancient name was Singapattana, and here Karikala Chōla Rāja is stated to have formed a tank and erected a temple of Mallikārjunēsvara. From inscriptions it appears that the place was one of the principal towns in the territory of the Changālva kings of Nanjarāyapattana (near Fraserpet in Coorg) They submitted to the Chōla kings, and were thence designated Kulōttunga-Chōla-Changālvas They claim to be descended from an original Changālva who was victorious over king Bijjala and assumed his titles As Bijjala, the Kalachurya king, reigned from 1156 to 1167, this must be the period of Changālva In his line was descended Nāga, whose son was Ranga, whose son was Piriya, whose sons were Nanja and Mahadera, the former on the throne in 1521 Nanja's son was Nanjunda, his son Srikantha, his sons Vira (1559 and 1567), and Piriya (1586 and 1589). Nanjunda Arasu, tradition says, passing that way to a marriage at Hanagod, was led, by the circumstance of a hare starting up and biting the heels of his horse, which indicated *gandu bhumu* or male soil, to erect a mud fort there But it was Piriya-Rāja who replaced the mud fort by one of stone, established the *pēte*, and called the town after himself—Piriya-pattana Another Nanja-Rāja followed, whose son, Rudra Gana or Piriya, was in power between 1597 and 1612 His son, Vira-Rāja, was on the throne in 1615, and during his reign the place was besieged for one year by Kanthirava Narasa-Rāja of Mysore At last, when the fort was assaulted, Vira-Rāja, putting all his family and children to death, died fighting his enemies During the reign of Tīpu, Piriya-pattana witnessed

several conflicts between the Coorgs and the troops of Tipu and the Vira Raja or Raja of Coorg was confined within the fort for four years. On the approach of General Abercromby's army the houses of Perijapatna were destroyed and the fort was rendered useless to the enemy.

Owing to its position the town is chiefly inhabited by traders who export commodities such as cotton and tobacco to Coorg Cannanore etc. The large stone fort is in a ruinous condition. It was formerly infested by tigers and even now it is said that cheetahs are occasionally found there. A pack of hounds was long maintained in the neighbourhood by Mr Murray Aynsley and regularly hunted by planters from Coorg and other gentlemen.

Municipal Income and Expenditure

Year *	Income	Expenditure
1911-12	209	381
1912-13	504	

Ramasamudra—A Municipal town two miles east of Chamarajnagar. Population 1751. Near to this are the ruins of an extensive city of antiquity whose name according to tradition was Manipur. Ramasamudra

Municipal Funds	Income	Expenditure
1911-12	2350	1675
1912-13	1688	1996

Saligrama—A town in Yedatore Taluk on the north bank of the Cauvery, 12 miles north west of Yedatore and a Municipality. Saligrama

Population in 1911	Males	Females	Total
Hindus	1652	1615	3267
Muslims	146	117	263
Jains	190	189	379
Total	1988	1921	3909

It is esteemed sacred by the followers of Vishnu on account of its having been the residence of Śrī Rāmānujāchāryār. There is also a considerable Jain population. At one time, country paper used to be manufactured here.

Municipal Receipts and Expenditure.

Year	Income	Expenditure
1921-1922	3,173	2,308
1922-1923	3,771	3,100

Santhemarahalli

Santhemarahalli. Head-quarters of the hobli of the same name. Population 994. On Tuesdays a large fair is held here, when commercial transactions to the extent of nearly one lakh of rupees take place.

Sargur

Sargur. A town situated in 12° N. Lat., 76° 28' E. Long., on the right bank of the Kabbani, 36 miles south-west of Mysore. A place of trade and a Municipality. From 1864 to 1886 it was the head-quarters of the Heggaddevankote Taluk.

Population in 1921	Males	Females	Total
Hindus	1,060	1,004	2,064
Muhammadans	47	30	77
Jains	54	61	115
Animists	7	2	9

There is nothing of special interest connected with Sargur. Its selection for the chief town was due to its open situation, free of the dense forests which cover most of the Taluk and its being therefore more healthy.

1911-1912	1,512	1,035
1912-1913	1,450	1,040

Sasalu —A village in Krishnarajpete Taluk Population Sasalu 565

Is a place of sanctity to Lingayats and noted in their literature as the place where one of the Saiva devotees named Bhairavaraja lived and whence he went to Kailasa with his mortal body. There are several Kannada works which relate the story of Bhairavaraja in prose and verse. The Somesvara temple in the village has in the *nataranga* figures of Ādi setti who is said to have built the Sambhulinga temple to the south east of the village and his guru Ravanaradhya. There are likewise figures of Veggani Honnamma and Hala Somesvara. There is a pond known as Majjanadakola a dip in which is said to cure all kinds of cutaneous diseases. It appears that persons bitten by snakes are brought from long distances to the Somesvara temple and return cured by the *prasada* (sacred food, water, ashes, etc.) of the god, provided that they have not been previously treated with drugs or charms. The Sambhulinga temple referred to above has the old inscription *Krishnarajpete* 62 of Vikhavardhana's reign which has been found on examination to be dated in the cyclical year *Plava* (1121) and not *Pramadi*. It is said that for the *abhishikha* or anointing of Sambhulinga oil expressed by the *pujaris* themselves in the mill near the temple has to be used and that no bulls should be employed for this work but only men of the Lingayat sect. A shrine to the south of the temple has a bull which looks upwards, the reason given for this is that the bull so looked at Bhairavaraja when he was going up to Kailasa.

Seringapatam —A taluk in the east north wards till Seringapatam
1882 called Ashtagram Area 274 square miles Headquarters
51*

at Seringapatam Contains the following hoblis, villages and population.

Total	214	15	155	44	5	1	95,291

Principal
places with
population

Belagola 2018, Kirangur 1448, Palhally 1794, Arakere 1333, Gawanhalli 1621, Kurubara Settahalli 1166, Mahadevapura 1265, Nagunahalli 1088, Hirumarali 1665, Kodyala 1413, Krishnarājasāgara 3399, Seringapatam 7210

The Cauvery runs through the south of the Taluk, from west to east, forming several small islands near Belagola, and lower down, the large one of Seringapatam. The Lōkapāvanī from the north, uniting with a stream from the Mōti Talāb on the west, runs south into the Cauvery off the north-east of the Seringapatam island, under the Kaighatta peak. The country rising gradually on both sides of the Cauvery is naturally fertile, and for some distance from either bank is irrigated by fine channels drawn from the river, which follow the windings of the hills, and as they advance horizontally to the east-ward send off branches to water the intermediate space. Of the *anicut*s or dams which force the

water into the sources of these channels there are five in this Taluk —

(1) The Madad hatti just beyond the border in Krishna rajpete Taluk gives rise to the Chikkadevaraya nara the first channel in the Mysore country 10 or 12 yards wide and 3 or 3½ deep running for 12 miles on the left bank. It is carried over the Lokapavani by means of an aqueduct near the French Rock winds round the Kanakhat a hill passes on to Arakere and terminates in the Banjur tank. (2) The Devaray hatti is close to the former and supplies the Devaray channel on the right bank which is 18 miles long and runs by Palahalli into the Mysore Taluk. (3) From the Balurani dam a mile from Belagola is drawn the Virjanadi channel having a course of 11 miles on the right bank of which 3½ are in this Taluk. (4) The Bangara dodd dam is thrown across the *Pachinoidini* or western stream of the river at Seringapatam. The channel thence drawn is altogether 3 miles long. It is led by an aqueduct over a second stream into the island where it divides into three branches, one entering the fort by an underground duct a second running to the Darya Daulat Bagh and the third to the Lal Bagh near the mausoleum of Haider and Tipu. (5) The Ramaswami dam situated between Arakere on the left bank and Mahadevapura on the right gives rise to two channels which are mostly out of this Taluk—the Ramaswami running for 20 miles on the left bank and the Rajaparameswari running for 21 miles on the right bank. There is also an *anicut* on the Lakshmanathirtha near Yadatore from which an old channel called the Purnasagara Nila passes through the Belagola hobli but this is not now in use. A line of hills runs through the Taluk north from the Cauvery prominent peaks of which are Harihatta (2697 feet) French Rocks (2602 feet) and Yadugiri (3519 feet) at M. Hote.

The soils under the channels are good but of comparatively light order towards the north east there are some poorly populated and wild but not very extensive stretches of country. In the valleys and lowlands away from the channels there is a good deal of very fairly good soil. In addition to the cultivation of rice which is general sugar cane of the kind known as *pattu pattu* is extensively grown especially under the first and third of the channels abovementioned.

This found encouragement from the Ashtagram sugar works when they were in operation. The dry crops are those usual to the country, ragi being the principal, with which are sown avare and haralu. The gardens vary from those of the first class under channels to such as are merely hand-watered and planted with minor produce.

The revenue settlement was introduced in 1890. The area of the Taluk was thus distributed:

	Acrea
Cultivable (dry 71,082, wet, 22,232, garden 2,600)	95,911
Uncultivable (Roads, tanks, etc.)	61,117
Inām villages 16,065, Kāvals, State	17,627
Forest, 1,562	
Total	1,74,988

The unoccupied area was 4,585 acres. The total Revenue demand for 1922-23 was Rs 2,33,858 and for 1923-24 was Rs 2,74,726.

The Bangalore-Mysore Railway runs through the middle of the Taluk from east to south, with stations at French Rocks, Seringapatam, and Paschima Vāhini. The trunk road is alongside the railway, with the one to Coorg going off to the west from Paschima Vāhini. There are also roads from Seringapatam, north to French Rocks and Nagamangala, with a branch to Krishnarajpete and another to Melkote with continuation to the same place, and one south-east to Bannur. There is also a road from Lingarajchattru west through French Rocks to Kannambādi (Kishnūnājasāgara).

In the earliest ages Gaṭituna rishi is related to have worshipped the Ranganāthaswami whose temple is the principal Hindu building in the fort and to have done penance in this the western or Paṇḍura Ranganātha kṣhetra at Śrīraṅgam near Trichinopoly. The temples of Ranganāthaswami on the three islands of Śrīraṅapatam, Śivāśinudram and Śrīraṅgam are also called respectively those of Ādi Rāṅga, Madhya Rāṅga and Antya Rāṅga or the Rāṅga of the beginning, the middle and the end. The Gaṭituna kṣhetra is a small island to the west of Śrīraṅapatam where the river divides. Under two large boulders on the north side of it is what is called the right cave, now closed up. Opposite on the north bank of the river were found old Gaṅga inscriptions of the 9th century referring to the Kālābappu hill at Śrīvāsa Belgola and describing its summit as marked by the foot prints of the munis Bhadrabahu and Chandra Gupta.

In A.D. 894 during the reign of the Canḍa sovereigns a person named Tirumalaiva appears to have founded on the island then entirely overrun with jungle, two temples one of Ranganātha and a smaller one of Tirumala Deva enclosing them with a wall and to have called the place Śrī Rāṅga pura or pattana (J R I S VIII 6 M J I S XIV 13). Subsequently about 1117 A.D., Ramanujacharya the celebrated apostle of the Vaiṣṇavite sect on fleeing from Dravida to avoid a confession of faith prescribed by the Chola Raja to be made by all his subjects the object of which was to establish the superiority of Śiva over Viṣṇu took refuge in the Mysore country where he succeeded in converting from the Jain faith the powerful Hoysala king Bitti Dēva thenceforth known as Viṣṇuvardhana. This royal

convert conferred on his apostle and his followers the tract of country on each side of the river Cauvery at Seringapatam, known by the name of Ashtagrama or eight town-ships over which he appointed his own officers under the ancient designations of Prabhus and Hebbārs. Apart from tradition, there is reason to believe that the original town of Seringapatam was built by Udayāditya, brother of Vishnuvardhana, in 1120 A D (*M A R* 1917, page 15)

Origin of the
fort described

In 1454, Timmanna, a Hebbār descended from one of these, lord of Nāgamangala, obtained, by a visit to Vijayanagar, the Government of the district with the title of *Dannāyak*, and permission to erect a fort at Srirangapattana. This he did with the aid of a hidden treasure he had discovered, and enlarged the temple of Ranganātha, making use of materials obtained from the demolition of 101 Jain temples at Kalasvādī, a town five miles to the south. His descendants held the government until in 1495 Seringapatam passed into the direct possession of the Vijayanagar kings. For we learn from inscriptions that Narasa, the founder at that time of the second Vijayanagar dynasty, "quickly damming up the Kāveri when in full flood, crossed over and captured the enemy (unnamed) alive in battle. Taking possession of their kingdom he made the ancient Srirangapattana his own." The place was probably recognized as too important to remain in the hands of a nominal feudatory. It was eventually administered in the name of the Vijayanagar sovereigns by a viceroy known as the *Srī-Ranga-Rāya*. Tirumala-Rāja, the last of these Rāyalu, was a relative of the Royal family.

We have elsewhere seen how in 1610 Tirumala Rāja, worn out with age and disease, surrendered his power to Rāja Wodeyar, the rising ruler of Mysore. There is a halo of mystery surrounding this transaction, and some authorities maintain that the viceroy intended his sway to descend to his kinsman the Rāja of Ummattur, but the probability is that, foreseeing his inevitable subjugation by Rāja Wodeyar, he made a virtue of necessity in retiring voluntarily. Thenceforth Seringapatam became the capital of the Rājas of Mysore, and continued to be the seat of government under the Muhammadan dynasty until its capture by the British in 1799.

But in the interval Seringapatam had been several times besieged, particulars of which will be found in Vol II of this

Gacecer. In 1631 it was besieged by Rindulha Khan and the
 Bijapur forces which were repulsed with great slaughter by
 Harthirava Naraya Raja later in the same reign of Sivappa
 Nayak of Belur, when the invaders were again driven off.
 But the king thought it prudent in 1651 to strengthen the
 fort and to stock it with provisions and stores to enable it
 to stand a prolonged siege. In 1673 it was again besieged by
 the Mahrattas when the bulk of the army was absent engaged
 in the siege of Trichiropoly. But their attempt was also foiled
 and the enemy suffered a crushing defeat. In 1732 the Nawab
 of Arcot sent a powerful army against Seringapatam but it was
 met a half-way near Chamrajatra and driven in confusion
 before the Ghat. In 1755 when most of the forces were again
 absent at Trichiropoly the Subadar of the Deccan besieged
 the fortress with the aid of a French force under Bussy.
 The latter was about to lift the assault against the north
 east angle when the enemy was bought off for 50 lakhs.
 The treasury being empty one third was raised on the plate
 and jewels of the Hindu temples and the property and
 ornaments of the Raja and for the remainder bills were given
 which however, were never redeemed. In 1767 by the Mahrattas
 under Balaji Rao assisted by a European force the place was
 reduced to extremity and a compromise was made with the
 enemy for 32 lakhs and as only 5 could be raised in cash 11
 Taluks were pledged for the payment of the rest. In 1769 the
 Mahrattas appeared in greater force under Gopal Hari and
 the defence was entrusted to Haidar Ali now risen to high
 command. After various successes he compelled the enemy
 to give up the pledged Taluks on payment of Rs. 32 lakhs in
 satisfaction of all demands. By a levy on all the public
 servants and wealthy people 10 lakhs were raised and for the
 rest the bankers found the money on the personal security of
 Haidar in consideration of the restored Taluks being placed
 under his direct management. Though not actually besieged
 Seringapatam was taken possession of in June 1761 by Haidar
 in consequence of the plots formed by the palace and the Hindu
 ministers to get rid of him and his usurpation was from this
 time complete. The next attack on the fortress was in March
 1771 by the Mahrattas under Tryambak Rao after the dis-
 astrous defeat they had inflicted on Haidar at Chunkuruli. They
 blockaded Seringapatam for no less than 15 months when a

treaty was concluded on payment of Rs 15 lakhs and the surrender of seven Taluks in the east and north as security for Rs 15 lakhs more

Sieges of
Seringapa-
tam, 1792 &
1799

This brings us to the time of the two memorable sieges by the British in 1792 and 1799, in their wars against Tipu Sultān. On the former occasion the British army was commanded by Lord Cornwallis, the Governor-General. The first attempt against Seringapatam was made in 1791, but owing to the failure of supplies and the great sickness that broke out among men and cattle on the bursting of the monsoon, it was found necessary to bury the battering guns and retire to Bangalore, which was done by the route of Mēlkōte, Nagamangala and Magadi. The operations against Seringapatam were resumed early in 1792, every provision having in the interval been carefully made for the success of the enterprise. The army arrived in sight of the fortress on the 16th of February, and that very night were carried out the masterly operations, led by Lord Cornwallis in person, by which the whole of Tipu's force was not only driven from the north of the river, but the British gained a firm position on the island itself, occupying Shahar Ganjam and all the east, including the Darya Daulat Bagh.

Major
Dirom—
Description of
Seringapa-
tam, 1792

The following is a description of the place at that time by Major Dirom, who was a Staff Officer with the army

"The fort and outworks occupy about a mile of the west end of the island, and the Lal Bagh or garden about the same portion of the east end. The whole space between the fort and the Lal Bagh, except a small inclosure, called the Daulat Bagh, on the north bank near the fort, was filled, before the war, with houses, and formed an extensive suburb, of which the pettah of Shahar Ganjam is the only remaining part, the rest having been destroyed by Tipu to make room for batteries to defend the island, and to form an esplanade to the fort. This pettah or town of modern structure, built on the middle and highest part of the island, is about half a mile square, divided into regular cross streets, all wide, shaded on each side by trees and full of good houses. It is surrounded by a strong mud wall

and seemed to have been preserved for the accommodation of bazaar people and merchants and for the convenience of troops stationed in that part of the island for its defence. A little way to the eastward of the pettah is the entrance into the great garden or Lal Bagh. It was laid out in regular shady walks of large cypress trees and full of fruit trees, flowers and vegetables of every description. The fort thus situated on the west end of the island is distinguished by its white walls, regular outworks, magnificent buildings and ancient Hindu pagodas contrasted with the more lofty and splendid monuments lately raised in honour of the Muhammadan faith. The Lal Bagh which occupies the east end of the island, possessing all the beauty and convenience of a country retirement is dignified by the mausoleum of Haider and a superb new palace built by Tipu. To these add the idea of an extensive suburb or town which filled the middle space between the fort and the garden full of wealthy industrious inhabitants and it will be readily allowed that this insulated metropolis must have been the richest most convenient and beautiful spot possessed in the present age by any native prince in India.

After an examination of the defences it was determined to attack the fortress on its northern face and in case of necessity it seemed possible by repairing an old dam or embankment on the west to throw the water of the north branch of the river entirely into the other branch. The siege was pressed with vigour and Tipu on his side was strenuously engaged night and day in strengthening the defences on the north side, and impeding the British operations by all the means in his power. But fortune was against him and on the 23rd of February he was forced to agree to the terms proposed by Lord Cornwallis—namely the surrender of half his dominions the payment of three crores and thirty lakhs of rupees the release of all prisoners detained from the time of Haider Ali and the delivery of two of his sons as hostages.

The following is a more detailed account of the first siege —

The action was begun by Colonel Maxwell who stormed and carried to a height where an advance party commanded by Kummar ul Deen was posted. On seeing this the main body

An account of the first siege by the British

afforded abundance of materials for the siege and our people began to prepare them with the utmost alacrity. On the night of the 18th the trenches were opened on the north side of the fort and in the meantime Major Dalrymple beat up the enemy's horse camp on the south side of the river in order to draw their attention to that quarter. On the 19th General Abercromby crossed to the south side of the Cauvery.

Tippu now used every exertion to strengthen his defences yet despairing of being able to make any effectual resistance he seriously turned his thoughts to peace and Lord Cornwallis agreed to receive proposals with his proposals. The first meeting was on the 15th a second took place on the 16th and a third on the 19th and a fourth on the 21st. Still the military operations on neither side were suspended and on the 22nd Tippu made an attack on an advanced party of the Bombay army but was repulsed.

By the 1st of March the two breaching batteries one of twenty guns the other of twelve would have been ready to open as well as an enfilading battery of at least ten on the south west side of the fort. Adding to these the cross fire that was to be directed from the island and Sibbald's redoubt with the mortars and howitzers of the train there would have been a fire of fifty pieces of heavy ordnance against the place not to reckon any number of smaller guns that it might have been deemed necessary to employ. Furnaces for heating shot too were prepared so that this extensive fortress filled with houses constructed of combustible materials must almost inevitably have been soon in flames.

But in the general orders issued on the 21st of February the preliminaries of peace were announced and hostilities were directed to cease.

As hostages for the fulfilment of the Treaty Tippu agreed to give his second and third sons. The elder Abdul Kahl was about ten years of age dark complexioned with thick lips a small flattish nose and a long pensive countenance yet graceful in his manner and when the novelties of his situation were off animated in his appearance. The younger Mooza ud Deen was about eight remarkably fair with regular features a small round face large full eyes and a lively countenance. His mother a sister of Burhan ud Deen who was killed at Satyamangalam (Sattimungalam) a beautiful delicate woman died absolutely of fear a few days after the attack of the lines.

On the 26th, about noon, the princes left the fort, mounted on elephants richly caparisoned, seated in silver houdahs, and attended by their father's vakeels. At the tents sent from the fort for their accommodation, and pitched near the mosque redoubt, they were met by Sir John Kennaway, and the vakeels of the Nizam and the Mahratta Chief, also on elephants, who accompanied them to headquarters. The procession was led by several camel *hurcarrahs*, and seven standard bearers, carrying small green flags, suspended from rockets, followed by a hundred pikemen, whose weapons were inlaid with silver. Their guard of 200 sepoy and a party of horse brought up the rear, as they approached the headquarters, the battalion of Bengal sepoy, commanded by Captain Welch, appointed for their guard, formed a street to receive them.

Lord Cornwallis attended by his staff, and some of the principal officers of the army, met the princes at the door of his large tent, as they dismounted from their elephants, and, after embracing them, one in each hand, led them into the tent. When they were seated on each side of his lordship, Gulam Ali, the principal vakeel, addressed him thus: "These children were this morning the sons of the Sultan, my master, their situation is now changed, and they must look up to your lordship as their father." Lord Cornwallis, who had received the boys with the tenderness of a parent, anxiously assured the vakeel, and the princes themselves, that every possible attention should be shown them, every possible care taken of their persons. At this interesting scene the princes appeared in long white muslin gowns, and red turbans. Each had several rows of large pearls round his neck, from which hung an ornament consisting of a ruby and an emerald of considerable size, surrounded by large brilliants, and in his turban a string of valuable pearls. The correctness and propriety of their conduct evinced that they had been bred up with infinite care and taught in their youth to imitate the reserve and politeness of age.

The day following, Lord Cornwallis, attended as before, visited the princes at their tent. Each of them presented his lordship with a fine Persian sword, and in return he gave the elder a fusée, the younger a pair of pistols, of curious workmanship.

Still however, such difficulties and delays arose on the part of Tippu, respecting the final adjustment of the definitive

outwitting him in regard to his route, is described in the historical part of this work. The south-western angle was on this occasion chosen as the point of attack. In spite of Tipu's efforts to dislodge the enemy, especially by a vigorous sally on the 22nd led by his corps of Frenchmen, the works were steadily pushed on. And on the 26th, a night attack, commanded by Colonel Wellesley, the future Duke of Wellington, and followed up the next day, drove Tipu's troops from the last intrenchment they occupied outside the fortress. An incident of this affair was that Colonel Wellesley got separated from his troops and mixed up with the enemy whom he mistook for them and entered the fort along with the enemy before he discovered his mistake, when fortunately he made his escape. The final assault on the 4th of May, the circumstances attending the death of Tipu Sultān, and all the events that followed upon it have been related in Volume II of this *Gazetteer*.

Decline of
Seringa-
patam

By this victory Seringapatam became the property of the British Government, who leased the island to Mysore for a fixed sum of Rs 50,000 a year. Buchanan says the streets in the fort were narrower and more confused than in any place he had seen since leaving Bengal. The generality of the houses were very mean, although many of the chiefs were well lodged after their fashion. Tipu allowed no person to possess property in houses there. He disposed of the dwellings as he thought fit, and on the slightest caprice changed the tenants. The fort was for several years occupied by British troops, and to provide greater space within the walls the innerramparts were thrown down and the inner ditch was filled up in 1800. The course of this ditch may now be traced by the line of tamarind trees planted along it when it was closed up. Seringapatam began rapidly to decline after the close of the war, and its decay was proportionate with the rise of Mysore. The population of the island, estimated by Buchanan to have reached at least 150,000 during the reign of the Sultān, before the expiration of a year had sunk to 32,000. Fever also gradually made its appearance and

necessitated the removal of the troops to Mangalore, where the new Cantonment was formed in 1809. Seringapatam is now notoriously unhealthy for Europeans and also for most Indians; a severe attack of fever is generally the penalty of two or three nights spent in it or its vicinity. It is however, strange that immediately after its occupation by the British when the city is described by Buchanan as 'a sink of miasma' it does not appear to have been insalubrious. The increase in paddy cultivation may partially account for this change of climate but Indians generally attribute it to the destruction of the sweet flag a plant which formerly grew in profusion on the banks of the river and was supposed to possess febrifugic properties.

The population continued still further to decline and was only 12,741 in 1852 falling still lower to 10,591 in 1871. But in 1891 it was again 12,001 and the advent of the railway with stations at the Fort and at Paschimavathi together with improvements introduced by Municipal Administration have in recent years given it a somewhat more prosperous aspect. The railway cuts through the western part of the fort. With this exception the fortifications themselves are comparatively uninjured. On the whole the results of the breaching batteries are far more apparent than the work of time and the fort is still so formidable that a great military authority who visited it about half a century ago pronounced it the second strongest in India.

Although the fort is washed on its northern and western sides by the two branches of the river and before the invention of rifled cannon had the advantage of not being commanded from any immediately adjacent height it is to the ceaseless labour which must have been expended on it that it owes its great strength. The want of science which was apparent in long straight walls, square bastions and glacis steep enough to shelter in assault was compensated for by deep ditches carried through solid granite huge and massive walls and lofty cavaliers.

The principal entrance is as by what is known as the Elephant Gate on the south side. This is not now used the road being carried through a more convenient gateway made to the west.

Description
of the Fort

of it The Elephant Gateway bears an inscription in Persian stating that the foundation of the fort was laid in the year 1219 from the birth of Muhammad, that is of Tipu's Mauludī era, (1791 A D), when Jupiter was in the ascendant, Sagittarius and Libra were rising, Venus in twilight obscured by Jupiter, Mercury in conjunction with Virgo, Mars in Scorpio, the tail of the dragon in Pisces, and Saturn in Aries The influence of these conjunctions was to show that the fort was fully equipped, and by the grace and mercy of God the Creator, would remain permanent, free from all misfortune

At the south-west angle of the fort may be viewed the breach made in 1799, the spot from which the storming party issued on the opposite side of the river being marked by two cannon fixed perpendicularly in the ground at the edge of the stream Within the walls, surrounded by a high enclosure, are the remains of the Musalman palace, now converted into a sandal-wood store, but the greater part was demolished A description of this palace has been given in Vol II as seen by Swartz in 1779, and as seen by Buchanan in 1800 Near the large temple of Śrī-Rangasvāmi, which is close by, are a few mud walls and a sunken granary, the relics of the ancient palace of the Rājās or Viceroys of Seringapatam and of the Rājās of Mysore Of this building Wilks says, that the Sultān, in removing the Rāja's family from it, had intended to destroy it altogether, and gave orders for that purpose, which were afterwards changed It was reported to him that several large apartments were full of books, chiefly of palm-leaf and cuduttums, and he was asked how they were to be disposed of "Transfer them," says he, "to the royal stables as fuel to boil the cooltee (grain on which horses are fed)," and this was accordingly done A small miscellaneous collection was preserved from this destruction by the pious artifice of a Brāhmin, and in the confusion of the final siege, fell into the hands of a British officer Among the historical tracts which this collection contained was the record of a curious inquiry into the state of the family about the year 1716 for the purpose of ascertaining which of the branches had preserved the true blood of the house unpolluted by unworthy connections, when, out of thirty-one branches, thirteen were pronounced to be legitimate, and eighteen were excluded from the privilege of giving wives or successors to the reigning Rāja The enclosure was for some years used as a gun carriage

factory A large mesquo erected by Tipu with two tall minarets which are conspicuous from a great distance is in front of the Mysore gate The spot where Tipu fell is on the north face Having been compelled to abandon the outerrampart he attempted to escape into the inner fort through a narrow archway but the crowd of fugitives from the British troops who had already gained the interior prevented this and he was slain in an open space between the two walls The archway in which he was wounded no longer exists But a wooden door leading into a garden about a 100 yards to the east of the sally port is pointed out as the spot where he was killed

Just outside the fort on the island is the Darya Daulat Bagh or garden of the wealth of the sea a summer palace which was Tipu's favourite retreat from business Its graceful proportions and the arabesque work in rich colours with which it is covered render it very attractive Mr Rees who has travelled much in India and Persia says The lavish decorations which cover every inch of wall from first to last from top to bottom recall the palaces of Ispahan and resemble nothing that I know in India Part of the walls are adorned with pictures in a style of broad caricature representing Colonel Bailhe's defeat at Conjeeveram in 1780 Haider and Tipu as they appeared in public processions and numerous figures of Rajas and Pulegars These representations had been defaced by Tipu prior to the Siege but after the capture of Seringapatam were restored by Colonel Wellesley who occupied the palace for some time They were again allowed to become partially obliterated until Lord Dalhousie during his tour in Mysore caused them to be repainted by an Indian artist who remembered them as they were Although the pictures have therefore twice undergone restoration it is probable that they are faithful prototypes of the original The perspective is very bad and the general effect is grotesque but the artist has succeeded well in caricaturing the expression and attitude of the British soldier and the Frenchmen under Lally must have been taken from the life

Darya Daulat
Bagh

The following extract from Lewin Bowring's *Eastern Experiences* will be read with interest in this connection —

At a short distance from the fort is the Darya Daulat Garden a pleasure house of Tipu Sultan which is covered with grotesque

Lewin Bowring's description of the frescoes at Darya Daulat

frescoes of the battles between him and Colonel Baillie. In the mimic fight, the latter is represented as reclining helplessly in a palankeen, while Tipu, on horseback, is serenely smelling a bouquet of flowers amidst the shooting and stabbing which is going on around him. All kinds of strange combats are depicted, headless bodies, with the heads some inches off, on the ground, being a favourite item, while the guns which have performed the feat are shown, with a stalwart Mysorean holding the port-fire. The French soldiers in Tipu's service are invariably painted with moustaches, while the English have smooth faces, save the traditional mutton-chop whiskers."

Another
description of
the frescoes

The following description is a more recent one and views the Darya Daulat from a slightly different point of view.

Darya Daulat Bungalow is a good specimen of Saracenic architecture, the paintings on the east and west outer walls being a noteworthy feature of the building. On the west wall, to the right of the entrance, are portrayed Haider and Tipu riding at the head of their troops along with their Viziers. Haider has a clean-shaven face, while Tipu is represented as wearing a thin moustache. To the left of the entrance we have a graphic representation of the battle near Conjeevaeram and the defeat of Colonel Baillie. On the east wall are delineated among other scenes several ruling chiefs such as the Rājas of Tanjore and Coorg, the Nawabs of Oudh, Savanur, Arcot and Cuddapah, Medakeri Nāik, Krishna-Rāja-Wodeyar III and the Rām of Chittore.

Lāl Bāgh

At the eastern end of the island towards the south is the Gumbaz or mausoleum which was built by Tipu for his father and in which he also is buried, as well as his mother. It is a handsome square structure surmounted by a dome, with minarets at the angles, and surrounded by a corridor which is supported by pillars of black hornblende. It is somewhat in the fashion of the famous Taj at Agra, but less profusely ornamented and of a poorer design. The interior is painted in lacquer with the tiger stripe adopted by Tipu for military uniforms. The double doors inlaid with ivory were renewed by Lord Dalhousie. Each of the tombs is covered with a handsome pall. The mausoleum is supported at Government expense. A tablet on the tomb of Tipu contains some verses, in which

the following expressions—The light of Islam and the faith left this world. Tipu became a martyr for the faith of Muhammad. The sword was lost. The offspring of Haider was a great martyr—by the process called *Abjad* gave 1213 the date of his death according to the Muhammiadan era of the Hejira. There is a fine picture of this tomb in Home's *Select Views in Mysore*. Not far away from this tomb is the one built in honour of Burhan ud din the brother of one of Tipu's wives who fell at Satyamangalam in the present Coimbatore District when that fortress was taken by Colonel Floyd on 26th August 1790. A short distance from the entrance to the Gumbaz is the tomb of Colonel Baillie erected in 1816 by his nephew Resident at the Court of Lucknow. Of Tipu's palace which stood in the Lal Bagh nothing now remains. Buchanan in 1800 says of it. Though built of mud it possesses a considerable degree of elegance and is the handsomest native building that I have ever seen.

The eastern portion of the island is chiefly occupied by the suburb of Ganjam (See Ganjam).

In and near Seringapatam he buried numerous European Civil and Military officers. The tombstones to be seen are many and attest to its position as a military post from 1799 to 1830. At the Lal Bagh to the east of the entrance to the Gumbaz is a monument to the memory of Colonel William Baillie who died in this fortress on the 13th of November 1782 erected by his nephew Lieut Col John Baillie Resident at the Court of Lucknow A.D. 1816.

European tombstones and monuments.

In the Gumbaz enclosure the oldest tombstones bear date 1799. The monument on the rising ground called the Sahbal Ram Tittu is of some interest. It was erected by the Officers of His Majesty's 12th and 71st Regiments to the memory of Officers who were killed or died during the last siege of Seringapatam. In the Garrison Cemetery, a tomb of some interest is that of Caroline Isabella Scott wife of Lieut Colonel L. G. Scott Commandant Seringapatam who died on the 19th March 1817 (and her child also). This is the Scott with whose name is associated the well known Bungalow in the Fort. We read on her tombstones the following—Her amiable and accomplished manners rendered her respected and esteemed by all who knew her and her premature death was regretted by her more intimate friends.

Mr Rice in his *List of European Tombs and Monuments in Mysore* notes (1906) as follows —“ Colonel Scott, who had thus lost his wife, is said to have returned home one day to find both his daughters dead of cholera Whereupon he fled, no one knows whither The Rāja of Mysore directed that everything in the house should remain as it was, expecting his return The order was strictly carried out, and the deserted bungalow left untouched But the owner never came back and the perishable articles dropped to pieces, mouldering from decay The place has recently been cleaned up, and the old furniture, consisting of large four-poster bedsteads, a voiceless harpsichord, etc , remain in it Scott's bungalow is commemorated in the *Lays of Ind* by Aliph Cheem (Major Yeldham), and visitors to Seringapatam feel a melancholy interest in going to see it Scott was the officer in charge of the Gun Carriage Factory at Seringapatam and Krishna-Rāja-Wodeyar III built the bungalow in which he lived for him ”

In the same Cemetery he buried Hugh Lord of the Madras Civil Service, who died at the Mysore Residency on the 9th April 1829, aged 49 years , Martha, wife of the Rev D Sanderson, the well known Wesleyan Missionary and Kannada lexicographer, who died on 17th May 1829 , Mary Christiana, wife of James A Casamajor, Resident in Mysore from 1825-1834 , and Captain Jonathan Moorhouse, Superintendent of the Gun Carriage Factory at Seringapatam who died on 31st May 1823, aged about 40 years He had served the Honourable East India Company already 22 years

The Garrison Cemetery is full of interest and merits attention The tombstones in it range from 1800 to 1867 long before which Seringapatam ceased to contain any European population In it sleep several officers of the Regiment De Meuron and their kindred Many members of this Regiment lie buried in some of the Madras Cemeteries as well The following account of the Regiment De Meuron is taken from Mr J J Cotton's *List of Tombs* —

The regiment was originally raised at Neuchatel (Switzerland) in 1781 by Charles Daniel Comte de Meuron, died 1806, who entered a Swiss regiment of mairnes in the French service, went through the Seven Years' War, and was present in several sea-fights against the English in West Indian and American waters The regiment's first masters were the Dutch East India Company, under whom they served at the Cape and in Ceylon They then crossed bayonets with the English at the French

defence of Cuddalore in 1782 among the garrison of which was a young Sergeant named Bernadotte the future Marshal of the Empire and King of Sweden and Norway. In 1795 we had De Meuron and his men once more in Ceylon and on the conquest of the island by the English they transferred their allegiance without difficulty to the British Crown. Colonel De Meuron became Brigadier General in command of the troops in Ceylon and his orders were ranked with officers of the King's service. In the following year the regiment was transferred to the Madras establishment and after being in garrison successively at Poonamallee, Arcot and Vellore took part in the operations before Seringapatam where it was brigaded with the 33rd and 13th Foot under Colonel (afterwards Sir) Arthur Wellesley. A journal kept by Lieutenant Charles de Meuron Tribolet gives a graphic account of the campaign. The grenadier and light companies formed part of the storming column. A descriptive panorama of the assault was exhibited in London at the Museum in which Captain Lard (of this regiment) the leader of the forlorn hope figures prominently. After the fall of the fortress the regiment was stationed on the island of Seringapatam and subsequently at French Rocks. In 1806 it left Fort St. George for Europe and after successively garrisoning the Isle of Wight, Guernsey, Sicily and Malta found its way to Canada where it was finally disbanded the year after Waterloo consequent on the reduction of the English army to a peace footing. Eighteen members of the De Meuron family had held commissions in its ranks during the 30 years of its history. The Colonel Commanding was always De Meuron and the Lieutenant Colonel generally one. At the time of its breaking up in 1816 it was composed of members of almost every nationality in Europe.

On an elevated spot to the north west of the fort is the Webb monument which was erected in 1804 to the memory of Josiah Webb Esq. by Dewan Purnaiya a tribute of veneration and respect for splendid talents, unsullied purity and eminent public virtue. Webb monument

Owing to a skirmish here in 1809 between the mutinous force marching from Chitaldrug to Seringapatam and the Mysore troops sent to intercept them the monument acquired the name of *raza lambha* or war pillar by which it has since been known. (See Vol. II.)

The Temples
at Srīnga-
patam

The Ranganātha temple, which is one of the largest in the State, is in the Dravidian style of architecture with a lofty tower or *gōpura* in front. The god Ranganātha is a grand figure reclining on Ādisēsha or lord of serpents. He is said to have been worshipped by the sage Gautama, who had his *āsrama* or hermitage to the north-west on the northern bank of the Cauvery, the locality being known even now as Gautama-kshētra. An image of the sage is kept in the *garbha-griha* or sanctum sanctorum near the feet of the god. According to the *Sthala-purāna*, the god took up his abode here at the request of the river goddess Cauvery. Unlike in some other temples there is neither a lotus springing from the navel of the god nor are there figures of his consorts, Śrī-dēvi and Bhūdēvi, at the feet. There is, however, a seated figure of the goddess Cauvery at the feet with two hands, one of them holding a lotus. In the second *pākāra* or enclosure are small cells enshrining figures of the Ālvārs (Śrī-vaishnava saints), *āchāryas*, etc., the figures, both lithic and metallic, representing the discus of Vishnu, known as Chakra-tālvār, being noteworthy for their fine workmanship. Two pillars in front of the inner entrance are known as *Chaturvimsati* pillars, because on them are sculptured the *chaturvimsati* or 24 *mūrtis* or forms of Vishnu with labels giving their names inscribed below. Several new inscriptions have recently been discovered in the temple. A few found on the silver vessels give us the interesting information that the vessels were gifts from Tīpu Sultān. But the most important of the discoveries here is a Tamil inscription on the base of the outer wall of the *garbha-griha*, which is dated in A D 1210. The earliest of the hitherto known records take us back to about A D 1430. This epigraph, being more than 200 years older, affords valuable evidence of the antiquity of the temple.

The Gangādhārēsvara and Narasimha temples are also large structures in the Dravidian style. In the *navaranga* of the former there is a figure of Ganapati to the right of the inner entrance and figures of Subrahmanya, Saptamātrikah, Nārāyana and Chāmundēsvari to the left. Subrahmanya is represented by two figures, one of them, seated on a peacock, with 12 hands and 6 faces, one of the latter being shown on the back, and the other a small one, standing with four hands on the coils of a serpent sheltered by its ten hoods. We have figures at Halebīd similar to the latter, but the serpent there is shown

as standing at the back forming a canopy with its 7 hoods. At the sides of the *nataranga* entrance are figures of Surya and Chandra the former holding lotus in its two hands and the latter like Surya is flanked by two female figures holding a lotus in one of the hands. Usually the female figures are shown as shooting arrows such being the case with the Surya figures at Halebid and other places. The same is also the case with the figure of Surya set up in the compound of the Maharaja's Chatram in Seringapatam itself. Figures of Chandra are not very common. In the Hoysaleswara temple at Halebid there is a separate Surya shrine and tradition has it that there was a Chandra shrine also corresponding to it to the north. But neither the shrine nor the figure of Chandra is now in existence. The *utsava* *vigraha* or metallic image for taking out in procession of the Gangadhara temple is a very handsome figure of Dakshinamurti. To the left of the shrine in which this image is kept is a large figure of Bhairava. In the adjacent cell is a metallic image of Tandaveswara with a label on the pedestal stating that it was presented by Kalala Nanjaraja. We meet with several similar images in the Siva temples of the State presented by the same individual. In the *prakara* of the temple are kept in a shrine 10 well executed figures of Saiva devotees with their names inscribed on the base. It is worthy of note that the label also gives the caste of the devotee. These figures represent only a few of the well known 63 devotees of Siva known as *Aravattumavar* all the 63 being found in the temples at Nanjaagud and Chamarajaneagar. Along with these figures are kept two figures representing Virabhadra and his consort. Usually these are kept in the *nataranga*. Virabhadra holds in its four hands a shield a sword a bow and an arrow and has a figure of the sheep-headed Daksha at the side. The female figure has also the same attributes. Besides the labels referred to above a few other inscriptions have also been discovered in this temple. In the Narasimha temple the inner veranda running round the outer *prakara* has been pulled down and the slabs used for the bathing *ghat* behind the Maharaja's Chatram. In a shrine to the left in this temple stands a magnificent figure of Kanthirava Narasaraṇa Wodeyar the Mysore king who built the temple. The statue which is about 3½ feet high stands on a high pedestal with folded hands and is richly ornamented. It wears a long robe with a sword shield and dagger on the left

side, large ear-rings and a *vīra pendeya* or hero's badge on the right foot. The figure is beautifully carved and has a life-like majestic appearance. The name of the king is engraved on the pedestal. Another of the shrines contains a pretty good figure of Ambegāl-Krishna or Child Krishna in the attitude of crawling on the hands and knees. Two inscriptions in Grantha characters have been discovered in the temple, one on the pedestal of Vēdāntāchārya and the other on the portion representing a palm-leaf manuscript held in the hand of the same image. It is said that on Tipu dismantling this temple, the images of the god Narasimha and of Kanthīrava Narasarāja Wodeyar were removed to the Ranganātha temple and were again set up in their former places by Krishna Rāja Wodeyar III in A D 1828.

The Ādisvara, Rāma, Kālamma, Ankālamma, Lakshmīnārāyana, Jyōtirmayēśvara, Mūḍlabāgil (i.e., East Gate) Ānjanēya, Nagarēśvara, Janārdana and Māri temples are worthy of note. The first, which is a Jaina *basti*, has a seated figure of Ādinātha, the first Tīrthankara, flanked by his usual Yaksha and Yakshi, viz., Gōmukha and Chakrēśvari. In the *sulḥanasī* or vestibule are placed on stone benches figures of the 24 Tīrthankaras, fine black-stone images about two feet high with canopy, twelve to the right and twelve to the left. In the *navaranga* there is a well carved seated figure, about 5½ feet high with pedestal and canopy, of Dharanēndrayaksha to the right with four hands, sheltered by the fine hoods of a serpent, and a seated figure, about 3½ feet high, of Padmāvatī to the left, also with four hands under a canopy formed by the three hoods of a serpent. Both the figures have the same attributes, namely, a noose, an elephant-goat and a fruit or lotus. In the Rāma temple, which appears to be maintained by the barbers, two inscriptions are to be seen. The Kālamma and Ankālamma temples belong to the goldsmiths. In the former there are two beautifully carved elephants at the sides of the steps leading to the *Kalyāna-mantapa*. In the cell opposite to the main entrance is a *linga* known as Kāmātēśvara, the cell to the left has a small figure of Kālī, while the cell to the right has a fine figure of Lakshmīnārāyana, about four feet high, flanked by his consorts. The last cell also contains a figure of Chandra and, curiously enough, figures of Rāmānujāchārya, Satakōpa or Nammālvār and Visvaksēna, the last three being usually found only in Vishnu temples. In the *navaranga*, there are figures of Ganapati, Subrahmanya Bhairava,

Virabhadra and Venkateswara i.e. Child Krishna with balls of butter in both the hands. In the *prabhavali* are images dedicated to Sūrya Subrahmanya and Sankaramarayana the first and the third with Vaishnava *chakras* at the sides. Subrahmanya as represented here has a blue head and only two hands holding a *chakra* in one of them. Such a figure of Subrahmanya is known as Dandavudhapani (i.e. armed with a staff). The Ankalamma temple has a figure of Bhuravai in the cell opposite the main entrance while the left and right cells enshrine figures of Kali and Ganapati respectively. A few inscriptions are to be seen on the image vessels and door frames of the Ankalamma temple. The Lakshminarayana temple which is a modern structure has three cells in a line enshrining figures of Srinivasa Lakshminarayana and Sitaruna respectively. At the left side are three figures said to represent Narayana setti the builder of the temple and his wives while the figures opposite to these at the right side are said to represent Narayana setti's father and his wives. The Jyotirmay swara temple which is also known as the Dalavayi temple is a large structure though in an unfinished condition. It is said that Dalavayi who began to build this temple died before its completion and that his son who began to build the Nandi mantapa in front also died before finishing it. Being thus a structure of sad memory it appears that the members of the Dalavayi family do not like to visit it though an annual grant is still made for its upkeep. Attached to this temple is the shrine of the Last Gate Anjaneya which is also said to have been built by Dalavayi Doddaiya. The image of Anjaneya which was preserved from mutilation by being immersed in a portion of the Cauvery known as Gaurikada had its temple it appears on the side on which the big mosque now stands.

The big mosque is a fine structure with two lofty minarets. It has five Persian inscriptions one giving A.D. 1787 as the date of its construction and the others containing extracts from the *Koran* and the 99 names of Allah.

Seringapatam
Big Mosque

The island is watered from a canal which is carried across the south branch of the river by an aqueduct constructed by Tipu. It rises a short distance above Seringapatam and irrigates the Darya Daulat Bagh and the garden attached to Haidars.

Wellesley
Bridge.

mausoleum, as well as some rich sugar-cane fields on the island Over the aqueduct is a bridge The bridge across the northern branch was constructed by Pūrnaiya in 1804, and named the Wellesley Bridge in honour of the then Governor-General of India It is an interesting specimen of Indian architecture To the north-west of the fort may be seen the remains of a dam or bridge erected in the time of the viceroys of Vijayanagar

Municipal Funds		1921-22	1922-23
Income		11,561	18,416
Expenditure		9,891	19,975

Shimsha or
Shimshupa

Shimsha or Shimshupa. Also called the Kadaba or Kadamba, and the Maddūr Holē—a tributary of the Cauvery It rises to the south of Dēvarāyadurga in Tumkur District, and flowing southwards through that District enters the Mysore District in the north-east of Mandya Taluk Pursuing a south-east course, it runs through Malvali Taluk and enters the Cauvery a few miles below the Falls at Sivasamudram About nine miles north of Maddur is an *anicut*, rebuilt some years ago by the Public Works Department, of cut stone. From this dam is drawn the Maddur Ane channel on the right bank, which is 12 miles in length, and feeding the large Maddur tank, branches into four small channels, the Chamenhalli ($2\frac{3}{4}$ miles), Bairan (2 miles), Vaidyanāthpūr ($3\frac{1}{4}$ miles) and Kemman ($5\frac{1}{2}$ miles) Much mulberry is cultivated under these channels for the support of silkworms The river is spanned near Maddur by a fine brick bridge of seven arches, constructed in 1850 for the Bangalore-Mysore road, and now used also for the Mysore State Railway

The valley of the Shimsha, under the Ganga kings, formed the province of Chikka Gangavādi, with its chief town at Honganur (Channapatna Taluk)

ndha-
hatta

Sindhaghatta A village five miles from Krishnarajpet, situated in Santebāchahalli Hobli Population 2,065

A centre for weavers in silk. Two miles from the village here is Narayanidurga Hill which is a Trigonometrical station.

Sivasamudram—Though over the present boundary [no Sivasamu
[Mysore, this romantic spot is intimately associated with dram
that country. It is on the south border of the Malwally
aluk, connected with the Railway and Bangalore Seringa
atam trunk road by a cross road from Maddur through
Malwally, 30 miles in length. The Canvery here branches
into two streams, each of which makes a descent of about 200
feet in a succession of picturesque rapids and waterfalls.
The principal island embraced within these torrents called
Leggura, but more generally known by the name of Siva
amudram or Sivanasamudram (sea of Siva) the ancient
city of which a few vestiges are strewn around—is about
1 mile long by $\frac{1}{2}$ of a mile broad.

Of its former history little is known but the modern city
appears to have been founded at the beginning of the 16th
century by Ganga Raja a representative probably of the Ganga
ranga whose sovereignty in Orissa then came to an end. An
inscription of 1604 records a grant to the temple by the chief of
Ladnaad. Through precisely the same mistake that occurred
in the foundation of Chik Ballapur (Kolar District) the work
was commenced before the appointed signal announced the
lucky moment and was therefore doomed to continue for only
three generations. Ganga Raja after a prosperous reign was
succeeded by his son Nandi Raja who to atone for a ceremonial
offence leaped into the cataract at Gogana Chukki on horse
back with his wife. His son Ganga Raja the second enlarged
the city greatly and lived with much splendour. He had two
daughters, whom he gave in marriage to the two chief Palegars
in the neighbourhood. One was married to the Raja of
Kilimale a place now in ruins about 12 miles from Satyagala.
The other daughter was married to the Raja of Nagarahero
3 miles east from Maddur. These marriages were very unhappy
for the pride of the ladies gave their husbands constant disgust.
They were continually upbraided for not living in equal splen
dour with their father-in-law and at length having consulted

together, they determined to humble their wives, by showing that their power was superior to that of Ganga-Rāja. Having assembled all their forces, they besieged Sivasamudra, but for a time had very little success.

The siege had continued twelve years without their having been able to penetrate into the island, when the two Rājas found means to corrupt the *Dalavāyi* or minister of Ganga-Rāja. This traitor removed the guards from the only ford, and thus permitted the enemy to surprise the place, while he endeavoured to engage his master's attention at the game of chess. The shouts of the soldiery at length reaching his ears, the prince started up from the game. The *Dalavāyi*, who wished him to fall alive into the hands of his sons-in-law, endeavoured to persuade him that the noise arose merely from children at play, but the Rāja, having drawn his sword, first killed all his women and children, and then, rushing into the midst of his enemies, fought until he procured an honourable death. The sons-in-law, on seeing this, were struck with horror, and immediately threw themselves into the cataract at Gagana Chukki, and their example was followed by their wives, whose arrogance had been the cause of such disasters.

Jagadēva-Rāyal of Channapatna, and Srī-Ranga-Rāja of Talkād, the two most powerful of the neighbouring chiefs, then came, and removed all the people and wealth of the place. During the British march upon Seringapatam in 1791, Tīpu Sultān, having destroyed every means of forage between Bangalore and the capital, drove all the inhabitants and cattle into the island of Sivasamudram, presenting a silent and desolate country to the advance of the army of Lord Cornwallis.

The island was overgrown with dense jungle, and the old bridges which connected it with the mainland on both sides had become impassable, when in 1818 their repair was undertaken by Ramaswami Mudaliar, a confidential servant of the Resident of Mysore. He expended several thousand pounds on the work and was rewarded by the British Government with the title of *Janōpakāra Kāmakarta* or public benefactor. At the same time he was invested with a *jāhgīr* composed of five villages from the British Government, yielding a revenue of Rs 8,000 a year, and seven villages from the Mysore State, yielding Rs 9,000 a year. The bridges are built of hewn stone pillars, connected by stone girders founded on the rocky bed

of the stream and though rude are good specimens of Indian construction. A hungalow was erected by the Jahgirdar near the road connecting the two bridge for the accommodation of European visitors. He published an account of the place with maps in the *M J L S* 183

Gagana Chukki — On the western branch of the river which forms the boundary between Mysore and Coimbatore are the Gagana Chukki or Gangana Chukki falls about two miles from the hungalow. The approach is by a steep path leading down from the tomb of Pir Ghair a Muhammadan saint. The stream here dividing so as to form a small island called Ittikur (called *Nellagana-tutu* by Buchanan) the parted waters dash with deafening roar over vast boulders of rock in a cloud of foam to unite again in the deep pool below and with such violence that the column of vapour is at times visible from Satyagala. I have never says Buchanan seen any cataract that for grandeur could be compared with this

Bar Chukki — Grand and impressive as is the headlong turmoil of the waters in Gagana Chukki the other falls about a mile distant on the eastern branch of the river being more easily viewed are generally more enjoyed. These are called the Bhar or Bar Chukki and display a great volume of water which in the rainy season pours over the hillside in an unbroken sheet a quarter of a mile broad. During the dry months it separates into several distinct falls of great beauty. In the centre is a deep recess in the form of a horse shoe down which the principal stream falls and having been collected into a narrow channel rushes forward with prodigious violence and again falls about 30 feet into a capacious basin at the foot of the precipice. Hurrying on northwards through wild and narrow gorges the two streams unite again on the north east of the island and continue their course to the east

The following is Lewin Bowring's description of the Falls —

The northern cataract called the Gangana Chukki is about two miles from the house and is approached by a steep path leading down from the tomb of Pir Ghair a Mussalman saint who is supposed to have disappeared mysteriously from view

at this place On reaching a point about half-way down the fall, one sees the stream rushing precipitately over the face of a tremendous abyss, and dashing over vast boulders of rock in a cloud of foam, till it hurls itself into a deep pool below, 300 feet from the summit The noise made by the roar of the waters is deafening, and as one's ears are stunned by their loud thunder, so one's sight is blinded by the steam of mist which hides from view the sacred stream, as it rushes furiously forward over great rocks to meet the sister fall below The scenery around is extremely grand, the hills being clothed in dense forest, and the solitude of the spot lending a picturesque charm to its beauties

The southern cataract, called the Bhar Chukki, is perhaps even finer, as a far greater volume of water is seen from the point of observation, at the foot of a flight of difficult steps, which lead down to the stream facing the cataract The fall can be approached from the summit, but is difficult of access, and a lady some years ago lost her footing, on incautiously nearing the verge, and was dashed over the cataract During the rainy season, the river pours over the hillside in an unbroken volume, a quarter of a mile across, but in the dry months it is divided into several distinct falls of great splendour, which the tourist can contemplate at his ease as he discusses his breakfast on the opposite side of the stream The Bhar Chukki is of less height than the Gagana Chukki, and therefore perhaps less imposing, but is certainly more lovely, while the whole locality leaves an indelible impression on the mind of the visitor

The most favourable time for visiting these Falls is during the rainy season, as in the winter months the island is excessively feverish

Near the Mysore end of the west Bridge, is a solitary tombstone going back to 1858 It is in memory of the Rev E J Hardy, a Wesleyan Missionary, who died at this place on November 25, 1858, aged 40 years

The chief temples at this place are the Ranganātha, Sōmēsvara, Vīrabhadra and Māri

The Ranganātha temple is a large structure in the Dravidian style but without a *gōpura* The god, known as Jaganmōhana Ranganātha, is very much smaller in size than the one at Seringapatam The figure of the goddess Cauvery is found

here also. The god is said to have been worshipped by Takshaka the chief of serpents, whose image is kept in the last niche to the right in the *navaranga*. The figure serpentine in the lower portion but human above has four heads—2 folded and 2 holding a discus and a conch and stands on a high pedestal adorned by its own 7 hoods. It is a fine figure about 2½ feet high. There is also a well-carved image of Anjaneya about 4 feet high in the first niche to the right. No inscription is to be seen in the temple. Siva smarak is called *Madhya Ranga* in contradistinction to *Sennagapatam* and *Sirangam* which are respectively known as *Idi Ranga* and *Antya Ranga* all the 3 places on the banks of the Cauvery being provided over by the deity Ranganatha. *Sennagapatam* is also called *Paschima Ranga* as being in the west in relation to the other two places. The *Somavara* temple is also a large structure with a lofty and well-executed *mahadwara*. The latter faces west but the god inside faces east. There is also another plain though lofty *mahadwara* on the east, but this is now walled up. Two *mahadwaras* for the *sanctuary* in front of and behind the god are not very common. The god *Somavara* was the tutelary deity of the *Ummattur* chiefs who had their principal fortress on the island of *Sivasamudram*. In the *navaranga* of this temple are good figures of Ganesa and Subrahmanya to the right and left. The latter stands under a canopy formed by the 7 hoods of a serpent with only 2 hands one of them holding a staff and the other resting on the hip. This is apparently the same as the *Dandayudhapant* of the *Kalanamma* temple at *Sennagapatam*. There are also the figures of *Surya* and *Chandra* at the inner sides of the entrance. The central ceiling panel has a large figure of a fish 4½ feet by 2 feet sculptured on it. In the shrine of the goddess *Vinakshi* is a fine four-handed figure about 4½ feet high with a discus and a conch in two hands the other two being in the boon-conferring and fear-removing attitudes. In a small shrine in the *prākara* is a seated figure in an attitude of meditation with robes a *Rudra* *Viṇa* and what looks like a book for its attributes which perhaps represents *Dakṣināmūrti*. The basement of the *garbhagriha* of the *Sōmēśvara* temple consists of about 30 inscribed stones the characters used being Tamil. The inscriptions are fragmentary which may be taken as evidence of the renovation of that part of the temple with stones brought from other

structures Two of these fragments are printed as *Malvalli* 112 A lofty *mantapa* supported by 4 pillars stands in front of the Ranganātha temple Another *mantapa* at some distance with 12 lofty pillars presents an imposing appearance The English inscription here records the completion of the bridge over the Cauvery in A D 1832 The hill to the west of Sivasamudram is known as Prētanabetta, because, according to tradition, it was here that Rāma offered *pinda* or balls of meal on hearing of his father's death

Somnathpur

Somnathpur An insignificant village on the left bank of the Cauvery in the Tirumakudlu-Narsipur Taluk, 5 miles north of Sosile, noted for the temple of Prasanna Chenna Kēsava This elaborately carved structure is attributed to Jakanāchāri, the famous sculptor and architect of the Hoysala kings, under whom Hindu art in Mysore reached its culmination Though not on the scale of the unfinished temple at Halebīd (Hassan District), the general effect is more pleasing, from the completion of the superstructure, consisting of three pyramidal towers or *Vimāna* surmounting the triple shrine Prasanna Chenna Kēsava occupying the central chapel, Gōpāla, the one to the south, and Janār-dana, the one to the north Round the exterior base are portrayed consecutively, with considerable spirit, the leading incidents in the *Rāmāyana*, *Mahābhārata* and *Bhāgavata*, carved in potstone, the termination of each chapter and section being indicated respectively by a closed or half-closed door The number of separate sculptured images erected upon and around the basement, whose mutilated remains are shown around, was no less than 74

The building, according to an inscription at the entrance, was completed in 1269, by Sōma, a member of the Royal family and a high officer under Hoysala king Narasimha III, who also founded the city which formerly surrounded it Later grants were made by Ballāla III The vestibule is in ruins, and the images generally much damaged

In view of the interest attaching to this temple, the following further description of it may prove useful

The Kesava temple at this place is a splendid example of the Hoysala style of architecture its sculpture being according to Fergusson more perfect than that of the temples at Belur and Halebid. Like the temple at Basarol this is also a *trikutachala* or three-celled temple the chief god Kesava once occupying the cell opposite the entrance and giving his name to the temple. The image of Kesava is however no longer in existence its place is now occupied by an uncouth image of modern make. The north cell has the image of Janardana and the south that of Gopala. Both are beautifully carved though unfortunately a few of the limbs are broken and judging from their workmanship the chief image of Kesava must have been a marvel of the sculptors art. The ceiling panels are every one of them artistically executed. Though there are some perforated screens on both sides of the entrance the interior is very dark. Outside on both sides of the entrance there is a *jagati* or parapet on which beginning from the bottom are sculptured horizontally in succession these six rows—(1) elephants (2) horsemen (3) scroll work (4) Puranic scene (5) small images with intervening turrets and (6) columns with figures between. From the corners on both sides of the entrance where the *jagati* ends begins the row of large images running round the temple on the walls. The rows on the walls are the same as the *s* on the *jagati* so far as the first four are concerned. Above the fourth however we have on the walls (5) a row of *makaras* and (6) a row of swans instead of the rows of small images and columns on the *jagati*. Above the row of swans comes on the walls a row of large images and above this again a row of turrets surmounted by ornamental caves. There are three finely carved towers identical in design and execution over the three cells. But the original *kalasas* which may have disappeared seem to have been replaced by rough ones of modern make which do not fit in with the workmanship of the towers. There is no sculpture of Sala and the tiger as at Basarol. The number of large images on the walls is 194 of which 114 are female and the rest male. Every one of them is mutilated. It is noteworthy that as in the temples at Nuggihalli Halebid and Belur many of the images have the names of the sculptors who executed them engraved at the base. A few names occur also in other rows and likewise on the basement. Altogether 75 such short inscriptions were discovered around the walls

and on the basement, their date being about 1268 A D, the year in which the gods were set up. Among the names of the sculptors may be mentioned Mallitamma (also called Malli in two places), Baleya, Chaudeya, Bamaya, Masantamma, Bharmaya, Nanjaya and Yalamasaya. The first name occurs in 40 places, the 2nd in 6 places, the 3rd in 5, the 4th in 4, the 5th in 3, the 6th in 2, and the 7th and the 8th each in one place. From the above it will be seen that Mallitamma had most to do with the ornamentation of the temple. He is no doubt identical with the Mallitamma who made the images on the north wall of the Narasimha temple at Nuggihalli which was built in 1249 A D. The temple is conserved by the Government as it should be. It stands in a square cloistered courtyard on a raised terrace which is supported at the angles by figures of 12 elephants facing outwards. According to the inscription in the temple, nearly 70 images appear to have been set up in the cells of the veranda around the temples, though no image is now found in any of them. The veranda is in a dilapidated condition, several of the beams being broken and the wall being out of plumb. The *mukha-mantapa* of the temple which was recently in a leaky state has been repaired. The top portions of the outer wall are gone in many places. Being the best existing complete specimen of Hoysala architecture, it has rightly deserved close attention at the hands of the Government.

The Panchalinga and Lakṣmīnarasimha temples are to the east and south-west of the Kēśava temple. The former, mostly in ruins, is a large structure in the Dravidian style built of granite with three towers over three cells standing in a line. The latter, situated a few yards from the bank of the Cauvery, though built in the Hoysala style, is a plain structure without any sculptures. The tower is partly gone and the walls have mostly fallen down. It is referred to in the inscription of the Kēśava temple. The people call it 'Mondusale temple,' because they have a tradition that it was built by a sculptor with a maimed hand (*mondu*).

From the fine inscription (E C III, Tirumakudlu-Narsipur 97) in the entrance porch of the temple, we learn that Sōma or Sōmanātha, a high officer under the Hoysala king Narasimha III (A D 1254-1291), established the village as an *agrahāra*, naming it Sōmanāthapura after himself, and built the Kēśava temple in it in A D 1268. There is also another inscription at

Hanhar (E C VI Davangere 36) which refers to the erection of this temple and gives the same date

The temple is situated in the middle of a court yard about 210 feet by 172 feet, surrounded by an open veranda which contains 64 cells. It stands on a raised terrace about 3 feet high which closely follows the contour of the structure and is supported at the angles by figures of elephants facing outwards. There are two empty pavilions at the sides in front of the entrance the top portions of which are gone. Around the terrace there are besides the elephants mentioned above images representing Vishnu and other gods and goddesses leaning against it. Several of these images and elephants have been removed from their pedestals only 12 each of either class of sculptures being now left. Of the 12 images 8 represent Vishnu 1 Ganapati 1 a Naga and 2 seated goddesses. The temple is as already stated a *trikutachala* or three-celled structure the main cell facing east and the remaining cells which are opposite to each other facing north and south respectively. The three cells are surmounted by three elegantly carved towers which are identical in design and execution. These with their towers are attached to the *nataranga* or middle hall to which again is attached without any partition the *mukha mantapa* or front hall. The front of the temple with the three towers presents an imposing appearance and has often been selected as a model for silver and gold casquets. On both sides of the entrance runs around the front hall a *jagati* or railed parapet on which beginning from the bottom are sculptured horizontally in succession these seven friezes (1) elephants (2) horse men (3) scroll work (4) scenes from the epics and the *Puranas* (5) small images between pilasters (6) delicately carved miniature turrets with intervening figures of lions and (7) a rail divided into panels by double columns containing figures sometimes indelicate between neatly ornamented bands. Above these come pierced stone windows or perforated screens. Most of the figures in the fifth frieze represent Vishnu. A large portion of the rail illustrates the story of *Prnhlada* son of the demon king *Hiranyakasipu* as related in the *Puranas*. From the corners on both sides of the entrance where the railed parapet ends begins in the middle of the outer walls a row of large images with various kinds of ornamental canopies and runs round the remaining portion of the temple. Below this row

of images come six horizontal friezes. The first four of these are identical with those on the railed parapet, but in place of friezes (5), (6) and (7) on the latter, the walls have (5) a frieze of *makaras* or mythological beasts and (6) a frieze of swans. Above the row of large images comes a fine cornice ornamented with bead work, and above this again a row of miniature turrets over single or double pilasters, surmounted by ornamental eaves. The number of large images on the outer walls is 194, of which only 80 are male. Nearly 70 of the latter represent Vishnu. The position of the large images is as follows:— Around the south cell 54, 32 female and 22 male, at the corner between the south and west cells 14, 9 female and 5 male, around the west cell 58, 32 female and 26 male, at the corner between the west and north cells 14, 8 female and 6 male, and around the north cell 54, 33 female and 21 male. The gods and goddesses of the Hindu pantheon represented by the majority of the images are Vishnu and his forms such as Narasimha, Varāha, Hayagrīva, Vēnugōpāla and Paravāsudēva, Brahma, Siva, Ganapati, Indra, Manmatha, Sūrya, Garuda, Lakshmi, Sarasvati and Mahishāsūramardini. A few of the figures worthy of notice are —Garuda bearing on his left shoulder Nārāyana and Lakshmi, Indra seated with his consort Sachī on the elephant Airāvata, dancing Vishnu and Ganapati, dancing Lakshmi and Sarasvati, a four-handed standing figure with the face of a monkey, two of the hands holding a discus and a conch, the other two holding between them what looks like a fruit, a four-handed seated figure with a discus and a conch in two hands, the other two being placed palm over palm almost in the fashion of a Jaina *tīrtan-kara*, and a seated figure with two hands, the right hand holding a *kalasa* or water vessel and the left hand a fruit. Of the 4th frieze from the bottom, which may be called the *Purāṇic* frieze, the portion running round the south cell represents scenes from the *Rāmāyana*, that round the west cell, scenes from the *Bhāgavata-purāṇa*, and that round the north cell, scenes from the *Mahābhārata*.

Each of the three cells consists of a *garbhagriha* or adytum and a *sukhanasi* or vestibule. The chief cell, opposite the entrance, once enshrined an image of the god Kēsava, after whom the temple was named, but the image is, as stated above, no longer in existence. A few modern images are now kept

in the cell. These consist of a seated figure of Lakshminarayana a standing figure of Lakshmana and two seated figures of different sizes representing Lakshmi. The north cell has an image of the god Janardana and the south cell an image of the god Anugopala or Krishna playing on the flute. Both the images are beautifully carved though unfortunately the date of the latter is broken. Judging from the execution the chief image Kesava must have been a piece of exquisite workmanship. It is indeed fortunate that the sculptured circular panel at the top of the inscribed slab in the entrance porch contains miniature representations of all the three images of the temple so that, though the image of Kesava has now disappeared we are in a position to form some idea of its workmanship. The lintels of both the *garbhagriha* and *sukhanasi* doorways of all the three cells are well executed. In the chief cell the lintel of the *garbhagriha* doorway has a seated figure of Vishnu above and an image of Lakshminarayana below with figure of the ten incarnations of Vishnu sculptured round the base and a neatly carved tiny elephant at the left side while that of the *sukhanasi* doorway has a figure of Paravandava above and a figure of Kesava below. The jambs of both the doorways have *devatapalakes* sculptured at the bottom. This cell has two fine niches at the sides which though empty at present once enshrined figures of Ganapati and Mahishasuramardini as evidenced by the figures of these deities prominently sculptured on their towers. The prominence given to the deities in the interior of a temple dedicated to Vishnu deserves notice. This peculiarity has been observed in several Vishnu temples built in the Hoysala style of architecture such as those at Nuggihalli, Javagal, Holo, Narasipur and other places. Though these deities are often represented on the outer walls or pillars no such prominence appears to be given to them in Vishnu temples built in the Dravidian style. The image of Janardana in the north cell about 6 feet high with *prabha* or glory is elegantly carved and stands on a pedestal about 1½ feet high flanked by consorts. It has four hands the upper two holding a discus and a conch and the lower two a lotus and a mace. The *prabha* has the ten *avatars* or incarnations of Vishnu represented on it. The lintel of the *garbhagriha* doorway has a seated figure of Vishnu above and a four handed seated figure below with a discus and a conch in two hands the other two being placed

palm over palm almost in the fashion of a Jaina *tīrtāṅkara* while that of the *sukhanasī* doorway has a figure of Lakshmi-narasimha above and a figure of Vishnu below Vēnugōpāla in the south cell is also a fine figure, about 6 feet high, standing under a *honne* tree (*Terminalia tomentosa*) on a pedestal, about 1½ feet high, flanked by consorts The image has only two hands which play on the flute To the right of the image at the bottom is a small figure representing a cowherd, above this on both sides are some cows represented as eagerly listening to the flute, and above these again to the left are seated figures of sages with folded hands The *prabha* of this image has likewise the ten incarnations of Vishnu sculptured on it The lintel of the *garbhagrīha* doorway has in the upper panel a seated female figure with four hands and in the lower, a seated figure of Vishnu holding a discus, a conch, a water vessel and a fruit. The lintel of the *sukhanasī* doorway has a figure of Lakshmi-nārāyaṇa above and a figure of Vēnugōpāla below The *nava-ranga* has 6 ceiling panels and the front hall, 9 Every one of them is nearly 3 feet deep and very artistically executed, no two of them being similar in design A narrow veranda runs round the front hall whose walls have perforated screens all round In spite of these screens the interior of the temple is very dark The cells in the open veranda surrounding the temple, which are 64 in number, are all empty at present But from the inscription in the temple we learn that they once enshrined 64 deities as detailed below—six deities consisting of Brahma and 5 others, 12 consisting of Kēsava and 11 others, 12 consisting of Hamsa-Nārāyaṇa and 11 others, 10 consisting of the Fish incarnation of Vishnu and 9 others, 12 consisting of Sankarshana and 11 others, and 12 relating to the incarnations of Vishnu' and Krishna

For further details about this temple, see Mr R Narasimhachar's monograph on it in the *Mysore Archaeological Series* (No I)

Sosile

Sosile.—A large village, in Tirumakudlu-Narsipur Taluk, on the left bank of the Cauvery at its confluence with the Kabbani. Head-quarters of the *hobli* of the same name and a municipality Population, 2,246.

This is the head-quarters of the Vyāsarāya *matha* The

Strani has a large number of copper plate grants in his possession. These have been examined by the State Archaeological Department. Fourteen plates containing 12 inscriptions in all have been examined. They are engraved in Tamil Telugu Nagari and Kannaḍa characters. 3 of them recording grants by the Vijayanagar kings 1 by a Nayak of Madura 2 by the Satupatis of Ramnad 1 by a Zamindar of Sivagiri 1 by a chief of Holur and 2 by guilds of merchants. None of the 6 has been published. The two sets of copper plates in the Taluk Treasury T Narasapur 64 and 91 are of some interest. The plates of No 64 which measure $10\frac{1}{2}$ by $5\frac{1}{2}$ are fashioned into rims at the edges to protect the writing. The seal does not bear any figure. The plates of No 91 which measure 3 by $1\frac{1}{4}$ are strung on a ring bearing a seal on which stands to the right an animal looking like an elephant with a raised tail.

Suttur — A village in Nanjangud Taluk. Population 1638 Suttur

This place is called Srotriyur in a Chola inscription of 1032 A.D. and Sotuyur in a Hoysala record of 1169 A.D. The present form of the name occurs in the records of the Vijayanagar period. In 1169 it was the head quarters of Lakmayya general of the Hoysala king, Narasimha I. The Someswara temple is a three-celled Hoysala structure facing east comprising besides the cells a central hall and a front hall. The last which appears to be a later addition was built in 1261 the other portions are apparently older. Here we have a rather rare instance of a Hoysala temple built of granite with a carved tower built of potstone. The main cell has a *linga* and the south cell a good figure of Hanthore the north cell being empty. Harihara about 5 feet high is a fine figure with 4 hands the right upper bearing a trident the left upper a discus the left lower a conch and the right lower in the *abhaya* pose with a rosary. The image is flanked by Parvati and Lakshmi and has on the pedestal the emblems Nandi and Garuda. The *navaranga* pillars though made of granite are elegantly carved. To the left in the *navaranga* is the figure about $3\frac{1}{2}$ feet high of the goddess standing on two mungoses and holding in the upper hands a discus and a conch and in the left lower a fruit the right lower being in the *abhaya* pose with a rosary. The outer walls of the main cell have no figure sculpture but only

pilasters The temple is going to ruin The Nārāyana temple is also a Hoysala building with a brick tower, the *navaranga* and porch being built of granite The god, about $3\frac{1}{2}$ feet high, has no *prabha* The attributes in the upper hands are a discus and a conch, which are quite natural, the lower hands being in the *abhaya* and *varada* attitudes The *garbhagriha* and *sukhanasi* have ceilings of lotus buds surrounded by rows of petals, and their outer walls have pilasters and elegant turrets over double pilasters with a hanging lotus bud between the latter According to the inscription Nanjangud 175 here, the temple was built by Lakmayya, referred to above, in 1169 during the reign of the Hoysala king Narasimha I The god is named Nāga-Kēsava in the epigraph

The temple is in ruins The village has a Lingāyat *matha* which appears to go back to the 15th century, judging from the references made to it in the inscriptions Its *svāmis* were once learned men and authors of some important works One of the more famous *svāmis* of the *matha* was Sivarātri-Odeyar His *gaddige* or tomb together with those of some others is contained in a building to the left of the road from Kupparavalli

Talkād

Talkād. A town of great antiquity, situated in $12^{\circ}11'$ N Lat, $77^{\circ}2'$ E Long, on the left bank of the Cauvery, 28 miles south-east of Mysore It was the head-quarters of the Talkād Taluk until 1868, when the *kasba* was established at Tirumakudlu-Narsipur, 10 miles to the north-west, as being more central and accessible, and in 1882 the name of the Taluk was changed to the latter Population 4,110 A Municipality

The origin of the town is lost in antiquity, but one tradition is that its name was derived from two Kīrāta brothers, Tala and Kādu, who, cutting down a tree which they saw wild elephants worshipping, discovered that it contained an image of Vishnu, and that the elephants were *rishis* transformed The tree being miraculously restored, all obtained *mōksha* and the place was named Tala-kādu, which was translated into Sanskrit as Dala-vana Two stone images declared to represent the brothers are pointed out in front of the temple of Vaidyēsvara In a later age, Rāma is said to have halted here on his expedition to Lanka

The earliest authentic notice of the city of Talakad or Talahad in Sanskrit Dalavana-pura is in connection with the Ganga line of kings Harivarma who has been assigned to 1472-6 A.D., was according to an old chronicle installed at Skandapura said to be (Ajalhatti in the Coimbatore country near where the Moyar flows into the Bhavani) but resided in the great city of Dalavanapura in the Karnata desa. Thenceforward Talakad became the capital of these powerful overrulers and there the subsequent kings of that line were crowned.

At the beginning of the 11th century the Gangas succumbed to the Cholas who captured Talakad and gave it the name of Rajarajapura. But about a hundred years later it was taken by the Hoysala king Vishnuvardhana who drove the Cholas out of Mysore. After this time we find that Talakad was composed of seven towns and five *mathas* or monastic establishments. The town of Mavilangi or Malangi on the opposite side of the river was also a large place and had the name of Jananathapura. Down to the middle of the 14th century it remained a possession of the Hoysalas and then passed into the hands of a feudatory of the Vijayanagar sovereigns whose line appears to be known as that of Somra Raja.

In 1634 it was conquered by the Mysore Raja under the following circumstances. Tirumala Raja sometimes called Sri Ranga Raja the representative of the Vijayanagar family at Srirangapatam being afflicted with an incurable disease came to Talakad for the purpose of offering sacrifices in the temple of Vedavara. His wife Rangamma was left in charge of the Government of Srirangapatam but she hearing that her husband was on the point of death soon after left for Talakad with the object of seeing him before he died handing over Srirangapatam and its dependencies to Raja Wodeyar of Mysore whose dynasty ever afterwards retained them. It appears that Raja Wodeyar had been desirous of possessing a costly nose jewel which was the property of the Rani and being unable to obtain possession of it by stratagem and eager to seize any pretext for acquiring fresh territory he laid an army and proceeded against Talakad which he took by escalade the Raja of the latter place falling in the action. The Rani Rangamma thereupon went to the banks of the Cauvery and throwing in the jewel drowned herself opposite Malangi at the same time uttering a three fold curse — Let Talahad become

sand, let Māṅgi become a whirlpool, let the Mysore Rājas fail to beget heirs” The latter part is now happily of no effect

The following is what is known as the curse of Talkād, in the original

Talakādu Maral āgaḥ

Māṅgi maduv āgaḥ

Maisūru dhoregalu makkal illade hōgaḥ

The old city of Talkād is completely buried beneath the hills of sand stretching for nearly a mile in length, only the tops of two pagodas being visible. The sand hills used to advance upon the town at the rate of 9 or 10 feet a year, principally during the south-west monsoon and as they pressed it close on three sides, the inhabitants were constantly forced to abandon their houses and retreat further inland. The town, however, is increasing in population, owing to the rich wet cultivation in the neighbourhood, derived from the Mādhavamantri *amcut* and channel. More than thirty temples, it is stated, are beneath the sand. That of Kīrti Nārāyaṇa is occasionally opened with great labour sufficiently to allow of access for certain ceremonies. The most imposing temple left uncovered by the sand is that of Vaidyēsvara.

Steps have in recent years been taken (as suggested in the previous editions of this work) to check the formation and advance of the sand-dunes, by planting suitable binding plants to prevent the sand lifting, and groves of trees, especially casuarinas, which grow so well in sand, in order to stop its drifting with the wind. These measures have been attended with a good deal of success. But without the directions of Government the people would do nothing, professing to look upon the phenomenon as the result of the curse before mentioned, and deeming it useless to fight against fate.

At Talkād are the Vaidyēsvara, already mentioned, Pātālēsvara and Maralēsvara temples, containing three of the well-known *pañchalīngas*, the remaining two being Arkēsvara at Vijayapura and Mallikārjuna at Muddukudore or Bettahalli. The Vaidyēsvara temple is a handsome structure, built of granite, in the Dravidian style. It faces east and has the outer walls ornamented with sculptures. The *dhārapālakas*, about 10 feet high, are the tallest that are known in the temples of the State. The sculptures on the outer walls consist of miniature turrets, pilasters and figures of gods, etc. There is a

fine porch in front of the south entrance with two sculptured pillars and two beautiful pilasters resembling those of the Somasvara temple at Kurudumale at the sides of the *drara palakas* of the same entrance. In the *prakara* there are figures of Dakshinamurti and Saktiganapati the latter excellently carved with his consort seated on the lap. This figure is rather rare. There is also a large unfinished figure of Subrahmanya lying in the *prakara*. The *nacaranga* which consists of 12 *onkara* *rams* has ordinary ceiling panels except the central one which is carved with figures representing Siva lilas. There is a big seated figure of Sarasvati with a large nimbus in the *nacaranga*. The goddess of the temple known as Manonmanyamba is a fine figure about 5 feet high holding lotuses in two hands the other two being in the boon conferring (*varada*) and fear removing (*abhaya*) attitudes. The *maladurais* is either a later structure or has undergone renovation as evidenced by the fragmentary nature of the inscriptions on it. It is strange that Vaidyasvara temple does not possess any old inscription though the *Sthalapurana* attributes a very great antiquity to it. The Patalesvara and Maralesvara temples appear to have been recently excavated. They say that many temples here are buried in sand. It was only a few years ago that the two temples Anandisvara and Gaurisankara were unearthed. Four fragmentary records were found on the outer walls of the Patalesvara temple. One of these is an old inscription in Kannada of the Ganga period the others being in Tamil. The Anandisvara temple is said to have been built by one Chidananda swami a contemporary of Haidar. A story is related of the Swami that he once crossed the Cauvery in full flood seated on a plantain leaf and that Haidar who witnessed the miracle greatly honoured him and made a grant of land for the temple founded by him. A Kannada inscription at the Gaurisankara temple tells us that this temple was built during the reign of the Mysore king Chikka Deva Raja Wodeyar (1672-1704).

The site on which a Jaina temple once stood has now become a private garden attached to a house and the images belonging to it have been it would appear removed to Mysore. Two old inscriptions were discovered near the Ganesa temple one of them dated A.D. 933 being the oldest now available at Talahad if we leave out the earlier record of the place namely *T. Narsipur I* which is now in the Jubilee Institute

Mysore At Dāsikere Oddu near the same temple are four Tamil fragments, 2 of them being portions of Rājādhirāja's inscriptions *T-Naispu* 19, which is said to be in the Vīrabhadra temple, is not to be found there The two figures in front of this temple, standing one behind the other at an interval of a few feet with folded hands and armed with bows and arrows, are said to represent the hunters Tala and Kāda after whom according to the *Sthala-purāna*, the place was named Talkād The *mantapa* in front of this temple is supposed to be built over the spot where the body of the wife of Tirumalarāya, the last Vijayanagar Viceroy at Seringapatam, was cremated It was she that uttered the well-known curse and died here Several records of the place register grants to a temple named Rājārājēśvara which is not now in existence It may have been founded by the Chōla king Rājarāja or built during his reign We have an inscription of this king at Tadimālingi In fact Talkād itself was named Rājarājapura after him The large number of inscribed stones strewn over the place and put to various uses bears testimony to the existence at one time of several more temples at Talkād And it is quite possible there are also many buried under sand

The Kīrtinārāyaṇa temple is the only structure at Talkād which is built in the Hoysala style It is, however, mostly buried in sand, only the tower over the *garbhagriha* and the top of the front portion being visible The sand near the entrance is removed so that people may enter into the temple The temple consists of a *garbhagriha*, a *sukhanasi* and a *navaranga* The figure of Kīrtinārāyaṇa, about 8 feet high, is well carved and stands on a high pedestal It holds a discus and a conch in two hands in front, the other attributes being a lotus and a mace Such figures of Viṣṇu are known as *Nambinārāyaṇa* among the Śrī-vaishnavas We have similar figures in the Lakṣmīnārāyaṇa temple at Tonnur near French Rocks The pillars of the *navaranga* are well executed and all the beams without any exception are ornamented with either scroll work or rows of animals or bead work The ceilings are mostly flat and oblong as in the Hoysalēśvara temple at Halebid, only 4 of them being deep and artistically executed The *navaranga* has now only two entrances, one in the east and one in the north with verandas on both sides It had also an entrance in the south with verandas, but this has been walled up and

converted into a cell for the goddess whose temple in the south west of the *prakara* lies buried in sand along with the *prakara* itself. The north entrance is known as *Divyagadabajalu* or heavenly entrance as in the Kesava temple at Belur. The *navaranga* which appears to have been originally left open as at Belur has subsequently been walled up with brick and mortar. These walls conceal the inscriptions on the sides of some of the pillars. There are two niches at the sides of the inner entrance one of them containing a standing figure of Vishvakṣena and the other being empty. Standing figures of Vishvakṣena are uncommon. There are also stout seated figures of Sathakopa and Lakacharya in the *navaranga*. The former was a saint also known as Nammalvar who composed the Tamil work called *Tirumaymoli*. The latter was a great theologian who flourished in the early part of the 13th century. The tower of this temple though built of brick is in plan exactly like the stone towers of Hoysala temples. The *maṭidura* in the east which had no *gopura* is now buried in sand. The *stana vigraha* of Kirtinarayana has been removed from the temple and kept in a house at some distance for greater safety. An inscription on the basement of the temple covered over by sand dunes has brought out the fact that the god Kirtinarayana was consecrated by Vishnuvardhana. The stone containing the inscription *T Varasipuri* stands to the right of this house. Parts of the stone have scaled off and the middle portion from top to bottom both in front and on the back is rendered illegible owing to the oil that is constantly poured over it in the belief that some of the oil in contact with the stone when rubbed on the abdomen of a parturient woman has the power of inducing an easy delivery.

So far only the interior of the temple has been described the sand dunes around the temple preventing us from getting a glimpse of the exterior. There is a long inscription engraved in Grantha characters with a poetical introduction in Sanskrit. It tells us that the king having rooted out Adityan the Chola Viceroy took possession of Talkad and set up the god Kirtinarayana in A.D. 1117. This was also the year in which he set up the god at Belur. Tradition attributes to him the consecration of 3 images of Narayana at different places namely Belur Talkad Melkote Ponnur and Gndag though according to one account Gundlupet comes in for the honour instead of

Gadag Hitherto there was epigraphical confirmation of the traditional account with regard to only one of the places, namely, Belur. The present inscription bears out the tradition with regard to Talkād also. After excavation the features of the exterior of the temple reveal themselves to our view. The temple is in Hoysala style, though there are no sculptures on the outer walls. A railed parapet runs round the front *mantapa* with flowers in panels between single columns. At the north and east entrances are left on both sides only the bases on which 2 tower-like niches or pavilions once stood as at Belur and other places. The same appears to be the case at the south entrance also, though excavations have not been carried out in the whole of that portion.

There is a *Smārtha matha* of the Bhāgavata-sāmpradāya at Talkād, presided over by a *sanyāsi* of the name of Bālakrishnānanda-svāmī. A village named Koppala, a few miles from Talkād, belongs to this *matha*, and from this circumstance the *matha* is sometimes called Koppala *matha*. The *Svāmī* is said to be descended in spiritual succession from Padmapādāchārya, the immediate disciple of Sankarāchārya, the three *Svāmīs* that came after Padmapādāchārya being Viṣṇusvāmī, Kṣhīrasvāmī and Krishnānanda-svāmī. In apostolic succession to the last, after a long interval, came Abhinava Bālakrishnānanda-svāmī, whose disciple was Bālakrishnānanda-svāmī. The disciple of the latter is the present *Svāmī*. The god worshipped in the *matha* is Gōpālakrishna. The agent of the *matha* possesses a manuscript containing the *Sthala-purāna* and certain quasi-historical matters relating to Vijayanagar, the Talkād chiefs and the Mysore kings. He has also two palm leaves containing copies of two inscriptions which register grants to the *matha* by Mādhavamantri and by a Talkād chief named Chandrasēkhara Wodeyar in *Saka* 819 and 916 respectively. The former inscription is printed as *T-Narsipur* 47. There is an *amcut* or dam across the Cauvery near Talkād which is known as Mādhavamantri-katte, the Mādhavamantri who built it being supposed to be Vidyāranya. The manuscript referred to above contains a verse giving *Saka* 816 as the date of the construction of the dam by Mādhavamantri, nearly 500 years before Vidyāranya's time. The Mādhava-mantri who built the dam is probably identical with the Mādhava-mantri of the Goa plates (see *M A R*

for 1909 para 91) who was a contemporary of Vidyanaga. With regard to the Talkad chiefs the manuscript informs us that the first chief Somaraja Wodeyar who received a few districts as an *umbah* from Vijayadeva Raya of Anegondi, ruled from Sala 33 to 437. It was the second chief Chandra Sekhara Wodeyar who is said to have ruled from Sala 438 to 515 48 years that made the grant to the *matra* in Sala 516. Other Talkad chiefs are stated to have reigned for 91 6 84 10 80 and 87 years each. These statements are enough in the opinion of His Highness Naraiahbhar to show the valueless characters of the manuscript.

Bandaramma is the village goddess whose temple is situated opposite to the Travellers Bhagaw. There are also several other seated female figures in the temple which are said to be her associates. On the first day of the annual *jatre* three country carts with solid wheels, adorned with flags, cones etc. are driven through the village with different pairs of bullocks yoked to them at short intervals. These carts are sacred to the goddess and are not allowed to be used for any other purpose. After the *jatre* is over they are preserved in some safe place to be taken out again at the next *jatre*. In fulfilment of vows taken hundreds of people bring new pots and prepare *made* (i.e. rice boiled with jaggery) in the temple compound and the adjacent fields for the goddess. On seeing the carts they offer the *made* to the goddess and carry home the pots with their contents for distribution as *prasada* among the members of their families. On the second day thousands of people carry torches and move around the temple in the small hours of the night also in fulfilment of vows. The *ulasa vigraha* is brought in procession. By that time people have in readiness for sacrifice numbers of sheep, goat and fowl and as soon as the *tamada* or worshipper of the goddess sprinkles *tirtha* or holy water on the victims their heads are cut off and the carcasses are at once removed by the owners to their houses. All this takes place before sunrise. The procession with torches is a very fine sight. On the third day a large pit is sunk at some distance in front of the temple and filled with water. People dance in joy around the pit and throw their friends into it in merriment. This sport is kept up the whole day and the *jatre* ends.

It may not be out of place to give here in brief the *Puranic* account of Talkad as found in the manuscript of the Koppala

matha Sage Sōma-datta and his disciples were directed by the god Visvēsvara of Kāsi to go to Siddhāranya-kshētra and perform penance there. On their way they were attacked and killed by wild elephants, and, as their last thoughts were about the elephants that killed them, they became elephants themselves. Meanwhile the god Visvēsvara, accompanied by Manikarnika, came over to Siddhāranya-kshētra and abode at the foot of a *salmāl* or silk-cotton tree. Manikarnika became Gōkarna-tīrta. Sōma-datta and his disciples, now metamorphosed into elephants, also came over to Siddhāranya-kshētra, by virtue of their former penance. Every day they bathed in the Gōkarna-tīrta, plucked lotuses from there and threw them at the foot of the silk-cotton tree. Two hunters, named Tala and Kāda, who observed this, began to fell the tree out of curiosity, when a stroke of the axe, falling on the *linga* at the foot of the tree, caused a stream of blood to flow from it. The hunters stood amazed, when a heavenly voice bade them dress the wound with the leaves of the tree. They did accordingly and the flow of blood ceased. Further, the blood that had flowed formerly changed into milk. As directed by the god, the hunters drank the milk and instantly became members of the Pramathagana or Siva's hosts, and the place was thenceforward known as *Talakādu* after their names. The elephants did likewise and were transported to Kailāsa, the place having acquired a second name, *viz*, Gajāranya-kshētra, after them. As the god treated himself for the wound caused by the hunters, he became known as Vaidyēsvara. The same god manifested himself as Arkēsvara on the bank of the *uttaravāhini* (flowing northward) Cauvery and was worshipped by the sun, as Vasukīsvara or Pātālēsvara on the bank of the *pūrvavāhini* (flowing eastward) Cauvery and was worshipped by Vāsuki the king of serpents, as Saikatēsvara or Maralēsvara on the bank of the *dakṣiṇavāhini* (flowing southward) Cauvery and was worshipped by Brahma, and as Mallikārjuna on Sōmagiri, or Mudukadore-betta on the bank of the *paschimavāhini* (flowing westward) Cauvery and was worshipped by Kāmadhēnu or the cow of plenty. These five *lingas* represent the five faces of Siva.

The Mādhavarāya canal is drawn off from the Cauvery near the Mādhava-mantri dam and is said to have been made by Mādhava-mantri himself. The bathing *ghāt* is built of the architectural members of ruined temples.

Municipal Income and Expenditure

Tendekere—A village in Krishnarajpet Taluk Popu Tendekere
lation 301

This place has a Lingayat *matha* said to be affiliated to the Balchalli *matha*. There is a good pond at the village with turrets at the corners the front ones being better than the others.

Tenginaghatta—A village in Krishnarajpet Taluk Tenginaghatta
Population 416

The Siva temple at this place is a small neat structure in the Hoysala style though in a ruined condition. It consists of a *garbhagriha* an open *sukhanasi*, a *nataranga* and a porch. The doorway of the *garbhagriha* is well carved. In the *sukhanasi* are found Saptamatrika and a fine though mutilated figure of Umamaheswara. The pillars of the *sukhanasi* are well carved and the ceiling about 2 feet deep beautifully executed. The *nataranga* has 9 good ceilings each differing from the others in design. The central one is unique in the beauty of its work. It is about 2 feet deep and has a fine lotus bud surrounded by 8 rampant lions. The ceilings were once coloured differently in different parts the variety of colour adding beauty to the composition. The three ceilings to the right though small are specially good. They contain lotuses of different dimensions differing too in the number and shape of the petals which are differently coloured. The south-east ceiling has 4 snakes which rest their hoods on the pericarp of a blown lotus of 4 petals. The outer doorway is well carved only on the right architrave the other being left uncarved. The temple appears to have once had a fine stone tower. The outer walls have pilasters only at intervals. To the north east of the temple is a ruined shrine containing a figure about 3 feet high of Bhairava. An epigraph is to be seen to the south of the temple and two *viragals*.

to the west The epigraph names the temple as Hoysalēsvara and tells us that it was erected by a merchant during the reign of the Hoysala king Nārasimha I (1141-1173) Though not to be compared with its celebrated namesake at Halebid, which also appears to belong to about the same period, this small temple has in a way its own architectural and artistic merit

Terakanāmbi

Terakanambi A town in Gundlupet taluk, on the Gundlupet-Chāmarājnagar road, 7 miles east of the *kasba* Head-quarters of the *hobli* of the same name Population 3,057 A fair is held every Thursday, attended by about 3,500 people

The town is evidently of great antiquity, though its early history is somewhat obscure There is a general agreement that its name was formerly Trikadamba-pura, and that it sprung out of a village called Kūdugallur standing where the *kūdu-gallu* or boundary stones united of three great countries—namely, Drāvīda, Kērala, and Hadinād or South-Karnāta On the point of junction, a temple to Trikadamba, the consort of the three-eyed Siva, was erected in the 6th century, by a king named Lamba Karna Rāya (the long-eared king) ruling the southern part of Karnāta, and hence the name of the town This king, again, is stated to have belonged to the Kadamba line, and to be the same as Trinētra Kadamba, who would correspond with Mayūravarma Should this be true, it may be conjectured that the temple of Trikadamba marked the common boundary of the Ganga, Kērala, and Kadamba territories Inscriptions show that Bayalnād (Heggaddevankote Taluk) was being ruled by chiefs of Kadamba descent until subdued by the Hoysalas

The traditional list of rulers at Terakanāmbi, among whom occurs a Mandava Rāya, king of Sivasamudra, throws little light upon its history until the time of the Hoysalas, who in turn were succeeded by the Vijayanagar dynasty Harihara of that line appears to have enlarged the city In the 16th century the chief of Ummattūr held it for a short time, and then a number of freebooters of Telugu origin ravaged the country for some years, until Rāja Wodeyar of Mysore took possession of it in 1624, after which period it became secondary in importance to Gundlupet Under the Mussalman dynasty, Terkanāmbi was the head-quarters of a taluk, which was further sub-divided

into *Arval Terakanambi* and *Duvam Terakanambi* but *Purnaiya* merged these in the *Guadlupet Taluk*. The fort of *Terakanambi* was finally destroyed by the *Mahrattas* in 1747. Remains of five lines of fortification are still to be seen and the site of the old palace is also pointed out which according to local tradition was six storeys high.

There are twelve temples in *Terakanambi* of large dimensions but in ruins. Several of them contain inscriptions some recording grants by the *Uminattur Chiefs* dated 1489 to 1501 A.D. Another is a grant of the time of *Vijayanagar* king *Krishna Raja* being dated in 1520 another belongs to the time of *Venkatapati* (1610) the grant itself being by *Narasa Raja* of *Mysore*. The principal shrine is dedicated to *Lakshminavaradarajaswami* whose effigy was removed to *Mysore* by *Krishna Raja III* (See below). These temples, as in most other parts of the District are chiefly built of huge blocks of stone fitted to each other with great nicety but their carving is not generally noteworthy. It appears as if the science of an inferior age to that in which they were founded had been brought to bear upon repairing them so greatly inferior are some portions of them to others. An allowance of a few rupees is still devoted to keeping up most of them. In the neighbourhood of *Terakanambi* are numerous old tanks now disused but indicating the former importance of the place.

As stated above there are at this place many temples in ruins. The *Lakshminavaradaraja* temple is a large building with some well-executed pillars. The interior is pitch dark a slab or two in the roof may be removed with advantage and light let in by means of a raised skylight. The metallic images of the ruined temples and in some cases the stone images also are kept in this temple for safety. The present metallic image of the shrine of the goddess here bears an inscription stating that it was a present from *Krishna Raja Wodeyar III* who is said to have removed the original image to the *Prasanna krishnaswami* temple built by him at *Mysore*. The temple has metallic images of *Child Krishna* and *Child Bolarama* and of *Yasoda* suckling *Krishna*. In the *Hande Gopaleswami* temple the god is a fine tall figure canopied by the 7 hoods of

a serpent Usually the god is represented as standing under a *honne* tree as at Kannambādi The Rāmabhadra temple is a large solid structure At the sides of the inner entrance are two figures which are said to represent Dāsakēsava-setti, the builder or restorer of the temple The same figure is also sculptured on a pillar opposite the entrance There is a huge trough here, measuring $9' \times 5' \times 4'$, carved out of a single stone In the Sugrīva temple there is a large figure of Sugrīva, about 6 feet high The pillars of the veranda in front of the Hanumanta temple are beautifully sculptured The sculptures here will be found described in Volume II, Chapter V The temple was built by a merchant in 1640 during the reign of the Mysore king Narasa Rāja, who granted a village for its up-keep and its dependent *Satva* (feeding house) The stone images of the Rāmabhadra temple, now kept in the Lakshmi-varadārāja temple, consist of seated figures of Rāma, Lakshmana, Bharata, Satrugna, Sīta and Vibhīshana It is said that the metallic image with consorts of the Bandikēri Śrīnivāsa temple was also removed to the Prasannakṛishnasvāmī temple at Mysore and the metallic image with consorts of the Lakshmī-kānta temple at Kutanur Mallayyapura sent instead An inscription, of 1489, in the Rāmabhadra temple, records a grant of land to a temple of Ālvār There is a tradition among the Śrīvaiṣnavas that the image of Satakōpa or Nammālvār of Ālvārtirunagari in Tinnevely District was kept at Terākanāmbi for some time Mr Narasimhachar is not sure if the reference is to this Ālvār

Tirumakūdlu

Tirumakudlu A village near T-Narsipur Population 480

The Agastyēśvara temple here is a large structure In front of it is a lofty *tōraṇa* or gateway over which stand at both ends two lamp pillars with the necessary appliances for lighting lamps There is also at some distance another lamp pillar, similar to but loftier than the above two, with iron framework on the top for placing lamps which were once hauled up with iron chains found even now on the pillar but no longer in use Agastyēśvara is a *sarkatalinga* or *linga* formed of sand, with a cavity at the top in which there is always some water which, people say, represents the Ganges When the cavity is filled,

the excess water flows through an aperture below which is called the *nabhi* or navel of the *linga*. The water is taken out of the cavity with a spoon and distributed among the devotees. It is said that *Agastya* being dissatisfied of worshipping a *linga* directed Hanuman to bring one from the Narmada within one *muhurta* but the latter did not return within the appointed time. So *Agastya* fashioned a *linga* out of sand and worshipped it. Soon after Hanuman returned with the *linga* and seeing what had happened flew into a rage and resorted upon rooting out the *linga* of sand. But his efforts proved abortive though a few marks of violence were left on the *linga*, the cavity at the top being one of them. The *linga* brought by him was apparently set up in another temple at the place known as Hanumantesvara. In the *prabhavali* of the *Agastyesvara* temple is a fine figure of Subrahmanya. There are also figures of Surya and Ganesa. The latter though mutilated is being worshipped in accordance with the wish of the god as revealed in a dream. In the *prakara* there is a figure of *Avattarayana* about 2 feet high in a dancing posture with 8 hands—6 of them holding a discus, a conch, a mace, a lotus, a noose and an elephant goad, the 7th raised like that of *Sandhya* and the 8th in the fear removing attitude—flanked by two drummers. There are figures of the sheep-headed *Dakshina* with 4 hands and of *Dakshinamurti* seated in the posture of meditation with matted hair under a Banyan tree on a pedestal containing sculptures of the *saptarishis* or seven sages, the attributes in the 4 hands being a rosary, a book, a serpent and a *Rudra* vina. The goddess of this temple known as *Lurnamangala* *Kamakshi* is a very fine figure about 1 foot high. In the *Virabhadra* temple is kept a fine figure of *Malahapuramardini* said to have been recently unearthed. There are two more *lingas* besides *Agastyesvara* in the *Agastyesvara* temple viz. *Somesvara* and *Marandesvara*, the three together with *Hanumantesvara* and *Gorgyesvara* of *Gargyavari* form the *pancha-lingas* of *Tirumakudlu*. *Asiatha Narayana* i.e. *Narayana* in the shape of the holy fig tree is worth a visit. It is said that the tree has been in existence from time immemorial and that it was originally worshipped by *Brahma*. Only one branch is now visible. They say that as soon as one branch withers another puts forth leaves. The tree is surrounded by a large number of *Naga* stones set up by people wishing

for offspring In the *prākāra* there are several images of Hanu-mān and a few *lingas* One of the former is said to have been set up by Vyāsarāya, a Mādhva *guru* of the 16th century who founded a *matha* at *Sosale*, about 2 miles to the east, known as Vyāsarāya-matha after his name He set up in all, according to tradition, 737 such images in various places A few fragmentary inscriptions are to be seen on the steps of the bathing *ghāt* to the west The name Tirumakūdlu is a corruption of Tirumu-kūdal, the holy confluence of the three, namely the Cauvery, the Kapila and the Sphatika-sarōvara, the last being a pond supposed to be situated in the bed of the Cauvery The Bhikshēsvara and Ānandēsvara temples are on the other side of the Cauvery The latter is said to have been built by the same Sachchidānandasvāmī who built the Ānandēsvara temple at Talkād

Tiruma-
kūdlu Narsip-
pur Taluk

Tirumakudlu-Narasipur Taluk—A Taluk in the east, till 1882 called Talakād Area 226 square miles Headquarters at T-Narsipur Contains the following *hobls*, villages and population

Name of Hobli	Villages	Hamlets	Villages classified				Popu- lation of each Hobli
			Government	Sarvamanya	Jodi	Kayangutta	
Bannur	24	12	17	6	1		20,653
Mugur	17	10	16			1	15,548
Sosale	40	28	27	9	4		21,579
Talkād	21	20	16	1	3	1	18,889
T-Narsipur	29	17	19	4	6		18,504
Total	131	87	95	20	14	2	95,173

Principal
places with
Population

Bannur 4,457, Binakanhalli 1,398, Chidarahalli 1,606, Dodda Abbagal 1,528, Gargēsvari 1,941, Hemmige 1,687, Holasāl 1,897, Hosa-Alagūd 2,378, Kalyur 1,075, Malangi 1,309, Mattalu 1,520, Mugur 3,541, Nilasoge 1,314, Somanāth-pur 1,381, Sosale 2,246, Talkād 4,110 and T-Narsipur 2,390

In 1882 the Bannur and Bevinhalli *heblis* were added to this Taluk from the old Ashtagram Taluk while Tayur *hebl* was transferred from this to Nanjangud Taluk, and in 1886 Pungah *hebl* to Malavalli Taluk, together with the *nam* lands held by the Jagirdar of Sivasamudram

The Taluk is watered by the Cauvery, which runs through it from north to south with a wide serpentine bend towards the south, where it forms the boundary. The Kabbani also enters the Taluk from the west and forms a junction with the Cauvery, but is not here utilized for agricultural purposes. The course of the Cauvery, on the other hand may be traced by an almost unintermitting border of wet cultivation on each bank. The anicuts and canals are elsewhere described. In its course through this Taluk the Cauvery takes the nature of a wide and shallow river with a sandy bed and is fordable at several places except during a fresh. Along its banks and in the lowlands black soil predominates and here good crops are obtained but in the uplands especially in the west of the Taluk the soil is very poor and does not repay cultivation without constant manuring. *Hain* is the almost universal season for crop on both wet and dry lands the only standard *Kar* crop being Jela which is grown largely principally on the black soil the rich nature of which allows of the cultivation of cotton wheat or coriander seed as a *hain* crop during the same year.

With the exception of a little under 35 rain fed tanks all the wet land is dependent on the channels from the Cauvery. Hardly any *bhara bhatta* rice is grown. There are however several old tanks most of which were breached or fell out of repair during the Muhammadan rule. There is no jungle and but little land is waste. There are extensive *nam* lands in this taluk, lands aggregating Rs 10 205 annually are in the possession of relations and connections of the royal family and others yielding Rs 13 000 represent grants made to Brahmans during the time of Krishna Raja Wodeyar III. A few isolated rocky hills are found

the highest of which is Kundūr Betta on the frontier of Malvalli. The remainder of the Taluk is level cultivated land.

The area of the Taluk is thus distributed

	Acres
Cultivable (dry, 68,867, wet, 12,340, garden, 1,161)	82,368
Uncultivable	24,903
Inām villages	37,707
Kāvals	Nil
Total	1,44,978

The unoccupied area was 598 acres. The total revenue demand for 1922-23 was Rs 1,49,494 and for 1923-24 was Rs 1,52,227.

There are roads from Tirumakūdлу-Narsipur north-west to Mysore, north to Bannur and Seringapatam, and south-east to Talkād and Holesāl. In each case the river has to be forded, as there are no bridges. There are also roads from Tirumakūdлу-Narsipur west to the railway at Nanjangud, and south to Mugur and Santemārahalli. Another road runs east from Sosale to Srivasamudram and the Cauvery Falls, with a branch to Talkād.

T-Narsipur

T.-Narsipur A town situated in 12° 13' N Lat, 76° 58' E Long, at the junction of the Kabbani with the Cauvery, 20 miles south-east of Mysore, and 18 miles from the railway at Nanjangud. Headquarters, since 1868, of the Taluk of the same name, which, till 1882, was called the Talkād Taluk. It is also a municipality.

Population in 1921	Males	Females	Total
Hindus	2,307	2,253	4,560
Muhammadans	89	105	194
Christians	9	5	14
Total	2,405	2,363	4,768

Narsipur is separated from Tirumakudlu by the Kahhanī and is on the right bank of the two rivers while Tirumakudlu is on the tongue of land between the two where they unite. The above is the population of Narsipur, that of Tirumakudlu is 480. This spot has always been considered specially sacred and possesses two temples—one to Gunja Narasimha, which was repaired and embellished by the Dalavayi of Mysore about 350 years ago and is supported by an annual allowance of Rs 958 and a second situated at Tiruma Kudlu (the most holy union) and dedicated to Agastyaśvara, which receives annually Rs 1822 and has existed from time immemorial. These are described below in some detail. Close to Narsipur on the south is Hosa Alagōd with a population of 2161.

The chief temples at this place are Gunjanarasimha and Mulasthanesvarn. The former is a pretty large structure in the Dravidian style with a *gopura* and a fine four pillared *mantapa* in front. Near the *balī puṭa* in the front *mantapa* are two richly ornamented figures on opposite pillars wearing a beard and standing with folded hands which are said to represent the Mugur chief and his brother who built that portion of the temple. A similar figure near the *mahadvara* is said to represent another Mugur chief who built the *gopura*. In the *prakara* there are several small shrines containing figures of Rama Krishna Varadaraja Āṇḍal etc. In the shrine of the goddess there is a fine figure of Hanuman to the right. The top parapet around the temple contains fine mortar figures of the *murtis* and *ataltaras* of Viṣṇu with in some cases labels below giving their names. There are several figures representing the sports of Krishna. A few comical figures also occur here and there. On the south and west parapets are given nine different figures of Narasimha—one issuing out of a pillar another fighting with the demon Hiranyakaśipu another tearing out his entrails another in the posture of meditation another with Lakṣmī seated on the lap another showing grace to Prahlāda another with one arm round the neck of a woman—the label calls this *Sulaguttallabha* i.e. favourite of the midwife (?)—another standing alone and the last with eight hands having Prahlāda in front. The meaning of the seventh figure

is not apparent. The same is the case with another figure on the south parapet which is seated with Hanumān's hand resting on the thigh and Lakshmana standing to the right with folded hands. The label calls this *Ekāntarāma*. Twelve such labels were found on the parapet. The god of the temple is known as Guṇjanarasimha, because he bears in the right hand between the thumb and forefinger a berry with its stalk of the *gunja* plant (*Abius precatorius*), which is supposed to indicate the superiority of T-Narsipur to Kāsi by that much of weight in sanctity. To the left of the temple at a little distance is a small shrine containing a well carved image of Janārdana. To the west of it is a small building known as Parhlāda-mantap built in 1855. It is said that Janārdana had once a large temple and that on its going to ruin the materials were removed for building the kitchen of the Narasimha temple. A panel containing a seated Jina figure flanked by a Yaksha and a Yakshi is seen lying in front of the Taluk Office.

Municipal Income and Expenditure

Year	Income	Expenditure
1921-22	1,597	2,912
1922-23	2,622	3,493

The cell has a good doorway with a figure of Yoga Narasimha on the lintel. The porch and the Vandi shrine have also well executed deep ceilings with lotus buds. The *garbhagriha* has a stone tower over it which is now plastered. The other temple which is inferior in workmanship has in the *navaranga* a figure about 3½ feet high of Chandra holding lilies in its two hands. From an inscription at the entrance *F C IV Krishnarajpet* 56 we learn that the god of this temple is Siddhanatha. An old epigraph newly discovered at the back of the temples which is dated in A D 1047 records a grant for the god Ankalakesvara which must evidently be the name of the god of the other temple. If this be so we have here one of the earliest specimens if not the earliest of Hoysala architecture. A new inscription was found in the *navaranga* of the Siddhanatha temple. The stone containing *Krishnarajpet* 58 was found to be engraved on the back also. This inscription dated A D 1047 which has been referred to above is one of the earliest records of the Hoysala dynasty. Tonach appears to have once been a place of considerable sanctity and importance as evidenced by the old records in which it is named Tolanche.

Tonnur—Properly Tondanur a village in the Seringa Tonnur patam Taluk 10 miles north west of Seringapatam.

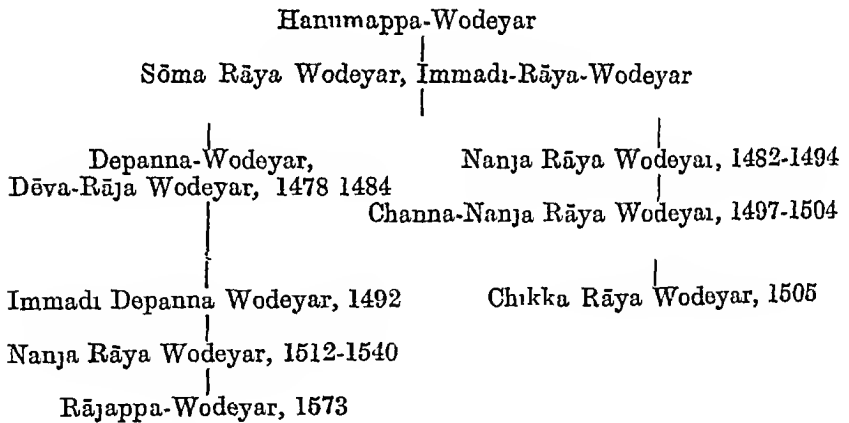

It is historically interesting as having been the refuge of the last of the Hoysala kings after the destruction of Dorasamudra by the Muhammadans in 1326. Here also is the splendid tank called the Moti Talab lake of pearls (p. v). There is a Muhammadan tomb close by to Shah Salar Masaud Ghazi bearing the date 760 *Hijri* or 1358 A D.

Ummattur—A village in Channarayana taluk on the Nanjangud Yelandur road 10 miles north of the Kasba. Head-quarters of the hobli of the same name. Population 2463. Ummattur

Ummattur was formerly an important principality under the Vijayanagar kings. The Raja was related to the Sri Ranga Raya or viceroy at Seringapatam and to him Tirumala Raja the last of the viceroys seems to have formed the purpose of resigning his power though compelled by circumstances to abdicate in favour of Raja Wodeyar of Mysore. Between the

Mysore Rājas and the Ummattūr Rājas there was naturally a strong feeling of enmity. This was shared by the house of Kalale, which the Ummattūr chief had on one occasion nearly exterminated by a treacherous massacre of all its members, when one infant escaped. The latter grew up to restore the fortunes of his line, and a common interest, no less than relationship, formed the bond of union by which the Kalale chiefs became the Dalavāyis of the Mysore State. In 1613 Ummattūr was subdued by Rāja Wodeyar and annexed to Mysore. According to *T-Narsipur* 62, Venkatapati Dēva Mahārāya actually granted in 1612 Ummattūr and Seringapatam to Rāja Wodeyar as an hereditary estate. The subjugation and annexation of Ummattūr and its possession accordingly followed in 1613. It is now an *mām* village, one of the endowments of the Chāmarājēsvara temple at Chāmarājnagar.

From the inscriptions collected in *E C.* III and IV, *Mysore District*, the following genealogy of the chiefs of this place may be made out.

Their family god was Sōmēsvara, on the island of Sivasamudram, at the Falls of the Cauvery. Their titles (see *Gundlupet* 2, 9 and 11), which included some that are commonly adopted by the goldsmiths, were *mahā-mandalēsvara*, *javādi-kōlāhala* (shouting for civet, or, exulting in musk), *pesali-Hanuma* (Hanumān in artifice), *arasanka-sunegara* (slaughterer in war with kings), *ghenankachakrēsvara* (emperor of the dagger), *gajabēntekara* (hunter of elephants). *Chāmarājnagar* 107 seems to add "lord of Sourāshtrapura," and *Gundlupet* 67 "Chakrēsvara

of Penugonda ' no doubt a complimentary title. They call themselves masters of the Ifoyala raja and evidently ruled for a time over the former Terakannabi kingdom. Grigg in his *Manual of the Nilgiri District* also says— These (Ummattur) chiefs undoubtedly for a long period exercised rule over the Nilgiris and in their adversity found a refuge here and for a time perhaps preserved their partial independence in the Malekote fort near Kalhatta. Mr Metz mentions that there are still living near Malekote Badars (huntsmen) whose ancestors were in the service of the Ummattur Raja as taxgatherers and hence are still cordially hated by the Badagas.

Varuna.—A village in Varahod hobli, Mysore Taluk 7 Varuna miles south west of Mysore. Population 633.

It is evidently from the remains to be seen here a place of great antiquity. There is a Ganga inscription of the 8th century. At the close of the 9th century this place appears to have been the capital of the chiefs of a minor branch of the Chalukya dynasty named Durga and Goggi. It was perhaps Goggi's daughter who became the wife of Bhullama one of the Yadava kings of Devagiri earlier than the one mentioned in Vol II of this book (*Fleets and Dynasties* 514). In 1828 the queen Devajammanni of the Ikshvaku dynasty had a temple erected here and a tank and a *tope* and granted endowments.

The oldest temple in the village is the Mahalingeswara which is probably identical with the Butaswara mentioned in the old inscriptions L C 3 Mysore 36 and 37 at the temple. If this be so its period would be the 9th century. It is a small building facing east with a narrow frieze of figures about 1 foot wide running below the eaves all round containing minute sculptures representing scenes from the Ramayana. They are executed in a very realistic and spirited manner. (See Vol II Chap V of this work). The outer walls have plain pilasters. To the south of the temple stands the Mahadeveswara a modern structure built in 1828 in the name of Devajammanni queen of Krishna Raja Wodeyar III referred to above. It has three cells in a line the middle cell having a *linga* the left cell a figure of Parvati and the right a figure of Krishna. To the west of the village is a mound known as *Bastitutu* where once stood

a large *basti* or Jain temple Six mutilated figures of Jina, etc., are the only remains now left on the site One of them is a standing figure, about 5 feet high, of Pārsvanātha, flanked by male *chauri*-bearers, another, a seated figure, about 4½ feet high, of the same Jina, also flanked by male *chauri*-bearers, and another, a seated female figure, about 2 feet high, with 2 hands said to be occasionally worshipped even now by Hindu unmarried girls and barren women to have their desires fulfilled The materials of this temple appear to have been removed to Varkod and used for building the Varadārāja temple there The latter was erected during Chikka-Dēva-Rāja-Wodeyar's reign, and the Jain inscriptions in it, *Mysore* 17 and 48, bear out the above statement

Vijayapura

Vijayapura A village near Talkād Population 189

The *linga* of the Arkēsvara temple at this place is one of the *Panchalingas* of Talkād In front of the temple is a small shrine containing a figure of Sūrya with lotuses in the two hands, flanked by two female figures armed with bows and arrows The stone forming the roof of the Sūrya shrine has *T-Narsipu* 28 on the under-surface and *T-Narsipur* 29 on the back, while those forming the right and back walls have respectively *T-Narsipur* 56 and 55 on them *T-Narsipur* 29 is an inscription of Rājendra Chōla, with the Tamil introduction written in Kannada characters An inscription of the Ganga king Sivamāra is engraved on a slab built upside down into the west wall of the *garbhagrha* The left side of the slab is a little damaged, so that one or two letters there are illegible There is a ruined fort to the south A huge mud wall there is pointed out as having once formed part of a store-house To the south of this wall is another Ganga inscription of the time of Ereyappa In another part of the fort are to be seen two Jain images lying half buried in the earth A few other images from here were removed some time ago to Mysore In the inscriptions the Arkēsvara temple is said to belong to Kirunagara, which is apparently identical with Kinnagara, a *bēchi-iākh* or ruined village to the west The name Pelnagara, in contrast to Kirunagara, also occurs in them This may perhaps refer to Talkād itself, situated only 2 miles to the west

Yedatore Taluk—A Taluk in the north east Area 237 square miles. Head quarters at Yedatore Contains the following *hoblis*, villages and population —

Name of Hobli	Village	Hamlets	Villages classified				Population of each Hobli
			Government	Sarvamanya	Todli	Kayangutta

 Tippur 1 898 and Yedatore 2 100

Principal places with population

The country is gently undulating in character there being neither hills nor jungle Low scrub is met with in many places on the high grounds and occasionally date *trees* in the valleys The soils are not of a very high order and may be described as fair average red and sandy and of rather varying quality under the channels especially That under the Saligram Mirle and Tippur channels is the best Ragi is the principal dry crop sown in the early rains oil seeds, pulses and jola are also grown Tobacco is cultivated in Byadarahalli Only one crop of rice is raised in the year the kinds chiefly grown being *kembhatta ladda bhatta* and *bolamallige* Sugar-cane has been given up though grown to some extent formerly The areca gardens suffered much from the famine and the higher price of rice led to its substitution for areca in many parts The other

garden crops are plantain, betel-leaf, sweet potatoes, and various vegetables

The Revenue Settlement was introduced into Hanasoge in 1804, and into the remainder of the taluk in 1885. The area of the Taluk is at present thus distributed.—

	Acres.
Cultivable (dry, 74,138, wet, 19,656, garden, 2,022) .	9,57,816
Uncultivable	31,774
Inām villages	22,964
Kāvals	258
Total	1,012,812

The unoccupied area at the last settlement was 3,144 acres, of which 789 acres were wet and 112 were garden lands. The total Revenue Demand for 1922-23 was Rs 2,48,763 and for 1923-24 was Rs 2,60,354

The Mysore-Hassan road runs through the east of the Taluk, from south to north west-wards, crossing the river at Tippur, where there is as yet no bridge. From this road one branch runs west from Sāgarakatte to Yedatore and onwards on the south side of the river, and another west from Hampapura to Sāhgrām and further on the north side. There is a cross road connecting Bherya and Sāhgrām, and an unfinished road from Yedatore south to Hunsui.

The Hanasoge hobli was transferred to this taluk from Arkalgud in 1882, and the Halli-Maisur hobli removed to the Hole-Narsipur taluk. The Cauvery flows through the taluk from west to east, forming, in the latter direction, part of the northern boundary, where it receives the Hēmāvati from the north. The Lakshmantīrtha runs along the eastern boundary to its confluence with the Cauvery. The great feature of the taluk is, therefore, the river channels drawn from the Cauvery, running for over 100 miles. The principal *anicut* on the Cauvery is at Chunchankatte, from which two channels are taken, one to the north of the river, and the other to the south. Of the former, the Sāhgram series are 24 miles long and irrigate 2,884 acres, yielding a

revenue of Rs 18 361 The Mirlo series are 38 miles long irrigate 3 110 acres and realize Rs 20 811 The Ramasamudram channel is 11 miles long irrigates 1 300 acres and brings in Rs 25 809 The Tippur channel is taken from an *anicut* near Adagur It is 22 miles long irrigates 590 acres and the revenue is Rs 1 089 There is also an *anicut* on the Lakshmantirtha near Malhalli from which there is a channel on the north bank irrigating 215 acres There are about 110 tanks of which 10 may be termed large and that at Galagekere is fed by the river channel

Yedatore—A town situated in 12 28 north Lat 75°27' Yedatore East Long on the right bank of the Cauvery 22 miles north west of Mysore Head quarters of the Yedatore Taluk and a municipality It is reached by the Mysore Arsikere Railway also by a cross road from the Mysore Hassan road 8 miles north west of Yelwal

Population in 19 1	Males	Females	Total
Hindus	594	81	1 06
Muhammadans	2	1	30
Christians	1	1	-
Jains	-	-	-
Total	1 110	980	- 10

A fair is held on Friday attended by about 250 people The town derives its name from the bend to the left (*yeda*) made by the river (*to*) at this point which invests it with peculiar sanctity It was one of the places conquered by Rajendra Chola after his overthrow of the Gangas in the 11th century A temple of Arkēśvara endowed by Mummadī Kṛishna Raja occupies a prominent position with bathing ghats leading down from it and an *agrahāra* around

Yelandūr
Taluk
Jāgīr

Yelandur Taluk. (Jāgīr) A Taluk in the south-east forming the estate of a Jāgīrdar Sarvamānya Area 102 square miles Head-quarters at Yelandūr Contains the following *hobls*, villages and population.

Name of Hobli	Villages	Hamlets	Villages classified		Population of each Hobli
			Sarvamānya	Jodī	
Agara	8	8		1	9,382
Yelandūr	11	9		2	15,243
Yaragamballi	9	7	2	1	7,509
Total	28	24	2	4	32,134

Principal places with population

Agara 4,262, Ambale 2,458, Gumbally 1,606, Honma 2,664, Kestūr 2,864, Maddūr 2,758, Yelandūr 3,693, Yaragamballi 2,716, and Yeriūr 1,602

This small but rich tract is one of the most fertile and the most densely populated in the whole of Mysore. Along the eastern side are situated the Biligirirangan hills, running (within the *Jāgīr*) for about 10 miles north and south. The peak after which they are named rises to 4,195 feet above the sea. Teak, sandal, *honne*, *math* and other valuable trees are found on their slopes. The only inhabitants of the range are the Soligas, who are permitted to cultivate free, within prescribed limits, in their own desultory and shifting mode, in return for which they guard the forest on the hills and render service in the temple on the summit on the festive occasions.

The remainder of the *Jāgīr*, north-west of these hills and quite distinct from them, is one compact level stretch of land, traversed from south to north by the Honnu-hole or Suvarnāvati, which is the sole source of irrigation. It possesses one *anicut* (at Ganaganur) and six channels and

feeds the Agara tank the water in which is practically unfailing. The level surface of the country and the very slight rise of the river banks, render dams unnecessary for as soon as the river becomes at all full its water flows naturally into the channels. When the river water runs very low temporary dams are constructed as in Chamarajnagar Taluk of stakes mats sand etc. But it is proposed to construct a permanent dam higher up the stream that will insure a permanent supply to the other large tanks such as the Ambale Yelandur Yeriur and Maddur. There are no rain fed tanks worthy of mention but some small ones near the Biligirirangan hills draw their water supply from the hill streams.

The wealth of the *Jagir* is mainly due to the extraordinary fertility of the soil which except near the foot of the hills is mostly a good black free from the defects ordinarily found in it elsewhere. In the east near the hills the soil is red and sandy but not poor. The garden crops are chiefly betel leaf areca cocoa nut and mulberry. The latter indeed is grown in all descriptions of land garden wet and dry. Sugar-cane is raised under the larger tanks and rice alone under the smaller ones. The staple dry crop is jola togari and Bengal gram are also grown but no cotton though the soils are favourable for that crop. Ragi is not much cultivated.

Silk is produced in large quantities and piece goods are also manufactured. Brass is made into lamps and vessels at Yeragamballi. The principal markets resorted to are at Santemarahalli (Chamarajnagar Taluk) and Kollegal (Coimbatore District).

There are inscriptions in the *Jagir* of the Ganga and Chola kings and many of the time of the Hoysala kings. From the latter we learn that Yelandur was included in the Padinad province. This was also the case during the Vijayanagar period towards the close of which the name gradually changes to the modern form of Hadinad now represented by Hadinaru (Nanjangud Taluk). The kings of Padinad or the Ten Nads (Padinadugalam) specially mentioned in connection with Yelandur

are Singa Depa; his son Rāma, ruling in 1568, his younger brother Chenna, Tirumala Rāja and Nanja Rāja, the sons of the latter, and Mudda Rāja, son of Tirumala, ruling in 1654. It was subsequently absorbed into the Mysore territory.

In 1807, Yelandūr was given in *jāgīr* by the British Government to Pūrnaiya in recognition of his services as Dewan and Regent during the minority of Krishna Rāja Wodeyar III. The *sanad*, countersigned by Sir John Malcolm, is drawn up in terms of high eulogy and appreciation of the great and faithful services rendered by the recipient. That sagacious minister, on being offered his choice of lands, is said to have chosen Yelandūr, firstly, because it contained a never failing supply of water, and, secondly, because it was (at that time) out of the beaten track of Government officials and travellers without being at too great a distance from the capital. Mr Rice has suggested in the last edition of this work that as he belonged to a Coimbatore family, it seems more likely that, apart from the obvious natural advantages of the place, he chose it as being on the borders of Coimbatore and Mysore.

The revenue settlement was introduced in 1896. The area of the Taluk was thus distributed.—

	Acres
Culturable (dry, 15,941, wet, 5,379, garden, 720)	22,040
Unculturable ..	14,996
Inām villages	5,047
Forests ..	22,735
Kāvals	41
Total	44,859

There is a road from Kaulandi on the Nanjangud road, through Santemārahalli, which enters the *Jāgīr* on the west and passes through Yelandūr and all the most populous parts, on the north to Kollegal. This part of the road is through sticky black soil and is in bad order. There is also a road from Yelandūr to the foot of the Ghats westwards.

The unoccupied area was only 200 acres. The total Revenue Demand for 1920-21 was Rs 97,551 and for 1921-22, it was Rs 94,634.

The powers of the Deputy Commissioner under the Land Revenue Code which had been exercised by the previous *Jagirdar* have been vested in the Deputy Commissioner, Mysore District till the present *Jagirdar* assumes charge of the *Jagir*. The *Jagir* affairs are looked after, for the present by a duly authorised Agent. The *Jagir* Officers are now subordinate to the Deputy Commissioner Mysore District, and the respective Officers of other Departments having jurisdiction in the Mysore District.

Yelandur—A town situated in 12° 13' North Lat. 77° 5' East Long. on the Honnu hole. The *kaba* of the Yelandur *jagir* and connected by road with the railway at Nanjangud which is 26 miles distant and thus with Mysore 42 miles. Population 3 693.

Yelandur was from early times included in Padmad or Hadmad (corresponding perhaps with the ancient *Lunnad*—Ten Thousand) and was the seat of a wealthy principality at the time of the Vijayanagar sovereignty. The principal temple that of Gaurisvara was built by King Devaraja of Padmad in about 1450 and later kings of Padmad or the Ten Nad country granted endowments for it. The last Raja entered into alliance with the Mysore and Kalah chiefs giving his daughter in marriage to one of the latter. (See below). A Jain named Visalaksha Pandita known as the Yelandur Pandit was the faithful adherent of Chikka Deva Raja during his captivity at Mangala and on his accession to the throne in 1612 became his first minister. The celebrated Lingayat poet Shadakshara Deva who wrote the popular *Rajasekhara Vilasa* in 1657 is said to have lived here for some time in a *matha* known as Danaguru devara matha. His original *matha* was at Danagur a village in Malavalli Taluk and as he came from that *matha* he was popularly known as Danaguru devaru. The *matha* is now in ruins we have only a small *mantapa* and a Nandi on the site. In a hill known as Sambhulinga betta about 1 mile from Yelandur there is a cave known as Shadaksharayya's Cave. It is said that the poet used to go there occasionally and engage himself in meditation. The same hill seems to have been the

residence also of an earlier Virasaiva author named Nijaguna-sivayōgi Enquiries made as regards details of the lives of Visalāksha Pandit, the Jaina minister of the Mysore king Chikka-Dēva-Rāja-Wodeyar (1672-1704), above mentioned, and of Narasimha-bhatta, a Brāhman author of a large medical work, both of whom were residents of Yelandūr, unfortunately proved fruitless. A few important medical and literary works may be noticed in the library of Chikkanna's son Viranna. A Tamil inscription recently discovered in the backyard of Kadaraṅga's son Nanja records a grant in 1266 to a barber for his valour in attacking a tiger.

The town is a thriving place, and many of the inhabitants are well-to-do. It contains a substantially built house of the *Jāgīdār*. The portico of the Gaurīsvara temple is a good specimen of the carving of the period.

The inscription of the temple explains the name of the place as Eleyindur, the town of the young moon, and compares the town to the eye or centre of a lotus, surrounded by eight petals, which are eight hills in the surrounding country Svētāsila (that is Bihgiri) on the east, the Mallinātha hill near Kārīpur on the south-east, the Suragi hill on the south, the Sankarēsvara hill on the south-west, the Mallikārjuna hill near Jannūr on the west, the Shambhulinga hill on the north-west, Srīsaila on the north, and the Nirmala hill on the north-east.

This derivation is, however, belied by inscriptions of a still earlier date. In the old Tamil inscriptions of the place Yelandūr is called Ilamarudur or Young Marudur in contradistinction to Perumarudur or Big Marudur, represented by the modern village Maddur, situated at a distance of about 4 miles from Yelandūr. In the Chōla period, Maddur had the surname Panjavanmādēvich-chaturvēdīnangalum, so named after Panjavanmādēvi, one of the queens of Rājārāja I. It will thus be seen that Yelandūr is clearly a corrupt form of Ilamarudur. But the *Sthala-purāna*, the later inscriptions and modern work, give the fanciful derivation above mentioned. They derive the name from the three words *Ela* (young), *indu* (moon) and *ūr* (village) and Sanskritise it into Bālachandrāpura.

The Gaurīsvara temple at Yelandūr must have been a fine Dravidian building, judging from the *mahādīptāra* and the *panchalinga* cells. It was recently restored with the materials of a

ruined temple at Yeriur. The artistically executed inscription stone at the temple which is about 8 feet high is adorned with fine pilasters at the sides and with a semi circular panel at the top surmounted by a *simha kalata* or lion's head and a turret. From the inscription on it (*E C IV Yeriur 1*) dated 1131 we learn that Singa Depa a chief of Hadinadu built the temple in about A.D. 1100 that the god in it was worshipped in the *Krita yuga* as Tripurantaka by Janaka in the *Treta yuga* as Nilakanta by Rama in the *Dvapara yuga* as Lakshvara by the Landavas and in the *Kali yuga* as Kausvara by the rulers of Hadinadu and that Budda Raja a later chief of Hadinadu built the *mahadvara* the *pancha-linga* cells and other adjuncts of the temple in 1651. The *mahadvara* is a fine structure about 12 feet high decorated with carving all round and with chapas of stone rings at the corners. The lower lintel has seated figures of Brahma and Sarasvati. Among the figures on the outer walls may be mentioned Siva attended by pages and musicians, Dakshinamurti, Bhairava, Virabhadra, Ganapati, Durga, Mahishasuramardini, Vishnu, Venugopala, Krishna and Rama. The *mahadvara* is supported by four pillars carved with figures in three panels on all the sides and has a ceiling about 2 feet deep with a beautiful lotus bud. The sculptures on the pillars illustrate scenes mostly from the *Saura puranas*. One panel represents the fight between Vali and Sugriva. There are also two standing figures with folded hands in regal dress one of these may perhaps represent Budda Raja the builder of the *mahadvara*. The *pancha-linga* cells have ornamental doorways decorated with creeper work and the pillars of the front veranda are adorned with flowers and creepers of various patterns. The Varaha temple which is said to have been a *last* one now enshrines a figure of Varaha brought from a ruined temple at Yeriur.

The history of the local rulers is told in several inscriptions found in the Jagir and included in *E C IV Mysore District Part II*.

The place was included in the Chola conquests of the 13th century. Tamil inscriptions of the period found in the enclosure of the present Kavitasvara temple indicate that that temple called Kapativasurar in the inscriptions was a Chola foundation to which grants were made during the reigns of

successive Hoysala kings. Yelandūr seems to have been renamed by the Chōlas, as was their custom, Chōlēndrasimha-chaturvēdimangalam. Later, a line of chiefs, calling themselves the kings of Padinād of which Yelandūr was the capital, seem to have held sway over the place (See above and Hadinād, where an account of these rulers will be found). In 1807, Yelandūr was, as above stated, granted with the approval of the British Government by H. H. Krishna Rāja Wodeyar III as a *Jāgīr* to Dewan Pūrnaīya in recognition of his eminent services as Dewan and Regent during the minority of the king and is now held by his descendants. The *Sanad* bears date, the 27th December 1807. The *Jāgīr* consists of *Kasba* Yelandūr, Ambale, Yaragambalh, Yeryūr, Kestūr, Agara, and Maddūr and the villages dependent on them. Regulation No I of 1885 (passed on 23rd May 1885) called the Yelandur Jāgīr Regulation, regulates the succession to and defines the mode of enjoyment of the *Jāgīr*. Under it the *Jāgīr* has been declared to be inalienable and impartable and it is not competent for the *Jāgīrdār* for the time being to encumber the *Jāgīr* or any part thereof by act *inter vivos* or by testamentary disposition. The present *Jāgīrdār* is the great-great-grandson of the original grantee. The following is a list of *Jāgīrdārs* from 1807, the date of the grant —Dewan Pūrnaīya, his son Srīnivāsa Rao, his son Narasinga Rao, his son (Sīr P. N.) Krishnamurti, his nephew Narasinga Rao Pūrnaīya, his son Nagaraja Rao Pūrnaīya.

HASSAN DISTRICT

SECTION I—DESCRIPTIVE

SITUATION AREA AND BOUNDARIES

THE District of Hassan situated between 12°—31' and 13°—33' north latitude and 76°—33' and 76°—38' east longitude, is in the western portion of the State. The greatest length is from north to south about 80 miles and the greatest breadth is from east to west about 72 miles.

The area is 2 658 square miles of which 1 373 square miles are under cultivation.

It is bounded on the north by Kadur District east by Bellary Tumkur and Mysore Districts south by Coorg and west by South Kanara of the Madras Presidency.

PHYSICAL ASPECTS

The main body of the District consists of the Hemavati river basin the only exceptions are certain outlying tracts along the west border namely the western portion of the Manjarabad taluk which drains to the Netravati in South Kanara, and the Arsikere taluk whose waters run north to the Vedavati in Chitaldrug. The Cauvery flows through a small portion in the south. The course of the Hemavati in the District is at first south and then east. Running from north to south of Manjarabad taluk it turns east along the Mysore and Coorg frontier and continuing in the same direction separates Hassan and Arkalgud taluks and passing through out Holenarsipur taluk leaves the District with a southerly course and falls into the Cauvery in the Mysore District.

Its chief tributary is the Yagachi from the Belūr Taluk, which joins it near Gorur in Hassan Taluk

The Manjarābād side of the district resting on the brow of the Western Ghats forms a part of the Male-Sīme or *Malnād* hill country, the remaining portion being *Mardān*, plain country, also called *mūdu sīme* or east country

The hills forming the western limit of the district extend from the pass at the Bisale Ghat to the Jēnkāl-betta including, in a grand panorama, the towering height of Subiah-manya or Pushpagiri close to the south-west border rising to 5,626 feet above the level of the sea, Devar-betta (4,206 feet), Murkan-gudda (4,265 feet) and the superb Jēnkāl-betta (4,558 feet) Mūrkan-gudda totally means *mūru-kannu-gudda*, the hill of the three-eyed, *i e*, Siva, while Jēnkāl-betta is *Jēnu-kallu-betta* or honey-rock-hill Besides the mountains in Manjarābād, there are low ranges of granite hills running along the northern limits of the district through the Belur, Hassan and Aisikere taluks, which mark the watershed which separates the Krishna and Cauvery river systems The Indra-betta (3,309 feet) is noted for the colossal Jain statue on its summit Some low hills pass through Hole-Narsipur taluk towards Hassan and Channarayapatna

The general level of the country slopes with the course of the Hēmāvatī, from the Ghat ranges towards the bed of the Cauvery in the south-east At Belur the height above sea-level is 3,150 feet, at Hassan 3,084, at Saklespur 2,998, while at Channarayapatna it is 2,771 and at Arsikere 2,666

The Malnād or highland region, occupying the whole of the Manjarābād taluk and the western half of Belur, has been thus graphically described by Major Montgomery, a former Superintendent

“The character of the country is generally undulating till on approaching the Ghats, when it becomes precipitous Perhaps there is no scenery in India more beautiful than the southern part of this tract, adjoining the north-west of Coorg It resembles for the most part the richest park scenery in England hills covered with the finest grass or equally verdant crops of dry grain adorned and crowned with clumps of noble forest

tree in some instances apparently planted most carefully and certainly with perfect taste. The highest and the most beautiful knolls have been generally selected as the spots on which to build the small *mats* and other places of worship with which the country abounds and the groves that surround or are in the vicinity of these are tended with the greatest care and the trees composing them replaced as they die off or are blown down. The southern differs from the more northerly and westerly parts of the Manjarabad taluk in the absence of that succession of dense jungles which obscure the view and in the soft character of the hills which are in most instances quite free from the stunted date and smooth as the lawn of a villa on the Thames. But the whole taluk is beautiful and less wooded than Coorg or Nager though greatly partaking of the features of both.

The Maidin or lowland tract forming the largest and most populous portion of the District consists of an undulating plain country generally cultivated but here and there having extensive *kavals* or grazing lands. Patches covered with the wild date are common and in some parts are limited tracts of stunted jungle growing upon a gravelly gritty soil. The high lying lands particularly in the Hlalan Channarayapatna and Hole Narsipur taluks have a singularly bare and bleak appearance and are frequently so stony that they are unfit for cultivation. They form however good gathering grounds for tanks and the valleys below are rich and well wooded.

GEOLOGY

On broad lines this district does not essentially differ in its geological features from the adjoining Mysore district in the south. The eastern half of the district consists of different types of granitic gneisses which have been recently differentiated into their respective components of the different series consisting of the earlier Champion gneisses the Peninsular gneisses and the later intrusive granites of the Closepet series.

The older gneisses consist as usual of banded or uniform biotite granitic gneisses forming generally gently undulating

plains or low contoured hills. The newer granites forming the Asrikere and Bānavar range of hills stand out as huge bosses with high peaks and consist of a medium even grained granite or porphyritic granite, grading into granite porphyries, the colour of these several types varying from pink to grey. Surrounding these coarser grained biotite granites a finer grained hornblende-mica-granitic gneiss is found persistently and is developed typically at Garudangiri (Arsikere Taluk).

The schists occur in well defined bands or patches and are mostly hornblendic, consisting of several types. As usual a number of bands of quartzites-ferruginous quartzites, etc are found in association, especially, the former in the Mudulgudda range and the latter in the Mallappanbetta hills. The various areas have been described in the *Records of the Geological Department* under the names of Mudulgudda belt, Mallappanbetta belt, Doddagudda belt, etc. Of the important constituents of these belts, the amphibolites and peridotites in the schists to the south-east of Hole-Naisipur and the altered amphibolites in the long narrow belt of Nuggahalli schists deserve notice as in them are found the workings for asbestos and chromite and the occurrences of a number of small veins of magnesite.

The charnockites do not constitute any big mass in the district but lenticular runs and long linear dyke-like exposures of intermediate to basic rocks of the nature of hornblende or pyroxene granulites are found to a certain extent to the S-W of Arkalgud and also to the S and S-W of Saklespuri towards the western border of the district.

Rocks

The noticeable feature in this district is the occurrence of a number of hornblendic schists, striking generally east and west, or a few degrees north or south of this direction. These are described to be intrusive into the peninsular gneisses and earlier in age than the charnockite massifs.

Dolerites occur, as found in other parts of the State

The altered amphibolites or potstones of the Pushpūgar hills near Halebid have formed the chief sources of the building stones of the Halebid and Belur temples. These being soft are easily carved and trimmed and are eminently suited for delicate tracery. Pot Stones.

Asbestos has been worked in the Hole Narasipur Taluk at the following places — Minerals.

Idegondanahalli Kabbur Hiretalal Dod Kadnur Sunnahalli Hosur Kattakere Bettada Satenahalli and Yemahole in ganbetta

The total quantity of asbestos extracted in this district from 1907 to 1921 is 1 751 tons of which 1 618 tons have been exported

Three types of asbestos are found in the area — anthophyllite tremolite and chrysolite. The first two are as are being worked for anthophyllite which consist of short harsh brittle fibres of very little tensile strength the material being found fit for boiler coverings and lagging. Chrysolite of a pale greenish yellow colour is found in very small veins and is unworkable.

The amphibole asbestos of the latter three places appears to be of the tremolitic variety and is found to be suitable for manufacturing mill boards. Preliminary experiments were conducted by the late Mr Vardhamanrao of Mysore and a factory with the necessary equipments has been established in Mysore for manufacturing mill boards heat insulating covers for boilers steam pipes and stills.

Chromite is found to a small extent at a few points in the Hole Narasipur schist belt. Some prospecting has been done in the Dod Kadnur block but the material obtained is of an inferior grade. The mineral is found in lenses, shoots and pockets to a larger extent in the Nuggihalli schist belt. This mineral has been worked in the following places — Chromite.

Sunkadhalli Pensamudra Bairapur Bhaktarahalli Chik Konhalli Rayasamudra (Tagadur Ranganahalli) and Jambur

The total quantity of chrome ore extracted in this district from 1917 to 1924 is 1,29,126 tons, of which 90,984 tons have been exported, the bulk of the production and export being from the Bhaktarahalli and Bairapur Mines

Felspar

A number of Pegmatite runs consisting of coarse crystals of felspar and quartz are found in the district and from some of the runs thousands of tons of the mineral appear to be forthcoming (See *Records of the Department of Mines and Geology*, Vol. XVIII Part 2)

Magnesite

It occurs in small reticulated veins in the altered peridotites and amphibole peridotites to the E-N-E of Yennahole-ranganbetta to the W-N-W of Idegondanahalli These deposits do not compare favourably in extent with those of the Mysore District and are not worked anywhere here

Of the other minerals, kyanite, staurolite, garnet and corundum are found to varying extent in the zone of metamorphism to the east of Hole-Narsipur Kyanite occurs in bladed crystals of pale to deep blue colour, opaque and as such of little value as a semi-precious gem

Kaolin

Kaolin is found to a small extent in a decomposed pegmatite near Bageshpur and round about

Mica

At Kabbur block, a good amount of work was carried on during the previous years but at present no work is being done here At Mundoor, work is being carried on to some extent Apart from these places, small blocks of mica are observed in some pegmatite in the Hole-Narsipur and Hassan Taluks

The total quantity of mica extracted in this district from 1911 to 1924 is 19,143 lbs of which 17,213 lbs have been exported

BOTANY

(a) Vegetation

The upper slopes of the Ghats forming the western boundary of the district are clothed with magnificent virgin forests

some of which have been taken up for coffee and cardamom cultivation. The Poon the Sonne Blackwood and Lhony of the Ghat Forest area and Honne Nandi and Champak in the forests taken up for Coffee cultivation are commonest species. With the exception of these the timber found in the coffee jungles is of little value. The Maidan jungles contain commonly the Dindaga Channaggi Hulve Chujjalse and Kagh.

Lying more inland in that tract of country in which the pure Malnad (hill country) merges into the Maidan (plain country) are the Gopigudda Hukkunda and Nagavara jungles. They contain chiefly inferior kinds of wood with a quantity of Nandi Matti and Honne much injured by indiscriminate felling. In the Arkalgud Taluk the only jungle worthy of mention is a strip of land lying on the borders of Coorg known as the Menabetta the value of which is at present very small from its having been overworked. In the Belur Taluk is the Archalli jungle containing wood of the above description but of little value from want of a road. There are also low *matti* jungles of some size near the Maharajwargurga fort and scrub jungle near the Sigegudda in the Hassan and Hirihalgudda in the Arsikere taluks. The babul (*Acacia Arabica*) is to be found growing in fields in parts of the Channarayapataa and Hole Narsipur taluks.

The pepper vine grows wild in the jungles of Manjarabad. The dindaga (*Conocarpus Latifolia*) and bevu (*Melia Adirachta*) yielding gum are met with in various parts. Sigekayi or soapnut (*Mimosa Abstergens*) is planted for village hedges in the east but grows wild in Manjarabad and Belur. Except in the Ghats sandal grows freely in the western taluks in the gardens hedges and light jungles.

Forests

The State Forests cover an area of about 141 square miles.
The following is a list of them

No	Name of Taluk	Name of State Forest	Area	
			Acres	Guntas
1	Hassan	Burdal Bore State Forest	1,828	19
	Do	Ramadevarbetta Forest	4,120	12
	Do	Sugudagudda Forest	3,806	3
2	Arkalgud	Baisur Forest	273	36
	Do	Vijapur Do	1,116	32
	Do	Gobballi Do	1,000	00
	Do	Hubbi Do	428	00
	Do	Kendinur Do	232	00
	Do	Byaba Do	1,370	35
3	Alur Sub-Taluk			
	Do	Doddabetta Do	604	32
	Do	Nakalgud Do	185	00
	Do	Mallappanbetta Do	716	32
4	Hole-Narsipur Taluk			
	Do	Vantigudda Do	1,171	33
	Do	Kalalbore Do	1,920	00
	Do	Gowdagere Do	554	00
5	Channarayana-patna			
	Do	Hagaro Do	975	14
6	Belur	Bettadpuri Do	3,044	19
7	Arsikere	Hirikalgudda Do	15,340	32
	Do	Ramanahalli Do	2,092	32
	Do	Desani Do	1,267	8
	Do	Basalekal Do	3,251	8
	Do	Jajoor Do	280	00
	Do	Chakanakatte Do	2,534	16
	Do	Kenchanakumari Do	2,279	1
8	Manjarābād			
	Do	Kabbinaale Do	15,000	00
	Do	Kempohole Do	8,202	9
	Do	Kaganeri Do	7,334	16
	Do	Bisle Do	9,008	00

General distribution of the Forests

In the Manjarābād taluk, the State Forests of Kabbinaale, Kempuhole, Kaganeri and Bisle are situated in a contiguous strip bordering South Kanara, the western boundary of the taluk. Their total length is about 18 miles with an average width of 6 miles. The State Forest of Kenchanakumari lies about 3 miles east from the middle of this belt. The State Forests of Ramadevanahalli and Sugudagudda lie close together on both sides of the boundary between

Hassan and Belur taluks at a distance of about 9 miles north of Hassan Town and Hagire State Forest lies in the Belur Taluk about 3 miles west of these forests. In the Arsikere taluk the Forests of Bettadapur, Desham and Bislekhal are situated to the west of Arsikere town at an average distance of 8 miles within a few miles from each other. About 2 miles north of the Arsikere town lies Hirikalgudda State Forest having Ramanahalli Forest within 2 miles to its east and Jayur Forest within the same distance to its west. Chakanatto Forest lies about 1 mile to the north of Hirikalgudda State Forest. The Forest of Gowdagere in Channarayapatna lies about 7 miles east of the Taluk Head quarters.

In the Hole Narsipur Taluk the forest of Vontigudda lies to the north east of the Head quarter at a distance of about 8 miles and the forest of Kolabore is situated to the south of the same place at a distance of about 6 miles.

In the Arkalgud taluk the Forests of Hendinur and Baisur are situated to the west of the taluk bordering Coorg and Vijayapore Forest lies about 1 mile to the west of Arkalgud town.

About 7 miles to the south-east of Arkalgud lies Gubbi Forest while about 15 miles south of the same place lies Gubbi Forest bordering Hassan Taluk.

In Hassan Taluk including Mur Sub taluk the forest of Burdalbore lies about 5 miles east of Hassan Town with Hongere Forest as its eastern neighbour and Mallappanhotta about 6 miles further.

Nakalgud forest lies about 2 miles west of Mur while the forest of Byaba is situated about 3 miles south of the same place with Doddabetta Forest about 10 miles further down.

Nagasampige white cedar Yennamara, Gandugarige (b) Arberi
Dbupa Ebony Halmaddi Hebbalasu Balagi and Havilge culture
are peculiar to the Channarayapatna taluk and Teak Sandal

(1) Plantations for fuel and other purposes Dindiga, Nandi, Honne, Kagli, Jaları, Casuarina, Chennangi, Alale and Gobli are found in all the other taluks

In the Maidān parts of the District, especially in Channarāyapatna and Arsikere taluks, attention is being paid to the rearing up of groves. The chief kinds of trees planted are, Banian, Mango, Hippe, Halasu, Attı, Nerle and Casuarina, extensive Cocoanut and Arecanut plantations are found in the Arsikere, Channarāyapatna and Hassan Taluks, the area covered being 37,832 acres

(2) Avenues The kind of trees that are generally planted along the public roads are Banian, Attı, Nerle, Mango and Margosa. The total length of roads planted is 633 miles

(3) Topes The Malnād parts of the District are by nature thickly wooded with wild trees. It is only in the Maidān parts of the District, especially in Arsikere and Channarāyapatna taluks, that attention is being paid to the rearing up of the groves. The chief trees that are planted are, Banıyan, Mango, Hippe, Halasu, Attı and Nerle, planting up of cocoanut gardens in the Arsikere taluk and in the adjoining portions of the Dudda Hobli, Hassan Taluk, has become popular. The chief kind of fruit tree on which attention is paid is the mango as its produce is exported outside the District on a pretty large scale

The total extent of *topes* formed in the District is ascertained to be 3,213 acres, 39 guntas, the number of trees thereon fluctuating from time to time

(4) Ornamental trees Ornamental trees introduced into the District are the following

(1) Eucalyptus (2) Gold mohar (3) Keggala (4) Spathodia (5) Deva-Daru (6) Rain tree (7) Silver Oak (8) Java Fig and (9) Cashew nut

(5) Hedges The common hedges in the District consist of Lantana, Aloé and artificial fences made up of bamboo and other thorns

The principal crops grown in this District are paddy, Ragi, Sugar cane, Horse-grain, Cholam, Coffee and Cardamom. Paddy is largely grown in Hassan, Hole Narsipur and Arkalgud taluks and in the Mudan parts of Manjarabad and Belur taluks and Alur sub taluk.

(c) Crops
(1) Rice
11 Varieties
grown

Ragi is grown extensively in all the Mudan parts of Arkalere, Channarayana, Hassan, Arkalgud and Hole Narsipur taluks.

Sugar-cane is largely grown in Channarayana and Hole Narsipur taluks and in parts of Hassan taluk. Coffee and Cardamom are very popular in the Manjarabad and Belur taluks. Coconut is largely grown in Channarayana and Arkalere taluks.

The following table shows the names of the principal crops and the extent of area cropped in 1922-23 —

TABLE 1.

Statement showing the total area in acres sown with crops in each Taluk in the Hassan District in the revenue year ending 30th June 1923

Name of the crop	Hassan Taluk	Alur Sub-Taluk	Manjarabad Taluk	Belur Taluk
1	2	3	4	5
Rice	16 503	9 751	3,094	4 055
Ragi	51 697	9 039	1 700	4 400
Wheat				
Other food grains including pulses	11 717	1 059	71	8 731
Oil seeds (except coconut)	3 093	78	0	684
Sugar-cane	1 506	0	7	630
Cotton	16			125
Fibres (1 and 1)				
Tobacco	40			1

Vegetable Coconut and Arecanut	1 436	35	1 17	1 38
Other products	5 148	665	11 456	905
Total	94,06	479	61 0 8	78 16

TABLE A—concl'd

Name of the crop	Arsikero Taluk	Channarayapatna Taluk	Hole Narsipur Tk	Arkalgud Taluk	Total
	6	7	8	9	10
Rice	2,508	6,840	3,672	8,153	1,03,898
Ragi	11,842	54,380	32,924	36,396	25,66,104
Wheat	40				40
Other food grains includ ing pulses	14,024	42,813	12,693	11,747	1,43,555
Oil seeds (except cocoa- nut)	15,431	4,410	4,028	2,260	20,004
Sugar-cane	186	2,290	448	166	5,825
Cotton	310				451
Fibres (Pundi)		120	450		570
Tobacco	20	95	620	318	1,105
Cinchona					
Coffee				110	26,623
Vegetable Cocoanut and Arecanut	18,498	10,885	773	630	37,832
Other products	20,796	774	2,168	4,685	48,505
Total	1,13,225	1,22,607	57,776	94,465	29,54,512

The area under important crops in the District during the years 1923-24 and 1924-25 is given below —

—	Rice	Ragi	Wheat	Other food grains	Oil seeds (except cocoanuts)
1	2	3	4	5	6
1923-24	1,05,572	2,61,306	23	1,26,070	20,246
1924-25	1,10,233	2,65,220	66	1,24,098	19,537

—	Sugar-cane	Cotton	Fibres	Tobacco	Coffee	Vegetable cocoanut and Arecanut
	7	8	9	10	11	12
1923-24	5,622	597	1,112	1,080	25,218	32,391
1924-25	5,089	1,688	2,128	1,411	26,754	35,886

Plantains of good variety are grown in Hole Narsipur () Car len
 Arkalgud and Belur taluks. Mango is grown in all parts of the District oranges in a few villages of the Hassan taluk and largely in Alur and Manjarabad taluks. The Agricultural Department have introduced new varieties of fruit trees and loans have been advanced for the encouragement of fruit culture. The following table shows the area under fruit cultivation in the several taluks of the District —

	Acres
Hassan	3 737
Alur	33
Manjarabad	1 03
Belur	1 010
Arsikere	462
Channarayana	1 010
Hole Narsipur	702
Arkalgud	150
Total	8 367

FAUNA

The forests of the Mahad parts give shelter to wild beasts () Wild an
 such as tiger, panther, bear, elk, jungle sheep, deer and wild in la.
 dogs. Herds of elephants and bison visit the hilly tracts on the verge of the ghats. Wolves and Hyenas infest the Arsikere Taluk and antelopes are plentiful in other Mahad taluks. Of the smaller mammals jackals, black and common monkeys, hares, squirrels, wild cats, sloths and porcupines are numerous. Otters are also found at the Krishnarajamutt in the Arkalgud taluk and the Yettinhalla river in the Manjarabad taluk.

Numbers of duck, teal, widgeon, a few wild geese and Birds
 numerous waders visit the District in the cold season and
 some remain to breed in the little tanks about Hassan and

in the country to the west Of the feathery tribes, jungle fowl, imperial pigeon and peafowl are to be found in the jungles and gardens, and florican, bustard, and partridge on the plains The *Falco Peregrinator* hawk is to be met with on the ghats in the Manjarābād taluk

Of the articulata, snakes and leeches are very numerous, especially in the forests of Manjarābād

Domestic animals

Owing to the large number of kāvals or pasture lands in the District belonging to the Amrut Mahal may be attributed the possession of a few cattle of superior breed by the more respectable class of the raiyats In the western taluks, the ploughing cattle are of diminutive size and of little value Owing to the coarseness of the pasturage and the humidity of the climate, the mortality among the cattle in the Malnād is great

Diaught cattle are numerous in Hassan which is the great carrying taluk of the country and supplies nearly all the carts required for the carriage of the rice and coffee of this District and of Kadur

The live stock of the District in 1923 consisted of 5,69,807 cows and bullocks, 2,303 horses and ponies, 2,411 mules and donkeys, 2,96,122 sheep and goats, 197 pigs and 94,060 buffaloes.

CLIMATE AND RAINFALL

Climate

Hassan is cooler than Bangalore, the mean annual temperature for Hassan being 17° lower than that for Bangalore while the difference ranges from 20° to 26° during the hottest months The thermometer has risen over 100° only once since 1893 and the lowest temperature for the year was less than 50° during several years The relative humidity ranges from 65 per cent in February to 89 per cent in August and September The rainfall near regions close to the Western Ghats is very high, being nearly 200 inches while it is scanty in the extreme eastern parts of the District, the yearly total being only a little over 20 inches

The following tables give the mean and extreme values of the various weather elements obtained at the Hassan Observatory since 1893 -

Table 1—Mean values of Meteorological records obtained at Hassan

Month	Precipitation inches at 8 A.M. read to 3 P.	Temperature in degrees Fahrenheit				Humidity at 5 A.M.

The mean maximum temperature for the warmest month i.e., April is 92.1° and the highest temperature on record is 100.2° registered on the 11th May 1906. January is the coldest month of the year with a mean minimum temperature of 56.0° the thermometer fell as low as 12.7° on the 12th December 1890. It is curious that the maximum temperature at Hassan is lower in the months of July and August than in the months of December and January. This may be due to the fact that the sky will be practically overcast during July and August. The diurnal range of temperature varies from 28.8° in March to 12.2° in July and these values are respectively the highest and the lowest for the four observatories in the State. The highest monthly and annual ranges on record are respectively 15.9° and 53.3° .

The average rainfall for the district is 38.73 inches spread over 66 days. From May to October the monthly totals range from 1 to $8\frac{1}{2}$ inches and the total for the period is $32\frac{1}{2}$ inches. Very little rain falls from December to March the total for this period being only 1.16 inches. For the whole of the Manjarabad taluk and part of the Belur taluk the annual average exceeds 70 inches. Maranahalli a station in the Manjarabad taluk gauges in a normal year as much as 191.13 inches of which over 150 inches are registered in the months of June, July and August. Some of the eastern parts of the district situated in the taluks of Channarayana and Arsikere get on an average less than 25 inches of rain the total for two stations in this region is only 22 inches. The heaviest fall for a single day was 15.79 inches recorded at Maranahalli Toll gate on the 21st August 1921. During the past 31 years the annual total did not fall short of the normal by 30 per cent in any year but the deficit ranged from 15 to 30 per cent in 6 years.

The following table gives the monthly and annual normals of rainfall at the various stations in the Hassan District.

Rainfall at
Hassan

The wettest years during the past 54 years are 1883 and 1903 with 51 08 and 50 89 inches of rain respectively. The worst year on record is 1881 when only 6 69 inches were gauged and the annual total was less than 20 inches in four years. During recent years, 1908 was a year of scanty rainfall with a total as low as 20 08 inches. Since 1871, the rainfall fell short of the normal in 26 years.

The following table gives the actual rainfall at Hassan from 1893 to 1924.

Table IV—showing the annual rainfall at Hassan from 1871 to 1924.

Year	Inches	Year	Inches	Year	Inches
1871	40 09	1889	31 80	1907	35 12
1872	19 21	1890	30 55	1908	20 08

THE PEOPLE

The total population of the District according to the census of 18th March 1921 is 5 83 960 of which 2 92 219 are males and 2 91,711 are females. A table showing the figures for the last five Censuses Talukwar is given below

POPULATION

Name of Taluk	Census of		
	1881	1891	1901
1	2	3	4
Hassan	69 1 9	82 5 0	95 6 40
Alur	— 898	7 57	70 71
Manjarabail	50 340	52 46	53 501
Belur	61 349	74 493	73 19
Arakere	60 656	65 306	79 584
Channarayana	63,350	78 11	90 0 0
Holenarsipur	37 83	50 694	57 147
Arkalgud	66,157	75,812	80 0
Total	4 83,342	5,11 0 3	5 68 919

Name of Taluk	Census of		Present density of population
	1911	1921	
5	6	7	
Hassan	98 839	1 01 901	—
Alur	7 718	7 40	—
Manjarabail	50 580	51 042	11
Belur	73 638	71 15	10
Arakere	80 51	97 390	102
Channarayana	77 135	95 710	30
Holenarsipur	64 767	64 039	75
Arkalgud	81 667	79 493	303
Total	5 80 900	5 83 960	219

The average density of population in the District is 219 persons per square mile. The most thickly populated Taluk is Arkalgud where there are 303 persons to a square mile. Next in order comes Holenarsipur with 275. Hassan with 272 and Channarayana with 230. The most sparsely

populated area is Manjarābād taluk with a density of 112 to a square mile and Arsikere with 192 to a square mile

According to religion, the population is distributed as follows --

Religion	Above 15		Under 15		Total	Per cent
	Males	Females	Males	Females		
Hindus	1,69,867	1,69,326	1,05,816	1,07,671	5,52,680	91.65
Mussalmans	6,399	5,123	3,912	3,637	19,071	3.26
Jains	658	581	339	299	1,877	0.32
Christians	1,371	1,197	797	830	4,195	0.72
Animists	1,791	1,726	1,294	1,317	6,128	1.04
Total	1,80,086	1,77,953	1,12,158	1,13,754	5,83,951	

According to the *Khanēshumari* accounts of 1923-24, the population was as follows

1	Hassan including Alur Sub-Taluk	89,253
2	Manjarābād	40,398
3	Belur	53,830
4	Arsikere	29,753
5	Channarayapatna	31,356
6	Hole-Narsipur	30,294
7	Arkalgud	57,017
	Total	3,31,901

A comparison of these figures with the census figures of 1921 shows that there has been a large increase of population except in the Malnād areas of Manjarābād, Belur and Alur (sub)-taluks where a decrease in the population is noticeable, there has been a steady increase of population, the total population of 1921 showing an increase of 12.51 per cent over that of the population of 1871 and of 25.72 per cent over that of 1853

Classified according to sources of livelihood the population is composed as follows —

Occupation	Number
A Agricultural	1 14 843
B Professional	44 263
C Commercial	24 711
D Artisans & Village menials	76 188
E Vagrant and itinerant artisans and performers and others not stated	73 243
Total	1 83 360

There are 11 Municipal Towns in the District with a population of 40 463. The following is the list —

Hassan town	8 097
Hole Narsipur	6 543
Arakere	4 102
Arkalgud	4 157
Channarayana	3 106
Konanur	2 381
Belur	2 857

Census of 1925	1,03,298	451	1,03,749	1,994

There were in the District 116,918 occupied houses, 7,725 in towns and 109,193 in villages, accommodating a population of 38,269 and 545,691 respectively. The majority of houses are tiled ones, the number of persons in a house being nearly 5. The housing condition may thus be taken to be satisfactory.

The principal concourse of people occurs at the following ^{(d) festivals,} religious festivals during the different months in the year ^{etc} as per particulars given below —

Name of the place at which the Jatra is held	Nature of Jatra	Approximate month in which the Jatra falls	Number of Attendants at the Jatra	Number of Cattle brought for sale
Hassan Taluk, H	Hassanamba Jatra	Asvija ha Full for 10 days	3 000	
Do	Hassan attile how	First week of January	10 000	1 000
Garur	Sri Venkateswara simulacrum and temple car festival	Magha Sudina Saptami	1 000	4 000
Bellur Taluk, Belur	Keshavaraya and Ratnathaswami	In April for five days	10 000

(e) Vital Statistics

The important weekly fairs in the District are held at Arsikere, Alur Dudda (Hassan Taluk), Javagal and Gandasi (in Ariskere taluk) and at Hole-Narsipur

A table showing the details of attendance, etc, is given below —

Name of the Place	Time	Attendance
Arsikere	Every Friday (Whole of the day)	10,000
Alur	„ Wednesday	4,000
Dudda	„ Saturday	1,500
Javagal	„ Sunday	1,000
Gandasi	„ Thursday	2,000
Hole-Narsipur	„ Monday	3,000

Fairs

The birth-rate of the District in 1923 was 15.67 per 1,000 of the population and the death rate was 21.57 per 1,000. There were 9,151 births registered of which 4,717 were males and 4,438 females. The number of deaths registered was 12,601 of which 6,513 were deaths of males and 6,088 deaths of females.

By classes there were 11,542 deaths among Hindus, 476 among Muhammadans and 583 among other classes.

The number of births and deaths in the District for the five years from 1920-21 to 1924-25 is given below —

Year	Number of Births	Number of Deaths
1920-21	4,700	6,700
1921-22	4,800	9,400
1922-23	5,100	1,600
1923-24	10,000	15,000
1924-25	4,000	14,000

The cases of deaths from diseases in 1923 were — Plague Diseases 1,124 Small Pox 15 Fevers 7,796 Bowel complaints 288 Respiratory diseases 83 from injuries wounds and accidents 60 snake bite or injuries by wild beasts 11 all other causes 2,281

Castes AND OCCUPATION

According to religion the population in the several taluks of the District is classified as follows —

Table showing the Population Talukwar

Taluk	Hindus		Muslims	
	Males	Females	Males	Females
1	2	3	4	5
Hassan	47,604	48,498	1,501	1,311
Alur	1,020	13,119	430	407
Manjarabad	1,000	6,000	1,400	1,017
Belur	34,000	33,400	1,400	1,000
Arakere	4,400	41,903	608	1,500
Channarayana	14,300	4,000	1,000	980
Hale-Narasipur	30,000	70,000	1,000	1,000
Arakere	38,400	38,700	1,100	1,000
Total	71,000	70,000	10,311	8,000

Table showing the Population Talukwar —*concl'd*

Taluk	Christians		Jains		Others	
	Males	Females	Males	Females	Males	Females
	6	7	8	9	10	11
Hassan	883	903	363	335	153	148
Alur	111	102	16	5	5	5
Manjarābād	591	462	53	23	32	31
Belur	181	129	82	68	112	114
Arsikere	229	188	81	41	2,447	2,433
Channarayapatna	140	135	372	394	269	246
Hole-Narsipur	20	9	13	12	72	70
Arkalgud	13	9	14	2		
Total	2,168	2,027	997	880	3,090	3,047

The castes or classes which number over 10,000 are the following in order of strength

1	Vokkaliga	1,83,683
2	Holeya	89,853
3	Lingāyet	81,526
4	Kumbāra	45,523
5	Brāhmin	20,109
6	Muhammadan	16,115
7	Pānchāla	15,527
8	Mādiga	12,723
9	Naige	11,780
10	Agasa	10,726

Classified according to occupation the population in the District is as follows —

Occupation	Total including for 1 day	Actual workers			Dependent
		Males	Females	Total	
1. Agricultural and the surface of the earth	520	1,250	715	1,965	1,710
2. Artisan and handicraft					
3. Industry		4	162	166	
4. Transport		2	23	25	
5. Trade		2,014	1,110	3,124	
6. Public service		211	18	229	
7. Government administration		1	12	13	
8. Government and local authorities		123	54	177	
9. Income tax		10	0	10	
10. Domestic service		140	51	191	
11. Unemployed		157	61	218	
12. Unemployed		6	402	408	
Total	520,000	1,509	2,155	3,664	1,710

(a) Percentage of actual workers to total population is 0.1

(b) Percentage of dependents to total population is 73.0

CHRISTIAN MISSIONS

There are two Christian missions established in the District the Roman Catholic and the Wesleyan. The Roman Catholic mission was started by Abbe Dubois in Settihalli. Hassan taluk has got a following of more than 1,000 souls. The villages in the neighbourhood are almost entirely inhabited by Roman Catholic Christians. They are what are called caste Christians who follow Christian belief in all matters touching their faith and morals but preserve their ancient customs in every thing which does not trench upon religion, and in respect

of relationship in marriage and succession to property, they have the same rule as their neighbours of the same caste who are not Christians. Attached to the Church, which is a spacious nice building, is a convent. There is a separate school for boys. The priests have also established a dispensary from which they supply medicine gratis to all comers.

The Roman
Catholic
Mission

Hassan and Aisikere are Head stations of the Roman Catholic Mission, the number of Churches or Chapels in each of them being 4 and 5 respectively. There are two schools at Hassan with a total strength of 30. There are besides a number of sub-stations in the District.

The Wesleyan Mission has got its centre at Hassan. This mission has established a Girls' Boarding Home and a Zenana Hospital at Hassan, both of which are doing good work. The Redfern Memorial Hospital for women and children, as this Hospital is called, may be said to be one of the best equipped hospitals in the State. The Mission has also established a colony for the converts on the north-eastern out-skirts of Hassan town, and this Colony is called Rakshanāpura. Besides these institutions the Mission maintains 2 Boys' Schools and 3 Girls' Schools.

SECTION II -- HISTORY AND ARCHÆOLOGY

A HISTORY

Early His-
tory

The earliest event supported by any evidence was a migration of Jains from Ujjain, under the leadership of Bhadrabāhu, one of the *śrutakēvalis* or hearers of the first masters, in order to escape a dreadful famine of twelve years' duration. He was accompanied by his principal disciple, Chandra-Gupta, who is said to be identical with the great Maurya emperor, contemporary with the Macedonian conqueror Alexander the Great. While the emigrants were on their way to the Punnāta country (South Mysore) and the Chōla-mandala, their leader, Bhadrabāhu, died at Sravana Belgola,

attended in his last moments by Chanakya Gupta who also died there twelve years later. These occurrences are recorded in an ancient inscription engraved on the surface of the rock at the summit of Chanakya betta at Sravana Belgola and may be assigned to the 3rd century B.C. They invested the place with a city which led to the subsequent formation of the well known Jain settlement there. The colossal statue of Chinnivastava at the same place on the summit of Indra betta bears at its foot inscription stating that it was erected by Chamunda Raya. He was the minister and general of the Chingaling Raghunatha II and its date is probably 103 A.D. (See *Inscriptions at Sravana Belgola* New Edition)

During the first five centuries of the Christian era the west of the District was included with Inbha (South Kanara) as part of the Kadamba kingdom whose capital was at Banavasi. After this the Kadambas became tributary to the Chalukyas but we find Kalamba chiefs ruling as far south as Bayalnad (Heggaddevanahole taluk) down to the end of the 11th century. Kadamba

The Gangas whose capital was at Talkad on the Cauvery in the south east of the Mysore District were in possession of the whole of Mysore between the Western and Eastern Ghats from the 5th to the 11th century. The Jain establishment at Sravana Belgola (Channarayana taluk) was in a special manner under their protection. Ganga

The Kongalvas ruled a kingdom situated principally in the Arkalgud taluk between the Cauvery and the Hemavati rivers. Their inscriptions date from 1020 to 1100. They were apparently a branch of the Alva or Aluva line, the main line of which ruled over Aluva Khēda or South Kanara from an early period. The Kongalvas themselves were judging from their names at one time Chōla feudatories in this part of Mysore. Kongalva

Hoysalas

But the District is more particularly identified with the rise of the Hoysala power and formed then ancestral kingdom. The origin of the line has been related in the general chapter on *History*, and Sosevur or Sasakapura, the home of Sala, the founder, has been identified by Mr. Rice with Angadi, which, though by recent changes in taluk boundaries it is now just within the Mudgere taluk of the Kadur District, is properly a village of the long-standing Balam or Manjarābād country. The dynasty arose in the 10th century, and continued in power to the middle of the 14th century. Their capital was Dōrasamudra, the modern Halebīd (Belūr taluk), and the boundaries of the kingdom in the time of Vinayāditya (1047-1100), the son of Sala, were, on the west, Konkana (North Kanara) and Ālvakhēda (South Kanara), on the south, Baylanād (Heggaddēvankote taluk), on the east, Talakād (that is, not the city itself, but the province belonging to it), on the north, Sāvimale (a hill not yet identified).

The kings had hitherto been adherents of the Jaina faith, but Bittī Dēva, through the influence (it is said) of a Vaishnava wife and the efforts of Rāmānuja, the great Vaishnava teacher, who had taken refuge in Mysore from persecution by the Saiva king of the Chōla country, embraced the religion of Vishnu and thence assumed his better known name of Vishnuvardhana. He re-captured Talkād, which a century before had been taken by the Chōlas, drove the latter out of Mysore, and possessed himself of all the old Ganga dominions. The Hoysalas had professed allegiance to the Chālukyas, but after this assumed independence, Ballāla II (1172-1209) carried the Hoysala dominions up to the river Krishna, making Lakkundi in Dharwar his residence for a time, and Sōmēsvara (1233-51) extended them southwards over the Chōla country, where he took up his abode at Kannanūr, near Trichinopoly. On his death, there was a partition of his territories, the old Kannada provinces, with the capital, going to Narasimha III, and the Tamil provinces, with Kolar District and the north of Bangalore District, going to Rāmanātha. The territories were reunited

under Ballala III (1291-1312) but the Muhammadans now appeared on the scene and brought the Hoysala power to an end. In 1311 an army under Kafir the general of Alauddin sacked Dornamudra and returned to Delhi laden with spoils. In 1326 an expedition sent by Muhammad III totally destroyed the city. The Hoysala prince retired at first to Iondimur (Tonnur Mysore District) but lived at various places such as Hosavida (Hosur in Kolar District) and Unnamale (Trimmalee or Tiruvannamalai in South Arcot) maintaining an unfeebled power for about twenty years longer.

In 1336 was founded the city of Vijayanagara afterwards called Vijay nagara the sovereigns of which eventually became paramount over all the countries south of the Krishna. They are stated to have taken peculiar interest in the province of Balam now Manjarabad and to have made great efforts to colonize it. Every encouragement was given to settlers of all castes by granting them land at little or no rent. The wealthier immigrants were made Patels and received large *inams*. This is the period at which it is assumed the inhabitants generally obtained a proprietary right in the land and the Patels hereditary feudal powers. Later all the west of this District was bestowed with adjoining tracts above and below the Ghats upon Vima Ramappa a court musician. After a reign of some years he abdicated and the province of Balam composed as above and yielding a revenue of three lakhs of pagodas was in 1397 made over by the rulers of Vijay nagar to Singappa Nayak one of their generals and son of an old *Palegar* named Manchi Ayappa Nayaka. The Balam *Palegars* had their capital at Agur and held the country for some generations.

The following is a tentative list of the Nayaks of Balam with dates taken mostly from inscriptions —

Hirija Singappa Nayak	1397
Manchayya Nayak	1405
Chikka Singappa Nayak	

Hadapa Bayappa Nāyak	
Krishnappa Nāyak	1534-48
Yarama Nāyak	
Paddi Nāyak	
Krishnappa Nāyak	1625-40
Venkatādrī Nāyak	1646-56
Narasimha Nāyak	1658-65
Venkatādrī Nāyak	1671
Krishnappa Nāyak	1686-1730
Venkatādrī Nāyak	1751
Krishnappa Nāyak	1772-93
Venkatādrī Nāyak	1799

The fortunes of the family are further referred to below. Representatives are still in existence at Aigur. At the end of the 16th century, Jagadēva Rāya, already mentioned in connection with his capital of Channapatna (Bangalore District), was invested with a territory extending over the east of the District.

Mysore
Rājas

Kikkēri, Sindhugatta, Nagamangala, and other places belonging to the Vijayanagar kings had gradually fallen to the Mysore Rājas, along with Channapatna, when in 1,633 the Mysore army gained Channarāyapatna from the *Pālegān* of Hole-Narsipuri after a very long siege.

Shortly after this period, we find Sivappa Nāyak, of the Ikkēri principality, in Nagai, attaining considerable power so much so that Balam was overrun and held for 37 years, and shelter even extended to a descendant of the Vijayanagar house who had resorted for protection and help to this late dependent on its sovereign power. Sivappa Nāyak established him in authority at Sakkarepatna and Belur, and even invaded Seringapatam in 1654 in his behalf. Peace was concluded between Mysore and Ikkēri in 1691, by which the six *nāds* of Manjarābād were ceded to the old chiefs, and the remainder of the province of Balam was divided between the two contending parties. Except Manjarābād the whole of the Hassan District has from this time formed a part of Mysore territory. On the capture of Bednur by Haidar Ali in 1762, Balam,

which belonged to it was allowed to ^{be} remain in the hands of the chiefs on payment of an annual tribute of 5000 *ryals*.

The Arsikere taluk appears to have suffered greatly from the raids of the Mahattas and at one time was handed over to them as security for the payment of tribute. The villagers are then said to have raised for their defence those earthen towers which are yet to be seen in different parts of the taluk.

Krishnappa Nayak who was ruling Balam in the time of Tipu Sultan joined the army of Parasuram Bhatta when advancing to co-operate with Lord Cornwallis against Srirangapatam in 1792. On the conclusion of peace he fled to Coorg, fearing the Sultan's displeasure but the latter induced him to return and gave him the government of the Agrime forming the south of Balam. The rest of the province was attached to Mysore Venkatadri Nayak son of Krishnappa Nayak was in possession of Agrime at the fall of Srirangapatam in 1799 and not only attempted to regain his independence but to extend his authority further to the north. He was afterwards seized at Egghalli and is an example hanged, contrary to the wishes of Colonel Wellesley.

The Hassan District during the present century first formed part of the Patnada Rayadi and was then called the Manjarabad Raajdari. From 1832 it was included in the Ashtagram Division. This was abolished at the Reorganisation in 1881, and in 1882 the Hassan District itself was reduced to a Sub Division under Kadur District with only four taluks. Arsikere Belur Hassan (with Grama sub taluk) and Manjarabad. In 1896 the Hassan District as at present constituted was re-established and in 1894 Agrime was made the sub taluk under Hassan instead of Grama.

II ARCHAEOLOGY

The inscriptions found in this District will be found collected in *ECV Hassan District* and in the *Mysore Archaeological Reports* 1901-1926. The finest examples of the Hoysala style of architecture are to be seen in this District in the Belur and Halebid temples the former of which were erected

in 1117 A D by the Hoysala king Vishnuvardhana The Halebīd temples are the Hoysalēśvara (*Circa* 1141 A D) and the Kēdārēśvara (1219 A D), which, in Fergusson's words, are unsurpassed for the delicacy of detail in any part of the world The temples at Arsikere, Koramangala, and Hire-Kadlur must have been fine temples The Jain *bastis* at Bastihalli, near Halebīd, are deserving of notice The turned and polished pillars in the Pārsvanāth *basti* yield double reflections This *basti* was erected in 1133 and the Sāntinātha in 1192 The memorial stones to Jain *gurus* are specially interesting Further information in regard to temples and *bastis* in this District will be found in Volume II, Chapters V and VI, of this work

SECTION III ECONOMIC

GENERAL AGRICULTURAL CONDITIONS

Soil

The soil of the Malnād is a rich red sedimentary with forest loam in jungles The products of this part are rich in the valleys, Coffee and Cardamoms in forest slopes

The soils in the plains surrounding the hills are generally of a rich sedimentary character easily worked, affording fine crops of cereal or garden produce

CHIEF AGRICULTURAL STATISTICS AND PRINCIPAL CROPS

Essential
Statistics

The following tables furnish essential statistics in regard to the condition of agriculture in the District —

1 Table of Essential Statistics

Year	Area of the District	Area available for cultivation	Cultivable waste not in occupancy	Cultivable land under occupancy	Current fallows	Net area cropped
1920-21	17,01,492	87,85,565	65,266	8,13,299	1,92,517	6,20,782
1921-22	17,01,498	8,84,323	70,055	8,14,268	1,93,461	6,20,807
1922-23	17,01,614	8,96,662	66,088	8,30,574	1,99,011	6,31,563
1923-24	17,01,633	9,11,530	63,488	8,48,042	2,28,954	6,19,128
1924-25	17,01,905	9,22,548	72,881	8,49,667	2,13,788	6,35,879

- 2 Statement showing the area of different crops raised during the five years from 1920-21 to 1924-25 under the following heads

Year	Food grain and pulses	Oil seeds	Condiments and spices	Drugs	Fibre
1	2	3	4	5	6
1920-21	481 16	41309	363	3 4	2304
1921-22	40,638	4,234	10 4	2 11	170

in 1117 A D by the Hoysala king Vishnuvardhana. The Halebid temples are the Hoysaleswara (Circa 1141 A D) and the Kēdārēswara (1219 A D), which, in Fergusson's words, are unsurpassed for the delicacy of detail in any part of the world. The temples at Arsikere, Koramangala, and Hire-Kadlur must have been fine temples. The Jain *bastis* at Bastihalli, near Halebid, are deserving of notice. The turned and polished pillars in the Pāśvanāth *basti* yield double reflections. This *basti* was erected in 1133 and the Sāntinātha in 1192. The memorial stones to Jain *gurus* are specially interesting. Further information in regard to temples and *bastis* in this District will be found in Volume II, Chapters V and VI, of this work.

SECTION III—ECONOMIC

GENERAL AGRICULTURAL CONDITIONS

Soil

The soil of the Malnād is a rich red sedimentary with forest loam in jungles. The products of this part are rich in the valleys, Coffee and Cardamoms in forest slopes.

The soils in the plains surrounding the hills are generally of a rich sedimentary character easily worked, affording fine crops of cereal or garden produce.

CHIEF AGRICULTURAL STATISTICS AND PRINCIPAL CROPS

The following tables furnish essential statistics in regard to the condition of agriculture in the District —

Essential
Statistics

1. Table of Essential Statistics

Year	Area of the District	Area available for cultivation	Cultivable waste not in occupancy	Cultivable land under occupancy	Current fallows	Net area cropped
1920-21	17,01,492	87,85,565	65,266	8,13,299	1,92,517	6,20,782
1921-22	17,01,498	8,84,323	70,055	8,14,268	1,93,461	6,20,807
1922-23	17,01,614	8,96,662	66,088	8,30,574	1,99,011	6,31,563
1923-24	17,01,633	9,11,530	63,488	8,48,042	2,28,954	6,19,128
1924-25	17,01,905	9,22,548	72,881	8,49,667	2,13,788	6,35,879

- 2 Statement showing the area of different crops raised during the five years from 1920-21 to 1924-25 under the following heads

Year	Food grains and pulses	Oil seeds	Condiments and Spices	Sugar	Other
1	2	3	4	5	6
1920-21	481710	49709	709	7247	2334
1921-	40838	4373	908	6211	1540
1922-23	501597	41101	37537	7820	101
1923-24	49071	4053	755	362	111

Total	191	128	319	460	4,833	5,293

Tanks clas-
sified accord-
ing to Rev-
enue

The following is a Statement of tanks classified according to revenue —

Name of Taluk	Less than Rs 300	Between Rs 300 and 500	Between Rs 500 and 1,000	Between Rs 1,000 and 5,000	Above Rs 5,000	Total
1 Hassan	1,061	22	17	10		1,110
2 Alur	615	16	4			625
3 Manja- rābād	1,029	12	2			1,043
4 Belur	1,187	36	15	7		1,245
5 Arsikere	138	12	14	8		172
6 Channa- rāyapatna	216	15	14	9		254
7 Hole-Nar- sipur	252	10	2	2		266
8 Arkalgud	797	5	7	1		810

The following is a Statement of expenditure incurred on works carried out by the P W D during the 3 years 1920-21 1921-22 and 1922-23

Year	Original works	Repairs
1920-21	10 11 1	19 1 6
1921-22	9 7 46	17 4 57
1922-23	20 0 83	17 4 63

The following is a Statement of expenditure on irrigation by the Marayat Department —

Year	Original works	Repairs
1920-21	3 8 64	10 8 41
1921-22	1 8 30	15

The Marayat works were transferred to the P W D in 1922-23 and no expenditure was incurred by the Revenue Department on this account

The chief sources of irrigation are the channels drawn from the rivers of which there are 13 and the major and minor tanks of which there are 240 and 5 295 respectively

The particulars regarding channels are given below —

Name of Aicut	Name of Channel	Length in Mds	Extent under irrigation Acres	Revenue derived under the channel Rs
<i>Hemavathi River</i>				
1 Sriramadavar Do	North channel	5 1 1	5 604	34 894
	South channel	1	1 73	8 01
<i>Kagachi River</i>				
1 Halvagal	Halvagal channel	6	7	1 14
2 Changanavalli	Changanavalli	13	1 8	6 4
3 Chakratirtha	Chakratirtha	1 1/2	108	543
4 Archalla	Archalla Do	1-1/2 grades	240	1 008
5 Kattur	Kattur Do	9	500	680
6 Kudlur	Kudlur Do	6	334	1 83
7 Madaghatta	Madaghatta Do	8	6 6	3 6

Name of Anicut	Name of Channel	Length in Miles	Extent under irrigation	Revenue derived under the channel
<i>Cauvery River</i>			Acres	Rs
1 Krishnarāja-Katte	Kattepur Channel	14½	1,137	6,452
2 Do	Ramanathpur Do	19	1,779	8,542
<i>Wild streams</i>				
1 Mudvahalla	Mudvahalla Do	3	127	491
2 Sangappara-vaddu	Sangappara-vaddu Do	1	20	118
3 Kiravale	Kiravale Do	2	105	432

FOREST

The following tables show the chief economic forest products in the District and their distribution according to Taluks —

Chief Economic Forest Produce

1 Arsikere Taluk—	Hole Narsipur-Taluk <i>concl'd</i>
1 Tangadi and Kakke	2 Gall-nut
2 Alale	3 Honey and Wax
3 Honey and Wax	4 Lichen
4 Some Chekke	5 Honge

3	Antawala	12 Hebbidaru
		13 Canes (different kinds)

The following is a table showing the chief economic products with quantity collected during the three years 1920-21 to 1922-23

<i>Chief Economic Product</i>	<i>Average annual quantity collected during the three years 1920-21 to 1922-23</i>
1 Gall nut	10 000 maunds
2 Tangadi and kakke barks	100 tons
3 Honey and Wax	1 000 maunds
4 Some Chakke	500
5 Kachu	1 ton
6 Magali Beru	100 maunds
7 Honge Seeds	100 tons
8 Popli Chekke	2 tons
9 Iichen	$\frac{1}{4}$ ton
10 Antawala	20 tons

Chief Economic Product *Average annual quantity collected during the three years 1920-21 to 1922-23*

11	Seege	.	50 tons
12	Lac		2 maunds
13	Gum		40 maunds
14	Geru	.	2 tons
15	Rampatre		10 maunds
16	Wood oil		100 maunds
17	Ganes		10 tons
18	Bamboos		200 tons
19	Tupra leaves		30 tons

ARTS AND MANUFACTURE

Large Industrial establishments

The following is a list of large Industrial establishments in the District

	District and Place	Name of Establishment	Class or Description of Industry	Average number of persons employed daily	Whether worked by mechanical Power or Hand Power
1	Alur	Mr H Nanjundappa's Rice Mill	Rice milling	25	Mechanical Power
2	Ballupet	Mr B Basappa gowda's Rice Mill	Do	20	Do
3	Arsikere	Mr J V Ramiah's Furniture Factory	Furniture making	26	Hand Power
4	Do	M & S M Railway Co's Railway workshop	Engineering works	25	Do

The following are the Rural Industries in the District —

Rural Industry	No.	Value of output
		Rs
1 Hand Looms	1 00	3 04
2 Smithy	433	91 080
3 Millery	88	1 0 000
4 Oil Mills	733	1 09 500
5 Carpentry and woodworks	8	1 7 280
6 Furniture workshops	6	7 000
7 Pottery	80	47 000
8 Lumber works and kilns	7	8 2 0
9 Manufacture of carts	1	13 700
10 Boot and Shoe works	~	7 600
11 Mat and basket works	31	21 700
12 Wool spinning and weaving	140	10 000
13 Rope making	160	14 4 0
14 Manufacture of sweet meat	79	9 60
15 Do dairy product	4 4	1 00
16 Metal works	83	2 800
17 Manufacture of biscuits and bakery	7	6 410
18 Sugar cane crushing	116	66 100
19 Tailoring in industry	8	40 3 70
20 Rattan and wate works	10	

COMMERCE AND TRADE

The following is an approximate statement of exports and imports in this District —

Exports	Value	Place of export
	Rs	
1 Fresh Coconuts	1 89 000	Bombay and Coorg
2 Sheep and Goats	25 000	Coorg and other Districts in the State
3 Rough cotton	6 000	Coorg
4 Brass and copper vessels	15 000	Arakere
5 Sugar	48 000	Mangalore Coorg and other Districts in the State
6 Rice	89 000	Chickmagalur and Mangalore
7 Jaggery	36 000	Mangalore and Mercara
8 Bengal gram	8 000	Chickmagalur and Mercara
9 Castor Oil	10 000	Mangalore and Mercara
10 Chilies	90 000	Mangalore Bangalore Coorg etc
11 Tamarind	11 500	Coorg Chickmagalur etc
12 Cotton	19 000	Davangere

Statement of exports and imports, etc *concl'd*

Exports		Value	Place of export
		Rs	
13	Coffee	8,00,000	Bangalore and Mangalore
14	Cardamom	1,70,000	Bombay and Dharwar
15	Cattle	7,00,000	Coorg, Havarı and other Districts in Mysore State
16	Hides	33,000	Bangalore, Mangalore, etc
17	Horse gram	2,50,000	Aisikere, Mangalore and Bangalore
18	Paddy	12,10,000	Bangalore, Mysore, etc
19	Ragi	6,50,000	Coorg and Mysore
20	Dhal	12,000	Chickmagalur

Imports

The following articles by the value noted against each of them are imported into the District

Name of the Commodity		Value	Place of import
		Rs	
1	Gold	10,50,000	Bombay and Madras
2	Silver	58,000	Do
3	Dhal	85,000	Sholapur and Bangalore
4	Green gram	12,000	Bijapur and Davangere
5	Wheat	22,000	Davangere, Hubli and Dharwar
6	Arrack	40,000	Bangalore
7	Silk	22,000	Kollegal and Bangalore
8	Salt	60,000	Bangalore and Bombay
9	Ghee	65,000	Dharapore
10	Sugar	40,000	Bangalore
11	Woollen Kamblis	34,000	Davangere and Hubli
12	Cotton threads	92,470	Davangere and Bangalore
13	Rough cloth	40,000	Do
14	Fine cloth	8,40,000	Bangalore and Conjeevaram
15	Ropes	38,500	Cahcut
16	Iron vessels	16,500	Sholapur and Bangalore
17	Copper vessels	15,000	Mangalore and Hubli

Markets

The great rice market is at Alur in the Hassan taluk, about 7 miles from the *kasba*, it is attended by the raiyats of the Malnād, who bring their rice in large quantities for sale and by purchasers, many of whom come from great distances with carts and droves of bullocks for the conveyance of the rice purchased. Other important trading places are Yeslurpet, Kenchamma Hoskote and Channarayapatna.

MEANS OF COMMUNICATION

The Mysore State Railway from Mysore to Arakere metre gauge chord line runs through the middle of the District for 60 miles and passes through the following Railway Stations —

Hole-Narasipur	Dudda
Mavinikere	Bageshapura
Ambur	Harnahalli Road
Kowlika	Arakere
Hassan	

The Madras and Southern Mahratta Railway passes through Arakere Taluk in this District for a length of 18 miles. Arakere and Banavur are the stations on this Railway.

The following table gives the particulars of Provincial Roads and District fund roads in the District —

Particulars of Roads	Mile	Annual cost of maintenance
		Rs.
Basavakere-Mysore Road	42 7/8	600
Hassan-Chickmagalur Road	20	300
Basavakere-Hannur Road	20	700

FAMINES

There has been no famine in the District within the last 40 years but during 1908-09 acute distress prevailed in parts of Arakere and Channarayana Taluks of the District. The rainfall in the two Taluks during that year was less than the average of the previous 5 years. As a result of scanty rainfall there was scarcity of drinking water. The wet crops also failed as the tanks did not receive water. The

yield of dry crops was also poor. There was scarcity of food stuffs and fodder. Four hundred and thirty seven and half square miles in the two Taluks were affected, the population affected being 91,254. Relief measures were adopted such as gratuitous relief to the disabled, subsistence loans, Land Improvement and Takkāvi loans, starting of relief works, remission of assessment, importation of rice from Burma and Bezwada and distribution of the same at cost price and supply of fodder from Malnād parts for the use of cattle. Similar conditions prevailed in 1918-19 also, but the situation was not so acute as it was in 1908. The usual relief measures were adopted during this year also.

SECTION IV -ADMINISTRATIVE

DIVISIONS

The following table shows the names of Taluks, Sub-Divisions etc

	Name of the Sub-Division	Name of the Taluk	No of Hobbs	Number of Villages and Towns		Population in 1921	Population per sq mile

POLICE AND JAILS

Police

The Police Administration of the District is conducted by the District Police Superintendent who is subordinate to the Deputy Commissioner of the District. The Police establishment during the year 1924-25 consisted of eleven Inspectors, fourteen Sub-Inspectors, five Jamedars, forty-two Sergeants or Duffedars and 396 Constables. There were sixteen investigating centres, twenty Police Stations and nineteen Police Out-Posts in the District. The total cost of the Police Department of this District for the year 1924-25 was Rs 1,10,068-5-0.

Jails

There is one District Jail at Hassan and Lock-ups in the Head-quarters of all the taluks and the sub-taluks. The District Medical Officer is in charge of the District Jail and the Sub-Registrars are in charge of the respective Taluk Lock-ups.

Two statements showing the distribution of prisoners confined in the several jails and the particulars of jails and lock-ups in the District are given below.

Particulars of jails and lock-ups in the Hassan District

Admitted during 1925	Males	Females	Total
Convicts	128	3	131
Under-trial	130	1	131
Civil			

Daily average number of each class of Prisoners

Admitted during 1925	Males	Females	Total
Convicts	6.89	59	7.48
Under-trial	6.98	53	7.51
Civil			

EDUCATION

The number of schools in the District during 1924-25 was 867 with a strength of 25,594 pupils. Besides a High

School for boys there are 42 Middle Schools 617 Primary, 16 Special and 191 Village Indigenous schools both for boys and girls Of the girls under instruction, 4 are in High School 202 in Middle schools 1362 in Primary 105 in Special and 159 in Village Indigenous schools The average number of square miles villages and the population served by a school in the District were respectively 30 26 and 673

The following table furnishes the essential statistics in regard to the present condition of Education in the District —

		Males	Females
Area	665 Sq Miles		
Inhabited villages	93		
Population	587960	949	91711

	Schools	Boys	Girls

Assistant Inspectress of Kannada Primary Schools	Kadur and Hassan	Hassan	Kannada Primary schools for girls

MEDICAL

There is a District Civil Hospital and a Female Dispensary in Hassan Town. There is also the Redfern Memorial Hospital for women and children which is maintained by the Wesleyan Mission with grants from the Government and the District Board of Hassan.

There are L F Dispensaries in all the Taluk Head-quarters and other important stations. During the Calendar year 1925, there were 23 hospitals and dispensaries working

in the district the total number of patients in door and out-door treated in them was 2 39 552 and the total expenditure incurred on establishment medicine etc was Rs 65 257 The total cost of the establishment medicines etc amounted to Rs 19 126 3 1

VACCINATION

The average number of Vaccinators employed in the District during the year 1925 was 16 and the total number vaccinated during the year was 12,981 Every taluk and sub taluk has got one or more Vaccinators and their work is supervised by the Chief Sanitary Officer

SECTION V —GAZETTEER

Aggunda —A village in Arsikere Taluk Population 908 Aggunda

This place has two ruined Hoysala temples dedicated to Siva and Vishnu The Siva temple consisting of only a *garbhagriha* and a *sukhanasi* has perforated screens and lotus ceilings The *sukhanasi* door lintel has in the centre Tandavasarani flanked by Nandis the right one seated and the left one standing on a pedestal and *malharas* with Varuna seated on them Below the seated Nandi is a drummer and below the other a female figure The Vishnu temple known as the *Lakshmi-kanta* consists of a *garbhagriha* *sukhanasi* and a *nataranga* adorned with lotus ceilings The image of the god about four feet high is badly mutilated At the entrance to the village is a slab sculptured with a pretty large cow intended perhaps for a *gokal* or cattle stones which generally has some diagrams on it without any figure The village appears to have been a place of some importance at one time It is stated that in parts of the village digging exposes ash pits bones and old pottery

Alur —A sub taluk under Hassan taluk formed in 1894 Alur consisting of Alur Palya and Kundur hoblis

Alur —A village in the Hassan taluk 7 miles west of Alur Hassan close to the Hassan Saklespur road Till 1875 it was

the Head-quarters of the old Mahārājandurga taluk and in 1894 was made the Head-quarters of a sub-taluk

Population in 1921	Males	Females	Total
Hindus	500	450	950
Muhammadans	250	200	450
Total	750	650	1,400

The large weekly fair held here on Wednesday is the chief rice market of the District. It is attended by the ryots of the Malnād, who bring their rice in large quantities for sale, and also by traders many of whom come from great distances with carts and droves of bullocks for the conveyance of the rice purchased.

Municipal Funds	1916-17	1917-18	1918-19	1919-20	1920-21
Income	5,210	5,637	3,701	9,336	7,850
Expenditure	2,700	4,030	4,405	4,164	4,000

Arakere

Arakere A village in the Bānavar *hobli*, Arsikere taluk. Population 808.

At this place the Chennakēśvara and Rāmēśvara temples deserve notice. The former is what is known as a *trikutāchala* or three-celled temple, Chennakēśvara being the chief deity, the other cells contain the figures of Vēnugōpāla and Lakshminarasimha. On the outer walls there are at intervals rough figures of Vishnu alternating with turrets. The Rāmēśvara temple, which is exactly like the temple of the same name at Bendikere, has an excellently carved image of Vishnu leaning against the wall opposite the entrance and the *linga* in a cell facing the east. There is also in the temple, leaning against the east wall, an image of the Sun, which is exquisitely carved and richly ornamented. The villagers wrongly call it Vīrabhadra. The tower of this temple is built of granite in receding squares ending in a *kalasa*, resembling in some respects towers of Pallava architecture, but without any sculpture whatever. In the bed of the tank to the west of this temple was discovered a big

uragal with an inscription which refers itself to the reign of the Ganga king Iroyappa

Arkalgud—A taluk in the south area 262 square miles Arkalgud
Head-quarters at Arkalgud Contains the following *hoblis*
villages and population —

Hoblis	Villages	Hamil to	Villages Classified			Population

1147 Gangur 1120 Belavadi 891 Marur 881 Mallipatna 182

Principal
places with
population

The Taluk which contained 10 Hoblis (Gorur and Pounathpur having been added in 1875 from the old Maharajan durga taluk) was abolished in 1882 and the Hoblis were distributed among the adjoining taluks. In 1886 the taluk was again formed with 6 Hoblis and in 1901 the number of Hoblis was reduced by one and the villages were distributed among the 5 Hoblis as detailed above.

The Hemavati forms the entire northern boundary the Cauvery runs through a portion of the south. From the Krishnarajakatte on the Cauvery the Katteputra channel runs along the south bank past Rudrapatna and the Ramanathpur channel along the north bank past Konanur and Ramanathpur to Basavapatna. Under these channels although sugar cane is but little grown the rice crop is one of great yield and certainty. The kinds principally grown

are *kembatta*, *putbhatta*, and *dombil*. The lands under tanks are of a very mixed character and generally inferior in quality. Under larger tanks, rice is followed by a crop of onions, which are very paying and are extensively cultivated especially in Aikalgud Hobli.

The west of the taluk up to the borders of Coorg is jungly and hilly, being on the skirts of the Malnād. The southern portion, along the Cauvery, besides paddy cultivation, supports numerous cocoanut and areca-nut gardens. But the areca-nut is the coarse variety or *gēdu*, and it takes 50 trees to produce a maund of nuts. The gardens wind along sometimes in the southern valleys for 2 or 3 miles at a stretch. On the high water shed towards the centre there is much cultivation of tobacco which is converted into snuff. The taluk formed part of the Province of Balam until 1647, when it was conquered by the Rāja of Mysore. In 1694 it was retaken from Sivappa Nāik of Ikkeri into whose hands it had fallen and has ever since been united to Mysore.

The revenue settlement was introduced in 1883. The culturable area of the taluk was thus distributed:

Dry, 63,849, wet, 8,180, garden, 2,638, Total acres 74,667

The culturable area according to the revision settlement which was introduced with effect from 1923-24 is as follows:—

Occupied area	Acres	Total
Dry	1 04,273 }	1,25,486
Wet	17,747 }	
Garden	3,466 }	

Un-occupied area

Dry	5,317 }	5,514
Wet	192 }	
Garden	4 }	

<i>Kharab land</i>	.	68,092	
<i>Inam</i>	.	7,460	2,06,551

The total revenue demand for 1922-23 was Rs 1,51,953. It is now Rs 1,88,072.

The average rainfall at Arkalgud for 25 years (1896 to 1920) is as follows —

	Inches
January	0 17
February	0 25
March	0 26
April	1 96
May	3 99
June	4 71
July	7 93
August	1 31
September	3 20
October	5 67
November	3 44
December	0 77

Year 36 69

A road from Hassan through Arkalgud and Ramanathpur to Periyapatna runs through the taluk from north to south. This is crossed at Arkalgud by the Narsipur Manjarabad road through Kodlipet running from west to east and branching at Mallipatna to the Bisalo Ghat. It is also crossed at Ramanathpur by a road following the north bank of the river from Hampapur in Yedatore taluk to Fraserpet in Coorg and there is a road running from it east on the south bank of the river to Yedatore.

Arkalgud Town — A town situated in $12^{\circ} 16' N$ lat $76^{\circ} 7' E$ long 17 miles south of Hassan on the Hassan Periyapatna and Kodlipet Narsipur roads. Head quarters of the Arkalgud taluk and a Municipality.

Arkalgud
Town

Population in 1901	Males	Females	Total
Hindus	2 040	1 0 0	3 960
Muslims	969	113	48
Total	2 309	2 133	4 44

The place is said to have been originally called *Arkapur*, city of the sun, owing to Gautama Rishi having there performed penance to that luminary. He also set up the image of *Aṛkēśvara*, the erection of whose temple is attributed to a Chōla king. The present town was founded about 1,568 by Kṛṣṇappa Nāyak, one of the Aṅgur chiefs, who changed the name to *Arkalgūdu*, abode of the sun. But old inscriptions give the name as *Aṛakalgūdu*. It was captured by Kanthirava Narasa Rāj of Mysore in 1647, and subsequently by Sivappa Nāyak of Ikṛēri. In 1694, it was again besieged by Chikka-Dēva-Rāja and finally annexed to Mysore.

Arsikere

Arsikere.—A taluk in the north-east, till 1882 called Haranhalli. Area 479.43 square miles, and population 92,755. Head-quarters at Arsikere. Contains the following *hobbs*, villages and population.

Hobbs	Villages	Hamlets	Villages classified				Population
			Government	Saṁvamanya	Jodī	Kayamgutta	
1 Arsikere	69						22,633
2 Gandasi	71						17,533
3 Javagal	65						15,052
4 Bānavar	101						22,301
5 Kanakatte	50						15,236
Total	356		351	3	1	1	92,755

Principal places with population

Arsikere 4,102, Bānavar 2,624, Haranhalli 2,172, Kenkere 1,648, Javagal 1,564, Halkur 1,118, Gandasi 1,113

The Banavar and Javagal hoblis were added from the Banavar taluk when it was abolished in 1882

The surface of the taluk is very undulating rising here and there into rocky hills covered with scrub jungle and these are mostly noticeable on the western border where they form a pretty continuous chain In the north are the Hirekal guddi hills on which is a temple of Tirupati called Malchal Tirupati The drainage of the taluk is northwards to the Vedavati But there are few streams or tanks of any size There are several Amrut-Mahal kavals in the south which has led to the breeding of a good stamp of cattle in some demand in the Malnad

The prevailing soil is of a sandy grey colour and often very stony unproving in quality in the hollows but so poor on the high lying lands as to be in many places unculturable The wet lands vary from fair to good quality Ragi is grown everywhere but in the west and south there is an extensive cultivation of chillies for supply to the Malnad The coconuts of this taluk allowed to remain on the tree till they drop are much prized and largely exported in a dry state *lobri* to Tiptur for the Bangalore and Bellary markets They are grown in the northern parts without irrigation in low lying situations The chief exports of the taluk are chillies oil seeds and ragi from the south and coconuts from the north

There are numerous memorials throughout the taluk of the Hoysala kings consisting of deserted temples and large stones covered with inscriptions This country formed part of the territory bestowed by the Vijayanagar kings on Jagadeva Rayal (of Channapatna Bangalore District) on the overthrow of whose power it was seized by Timmappa Nayak of Tankere in whose family it remained till overrun together with the neighbouring districts of Sivappa Nayak of Ikkēri or Bednur in the 17th century In 1690 it was incorporated in the Mysore territory by treaty with that State

The revision revenue settlement was introduced from 1918-19. The area of the taluk of that time was distributed as follows —

<i>Culturable</i>	Acres	Total
Dry . . .	57,014	71,067
Wet	2,532	
Garden	11,521	
<i>Un-culturable</i>		
Dry .. .	17,114	17,305
Wet . . .	118	
Garden . . .	73	
<i>Kharab land</i> . . .	94,199	94,199
<i>Inam</i> . . .	3,457	3,457
		1,86,028

The average rainfall at Arsikere for 28 years (1893-1920) was 26 90

The railway from Bangalore to Poona runs through the taluk from east to west, with stations at Arsikere and Bānavar, and the railway from Mysore passes through this taluk with stations at Haranhalli and Bageshpur. Alongside of the former is the Bangalore-Shimoga trunk road. From Arsikere there are roads south to Hassan, south-east to Channarayana-patna and north to the Hulyar road. From Bānavar there is a road south-west to Halebid and Belur, and north-east to Hulyar. There is also a short cross road from Haranhalli eastwards to the trunk road.

Arsikere or
Arasiyakere

Arsikere or Arasiyakere A town situated in 13° 19' N lat, and 76° 19' E. long, 25 miles north by east of Hassan at the junction of the Mysore-Arsikere and Madras Southern Mahratta railways. Head-quarters of the Arsikere taluk and a Municipality.

Population in 1921	Males	Females	Total
Hindus .	2,045	1,416	3,461
Muhammadans	575	306	881
Jains	14	16	30
Christians	162	120	282
Total	2,826	1,888	4,714

The town derives its name from a large tank *Irappa* here or princess's tank which was constructed under the Hoysalas in the 11th century. The fine ruined temples to the north one of which is a special model of the Chulukyan style (see below) and inscriptions show that it was a large place and of considerable importance. Under the Vijayanagar kings it passed into the possession of Jagadeva Raya of Channarayana (Bangalore District) afterwards into that of Timmappa Nayak of Tirikere (Madur District) and then into that of Sivappa Nayak of Ikkeri (Shimoga District) from whom it was acquired by Mysore by treaty in 1690. At a later period it was part of the Haranbali taluk which was one of those made over to the Marhattas as security for the payment of tribute and suffered the general destruction at their hands which reduced it to an insignificant village. In this condition it remained with an evil reputation as the haunt of robbers who infested the high road. Since the advent of the railway in 1899 and the location here of the tank head quarters it has developed into a rising and busy centre. It is now the junction of the M & S M and M S Railways.

The *Ivara* temple at this place which faces east is a remarkable building in the Hoysala style of architecture. It consists of a *garbhagriha* an open *sukhanasi* an open *nataranga* a small rectangular inner porch a square outer porch and a circular *mukha mantapa* which may have once enshrined a *Nandi*. The *garbhagriha* doorway is beautifully carved each architrave has 5 fascias the innermost carved with geometrical patterns the next with scroll work the next in the form of ornamental pilasters the next carved with lions standing one over another and the last with scroll work again. The projecting panel below the door lintel has *Gajalakshmi* and the pediment standing over a fine cornice has in the centre a standing figure of *Siva* flanked by rearing lions as well as standing figures of *Ganapati* and *Brahma* on the right and of *Subrahmanya* and *Vishnu* on the left. The ceilings of the *garbhagriha* *sukhanasi* and the square porch are about 2 feet deep and flat with 9 projecting circular panels containing *Tandavesvara* in the centre and attendant musicians around. The *nataranga* has 8 elegantly carved

niches with *dvārapālakas* at the sides, two of them are at the sides of the *sukhanasi* entrance and the rest opposite to one another on the north and south. All the beams of the temple are adorned with bead and scroll work. The *navaranga* pillars are well executed with bead work and sculptured on all the four faces at the bottom with figures of Vishnu, Bhairava, Durga and so forth. The ceilings, except the one in the centre which is about 5 feet deep, are about $3\frac{1}{2}$ feet deep and have lotus buds. Each of the four beams below the central ceiling, which has likewise a lotus bud, is carved with twelve standing figures on the inner face. The ceiling of the inner porch, about 1 foot deep, is carved with a lotus. All the ceilings show elegant workmanship. The square porch has two entrances on the north and south. The *mukha-mantapa*, unique in design and execution, is a grand circular structure supported by 21 pillars, of which 8, adorned with bead work, are in the middle, and the remaining 13, which are rather plain, stand on the veranda all round. Below each plain pillar the veranda has 2 standing elephants facing different directions, the number of such elephants being 26 in all. The *mantapa* has a beautiful dome-like ceiling with five rows of carvings, the bottom row has figures all round the beams, the next row has 8 small niches, mostly empty, with intervening lions, and the remaining three rows consist of lotus buds or knobs of gradually decreasing size. The centre is adorned with a big lotus bud. The outer walls of the temple have only a row of large images, numbering in all 120, of which 58 are male and the rest female. Of the male figures, nearly 30 represent Vishnu and 19 Garuda standing with folded hands near Vishnu figures. There are also a few figures of Siva. It is worthy of note that 22 of the Vishnu figures bear labels giving their names. Among female figures, 7 represent the seven mothers, *Saptamātrikah*, and a large number the consorts of Vishnu figures, the rest being attendants, etc. The outer walls of the *navaranga* have a niche on the north and south. The number of figures from the entrance to the niche on either side is 15, those beyond being 90. The images are mostly on pilasters between miniature turrets. The pilasters stand on well carved plinths and have seated Yakshas on three sides at the top and swans and turrets on the capitals. There are also some turreted pilasters here and there. The *garbhagriha*

is surmounted by a carved stone tower. The embankment in front of it has Tandavesvara on the front face and a modern Naadi in mortar in place of the usual Hoysala crest. Outside the *mulla-mantapa* runs all round above a moulded plinth a railed parapet carved with two friezes and a rail. The first frieze has seated Yakshas in niches and the second miniature turrets with intervening figures. The rail which is mostly gone is divided into panels by double columns containing figures or flowers with lions at the corners. From *ECV Arsilere* 70 we may perhaps infer that the god was known as Kattamesvara and that the period of the temple was about 1220.

To the left of the temple stands a double temple with an intervening niche as at Halebid though of small proportions and devoid of high ornamentation. It seems to be known as Halavukallu devasthanam. Both the shrines have a *garbha griha* with a *linga* and an open *sulhanasi* with a common hall in front supported by 24 pillars of a red colour and adorned with 21 ceilings about 1 foot deep of lotuses and a veranda all round. The jambs of the doorway of the south shrine have at the bottom figures of Manmatha *devapalalas* and female charn-bearers canopied by a snake hood those of the north shrine however having male figures in place of charn-bearers. Both have flights of steps leading to them flanked by elephants. The hall is in a dilapidated condition. There is lying in it a mutilated figure about 5 feet high of a standing Ganapati. From *Arsilere* 81 we may infer that one of the *lingas* was known as Ballesvara and that the double temple was in existence in about 1220. The compound is strewn over with mutilated figures of Durga Ganapati Malushasuramardini etc. along with the architectural members of the same temple which are no longer in existence.

The Sahasrakuta Jinalaya recently restored by a private individual is also a Hoysala building founded in 1220 by Vasu dhakhaandhava Recharasa a minister of the Hoysala king Ballala II. The ceilings are deep and well executed. The object of worship is a mountain containing 1000 Jina figures. The outer walls have no figure sculpture. The front of the *basti* is unfortunately disfigured by a low tiled roof.

Municipal Funds		1910-0	1909-21
Income		19,843	21,853
Expenditure		9,636	33,100

Attavara

Attavara. A village in the Arkalgud Taluk

The village is very small and there is no other temple except that of a village deity called *Kollūpuradamma* outside the village. Three shapeless stones form the goddess. Two standing metallic figures which form the processional images are kept in the Archak's house, within the village, for safe custody. To the south of the village close by, there lie scattered several carved pillars and other architectural members which indicate that once a good Hoysala temple must have stood there. The villagers say that it was a Vishnu temple dedicated to Chennakēśava.

Bānavar

Banavar. A town in Arsikere taluk, 2 miles north-west of the railway station of the same name on the Bangalore-Shimoga road. Head-quarters of the Bānavar hobli, and a Municipality. Population 2,663, all Hindus.

Till 1882 it was the head-quarters of a taluk named after itself and included in the Kadur District. In 1886, on the formation of the Arsikere taluk, Banavar was absorbed in it and transferred to the Hassan District.

It is said to derive its name from *bāna* (arrow) and *hāra* (carry), Rāma having there "carried the arrows" which Lakshmana had dropped from fatigue. It seems in about the middle of the 11th century to have been the chief town of a territory ruled by Harihara Sōmēśvara Rāja, who was also the founder of Harnahalli. It was then included in the Hoysala kingdom. After the fall of Vijayanagar, it was one of the places seized by the Ikkeri chiefs, but was eventually captured by Chikka-Dēva-Rāja in 1690 and annexed to Mysore, during his wars with the Mohratta. Haider Ali removed the people to form a new city at Nizupari on the Hirekal hills, but the place proving unhealthy they shortly returned to their original abodes.

broken images and a well dressed but uninscribed stone of the Haysala period. It is stated that these were dug up in the temple compound along with the image of V sugopala which is placed under a peepul tree. It is probable that excavations carried out here might bring to light among other things the remains of an ancient temple. In several houses have been found pillars and other members of old temples put to various uses. There are several indications of the antiquity of the place. In the inscriptions (12th century) the village is called Banavar. From this coupled with the name of the god of the place Baesvara, it may perhaps be presumed that the village had something to do with the Bina Kings though the names are as mentioned above otherwise accounted for by tradition.

Bastihalli — A village in the Grama *hobli* Hassan taluk *Bastihalli*
Population 253

The Parsvanatha basti at this place is a Hoysala structure with a grand central hall and a *mulha mantapa* or front hall. The former is supported by 14 black stone pillars of exquisite workmanship decorated with delicate bead work the capitals too being sculptured. The pillars are of two different sizes the central four and the two at the sides of the *sulhanasi* entrance being bigger than the others. Two each of the smaller ones stand between the central four on all the four sides. The front hall is supported by 32 pillars all of the same design but of three different sizes the central 4 being the biggest with intervening 8 smaller pillars as in the central hall and surrounded by 20 still smaller ones standing around the plinth. It has two elephants at the sides of the entrance. A broken lintel has been supported by a new pier. The roof of this hall which is said to leak has to be made water tight. The small *Vdinatha* basti to the right which may be older than the others looks like a Dravidian structure. The *navaranga* of the Santinatha basti which is Haysala in style is likewise supported by 12 black stone pillars of two different sizes as in the Parsvanatha basti but the pillars are plain. There is a Brahma pillar in front the front face of which has a caparisoned horse galloping to the east the emblem of Brahma according to Jain iconography. There is also a small pond to the north east now in ruins.

Belur

Belur. A taluk in the north-west Area 338 square miles. Head-quarters at Belur Contains the following *hobls*, villages and population

Hobls	Villages	Hamlets	Villages classified			Population
			Government	Sarvamanya	Jodi	
Arehalli	88	42	75	1	12	12,938
Belur	94	56	76	4	14	21,224

Madihalli	62	18	55		7	10,932
Total	393	234	339	7	47	71,498

Principal
places with
population

Belur 2,857, Halebīd 1,297, Arehalli 1,297, Rajansinyur 1,266

The western portion of the taluk belongs to the Malnād and for a short distance is bounded by the Hēmāvati which separates it from Manjarābād. The Yagachi flows through the centre portion in a south-easterly direction, and its tributary the Berinji-halla joins it in the north. The country in the west is hilly and covered with jungle, the valleys which are often deep being cultivated with rice, and the hills, where the trees are of sufficient size, with coffee. In the east, the stony and rocky hills are either bare or partially covered with scrub jungle, the valleys are of greater breadth, cultivated with rice, sugar-cane and dry crops. The intermediate portion of the taluk, in the vicinity of Belur and along the valley of the Yagachi river, partakes the nature of both east and west, but is generally more level and distinguished by extensive gravelly plains, covered with either short grass

ar dwarf date The rice lands here lie in much larger stretches

The Yagachi and the smaller streams falling into it supply several small chauncels The Bomdihalli chauncel from the main stream runs for $1\frac{1}{2}$ miles on the right bank ending near Belur The Kattur channel drawn from minor streams in the north west has a length altogether of 15 miles to the west The Maddigatta channel, 8 miles long is taken off from another small stream in the south There is an old ruined dam at Kanagatta apparently designed to carry water from the river to the Halebid tank by a large channel called Sangidevar kalle the embankment of which is 15 to 20 feet high in some places

The soils both wet and dry are poor in the west gradually improving towards the east until, in the neighbourhood dark soils of the best description are found producing good crops of sugar-cane in the wet and often two crops in the year in dry soils. Exceptions however occur as in the stretch of black soil near Belur and the poor high lying dry soils near Halebid itself A peculiar feature in the landscape in the south west is the steep demarcation between high lying and low lying ground Instead of the former gradually merging into the latter it terminates abruptly presenting an almost perpendicular scarp varying in height from 50 to 100 feet As the soil is very friable landslips are not uncommon especially in the rains In addition to the usual wet and dry crops in the eastern hoblis tobacco is largely grown of fair quality In the Malnad to the west are several coffee plantations which occupy the isolated patches of forest called *udute* Of 13 000 acres under coffee 1 550 are held by Europeans Brass pots are made by the Jains at Tagara and other places In the neighbourhood of Halebid is found the patstona which has been used in the elaborate carvings of the temples The principal mart for this taluk and surrounding country is Bikkod the transactions of which are valued at Rs 1,000 a week or 2 lakhs a year

The taluk was in the heart of the Hoysala kingdom, the capital, Dōrasamudra, being situated at Halebīd. Subsequent to the destruction of that city in the beginning of the 14th century, Belur was included in the province of Balam which the Vijayanagar kings conferred, first upon Vīna Rāmappa, and then upon the Aigur chiefs. From these it was taken by Sivappa Nāyak of Ikkēri, who bestowed it on the fugitive king of Vijayanagar, but in 1690 it was taken by Mysore. Inscriptions, however, give a somewhat different account. A number of them included in *E C XI*, Chitaldrug District, refer to the founders of the Belur family. In Achyuta Rāya's time, Hadapa Baiṇḍra, son of Timmappa Nāyaka, was apparently the chief (*Holalkere* 132, dated in 1533). Baiyapa's son, Kṛṣṇappa Nāyaka, was the chief in Sadāsiva's reign. He was apparently the chief of Begur *sīme* at the same time. His agent's son rebuilt the outer *pēte* of Begur in 1504 and named it Kṛṣṇāpura, after his patron (*Holalkere* 112). Kṛṣṇappa Nāyaka's son Venkatādri Nāyaka made a grant to it in 1559 (*Holalkere* 21).

The name Balam was applied to a tract of country round about Belur. According to Major Montgomery, it was "so called, from a village of that name (now Manjarābād). The word is said to be derived from the Kannada *Bala* or strong, and to have been given in commemoration of the great bodily strength and activity of the villagers." There is no support for this name or its derivation in any of the numerous inscriptions found in the District. On the contrary, as Mr Rice points out (*E C V, Hassan District*, Introd XXXIII), it is called the Belur kingdom (*Belur* 128 and *Manjarābād* 35). Sūryānka, in his *Kavi Kantha-hāra*, a metrical vocabulary of rare Kannada words, gives the name *Kingdom of Vēlūnagarī*, (i.e., Belur) and states that it is situated in the Hoysala country, which he describes as a hand-mirror (reflection) of Kashmir. Seeing that Sūryānka was a minister of Venkatādri Nāyaka, this seems conclusive on the point. Mr Rice has worked out a genealogy of the chiefs of this kingdom (in *E C V, Hassan District*, Introd XXXIII). Erra Kṛṣṇappa Nāyaka is represented in most of the inscriptions as the head of the family, who was enfeoffed by Kṛṣṇa-Rāya of Vijayanagar. He bore the sobriquet of *Hadapada* (bearer of the king's betel bag). His father was

Timmappa Nayaka who was a dependent of Achyuta Raya (*Holalkere* 13') Krishnappa Nayaka seems at first to have received a grant of Begur in Hosdurga taluk (*Holalkere* 11-) but early in the 16th century he was invested with the Government of the Belur country. He made a grant to God Channigayya at Begur (more properly Bagur or Bhagyapura) granted a village for the feeding house (*satra*) of the God Harihara and abolished the sheep tax in the Biched (now Bilchod) country in 1554. The *pettah* of Begur was rebuilt in 1551 and renamed after him Krishnapura. He was followed in succession by Venkatadri I Erra Krishnappa II Venkatadri II Krishnappa III and Venkatadri III. The last of these is called the destroyer of the Turaka or Muhammadian army (*Belur* 123 of 1638). He was succeeded by Lakshminappa I who built a lofty building at Hanur and caused to be performed the Vajrapaya and other sacrifice. Next came in order Krishnappa III Venkatadri III Krishnappa IV Venkatadri IV Krishnappa V Krishnappa VI and Venkatadri V with whom the family ceased to exist as a ruling line. Venkatadri IV had the tower of the Kuvava temple built in 1576 and mounted a Kalasa on it (*Belur* 61). The principal titles of these chiefs were Lord of Manuvaga-pura (which has not yet been identified) Siudhu Govinda Dhavalanka Bhima. The later history of the family from the time that Belur was overrun by the Bednur forces in 1645 to the execution of Venkatadri V the last of the line in 1801 will be found narrated in the history of the District.

The revenue settlement was introduced in 1817. The old rates of assessment seem to have been based partly on the Vijayanagar *varaha shist* and partly on Sivappa Nayak's *relha shist*. It appears that no assessment was formerly demanded on account of dry land except in a few villages to the south where the *halhal* or dry land was included in the assessment of wet lands. The area of the taluk in 1877 was thus distributed —

	Acres
Culturable (dry 79 311 wet 28 853 garden 1 139)	109 603
Unculturable (including grazing lands roads etc)	51 079
Inam (27 158) 9 Amrut Mahal kavals (16 530)	43 688
Total	207 370

The area, according to the revision settlement which was introduced with effect from 1916-17, was as follows —

	Area			Acres	Total
<i>Occupied.</i> —					
Dry	47,718	72,985
Wet	23,660	
Garden	1,607	
<i>Unoccupied</i>					
Dry	.	.	.	11,727	13,998
Wet	2,227	
Garden	44	
<i>Kharab land</i>	88,131
<i>Inam</i>	5,685
	Total			..	1,80,799

The unoccupied area in 1919-20 was 10,986 acres, of which 8,989 acres were dry land. The total revenue demand for the year 1919-20 was Rs 2,21,764-4-1.

The average rainfall at Belur for 17 years (1903-1920) was as follows

				Inches
January	0 23
February			.	0 40
March	0 23
April	1 70
May	4 38
June	5 91
July	.	.	.	9 00

Year	38 96

Belur. A town situated in 13° 10' N. lat, 75° 55' E long., on the right bank of the Yagachi, 28 miles south-west of

the railway at Banavara, and 24 miles north west of Hassan on the Hassan Chikmagalur road Head quarters of the Belur taluk and a Municipality

Population in 1911	Males	Females	Total
Hindus	1123	1163	2286
Muslims	60	57	117
Jains	3	4	7
Christians	7		7
Total	1253	1224	2477

Belur, in the *Puranas* and ancient inscriptions bears the name of Velapura and Velūr and is styled the Dakshina Varanasi or southern Benares. Belūr is called *Beluhur* in *Chikmagalur* 160 (*E C VI* Kadur District) assigned to 1103 A D. Here it was according to this inscription that the Hoysala king Ballala I married the three beautiful and accomplished daughters of Mariyana Dandanayaka in one pavilion and as wages for their wet nursing granted the lordship of Sindagera to their father. The same account is given in *Nagamangala* 32 (*E C IV* Mysore District). The sanctity of the town is due to the celebrated temple of Chenna Kesava erected and endowed by the Hoysala king Vishnuvardhana on the occasion of his exchanging the Jain faith for that of Vishnu in the beginning of the 12th century. The carving with which the temple is decorated rivals in fertility of design and perfection of finish that of the Halebid temple and is attributed by tradition to the same master hand that of the famous Jakanachari (See detailed description *below*). The incident related under Kaidala (Tumkur District) would indicate that it was nearly his last undertaking. A description of the temple is given *below*. The annual festival held for five days in April is attended by about 5000 people. The image of Chenna Kesava is said to have been brought from the Baba Budan hills but by some mistake that of the goddess being left

behind, and her wounded pride forbidding the removal afterwards, the god is under the necessity of making a trip occasionally to the Baba-Budan hills to see her. On these occasions he is said to make use of a large pair of slippers kept for the purpose in the temple. When they are worn out, it devolves upon the chucklers of Channagiri and Basavapatna (Shimoga District), to whom the fact is revealed in a dream, to provide new ones, in order to present which they are allowed to enter the courtyard of the temple.

A few details about the Belur temple may not prove uninteresting in view of its importance from a sculptural point of view. It stands on a raised terrace in the middle of a spacious courtyard, surrounded by temples and *mantapas*, several of which are later additions, and adorned with a Dravidian *gōpura* at the outer entrance. To its south-west stand the Kappe-Chennigarāya temple and the temple of the goddess Sōmanāyaki, to its west, the Vīranārāyana temple, and to its north-west the temple of the goddess Āndāl. Kappe-Chennigarāya is so named because according to tradition there was found in a cavity near the navel of the image a *kappe* or frog. Chennigarāya is only another name for Chennakēsava. An inscription newly discovered on the pedestal of this image gives the important information that it was set up by Sāntale, the senior queen of the Hoysala king Vishnuvardhana. The god in the principal temple, though now called Kēsava or Chennakēsava, is styled Vijayanārāyana in *Belur* 58 of 1117, which records its consecration. This is corroborated by an inscription newly found on the pedestal of the image itself, which gives Vijayanārāyana as the name of the god and says that it was set up by Vishnuvardhana. Besides these two gods, a third, Lakshminārāyana, is named in *Belur* 58, which registers grants for all the three. It is probable that the third god is identical with the image in the temple to the west which is now known as the Vīranārāyana temple. We thus see that the above three temples belong to about the same period. The *garbhagrāha* of the Sōmanāyaki temple with a tower over it is also popularly assigned to the same period. The tower of the principal temple, which is no longer in existence, was, it is said, exactly like that of the Sōmanāyaki temple, only much larger in size. According to expert

opinion however this tower is not in keeping with the style of architecture. The Bahmiantapa in front of the principal temple (which we may hence call the Kesava temple by its popular name to avoid confusion) is known as Naganayaka's mantapa owing to a Palegar of that name having built it. The *Suvarna mantapa* or *Kalyanamantapa* with a figure of Sugriva in it is said to have been built by Kanthirava Narasa Raja Wodevar of Mysore and the front portion of the Somanayaki temple by a member of the Dalavayi family. Opposite to the Kappe Chennugaraya temple at some distance was discovered a stone containing a male and a female figure standing side by side with folded hands under an ornamental *prabhavali* or canopy. The rich dress and the ornaments with which they are decorated evidently indicate high rank. The male figure wears a cone shaped cap partly covering the ears and a robe extending down to the feet with a cloth thrown over it. It also wears large earrings with four (1) diamonds in each. The female figure is richly ornamented. Unfortunately the faces are injured though the other parts are intact. Mr. Narasimhachar suggests that the figures represent Vishnuvardhana and his queen Saatala who set up respectively the gods Vijayanasayana and Kappe Chennugaraya. If so they afford us an insight into the mode of regal dress and decoration in the early part of the 12th century. The other temples in the enclosure are the Narayana temple the temple of the Alvars (or Srivaishnava saints) and shrines of Ramanujacharya, Vedantadesika and Manavala mamuni.

The Kesava temple has three doorways on the east south and north the latter two being respectively known as the Friday entrance (*Sukratara bagilu*) and the Heavenly entrance (*Stargada-bagilu*). The door frames are apparently of a subsequent period as evidenced by the mutilation of the side pillars or their concealment by the figures on the jambs. This supposition is borne out by *Belur 72* which tells us that the door frames, door lintels and perforated screens were caused to be made by Ballala II the grandson of Vishnuvardhana. On the jambs of the east doorway are sculptured Manmatha and Rati, rare figures in temples of this style. On those of the south Hanuman and Garuda and on those of the north female chauri bearers. The lintels have a projecting panel with the

figure of Garuda, above which, flanked by *makaras*, we have on the east Narasimha killing Hiranyakasipu, on the south Varāha killing Hiranyāksha, and on the north Kēsava. The north and south lintels are carved on the back also. At all the doorways there are, as in the Hoysalēsvara temple at Halebid, two tower-like niches with two more opposite to them at some distance on a lower level, the upper ones containing as a rule figures of Vishnu and the lower ones those of Vīrabhadra, Bhairava, Mahishāsūramardini and so forth. There are also at the sides of each doorway figures of Sāla stabbing the tiger. Beginning at the sides of the east doorway and extending beyond the north and south doorways up to the outer wall of the *sukhanasi*, runs a *jagati* or parapet containing these rows of sculptures (1) elephants, (2) cornice with bead work surmounted by *śmhalalātas* or lion's heads at intervals, (3) scroll work with figures in every convolution, (4) another cornice with bead work, (5) small figures, mostly female, in projecting ornamental niches with intervening figures of Yakshas, seated inward, (6) delicately carved figures, mostly female between pilasters, (7) eaves with bead work with a thick creeper running along the edge of the upper slope having at intervals beautifully carved small figures and miniature turrets, and (8) a rail containing figures, sometimes indecent, in panels between double columns surmounted by an ornamental band. Above this come perforated screens surmounted by the eaves. They are 20 in number, 10 to the right and 10 to the left of the east doorway, running along the walls up to the left and right sides of the south and north doorways. Ten of them are sculptured, the two at the sides of the east doorway representing the *Durbār* of a Hoysala king, probably Ballāla II, and the others various *Purāṇic* scenes. The pillars at the sides of every screen have on their capitals figures standing out supporting the eaves. These *madanakas* figures, as they are called in Kannada, which are mostly female, are wonderful works of art. Once there were forty of them round the temple, it is fortunate that only two are now missing. Two of them represent Durga. Three are huntresses, one bearing a bow and the others shooting birds with arrows. The pose of the latter is imposing though perfectly natural. Most of the other figures are either dancing or playing on musical instruments or dressing or decorating themselves. Several

of them are represented as wearing breeches. The majority of the *madanakai* figures also occur in the 5th row in miniature.

Attached to the outer walls of the *gorbhagriha* on the three sides are three elegantly executed earlike niches in two storeys with Vishnu figures inside. Each storey is adorned with a parapet. On the niches are sculptured from the bottom upwards these friezes—(1) elephants (2) lions (3) horsemen (4) scroll work with figures in every convolution and (5) a rail with figures mostly female between double columns. There are figures on the outer walls of the niches in both the storeys. Opposite to these niches there are on a lower level three tower-like niches resembling those at the doorways and containing figures of Durga etc. Beyond the *jagati* or railed parapet around the temple we have on the walls 80 large images of which only 19 are female. The images are not in a continuous row as in other temples of this kind. The figures representing gods and goddesses may be analysed thus: Vishnu 32 as Lakshmunarayana 2 as Vamana 1 as Narasimha 2 as Varaha 2 as Ranganatha 1 and as Balarama 1. Siva and Parvati standing 1 Siva as destroyer of Andhakasura and Gajasura 3. Hanthara 2. Surya 4. Parvati including Durga and Maheshasuramardini 5. Bhairava 2. Manmatha and Rati 1. also one each of Ganesa, Brahma, Sarasvati and Garuda. There are also figures of Ravana, Daksha, Arjuna, Bali and Sukracharya. Two of the large figures on the walls, Narasimha in the south west and Ranganatha in the north-east, are enshrined in ugly structures which disfigure the temple. There are also figures of gods and goddesses in the 3rd, 5th and 6th rows. A few interesting sculptures in the temple may also be noticed here. The last *madanakai* figure to the left of the north doorway which represents a huntress is flanked by two small figures of which the one to the left is represented as carrying a bamboo lath to the ends of which are tied a deer and a crane shot in the chase while the other gets a thorn removed from the leg by a seated figure which uses a needle for the purpose. The second figure to the right of the east doorway holds in its hand betel leaves which are true to nature while the small figure at its left side sprays scented water with a syringe. In the creeper like canopy of the figure to the left of the north doorway is sculptured on a fruit a fly perfect in every detail on which a lizard is preparing

to pounce In the rail or eighth row, to the right of the north doorway, are seen the king and queen seated witnessing a wrestling match, also 6 *pandārams* or Saiva devotees with their heads covered, to the left of the same doorway a man with a long coat, hood and *kammarband* in the act of cutting off his own head before a seated goddess (perhaps Durga) who stops him, and to the right of the north-east ugly structure a chain of destruction—the double-headed eagle or *gandabhērunda* attacking a *sarabha*, which attacks a lion, which in its turn attacks an elephant, the latter seizing a snake which is in the act of swallowing a rat with the figure of a sage wondering at the sight In the 6th row, to the left of the north doorway, is observed a female figure stripping itself on finding a lizard in the cloth The lizard is shown to the left Similarly, one of the *madanakar* figures is represented as stripping itself on finding a scorpion in the cloth, the scorpion being shown on the base But people attribute some mysterious power to the figure in this row and believe that pouring oil over it wards off the evil effects of a lizard falling on the body About 68 figures in this row are missing In the 5th row, to the left of the south doorway, is seen a female figure drawing a picture on a board, also a figure of Mōhini with the usual Dakshināmūrti wearing a check long coat and *kammarband* In the third row are seen two figures carrying a bamboo lath on the shoulders with dead game tied at the ends, figures shooting with guns and a figure of Jina

The work inside the Kēsava temple is finer in some respects than that outside There is a raised veranda on both sides of the three entrances The central pillars of the *navaranga* are similar to those of the Pārsvanātha temple at Halebīd but not so beautiful The large ceiling panel in the centre is marked by a richness of ornamentation and elaboration of details rarely found in other temples There are four exquisitely carved *madanakar* figures standing on the capitals of the four central pillars, one dressing the hair, one with a parrot on the hand and the remaining two dancing The bracelet on the hand of the figure with the parrot can be moved as also the head ornament of the one on the south-west pillar, thus testifying to the marvellous skill of the sculptor Inscriptions were discovered on the pedestals of three of these figures The ceiling panels in front of the entrances are flat and oblong in size with the figures of

the *ashtadīpalakas* sculptured in three separate panels instead of in one. Two other pillars in the *nataranga* deserve notice the well known Narasimha pillar and the one in front of the south *diarapalaka*. The latter has eight vertical bands with fine scroll work in the convolutions of which are seen delicately executed figures representing the Hindu trinity the 10 *aitars* of Vishnu the *ashtadīpalakas* and so forth. There are also lions represented with the faces of other animals. On a beam in front of the *sulhanas* or vestibule are shown the 24 *murtis* or forms of Vishnu. The lintel of the *sulhanas* doorway with the figure of Lakshminarayana in the centre shows excellent filigree work. The Kesava image is a marvel of the sculptor's art. The ceiling panels over the verandas show better work than those at the entrances. The west veranda at the south entrance has a frieze representing scenes from the *Ramayana*. On the west wall at the same entrance 8 new inscriptions were discovered.

A few words may be said here about some of the other temples in the enclosure. The Kappe Chennugaraya temple has two cells with entrances opposite to each. The chief cell with the figure of Kappe Chennugaraya faces east while the other with that of Venugopala faces north. The lintel over the *sulhanas* doorway of the chief cell has the figure of Lakshminarayana flanked by *makaras*. Here Varuna is represented as seated under a canopy leaning against the *makara* and not riding it as usual. On the lintel of the other cell we have the figure of Narasimha killing Hiranyakasipu flanked on either side by a *makara*, a Vishnu figure and an elephant. The niches at the sides of the chief cell have figures of Lakshminarayana while those at the sides of the other cell contain the figures of Sarasvati and Gaṇesa. Opposite to the Sarasvati niche there is also another with the figure of Mahishasuramardini. As in the Kesava temple there are verandas at the entrances. Three *madanakas* figures are seen on the pillars of the *navaranga*. Outside the temple is plain without any sculptures. The Viranarayana temple is a small neat building with a row of large figures on the outer walls. The number of the figures is 59 of which 23 are male and the rest female. The deities represented are Vishnu, Siva, Brahma, Sarasvati, Parvati and Bhairava. The sculpture on the north wall representing Bhuma's fight with Bhagadatta

and his elephant is very well executed. The Āṇḍāl temple has likewise figures on the outer walls. The basement and the top have also here and there rows of elephants, scroll work and *Purāṇic* scenes. The structure has the appearance of having been built with the materials belonging to some other temple. The figures on the outer walls are 31, 19 female and the rest male. Besides the usual deities, Lakshmi and Mōhini are also represented here. On the basement of the temple of the Ālvārs, both inside and outside, runs a frieze representing scenes from the *Rāmāyana*.

A large number of new inscriptions have been recently discovered in the Kēsava temple and outside. The Nanjundēsvara, Sankarēsvara, Pātālēsvara and Amirtēsvara temples deserve a passing notice. In the shrine opposite to the entrance in the Nanjundēsvara temple there is a figure of Subrahmanya seated on the peacock with five faces in front and one behind. Usually the faces are represented thus: 3 in front, 2 at the sides and 1 on the back. The Pātālēsvara temple is so called because it is situated below the level of the ground. Vīrasaiva tradition has it that on the death of Rāghavāṅka, a great Vīrasaiva teacher and poet of the 12th century, his body which was claimed by both the Brāhmins and Vīrasaivas was transformed into the *linga* which is now worshipped in the temple.

The Kēsava temple has two *mahādvāras* or outer gates on the east, of which the one to the north is surmounted by a lofty *gōpura* or tower. The other gate is known as Āne-bāgilu or the Elephant's Gate. The perforated screens, of which there are 20 in number, form a charming feature of this beautiful temple. Of these, the sculptured ones, 10 in number, deserve some notice. Five of them are to the right of the east *nava-ranga* entrance and five to the left.

1st screen to the right—The sculptures on this are said to represent the *Durbār* of king Vishnuvardhana, who built the temple in A D 1117. The top panel has the god Kēsava in the centre flanked by chauri-bearers as well as Hanumān and Garuda. The middle panel shows the king seated in the centre with his queen to the left. He holds a sword in the right hand and a flower in the left. Behind the queen stands a female attendant. To the right of the king, a little to the front, are two seated *gurus*, one of them with his hand in the teaching pose,

with two disciples at the back. There are also several officers attendants etc. in the group. Some of the figures including the royal couple have large ear lobes with ornaments. The bottom panel has roaring lions with riders as also seated lions.

3rd screen—We have on this the representation of the story of Bali the demon king making a gift to Vamana. The top panel shows Lakshminarayana flanked by Hanuman and Garuda. In the middle panel we see Trivikrama in the centre with his uplifted foot which is washed by Brahma. To his right stands Bali with folded hands and to his left two figures of Garuda one with folded hands and the other dragging Sukracharya the minister and preceptor of Bali. The lower panel represents Bali's *Durbar* his making the gift etc.

8th screen—In the top panel we have Lakshminarayana with attendants as in the 1st screen. The middle panel shows Krishna as Kallyamardana (the punisher of the serpent Kaliya) with two figures with folded hands at the sides while the lower one represents a music party.

9th screen—The 1st panel has Vishnu flanked as usual by Hanuman and Garuda. The 2nd shows Siva seated on Nandi flanked by Ganapati and Subrahmanya and further on by warriors holding flags, swords and shields. The 3rd has the *dikpalakas* (or regents of the directions) Indra to Kubera seated on their vehicles, while the 4th represents a battle scene.

10th screen—The centre of the upper panel is occupied by a figure of Lakshminarayana flanked by Garuda and another figure which is not Hanuman. The middle panel has a figure of Narasimha killing Hiranyakasipu with Garuda and Hanuman at the sides. The lower panel shows four seated figures of Prahlada with folded hands undergoing various kinds of torture. Incidentally it may be mentioned here that all the four figures of Prahlada wear *Tenkalo namam* on their foreheads. This is of some interest as proving the antiquity of this Srivaishnava mark, since we learn from one of the inscriptions at the temple (Belur 72) that the perforated screens were caused to be made by Ballala II (1173-1220) the grandson of Vishnuvardhana.

1st screen to the left of the east nataranga entrance—This is mostly similar to the 1st screen to the right. It is said to represent the *Durbar* of king Narasimha I the son of Vishnuvardhana. The top panel shows Yoganarasimha flanked by

chauri-bearers as well as Hanumān and Garuda. The middle panel has the king seated in the centre with his queen to the left. He holds a sword in the right hand and a flower in the left. At the left end are seen three seated figures with folded hands wearing coats. These may represent officers. There are also several attendants in the group. The bottom panel has lions like the 1st screen to the right.

4th screen —The 1st panel has a seated figure of Vishnu, while the 2nd illustrates the story of the churning of the milk ocean.

7th screen —The upper panel has Vishnu flanked as usual by Hanumān and Garuda. The 2nd depicts the killing of Kamsa by Krishna, while the 3rd delineates his killing the elephant Kuvalayapīda and his contest with the wrestler Chanura. The 4th shows him as playing on the flute, the notes of which are intently listened to not only by the cows but also by the wild beasts.

9th screen —This shows a figure of Ranganātha reclining on a beautifully carved serpent.

10th screen —The top panel has Lakshminārāyaṇa flanked by chauri-bearers. In the 2nd we see Hanumān and Garuda fighting over what looks like a *linga* placed between them. Both of them have laid their hands on it. The *linga* is split into two halves by the discus of Vishnu seated above. The combatants seem to have exchanged their head-dresses during the fight. We see Hanumān wearing the crown of Garuda.

The second frieze from the bottom is left blank all round the temple. The rail to the right of the east entrance gives briefly the story of the *Mahābhārata* up to the *Salya-parva*. Bhīma is shown as worshipping Ganapati and Duryōdhana as falling unwittingly at the feet of Krishna, his throne tumbling down by Krishna pressing his foot against the earth. Further on the frieze on the creeper below the rail represents briefly scenes from the *Rāmāyaṇa*. The frieze above the eaves shows exquisitely carved tiny seated figures playing on musical instruments. Three figures in the row of large images deserve mention —Balarāma with a discus in the left hand and a plough in the right, Chandra holding *kumudas* or water lilies in both the hands, and Narasiṃha with 16 hands killing Hiranyakaśipu with Kayādhu, mother of Prahlāda, and Garuda at the sides.

Of the 3 car like niches in two storeys around the *garbhagriha* (d) E
the south one has on the left outer wall Vishnu below and Saras
vati above and on the right wall Vishnu below and a sixteen
armed Narayana seated on a lotus above a four armed Garuda
supporting the lotus with two hands the other two being folded
The west niche shows on the left wall Vishnu below and Bhima
attacking Bhagadatta's elephant above and on the right wall
a female figure holding a vessel in the left hand and a flower
in the right hand with Garuda to the right below and Sarasvati
and another female figure above The left wall of the north
niche shows below a female figure with two children at the sides
to represent Krishna and Balarama The child to the right
holds a young lion with a rope May it be Bharata Sakuntala's
son? The upper portion has a female figure The right wall
of the same niche has a female figure below and Durga above
There are besides 9 tower like niches or pavilions around the
temple—2 each at the sides of the south east and north entrances
and 1 each opposite to the car like niches mentioned above
They have figures inside though in some cases the original
figures have been replaced by modern ones The left niche at
the east entrance has Bhairava and the right Durga the left
niche at the south entrance has Tandavesvara which is not
the original figure and the right Brahman with three faces and
the swan emblem and the left niche at the north entrance has
Vishnu not the original figure and the right Mabishasura
mardina The one opposite to the south car like niche has
Durga that opposite to the west niche Vaishnavi and that oppo
site to the north niche Ganapati not the original figure The
last three niches have three friezes—elephants lions and horse
men—on the base

In the interior the ceiling at the east entrance has Narasimha
in the centre the one at the south Varaha and that at the north
Kusava The central ceiling which is a grand piece of artistic
workmanship has the three gods Brahma Vishnu and Siva
sculptured on the lotus bud depending from the top the bottom
frieze illustrating scenes from the *Ramayana* There is a rafter
put across the ceiling for swinging the *ulsavavighraha* or metallic
figure of the god on certain occasions As this is not only an
eye sore but also a danger to the safety of the ceiling it has to
be removed and some other arrangement made to swing the

god The pillars are of three different sizes as in Pārsvanāthabastī at Bastīhallī near Halebīd, and, with the exception of the central four, all differ from one another in design. The arrangement of the pillars enhances the beauty of the structure. The well-known Narasimha pillar is sculptured with minute figures all round from the top to the bottom. One of the figures, a tiny bull, is known as *kadale-basava*, because it is of the size of a seed of the Bengal-gram (*kadale*). A small vacant space on the south face of the pillar is said to have been left blank by the sculptor as a challenge to any artist who can appropriately fill it up. Another pillar, that in front of the south *dvārapālaka*, shows marvellous filigree work. It is perhaps the most beautiful pillar in the temple.

The west cell of the Kappe-Chennigarāya temple has three niches in three directions around the *garbhagriha*. The west wall of the Viranārāyana temple has a peculiar standing figure with three crowned heads. It is richly ornamented and holds a discus and a conch in the upper hands, the other hands being broken. It does not seem to represent either Dattātrēya or Brahma. There is a fine pond in the north-east of the temple enclosure, at the entrance to which there are two elephants at the sides and two pavilions to the north and south. It is known as the Vāsudēva pond. Two signed images are to be seen on the outer walls of two minor shrines in the enclosure. One of them, to be seen on the south wall of the Jīyar shrine, is the goddess Ādhārasakti executed by Bhandarī Madhuvanna, while the other, to be seen on the south wall of the Āndāl shrine, is Vēnugōpālā executed by Madhuvanna. At a short distance to the west of Belur is the Sankarēsvara temple, a Hoysala structure, consisting of a *garbhagriha*, a *sukhanasi* and a Nandimantapa. The *navaranga* is gone, only the base being left. The temple is surmounted by a stone tower. The *sukhanasi* doorway is well executed. It has perforated screens at the sides and a well-carved pediment with Tāndavēsvara in the centre flanked by *makaras*. The *garbhagriha* and *sukhanasi* have flat lotus ceilings. There is a good figure of Tāndavēsvara in front of the embankment over the *sukhanasi*. The outer walls have single and double pilasters surmounted by miniature turrets. To the north of the temple is a small plain shrine of the goddess.

For fuller details about this temple Rao Bahadur R. Narasimhachari's monograph on it, in the *Mysore Archaeological Series* (No II), might be usefully consulted.

The scenery round Belur has often been admired. Mrs. Bowring has left on record a description of the impression it left on her when she first visited. In a letter dated December 10, 1863 she wrote (vide *Lavin Bowring's Eastern Experiences*)—

I shall never forget the view on entering Belur. It was most lovely. Green rice crops sloping down to the edge of the tank, a fine sheet of blue water surrounded by large trees, above which appeared the grey walls of the fortress and the white dome and towers of the famous temple—beyond the Hababudan mountains looking purple and blue—in the foreground the procession came out to greet us, the people in white dress & scarlet turbans and scarlet uniforms, a camel with blue trappings and a big drum on her back, and a crowd, one mass of gay colour moving along the road, while women in their bright clothes, were descending the stone steps of the tank with large brass vessels on their heads. It was altogether as beautiful a sight as anything I have seen.

Belvadi—A village in the Maggo taluk in the Arkalgud taluk, about 8 miles to the north of Halebid on the Banavar Belur Road. Population 891.

It is now a Jagir granted by Krishnaraja Wodeyar the Second in 1760 A.D. to the Sringeri *matha*. During the time of the early Hoysala kings it seems to have been an important Jaina settlement. Two inscriptions carved on a single slab of stone standing on the site of the old village (Hale Belvadi) Belur 171 E C V dated 1160 and 1208 A.D. respectively record the grant of certain lands to the god Jannesvara of Belvadi. It is said that there was a Jaina

basti in the village, though no traces of the same could be discovered now. It also appears that many pillars and other carved stones, presumably of some Jaina *basti*, lie submerged in the village tank bed. Belvādi is, however, now famous for a beautiful Vishnu temple it contains. The temple is a *Trikūtāchala*, i.e., triple-shrined, in design and is dedicated to Vēnugōpāla, Yōga-Narasimha and Vīra-Nārāyana, the last being the principal image after which the temple is named. It is a fine specimen of Hoysala architecture and is perhaps the biggest in size among the *Trikūtāchala* temples in the State. The date of its construction is not known nor is there any means of ascertaining it. A huge slab measuring 11' × 6' is lying by the side of the temple showing indications of its having contained inscriptions from top to bottom. The whole of the inscriptions is now effaced except a few letters here and there at the edges. Another inscription standing in front of the above is dated *Saka* 1531 recording the grant of the village Timmapura for the services of the god Vīra-Nārāyana. Both these are not of any help in fixing the date of the temple. The style and the architectural character of the temple, however, enable us to determine the date of the temple approximately. The period between the 11th and the 13th centuries was the period of the greatest building activity in this country and the conversion to Vaishnavism from Jainism of the Hoysala king Bitti Dēva (afterwards called Vishnuvardhana) about the year 1116 may be said to mark the beginning of this building activity. During the two centuries that succeeded this memorable event, temples dedicated to Vishnu and Siva began to spring up with great rapidity throughout the country and it is this extraordinary religious zeal that soon brought into existence a new style of architecture, which has been called till recently as "Chalukyan," but now more generally as "Hoysala." The plan generally adopted in the case of all these temples of this style is that the three cells containing the image with or without *sukhanas* attached to these are connected with a *navaranga* usually of nine *ankanas*, the *nataranga* having

a porch or a *mukhamantapa* of two or three columns deep in front of it.

The Vira Narayana temple at Belvadur is more elaborate than any of these in design and presents many interesting points not met with in any other *Trikutachala* temple as far discovered. For these reasons a date later than any of the above—namely 1500 A.D. has been assigned to it. The temple faces east and consists of a pillared hall or *sabhamantapa* measuring 20—0 square and of the shape of the broken square. The hall is supported by forty six freely standing pillars. Along the two axial bases of the *mantapa* there is the main entrance on the east flanked by two beautifully carved elephants and on the south and north there are two cells with their *sukhanasis* containing the Vinugopala and Yuga Narasimha images respectively. On the west however instead of a temple shrine as is usually the case there is a complete temple in itself with a *mukhamantapa*, *nataranga*, *sukhanasi* and *garbhagudi* and it is connected with the *sabhamantapa* with a small corridor. At the east end of this corridor and at right angles to it there is an open veranda 10' by 9' deep facing the Vira Narayana shrine and running across the whole width of the *sabhamantapa*. Sixteen pillars in the middle of the *sabhamantapa* form an inner square measuring 20—0 each way and stand on a slightly raised platform. All the three shrines and their *sukhanasis* measure 8—6 square and 8—2 \times 8—6 respectively. The *nataranga* of the Vira Narayana shrine measures 22—10 each way. The *nataranga* must necessarily have been very dark formerly but a window of about 3—0 wide has been recently opened in the south wall to admit light inside. The *mukhamantapa* is of the shape of a broken square and is supported on twenty two pillars the four central pillars forming again a raised platform as usual. Both *mantapas* are surrounded by a low screen wall which also forms a raised seat inside. In front of the temple and at a distance of about fifty feet from it, there is an entrance *mantapa* on a raised platform called *upparige* by the local people with a flight of steps leading to it. It consists of a hall 28 square with a front porch 14 \times 11 having stone benches on either side. The porch is supported by eight pillars in front and two pillars at the back. Both the front and the back entrances of the *upparige* are flanked by beautifully carved elephants placed

on raised pedestals The construction of the roof of the *upparige* is peculiar The middle *ankana* which is supported on four massive pillars has got flat terraced roof while sloping roof is provided on all the four sides over the remaining *ankanas*

All the ceiling panels of the temple, except those of the veranda, are well carved Some of these are flat and are made up of small compartments either 4, 6, or 9 in number divided by flat bands, and containing nicely chiselled rosettes The majority, however, are dome-like ceilings containing intricate geometrical patterns of various designs and exhibit unrivalled skill and consummate mastery of details possessed by the artisans Besides these there are three other flat ceilings which are very interesting The first has got Vēnugōpāla surrounded by two circles of creepers, one enclosing drummers and dancing figures and the other enclosing *chakra* and *sankha* alternately The second ceiling has got Krishna as Kālingamardana in the centre enclosed by entwining serpents and creepers. On the outer circle are cows, Gōpikas and a tree with Hanumān on the top The third ceiling has got a central circular panel and a band round it containing warriors in different postures In the four corners of this panel, instead of the usual *yali*, there are birds in the act of suckling their young ones The pillars of the *mantapa* and of the *navaranga* are all well carved and are in good proportion Two of the pillars of the connecting corridor, however, are star-shaped in plan As in the case of the temples at Sōmanāthpur and Nuggihalli, the outer walls of the two subsidiary shrines of Vēnugōpāla and Yōga-Narasimha have got images carved on them Beginning with the north end of the east wall of the Vēnugōpāla shrine and going round it, the images carved are as follows —

A female figure with Akshamāla, *agni*, *chakra* and *sankha* as attributes, (2) Garuda, (3) Nārāyana, (4) Kēsava, (5) A *sanyāsi* with *danda* and *kamandala*, (6) Vishnu with two attendants and a chauri-bearer on either side, (7) A figure, probably Jain, in Yōga posture on a Padmāsana, (8) Vēnugōpāla, (9) Kālingamardana, (10) Garuda, (11) Purushōttama with two attendants and a chauri-bearer on either side, (12) Narasimha, (13) Sṛīdhara, (14) Nārāyana, (15) Arjuna, in the act of shooting a fish, (16) Gōvardhanadhārī, (17) Gōvinda with two attendant deities, one with *parasu* and fruit and the other with *ankusa* and fruit,

(18) Female figure with *padmā chakrā sanlha* and fruit as *ntrā hutes* (19) A warrior with a bow and arrow and (20) Varaha

Beginning with the south end of the east wall of the Yoga Narasimha shrine the images in order are—(1) Drummer (2) Female figure with bells in both hands (3) Kabhgamardana (4) Female figure with *Vīṇā*, (5) Drummer (6) Varaha (7) Female figure with *padmā* and fruit (8) Warrior with sword and shield (9) Garuda (10) Vishnu with a female attendant and a *chauri* bearer on either side (11) Figure with *pnrasu* and fruit (12) Female figure with water pot and *padma* (13) Narayana (14) Narasimha (15) Female figure with fruit and *pasa* (16) Female figure with fruit and *padma* (17) Pradyumna with a female attendant and two *chauri* bearers on either side (17) Female figure with mirror in hand (19) Female figure with *padmā* and fruit (20) Kṛṣṇa (21) Sri Krishna (22) Female attendant (23) Warrior with bow and arrow (24) Garuda (25) Pradyumna with Garuda *chauri* bearer and a female attendant on either side (26) Figure with *nakusa* and water pot (27) Female figure with *pasa* and water pot (28) *Vāṇinā* (29) Figure with *padmā* and water pot (30) Yoga Narasimha with *chauri* bearer on either side and (31) Bhakta Vighraha. All these are however unfortunately disfigured.

The image Narasimha in the north cell is about 6 in height including the pedestal and about 7—6 including the *prabha* or arch behind. The god is seated on a *padmasana* in the *Utkulika* posture the *Yōgapatta* (band) going round and keeping the legs in position. The god has got four hands and is holding *chakra* in the upper right hand *sanlha* in the upper left while the two other hands are stretched forward and supported on the knees. This form of the image is called *Ketala Narasimha* or *Yoga-Narasimha*. The image is flanked by *Sridevi* and *Bhudevi* and the *Dasavatara*s (ten incarnations of Vishnu) are carved on the *prabhata*. The image of Venugopala in the south shrine is also a very beautiful one. The figure is about 8 feet in height including the pedestal and the *prabha*. The god is flanked by *Sridevi* and *Bhudevi* and is surrounded by cows cowherds and *Gopis*. *Chakra padma gada* and *sanlha* are carved on the *prabha* on the back of the image. Garuda is carved on the pedestal as usual. The image is said to be one of the best Venugopala figures so far discovered. The *Vira Narayana*

image in the back cell excels both these in beauty and workmanship. The image is more than eight feet in height including the pedestal and the *prabha*. The god has four hands, is standing on a *padmāsana* and is flanked by two female chauri-bearers in addition to *Srīdēvi* and *Bhūdēvi* as usual. He holds a *padma* and *gada* in the two upper hands. The two lower are outstretched, the right hand of which is in the *Katakahasta* pose, while the left hand holds something which is called *Vīra-mudra*. The *prabhāvali* is profusely carved and contains the *mākaras* and *Dasāvatāra* images as usual. The graceful outline of the body, the excellent proportion of the limbs and the characteristic delicate chiselling of the jewels and of the drapery mark this as one of the best specimens of Hoysala art in plastic work. The present condition of the temple is far from satisfactory. As already stated, no image on the walls has escaped mutilation at the hands of mischievous people. The veranda behind the *sabhāmantapa* is much dilapidated. The pillars of the veranda are out of plumb and the capitals of two of these are broken. The southern half of the veranda is closed by an ugly mud wall. The raised seats in the *mantapas* require resetting. The drip stone of the *sabhāmantapa* is broken in places. The temple suffers much for want of a decent compound wall. The front wall of the *upparige* has sunk and the temple is said to be very leaky.

Bendekere

Bendekere. A village in Alur Sub-Taluk Population 25

The temples of *Gōpālakṛishna* and *Rāmēsvara* are of interest here. On the slab containing the inscription in the *Gōpālakṛishna* temple are sculptured a figure of *Narasimha* in the act of tearing out the entrails of the demon *Hiranyakasipu* and a figure of *Vishnu* below it. In the *Rāmēsvara* temple, which is a pretty good structure facing south, there is a well carved figure of *Vishnu* in the cell opposite the entrance and a *linga* in the cell to the left. An epigraph to be seen here is very artistically executed. It contains nearly seventy lines and is excellently preserved by reason of having lain buried beyond the reach of injury.

Bommenhalli

Bommenhalli A village in Arsikere Taluk Population 455

Asikere 118 (E C V) standing in Nanjanna's backyard at this place is one of the largest inscription stones being more than 10 feet high and 3 feet wide. The materials of the Hoysala temple of Mallikarjuna mentioned in it are scattered about the place. The temple appears to have been a *trikutachala* as three gods were apparently installed in it. They are stated to be Mallikarjuna, Madhusudhana and Surya. At the same time an *agrahara* seems to have been erected around it. Both the *agrahara* and the three pinnacled temple as it is described were built by Madhusudhana the leading Brahmin general of the day. His brother Dandanayaka Machirajayya made a grant for the daily offerings of the gods installed in the temple. The great *Haristara* (poet) Trivikrama is said to have composed the inscription from which the above details are taken. The inscription is dated in 1191 A D in the reign of Ballala II. The temple as above mentioned is now a mass of ruins.

Channarayapatna — 1 taluk in the east. Area 113 square miles. Head quarters at Channarayapatna. Contains the following *hoblis* villages and population —

Hoblis	Villages	Hamlets	Villages classified		Population
			Government	Sarvamangya	
Anathur	50	15	50		11 8
Balur	60	3	60		1 4 8
Channarayapatna	50	13	50		14 301
Dandaganahalli	53	8	53		1 14
Hirshave	60	5	60		14 60
Nuggihalli	55	7	55		13 78
Sravana Belgola	61	18	57	4	17 457
Total	389	69	735	4	95 23

Channarayapatna 3 106 Sravana Belgola 2 135 Nuggi
halli 1 527 Hirshave 1 364 Bagur 1 276 Principal places with population

The taluk drains southwards to the Hemavati; the streams forming many large tanks. An elevated ridge runs along

the north from east to west, a few small streams from which flow north and east to the Shimsha. It is a generally open and undulating country. Except a low ridge on the western boundary, the principal hills are the isolated peaks at the Jain settlement of Sravana-Belgola. The soil is mostly fertile and produces the usual wet and dry crops, but along the western border is generally shallow and very stony. The soil is of the ordinary light red and sandy description going through few gradations, except near Nuggihalli where there is some soil of a colour approaching black. The pasture lands are very extensive and support large herds of cattle and sheep. There is a little irrigation from the Hole-Narsipur north channel. A considerable amount of the labour in the coffee districts is drawn from this taluk. It may prove to be rich in minerals, and gold-mining has recently been revived. Sravana-Belgola is noted for the manufacture of brass vessels. Small articles of silk are made by Muhammadans at Channarayapatna.

This part of the District, after the overthrow of the Hoysala power, became one of the possessions of the Chief of Hole-Narsipur. It was conquered by Chāma Rāja Wodeyar in 1633, and annexed to Mysore.

The revenue settlement was introduced in 1885. The area of the taluk was thus distributed

<i>Culturable —</i>				Acre	Total
Dry	138,723 }	155,235
Wet	11,479 }	
Garden	5,033 }	
<i>Unculturable</i>					
Roads, etc	73,353
				Total acres	228,588

The unoccupied area was 13,793 acres, 13,699 being dry land. The total revenue demand for 1919-20 was Rs. 1,92,629-12-0.

The revision settlement was introduced with effect from 1924-25 and the distribution of the culturable area according to resettlement is as follows —

Occupied area —	Area	Total
Dry	1 07 335 }	129 7.0
Wet	7 323 }	
Garden	15 112 }	
Unoccupied area.—		
Dry	14 007 }	14 129
Wet	42 }	
Garden	0 }	
Kharab land		101 268
Inam		8 323
Total		27 1'0

The average rainfall at Channarayana for 30 years (1891-1920) and at the other stations for 2 years (1918-1919) was as follows —

Month	Channarayana	Ba ar	Dandeganehalli	Nuggahalli	Anathi
January	0.0				
February	0.1				
March	0.17				
April	1.00	0.43	0.03	1.5	1.5

The Bangalore Hassan and Serangapatam-Shimoga roads cross at Channarayana whence there are roads to the north to Nuggahalli and the railway at Tiptur, south west

to Hole-Narsipur and east to Sravana-Belgola From Nuggihalli there is a road to Hirisāve on the trunk road There is also a branch road from Channarāyapatna to Bagur and the main road

Channarāyapatna

Channarayapatna. A town situated in 12° 54' N lat, 76° E long, 32 miles south by east of the railway at Arsikere and 23 miles east of Hassan on the Bangalore-Hassan road Head-quarters of the taluk bearing the same name and a Municipality

Population in 1921	Males	Females	Total
Hindus	1,276	1,294	2,570
Muhammadans	273	242	515
Jains	14	5	19
Christians	1	1	2
Total	1,564	1,542	3,106

The town was originally called Kolatur, and consisted only of an *agrahāram* Māchala Dēvi and Sāntala Dēvi, two dancing girls, built the large tank on the north-east About the year 1600, Lakshmappa Nāyak, the chief of Hole-Narsipur, took the place from Puttagiriya the Hebbar, and bestowed it as a *jāgīr* on his own son Channa Rāya, whom he had obtained by favour of the God Channarāyaswāmī, a name of Vishnu To this deity a temple was erected, and the town was called *Channarāyapatna*

The fort was built by a chief named Dodda Basavaiya, and when captured by Chāma-Rāja Wodeyar of Mysore in 1633, was in possession of the chief of Hole-Narsipur It was subsequently re-built by Haidar Ali, with a wet moat and traverse gateways, having suffered much in repeated attacks from the Mahrattas

Chatachattahalli — A village close to Halebidu. Population 601. Chatachattahalli

There are three temples here dedicated to Chattervara Tirumaladeva and Virabhadra. All of them are in ruins. The Chattervara temple is a fine structure though without sculptures on the outer walls. It faces the west and has three cells with a figure of Vishnu in the cell opposite the entrance, a figure of the sun in the south cell and the linga in the north. All the cells have a *sullondasi* or vestibule which is a rare feature in temples of this style, that of the linga having a doorway with screens on both the sides while the others are left open. The Vishnu and Surya figures are well carved. All the 11 ceiling panels in the *poraranga* are elegantly executed, the central one resembling that of the porch in front of the Isvara temple at Halebidu. This appears to be the only temple of this style with a figure of Surya installed as one of the principal deities. All the niches in the *poraranga* are empty. It would appear that some years ago the figures in them were removed by some officer. The exterior of the Chattervara temple also presents a neat and elegant appearance. There is a porch in front with a good ceiling panel surmounted by a tower. All the three cells have also towers over them with a projection in front. There are again four smaller towers at the corners and one in the centre of the roof, the whole producing a very pleasing effect. The exterior of each cell has the appearance of a room having three bay windows on the three sides. The basement too bears evidence of architectural skill. The neatness and symmetry of this temple in every detail are noteworthy.

Dodda Gaddavalli — A village about 12 miles from Halebidu. Population 532. Dodda Gaddavalli.

The Lakshminarayana temple at this place is a typical example of Hoysala architecture. It is quadruple i.e. has four cells and appears to be the only Hoysala building of this kind in the State. It is situated in a courtyard enclosed by an old stone wall about seven feet high with two *mohadvaras* or outer gates on the east and west. The west gate has a fine entrance porch or *monapa* adorned with beautiful carvings. The central ceiling shows fine head work with a circular panel in the middle sculptured with Tandavayara while the others have floral decoration.

in the middle with circular panels of *ashta-dīkpālakas* or regents of the eight directions around. The porch has verandas all round. There was likewise a porch at the east gate, but this has fallen along with a portion of the compound wall. The materials of the porch as well as the coping stones of the wall have been removed and utilised for the steps, etc., of the tank close by. At the corners of the enclosure are four small shrines surmounted by stone towers and Hoysala crests. The doorways of the shrines are well carved, the same being the case with all the doorways of the temple. The shrine at the north-west corner has Tāndavēsvara in front of the Hoysala crest, while that at the north-east has Sarasvatī on the pediment. In the north-east of the temple enclosure is a shrine of Bhairava, also surmounted by a stone tower and the Hoysala crest.

The temple is rectangular, and all its four cells, three of which are in the southern portion and one in the northern, have stone towers and Hoysala crests. Of the three cells in the south, which are attached to a common *navaranga*, the east cell has Lakshmi, the west a *linga* called Bhūtanātha and the south Bhairava, not the original figure which must have been Vishnu as indicated by the Garuda emblem on the pedestal. The cell in the north has Kālī. The Lakshmi and the *linga* cells face each other, as also do the Vishnu and the Kālī cells. The Vishnu and the *linga* cells have an open *sukhanasī*. The *garbhagriha* and *sukhanasī* of all the three cells have lotus ceilings. The common *navaranga* has verandas on all the three sides and nine good ceilings of a square shape with projecting circular panels, the central one having what looks like Tāndavēsvara and the others the *ashta-dīkpālakas*. Lakshmi is a fine standing figure, about $3\frac{1}{2}$ feet high, flanked by chauri-bearers. She has four hands, the upper holding a discus and a conch, the right lower a mace and the left lower a rosary. The lintel of the *garbhagriha* doorway of the Lakshmi cell has Tāndavēsvara, that of the Vishnu cell Yogā-Narasimha and that of the *linga* cell Gajalakshmi. The common *navaranga* of the cells in the south is attached without any partition to the *navaranga* of the Kālī cell. Both the *navarangas* measure about 30 feet in length, the width being about 15 feet. The *navaranga* of the Kālī cell has two entrances on the east and west, and its ceiling has a dancing male figure playing on the vina or lute. The west

entrance has *Vaishava dvarepatalas* at the sides. The ceiling of the *garbhagriha* of the *Kali* cell has a lotus while that of the *sulhanasi* shows a kneeling male figure holding a sword in the right hand and a cup in the left. *Kali* is a terrific eight-armed figure about three feet high seated on a demon the attributes in the right hands being a trident a sword an arrow and an axe and those in the left a drum a snake a bow and a cup. The top of the *prabhavali* or halo has nine seated *pratas* or ghouls armed with swords while the pedestal has one big *prata* with tusks. The hotel of the *garbhagriha* doorway has a tusked head in the middle flanked by three *pratas* on either side with intervening heads similar to the one in the middle. The jombs have naked female figures wearing *avadals*. In the *sulhanasi* stand facing each other two naked male *idals* or goblins about six feet high. The hands of the *idala* to the right are broken. The one to the left has a protruding tongue and holds a sword in the right hand and a skull together with a decapitated head in the left. Both have large ear lobes. The two *natarongas* have ten pillars and the verandas four. There are likewise eight pilasters two each in the *sulhanasis* of the four cells.

The east outer wall of the *Kali* cell has a figure of *Kali*. The outer walls of all the cells have single or double pilasters surmounted by ornamental turrets with a few figures here and there. Of the towers that over the *Lakshmi* cell shows here and there figures of *Yakshas* etc. The turrets on the outer walls of the *Lakshmi* and *Vishnu* cells show finer work than those on the others. There are several niches on the outer walls but they contain inscriptions instead of figures as in other temples. The *Bhairava* shrine appears to mar the symmetry of this fine quadruple temple. From an inscription at the temple *E C V Hassan 149* we learn that it was built in A D 1114 four years before the *Kesava* temple at *Belur*. The inscription compares the architect *Maanyoja* to *Visvakarma* the architect of the gods and gives at the end a technical description of the structure. This unique temple has been conserved under the orders of Government. No worship is conducted in it at present. There are several mutilated figures lying in the temple enclosure and outside. At the entrance to the village is another *Hoysala* temple in a dilapidated condition. The village contains 10 families of *Srivaishnavas* who are

disciples of the Parakāla-matha It is called Abhinava-Kollā-pura in the inscriptions

For further details, see Mr R Narsimhachar's monograph about this temple in the *Mysore Archæological Series* (No III)

Garudangiri

Garudangiri A conspicuous old hill-fort, 3,680 feet above the level of the sea, on the boundary of the District, about seven miles north-east of Bānavar It was originally called Nonabanakal, but received the present name on being fortified in 1660 by the Rāja of Mysore, in order to be a protection to the frontier on that side, then overrun with jungle In 1770 it was occupied by the Mahrattas under Tryambak Māma, after their defeat of Haidar at Chinkuruli but was restored to Mysore on the conclusion of peace On the death of Tipu Sultān, it was delivered up to the British, and was garrisoned for some time by the Mysore troops

Gijihalli

Gijihalli. A village in Arsikere Taluk Population 207 The Sambhuhnga temple to the north-west of this place is a small Hoysala building in ruins It consists of a *garbhagriha*, a *sukhanasi* and a *navaranga*, and has perforated screens and ceilings adorned with lotuses Three inscriptions are to be seen here, as also one at the entrance to the village

Gorur

Gorur A village in the Hassan taluk Population 1,015

About six miles north of Arkalgud The Yōga-Narasimha temple at this place stands on the left bank of the Hēmāvati, facing west The temple is architecturally unimportant but it presents a very artistic appearance on account of its situation on the bank of a broad river with cool shady groves of trees in front and a flight of steps leading down to the bed of the river The temple consists of a *garbhagudi*, a *navaranga* and *sukhanasi* The structure is simple and plain A small *prākāra* (compound wall) most of which has fallen surrounds the temple There is a small *mantapa* with a *gōpura* (tower) in front of the temple The image is about six feet high, sitting in *yōga* posture on a pedestal about 1½' high The whole image as well as the *prabhāvali* is covered with metal plate. The front two hands

rest on the knee while the back hands hold *chakra* and *sankha*. Garuda is carved on the pedestal as usual. The Vasudeva temple is in the heart of the same village. It is a simple structure facing east with no architectural beauty and consists of a *garbhagudi*, a *sulhanasi*, a *nararanga* and a porch. There are also two rooms on either side of the *nararanga*. The *nararanga* measures about 50—0 x 24—0 the central platform measuring 11—7 square. Each pillar of the *nararanga* is made up of three shapes, square to a certain height from the bottom, octagonal to a certain height above it and then sixteen sided up to the capital.

There are four inscriptions within the temple one of which Hassan 186 dated A.D. 1510 records the remission of certain taxes on the temple lands. The temple must have therefore existed long before. Another inscription Hassan 194 which is a small marble tablet fixed on the parapet wall above the porch states that the *temple* of the temple was constructed and certain repairs carried out in the year A.D. 1663. The main image Vasudéva is about 5 high standing on a pedestal about one foot high. The attributes of the god are the *conch* and *discus* in the two upper hands and *lotus* and *mace* in the two lower hands. The image is very beautifully carved. A small room has been formed by means of a mud partition wall in the left corner of the *nararanga* in which an image of Bhūshyākara is kept. The room which is to the south of the *nararanga* contains the goddess seated on a pedestal about two feet high and holding lotuses in the two back hands while the two front hands are in the *abhaya* and *varada* poses. The room to the north of the *nararanga* has got the images of Vishvakṣena and the *Alvars*.

Grama—A large village seven miles east of Hassan on the Bangalore road. From 1882 to 1891 it was the head quarters of a sub taluk of the same name under Hassan taluk comprising the Grama, Dudda and Kattaya *hoblis*. It is now the head quarters of the Grama *hobli*. Population 1928.

From inscriptions it appears that it was founded in the 12th century by Santala Dēvi queen of the Hoysala King Vishnu vardhana and was at first named Santigrāma.

At this place there are four Hoysala temples, of which the one dedicated to Kēśava is the largest. Its front hall and veranda with *gōpura* appear to be later additions. The former has two entrances on the east and north, the latter with a porch in front. The east doorway once belonged to a *basti* at Eleyur, Channarayapatna Taluk. It bears a Jaina inscription on the lintel. The side stones to the north flight of steps leading to the front veranda were found to be parts of an inscribed slab, the fragmentary record on the right stone gives the name of the donor as Tippayya, while that on the left contains portions of a very common imprecatory verse. The outer walls have miniature turrets over single or double pilasters. The *garbhagriha* is now surmounted by a plaster tower. The *navaranga* has only one of the four original pillars, the other three being modern. The central ceiling has been removed and glass windows have been set up to admit light to the interior. It is stated that during a Muhammadan raid, the *navaranga*, in which all the temple things were stored, was set fire to by the raiders, the marks of injury by fire being visible even now on the walls, pillar, etc. The *utsava-vigraha* or metallic image of the god is said to have been brought from Tinnevely. The Narasimha temple consists of a *garbhagriha* surmounted by a stone tower, a *sukhanasi*, a central hall and a porch. The god is seated in the posture of meditation and is hence known as Yōga-Narasimha. The ceilings of the *garbhagriha* and *sukhanasi* have single lotuses, as also those of the *navaranga* with the exception of the central flat one which has nine lotuses. The outer walls of the *garbhagriha* and *sukhanasi* have a row of elephants at the bottom and above it five mouldings with delicate scroll and floral work, the whole forming the plinth. Above these come the usual pilasters and turrets. The porch has a ceiling with Lakshmi-Narasimha in the centre surrounded by eight other Narasimhas. In the *prākāra* or enclosure are three inscribed stones, two of them completely effaced and the third with only a few letters left here and there on it. The Dharmēśvara temple is Hoysala so far as the *garbhagriha* and *sukhanasi* are concerned, the other portions having been recently renovated. The *garbhagriha* is surmounted by a modern plaster tower. Its finely carved doorway has fine fascias on either side with well executed small figures, all the bottom ones on the right side being male and

those on the left female. The figures on the first fascias on both sides represent Manmatha and his wife Rati. The *sukhanas* doorway has two niches at the sides enshrining as usual Ganespati and Mahishasuramardini. The ceilings which are about 1½ feet deep are adorned with lotuses. The *navaranga* has two entrances on the north and east and four pillars supporting a good ceiling with a lotus of three concentric rows of petals. It has also a good doorway with Gajalakshmi on the lintel. The outer walls have single or double pilasters surmounted by turrets with occasional figures such as Mohini Bhairava &c. &c. between pilasters. One of the mouldings at the bottom has roaring lions with intervening lion heads. According to *E. C. V. Hassan* 116 this temple was caused to be erected in A.D. 1123 by Marasingaya father of Santale the senior queen of the Hoysala king Vishnuvardhana.

The fourth Hoysala temple at Grama is the Virabhadra a double temple with two cells, the main cell enshrining Virabhadra facing east and the other facing north. It has an entrance porch with verandas supported by pillars which are carved on two sides with long pilasters surmounted by turrets. A good figure of Mahishasuramardini locally known as Bahi which once occupied the south cell is now kept in the *sukhanas*. This is a eight handed figure holding a discus, a conch, a sword, a shield, a bow and an arrow in six hands, the remaining two hands seizing the head of a demon and spearing him. Of the ceilings in the *navaranga* which are all flat, the central one has 9 lotuses while the others have one each except those in front of the cells and the entrance which have 4 each. There is also a *basti* in the village said to have been dedicated to Santinatha by Santale queen of Vishnuvardhana. But the image now found in the *basti* does not appear to be the original one inasmuch as an inscription discovered on its pedestal tells us that it represents the Jina Sumati and that it was set up by a merchant. There are also two Chaturvimsati Urthahkara panels in the *basti*. According to the traditional account of the place all the temples there were renovated by queen Santale the work of renovation having begun in the *saka* year 1015 (A.D. 1093) as indicated by the chronogram *moyanolo*. The verse mentioning this fact runs thus —

*Mayonaka Sahiva-tatsare Srimukhe tathin Vaisakho sito
panchamya divi prarombhom atonot*

After narrating the story of the conversion of Vishnuvardhana to the Vaishnava faith by Rāmānuja at Tonnur as a result of exorcising the spirit that had possessed his daughter Padma, the account goes on to say that on Sāntale, who was childless, showing a leaning towards Jainism, Vishnuvardhana sent her with a large sum of money to Halebīd, and that on the way she restored the temples as stated above. Vishnuvardhana's successors protected the village for 235 years, and then Bukka and his successors for 325 years. The village was named Sāntigrāma because it was built by Sāntale. An inscription at the place states, however, that Vishnuvardhana granted Sāntigrāma to Sāntale in about A D 1123. The village has about 25 families of Hebbar Srīvaishnavas, being one of their early settlements. Markulī, a village two miles from Grāma, is said to possess a *panchakūta* or five-celled *basti*, as at Kambadahalli, the Jinas enshrined being Ādisvara, Nēmi, Pārsva, Pushpadanta and Supārsva. There is also said to be a sixteen-armed figure of the Yakshi Chakrēsvari in the same *basti*.

Hangal

Hangal. A village in the Arkalgud Taluk

On the outskirts of the tank called Perumāl Samudra at this place, so called after the name of the general of the Hoysala King Narasimha III, stands a small Isvara temple completely enveloped by a grove of tall trees. The temple is now in utter ruins but from the excellent workmanship which can still be seen inside, it must be presumed that it was once a structure of some architectural merit. The *garbhagrīha* or the adytum and the *sukhanasī* or the vestibule are the only parts now standing. All the outer walls have fallen down and appear to have been rebuilt in brick and mortar sometime ago. The temple is neglected and no worship is performed. Both the *garbhagrīha* and the *sukhanasī* ceiling are dome-like with the usual lotus bud hanging down in the centre. *Ashtadīkṣpālakas* (guardian angels of the quarters) are beautifully carved on the sides of the octagon. There is a Nandi or a bull in front of the temple and also a broken image. The age of the temple is not definitely known. There is an inscribed slab lying in front of the temple dated A D 1302, which has no reference to the temple as it records only the grant of certain lands to one Manchannōpādhyāya of Hanugal.

Halebid —A village in the Belur taluk 18 miles south of the railway at Banavar and 11 miles east of Belur on the Belur Banavar road Head quarters of the Halebid hobli Population 1,297

The village of *Hale Bidu* old capital marks the site of the ancient city of Dorasamudra Dvarasamudra or Dvaravati pura the wealthy capital of the Hoysala kings founded early in the 11th century The city was taken by the Muhammadan general Kafur in 1310 A D and plundered of its immense wealth In 1326 another Muhammadan army carried off what remained and totally destroyed the city The fallen king after this event took up his residence first at Tondanur (Tonnur Mysore District) and then at other places far to the east of his dominions in the Tamil country

The splendour of the city is attested not only by the account of the fabulous riches obtained from its conquest as related by Muhammadan historians but by its architectural monuments which still rank among the master pieces of Hindu art The most remarkable of these are the Hoysaleswara and Kedarāswara temples The latter was the smaller, and a gem of art According to inscriptions this temple was erected by Ballala II and his wife Abhinava Ketala Devi at the beginning of the 13th century Fergusson the great authority on architecture described it as one of the most exquisite specimens of Chalukyan architecture in existence and one of the most typical He also points out that by a curious coincidence it was contemporaneous with the English cathedrals of Lincoln Salisbury and Wells or the great French churches at Amiens Rheims and Chartres of course without communication and adds it is worthy of remark that the great architectural age in India should have been the 13th century which witnessed such a wonderful development of a kindred style (the Gothic) in Europe This unique work of art it is lamentable to state is a thing of the past Drawings of a hundred years ago show that it was then intact But a photograph of about fifty years ago shows a banyan tree rooted in and growing

out of the *Vimāna*. This was allowed to continue spreading without check, and in the course of about fifteen years had covered up the most beautiful part of the sculpture. The roots thrust out the images and stones, many of which were sent to Bangalore, Mysore and other places. The tree was now removed, but it proved too late. A photograph of 1886 shows what was then left. Detailed drawings were now made to scale of the different parts, the stones were numbered and the whole was virtually dismantled, with some intention, never fulfilled, of erecting the building elsewhere. Recently a number of the best statues were transferred to the enclosures of the Hoysalēśvara temple and set up there, but eventually an enclosure wall was provided for the Kēdārēśvara itself, and there the debris of the temple now lies. The large Hoysalēśvara temple, though never completed, is in better preservation. The marvellous elaboration of ornamental sculpture round the walls, and the general architectural effect, have elicited from the highest authority on these subjects the opinion that "taken together it is perhaps the building on which the advocate of Hindu architecture would desire to take his stand."

The restoration of the ruined temple of Kēdārēśvara at Halebid has been carried out under the direction of the P.W.D. and the basement and other structural parts have been completed.

The plain Jain *bastis*, though cast completely into the shade by the ornate Brāhman temples, are also striking buildings. The city is said to have originally contained no less than 720 *bastis*. Three only now remain, those of Ādinathēśvara, Sāntiśvara and Pārsvanāthēśvara, the latter of which is the largest.

Around a small hill called Benne-gudda are pointed out portions of the old wall, and the site of the palace to the east. South of the palace was the *Āne Gundī* or elephant pit. The position of the royal stables is indicated by the fields still entered in the revenue accounts as the *lāya* (stables). Part of an aqueduct, by which the city was supplied with water

from the Yagachi may be seen on the south. The *balapam* or potstone used in the sculptures is found on the Pushpagiri or hill of flowers near the town.

The only part that survived the general ruin was the potters street which it is said was spared on account of the shelter afforded by a potter to a distracted princess whose two sons being beheaded at the instigation of a royal mistress they had slighted and herself forbidden the city, she cursed it as well as the royal family predicting the speedy destruction of both save only the potters street. (See Vol II under Hoysalas).

Though the celebrated Hoysaleswara temple has been described by experts and information about it is available in published work still a few more details about it may not perhaps be quite devoid of interest. The temple has four doorways: two on the east, one on the north and one on the south with beautifully sculptured lintels containing the figure of Tundavaraswara in the centre flanked by *makaras* on which Varuna and his consort are seated. At the north doorway there is only one *darapalala* standing. At the first doorway on the east there is none but at the second and at the south doorway there are two. In point of workmanship the south doorway is the best and no wonder as it is supposed to be the one through which the king entered the temple from his palace situated to the south west. The big figure of Ganapathi in the south of the temple compound is supposed to have been at the south outer gate of the temple. At all the doorways there are at the sides of the steps two tower like niches with two more opposite to them at some distance on the same level on the east but on a lower level on the north and south. Beginning from the right side of the north doorway runs along the whole of the east face of the temple up to the left side of the south doorway a *jagati* or parapet about 11 feet high consisting of these friezes—(1) elephants (2) lions (3) scroll work (4) horsemen (5) scroll work (6) *puranic* scenes (7) *makaras* (8) swans (9) alternately seated and standing figures surmounted by a cornice with bead work (10) miniature turrets with intervening lions and figures in front and (11) a rail divided by double columns into panels containing figures sometimes inlaid between neatly ornamented bands. Above this come perforated screens surmounted by the eaves. The

buttress-like structure in the middle of the east face, however, forms an exception to this arrangement, because on it in place of friezes 9 to 11 we have a row of large images with ornamental pedestals and canopies as on the west face of the temple. Above this there is a plain cornice and above this again plain pilasters with an ornamental gateway on the north, east and south faces, the whole surmounted by eaves which differ considerably in make from those of the rest of the east face. This anomalous structure, which encloses a small cell in the interior known as 'the dark room' and is the only portion on the east face with a row of large images, must be a later addition. It could not have formed a part of the original plan. The terrace on which the temple stands and which closely follows the contour of the building also proves this, seeing that no such structure is indicated in it. It may be noted here that in all temples which have a *jagati*, the rail or the uppermost frieze contains, as a rule, some indecent figures that appears to be the portion reserved by sculptors for this purpose.

Beginning from the right side of the south doorway runs, above the frieze of swans, a row of large images with various kinds of ornamental canopies and pedestals decorated with scroll work along the whole of the west face up to the left side of the north doorway. There are also on the west face at regular intervals 6 car-like niches, about 15 feet high, in two storeys, on which we have only the first 4 friezes, the row of large images breaking off here. There are also a few large figures on the niches, but they are of a different size and on a different level. Each niche has two large figures on the outer right and left walls in both the storeys, the upper ones being sometimes excellently executed. In place of the *Purāṇic* frieze we have here a broader one containing standing figures with intervening miniature turrets. As the eaves of the lower storey in all the niches partly conceal the large figures on the wall on both the sides, it may perhaps be presumed that the niches are later structures. The number of large figures on the west face is 281, of which 167 are female and the rest male. Their position on the wall is as follows —from the right side of the south doorway to the 1st niche 48, 30 female and 18 male, from the 1st niche to the 2nd 18, 10 female and 8 male; from the 2nd niche to the 3rd 18, 8 female and 10 male, from the 3rd niche to the 4th 113, 69 female

and 44 male from the 1th niche to the 5th 18 11 female and 7 male from the 5th niche to the 6th 18 12 female and 6 male and from the 6th niche to the left side of the north doorway 48 27 female and 21 male The figures representing the gods and goddesses of the Hindu pantheon may thus be analysed Ganesa seated or standing 4 Subrahmanya on peacock 1 under canopy of a sevenhooded serpent 2 Siva as Umamahesvara 8 as destroyer of the demons Gajasura Jalandhara Andhakasura etc 20 Vishnu seated or standing 10 as Venugopala 12 as Varaha 2 as Narasimha 4 as Vamana 1 and as Trivikrama 1 Brahma 4 Hanhara 1 Dakshinamurti 1 Bhairava the only male nude figure 6 Parvati including Durga Kali Mahashasuramardini etc 18 Sarasvati seated or standing 9 Indra 2 Garuda 1 and Sūrya 1 There are also figures of Andhakasura Arjuna and Ravana Mohini the only female nude figure occurs several times adorned with serpents The figure said to represent Dakshinamurti wears a long robe and hood with a staff in the right hand and a disc called *chandrako* in the left instead of the fruit noticed at Javagal It occurs as a rule along with Mohini not only here but also in other rows The Puranic story of Siva falling in love with Mohini a form assumed by Vishnu appears to be indicated here The other parts of the temple where we have large figures are the buttress like projection referred to above in the middle of the east face and the shrine of the Sun to the east of the large Nandi mantapa On the former there are 29 figures 18 female and 11 male while on the north and south walls of the latter there are 21 15 male and 6 female It is said that corresponding to the shrine of the Sun there was also a shrine of the Moon to the east of the small Nandi mantapa A few noticeable features in the sculptures on the walls may also be mentioned here In the 16 large figures from the south doorway whiskers and mustaches are beautifully shown. Several of the female figures especially dancing girls are represented as wearing breeches Several horses are adorned with ornamental housings and horsemen as a rule wear long hoots In the Puranic frieze to the right of the 1st doorway on the east are seen figures with coats to the right of the 2nd doorway a figure with a long coat and *lammarband* to the left of the 3rd niche the chariots of Rama and Ravana have spring wheels to the right of the same niche is a figure with

a long coat and hood and a staff under the arm-pit, said to represent an officiating priest of the Kapalika sect, to the left of the sixth niche, in the battle between Karna and Arjuna, a soldier is using a telescope, and to the right of the same niche a seated figure of Dakṣiṇāmūrti wears a long coat with buttons. Curiously enough, the *Purāṇic* frieze on the projection to the right of the 6th niche is made similar to the corresponding frieze on the niche itself. This is apparently a mistake made by the sculptors, as nowhere else in the temple are the two friezes like each other, the one on the niches having nothing to do with the *Purāṇas* but simply bearing figures representing the 11 Rudras, the 12 Ādityas, the 8 regents of the directions the 24 *mūrtis* of Viṣṇu and so forth. About 90 labels mostly consisting of names of sculptors were copied on the outer walls. The names that occur several times are Maṇipalaki, Maḃala, Ballana, Bochana, Ketana, Bama, Balaki and Revoja. The only label that was found explaining the *Purāṇic* scene above it was *Dusvasna vadhe*, a mistake for *Dussvasana vadhe*, (i.e., the killing of Dussvāsa). The period of these short inscriptions may be supposed to be the middle of the 12th century, as *Belur*, 239 leads us to infer that the temple was built or completed in the reign of the Hoysala king Narasiṃha I (1141-1173). There were also found on the basement of the small Nandi-mantapa nearly 30 small inscriptions, consisting mostly of masons' marks such as *paduva* (west), *paduvala-badaga* (north-west), Indra (east), Agni-Indra (south-east), etc.

As is well known, the temple is a double one with a small intervening cell. Both are exactly alike inside with well-carved doorways and lintels and with beautifully executed *dṛāṇapālakas* and female chauri-bearers at the sides. There are two niches on both sides of the doorway and two more a little beyond, facing north and south. There is, however, an additional niche in the south temple to the right of the south entrance. The lower panel of every niche has the figure of a man stabbing two tigers on both his sides. The four pillars in the *navaranga* of both the temples had each 4 standing figures on the four faces fixed on the capital, but now there are only 6 left in the north temple and 5 in the south. It is probable that every pillar on the east face had such a figure standing out on its capital and supporting the eaves above as in *Belur* temple, but all that we have now

are two figures at the second doorway on the east. These images are known as *madanalas* figures in Kannada. They are mostly female. The small cell between the temples has a porch and two niches on both sides at some distance. Opposite to this cell is the dark room enclosed by the buttress like projection on the east. The ceiling panels in the interior though comparatively large in size do not show very good work. A new inscription was discovered on the steps of the 2nd doorway on the east. Two mutilated sculptures of the Haysala crest i.e. of Salu stabbing the tiger are lying in the compound one near the big figure of Ganapati in the south and the other to the south of the large Nandi mantapa. It is not clear where these were placed formerly. The inscribed pillar to the south of the temple in the compound was closely examined. The inscription on it Belur 112 which records the self sacrifice of a general named Lakshma and of his wife and followers on the death of Bellala II is unfortunately unfinished stopping in the middle of a verse and it is not known where the record is continued. The top portion of the pillar is gone. Around the middle portion are sculptured 8 male figures several of which are represented as cutting off their own heads with swords. The north west figure on the pillar is interesting as it affords another illustration of the practice of offering the springing head (*suditate godu*) by a devoted servant on the death of his master. The figure is seated with folded hands in front of a bowed elastic rod with its cut off head springing up with the rebound of the rod. The south-east figure holds its own cut off head by the hair with the left hand while the west figure is in the act of cutting off the head holding the top-knot of the hair with the left hand. The others are in various stages of preparation for the self sacrifice. Most of the figures wear a *todar* or badge on the left leg as a mark of devotion to their master and determination to die with him.

The large mound in the south west of the compound of the Hoysaleswara temple represents no doubt the site of a former temple. Further it is very likely that there was an inscription relating to the construction of the Hoysaleswara temple set up somewhere near the south doorway as also a stone at the same place on which the unfinished epigraph on the pillar near the mound was continued. Unfortunately neither of them is now

forthcoming It is just possible that the mound may have one or both of them buried in it

The Jaina temples at Bastihalli are remarkable for their workmanship They are 3 in number, standing in a line, all facing the north, the middle one being a small plain building The temple to the west has an image of Pārsvanātha, about 14 feet high The *navaranga* is very beautiful with a well-carved circular ceiling panel, about 12 feet in diameter, and black stone pillars, beautifully polished and apparently turned in a lathe, which are elegantly decorated with bead work Such fine pillars are not found anywhere else in the State, though a few of the same kind but of comparatively inferior workmanship are seen in the *navarangas* of the Belur temple and of the Akkana-basti at Sravana-Belgola There are 8 niches, 3 to the right and 3 to the left facing one another with 2 more at the sides of the outer entrance It is probable that each contained a figure once, but now all are empty There is also in the *navaranga* a stout seated figure of Sarvahnayaksha to the right of the inner entrance and a figure of Kūshmāndini in the *sukhanasi* or vestibule seated to the left The image of Pārsvanātha is, as usual, flanked by his Yaksha and Yakshi, viz, Dharanēndra and Padmāvati The front *mantapa*, which has also a good ceiling panel, is supported by pillars which are ornamented with bead work The outer walls of the *garbhagriha* have some sculptures at the top The stone containing the old inscription Belur 123, which had been lying near the Lakkanna-Vīranna temple to the south of Halebīd, was directed, for greater safety, to be removed and placed at the entrance of this temple The middle temple, which is dedicated to Ādinātha, has a small image, about 2½ feet high flanked by Gōmukha and Chakrēsvari, the usual Yaksha and Yakshi in this case In the *navaranga* there is a seated figure of Sarasvatī to the right and Ganadhara's feet to the left, both enshrined in a porch-like *mantapa* The original image of Ādinātha, a stout seated figure about 3 feet high, is, owing to mutilation, now kept in the *navaranga* of the temple to the east The latter, dedicated to Sāntinātha, is similar in plan to the first temple, but without any carving whatever The doorways of both the temples are nearly 13 feet high Sāntinātha, about 14 feet in height, is flanked by Kimpurusha and Mahamanasi, his usual Yaksha and Yakshi

In the *garbhagriha* there is a flight of steps on both the sides to reach the head of the image for anointing purposes. With some difficulty a photograph was taken of this image. Three inscriptions have been discovered on the pedestals of the chief images in the three temples.

The Kedarasvara temple resembles the Kesava temple at Somanathpur in some respects. The terrace on which it stands is supported at the angles by figures of elephants facing outwards, and the row of large images on the walls begins on the east face at the corners on both sides of the entrance where the *jagati* or railed parapet ends. The friezes on the outer walls are the same as those in the Hoysaleswara temple with one exception viz. in place of lions there we have horsemen here. But the figures of this temple are smaller and shaper in outline and sometimes more elegantly executed. As portions of some of the friezes do not belong to this temple the incongruity is as a matter of course marked in several places. The number of large figures now found on the outer walls is 176 of which 90 are male and the rest female. This proportion appears to be exceptional as in most temples of this kind the female figures always outnumber the male. On the south face are two labels stating that the figures above them were executed by the sculptor Maha. But it is doubtful whether these images originally belonged to this temple. Here also we have on the west wall a figure of Dakshinamurti with the usual long coat and hood but wearing in addition a neck ornament and sandals with a snake entwined round the right hand. The temple has 3 cells that in the north having now no doorway. The south cell has the jambs of a Vishnu temple with the lintel of a Siva temple placed over them. Each cell has 2 niches at the sides. The niche in the south west is unlike the others in formation this is unusual. The ceiling panels are flat except the four in the middle *ankanas*. In the compound are strewn in confusion sculptures and architectural members brought from the ruins of several temples in Halebidu in connection with the restoration of this temple. It has to be mentioned here that as a result of the vandalism of ignorant contractors in their eagerness to procure carvings and slabs for the restoration work many fine sculptures and inscription stones have been broken or destroyed.

The buttress-like projection on the east face of the Hoysalēśvara temple has a row of 31 large images, of which 19 are female. The gods and goddesses represented are Vishnu 2, Siva 3, Brahma and Sarasvatī 2. The other figures represent attendants, chauri-bearers, etc. One of the female figures is a signed image executed by Dasoja. Every pillar on the east face of the temple had once a *madanakar* or bracket figure on its capital as at Belur as is evidenced by the sockets on the capitals. Now, however, only three such figures are left, two at the east doorway of the north shrine and one to the right of the buttress. The scroll-work friezes (the 3rd and the 5th) around the temple have small figures in some of their convolutions in some parts, as around the south shrine, all the convolutions have them. The 9th frieze above that of the swans has standing figures in projecting niches with intervening seated figures in niches further back. The seated figures are mostly Yakshas, some holding a flower in the right hand, the other hand being placed on the thigh, some holding a fruit in the right or left hand, and some holding both a flower and a fruit. In some parts musicians take the place of the Yakshas. The projecting niches have dancing or dressing female figures with some gods and male figures here and there. At the corners this frieze has roaring lions on both the sides. The same is the case with the rail which contains mostly female figures, some with the face of a horse representing perhaps the Kimpurusha variety of the demi-gods. There is also a solitary Jina figure on the rail. In the *makara* frieze (the 7th) there are tiny human figures either standing or seated and in some cases riding the *makaras*. In front of the miniature turrets above the cornice are small seated figures holding garlands or playing on musical instruments. Attached to the outer walls of the *garbhagriha* of both the north and south shrines in the three directions are six car-like niches in two storeys with beautifully carved figures on the outer walls. The outer walls of the lower storeys have, as a rule, Umāmahēśvara on one side and Lakshminārāyaṇa on the other, while those of the upper storeys have Bhairava on both the sides. The right outer wall of the upper storey of the north niche of the north shrine has in place of Bhairava a figure of Sūryanārāyaṇa with four hands, the upper ones holding a discus and a conch and the lower ones lotuses. The lower storeys of the niches

around the south shrine as well as the upper storeys of the one around the north shrine have female *dikpalalas* or door keepers with roaring lions at the sides represented as attacking a man seated below. The lower storeys of the niches around the north shrine have on the other hand male door keepers while the upper storeys of those around the south shrine have none. The tower like niches or pavilions in front of the entrances have three friezes elephant lions and scroll work on the base and screen work on the side walls. It is worthy of note that unlike the temples at Belur Suggihalli and Somnathpur this temple has very few individual signed images though signatures of a large number of sculptors occur on the friezes and the frieze. Some of these friezes have been reproduced in the *Indian Antiquary* for May 1910 by Mr Vincent A Smith & a from photographs supplied by the State Archaeological Department.

Inside the temple there is also a niche to the left of the north entrance so that the number of niches in the interior is 12 in all. There are 25 large ceilings oblong in shape which are all flat though one foot deep. Each shrine has 11 9 in the *nataranga* 1 in the *sulhanas* or vestibule and 1 in the east porch. There is also one in the south porch. The corresponding one in the north porch has disappeared. a modern terraced roof is now in its place. Two more come between the north and south shrines. The central ceiling of the *nataranga* of the north shrine has in the middle panel Tandavavara flanked on the right by Brahma and on the left by Vishnu. in the upper two seated female figures flanked on the right by Subrahmanya and on the left by Ganapati and in the lower dancing female figures with attendant musicians. The other ceilings of the *nataranga* have the respective *dikpalalas* or regents of the directions in the centre while the one in the porch has dancing Ganapati for its central figure. All the ceilings of the south shrine have Tandavavara in the centre with the *dikpalalas* around. The same is the case with one of the two middle ceilings the other having Narasimha for its central figure in place of Tandavavara. It is not worthy that the pediments of the east doorway of the north shrine and the south doorway are sculptured on the inner side also.

The larger Nandi mantapa is supported by 30 old and 2 newly set up pillars and has 9 large flat ceilings some with 9 and some with 15 panels. The bull is 13 feet long 6½ feet broad

and $8\frac{1}{2}$ feet high. The ears are missing. The north and south outer walls of the *mantapa* have a row of 23 large images of which only 6 are female. The gods and goddesses represented are Brahma, Vishnu and Siva, the same with their consorts, Narasimha, Varāha, Vēnugōpāla, Tāndavēsvara, Bhairava 4, Garuda, Sarasvatī and Mahishāsūramardinī 2, the remaining figures consisting of drummers, attendants, etc. The smaller Nandimantapa is supported by 19 pillars, the central four being bigger than the others. The bull here is 10 feet long, 5 feet broad and $7\frac{1}{2}$ feet high. It is made of hard polished stone and is fortunately intact. Some repairs have been done to the temple.

A few other temples in the village may be mentioned. In the Ranganātha temple a small neat building with a well-carved image of Ranganātha, two inscriptions were found on the beams. The Virabhadra temple has a row of large figures on the walls of the *garbhagriha* with the Hoysala crest in front of the tower. The Hoysala crest is also found in the Rudradēva temple to the south-west of the travellers' bungalow. The ruins of the five temples known as Panchalingēsvara are situated to the west of the travellers' bungalow. It was from these that a large number of sculptures was obtained for restoring the Kēdārēsvara temple. The figures, sculptured slabs, pillars and beams that are still left in the ruins lead us to the conclusion that these temples, though small, were not very inferior to the Hoysalēsvara temple in artistic beauty. Two interesting inscriptions have been discovered near the hillock known as Bennegudda, one on a large slab near the *Nelamālge* or underground cellar to its north and the other on a boulder to its east. The former is an important record of the time of the Hoysala king Narasimha III, while the latter is of interest as it refers to a channel led off from the Yagachi, the river that flows by Belur, for the water-supply of the Hoysala capital. The *Nelamālge* mentioned above is supposed to have been an underground cellar of the palace during the Hoysala period and a hole with a stone pillar is pointed out as its entrance. The inside is mostly filled up with earth. This place has been noted down for excavation by the Archæological Department.

The Virabhadra temple, above referred to, is a small Hoysala structure surmounted by a stone tower and the Hoysala crest. It has two elephants at the sides of the entrance and a frieze

of 36 large figures on the outer walls of the *jorbhayrta* and the *sukhanasi*. The *nararanga* appears to be a later addition. Of the 36 figures several of which are unfinished 20 are female. The figures consist of Vishnu and his forms such as Lakshmi, narayana, Venugopala, Narasimha and Varaha, Siva as Umamahesvara, Dakshinamūrti and Tardasavara, Brahma, dancing Ganapati, Sūrya, Bhairava, Garuda, Arjuna shooting the fish, Sarasvati, Kali, Durga, Malachasuramardini and Mohini besides several others representing drummers, musicians and attendants. To the north of the Virabhadra is the Guddalesvara also a Hoysala temple but completely ruined. Supported by 4 good pillars and 12 pilasters the *nararanga* has 9 ceilings about 1½ feet deep ornamented with lotuses. Traces are also found of the niches which once adorned the *nararanga*. The tower is gone. The temple had also a two pillared porch. The outer walls have no figure sculpture but only mouldings and pilasters. There is a good but ruined portico to the right of the temple. Judging from its *mukhamastota* or front hall and the ornamental entrance porch the Sanganatha temple also appears to be a Hoysala building. But the *nararanga* which has perhaps been newly built looks Dravidian. The *rudrasvara* is a small shrine surmounted by a stone tower and the Hoysala crest like the Virabhadra. Attached to it are two more shrines surmounted by stone towers all the three standing in a line. At the old entrance of Halebidu is to be seen an inscription built into the ceiling. It is dated 1163 and refers to a battle between the Hoysalas and the Kalachuryas.

The restoration of the Kedarasvara temple has been completed. The scattered sculptures are arranged around the compound wall. The outer entrance to the temple is on the north. Three flights of steps leading into the temple have been built on the north east and south. At the sides of the north flight of steps are set up figures of Tandavāsvara and Umamahesvara. But they are made to stand on pedestals belonging to other gods. The figures of Aruna and seven horses sculptured on the pedestal of Tandavāsvara clearly show that it once belonged to Surya while the figure of Garuda on that of Umamahesvara marks it out as the pedestal of Vishnu. These incongruities might have been avoided by those in charge of the restoration. A more serious incongruity is the doorway of the south cell the interior

of which has a pediment sculptured with Tāndavēsvara set over jambs sculptured with Vaishnava *dvārapālakas*. To admit light to the interior a sheet of glass has been inserted in the roof between the *garbhagriha* and the *sukhanasī*. This is a good idea. The temple has 13 large ceilings, 9 in the *navaranga*, 1 in the *sukhanasī*, 2 in the side cells and 1 in the front porch. Of the 4 in a line in front of the main cell, the first is flat, while the rest, adorned with lotus buds, are about $2\frac{1}{2}$ feet deep. The remaining ceilings, which are all flat, though 1 foot deep, are marked with lotuses. Several of the figures on the outer walls did not originally belong to the temple. They have been procured from other ruined temples during restoration. Still, a few details about the figures now to be seen in the temple may be of some use. The figures representing gods and goddesses may be grouped thus — Vishnu 12, the same as Lakshminārāyaṇa 2, as Varāha 2, as Trivikrama 2, as Vāmana 2, as Gōvardhanadhārī 2, as Kāliyamardana 2, as Vēnugōpāla 2, and as Rāma 1, Brahma 3, Śiva 2, the same as Tāndavēsvara 8, as Umāmahēsvara 4, as Dakṣināmūrti with sandals and snake ornament 1, and as Gaṇāsūramardana 1, Gaṇapati 1, Bhairava 5, Maṇmatha 2, Garuda 2, Sarasvatī 9, Durga 5, Mahiṣāsūramardini 1, and Mōhini 4. There are also figures of Arjuna shooting the fish and Rāvana lifting the Kailāsa mountain. The remaining figures represent drummers, musicians, dancing or dressing females and attendants. Among noticeable sculptures may be mentioned two monkeys holding between them what looks like a fruit, said to represent a *linga*, a four-armed female figure resembling Sūryanārāyaṇa, bearing in the upper hands a discus and a conch and in the lower lotuses, a male figure with a *kaupīna* (or piece of cloth worn over the private parts) and snake ornament blowing a horn, a standing monkey with a *kaupīna* and large ear-rings, and a huntress shooting a parrot. A figure of Sarasvatī newly set up to the right of the east flight of steps is a signed image executed by the sculptor Haripa. There is also another on the south wall, a female figure, executed by Maba.

Hallimysore.

Hallimysore. A village in the Hole-Narsipur Taluk. Population 666

An old *vīragal* of the time of the Ganga king Mārasimha

(961-974) is to be seen here. The village appears to have been a place of some importance at one time. According to tradition, it was the capital of an old kingdom and several of the villages around the place are said to have once formed its suburbs. It is said that Gohalli had the king's cows, Kallaballi his milch cows, Tejpur his horses and Kannambadi his elephants. The king's barber lived at Ketinbaili and the other barbers at Bada Ketinbaili. The stones used for the old Kannambadi fort were gigantic in size. Some people seem to think that the Mysore kings had their residence here before Mysore became their capital.

Haranhalli — A town in Arsikere Taluk, 5 miles south of the *kasba* on the Hassan Arsikere road. Till 1882 had quarters of a taluk of the same name. It is now a municipality.

Population in 1911	Males	Females	Total
Hindus	1003	801	1804
Muhammadians	1	123	124
Total	1004	924	1928

The fort is said to have been erected in 1070 A.D. by a chief named Sōmesvara Raja. The large Nogati tank was named after his daughter. There are several fine temples, partly in ruins and other monuments without the fort walls which indicate the existence of a large city in former times. The inscriptions that are legible belong to the Hoysala rule.

Among the more important temples above mentioned are the Chennakesava and the Sōmesvara which are good specimens of Hoysala architecture. They were built in the 13th century. In both the temples there are rows of elephants etc. on the outer walls as in the Hoysaleswara temple at Halebid which

they resemble in the interior also though the area is much smaller, and the towers are in a good state of preservation. The Sōmēsvara temple is in an unfinished state as regards its exterior owing probably to some political trouble intervening at the time of its construction, portions of the rows of animals, etc., on the outer walls and nearly half the tower being left uncarved. The Chennakēsava temple is well preserved while the Sōmēsvara temple has been woefully neglected. The northern wall has in part fallen down. But there cannot be much difficulty in restoring it as all the stones are lying on the spot. This charming little temple has been conserved under orders of Government and the idea of restoring it has been suggested by the Archæological Department.

The later history of the place is the same as that of Arsikere (see above).

Expenditure	1,586	1,636

Hariharapura

Hariharapura. A small village in the Hole-Narsipur taluk, situated near the border of the Channarayapatna Taluk, about 6 miles to the north of Grāma. Population 396.

The temple in the village is a neat little structure after the model of Dodda Gaddavalli temple. It faces east, is *Triku-tāchala* in plan and consists of three *garbhagrihas*, one *sukhanasi*, one *navaranga*, and a porch. Each of the *garbhagrihas* measures 8' 7" × 8", and the *sukhanasi* which is in front of the west cell measures 7' 8" × 7' 6". The *navaranga* and the porch are squares measuring 18' and 11' respectively. The central platform in the *navaranga* is 10' 6" square. There are two elegantly carved niches in the *navaranga* and one on each side of the *sukhanasi* doorway. Elephants are placed on either side of the flight of steps leading to the temple in front of the porch. The ceilings in the temple are ordinary but very well carved and crisp in outline. The central one of the *navaranga* is flat and contains

Ashaditpalakas with Krishna in the central panel. All the others are deep dome like ones ornamented with lotus buds in the centre. Ita and Maniatha are carved on either side of the *sukhrass* which has been provided with nine perforated screens. There are no images in the temple. The first central panel of the pedestal of the image in the west cell has got a bull and Garuda carved and a crocodile and an elephant one carved on the side panels of the same. The pedestal in the south cell has a peacock and that in the north cell has Garuda. The lintel of the west *gopuram* has Hanubhara flanked by chawan bearers. Those of the north and south cells have Ranganatha and Sarasvati respectively. It may therefore be easily inferred that Hanubhara, Sarasvati and Ranganatha were the deities for which the temple had been dedicated the first one being considered the chief deity and giving its name to the village. The niches in the north and south are empty. From the figure of a mouse carved on the pedestal in the south niche it can be presumed that the image of Vajravara stood there. The pedestal in the north niche is missing, but a beautiful image of Lalabhi Narasimha lies mutilated near it. This might have been inside the niche originally. It was reported that the images of this temple were removed about 20 years ago by Mr. D. Devaraj Urs the then Deputy Commissioner of Hassan for being shipped to Denmark in connection with an exhibition there. Gajalakshmi and Venugopala are carved on the lintels of the *sukhrass* and *navaranga* respectively. The *gopuras* are built of thin horizontal courses of plain stones as in the case of the temple at Dodda Gaddavalli. Only the western *gopura* has got a projection in front which has Tandav svara carved on it.

There is an inscribed slab in front of the temple which has been noticed in *Hassan G^o* (*Epigraphia Carnatica* V). The inscription is completely effaced. It is dated *Saka 1155*. It is difficult to decide whether this is the date of the construction of the temple or not. On the whole the temple though small is beautiful in appearance and the carvings inside show the fine artistic taste of the sculptors employed.

Hassan—A taluk in the centre. Area 175 square miles. Head quarters at Hassan. Contains including the

Alur sub-taluk, the following *hobls*, villages and population.

Hassan 8,097, Grāma 2,057, Alur, 1,894, Kattaya 891, Ponnāthur 861, Dudda 674, Sāhgrāma 539, Kundur 388, Bharthur

The Hēmāvati forms the southern boundary. The Yagachi flows through the west from north to south, receives most of the small streams, and joins the Hēmāvati near Gorur. But a considerable water-course, running down through the east to the Hēmāvati, forms a chain of numerous tanks. The Yagachi is dammed near Hassan, and supplies the Halvagal channel, six miles long. In the north is a group of hills called Sige-gudda. There are some low hills on the south, separating the taluk from Arkalgud and Hole-Narsipur.

The south-western *hobls* are partly Malnād, Pālya being the most so, with fine breezy uplands, presenting in some parts the appearance of grassy open downs, and in others being covered with small scrub jungle. The climate and soils here are well suited to the production of rice of a superior description, but sugar-cane is raised only under special large tanks. Dry cultivation is little esteemed, and a crop once

in three years is often deemed sufficient. Some 1 285 acres have been taken up for coffee. In the east of the taluk the villages are far apart with extensive stretches of waste land which support large flocks of sheep. The soils, which run through many gradations from light sandy grey to rich dark brown are superior in the vicinity of the Yagachi river but deteriorate on the uplands as the river is receded from. Ragi is the staple crop in dry lands and rice in wet with a fair proportion of sugar cane. Dod ragi is grown in the east but gid ragi in the west which admits in good years of an after crop of horse gram. Fields in the east not adapted for ragi are largely sown with chillies between rows of castor.

Hassan is the carrying taluk for the coffee districts which border it on the west and supplies nearly all the carts required in this and the Kadur District. There is much good pasturage and the large Sige gudda kaval belonging to the Amrit Mahal, can maintain 2 500 head of cattle.

The taluk was included successively in the Chalukya and Hoysala dominions. It afterwards formed part of Balam and shared the fortunes of that province. It was incorporated with Mysore in 1690 by treaty with Ikkari.

The cultivable area of the taluk is distributed as follows according to the settlement which was introduced with effect from 1922-23 —

<i>Occupied area</i>	<i>Acres</i>	<i>Total</i>
Dry	98 191	
Wet	25 103	126 915
Garden	3 621	
<i>Unoccupied area</i>		
Dry	10 715	
Wet	266	10 995
Garden	14	
<i>Kharab land</i>	117 984	117 984
<i>Inam</i>	8 744	8 744
	Total area	264 638

The total revenue demand for the year 1923-24 was Rs 2,55,310

The average rainfall at Hassan for 25 years (1896 to 1920) is 34 64 The fall in the west is probably about 65 inches

The Bangalore-Mangalore trunk road by the Manjarābād Ghat runs through Hassan, and from this town there are roads north to Arsikere with a branch from Dudda north-east to the railway at Tiptur, north-west to Belur, south to Arkalgud- with a branch from Kattaya west to Hoskote,—and south-east to Hole-Narsipur

Hassan

Hassan The chief town of the District, situated in 13° N lat , 76° 9' E long , 25 miles south by west of the railway at Arsikere, and a Municipality

Total	4,266	3,831	8,097

The original town was at the adjacent village of Chennapatna This was founded in the 11th century by Bukkana or Bukka-Nāyak, said to be an officer despatched by the Chōla king to put down the depredations committed by neighbouring petty chieftains In this enterprise, he succeeded so well that he received permission to erect a fort and *petta* on the site of his encampment He named the place Chennapatna, the handsome city, and made the large tank between it and Hassan After a prosperous rule of 43 years, Bukka-Nāyak died and was succeeded by his son Būchu-Nāyak, who after 6 years was followed by his son Chennappa-Nāyak, and he was followed after 45 years by his son Būcha-Nāyak The latter died after 50 years without leaving male issue

Chennappa was then conferred by the Hoysala Kings on Sanjiva Krishnappa Nayak. On one occasion a hare which he had started took to the town and entered the gates. While in great distress at this bad omen Hassanamma, the smiling goddess, appeared to him and directed him to build a fort on the spot whence the hare had started and where he would find her image. Thus he did and named the place *Hassana* after her. The present town therefore dates from the end of the 12th century. The *Uda pura* derives its name from a contraction of *Simhasana pura* and either *Jinam* or *jaya* is said to have come.

Hassan was included in the province of Baram and partook of its fortunes until annexed to Mysore in 1690 during the reign of Chikka Devaraja Wodeyar.

In the European cemetery here lie buried a number of planters who built up the coffee industry. The tomb stones date from 1867. A tomb of some interest is that of Dye Thurstone Dye who died on 3rd January 1888 aged 41 years.

Hemavati—Golden also called in Kanuadi *Yenne Hole* Hemavati only or shining river. One of the chief tributaries of the Cauvery. It rises just beyond the limits of the District at Javah near Melhangadi in Mudgera taluk and flowing south is joined near the head of the Bund Ghat by the Sunavati. Continuing south through Manjarahad past Saklespur it receives from the south the Agur river near the place of that name and the Keto halla at the Coorg frontier. Thence turning east it crosses a small portion of Coorg and re-entering Mysore receives from the north the Yagachi near Gorur. With an easterly course it flows past Hole Narsipur to Gannur, some distance beyond which it bends round to the south, and runs down into the Cauvery,

near Hoskote, in Krishnarājpēt taluk Its length within this District is 113 miles

Its waters are dammed in several places, from each of which channels are led off Only two are now in this District The first dam is the Srīrāmadēvaī *anicut* in Hole-Narsipur taluk This work was originally constructed of rough stone by Danāyaka Hebbārāya in 1533. It afterwards breached, and was three times repaired during the administration of the Dewan Pūrnaiya The dam was 1,000 feet long and 24 feet high In 1863 it again breached, since when a new *anicut* has been erected by the Public Works Department, at a cost of Rs 2,78,504, a little below the former spot, on the principle now adopted of making the dam water-tight, which none of the others are Two channels are led off from it, the Uttara or North channel, 51½ miles in length, on the left bank, and the Dakshina or South channel, 21 miles long, on the right The former irrigates 5,604 acres, and the latter, which runs through the town of Hole-Narsipur, 606 acres The Madapurānicut, ten miles below Hole-Narsipur, breached in 1863 The channels under it irrigated 417 acres

The Hēmāvati is crossed at Saklespur by a fine iron girder bridge of four spans, formed by lattice girders, each 120 feet long and resting on cylinders It was finished in 1870 at a cost of Rs 1,94,620

The river is fabled to be the daughter of Daksha and wife of Īsvara The insult put upon the latter in not being invited to Daksha's sacrifice led to her casting herself into the fire, from which, when rescued, she was of the colour of gold (*Hēma*) Becoming incarnate as the daughter of Himavat, she performed penance with the view of being reunited to Īsvara, who appeared to her and directed her to take the form of a river for the good of the world

Heragu

Heragu A village in Dudda *hobli* in the Hassan Taluk Population 688

There are two temples and one *basti* in the village, the most important being the Kīrti-Nārāyaṇa temple In the

inscription stone which stands by the side of the porch and which is well preserved by the village people by means of another slab of stone placed against it (*Hasson 61*) it is called Jaisa Narayana. The temple faces east and consists of a *garbhagudi*, *sukhanasi*, *navaranga* and a porch. The image is about 1—6 high including the *prabha* behind it and stands on a pedestal 1—6 high which has got Garuda carved on it as usual. The image holds lotus and mace in the two back hands and discus and conch in the two front hands. The god is flanked by *Sridevi* and *Bhudevi*. *Dakṣasauras* are carved on the *prabhavali*. The processional image however has not got all the attributes and those which it has are not in the same order as in the main image. It has got conch and discus in the back hands and a mace in the front left hand while the front right hand is in the *abhaya* pose. According to the inscription mentioned above the temple was built in the *Saka* year 1139 i.e. 1217 A.D. It is built in the early Hoysala style with plain straight outer walls and a temple-like tower of uncarved blocks. The *simha* or *kolasa* is very fine. In front of the tower above the *sukhanasi* ceiling a fine Garuda has been carved the head of which is unfortunately missing. The *navaranga* ceilings are all well-carved. Figures of Nammalvar, Bhaskiyakara and Ganapati are placed therein. The *garbhagudi* lintel has got the figure of Narayana, the *sukhanasi* lintel has got *Kalinakamardina* and that of the *navaranga* *Vaṇagopala*. The other temple in the village is called *Kannakavara* and consists of a *garbhagudi*, *sukhanasi* and a *navaranga*. To the right of the *sukhanasi* is a room in which an image of Isvara with Parvati sitting on Nandi is kept. The *sukhanasi* lintel has *Gajalakshmi* carved on it and in the *sukhanasi* are kept two *Basavas* (hulls) and an image of Bhairava. The temple is unimportant architecturally. The *Jain basti* though a heap of ruins is more important architecturally than either of the two temples described above. The inscription stone which is in front of it (*Hasson 57*) tells us that this *basti* was built in the *Saka* year 1077 i.e. 1155 A.D. and was dedicated to *Parasvanatha*. It is thus nearly a century older than the Kirti Narayana temple but is still far superior in workmanship and ornament as can be seen from the remains of portions of the *basti* still intact. Some of the carvings are so crisp and the colour of the stone so fresh that if portions are bodily removed and built

elsewhere they can easily pass muster for a newly chiselled work. It is said that the Jaina image that was in the *basti* was removed by some Government officer thirty years ago.

Hole Narsipur

Hole-Narsipur. A taluk in the south-east Area 233 square miles Head-quarters at Hole-Narsipur Contains the following *hoblis*, villages and population

Hoblis	Villages	Hamlets	Villages classified				Population
			Government	Saivamanyu	Jodi	Kayangutta	
Dod Kadanur	83	55	77	1	5		26,252
Halekote	79	16	75		2	2	16,953
Hole Narsipur	67	50	57	5	5		20,817
Total	229	121	209	6	12	2	64,022

Principal places with population

Hole-Narsipur 6679, Jodi Hanharpur 1669, Gubbi 997, Thathunhalli 957, Uddur, Hosahalli 849, Dod Kadanur 817, Doddahalli 796, Hale Mysore 666, Tejur 664, Malah 644, Kunche 603, Bidarakka 588, Halekote 412

The Hēmāvati runs through the taluk from west to east, and then turning south, forms a good part of the eastern boundary. The channels drawn from it are, the North channel of 51½ miles, and the south-channel of 21 miles, both led off from the Srīrāmadēvar dam. Another dam, the Madapur, is breached. Near Hole-Narsipur are a few isolated hills. Except for the channel irrigation, the taluk may be described as sterile. As the river is receded from, especially to the south, the uplands become bleak and unpromising. Even under the channels, the soils are not very good, and in the taluk generally they are decidedly poor.

The taluk seems to have been in the possession, in the 12th century, of a chief named Narasimha-Nāyak, who also owned Channarāyapatna. It was conquered from his descendants in 1667 by Dodda-Dēva-Rāja of Mysore.

Channarāyapatna-Arkalgud road, running from north-east to west There is also a cross road from the latter to near Kikkeri The Mysore-Arsikere railway passes through this taluk with stations at Hole-Narsipur and Mavinakere

Hole-Narsipur

Hole-Narsipur A town on the right bank of the Hēmāvatī, situated in 12° 47' N lat, 76° 18' E long, 21 miles south-east of Hassan, on the Mysore-Hassan road Headquarters of the Hole-Narsipur taluk, and a Municipality

Population in 1921	Males	Females	Total
Hindus	3,026	2,849	5,875
Muhammadans	377	350	727
Jains	199	184	383
Christians	19	9	28
Total	3,621	3,392	7,013

The fort was built in 1168 A D by Narasimha-Nāyak, a chief whose territories included Hole-Narsipur and Channarāyapatna The place was captured from his descendants in 1667 by the Rāja of Mysore The town is the residence of the *guru* of the Mādhy Brāhmans of the Uttarādī branch Cloth of good quality is made here About thirty years ago, the manufacture of *goni* bags gave occupation to a good many people here

Hullekere

Hullekere A small village in the Arsikere taluk, about 9 miles to the west of Konehalli, a Railway station on the Bangalore-Poona line Population 468

The Channakēsava temple here, though small, is a neat structure in the Hoysala style, standing in the middle of a cloistered courtyard, portions of which have gone to ruin The outer walls are not profusely sculptured, nor are there horizontal rows of animals, etc, in succession, as in the temples at Halebid, Basaral, Nuggahalli, etc, but instead there are fine figures of Vishnu alternating with well-executed turrets and pilasters,

with the names inscribed at the base such as Narayana Vamana Damodara Sankarshana Aniruddha Ichyuta etc. The labels are effaced on some of the figures of which there appear to be 24 in all representing the 24 *muris* or forms of Vishnu. The temple has a fine tower in front of which we have the usual Sala and the tiger. Sala a figure is well carved and richly ornamented. In a niche on the east face of the tower which resembles that of the Buchasvara temple at Koramangala Hassan Taluk is a richly carved figure of Kesava flanked by *chauri* bearers. There is also a well executed *jajati* or parapet in front of the temple as in those at Koramangala Somnathpur Basaral etc. with two well carved elephants at the sides of the steps leading to it. All the figures on the outer walls are injured. The stone used is a kind of soft potstone which has exfoliated in several places. The interior of the temple is very dark. The image of Chennakesava is pretty well carved. All the ceiling panels inside show good work the central one being as usual the best of all. The ceiling panels in the porch and *mulha mantapa* are also well executed. The villagers state that some of the image in the temple such as Ganapati etc. were removed some years ago at the instance of some officer. From an inscription in the temple (*Arsikere* 172) we learn that it was built in A. D. 1163 during the reign of the Hoysala king Narasimha I and the short inscriptions below the images referred to above which are 18 in number have to be assigned to the same period.

The Saptamatrikah Isvara and Anjaneeya temples in the village are also worth inspection. In the last is placed a sculptured slab with the figure of a man riding a horse and a servant holding an umbrella behind. Thus the villagers call Somadevaru. It apparently represents some chief. The Isvara temple which is mostly buried in the bed of the large tank near the village contains besides a *linga* pretty figures of Ganesapati Bheerava and Virabhadra. On the way to Hullekere is the Biredeva temple at Somenhalli which is worth a visit. Though with a very plain exterior the temple has good pillars and an ornamental doorway inside. It is probable that this doorway originally belonged to the Channakesava temple at Hullekere where we now find a rough wooden doorway in place of the original one in the *navaranga*.

Isvarahalli

Isvarahalli A village near Belvādi

The Lakshmi-Nārāyana temple at this place was once a *Trikutāchala* temple and is reported to have once contained Lakshmi-Nārāyana, Yōga-Narasimha and Vēnugōpāla images. The present structure, however, is quite a modern one, and is built mostly of old material and contains only the first two images, a big image of Nammālvār taking the place of the third. The temple consists of a *garbhagudi* and *sukhanasi* each measuring 6' × 6', an open *navaranga* 18' × 10' and a covered portico with pials on either side. On both the sides of the *navaranga* are two small cells containing the Yōga-Narasimha and Nammālvār images. The old materials utilised for the building have been used indiscriminately, for example, the perforated slabs which are usually seen on either side of the *sukhanasi* doorway now form part of the walls of the main entrance. The image of Lakshmi-Nārāyana is about 4' high and is sitting on a pedestal, 1 foot in height. He holds a lotus in the back right hand, *gada* in the left, and *sankha* in the front right. The front left hand holds *chakra* and goes round the waist of Lakshmi who is sitting on his lap. Lakshmi embraces her lord by her right hand and holds a lotus in her left hand.

Jakkanhalli

Jakkanhalli A village in Hassan Taluk Population 290

There is here a ruined Isvara temple in the Hoysala style consisting of a *garbhagriha*, a *sukhanasi*, a *navaranga* and a *mukha-mantapa* or front hall. The *sukhanasi* doorway is flanked by perforated screens. The ceilings in the *navaranga*, of which only four are now left, are about 1 foot deep and have lotus buds. It is interesting to note that some of them are painted. There is likewise a ceiling left in front of the *navaranga* entrance. From the big inscription stone, measuring 9' by 3', in the temple (*E C V*, Hassan 53-4), we learn that its name was Kālēsvara and that it was built in 1770 by the great minister Heggade Kalimayya during the reign of the Hoysala king Narasimha I. To the north of the temple is a ruined *mantapa* or hall containing a fine *vīrgal*, about 5 feet high, in three panels adorned with pilasters at the sides. The top panel has a *linga* surmounted by a beautiful turret.

Javagal — A village in Arsikere taluk. Population 1561 Javagal

The Lakshmi Narasimha temple here is a good specimen of Hoysala architecture with a tower and with rows of animals etc on the outer walls. It has also like the temples at Halekere Somnathpur and Horumanahalli a jagati or parapet in front but a brick wall has latterly been built on the jagati to which have also been attached front mantapas with a lofty outer entrance so that the front view of the temple is that of a Dravidian structure. The tower and the sculptures above the eaves are plastered with mortar with a view probably to preserve them from injury but this mostly conceals the carvings. On the outer wall beginning from the bottom we have these usual rows of sculptures — (1) elephant (2) horsemen (3) scroll work (4) Puranic scenes (5) *lajolis* or *sardulas* (6) swans (7) large images with canopies (8) cornice (9) turret and (10) eaves. Above the eaves all round there are at intervals turrets with *kolakas*. These are also plastered and a brick parapet wall built all round the roof. On the jagati in front of the temple there are from the bottom the same four rows as those on the walls but above these we have (5) a row of turrets and (6) a row of columns with figures between as in the temple at Somnathpur. Altogether there are 137 large images on the wall of which 77 are females and the rest male. On the east wall the second figure from the north stands with what looks like a staff in the right hand and some fruit in the left and wears besides a long coat a hood and a belt like thing in the manner of a sacred thread. Similar figures at Halebid are said to represent Dakṣināmurti. The temple is a three celled one *trikuta chalo* with Kṛṣṇa in the chief cell Gopala to the right and Lakshmi Narasimha to the left. Though occupying a subsidiary cell Lakshmi Narasimha is regarded as the chief deity. Tradition has it that the image of this god which was formerly in the hill known as Hariharēśvarabetta revealed itself in a dream to the Hoysala king Vishnuvardhana who brought it from there and set up here. The usual story of a cow dripping milk over the image is also related and a raft $4\frac{1}{2} \times 6 \times 4$ is shown as having been prepared from the Tulasī tree which overshadowed the image when at Hariharēśvarabetta. Though a Vishnu temple figures of Ganapati and Mahāśūro-mordini find a place in the niches on both the sides of the chief cell. The

ceiling panels are all well executed, some of them being nearly two feet deep. The temple is in a good state of preservation. No inscription relating to the construction of the temple has been found in the village. It has been stated, however, that some years ago an inscribed stone was chiselled out and used for the pavement of the front *mantapa*! Though there is no regular inscription to help us, still the period of the temple can approximately be fixed by the names of the sculptures discovered on the outer walls. For, here also, as at Nuggihalli and Sōmnāthpūr, are labels below some of the large images giving the names of the sculptors who executed them with sometimes the names of the gods also. Altogether 21 such labels have been made out. Among the sculptors may be named Malhitamma, Chikka Malhitamma and Makasa. The first name occurs in 10 places, the second in 3 and the third in 5. We know that Malhitamma had a great deal to do with the execution of the images on the outer walls of the Nuggihalli (A D 1249) and Sōmnāthpūr (A D 1268) temples. We shall not therefore be far wrong in assigning the construction of this temple to about the middle of the 13th century. An inscription is to be seen on the ceiling of the front *mantapa*. The Gangādhārēśvara, Virabhadra, Chandranātha and Banasankarī temples are also worthy of note. The first two show some good work, though in ruins. On the pillars, beams and other members of the first temple are to be seen mason's marks, such as *Varuna* (west), *Vāyabya-madhya* (north-west), etc, incised in characters of the Hoysala period. On the outer walls of the third, which is a Jaina temple, are rows of the Tīrthankaras here and there. A few other sculptured slabs found here do not appear to belong to this temple.

Kāñchina-
kōvi Maratī

Kanchinakovi Maratī A hillock to the north-east of Kallangere, strewn over with the remains of several temples. It appears that many of the stones were removed and used for the bund of the Kallangere tank. The Maratī is supposed to be the site of an old city and it is said that gold coins are picked up there occasionally. In one place a mutilated headless image was found with a mostly defaced Kannada inscription in two lines on its pedestal, only the letters *ya* and *na* at the end of the lines being legible. It is apparently

a Jaina image presumably of Paravanatha as indicated by the cod of a serpent at the back

Karagada — A village near Belur Population 709 karagada
There is here an important lithic record of the reign of the Ganga king Marasimha The village is so called because according to tradition the goddess Lakshmi-devi whose temple is situated at some distance to the west lost her *kara-gadaga* (hand bracelet) in the large tank of the village The village appears to have been an important place once It has three gates and it appears that at the west gate stood a fine temple known as the *Singavara* the materials of which were removed to Belur some years ago Lakshmi-devi is an important deity of the place She is said to be the consort of the god Chonnarayya or Kesava of Belur her *jatre* taking place a week before his

Konanur — A large village on the left bank of the Cauvery konanur
in Arkalgud taluk about 15 miles south west of the *kasba* Headquarters of the Konanur *hobli* and since 1893 a Municipality Population 2383

It was the place to which Nonja Raja was required to retire in 1709 and from which he was induced by Haider under false pretences to return to power

Koramangala (also called **Koravangala**) — A village koramangala
also called
koravangala
9 miles north east of Hassan Population 936 Three miles away from the 6th mile stone on the Hassan Arsikere road reached by a cart-track

The village contains three temples in the Hoysala style of architecture built in the 12th century Two of these are in ruins but the third the *Buchavara* temple is fortunately in a good state of preservation Though small in size when compared with the temples at Halebid the *Buchavara* temple may be looked upon as an excellent specimen of the Hoysala style both in design and execution The tower is very artistically executed and the sculpture in front of it representing Sala

in the act of stabbing the tiger is an excellent piece of workmanship both as regards expression and ornamentation. The same may be said of the images inside the temple, especially Sārada and Ganapati, which are wonderful works of art, and which have fortunately escaped mutilation owing to the darkness in the interior of the temple.

From an inscription in the Būchēsvara temple here, (*EC V*, Hassan 71), we learn that it was consecrated by Būchi-Rāja on the day of the Hoysala king Ballāla II's coronation in 1173, the first year of his reign. The temple faces east and consists of a *garbhagriha*, an open *sukhanasi*, a *navaranga*, a *mukhamantapa* and a porch. The *garbhagriha* and *sukhanasi* have flat ceilings of nine lotuses. The lintel of the *garbhagriha* doorway has Gajalakshmi in the centre. The *navaranga* has nine beautiful ceilings, each about 5 feet deep and six feet in diameter, except two which, though of the same depth, are square. The north ceiling has a figure of Krishna carved on the under surface of the central pendent. There are also six fine niches in the *navaranga*, 3 on the right and 3 on the left. The latter are now empty, while of the former, one has Ganapati, one Sarasvatī and one Saptamātrikah or the Seven Mothers, all exquisitely carved, Ganapati and Sarasvatī showing marvellous workmanship. The Saptamātrikah panel has at the right end Dakṣināmūrti and at the left Ganapati. The *navaranga* doorway has also Gajalakshmi on the lintel. The *mukhamantapa* is supported by 32 pillars and adorned with 13 ceilings of flat lotuses. It has a veranda all round and two entrances facing north and south also with verandas on both sides. The entrance porches are supported by 8 pilasters, 4 of them at the sides of the two entrances are elegantly carved with scroll work, the east pilaster having 8 bands of scrolls. The south entrance has elephants at the sides and *dvārapālakās* or door-keepers with female *chauri*-bearers on the jambs. The outer walls of the *mukhamantapa* have a frieze of scroll work at the bottom, above this a frieze of turreted pilasters with intervening figures, and above this again a rail divided into panels, mostly uncarved, by single columns. Above the last runs a row of large images carved on single or double pilasters surmounted by beautiful turrets. The total number of the large images is 81, of which 29 are female. The gods and goddesses of the Hindu pantheon represented by them are—

Vishnu 4 the same as Nataraja 2 one rising from a pillar and one ten armed tearing out the bowels of the demon Hiranyakasipu as Venugopala 2 in one case surrounded by cows as Navanita-chora (stealing butter) 1 as Kalyanardana (slashing the serpent Kaliya) 1 as Govardhanadha (lifting up the mountain Govardhana) 1 as Varaha 1 as Vamana 1 as Trivikrama 1 as Ranganatha reclining on the serpent Sesha with Brahma on the navel lotus and Lakshmi at the feet 1 and as Rama 1 Siva 2 the same as Ajayaramadhana (slayer of the elephant demon) 1 as Umamahesvara (seated with Uma) 1 and as Isana (the regent of the north east seated on the bull with Isavati) 1 Brahma 3 one four faced with Sarasvati at the side holding a book and a rosary and one with a single face and the same attributes Ganapati 1 Bhairava 4 one with the attributes of a skull and a sword and a snake in thejata or matted hair Dakshinamurti dressed in a long coat and hood and holding a *Chandrika* or disc 2 Lakshmana 1 Garuda 1 Hanuman 1 and Surya 1 Sarasvati 1 Durga 1 Chinnunda 1 Varahi 1 and Mohini a nude figure 4 There are also figures of Arjuna shooting the fish Itavana lifting the Kailasa mountain Prahlada undergoing various kinds of torture and a Naga couple One of the figures of Prahlada bears a label giving his name The remaining figures represent attendants players on musical instruments etc On both sides of the entrance the jagati or raised parapet of the *mukha mantapa* has three small niches and a frieze of turrets with intervening lion The porch too has a good ceiling The *garbhagriha* is surmounted by a well carved stone tower adorned with the Hoysala crest the front panel showing a fine figure of Tandavastana

Opposite to the front hall is a shrine of Surya the front porch of which has a ceiling of 9 lotuses Surya is a well carved figure about 5 feet high flanked by female archers the pedestal showing his seven steeds and Aruna his lame charioteer The *prabha* or glory has 12 seated figures 6 on either side all similar to one another holding in both the hands some indistinct attributes which represent perhaps the 12 *Vidyas* Around the shrine on the outer walls is a row of large images 32 in number of which 19 are female The deities represented are—Siva Umamahesvara sixteen armed dancing Ganapati Dakshinamurti Maamatha Surya 4 one with a coiled serpent behind

and 7 steeds on the pedestal, Durga and Mōhini 2 There are also two compositions depicting *Gajēndra-mōksha*, the *Purāṇic* story of Vishnu delivering an elephant from the jaws of a crocodile and a chain of destruction—a double headed eagle or *ganda-bhērunda* attacking a *sarabha*, which attacks a lion, which in its return attacks an elephant, the latter seizing with its trunk a huge serpent which is in the act of swallowing an antelope with the figure of a sage wondering at the sight (See Plate III, *M A R* for 1920—page 5) A similar panel of a chain of destruction occurs in the Kēsava temple at Belur The remaining figures around the Sūrya shrine represent dancing, playing or decorating figures, drummers, *chauri*-bearers, etc In the *prākāra* stands a *virgal*, about 6 feet high, with 4 panels, the 2nd from the bottom showing two warriors in celestial cars, the 3rd a *linga* and the 4th Umāmahēsvara in the centre flanked by Brahma to the right and Vishnu to the left It bears the inscription *E C V, Hassan 70*, dated about 1180 There is also in the enclosure a shrine of Bhairava consisting of a *garbhagriha* and a *sukhanasi* with ceilings of 9 lotuses Bhairava, about 5 feet high, has a *Vētāla* or goblin to the left

The Būchēsvara temple is on the list of temples conserved by Government The *prākāra* was once thickly covered with rank vegetation and strewn with heaps of debris These have been since removed The roofs of the *garbhagriha* and *sukhanasi* which are leaky have to be made water-tight by a coating of concrete and cement

Near the Būchēsvara are situated two ruined temples in the Hoysala style, facing east, named Nākēsvara and Gōvindēsvara, which were founded a few years earlier than the Būchēsvara The first which, according to *E C V, Hassan 76*, was erected by Nākimayya in about 1170 during the reign of the Hoysala king Narasimha 1, consists of a *garbhagriha*, an open *sukhanasi*, a *navaranga*, a porch, and at some interval a *mukha-mantapa*. The *navaranga* has a fine doorway with two pierced square windows at the sides The ceilings are deep and well carved, three of them showing figures on the under surface of the central pendants One of these figures looks like Garuda and two like Vidyādharas holding garlands The central ceiling has Tāndavēsvara in the middle with attendant musicians all round The ceiling of the porch is a grand piece of workmanship The

outer walls show single or double pilasters surmounted by turrets with lotuses between double pilasters. The Nandi shrine in front now empty has a beautiful doorway and is adorned with pilasters on the outer wall. It consists of a *garbhagriha* and a *sukhanasi*. The *mukha mantapa* is a fine structure supported by 24 pillars and adorned with 13 ceilings. The front ceiling is carved with 12 lotuses and the central with figures of the *ashta dikpalakas* or regents of the eight directions. The hall has verandas all round and two pavilions at the sides. On the outer walls runs a parapet with a rail at the top having flowers between single columns surmounted by an elegantly carved band and with a frieze at the bottom containing figures with turrets at intervals. The Govindasvara temple which as stated in *E C V Hassan* 72 was erected in 1160 by Govinda Raja a minister of the Hoysala king Narasimha I also consists of a *garbhagriha* a *sukhanasi* a *nataranga* and at some interval a *mukha-mantapa* a pillared veranda and a porch. *Hassan* 72 describes the temple as charming with its strongly built plinth and as supported by beautiful round pillars. The *sukhanasi* doorway has perforated screens at the sides. The *nataranga* has small ceilings with lotus buds and a doorway beautifully carved with scroll work. The outer walls have only pilasters. The porch which was built in about 1180 as indicated by an inscription *Hassan* 74 on one of its beams has a fine ceiling with Chamundesvari in the centre and the *ashta dikpalakas* around. The Anjaneya temple at the village has a well carved *virgal* about 5 feet high the bottom panel of which shows a hero holding his own cut-off head in the left hand and a sword in the right.

Maharajandurga —A hill in the Alur Sub taluk about 3 300 feet above the level of the sea. It contains a huge precipitous rock and was once the head quarters of the old Maharajandurga Taluk. On it there are visible the remains of a fort built in the old fashion. From the top of the hill a good view can be had of the country around. Maharajan-
durga

Malekal Tirupati —A well known temple in the Hirekal hills near Arsikere. It is dedicated to Sri Venkataramana svami as at Tirupati in the Chittoor District of Madras. Malekal
Tirupati

after which it is named It is situated on the top of the Hirekal-gudda on the northern side A flight of 1,700 steps leads to the temple There is also a spacious temple at the foot of the hills, of the same name Both the temples are frequented by a large number of pilgrims and devotees throughout the year The car festival which is annually celebrated here in the early part of July is attended by about three to four thousand people

Manjarābād

Manjarabad. -A taluk in the west Area 455 square miles Head-quarters at Saklespur Contains the following *hobls* villages and population

Hobls	Villages	Hamlets	Villages classified				Popu- lation
			Government	Saivamanya	Jodi	Kayangutta	
1 Belagod	39	15	33		4	2	7,232

Principal
place with
population

Saklespur 2,270

The northern *hobls* were transferred in 1881 to the Mudgere taluk (Kadur District)

The whole taluk is Malnād, and comprises some of the most beautiful scenery in Mysore, flanked by the stupendous range of the Western Ghāts The country to the east of the Hēmāvati is more open than that to the west The Hēmāvati flows from the north-eastern angle down a part of the eastern border, and then crosses the taluk to the southern border, where it turns east, separating the taluk from Coorg Near Aigur it receives the Aigur river, and on the Coorg frontier the Kote halla from the south. The western waters

of the taluk flow down the Ghats to the Netravati in South Kanara

Elliot in his *Experiences of a Planter* (I 4-) thus describes the country in this vicinity — The principal beauty lies in the wonderful contrasts which may be seen at a single glance. Scenery stern rugged and precipitous is always to be enjoyed but when you can contrast it in almost a single glance with the softest features of an English park landscape the effect is heightened to an extraordinary degree. Even amongst the hills themselves the contrasts are very striking and nature seems to have furnished in a single group every variety of mountain conceivable. In Europe the Pyrenees are the Pyrenees and the Cheviots the Cheviots with one common feature pervading each range of hills. But from a piece of elevated land not far from the spot where Arthur Welleley pitched his camp of occupation may be seen a complete amphitheatre of frontier mountains presenting the greatest variety of character one an overhanging precipice of rock from which you may drop a stone thousands of feet into the gorge below the next all grass and softly rounded at the summit with cattle grazing on the slopes a third rising abruptly into a pointed peak with feathery strips of jungle clothing the lower ravines and extending far up to the mountain side while to the north of the group stretches a barren serrated rocky range which in turn is broken by hills of a milder type.

The soil on the hills is generally of a rich deep red while in the valleys it is sometimes red and sometimes approaches to black. The grain principally cultivated is rice which grows most luxuriantly in the valleys and fields cut in terraces on their sides and in the western parts double crops are regularly raised. At the head of each valley is usually a small tank with a common mud embankment which serves to collect a little water from the spring rising above it to be used when the rains hang off but artificial irrigation is generally rendered superfluous by the exceeding abundance of the rains. Dry cultivation is found to the east of the river. To the west scattered patches of ragi may be met with but the practice is to grow it only once in 2 or 3 years or at even longer intervals.

The cultivation of coffee has assumed great importance. Though only three-fourths of a century old, it has already, by attracting the investment of European and indigenous capital and the settlement of European planters, changed the face of the country and revolutionised the old feudal customs and immunities of this region. Cardamoms are also cultivated in the western parts, throughout the taluk.

The old name of this part of the country was Balam, said to be derived from *bala*, strength. The history of the province has already been given, and the succession of Nāyaks (See under *Bēlur*).

When the Aigur chief fled to Coorg in 1792, on the withdrawal of the British forces, he was invited back by Tipu Sultān and granted an estate yielding a revenue of 5,000 *Pagodas*, composed of the *mandes* of Karodi, Yesalu, Aigur, Bisale and Uchchangi. The remainder of the territory of Balam was annexed to Mysore, and a fort erected on one of the central heights for a garrison. The country being enveloped in fog when the Sultān inspected the works, he is said to have called it from that circumstance Manjarābād, "the abode of fog" (*manju*).

Manjarābād proper consisted of 6 *nāds*, sub-divided into 36 *mandes*. Each *mande* had a patel, and one of these in each *nād* was the Nād Patel, a position of much local weight and influence. The senior Nād Patel was called the Shime Gauda, and had the precedence. Three of the Nād patels were Lingāyets, and the other three Hale Vokhalu, ancient farmers. The *mande* and *grama* patels were *Devār Makkalu* God's children, the slaves, now free, *Hale Makkalu*, ancient children, and *Holeyaru*.

The houses of the Patels are generally fortified, and in some instances surrounded with a deep fosse. Within these precincts, they still maintain much of the authority they formerly exercised as feudal chiefs, each farm being complete in itself, and in respect to the requirements of daily life, independent of its neighbours. Cloths, blankets, household utensils and such other articles as cannot be made up or

manufactured in the house are readily procured at the fairs held in different parts

The Patels and headmen are a fine manly race very superior to those of the plains. Their usual dress is a black *kumbl* passed round the body and fastened over the left shoulders leaving the right arm free. The waist is girded with a similar article or with a cloth generally dark blue with a white stripe. The turbans are mostly white or dark blue with a small gold edging. The labourers have a similar dress of coarser material and usually wear a leather skull-cap. The *kumbl* is gradually giving place to the coat. All classes carry a knife and few are without a matchlock or musket.

The revenue settlement was introduced in 1852. The area of the taluk was distributed as follows —

<i>Culturable—</i>		Acres
Dry	31 061-27	} 1 23 470
Wet	38 462-15	
Garden	326-5	
Coffee	53 301-15	
Cardamom	164-20	
Rubber	154-19	
<i>Unculturable—</i>		
(Including roads)		1 35 06½
Inam		6 301
State Forest		24 426
Waste land		19 704

According to the resettlement which was introduced with effect from 1924-25 the culturable area of the taluk is distributed as follows —

<i>Occupied area—</i>		Acres
Dry		20 114
Wet		35 243
Garden		1 919
<i>Unoccupied area—</i>		
Dry		11 834
Wet		2 259

The unoccupied area was 20,086 acres of which 15,917 were dry land

The total revenue demand for 1891-2 (15 months) was Rs 2,08,087 and for 1892-3 it was Rs 2,33,457 It is now Rs 2,02,707-3-7 (1919-1920)

The average rainfall at Saklespur for 15 years (1870 to 1920) was as follows

	Inches
January	0 13
February	0 09
March	0 49
April	2 18
May	4 64
June	16 89
July	29 57
August	15 67
September	6 13
October	7 03
November	3 34
December	0 82
Year	67 36

The Manjarābād Ghāt road from Hassan crosses the taluk through Saklespur, and the Bisale Ghāt road runs through the south The taluk is intersected longitudinally by a road from Mudgere through Saklespur to Kodlipet and Arkalgud, giving off cross-roads to Vangur, to Yesalurpet, and by Kenchammana Hoskote to Pālya and Belur, and to Hassan

The fort at Manjarābād is an octagonal structure containing a pond, a few powder magazines and other adjuncts The plan of the fort is beautifully shown on the roof of the first gate From the top of the fort a grand panorama of landscape consisting of hills, forests, streams and ravines meets the eye on all sides There is a secret passage leading out of the fort Two Persian inscriptions are to be seen near a tomb at the foot of the hill These and two more records at Malah have been copied by the Archæological Department

Markuli A small village in the Hassan taluk, about

three miles to the east of Ambuga a Railway Station on the Mysore Arsikere line Population 678

There is a Hindu temple called Rangaswami temple and a Jain *bast* in the village. The first is quite modern and is of no architectural or archaeological importance. The *bast* is an ancient structure and has some architectural beauty. It is a small structure of early Hoysala style. A fine inscription stone standing in front of it in Hassan 119 (E C V) tells us that it was constructed in *Saka* 1095 i.e. 1173 A.D. by Buchimnyya minister of Ballala II. It is *trikutachala* in plan and consists of 3 *garbhagrihas* 3 *sukhanasis* a *navaranga* and a porch. The structure faces north and is enclosed by a high compound wall with a gateway which is reached by a flight of steps. On either side of the gateway within the enclosure two more shrines are constructed consisting of a *garbhagriha* and a *navaranga*. These latter are plain and are apparently later additions. Each of the three cells of the main temple measures 8×7 and each of the *sukhanasis* $7\frac{1}{2} \times 7\frac{1}{2}$. The *sukhanasis* in front of each of the east and west cells are open while that in front of the south cell is closed by two fine perforated screens. The *navaranga* and the porch are squares measuring 17 and 6 respectively. The *garbhagriha* and the *navaranga* of the front shrine measure 8×7 and 20×19 respectively. The central ceiling of the *navaranga* of the main shrine is flat with 9 flowers. Others are small but deep. The ceilings of the *garbhagrihas* and the *sukhanasis* are also flat and adorned with lotuses. The chief or the south cell in the main temple contains a seated figure of Ādisvara about 5 high its hands being in the *yogamudra* pose and placed palm over palm on the crossed legs in front of the image. Behind the image and detached from it is a *prabhavali* built against the wall. The east cell contains a standing image about 6 high which the villagers call Bahubali. The west cell has got a standing image about 5 high of Parsvanatha with a serpent of five hoods. The eastern of the front shrines contains an image of the Bahubali while the western shrine contains Parsvanatha. The Bahubali image is flanked by two small figures one of which has got six hands and the other only two. The six handed has got the attributes of *ankusa* in three hands *kalasa* trident and fruit in each of the remaining

Mavattan
halli

Mavattanhalli. A village in the Arsikere taluk, six miles from Bānavar. Population 201

The Mahālingēsvara temple at this place is a small structure in the Hoysala style. The tower and the outer layers of some of the walls have come down. There are only a few sculptures here and there on the outer walls, but the unworked projections on the stones fixed in their places on the walls intended for carving images lead us to the conclusion that the exterior of the temple was left in an unfinished state owing to some reason or other. The interior, however, shows artistic work of a unique kind, not usually met with in other temples of this style of architecture. The temple has 3 cells with the *linga* in the cell opposite the entrance and the images of Narasimha and Harihara in the others. Every one of the ceiling panels is beautifully executed. There is no elaboration of details as in other temples but delicate work of a superior kind which at once captivates the eye. Several of the panels are in the form of lotuses with their petals arranged in beautiful colours, which have not faded, though over seven centuries must have elapsed since the temple was built. The panels over the three cells are exquisitely designed and executed. They look like mosaic work wrought in various colours. The other images in the temple are Ganapati, Mahishāsūramardini, Subrahmanya, Virabhadra, Hayagrīva, Nāgadampati and a Nāga. Every one of the figures is beautifully carved, the stone used, which is of a creamy colour, adding considerably to its beauty. It is a matter for wonder that most of these images are intact, though the temple is dilapidated and not even secured with a lock. There must be some inscription connected with the temple, but none has been found, though a diligent search has been made by the Archæological Department. It is probably buried in the debris in front of the temple. In an inscription newly discovered in a field of the Patel of the village, the god of the temple is named Śrī-Ballāla-Harihara-Narasīngēsvara, though the villagers call it Mahālingēsvara. This name seems to give us a clue to the period when the temple was built. As stated before, two of the gods in the temple are Harihara and Narasimha. The third, which is the *linga*, may have been set up during Ballāla's reign and named after him. If this surmise is correct, the period of the temple would be about A.D. 1200.

Mosale —A village in the Hassan taluk about eight miles south of Hassan Population 105 Mosale.

The two Hoysala temples at this place stand side by side at a few feet apart and are identical in design and workmanship. They are very good examples of Hoysala art and belong to the Koramangala class of temples. There is no clue as to the precise date of the construction of these temples. An inscription stone which is standing in front of the temples (*Hassan* 165) relates only to some endowments granted to the temples in the year A D 1578. From the style and architectural character however they may be assigned to the 12th century A D when most of the ornate structures in the State came into being. Each temple consists of a *garbhagriha* 8×7 a *sulhanasi* $7 - 9 \times 6 - 7$ a *natoronga* about $19 \times 18 - 8$ and a porch with a *jagati* on either side. Each is surmounted by an elegant tower which is complete in itself and in a perfect condition. In front of each tower is carved a fine figure of *Solo* with tiger and the gracefulness of its outline is considerably enhanced when viewed against the clear blue sky behind it. The *natoronga* consists of nine *onkonas* the central one of which is raised as usual. Each *natoronga* has got six niches two on either side of the *sulhanasi* doorway and two each against the north and south walls. These niches are elaborately carved and are complete shrines in miniature. These contain images of gods and goddesses. All the ceilings in the temples are elaborately carved with intricate geometrical patterns and highly complicated designs. The outside walls of these temples are made up of numerous panels formed by the breaking up of the wall surface all of which contain images of deities. The more important deities have got turrets carved over them while the less important ones have no such canopies. The empty space of the panel in the case of the latter is however covered by delicate tracery work as is seen in the *Amritēsvara* temples at *Amritapur* in the *Tarikere* taluk. In the centre of the *navaranga* walls both on the north and the south side are two niches which must have once contained images but are now empty. Above these figures there is the usual drip stones (or *chajjo*). On the top of this several mutilated figures some of them being monkeys in all sorts of prankish postures may be seen. Above the drip stone comes the parapet wall which is made up of four tiers of carved stones and is full

of delicate tracery work images placed in niches Above this the tower is formed of five tiers of blocks each of which rises tapering one above the other but maintaining the contour of the outside wall Big images are carved on the central block face of the tower A projection in continuation of the tower is constructed above the *sukhanasi* ceiling It is on the top of this the Sala figure already referred to is standing On the east face of this cavity, a dancing image of the God within the temple is carved The *kalasa* or finial on the top is beautifully carved The basement has got the usual moulding and consists of uncarved blocks which help to add interest to the carved portion above them The porch has got a raised *jagati* on either side with a stone railing above it The railing on the outside has got scroll work on the top and bottom with double columns and musicians carved in the middle In front of the porch of one of the temples, there is a landing about 8' wide and beyond this a platform 26' square and 2' high is constructed In the centre of this platform, there are foundations of a small room about 9'—6" square Most probably a *mantapa* stood here formerly One of these temples is dedicated to Isvara and is called Nāgēsvara, while the other contains a Vishnu image called Chenna-kēsava The existence of these temples of two different sects in such close juxta-position is noteworthy, such a rare combination having been so far found only in one place within the State, viz, at Marale in the Chikmagalur Taluk There is no doubt that both these temples at Mosale had their origin simultaneously and owe their existence to the bounty of a single individual This eclecticism seems to be peculiar in the case of Hoysala rulers who, though at first Jains and Vaishnavites later by faith, still built temples dedicated to Tirthankaras, Siva and Vishnu and were patrons of all sects alike The Vishnu temple is to the north of the Siva temple Of the large images found on the outside wall, 45 are male, 23 female and 11 are worn out beyond recognition The following are the principal images in order — Manmatha, Vāsudēva, Madhusūdana, Varāha, Kālinga mardana, Vēnugōpāla, Narasimha, Janārdana, a seated male figure with discus and conch in the two upper hands, the other two hands being broken, a similar figure with mace and lotus in two hands, the remaining hands broken, Gōvardhanadhari sanyāsi, a figure of Mōhini, Yogā-Narasimha, Anuruddha, Mādhava,

a seated male figure with conch and discus in two hands the other two being *abhaya* and *varada* a seated male figure believed to be Paravasudera Sridhara a male figure with lotus mace conch and discus Madhava Govinda Sankarshana Tri vikrama Bali with Vamana Hari Achuta Lakshminarayana and Janardana.

The ceiling of the front porch is very beautiful As already stated the ceilings in the *navaranga* are all very artistic especially the central one *astodakpalakas* are carved on the central blocks of the octagon of this ceiling Above this Chaturvim sati murtis (24 aspects of Vishnu) are carved three on each side and flanked by *choura* bearers with Garudas at the corners Above this are concentric circles richly carved the central pendant dropping more than three feet The six niches of the *navaranga* contain Lakshmi Narayana Sarada Chaspati Mahishasuramardini Lakshmi and *Yōga* Narayana.

There are perforated screens fixed on either side of the *sukhanasi* doorway and *Dvarapalakas* are carved on the pillars next to them Lakshmi flanked by *malatas* is carved on the lintel above the *sukhanasi* doorway The ceiling of the *sukhanasi* is flat with flowers and flower bands The *garbhagudi* lintel has got Gajalakshmi carved on it The image Chennakceaya is about 6 high and $7\frac{1}{2}$ with the *prabhavali* behind it. The images hold conch and discus in the upper hands and the lower hands hold lotus and mace Sridēvi and Bhudēvi are carved on the sides below The *prabhavali* also is very beautifully carved and *Dasarataras* (ten incarnations of Vishnu) are seen on it as usual The Siva temple has got 10 figures on its outside walls 20 male and 36 female figures Fourteen figures are completely worn out Thirty eight of these are principal images and the remaining subsidiary ones such as *choura* bearers and other attendant deities.

The following are the principal images in order —

- 1 Seated female figure with 8 hands with serpent carved at bottom
- 2 Male figure standing with a serpent and *Sūla* in two hands the other two arms broken
- 3 Male figure standing with *Damaruga Sūla* *Abhaya* the fourth arm broken
- 4 Mahishasuramardini
- 5 Lakshmi
- 6 Seated female figure four hands, all broken peacock and *Kamandalu* carved at the bottom

- 7 Female figure standing with *Pāsa*, serpent, lotus, and the fourth arm broken, the letters *Gauri* are carved below the figure
- 8 Sarasvatī
- 9 Seated female figure, four hands all broken, serpent carved at the bottom
- 10 Female figure standing, holding an arrow, *Sūla*, *Kamandalu*, the fourth hand in *abhaya* pose, words *Manōhari* written below
- 11 Seated female figure with eight hands broken Words *Rākshasi* written below
- 12 Seated figure of Mahīśūsuramardini
- 13 Male figure standing with *Sūla*, *Damaruga*, undarrow, the fourth arm broken Words *Vajrabhūta* carved below
- 14 Brīhma
- 15 Standing female figure with four heads and two hands
- 16 Standing female figure with *Sūla*, *Damaruga*, hook and *Kamandalu*
- 17 Standing male figure with arms broken, word *Chitrasēna* carved below
- 18 Standing male figure called Mahakala
- 19 Standing Sarasvatī
- 20 Seated female figure holding *Damaruga*, *Sūla*, *varada* pose and rosary
- 21 Brahma
- 22 Standing male figure with *Sūla*, *Damaruga*, *abhaya* pose and *Gada*
- 23 Male figure standing, two arms broken and holding *Damaruga* and discus in the other two hands
- 24 Standing female figure holding lotus in the two upper hands, rosary and fruit in the two lower hands
- 25 Nārāyana
- 26 Standing male figure below which the word *Chitrudhara* is written
- 27 Sarasvatī
- 28 Female figure with six hands, discus being in the two back hands, other arms broken The word *Chakrasīla* (?) carved below
- 29 Standing male figure holding *Sūla*, *Damaruga*, third arm broken and rosary in the fourth arm
- 30 Female figure with three heads and four arms all broken
- 31 Pārvati
- 32 Sarasvatī
- 33 Lakshmi
- 34 Standing male figure holding *Sūla*, *Damaruga*, fruit and *abhaya* pose
- 35 Varāhamūrti
- 36 Sarasvatī
- 37 Janārdana
- 38 Standing male figure with the word *Mahakala* written below

Unfortunately almost all the figures are mutilated. Otherwise this temple could have afforded sufficient material for the study of Saivite iconography. As noticed above, many of the images have got names of gods carved below them. Besides

the names mentioned above the names Lakshmadevi Srijadevi Bhumidevi Brahma are carved below the respective images. Names of sculptors however are not to be found anywhere in these temples. Below one image the word *Gombira* is carved. This is not apparently the name of any goddess or god. It may therefore be presumed that it may be the name of the sculptor. The ceiling of the front porch is flat and richly carved. The square shape has been converted into an octagon which again is reconverted into a square. *Astadilpalalas* are carved on the sides of the octagon and musicians on the sides of the square. On the bottom of the central slab a big full blown lotus flower and in the centre of it the figure of Gajasuramardini are carved. The lintel of the *nataranga* doorway has got Siva Parvati *chauri* bearers and bull carved on it. The ceilings of the same are of varied designs no two being alike. The niches inside the *nataranga* contain *Saptamatrila* (seven mothers) Sarada Ganesa Mahasuramardini Linga and Kesava. The hull with the usual *linga* placed in the centre is very fine. On either side of the *sukhanasi* doorway perforated screens are fixed as in the Kesava temple and below these *divarapalalas* are carved. On the pillars next to the doorway *chauri* bearers are carved. The *sukhanasi* ceiling as well as that of *garbhagriha* are flat with flowers and flat bands. The image is the usual *linga* with a *pitha*.

Mudugere —A village in Hissan taluk. Population 236. Mudugere.

At this place there is a ruined Isvara temple which must once have been a grand Hoysala structure. The only portions now left are the doorway of the *garbhagriha* or adytum the door lintel of the *nataranga* or central hall a fine *nandi* and an inscription stone. The remaining architectural members of which a few are lying here and there have been removed for building the Anjeneya temple in the village the Mudugere lake or pond and the outlet of the Bemmenhelli tank. Near the Anjeneya temple is also lying a huge tiger apparently a part of the Hoysala crest which once stood over the structure. The *garbhagriha* doorway is well carved and has Gajalakshmi on the lintel. The spaces between the tops of the jambs and the lintel on both sides are said to be always occupied by two cobras. From the inscription mentioned above (E C V Hissan 69)

we learn that the temple, named Eragēsvara in the record, was founded in 1155 by Ereyamaheggade during the reign of the Hoysala king Narasimha I. There is besides another temple in the village, known as the Yōga-Narasimha, in a dilapidated condition. It is likewise a Hoysala building consisting of a *garbhagriha* or adytum surmounted by a stone tower, a *sukhanasi* or vestibule and a *navaranga* or central hall. The god is seated on a pedestal about 2 feet high, his *prabha* or halo being sculptured with the ten incarnations of Viṣṇu. The *garbhagriha* ceiling is flat with nine blown lotuses. The *sukhanasi*, whose doorway is flanked by perforated screens, has a large artistic ceiling. The *navaranga* is supported by four moulded pillars and twelve pilasters, and is adorned with nine beautiful ceilings of which the central one which is circular is about 5 feet deep with three concentric rows of lotus buds, while the others, except the front one which resembles the *garbhagriha* ceiling, are square and 3 feet deep with single lotus buds. The beams are also adorned with blown lotuses in the middle. Opposite to the god is the shrine where instead of the usual figure of Garuda there is an image of Lakṣmī-Varāha said to have been set up about 200 years ago. The outer walls have no figure sculpture, but only pilasters. The temple had once an open veranda all round, but now only the pillars are left. No inscription has been found in the temple, it probably belongs to the close of the 12th or the beginning of the 13th century.

Neralige

Neralige A village in the Arsikere taluk close to Javagal. Population 613. A large *vīrgal* of the Ganga King Mārasimha's time is to be seen in this village. This slab, about 6' × 5', forms the roof of what is called the *Karugal-mantapa* in the middle of the village. It is an important find, as its sculpture elucidates the meaning of a doubtful expression occurring in some of the Ganga records.

Nuggihalli

Nuggihalli A village in Channarayapatna taluk. Population 1,528.

The temples of Sōmēsvara, Sadāsiva and Narasimha are worthy of note here. The last is a good specimen of Hoysala architecture, resembling the Chennakēsava temple at Haranhalli,

though the tower which is of a different design is similar to that of the Buchasvara temple at Horamangala. The friezes of animals etc. on the outer walls are complete like those of the Hoysaleswara temple and not left unfinished like those of the Somesvara temple at Haranhalli. It is interesting to note that unlike in other temples the images on the outer walls have in most cases their names engraved below often with the names of the sculptors who executed them. The figures on the south wall were made by Baichuja of Nandi and those on the north wall by Mallitamma. Altogether there are 52 such short inscriptions around the temple and their period is about 1249 A.D. the year in which the three gods of the temple were set up. The temple is in a good state of preservation. It belongs to the class of temples known as *trikutachala* literally a three peaked mountain meaning a temple in which there are images of three different gods set up in separate cells facing the three cardinal points the entrance facing the fourth. The Chennakesava temple at Haranhalli and the Narasimha temple at Javagal belong to the same class.

The Somesvara temple is in a dilapidated condition. It has two cells each with a *sukhanasi* the main cell containing a *linga* and the other a figure of Vishnu. The *natarango* is a large hall supported by 25 pillars. It has flat ceilings decorated with lotuses. In the Lakshminarasimha temple above the row of large images the pilasters surmounted by turrets have tiny figures on or between them all round. The main cell is surmounted by a carved stone tower those over the other cells being modern plaster towers. Of the three beautiful niches in the three directions around the *garbhagriha* the south niche has a figure of Kaly with Vaishnava *drorapalakas* and female *chauri* bearers at the sides. The left outer wall has a seated figure of Varaha flanked by figures of Lakshmi one of them holding lotuses the other water lilies while the right wall shows Narasimha similarly flanked. The west niche which enshrines Harihara has on its left wall Nambinarayana flanked by Lakshmi and on its right a figure of Vishnu with a discus a conch a mace and a rosary for attributes flanked by what look like Parvati and Sarasvati. The north niche which has Sarasvati inside has on the left wall according to the labels given below them Yoga Narayana flanked by Bhumi (the

goddess of the Earth and Lakshmi and on the right, Hayagrīva holding a rosary, a book and a fruit in three hands, the fourth being in the attitude of meditation, flanked by Ganapati and Sarasvatī. The friezes on the niches are the same as those on the walls up to the row of large images. A curious figure in the frieze of large images is what looks like Sūryanārāyaṇa with two hands, the right holding a fruit and the left a water-vessel, a discus and a conch being sculptured on the large nimbus behind. In the interior, the main cell has on the lintel of the *garbhagriha* doorway Kēśava above and Lakshminārāyaṇa below and on that of the *sukhanasī* doorway Lakshmi. The ceiling in front of the *sukhanasī* entrance is flat with Lakshmi in the centre and figures of the planets around. The lintel of the north cell shows Yōga-Narasimha above and Lakshminarasimha below, while that of the south cell has Paravāsudēva. The lintel of the *navaranga* doorway has a figure of Sarasvatī, and the grand ceiling in front of it has on the circular under-surface of the central lotus bud Sūryanārāyaṇa, on the petal around the *Dvādasādītyas* or twelve suns and on the lower panel the *dvādasā-mūrtis* or twelve forms of Vishnu alternating with other figures. To the right of the *dhvaja-stambha* or flag-staff is a pillar with an ornamental capital known as the *jaya-stambha* or pillar of victory. Tradition has it that this pillar was set up by the sculptor who built the temple as a memorial of the victory gained by him over other sculptors. The west view of this temple has been reproduced by Mr. Vincent A. Smith on page 41 of his *History of Fine Art in India and Ceylon* from a photograph supplied by the Archaeological Department.

The Sadāsiva temple is likewise a fine specimen of Hoysala architecture. The original structure consists of a *garbhagriha*, a *sukhanasī*, a *navaranga* with porches and a *Nandi-mantapa*. To this have been attached on the south a big hall with the shrine of the goddess, another hall on a lower level (*pātālankana*) and a lofty *mahādvāra* or outer gate, all in the Dravidian style. The temple stands on a raised terrace which follows the contour of the building. The *garbhagriha* is surmounted by a carved stone tower with the Hoysala crest in front. The tower is decorated with scroll work between vertical rows of turrets and resembles that of the Mule-Sankarēśvara temple at Turuvekere. The outer walls have fine pilasters of a large size, but scarcely

any figure sculpture. The *linga* faces east. The *gorbhagriha* and *sulhanasi* have ceilings adorned with lotus buds. The same is the case with most of the others in the temple. The *sukhonosi* doorway has Ganapati on the lintel and Siva on the pediment. The ceiling in front of it has in the middle a circular projecting panel of Tandavesvara with figures of *ashta dikpalakas* around. The *narorango* has two entrances with porches on the east and south, the east porch being attached to the *Naadi mantapa* and the south to the later Dravidian structures. Of the other ceilings is the *narorango* the central one about 3 feet deep is very artistically executed; it is carved on all sides including the beams also which have three friezes of scroll, bead and flower work. The one inside the east entrance is similar to that in front of the *sulhanasi* entrance noticed above. The *narorango* south doorway has on its lintel Siva and Parvati seated on Nandi, while the east doorway has Umamahesvara flanked on the right by Brahma and Sarasvati and on the left by Vishnu and Lakshmi. Ganapati and Subrahmanya seated on their vehicles being also shown below Brahma and Vishnu respectively. In the *narorango* are kept a number of exquisitely carved figures. To the left we have Mahishasuramardini about 3 feet high with 8 hands, 6 of them holding a discus, a trident, a sword, a shield, a bow and a bell, 1 placed on the head of a demon and the 8th taking out an arrow from the quiver. Brahma seated on the swan with a noose, an elephant-goad, a fruit and a rosary for his attributes. Kesava seated, Bhairava holding a trident, a sword, a drum and a decapitated head, and 2 Nagas, and to the right Surya bearing lotuses in his two hands, flanked by female archers as usual. Ganapati and a panel of Saptamatrika with Ganapati and Sarasvati at the ends. In this panel the mongoose is shown on the pedestal as the emblem of Chumundi. The east porch which has a flat ceiling of 9 lotuses had once two entrances on the north and south which are now walled up. The *Naadi mantapa* has ornamental screens and verandas all round and a ceiling similar to that of the porch. Its well-carved doorway has perforated screens at the sides and a fine lintel with a panel of Gajalakshmi. The period of this temple is very probably about the same as that of the Lakshminarasimha temple, namely A.D. 1249. The Singesvara temple in the bed of the tank at Hebbalalu about 2 miles from Nuggihalli

is also a Hoysala building. It consists of a *garbhagriha*, a *sukhanasi* and a *navaranga* with a fine porch in front of the south entrance. The *linga* faces east. The outer walls have only pilasters. From *E C V*, Channarayana 257, we learn that the temple was erected about A D 1200 during the reign of the Hoysala king Ballala II.

Saklespur

Saklespur.—(Called *Sucklespore* by European Coffee planters). A town on the right bank of the Hēmāvati, situated in 12° 57' N lat., 75° 51' E long, 24 miles west of Hassan, on the Bangalore-Mangalore road. Head-quarters of the Manjarābād taluk, and a Municipality.

Population in 1921	Males	Females	Total
Hindus	897	781	1,678
Muhammadians	279	186	465
Jains	27	4	31
Christians	27	35	62
Animists	17	17	34
Total	1,247	1,023	2,270

It owes its importance to the spread of coffee cultivation, for the traffic connected with which the Hēmāvati has been spanned at this point by an iron girder bridge, leading to the Manjarābād Ghāt road, over which trade finds an outlet to the port of Mangalore. The town derives its name from a temple on the bank of the river, dedicated to Saklēsvara (*sakala īsvara*, the fragmentary *īsvara*, the *linga*, having a small chip or dent).

The Sakalēsvara temple referred to is a comparatively modern Dravidian building. According to the *Purāṇic* account, a *sakala* or piece of the *linga* came out when some one ignorantly began to cook on it. He repented for the injury unwittingly done to the *linga* and built a shrine for it.

Municipal Funds	1915-16	1916-17	1917-18	1918-19	1919-20
Income	5,474	5,261	5,624	5,400	6,821
Expenditure	3,838	4,339	4,621	4,651	4,730

Sambhunathpur —A village in the Arkalgud hobli Sambhu
nathpur
Population 232

Here is a fine temple which is visible from the road leading to Hassan. It is a structure of moderate dimensions. The temple is dedicated to Sambhunathesvara or Swayambhunathesvara as mentioned in the inscription which stands in front of the temple (Arkalgud 6). It consists of a *garbhagriha* (adytum) a *sulhanasi* (vestibule) each 7—0 square *nataranga* 16—0 square and a spacious *mukha mantapa* (front Hall) 33 x 18. The ceilings of the *garbhagriha*, *sulhanasi* and *nataranga* and the central ceiling of the *mukha mantapa* are made up of slabs of stones forming squares placed crosswise while the remaining ones are plain. The pillars in the *mukha mantapa* are round and not ornamented but those of the *nataranga* are typical Dravidian pillars of the usual type. The temple is Dravidian in style and has got a finely chiselled outer surface throughout. The outer walls of the *nataranga* and *garbhagriha* are divided into a number of bays by means of thin pilasters and in the central bays on each side are constructed elegant niches with characteristic carvings on the top. The tower over the *garbhagriha* as well as the parapet wall over the rest of the structure seem to be quite modern. The goddess is kept in the right corner of the *nataranga*. The image is standing about 2 feet high and holds *damarugo* and *trisula* in the upper hands. There is a lotus in the lower left hand while the lower right hand is in the *abhaya* pose. The inscription mentioned above records a grant to the temple in Saka year 1312 i.e. A.D. 1390. The temple must necessarily have been built in the early part of the 14th century.

Sattihalli —Also known as Sathnall. A village in the Sattihalli.
Hassan taluk ten miles south west of the chief town. Population 795

The village is interesting as being the centre of a Christian agricultural community which had its origin in the labours of the well known Abbe Dubois. Mr Lewin Bawring wrote some sixty years ago. There are twelve villages in the neighbourhood almost entirely inhabited by Christians numbering about 1000 souls. They are what are called caste Christians that is to say while following the Christian belief in all matters touching their faith and morals they preserve their ancient

social customs in everything which does not trench upon religion, and in respect to degrees of relationship in marriages and to succession to property have the same rules as their neighbours of the same caste who are not Christians" Attached to the church is a convent, where girls are taught by Indian Christian nuns There is a separate school for boys The priests have also established a dispensary from which they supply medicine gratis to all comers

Saulanga.

Saulanga. Saulanga is a place between Belur and Belgāmi

A *māstrīkal* (*mahā-satrīkal*) in front of the *musafīrkhana* at Saulanga is worth noticing It is not like the usual stones having a post sculpture on them with an arm and hand projecting from it, but is in the form of a regular *vīrgal* with three sculptured panels The lowest panel has two female figures, richly dressed and ornamented, standing side by side with the right hand raised at right angles to the arm and holding a lime between the thumb and forefinger Flames of fire are shown as encircling their heads In the upper panels are some female figures doing something the meaning of which is not quite clear but which is probably intended to show the manner in which *satīs* are honoured in the other world

Sompur

Sompur. A village in Arkalgud Taluk Population 246.

On an eminence to the north of the village are a number of mounds of earth which are locally designated as *Pāṇḍu Gutti* Similar sites are said to be found in other parts of the State where they are called other *Pāṇḍu-Kuli* or *Moryara dīnne* These mounds are only a foot or two above the ground level with a small depression of about 9' 0" diameter in the centre Each is surrounded by one or two circles of stones The circumference of one of these outer circles measures 176' 0" The central depression of one of these which is thrown open by some treasure seekers reveals a cavity of about 10' long and 6' broad covered with a thick slab of stone All other mounds are believed to have such cavities underneath The object of their construction is not known Tradition seems to connect these with the Pāṇḍavas of the *Mahābhārata*, but such an

association seems rather imaginary than real. It has been suggested that they might either be artificial caves of some aboriginal tribes or tombs of some early settlers of the locality. They may be as known by excavations prehistoric burial grounds. Complete excavation of a few such mounds will not fail to bring to light the archaeological relics in them and furnish some information as to their origin.

Sravana-Belgola —An important village between two rocky hills in the Channarayana taluk 8 miles south east of the *Lasba*. Head quarters of the *hobli* of the same name and since 1893 a municipality now a minor municipality. Population 2130.

Sravana-
Belgola.

It is the chief seat of the Jain sect being the residence of the principal *guru*. At the summit of Vindhya or Indra betta 3317 feet above the level of the sea and about 470 feet above the village below is the colossal statue of Gommatesvara 57 feet high and surrounded with numerous sacred buildings. On Chandra betta there are also many temples, and between the hills a splendid tank (*bel-gola*). A considerable trade is carried on in brass utensils.

A detailed description of the antiquities of this place has been furnished by Mr. Narasimhachar in his revised edition of *E.C. II. Inscriptions at Sravana Belgola*. What is given below is mainly based on it. Reference may also be made to Volume II Chapter V of this work dealing with *Sculpture and Painting*.

That Sravana Belgola was an acknowledged seat of learning in early times is proved from the fact that a priest from there named Akalanka Bhotto was in 788 summoned to the court of Hemasitala at Kanchi where having confuted the Buddhists in public disputation he was instrumental in gaining their expulsion from the south of India to Ceylon. The temple was subsequently endowed by Narasimha and other Hoysala kings. Despite Visnudevardhana's conversion to Vaishnavism the influence of the Jains at court continued practically unobscured. Differences between the Jains and Sri Vaishnavas existed but a compromise was brought about in the time of Bukka Raya.

of Vijayanagar, which resulted in a declaration of tolerance which was inscribed on stones and set up in public places. One is still at Sravana-Belgola and another at Kalya (Magadi taluk). The Jain establishment, which received the support of the Mysore Rājās as well as of the dynasties preceding them, was shorn, in common with others, of many of its privileges and emoluments by Tipu Sultān, but the temple has regained its importance since then.

Sravana-Belgola, or Belgola of the *srāvana* or *srāmana*, a Jain ascetic, is so named with reference to the colossal Jain image of the place, and its prefix *Srāvana* also serves to distinguish it from two other Belgolas with the prefixes Hale and Kod in the same neighbourhood. One of the inscriptions names the place Dēvara Belgola, that is, Belgola of the god (Jina). The usual derivation of Belgola is from the two Kannada words *bel*, white, and *kola*, by euphony *gola*, a pond, evidently in allusion to the splendid pond in the middle of the village, and this derivation derives support from the Sanskrit equivalents Svēta-sarōvara, Dhavalasaras and Dhavala-sarōvara used in the inscriptions to denote the place. The name Velgola occurs in an inscription of about 650 and Belgola in another of about 800. Other forms of the name occurring mostly in later inscriptions are Belgola, Belugula and Belagula, which have given rise to another derivation of the name from the herb white *gulla* (*solanum ferox*) in allusion to a tradition which says that a pious old woman completely anointed the colossal image with the milk she had brought in a *gulla-kāya* or *gulla* fruit. This derivation which presupposes the contraction or corruption of *gulla* into *gula* appears to be rather fanciful. The place is also designated Gommatapura, the city of Gommata (the name of the colossus), in some inscriptions and is called a *tīrtha* or holy place in several others. Further, the epithet Dakṣiṇa-Kāsi or Southern Kāsi is applied to it in some modern inscriptions.

It lies picturesquely between two rocky hills, one larger than the other, which stand up boldly from the plain and are covered with huge boulders. "In the whole beautiful State of Mysore, it would be hard to find a spot, where the historic and the picturesque clasp hands so firmly as here." The place can be reached by motor either from the Arsikere or the French Rocks Railway Station, or the run can be made from Bangalore

District a distance of about ninety two miles to Chennarayn patna and then another eight miles to the village. The larger hill known as Dodda betta or Lindhyagiri situated towards the south has on it the colossal image of Gommatesvara and a few *bastis* or Jina temples while the smaller hill known as Chikka betta or Chandragiri situated towards the north has on it the oldest inscriptions and a large number of *bastis*. It will be convenient to deal with the building etc. under these four heads—(1) Chikka betta (2) Dodda betta (3) the village and (4) the adjacent villages. According to inscription No 304 of 1830 the number of *bastis* at Sravana Belgola is thirty two eight on the larger hill including the statue of Gommatesvara sixteen on the smaller hill and eight in the village but unfortunately the names are not given.

Chikka betta—The smaller hill or Chikka betta also known as Chandragiri is 3002 feet above the level of the sea. In old inscriptions it is designated Katavapri in Sanskrit and Kalappu or Kalhappu in Kannada. A portion of the hill appears to have been known as Tirthagiri and Rishigiri. All the *bastis* on this hill with the exception of a minor shrine stand in a walled area measuring in its greatest length about 500 feet by about 225 feet where it is widest. They are all built in the Dravidian style of architecture the oldest of them going back probably to the eighth century. Altogether the number of temples in the walled area is thirteen and their plans are mostly similar to one another a *garbhagriha* or adytum a *sulhanasi* or vestibule either open or enclosed, and a *netaranga* or middle hall with or without a porch. A brief account will now be given of these *bastis* taking them in order according to their position in the walled area.

Santinatha basti—This consists of a *garbhagriha* or adytum a *sulhanasi* or vestibule and a porch and measures about 24 feet by 16 feet. It had once its walls and ceiling adorned with paintings of which only a few traces are now left. The image of Santinatha to whom the shrine is dedicated is a standing figure about 11 feet high. He is the 16th of the 24 Tirthankaras. It is not known when the temple was erected.

Suparsvanatha basti—This *basti* measuring about 25 feet by 14 feet is similar in plan to Santinatha *basti*. It enshrines a seated figure about 3 feet high of Suparsvanatha the seventh Tirthankara canopied by a seven hooded serpent and

flanked by male *chauri*-bearers No information is available as to when or by whom this shrine was founded It may be stated here that of the Tirthankaras, Supārsva and Pārsva are the only two that are represented as being canopied by the hoods, three, five or seven, of a serpent

Pārsvanātha-basti —This is a pretty large structure of some architectural merit It consists of a *garbhagriha*, a *sukhanasi*, a *navaranga* and a porch, and measures about 59 feet by 29 feet The doorways are lofty, and the *navaranga* as well as the porch has verandas at the sides The image of Pārsvanātha, the 23rd Tirthankara, about 15 feet high, canopied by a seven-hooded serpent, is the tallest on the hill The outer walls are decorated with pilasters and miniature turrets There is nothing to show when or by whom the temple was erected An inscription in the *navaranga*, No 67 (54), records the death in 1129 of a Jaina teacher named Mallishēna-Maladhārī, but it does not say anything about the shrine itself A lofty and elegant *manastambha* stands in front *Manastambhas* are pillars which have a pavilion at the top containing standing Jina figures facing the four directions These differ from the Brahmadēva pillars which have a seated figure of Brahma at the top The *manastambha* in question is sculptured on all the four faces at the bottom It has on the south face a seated figure of Padmāvati, on the east a standing male figure, apparently a Yaksha, holding a noose, an elephant-goad and a fruit in three hands, the remaining hand being in the *abhaya* or fear-removing attitude, on the north a seated figure of Kūshmāṇḍinī with the same attributes, and on the west a galloping horseman, the emblem of Brahmadēva According to a modern Kannada poem (*Belgolada Gommatēśvara charite* by Anantakavi) of about 1780, the pillar was set up by a Jaina merchant of the name of Puttāyā during the rule of the Mysore king Chikka-Dēva-Rāja-Wodeyar (1672-1704) The poem also states that the same individual also erected the enclosing wall of the temple area

Kattale-basti —This temple, the largest on the hill, measures about 124 feet by 40 feet It consists of a *garbhagriha*, a *pradakshina* or circumambulatory passage around it, an open *sukhanasi* with the *navaranga* attached to it, a *mukha-mantapa* or front hall and an outer veranda As it has no other opening than the single door in front, and all access of light even to this

is proved by the large enclosed front hall it is easy to account for the name of Kattale basti or temple of darkness by which the structure is known. It also seems to be called Padmavati basti probably from the image of that goddess found in the veranda. Though the shrine has no tower now it is likely that it had one at one time as the same is shown in an old drawing in the Jaina *matha* or monastery in the village. Idinatha the first Tirthankara to whom the temple is dedicated is a fine figure about 6 feet high flanked by male *chauri* bearers. From the inscription on the god's pedestal No 70 (64) we learn that Gaaga Raja the general of the Hoysale king Vishnuvardhana caused the basti to be erected for his mother Pochavve. The period of the construction may be about 1118. The front hall is a later structure. It has an upper storeroom which is now closed owing to its being in a dilapidated condition. A flight of stone steps outside at the north east angle of the hall led up to the upper floor and here it is said the ladies of rank used to assemble to witness the great festivals. The hall is said to have been renovated about seventy three years ago by the ladies Dēvirammanni and Kempammanni of the Mysore royal family. It is worthy of notice that this is the only temple on the hill which has a circumambulatory passage around the *garbhagriha*.

Chandragupta basti—This basti is the smallest on the hill measuring about 22 feet by 16 feet. It consists of three cells standing in a line with a narrow veranda in front. The middle cell has a figure of Parsvanatha the 23rd Tirthankara the one to the right a figure of Padmavati and the one to the left a figure of Kumbhmandini. In the veranda there are Dharanendra Yaksha at the right end and Sarvohna Yaksha at the left. All the figures are seated. Such was evidently the whole of the temple as originally built. But an ornamental doorway was subsequently set up in front with perforated stone screens at the sides thus closing up the former open veranda. The doorway is beautifully executed each architrave consisting of five fascias of elegant workmanship. The screens are pierced with square openings in ten regular rows and the interspaces forty five on each are carved with minute sculptures supposed to represent scenes from the lives of the Srutakevali Bhadrabahu and the Maurya emperor Chandragupta. In the middle of the bottom of the third row on the eastern half of the screen occurs

a label *Dāsōjah* in characters of the twelfth century, which is undoubtedly the name of the sculptor who made the screens and doorway. He is most probably identical with his namesake who engraved inscription No 140 (50), of 1145. The period of the screens and doorway thus appears to be about the middle of the twelfth century. It will be observed on close examination that there is some irregularity in the alternate rows of the eastern screen owing to the three stones of which it is composed having been misplaced at some time. But by putting the present topmost stone at the bottom and the bottom one at the top, the rows will correspond regularly with those of the western screen and the name of the sculptor will fall into its natural place at the bottom. The temple now opens into the front hall which also forms the entrance to the Kattale-basti. The outer walls are decorated with pilasters and above them with two fine friezes, one of ornamental niches and the other of the heads and trunks of lions mostly in pairs facing each other. The side cells are surmounted by small carved towers. Opposite to the middle cell stands in the hall a figure of Kshētrapāla on an inscribed pedestal. The temple is so called because according to tradition it was caused to be erected by the Maurya emperor Chandragupta. (See *Munivamsābhyaḍaya*, a Kannada poem by Chidānandakavi, written in about 1680). It is no doubt one of the oldest buildings on the hill, probably going back to the eighth or ninth century.

Chandraprabha-basti—This consists of a *garbhagriha*, a *sukhanasi*, a *navaranga* and a porch, and measures about 12 feet by 25 feet. It enshrines a seated figure, about 3 feet high, of Chandraprabha, the 8th Tirthankara. In the *sukhanasi* are Syāma and Jvālāmālini, the Yaksha and Yakshi of this Jina. Jvālāmālini is a good natural figure with only two hands, and its pedestal shows a lion with two riders seated one behind the other, though the usual cognizance is a bull. It is not known when the temple was erected, but a newly discovered inscription engraved on the rock close to the outer wall of the *navaranga*, No 415, seems to give a clue to the period of the structure. It gives the important information that a *basti* (now corrupted into *basti*) was built by Sivamāra. The palaeography of the record leads us to conclude that the reference is in all probability to the Ganga king Sivamāra II, ca of

Sripurusha and from the position of the opigraph and from the absence of any other buildings near it it may not be unreasonable to conclude that the *basadi* referred to is the Chandra prabha hasti itself. If this conclusion is correct this temple would be one of the oldest on the hill its period being about 800.

Chamundaraya basti.—This temple one of the largest is the handsomest on the hill both in style and decorative features. It consists of a *garbhagriha* an open *sulhanasi* with the *nava ranga* attached to it and a porch with verandas at the sides and measures about 68 feet by 36 feet. It has also an upper storey and a fine tower. There is now in the *basti* a figure about 5 feet high of Neminatha the 22nd Tirthaakara flanked by male *chauri* bearers. At the sides of the *garbhagriha* doorway in the *sulhanasi* are good figures of Sarvabha and Kushmandini the Yaksha and Yakshi of Neminatha. The outer walls are decorated with pilasters and crowned with three fine friezes one of small ornamental niches the second of the heads and trunks of *yalis* mostly in pairs facing each other and the third of larger ornamental niches with seated Jina and other figures at intervals. The outer walls of the upper storey are also ornamented with three similar friezes. The period of the building must be about 982 as two newly discovered inscriptions identical in their wording on the walls at the sides of the outer entrance No. 122 state clearly that Chamunda Raja caused it to be erected. But an inscription on the pedestal of Neminatha now enshrined in the temple No. 120 (66) of about 1138 says that Echana son of the general Ganga Raja caused to be built the Jina temple Trailokyaranjana which was also known as Boppana chaityalaya. From this it is clear that either the image of Neminatha or its pedestal did not originally belong to this *basti* but must have been brought here at some subsequent period from the temple founded by Echana which may have gone to ruin. The upper storey has a figure about 3 feet high of Parsvauatha and an inscription on its pedestal No. 121 (67) says that Jinadevan son of the minister Chamunda Raja caused to be made a Jina temple at Belgola. The temple referred to is in all probability the upper storey itself and its period may be about 995. The son probably adorned his father's structure by adding an upper storey which he dedicated to Parsvanatha.

Chāmunda-Rāja after whom the *bastī* is named also set up the colossus on the larger hill

Sāsana-bastī This *bastī* is so called from the *sāsana* or inscription No 73 (59) set up conspicuously at its entrance. It consists of a *garbhagriha* and an open *sukhanasī* with the *navaranga* attached to it, and measures about 55 feet by 26 feet. It enshrines a figure, about 5 feet high, of Ādinātha with male *chauri*-bearers at the sides. In the *sukhanasī* are figures of the Yaksha and Yakshi of this Jina, namely, Gōmukha and Chakrēsvari. The outer walls are decorated with pilasters and crowned with a row of ornamental niches containing Jina figures here and there. According to the inscription on the pedestal of Ādinātha, No 74 (65), the temple was caused to be erected by the general Ganga-Rāja, its name being Indirakulagriha, and the inscription at the entrance states that Ganga-Rāja made a grant in 1118 of the village of Parama which he had received from king Vishnuvardhana. The *bastī* was probably built in 1117.

Majjiganna-bastī—This is a small *bastī* measuring about 32 feet by 19 feet. It consists of a *garbhagriha* and an open *sukhanasī* with the *navaranga* attached to it, and enshrines a figure, about 3½ feet high, of Anantanātha, the 14th Tirthankara. Around the outer walls runs a row of flowers in separate panels. From the name it is clear that the temple was founded by a man named Majjiganna, but there is nothing to show when it was built.

Eradukatte-bastī—This temple is so called on account of the two stairs in the east and west of the approach to it. It consists of a *garbhagriha* and an open *sukhanasī* with the *navaranga* attached to it, and measures about 55 feet by 26 feet. The god Ādinātha to whom the *bastī* is dedicated is about 5 feet high with *prabhāvali* or glory and has male *chauri*-bearers at the sides. The *sukhanasī* has figures of Yaksha and Yakshi. From the inscription on the pedestal of Ādinātha, No 130 (63), we learn that the temple was caused to be built by Lakshmi, wife of the general Ganga-Rāja. Its period may be about 1118.

Savatigandhavarana-bastī—This *bastī* is so named after the epithet Savatī-gandhavarana, a rutting elephant to co-wives, of Sāntala-Dēvi, queen of Vishnuvardhana. It is usually known as Gandhavarana-bastī. It is a pretty large temple measuring about 69 feet by 35 feet and consists of a *garbhagriha*, a *sukhanasī* and a *navaranga*. The image of Sāntinātha, about

5 feet high with *prabhavali* or glory is flanked by male *chauri* bearers. In the *sulhanasi* are kept figures of Kimpurusha and Mahamasa; the Yaksha and Yakshi of this Jina. The outer walls are decorated with pilasters and the *garbhagriha* is surmounted by a good tower. From inscriptions Nos 132 (56) near the entrance and 131 (62) on the pedestal of Santinathe we learn that the temple was caused to be built by Santala Devi queen of King Vishnuvardhana in 1123.

Terina basti.—This temple is so called on account of the car like structure (*teru*) standing in front of it. It is also known as Bahuheli basti from the god Bahuhali or Gonnata enshrined in it. The *basti* consists of a *garbhagriha* and an open *sulhanasi* with the *navaranga* attached to it and measures about 70 feet by 26 feet. The image of Bahuhali is about 5 feet high. The car like structure mentioned above known as *mandara* is sculptured on all sides with 52 Jina figures. Two varieties of *mandara* are mentioned namely Nandisvara and Meru and the present structure is said to belong to the latter class. A newly discovered inscription on it No 137 of 1117 tells us that Mochikabbesod Santikabbe mothers respectively of Poysalasetti and Nemasetti the royal merchants of King Vishnuvardhana caused the temple to be erected and the *mandara* made.

Santisvara-basti.—This *basti* is dedicated to Santisvara or Santinatha. It consists of a *garbhagriha* on open *sulhanasi* with the *navaranga* attached to it and a porch and measures about 56 feet by 30 feet. The temple stands on a high terrace and has an ornamental mortar tower. The *sulhanasi* has figures of Yaksha and Yakshi. The middle portion of the rear wall has a niche with a standing Jina figure. It is not known when or by whom the temple was founded.

A few words may now be said about the other objects of interest within and outside the walled area on the hill.

Kuge Brahmadeva pillar.—This lofty pillar stands at the south entrance to the enclosure with a small seated figure of Brahmadeva on the top facing east. It had once eight elephants supporting its pedestal in the eight directions but there are only a few now left. An old inscription engraved on the four sides of the pillar No 59 (38) commemorates the death of the Gangeking Marssimha II which took place in 974. The period of the pillar cannot therefore be later than that date.

Mahānavami-mantapa—To the south of the *garbhagriha* of the Kattale-basti stand two fine four-pillared *mantapas* side by side facing east. Both of them have inscribed pillars set up in the middle. But the inscribed pillar in the north *mantapa* is beautifully executed, especially its top which is in the form of an elegant tower. The inscription on the pillar, No 66 (42), is the epitaph of a Jina teacher named Nayakīrti who died in 1176, set up by the minister Nāgadēva, his lay disciple. There are likewise several other *mantapas* containing inscribed pillars of ordinary workmanship, one to the south of the Chāmunda-rāya-basti, one to the east of the Eradukatte-basti, and two standing side by side like the Mahānavami *mantapa* to the south of the Tērina-basti.

Bharatēśvara—To the west of the Mahānavami-mantapa stands a building which is now used as a kitchen. Close to this building is a statue, about 9 feet high, facing west, said to represent Bharatēśvara, brother of Bāhubali or Gommatā and son of Ādinātha, the first Tīrthankara. The image seems to have been left in an unfinished condition, being complete only to the knees, from which point it rises from the face of the rock. It may have been carved out of a large upright boulder on the spot where it stands. From an inscription engraved at a distance of a few feet from the image, No 61 (25), it has been supposed that Aritttonemi was probably the sculptor who made the statue, as also the colossus on the larger hill. But there is no ground at all for this supposition, for the inscription on which it is based clearly says that the *guru* Aritttonemi caused something (we do not know what, the letters are gone here) to be made. He cannot therefore be the sculptor, nor can we be sure that the statue was the thing caused to be made by him. The period of the inscription seems to be about 900, nearly a century before the colossus on the larger hill came into existence. Aritttonemi is the Prākṛit form of the Sanskrit Arishtanemi, which is the name of one of the Jinās, namely, Nēminātha. It also occurs as the name of several Jaina teachers in inscriptions of the seventh century and onwards. The names of sculptors have as a rule the suffixes *āchāri* or *ōja*.

Iruve Brahmādēva temple—This is the only temple outside the walled area. It is a small shrine situated to the north of the north entrance to the enclosure, consisting of only a

garbhogriho and *cushrimag* a figure of *Brahmadeva*. The rock in front of the shrine has figures of *Jinas*, elephants, ornamental pillars etc. carved on it. In a few cases the names of the one who carved them are also given. Judging from the inscriptions Nos 150 and 151 on the doorway of the temple its period would be about 900.

Kanchina-donē—To the north west of the *Iruva* *Brahmadeva* temple is the *Kanchina donē* within a rectangular enclosure. A *donē* is a natural pond in rocks and it is not known why this pond is known as *Kanchina donē* or the bell metal pond. There are several inscriptions here and one of them No 443 of about 900 states that three boulders were brought to the place by order of some *Kadamba* chief. Two of them are still there but the third is broken to pieces. There is an inscribed pillar standing on a rock in the pond. One of the inscriptions on it No 162 says that the pond was caused to be made by *Manabha* in the year *Inanda* which probably represents 1191.

Lakki-donē.—Another pond to the east of the walled area is known as *Lakki donē* probably because it was caused to be made by a woman named *Lakki*. A close examination of the rock to the west of the pond revealed the existence of thirty now epigraphs Nos 415-475 incised in characters of about the ninth and tenth centuries. They mostly record the names of visitors to the place, some of the visitors being *Jaina gurus*, poets, officers and other high personages. It is very desirable that this rock should be carefully conserved.

Bhadrahabu Cave—According to tradition (see *Munisamsabhyudaya* by *Chidānandakavi*) the *Srutakevala* *Bhadrahabu* came to *Sravana Belgola* and lived in this cave. He also died there. His footprints in the cave are worshipped even now. It is also stated that the *Maurya* emperor *Chandragupta* came there on a pilgrimage and having received *diksha* or initiation from *Dakshinacharya* was worshipping the footprints until his death. There was an inscription in the cave No 166 (71) of about 1100 which stated that *Jinachandra* bowed to the feet of *Bhadrahabu swami* thus showing that the footprints represented according to the tradition at that time the feet of *Bhadrahabu*. But the inscription is not now forthcoming having been destroyed or removed when the cave was repaired some years ago. A portico recently erected rather disfigures the entrance to the cave.

Chāmunda-rāya's Rock —An inscribed boulder near the foot of the hill is known as Chāmunda-rāya's rock. Tradition has it that on Chāmunda-Rāya shooting an arrow from this rock in the direction of the larger hill, as he was directed to do in a dream, the image of Gommata, which had been concealed by stones, bushes, etc., became instantly visible. The rock bears figures of some Jaina *gurus* with labels below giving their names.

Most of the old inscriptions on this hill, which are in the form of epitaphs, are found either on the rock to the south of the Pārsvanātha-basti or on that in front of the Sūsana and the Chāmunda-rāya *bastis*.

Dodda-betta —The larger hill or Dodda-betta, also known as Vindhyaḡiri, is 3,347 feet above the level of the sea and about 470 feet about the plain at its foot. It is also sometimes designated Indragiri. A flight of about five hundred steps cut in the granite rock leads up to the summit of the hill, upon which stands an open court surrounded by a battlemented corridor containing cells, each enshrining a Jina or other figure. The corridor is again surrounded at some distance by a heavy wall, a good part of which is picturesquely formed by boulders in their natural position. In the centre of the court stands a colossal statue, about 57 feet high, named Gommatēśvara.

Gommatēśvara —The image is nude and stands erect facing north. The face is a remarkable one, with a serene expression, the hair is curled in short spiral ringlets all over the head, while the ears are long and large. The figure is treated conventionally, the shoulders being very broad, the arms hanging straight down the sides, with the thumbs turned outwards. The waist is small. From the knee downwards the legs are somewhat dwarfed. Though not elegant, the image is not wanting in majestic and impressive grandeur. The figure has no support above the thighs. Up to that point it is represented as surrounded by ant-hills from which emerge serpents; and a climbing plant twines itself round both legs and both arms, terminating at the upper part of the arm in a cluster of berries or flowers. According to the Jainas, the plant is Mādhavi (*Gaertnera racemosa*), a large creeper with fragrant white flowers, which spring up and blossom in the hot weather. It appears to be known as *Kādu-gulagunji* in Kannada. The pedestal is designed to represent an open lotus, and upon this the artist worked a scale.

corresponding to three feet four inches which was probably used in laying out the work. Engraved near the left foot of the statue the scale is divided into equal halves in the middle where there is a mark resembling a flower. According to some old residents of the place this measure when multiplied by eighteen gives the height of the image but they cannot give any satisfactory reason for multiplying by eighteen. According to others the measure represents the length of a bow but the length of a bow is supposed to be three and a half cubits and not three feet four inches. Owing to the great height of the image and the want of any point sufficiently elevated from which to take a picture of it most of the representations fail to give a good idea of the features of the face which are the most perfect part artistically and the most interesting.

It is probable that Gommata was cut out of a boulder which rested on the spot as it would have been a work of great difficulty to transport a granite mass of this size up the oval hillside. It is larger than any of the statues of Rameses in Egypt.

The figure is standing with shoulders squared and arms hanging straight. Its upper half projects above the surrounding ramparts. It is carved in a fine grained light grey granite has not been injured by weather or violence and looks as bright and clean as if just from the chisel of the artist.

The face is its strong point. Considering the size of the head which from the crown to the bottom of the ear measures six feet six inches the artist was skilful indeed to draw from the blank rock the wondrous contemplative expression touched with a faint smile with which Gommata gazes out on the struggling world.

Gommata'svara has watched over India for only 1000 years whilst the statues of Rameses have gazed upon the Nile for more than 4000. The monolithic Indian saint is thousands of years younger than the prostrate Rameses or the guardians of Abu Simbal but he is more impressive both on account of his commanding position on the brow of the hill overlooking the wide stretch of plain and of his size. (*Workman Through Town and Jungle* 82-84)

The statues of this Jaina saint (Gommata) are among the most remarkable works of native art in the south of India.

Three of them are well-known, and have long been known to Europeans. That at Sravana-Belgola attracted the attention of the late Duke of Wellington when, as Sir A. Wellesley, he commanded a division at the siege of Seringapatam. He, like all those who followed him, was astonished at the amount of labour such a work must have entailed, and puzzled to know whether it was a part of the hill or had been moved to the spot where it now stands. The former is the more probable theory. The hill is one mass of granite about 400 feet in height, and probably had a mass or Tor standing on its summit either a part of the subjacent mass or lying on it. This the Jains undertook to fashion into a statue 58 feet in height, and have achieved it with marvellous success. The task of carving a rock standing in its place the Hindu mind never would have shrunk from, had it even been twice the size, but to move such mass up the steep smooth side of the hill seems a labour beyond their power, even with all their skill in concentrating masses of men on a single point. Whether, however, the rock was found *in situ* or was moved, nothing grander or more imposing exists anywhere out of Egypt, and even there no known statue surpasses it in height, though, it must be confessed, they do excel it in the perfection of art they exhibit." (Fergusson, *History of Indian and Eastern Architecture*, II, 70)

Inscription No. 234 (85), of about 1180, which is in the form of a short Kannada poem in praise of Gommata composed by the Jaina poet Boppana, also known as Jujanottamsa, gives the following particulars about Gommata —

He was the son of Purudēva or the first Tīrthankara and the younger brother of Bharata. His other name was Bāhubali or Bhujabali. There was a struggle for empire between the brothers, which resulted in Bāhubali generously handing over the kingdom of the earth to the defeated elder brother and retiring from the world in order to do penance. He thus became a *Kēvali*, and attained such eminence by his victory over *karma* that Bharata erected at Paudanapura an image in his form, 525 bow-lengths in height. In course of time the region around the image having become infested with innumerable *kukkuta-sarpas* or cockatrices, the statue came to be known as Kuk-kutēśvara. It afterwards became invisible to all except the initiated. But Chāmunda-Rāya, having heard a description

of it set out with the desire of seeing it. Finding however that the journey was beyond his power owing to the distance and inaccessibility of the region he resolved to erect such an image himself and with great effort succeeded in getting this statue made and set up.

As stated before inscription No 231 (85) of about 1180 makes the clear statement that Chamunda Raja had the statue of Gommata made. The same statement is also made in inscription No 254 (105) of 1328. We have further synchronous records No 175 (76) 176 (76) and 179 (76) in Kannada, Tamil and Maithili languages respectively engraved at the sides of the image itself stating the same fact. The period of the last three inscriptions is evidently that of Chamunda Raja who according to inscription No 345 (137) of about 1159 was the minister of the Ganga king Rajamalla whose reign began in 974 and ended in about 984. Between these dates must the statue have been erected since according to tradition the consecration took place during Rajamalla's reign. But as a Kannada work on the 24 Tirthankaras popularly known as *Chamunda Raja purana* composed by Chamunda Raja in 978 does not mention the erection of the statue in the long account it gives of the author's achievements it is reasonable to conclude that the image was set up after 978. We may in the absence of more precise information put down the date of the completion of the colossus and of these inscriptions as 983. In the face of these inscriptions recording in unambiguous language that Chamunda Raja had the image made it is needless to say anything about the stories mentioned above regarding its existence from the time of Rama and Ravana. The traditional date of the consecration of Gommata by Chamunda Raja given in several literary works is Sunday the fifth lunar day of the bright fortnight of *Chaitra* of the cyclic year *Vibhava* corresponding to the year 600 of the *Kaliyuga* era.

Reference has been made to the anointment of Gommata. This is popularly known as *mastakabhisheka* or the head anointing ceremony and is performed only at certain conjunctions of the heavenly bodies at intervals of several years and at a great cost. It is called *mahabhisheka* in inscription No 231 of about 1500 which seems to fix the amounts to be paid to the officiating priests, the stone masons, carpenters and other

workmen, and for the supply of milk and curds. The earliest reference to *mastakābhishēka* is found in No 254 (105), of 1398, which states that Panditārya had it performed seven times. The poet Panchabāna refers to an anointment caused to be performed by one Santavarm in 1612, Anantakavi to another conducted at the expense of Visālāksha-pandita, the Jana minister of the Mysore king Chikka-Dēva-Rāja-Wodeyar, in 1677, and Santarāja-pandita, as stated above, to a third caused to be performed by the Mysore king Krishna-Rāja-Wodeyar III in about 1825. Reference is made to a similar ceremony performed in 1827 in 223 (98), to another in 1871 in the *Indian Antiquary* (II, 129) and to another still in 1887 in the *Harvest Field* (for May 1887). The latest one took place in 1925. The anointment performed in 1887 was at the expense of the Kolhapur Svāmī, who is said to have spent Rs 30,000 for the purpose. The following account of the ceremony is taken from the *Harvest Field* —

The 14th March last was the day of anointing for the statue of Gommatēsvara. It was a great day, in anticipation of which 20,000 pilgrims gathered there from all parts of India. There were Bengalis there, Gujaratis also, and Tamil people in great numbers. Some arrived a full month before the time and the stream continued to flow until the afternoon of the day of the great festival. For a whole month there was daily worship in all the temples and *pāda-pūja* or worship of the feet of the great idol besides. On the great day, the 14th, the people began to ascend the hill even before dawn in the hope of securing good places from which to see everything. Among them were large numbers of women and girls in very bright attire, carrying with them brass or earthen pots. By 10 o'clock all available space in the temple enclosure was filled. Opposite the idol an area of 40 square feet was strewn with bright yellow paddy, on which were placed 1,000 gaily painted earthen pots, filled with sacred water, covered with cocoa-nuts and adorned with mango leaves. Above the image was scaffolding, on which stood several priests, each having at hand pots filled with ghee, milk and such like things. At a signal from the Kolhapur Svāmī, the master of the ceremonies, the contents of these vessels were poured simultaneously over the head of the idol. This was a sort of preliminary bath, but the grand bath took

of them have figures of the *ashta-dīkṣāpālakas* or regents of the eight directions in the centre surrounded by other figures, while the central one has in the middle a fine figure of Indra holding a *kalasa* or water vessel for anointing Gōmmata. The ceilings are artistically executed, and, considering the material used, namely, hard granite, the work redounds to the credit of the sculptors. From the inscription in the central ceiling, No 221, it may be inferred that the hall was caused to be erected by the minister Baladēva in the early part of the twelfth century. Inscription No 267 (115), of about 1160, states that the general Bharatamayya had the *happalige* (? railing) of the hall around Gommatadēva built, No. 182 (78), of about 1200, records that Basvati-setti, a lay disciple of Nayakṛti-siddhanta-chakravarti, caused the wall of the enclosure and the twenty-four *Tīrthan-karas* to be made, and his sons the lattice-windows in front of those *Tīrthan-karas*, and No 228 (103), of 1509, gives the information that Channa-Bommarasa, son of Kēsavantha who was the chief minister of the Changāḷva king Mahādēva, and the *śravaṇas* (Jaina laymen) of Nanjarāyapattana caused the *ballivada* (? upper storey) of Gommatasvāmi to be renovated.

The Enclosure—Inscriptions Nos 177 (76) and 180 (75) in Kannada and Mahrattī languages respectively engraved on either side of the image immediately below those of Chāmunda-Rāya state that the enclosure around Gōmmata was caused to be made by Ganga-Rāja. The fact is also mentioned in several other inscriptions, namely Nos 73 (59), of 1118, 125 (45) and 251, of about the same date, 240 (90), of about 1175, and 397 of ? 1179. Ganga-Rāja was the general of the Hoysala king Vishnuvardhana. As the erection of the enclosure is mentioned in records of 1118 and onwards and not mentioned in No 127 (47), of 1115, we may conclude that it was built between these dates, most probably in 1117. The enclosure has certainly detracted from the imposing and picturesque effect the gigantic image must previously have presented when standing alone in its naked sublimity on the summit of the hill. But probably it was required during the time of Ganga-Rāja for protecting the statue from injury.

The cloisters in the enclosure around Gōmmata enshrine 43 images. With the exception of three, two of which represent the Yakshi Kushmandini and the third Bāhubali or Gōmmata,

all of them represent *Tirthankaras* there being in some cases two or more figures of the same *Tirthankara* set up apparently at different periods. Several of the images bear inscriptions on their pedestals stating by whom they were erected.

At the sides of the entrance to the enclosure are two *dwara palakas* or door keepers, about 6 feet high. Opposite to *Commata* outside the enclosure is a *Brahmadeva* pillar with a pavilion at the top about 6 feet above the ground level enshrining a seated figure of *Brahmadeva*. Below this pavilion stands the figure of *Gullakayaji* about 3 feet high facing *Commata* and holding a *gulla laya*. According to tradition the 2 figures of *Brahmadeva* and *Gullakayaji* were caused to be made by *Chamunda Raya*.

The other temples and objects of interest on the hill may now be briefly noticed.

Siddhara-basti.—This is a small temple enshrining a seated figure of a *Siddha* about 3 feet high. On both sides of the figure stand two *śila* inscribed pillars each about 6 feet high. They are similar to the inscribed pillar in the *Mahanavami mantapa* on the smaller hill and show elegant workmanship especially in their tops which are in the form of a beautiful tower. The inscription on it No 254 (105) is the epitaph of a *Jaina* teacher named *Panditarya* who died in 1398 the composer being the *Sanskrit* poet *Ahadda*. The bottom panel of the tower represents a *Jaina* teacher seated on one side of a *thavanalolu* or stool giving instruction to his disciple seated on the other side. The second panel shows a seated *Jina* figure. The inscription on the other pillar No 258 (108) commemorates the death in 1432 of another *Jaina* teacher named *Śrutavamsi* the composer in this case being the *Sanskrit* poet *Maugaraja*.

Akhanda bagilu.—This entrance is so called because the whole doorway is carved out of a single rock. The lintel which is well carved shows a seated figure of *Lakshmi* bathed by elephants standing on either side. According to tradition this doorway was caused to be made by *Chamunda Raya*. On both sides of this entrance are two small shrines that to the right containing a figure of *Bahubali* and the other a figure of his brother *Dharata*. Both the images bear inscriptions Nos 265 and 266 stating that they were erected by the general *Bhara-tēsvara* a lay disciple of *Gandavimukta siddhanta dēva*. Their

period seems to be about 1130 The erection of these statues by Bharatēsvara is also mentioned in another inscription, No 267 (115), of about 1160, which tells us that the two shrines were built for beautifying the sides of the entrance to the holy place It likewise tells us that the grand flight of steps leading to Akhanda-bāgilu was also the pious work of the same general To the right of this entrance stands a big boulder, known as Siddhara-gundu (or the boulder of the Siddhas), on which are incised several inscriptions, the top portion being sculptured with rows after rows of seated figures representing *Jaina gurus* Some of the figures have labels below them giving their names

To the right of another entrance known as Gullakāyajji-bāgilu, is sculptured on a rock a seated female figure, about one foot high, with folded hands This figure has wrongly been taken by the people to represent Gullakāyajji and the entrance named after her An inscription found below the figure, No 477, of about 1300, tells us, however, that it represents the daughter of one Malli-setti and commemorates her death This seated figure with folded hands in an obscure part of the hill can by no means represent Gullakāyajji, she being conspicuously represented by the figure standing opposite to Gōmmata, holding a *gulla-kāya* in the hands

Tyagada Brahmadēva pillar—This elegantly carved pillar is a beautiful work of art It is said to be supported from above in such a way that a handkerchief can be passed under it Tradition, which says that Chāmunda-Rāya had it made, is confirmed by the inscription on the north base, No 281 (109), which gives a glowing account of his exploits If this inscription had been left intact, we should perhaps have had the exact date of the erection of the great statue and a more precise account of the circumstances under which it was set up But unfortunately Hergade Kanna, in order to have a short inscription of only two and a half lines incised regarding himself, No 282 (110), appears to have caused three sides of Chāmunda-Rāya's original record to be entirely effaced leaving only the present fragment on the north base Kanna's inscription, which may be assigned to about 1200, is engraved on the south base and states that he had a Yaksha made for the pillar Chāmunda-Rāya's inscription must have begun on the south base below the figures sculptured on it Of these figures, the one flanked

by *chauri* bearers is said to represent Chamunda Raja and the other his *guru* Nemichandra. In the Sanskrit commentary on the *Gommalasara* a work in Prakrit it is stated that the *Gommalasara* was written by Nemichandra for the instruction of Chamunda Raja the great minister of the Ganga king Rajamalla. The pillar is also popularly known as Chagada kamba (pillar of gifts *chaga* being a corrupt form of the Sanskrit *tyaga*). The name is accounted for by the statement that it was the place where gifts were distributed.

Chennanna basti—This temple stands at some distance to the west of the Tyagada Brahmadaiva pillar. It consists of a *garbhagriha* a porch and a veranda and contains a seated figure, about $2\frac{1}{2}$ feet high of Chandranatha the eighth Tirthankara. A *manastambha* stands in front of it. From inscription No 390 of 1613 it may be inferred that the temple was built by Chennanna at about that period. On two pillars of the veranda are carved facing each other a male and a female figure with folded hands. These probably represent Chennanna and his wife. To the north east of the *basti* is a *mantapa* or pillared hall situated between two *donis* or natural ponds.

Odegal basti—The Odegal basti also known as Trikuta basti by reason of its having three cells facing different directions is a fine structure though with a plain exterior. It stands on a lofty terrace like the Santisvara basti on the smaller hill with a high flight of steps leading up to it and is called Odegal basti because of the *odegals* or stone props that have been used for strengthening the walls. The main cell contains a fine figure of Adinatha with a well carved *prabhavali* flanked by male *chauri* bearers the left cell a figure of Neminatha and the right a figure of Santinatha. All the three images are seated. On the rock to the west of the temple are engraved nearly thirty Marvadi inscriptions in Nagari characters Nos 283 to 309 ranging in date from 1645 to 1841 which record the visits of pilgrims from Northern India.

Chauvisatirthakara basti—This is a small shrine consisting of a *garbhagriha* a *sulhanasi* and a porch. The object of worship is a slab of stone about $2\frac{1}{2}$ feet high on which the figures of the twenty four Tirthankaras are sculptured. Three large figures stand in a line at the bottom and above them in the shape of a *prabhavali* are arranged small seated figures.

numbering twenty-one A Marvādī inscription, the shrine No 313 (118), states that the image of the twenty-four Tirthankaras was set up in 1648 by Chārūkīrti-pandita, Dharmachandra and others

Brahmadēva temple — This is a small shrine at the foot of the hill near the beginning of the ascent containing a shapeless flat stone daubed with vermilion which the people call Brahma or Jaruguppe Appa From an inscription on the rock behind the shrine, No 321 (121), we learn that the temple was erected by Rangaiya, younger brother of Girī-gauda of Hīrisavi, probably in 1679 The shrine has an upper storey, evidently a later addition, which has a figure of Pārsvanātha

The village — A brief account will now be given of the temples and other objects of interest at the village itself As stated before, the village lies picturesquely between the two hills Chikka-betta and Dodda-betta

Bhandarti-basti — This is the largest temple at Sravana Belgola, measuring about 266 feet by 76 feet It is a solid structure consisting of a *garbhagriha*, a *sukhanasi*, a *navaranga*, a porch, a *mukha-mantapa* and a *prakara* or enclosure The *basti* is dedicated to the twenty-four Tirthankaras and is hence known as the Chaturvimsati-Tirthankara-basti The *garbhagriha* has figures of the twenty-four Jinas, each about 3 feet high, standing in a line on a long ornamental pedestal There are three doorways, the middle one being well-carved, with large perforated screens at the sides of each The figure opposite the middle doorway is Vasupujya, the twelfth Jina, with eleven figures to its right and twelve to the left The *sukhanasi* has to the left, figures of Padmāvati and Brahma A single slab, about ten feet square, covers the floor enclosed by the four central pillars of the *navaranga* Similar slabs are also used for paving the front portion and the veranda It would be interesting to know how these slabs, so gigantic in size, were got to their places The *navaranga* doorway is well executed, especially its lintel which is carved with human and animal figures and foliage A veranda runs round the main building, as also a stone railing The railing has uprights in the shape of round pillars, about 4 feet high, to which thick slabs, about 2 feet and 6 inches broad respectively, are mortised lengthwise at the bottom and the top, leaving an open space of about nine inches in the middle The *manastambha* in front of the *basti* is a fine

monolith. The temple is popularly known as Bbandari basti because it was erected by Hulla the *bhandari* or treasurer of the Hoysala king Narasimha I (1141-1173). From inscriptions Nos 345 (137) and 349 (138) we learn that the *basti* was built in 1159 and that king Narasimha giving it the name of Bhavyachudamani granted for its upkeep the village Savanuru. No 345 speaks of it thus. The general Hulla gladly caused this excellent Jina temple to be built with all adjuncts so that people said that it was a charming ornament of Gommatapura. Together with its enclosure dancing hall two fine strongly built large Jaina dwellings at the sides and mansion with doorways resplendent with various elegant ornaments of foliage and figures the matchless temple of Chaturvimsati Tirthakaras resembling a mass of religious merit was thus completed by Hulla.

Aklana basti—This is the only temple in the village built in the Hoysala style of architecture. It is a fine structure consisting of a *gorbhagriha*, a *sukhanasi*, a *nararanga* and a porch. The *gorbhagriha* with a well carved doorway enshrines a standing figure about 5 feet high of Parshvanatha sheltered by a seven hooded serpent. In the *sukhanasi* whose doorway is flanked by perforated screens are seated facing each other five figures of Dharanendra and Padmavati the Yaksha and Yakshi of this Jina. They are about 3½ feet high and are canopied by a five hooded serpent. The *nararanga* has four beautiful black stone pillars ornamented with bead work and nine elegantly executed ceilings which are nearly two feet deep. The pillars are polished and have a shining surface like those of the Parshvanatha temple at Bastihalli near Halebid. The porch also has a fine ceiling. It has besides a railed parapet or *jagati* with a frieze in the middle of flowers between pilasters. The outer walls are decorated here and there with fine pilasters and miniature turrets. The tower consisting mostly of uncarved blocks except for a row of figures from the bottom to the top in the four directions has on its front embankment a beautiful panel very artistically carved with scroll work and surmounted by a *simha lalata* or lion's head. The panel has a seated Jina figure under a *mukhode* or tripla umbrella in the centre flanked on either side by a male *chauri* bearer a standing Jina and a Yaksha or Yakshi. The pedestal is flanked by elephants

The embankment has, at its sides, figures of Sarasvatī. The tower itself has a seated Jina figure in front. The south wall of the *bastī* being out of plumb, it is supported by a number of stone props. From the beautiful inscription which stands to the right of the porch, No 327 (124), we learn that the temple was erected in 1181 by the Jaina lady Achiyakka, wife of Chandramauli, the Brāhman minister of the Hoysala king Ballāla II, and that the king granted for its upkeep the village Bammeyana-halli. The inscription has an elegantly carved semi-circular top in the middle of which is a seated Jina figure flanked by male *chauri*-bearers with an elephant to the right and a cow and a calf to the left. The temple is called Akkana-bastī, which is a shortened form of Achiyakkana-bastī, that is, the *bastī* founded by Achiyakka. The fact that Achiyakka founded the temple is also mentioned in inscription No 331 which is engraved on the pedestal of the image of Pārsvanātha and in another at the village granted by king Ballāla II, namely, E. C. V, Chennarāyapatna 150, of 1182.

Siddhānta-bastī—In the west of the *prakara* or enclosure of Akkana-bastī is situated the Siddhānta-bastī, so called because all the books bearing on the Jaina *siddhānta* were once secured in a dark room of this *bastī*. It is said that at some remote period *Dhavalā*, *Jayadhavalā* and other rare philosophical works were carried away from here to Mudabidare in the South Kanara District. This temple has an inscribed marble Chaturvīṃśati-Tīrthankara image, about 3 feet high with Pārsvanātha standing in the middle and the other Jinās seated around. The inscription which is in Marvādī, No 332, states that the image was set up by some pilgrim from Northern India in about 1700.

Danasale-bastī—This is a small building situated near the entrance to Akkana-bastī. It enshrines a Pancha-Paramēśhtī image, about 3 feet high. The *pañcha* or five Paramēśhtīs are (1) the Jinās, (2) the Siddhas, (3) the Āchāryas, (4) the Upādhyāyas and (5) the Sādhus. One of each class is carved on the slab, the central figure being larger than the two figures on either side which stand one over the other. According to the *Munivamsabhyudaya* of Chidānandakavi (c 1680) Chikka-Dēva-Rāja-Wodeyar of Mysore visited Belgola during the rule of his predecessor Dodda-Dēva Rāja-Wodeyar (1659-1672), saw Danasale and got the village Madaneya granted by the king for its upkeep.

Kalamma temple—This is a solitary Hindu temple at the village situated near Akhara basti. It is a small structure dedicated to the goddess Kali or Kalamma the *garbhagriha* only being built of stone with a mortar tower over it. The goddess is a seated figure about $2\frac{1}{2}$ feet high with four hands two of them bearing an axe and a noose the other two being in the *varada* (or boon-conferring) and *bhaya* (or fear removing) attitudes. There is also a linga in front of the image. It is worthy of notice that rice is received from the Jaina *matta* or monasteries for the offerings of the goddess.

Nagara-Jinalaya—This is a small plain building consisting of a *garbhagriha*, a *sulhanasi* and a *nataranga*. It enshrines a standing figure about $\frac{1}{2}$ feet high with *prabhavali* or glory of Siddhanta. In a cell to the left in the *varada* *garbhagriha* is a figure about two feet high of Brahma with two hands the left hand holding a fruit and the right something that looks like a whip. The figure wears sandals and has the emblem of a horse on the pedestal. From an inscription in the temple No 335 (120) we learn that it was caused to be erected in 1190 by the minister Nagadeva a lay disciple of Vayakirti siddhanta-chakravarti and the *patanastami* of the Hovasa Ling. Ballila II (1113-1220). The temple was named Nagara-Jinalaya because the *nagara* or merchants were its supporters. It also appears to have borne another name Sriulaya. Other pious works attributed to Nagadeva in the inscription referred to above are the building of a stone pavement and a dancing hall in front of the *Kamatha* Paravadeva basadi and the erection of an epitaph to his guru Vayakirti siddhanta-chakravarti who died in 1176. This epitaph is the inscription No 66 (42). According to Nos 306 (100) of about 1000 he also constructed a tank called Nagasamudra after him but now known as Jigankatte. In inscription No 208 (108) of 1432 states however that Nagara Jinalaya was brought into existence by the glory of Pandita yati a great penance.

Mangayi basti—This is also a plain structure consisting of a *garbhagriha*, a *sulhanasi* and a *nataranga*. It contains a standing figure about $\frac{1}{2}$ feet high of Santinatha. At the sides of the *sulhanasi* doorway stand two *chauri* bearers each about five feet high. There is also an inscribed image of Vardhamana in a cell in the *nataranga*. In front of the temple

are two well carved elephants. Inscriptions Nos 339 and 341 (132) state that the *basti* was caused to be built by Mangayī of Belgola, a disciple of Abhinava-Chārukīrti-panditāchārya and a crest-jewel of royal dancing girls, and that it was named Tribhuvana-chudāmaṇi. The period of these records may be about 1325. Sāntinātha does not appear to be the original image set up by Mangayī as the inscription on the pedestal, No 337, states that the statue was caused to be made by Bhīma-Dēvi, a lay disciple of Panditāchārya and the queen of Dēva-Rāya-mahārāya. This Dēva-Rāya was most probably the Vijayanagar king Dēva-Rāya I (1406-1416) and the period of the epigraph may be about 1410. The inscription on the image of Vardhamana mentioned above, No 338, says that that image was caused to be made by a lady of the name of Basatayī who was a lay disciple of Panditadēva. Its period, too, may be about the same. From another inscription in the same temple, No 314(134), we learn that the *basti* was repaired by Guṇmatanna, a disciple of Hīriya-Ayya of Gerasoppe, probably in 1412.

Jaina matha or *monastery*—The *Jaina matha* which is the residence of the *Jaina guru* is a pretty structure with an open courtyard in the middle. An upper storey has recently been added to the building. The pillars of the porch are elegantly carved. The *matha* has three cells standing in a line, facing west, which contain the images that are daily worshipped. Of the three cells mentioned above, the middle cell has Chandra-nātha as the chief image, though there are many other bronze and marble figures kept in rows. The right cell has amidst other figures an image of Neminatha in an artistically executed brass *mandāsana* or pavilion, while the left cell has two metallic figures, one seated above the other, the upper one being Śīrāvātī and the lower Jvālāmālīnī. Several of the images appear to be recent additions as indicated by the inscriptions on them which range in date from about 1850 to 1858. The inscriptions are mostly in Sanskrit or Tamil engraved in Grantha characters and dated in some cases in both the *Mahāvēra* and *Saka* eras. The images were presents mostly from people of the Madras Presidency.

The walls of the *matha* are decorated with paintings illustrating mostly scenes from the lives of some Jinas and Jaina kings. The panel to the right of the middle cell represents the

Dasara Darhar of the Mysore king Krishna Raja Wodeyar III seated on the throne in Mysore while the one to the left which has three rows has figures of the Pancha Paramashtis at the top Neminatha with his Yaksha and Yakshi in the middle and a figure of the stam of the *matha* at the bottom represented as expounding religious texts to his disciples. On the north wall is pictured Parsvanatha's *samavasarana* with a big circle containing curious representations and the south wall to the right of the *guru's* room has portrayed on it scenes from the life of the emperor Bharata. *Samavasarana* is supposed to be a heavenly pavilion where the Kevali or Jina preaches eternal wisdom. Two panels to the left of the same room and two more on the west wall depict scenes from the life of the Jaina prince Nagakumara. The forest scene portrayed on one of the panels on the west wall is particularly good. The tree to the right with six persons on or near it is intended to illustrate the six *lesyas* of Jaina philosophy. *Lesya* (tint) is that by which the soul is tinted with merit and demerit. It is of six kinds and colours three being meritorious and three sinful. Meritorious *lesyas* are of orange red (*pita*) lotus pink (*padma*) and white (*sudha*) colours while sinful *lesyas* are of black (*krishna*) indigo (*nila*) and grey (*kapota*) colours. The former lead respectively to birth as man and to final emancipation while the latter lead respectively to hell and to birth as plant or animal. The picture illustrates the acts of persons affected with the different *lesyas*. With the desire of eating mangoes a person under the influence of the black *lesya* uproots the mango tree another affected with the indigo cuts its trunk a third influenced by the grey chops off big boughs a fourth affected with the orange red cuts off small branches a fifth under the influence of the lotus pink merely plucks mangoes and a sixth affected with the white picks up only fallen fruit. In the upper storey of the *matha* are set up a seated marble image of Parsvanatha and a black stone panel containing figures of the twenty four Jinas with Parsvanatha in the centre. According to tradition Chamunda Raya after erecting the colossal on the larger hill appointed his *guru* Nemichandra as the head of the *matha* at Sravana Belgola. It is also stated that there was a line of *gurus* at the place even before this period. One of the *gurus* of this *matha* Charukirti pandita is said in some inscriptions

(Nos 254 (105) of 1398 and 258 (108) of 1432) to have cured the Hoysala king Ballāla I (1100–1106) of a terrible disease and to have thence acquired the title of Ballāla-jīvarakshaka

Kalyāṇi —The *kalyāṇi* or pond in the middle of the village has already been referred to more than once. It is a beautiful large pond stepped on all sides and surrounded by a wall with gates surmounted by towers. To the north is a large pillared hall on one of the pillars of which is an inscription, No 365, stating that the pond was caused to be built by Chikka-Dēva-Rājendra. The latter was the king of Mysore who ruled from 1672 to 1704. From the *Gommatēśvara-charite* of Anantakavi (c 1780) we learn that Chikka-Dēva-Rāja, who ordered the construction of the *Kalyāṇi* at the request of Annayya, his mint-master, died before the completion of the work and that Annayya completed the pond with towers, pillared hall etc, during the rule of Krishna-Rāja-Wodeyar I (1713-1731), the grandson of Chikka-Dēva-Rāja. It was stated before that the village derived its name Belgola from this pond, but if the pond came into existence at the period noted above, it could not be the source of the name Belgola which occurs even in inscriptions of the seventh century. We have therefore to conclude that either this pond which had been in existence in a dilapidated condition was renovated by order of Chikka-Dēva-Rāja or that the pond which gave the name to the village was one quite different from this.

Jakkī-katte —This is a small tank to the south of the Bhandari-basti. From inscriptions below Jina figures on two boulders near the tank, Nos 367 and 368, we learn that Jakkimavve, a lay disciple of Subhā-chandra-siddhānta-dēva, the wife of the elder brother of the general Ganga-Rāja and the mother of the general Boppa-dēva, caused the tank and the Jina figures to be made. As we know that Ganga-Rāja was the general of the Hoysala king Vishnuvardhana, the period of these records must be about 1120, and Jakkī-katte, so named after the builder Jakkimavve, must be nearly 800 years old. Her praises also occur in inscription No 117 (43), of 1123, which records the erection by Ganga-Rāja of an epitaph to his *guru* Subhāchandra-siddhānta-dēva, who was likewise the *guru* of Jakkimavve. Another of her pious acts in the shape of the erection of a *basti* now in ruins at Sanehalli, about three miles from Sravana Belgola is recorded in inscription No 400 at that village.

Chennanna's pond — At some distance to the south of the village is a small pond known as Chennanna's pond. This Chennanna is the same man that built the Chennanna basti on the larger hill. He thought it fit to record the making of this pond as also of a grave and a *mantapa* in a good number of inscriptions namely Nos 363-310 and 428-490. From No 390 we learn that the period of the pond etc is about 1673.

Adjacent Villages — A few words may now be said about the temples etc in some of the neighbouring villages.

Jinanathapura — This village is situated about a mile to the north of Sravana Belgola. According to inscription No 358 the village was founded by Ganga Raja the general of the Hoysala King Virbhuvardhana in about 1117. The Santinatha basti here is a fine specimen of the Hoysala style of architecture. It consists of a *garbhagriha*, a *sulhanasi* and a *nataranga*. Santinatha is a well carved figure about $5\frac{1}{2}$ feet high with *prabhavali* flanked by male *chauri* bearers. The *nataranga* has four elegantly executed pillars adorned with bead work one of them being in an unfinished condition and nine good ceilings each about $1\frac{1}{2}$ feet deep. There are likewise in the *nataranga* two well executed niches facing each other which are now empty. The outer walls have a row of large images some in an unfinished state surmounted by beautiful turrets and scrolls. The images consist of Jinas, Yakshas, Yakshis, Brahma, Sarasvati, Manmotha, Mohini, drummers, musicians, dancers, etc. The number of female figures is 40. There are also niches outside corresponding to the inner ones. The south wall being a little out of plumb stone props have been set up to strengthen it. The basti is the most ornate of the Jina temples in the State. From the inscription on the pedestal of Santinatha No 380 we learn that the general Vasudhaikahandhava Rechamayya founded the temple and made it over to Sagaranaandi Siddhanta-deva. E.C. V. Arakero 77 of 1920 states that this general had been the minister of the Kalachuryas and that he subsequently placed himself under the protection of the Hoysala King Ballala II (1173-1220). We may therefore take the period of the erection of the Santinatha basti to be about 1200. An inscription on a pillar of the *nataranga* No 379 says that the basti was renovated by Paleda Podumianna in 1632.

There is another *bastī* in the east of the village, known as Aregal-bastī, which is older than the Sāntinātha-bastī. It consists of a *garbhagriha*, an open *sukhanasī* and a *navaranga*, and enshrines a fine seated marble figure of Pārsvanātha, about five feet high with *prabhāvalī*, canopied by an eleven-hooded serpent. At the sides of the *sukhanasī* are well carved seated figures, about $2\frac{1}{2}$ feet high, of Dharanēndra and Padmāvati. The temple is very neatly kept. It is called Aregal-bastī because it is built on a rock (*aregal*). From the inscription on the pedestal of Pārsvanātha, No. 383, we learn that the image was set up so recently as 1889 for the spiritual welfare of one Bhujabalaiya, a resident of Belgola. This was done because the original image had suffered mutilation. The original image, a standing figure, is now lying in the bed of the tank close by, its *mukhode* or triple umbrella being kept near the inscription, No. 384 (144), of about 1135, standing to the right of the entrance to the temple. As usual in Jina temples, the *bastī* has good metallic figures representing Chaturvimsatī-Tīrthankaras, Pancha-Paramēśhtis, Navadēvatas (p. 30), Nandīsvara, etc.

To the south-west of the village is an inscribed Jaina tomb, generally known as *samādhi-mantapa* but designated *silakuta* or stone house in the inscription. It is a square stone structure, about four feet broad and five feet high, surmounted by a turret but walled up on all sides with stone slabs without any opening. The inscription on it, No. 389, commemorates the death, in 1213, of Balachandradēva's son (name defaced), a disciple of the royal *guru* Nemichandra-pandita of Belkumba as a result of an attack of severe fever, and states that the *silakuta* was built by Bairoja on the spot where the body was cremated. The epitaph concludes with the statement that a woman named Kalabbe, probably the widow of the deceased, also ended her life in 1214. There is also a similar, but smaller, tomb on the rock to the north of the tank known as Tavarekere to the west of the smaller hill, with an inscription close to it, No. 362 (142), which says that it is the tomb of the ascetic Chārukīrti-pandita who died in 1613.

Hale-Belgola—This village is at a distance of about four miles to the north of Sravana Belgola. It has a ruined Jina temple, in the Hoysala style of architecture, consisting of a *garbhagriha*, an open *sukhanasī* and a *navaranga*. The *garbhagriha*

contains a standing Jina figure about 2½ feet high. Against the wall of the *sullarasi* leans a mutilated standing figure of Parvatanatha about five feet high with a seven hooded canopy and a serpent coil behind. The central ceiling of the *nataranga* which is beautifully carved has figures of the *ashta-dilpalakas* or regents of the eight directions seated on their vehicles with their wives the middle panel being occupied by a standing figure of Dharanendra with a five hooded canopy holding a bow in the left hand and what looks like a conch shell in the right. There are also two well carved *chauri* bearers about five feet high lying mutilated in the *nataranga* together with a seated headless Jina figure about three feet high. The *nataranga* doorway shows pretty good work. The outer walls have here and there pilasters and niches. The plinth is supported at the corners and other places by figures of elephants. An inscription at the temple BC V Chennarayana No 149 of 1094 states that the Hoysala prince Kreyana the father of Vishnuvardhana granted to the Jaina guru Gopananda Rathanaballa and the Belgola Twelve for repairs of the *basadis* of Belgola and other places. Gopananda is praised at great length in inscription No 69 (out) of about 1100 A D. It is probable that the period of the *basadi* is about 1094 A D.

There are also a Vishnu and a Shiva temple at the villoga which are small structures built of brick. The former has a figure of Kṛṣṇa about four feet high and two figures of Ālvars or Srivaishnava saints while the latter has a *linga* behind which stands a figure of Vishnu about 3½ feet high. The villoga appears to have had several more temples at one time as evidenced by the outlet of the tank close by which is mostly built of the architectural members of the temples such as beams pillars capitals etc. There is also a mutilated Jina figure near the pond in the middle of the villoga with the head of the headless image in the ruined *basadi* noticed above lying at its side.

Sanehalli.—This villoga about three miles from Sravana Belgola has a ruined *basadi* which was caused to be built in about 1120 by Jokkumavve the wife of the elder brother of Gonga Raja the general of the Hoysala king Vishnuvardhana (See inscriptions Nos 369 and 100).

Inscriptions.—The number of inscriptions found in Sravana Belgola and the neighbouring villogas is about 600. These are

collected together in *EC II Inscriptions at Sravana Belgola*, Revised Edition, by Mr R Narasimhachār. These are arranged in the volume under the four heads, Chikka-betta, Dodda-betta, the village of Sravana Belgola and the adjacent villages. The largest number of records have been discovered on the Chikka-betta. According to the characters in which the inscriptions are engraved, 45 are in Nāgarī, 17 in Mahājani, 11 in Grantha and Tamil, 1 in Vatteluttu and the rest in Kannada. Many of those found on the Chikka-betta are of a respectable antiquity going back to the seventh and eighth centuries, some are perhaps one or two centuries later, but very few can be brought down to a period later than the twelfth century. Many of the old ones are epitaphs of Jaina monks and nuns, some record the visits of distinguished persons, and some consist of only one word giving the name of the pilgrim who visited the place. Dodda-betta has likewise a good number of inscriptions, mostly of a later date, recording the visits of pilgrims from Northern and Southern India.

MUNICIPAL INCOME AND EXPENDITURE

Municipal Funds	1918-19	1919-20
Income	1,108	1,198
Expenditure	944	1,275

gache

Yagache Yagache or Badari, the chief tributary of the Hēmāvati, rises in the Bābā Budan hills, and flowing south, receives the Berinjī halla from the west, passes the town of Belūr, and joins the Hēmāvati near Gorūr in the Hassan taluk. *Yagache* in Kannada and *Badari* in Sānskrit is the name of the jujube tree (*Zizyphus*). There are three dams on the Yagache in this District, from which irrigation channels are led off. The Bomdihalli dam in Belūr taluk, which is the first, provides irrigation for 290 acres from a channel of $4\frac{1}{2}$ miles. The Halvagall dam, three miles west of Hassan, gives rise to a channel six miles long and irrigates 184 acres, and the Chengravalli dam, three miles from the point of confluence with the Hēmāvati, also feeds a channel nine miles long and irrigates 281 acres.

KADUR DISTRICT

SECTION I—DESCRIPTIVE

SITUATION AREA AND BOUNDARIES

The Kadur District lies in the west of the State and was Situation formed in 1863 with Kadur as head quarters which was afterwards removed to Chikmagalur. The District is situated between $12^{\circ} 55'$ and $13^{\circ} 51'$ north latitude and between $75^{\circ} 5'$ and $76^{\circ} 22'$ east longitude. Its greatest length is from east to west about 86 miles. Its greatest breadth from north to south is about 55 miles.

The area is 2 789 square miles of which 970 square miles Area are culturable and about 1 800 square miles unculturable.

It is bounded on the north by the Shimoga District on Boundaries the north east by the Chitaldrug District on the east by the Tumkur District and on the south by the Hassan District. On the west the boundary is the chain of the Western Ghats which separate it from South Kanara of the Madras Presidency.

PHYSICAL ASPECTS

The main part of the Kadur District is composed of the most mountainous region included within the limits of Mysore. Bordered on the west by the mighty Ghat range rising at this part into some of the loftiest peaks between the Himalaya and the Nilgiris supporting on its centre the stupendous barrier of the Baba Budan chain of even superior elevation between these towering masses covered with a complete network of lofty hills whose altitude at certain points as

in the magnificent Metri peak of Kalasa, renders them conspicuous landmarks even in this neighbourhood of giant heights, while ranges of more modest pretensions extend throughout the north and east this District, with a slight exception eastwards, may truly be described as pre-eminently the Malnād or highland region

Nor are these mountain tracts wanting in all those charms of wood and water which tend to soften the harsher features of so rugged a landscape For though the summits rear themselves bareheaded into space, the slopes are thickly clad with primeval forest, through which the shining streams thread their often headlong way, fertilising the narrow valleys and open glades, till their waters descend to the level of the larger rivers, flowing in steep and sunken channels, whence daily issue dense mists that cover the face of the country, lifting as the heat of the morning sun increases in power

In these vast solitudes the habitations of man are few and far between A single homestead, hidden amid the luxuriance of tropical vegetation, is often the only sign of his presence for many miles around Roads there are (or rather, thanks to the continued exertions of successive Engineer officers, were) none No wheeled conveyance disturbed the peace of the well-nigh trackless woods, save where a space, annually cleared for the occasion, allowed the car of some popular god to be drawn a couple of hundred yards and back from his shrine in the depths of the forest All the valuable produce of the country was, and to a great extent still is, transported on the backs of cattle, the rallying sounds from the belled leaders of the drove resounding far and wide

The eastern or Maidān taluks partake of the general features of that description of country in the other Districts, the transition from Malnād to Maidān being very abrupt and striking on approaching Lakvallī from the west

The congeries of mountains within the area of the District, so far as they can be reduced to a system, seem to range themselves into a central north and south ridge, with a great loop or circle on either hand, while at the south-western

angle of the District the Western Ghats make a bend inwards to the east marking the initial point of the line which divides the northern from the southern waters of the Mysore. The main ridge above spoken of commences at Ballalarayan durga and passing east of Merti gudda and Koppa durga separates the basin of the Bhadra from that of the Tunga and runs up towards Mandagadde connecting with the central range of the Shimoga District. On the west of this ridge is the valley in which Sringeri stands enclosed with a girdle of mountains while on the east of it and beyond the right bank of the Bhadra is the Jugar valley completely enclosed with the Baba Budan mountains which form as it were some gigantic outwork of the mighty Alpino wall.

The highest point in the District and in Mysore is Mulaina giri in the Baba Budans which rises of 6317 feet above the level of the sea. Of the companion heights in the same group Baba Budan giri is 6211 feet and Kalhatti giri 6155. The loftiest peak in the Western Ghats is the Kudure Mukha or Horse face mountain so called on account of its appearance from the sea to which it presents a landmark well known to navigators of that coast. Its height is 6215 feet. Another conspicuous mountain in the same range is the grand Ballalarayandurga 4940 feet. The Gangamula in Varaha parvata is 4781. Woddingudda 5006 and Lakke parvata 4662. Of greater height is the superb hill of Kalasa called the Merti gudda situated in the heart of the mountain region to the west and presenting especially towards the north a grand and symmetrical outline towering above all the neighbouring heights. Its summit is 5151 feet above the sea. Of other prominent peaks in the District Kanebini durga is 4081 feet and Sakunagiri 4653. Koppa durga is 2960.

The general level of the country lying along the south of the Baba Budan and neighbouring ranges which forms the water parting between the northern and southern river systems is at the Nirvani matha 4015 feet above the sea at Chikmagalur 3481 at Wastara 3631 and at Aldur 3454.

The plains to the east of the District and the valleys in the west are a good deal lower, with a slope to the north. Thus at Kadur the height is 2,553 feet above the level of the sea, and at Tarikere 2,235. At Sangamēsvara it is 2,525, at Bāle Honnūr 2,516, at Baggunji katte 2,481, at Srīngēri 2,439, and at Hariharpur 2,379.

The principal rivers of the District are the twin streams—the Tunga and the Bhadra, the latter running most of its course here. They both rise at Gangāmūla in the Varāha parvata, situated in the Western Ghats at the point where the boundaries of the Koppa and Bāle Honnūr taluks meet. The Tunga flows north-east past Nemmar and Srīngēri to near Baggunji, where it turns north by west, and passing Hariharpur, enters the Shimoga District, making a sharp turn to the north-east at the Bhīman-katte, and so to Shimoga. The Bhadra runs east for some distance past Kalasa, and then, turning north-east, flows with a winding course past Bāle Honnūr and Khāndya to Hebbe, where, receiving the Sōmavāhīni from the Jāgar valley, it continues to Lakvallī and thence flows on to Bhadrāvati in the Shimoga District.

Of the southern streams, the Hēmāvati has its source at Javalī in Melbangādi, but almost immediately leaves this District and enters that of Hassan. The Berinji halla in like manner rises near Anur and shortly flows into Hassan District, where it joins the Yagachī. The latter has its source near Sitalmalapan Kanive in the Bābā Budan range and runs through Hīrēmagalur towards Belur in Hassan.

On the east of the Bābā Budan range, the Gaurī-halla and the Avati are twin streams, rising near the peak of Mulanagiri. The first expands into the Ayyankere lake above Sakkarepatna, and issuing thence with the name of the Vēda, skirts this town and flows north-east to Kadur. The other, the northern stream, forms the large Madaga tank, and the two, uniting near Kadur continue into the Chitaldrug District under the name of the Vēdāvati.

The largest sheets of water are the two tanks or lakes in the gorges at the eastern base of the Bābā Budan mountains.

The first of these called the *Ayyankere* or *Dodda Madaga* here is formed four miles north west of *Sakkarepatna* by an embankment thrown across the river *Veda* where it issues through the only outlet in the surrounding hills a gap of about 1700 feet in width at the south eastern foot of *Sakunagiri*. It is a beautiful expanse of water about seven miles in circumference and dotted with several islands. Four channels are drawn from it irrigating about 300 acres. The other tank called the *Madagikere* or *Kadur Madagikere* has been similarly formed by embanking the sister stream the *Avati* at a point where the two hills called *Sivanagiri* and *Hagrikangiri* so nearly meet as to form a natural basin. The bund is 1200 feet long.

GEOLOGY

About one half of the area of this district consists of the *Dharwar* schists the rest being composed of various granites and gneisses of different series. Rocks.

The *Dharwar* schists occur in two well defined belts the one forming the well known *Baba Budan* range of hills and the other the *Gangamula*, *Vertiparvata* and *Kudremukha* regions.

The *Baba Budan* belt constitutes the whole chain of the horse shoe shaped mountain range the schists extending in all directions considerably away from the foot of these hills. The belt consists chiefly of the dark hornblende rocks the hornblende schists epidiorites amphibolites etc associated with bands of quartzites ferruginous quartzites and hematite bands. These iron ore beds are in a series of bands crumpled and folded following the horse shoe curvature of the contour of the hill ranges and on account of their superior resistance to weathering form harder ribs standing out as persistent ridges forming the summit of the hills. Near *Kalhattagiri* and *Kemmangundi* these ores are being mined and removed for the *Mysore Iron Works* at *Bhadravati*. (See Vol III Chapter V *Mines and Minerals*, of this work.)

Overlying the hornblendic series, between Santeveṇṇi and Lingadhalli is a mass of greyish green hornblendic trap believed to be younger in age than the dark hornblendic schists of the Bābā Budans. In these also are bands of quartzites and iron ore.

The other belt is in the form of a broad "U" shaped mass at the western border of the district to the S and S-W of Srīngēri forming part of Mudgere taluk. This also consists chiefly of dark hornblendic schists with a number of bands of hæmatite-quartzites.

The northern portion of this hornblendic series is succeeded by a fairly large mass of opalescent quartz gneiss (now styled as Champion gneiss series) which also follows closely the curvature of the schists. This gneiss is shown to be cut off to the north and N-W by the Peninsular gneiss of Srīngēri.

From the gneissic complex of this region are differentiated the granitic series of the Chikmagalur granite, the granitic gneiss of the Tarikere valley, and the granitic gneisses to the west of Kadur, correlated with the granitic members of the Champion gneiss series. Barring these few exposures, the rest of the gneissic ground is believed to consist of the Peninsular gneissic complex. Charnockites and newer granites of the Closepet age have not been recognised in this district.

Dolerites are conspicuous in this district and some dykes have been traced for long distances up to nearly 30 miles.

Building
Stones

Granites are being quarried near Birur, Kadur and some other places.

Fuchsite
Quartzite

This forms a beautiful emerald green ornamental stone and takes a high polish. The stone can be used for making pedestals, ornamental vases, etc. It has been worked to a small extent near Belvādi.

Ferruginous
bauxite

Ferruginous bauxite is found near Kalhatti T. B. and the analysis of the average samples from the prospecting pits

proved that they were rather low in alumina contents. Some good samples were obtained with a high content of alumina but they are in small quantities.

There are a group of gold workings round about Farikere (11) Lakkavalli and Ajjampur. A few years back at Shiddir halli and Jalagargundi some deep prospecting work was done and at the latter place a small body of fairly good ore was located.

The hematite ore of the Baba Budans forms one of the Iron Ores most important deposits of the State. An account of the prospecting work done, exploitations carried out etc. has been given in Vol. III of this *Catalogue*.

Along the banks of the Tungabhadra river to the east of Sringeri (12) and Hanaharpur patches of fairly good kaolin are found in the weathered pegmatites. A number of prospecting pits and trenches were put in near Hoskoppa, Agoda and Kihri in the Koppa taluk, the result of which showed that the material existing under a cap of lateritic soil of varying depths do not in the aggregate exceed one or two thousand tons.

Mica is found about four miles east of Sringeri and was Mica worked during 1911-12 by the Jagir authorities. The deposit near Kihri is reported to have yielded about 23,568 lbs of splittings from about 180,000 lbs of undressed mica before 1916. Work has been abandoned now.

Ruby Corundum is found near Kadmine three miles north Ruby Corundum east of Sringeri. The mineral is of fairly good colour but is considerably flawed rendering the polishing and cutting very difficult.

Indications of asbestos have been noticed to the east of Asbestos Mudgere but no prospecting has been done.

Manganese

Some Manganese ores had been obtained in the Tarikere taluk, about a mile east of Shiddarahalli. The total quantity of ore extracted in this district from 1905 to 1924 was 12,542 tons of which 10,235 tons were exported.

Soils

Along the south of the Bābā Budan mountains is a rich tract of black cotton soil, whose fertility, enhanced by the command of an unfailing supply of water from the hill streams, is said formerly to have given to the plain of Chikmagalur the name of Honjavanige Sime, or land flowing with gold. The higher tracts of this region are generally gravelly. Black cotton soil also prevails in the neighbourhood of Ajampur, together with red and gravelly soils. The western parts of Tarikere contain sandy and gravelly soils. About Yegate the earth seems poor and has a white chalky appearance. More to the south the soil is adapted to the cultivation of the cocoanut without irrigation, as in the adjoining parts of Tumkur and Chitaldrug Districts.

The soil of the Malnād bears a general resemblance to that of the same region extending through the neighbouring Districts north and south.

BOTANY

Vegetation

The west of the District is covered with some of the best forests in the country. This is especially the case with Lak-kavalli, which abounds in fine teak, and has for many years supplied the whole of western Mysore and the Bellary country with that timber, grown in the forests to the north of the Bābā Budans. Throughout the Jāgar valley and most of the Koppa and Mudgere taluks is a continuous stretch of valuable forest, densely clothing the hill-sides and giving shelter to much coffee cultivation. Sholas and hanging woods occupy almost every ravine and hollow of the Bābā Budans. The loftier heights are nearly always bare of trees, but clothed with much coarse grass and the dwarf date. The tree vegetation east and south of Santaveri is, as a rule, poor, and, even when the soil is better and the growth fair, there is but little

good and useful indigenous timber. The eastern taluks are generally devoid of trees. The date palm (*phoenix sylvestris*) grows profusely in parts especially in Hadur and the grazing is good. In the north of Tirukere are the jungles round Ubrani which though not yielding large timber are valuable as affording a supply of fuel in so poorly wooded a neighbourhood. The sandal grows on the slopes of the hills leading up to the Baba Budas from the south and east.

The following table shows the important State forests etc. in the District —

Arbori

Crops.

The following is a general list of the crops and other products of cultivation in the District

Kannada	Botanical	English
<i>Cereals</i>		
Baragu	Panicum mihaceum	
Bhatta	Oryza sativa	Rice
Godhi	Triticum aristatum	Wheat
Haraka	Panicum semiverticillatum	
Jola	Holcus sorghum	Great millet
Navane	Panicum italicum	Italian millet
Ragi	Eleusine corocana	Ragi
Sajje	Holcus spicatus	Spiked millet
Same	Panicum frumentaceum	Little millet
<i>Pulses</i>		
Alasandi	Dolichos catang	
Avare	Dolichos lablab	Cow gram
Hesaru	Phaseolus mungo	Green gram
Hurali	Dolichos uniflorus	Horse gram
Kadale	Cicer arretinum	Bengal gram
Togari	Cajanus indicus	Pigeon pea, doll
Uddu	Phaseolus minimus	Black gram

General list of the crops etc—*concluded*

Kannada	Botanical	English
<i>Oil seeds</i>		
Haralu	<i>Brassica communis</i>	Castor oil
Huchchalu	<i>Eurycaria oleifera</i>	Wild almond
Kamtil		
Kuume	<i>Carthamus tinctorius</i>	Safflower
Willilu	<i>Sesamum orientale</i>	China
<i>Vegetables (Natale)</i>		
Agaili kayi	<i>Carolina gracilis</i>	Laurel

Varieties of
paddy

The varieties of *paddy* raised in the district are fourteen, named as follows kesari, honusunga, kowde doddi, kirvana, putta kirvana, kempu sanna bhatta, bile sanna bhatta, kussade, kesser bira, sul bhatta, hola muradaga, putta bhatta, kumbai kesari and kodu bhatta. Of these, kempu sanna bhatta, bile sanna bhatta and putta bhatta are esteemed the best and fetch the highest prices

Areca
gardens

The *areca* gardens, which occupy the moist and sheltered valleys throughout the west, produce the best description

of nut in the country that of knlasa and its neighbourhood being in especially high repute

The coffee cultivation of Southern India may be said to have had its origin in this District for the plant was first introduced in about the 17th century by a Muhammadan pilgrim named Baha Budan who on his return from Mecca brought a few berries in his wallet and taking up his abode on the hills that now bear his name planted them near his hut. It was not however till about 1820 that the cultivation extended beyond his garden and not till 20 years later that European enterprise was first attracted to it. One of the earliest European planters was Mr Cannon who formed an estate on the high range immediately to the south of the Baha Budan giri where the original coffee plants are still in existence flourishing under the shade of the primeval forest.

The success of Mr Cannon's experiment led to the occupation of ground near Ugur in South Manjarahad by Mr Green in 1813. Since 1860 estates have sprung up between these points with such rapidity that both Indian and European planters are settled in almost a continuous chain of estates from the south west of Shimoga to the southernmost limits of Manjarahad not to mention Coorg and Wainad beyond.

Mysore coffee is considered the best in the world with the exception of Jamaica which produces a very small quantity. It fetches the highest price in the London market. The estates on the Baha Budans grow the finest coffee. Coffee was at first a Government monopoly. After the Revenue Survey and Settlement a land tax of Rs 180 permanent and Rs 10-0 for 30 years tenure was instituted in respect of coffee lands.

The coffee zone in this District is estimated to cover about 1000 square miles extending over the whole western portion and of this region one tenth or more presents as regards soil aspect and shade every condition necessary for successful cultivation. Within this area there were in 1924

108 square miles under coffee, as per particulars noted below

<i>Taluk</i>	<i>Acres</i>
Chikmagalur	21,755
Kadur	760
Koppa	11,454
Mudigere	17,209
Tarikere	9,307
Narasimharajpur	8,005

The total quantity of cured coffee produced in the District during the year 1923-24 was 3,540 tons—Cherry dried 1,544 tons, Parchment 1,996 tons

Cardamom

The *cardamom* grows wild in the Malnād taluks of the District, but owing to the extension of coffee estates, it is no longer plentiful, except in the Kalasa and Melbangādi *magnams*. Its systematic cultivation has, however, been taken up by coffee planters, and in some parts with great success

Tea

Some casual attempts have been made to introduce the tea plant, but apparently without much success. A large extent of land is said to be eminently fitted for tea cultivation. The matter was investigated by the Agricultural Committee of the Economic Conference with the help of an Expert. Government also offered liberal concessions to the intending tea planters. The question is again engaging the attention of Government.

Cinchona and Rubber plantations

There are a few cinchona and rubber plantations in the Koppa and Mudigere taluks, but the results obtained so far have not been satisfactory.

Mulberry

Experimental Farms were formed at Allampur in the Chikmagalur taluk and near Hirekan Matt on the Bābā Budan Hills under the auspices of the Mysore Economic Conference. The former is thriving well and the latter failed on account of climatic conditions.

Cotton

In Kadur and Tarikere taluks, cotton is grown to an extent of about 257 acres.

Plum trees are most common. Pine apple Guava and Jack fruits etc grow almost wild in the Malnad. The soil and climate are well suited for the growth of fruit trees. There are great possibilities in the Malnad in the way of fruit culture. Fine oranges are grown in the Yemmedoddi of the Kadur taluk and grist mangoes in the Kadur Parikere and Chikmagalur taluks. Horticulture
Fruit trees.

The pods of the Dhūpa tree are said to contain excellent material for the manufacture of soaps and candles while Dhūpa
tree
Kulekayi tree yields a vegetable fat used by some classes of the population as a substitute for ghee.

FAUNA

The elephant is occasionally met with in high hills and other remote parts of the Western Ghats and be on through out the Malnad. Tigers panthers and leopards are general and the *shuanga* or hunting leopard is sometimes to be found. Among the smaller *felidae* may be mentioned the tiger cat and the civet cat. Wild
fauna.

The wild boar is found all over the District and is very destructive to sugar cane plantations especially at the time when the young cane begin to throw out its tender shoots. The porcupine frequents all parts of the District.

Of the deer tribe elk spotted deer and antelope are less numerous than they used to be. The iguana the mungoose and its enemy the coffee rat (*golunda cleita*) are common. Of squirrels there are the flying squirrel the large red squirrel and the common grey squirrel. Besides the lemur and the ape the black monkey and the grey monkey abound in the forests.

The bustard is common on the plains. The wild goose duck teal and snipe the jungle fowl and spur fowl partridges red and black quail peacock pigeons blue and green with doves of many varieties are general. The buzzard and vulture with various kites and hawks are numerous. Birds

The wooded tracts of the Malnād abound with birds of beautiful plumage, among which are hornbills, woodpeckers, and a great variety of smaller birds, as well as parrots and the talking mina.

Reptiles

The cobra and the carpet-snake are the most venomous and most dreaded. Lizards are in great abundance and variety, and the bite of one kind is supposed to be poisonous. There are three kinds of scorpion generally in the District: the large black rock-scorpion, the large red field-scorpion, and the little red house-scorpion. Leeches are very numerous and active during the rainy months. Spiders of immense size are found in the bamboo jungles on the banks of the Bhadra. The alligator is common in rivers and large tanks.

Fishes

Fishes are abundant in both rivers and tanks. Besides the ordinary tackles of rod-and-line and nets, long conical baskets, called *hiruguli*, made of split bamboo interlaced with rushes, are used in catching them. The finest fish are found in the Tungā and Bhadra rivers and in the Madag, Ayyankere and Keresante tanks. The *mahseer*, probably the best freshwater fish in India, is sometimes caught in the rivers, and reaches to the weight of 20 lbs. At the Srīngēri Math and other sacred places on the banks of the rivers, fishes are daily fed and are so tame that a call will bring them in thousands to the surface. The Brāhmans invariably throw the remains of their rice to the fish. Some of these are even adorned with jewellery, such as nose-rings, or ear-rings, and ornaments fastened to their tails.

The following are some of the principal fishes found in the District: Kuchina murl (*ophrocephalus striatus*), bīli kōiava (*ophrocephalus punctatus*), baḷi (*silurus*), havu (*macrognathus*), gīd pakke, aval minnu, muru godu, kem minnu, malla minnu, guginasibi, kare sanna, haḷadī, kuradī, haḷavu.

Domestic animals

The cattle of the District generally are poor in size and of inferior breed. The climate of the Malnād is very destructive to them, so much so that farmers of that region are

forced to replenish their stock annually. The hardy buffalo on the other hand thrives in the moisture of the climate. Hence in the plains the she buffalo is tended with even more care than the cow, as apart from a large yield of milk the sale of her male calves to purchasers from the Malnad is found to be very profitable. Though grazing is abundant in the hilly regions it is of a coarse description, whence ragi and paddy straw are commonly given to the cattle on returning home in the evening. During the dry season in the plains where grazing is not to be had straw as above with the stalks of jowari, navane, hurli, etc. are used as fodder, and even tender leaves of the date tree. These however afford no nourishment.

The live stock of the District consisted in 1923-24 of 38,087 cows, buffaloes and bullocks, 1,052 horses, ponies and donkeys and 114,564 sheep and goats.

CLIMATE AND RAINFALL

The climate is similar to that of Hassan.

Climate

This is the wettest District in the State having an annual normal of 73.45 inches of rain falling on an average on 89 days. Heavy and practically continuous rain falls from June to September and nearly one third of the annual total is recorded in July. Over larger parts of the Koppa, Mudigera and Sringeri taluks the annual rainfall exceeds 100 inches and approaches that of the wettest regions of the globe. The wettest station in the District is in the Byrapur Estate with an annual normal of 287.37 inches. In 1924 the aggregate for this station was 379.28 inches, of which as much as 232.48 inches were recorded in July. The heaviest total for a single day was 20.95 inches gauged at Kotgehar on the 14th July 1924 and the fall for the next day also was very heavy, viz. 18.70 inches. Only in the eastern part of the Kadur taluk the yearly total is less than 25 inches. The annual rainfall was over 30 per cent short of the normal in 3 out of 31 years and the deficit was over 15 per cent in 5 years.

Rainfall

Rainfall at
Chikmagalur

Since 1870 the annual aggregate was over 50 inches only in two years, viz, 1882 and 1883 when the totals were respectively 53 79 and 54 96 inches. The rainfall was below the normal in 28 out of 55 years and the yearly total was in no year less than 20 inches. The worst year on record is 1881 with only 21 41 inches.

The table below gives the actual rainfall at Chikmagalur from 1870 to 1924

Year	Inches	Year	Inches
1870	31 09	1898	37 67
1871	35 65	1899	28 22

THE PEOPLE

Population

The District has a total population of 333,538 according to the figures returned at the Census of 1921, of which 174,615 are males and 158,923 females.

The District comprises of 5 taluks and 2 sub taluks and Distribution
the population is distributed over the District as follows —

Taluk	Area in Sq miles	Population as in 10 1	Density
1 Chikmagalur	640 4	803 0	1
Kadur	540 50	8 011	150
3 Tarikere	46 8	65 1	139
4 Koppa	657 47	30 84	81
5 Narasimhar ipur (sub-taluk)		17 11	
6 Mudigere	433 4	47,683	101
7 Sringeri (sub-taluk) (Jagir)	43 6	9 337	14

Arranged according to religion the following results are By Religion
obtained —

Religion	Above 10		Under 10		Total	Per cent

CHRISTIAN MISSIONS

There are two Roman Catholic churches one at Chikmagalur and the other at Mudigere. There are also a few sub stations in the District. The Roman Catholic Mission

There is a Wesleyan Mission church at Chikmagalur. The Mission conducts at Chikmagalur two Day Schools for girls. There is also a Girls School at Farkere. The Wesleyan Mission

SECTION II—HISTORY AND ARCHAEOLOGY

A. HISTORY

Few spots in the wild and romantic regions of this District which contains the sources of the Pampa or Tungabhadra the scene of memorable transactions recorded in the *Ramayana* are without a story connecting them with one or other of the heroes of the great Indian epics. Sringeri as might be expected of the chief seat of Saiva Brahminism takes precedence of all other places in its claims to antiquity and historic fame. Its name is properly Rishya Sringagiri. Here was the hermitage of Vibhandaka and here the birth place of his son Rishyasringa a sage adorned with horns who plays an important part in the opening scenes of the *Ramayana*. He was begotten without a natural mother and grew up in the wilderness never having seen or heard of a woman. At that time the kingdom of Anga was suffering from a great dearth and the king Lomapada was informed by his spiritual advisers that the only remedy lay in bringing hither the immaculate Rishyasringa. This therefore was resolved upon and the princess Santa to become his bride. But how to bring him was the question for all feared lest they should alarm the unsephisticated youth and incur the wrath of the stern Vibhandaka whose single glance could reduce them to ashes in a minute. At last the plan was agreed upon that a band of fair damsels should be sent in the disguise of hermits who by the attractions of their all powerful

wiles, should entice the young recluse away from his forest home. They arrive at Narve near Srīngēri and concealing themselves in the woods, watch for an opportunity when the father should be absent. Then issuing forth, by their sports and gambols they draw the attention of the young hermit, who, lost in wonder, directs them to his cell, duly performs the rites of hospitality and is soon bewitched with his charming guests. Next day he hastens to pay a visit to their pretended hermitage and being led on board a raft made to resemble an island is floated away in the society of his fan companions. How his approach to Anga brought rain, how he was married to the princess, how he then became the priest of king Dasaratha of Ayōdhya and performed the *asvamēdha* or horse sacrifice, the celebration of which procured offspring to the childless monarch and resulted in the birth of Rāma, all this is fully related in the *Bāla Kānda* of the *Rāmāyana*.

Sakunagiri, a lofty hill on the bank of the Ayyankere near Sakkarepatna, is said to be so called from the omens (*Sakuna*) that Hanumān, the monkey leader in Rāma's army, thence obtained, which guided him to the spot where the medicinal plant Sanjīvinī grew, that was used to revive Lakshmana from the swoon into which he fell on being wounded by Rāvana.

Hiremagalur is said to be situated in Siddhakshētra and to have been called Bhārgavapurī. It is made the scene of the celebrated *sarpa yāga*, or serpent sacrifice, celebrated by Janamējaya Rāya in revenge for the death of his father Parīkshit by the bite of a serpent. Under *Shimoga District* we may see that copper-plate inscriptions are there in existence professing to record grants made by Janamējaya to the Brāhmans who took part in this *sarpa yāga*. At Hiremagalur a singular stone pillar, with a spear or flame-shaped head, is shown as the *yūpa stambha* or sacrificial post that was used on the occasion. Inscriptions at the place prove that Hiremagalur was an *agrahāra* in the time of the Gangas, in the 9th century.

Leaving the mythological period and the mention of places visited by Paśu Rāma by Rāma and by Arjuna three places in the District have traditions undoubtedly historical though the exact period to which they relate is not clear. They however certainly belong to a period anterior to the rise of the Hoysala power. One of these the ruined village of Halasur near Lakkavil is said to mark the site of Ratnapur a city founded by Vajra Mahatā Rāja the story of whose two sons Chitraskhara and Somaskhara and of the romantic adventure by which the younger obtained the hand of Rupavati or Ratnavati the fair princess of Nilavati patna (Nirgunda) and with it the succession to that kingdom is related under *Chitaldrug District*.

Another ancient capital is Sakkarepatna. Its most celebrated king appears to have been Rukmangida mentioned in the *Mahabharata* and *Hire magaluru* (elder daughter's town) and *Chikka magaluru* (younger daughter's town) the estates bestowed in dowry on the princesses of his house.

More definite than these is the historical account of Sringeri whose celebrated *Matha* on the Tunga is well known to have been established by Sankaracharya the great Saiva reformer of the 8th century.

The west of the District appears to have been subject from very early times to the Kadambas while part of the frontier may have been included in Āluva kheda the territory of the Āluva Ālupa or Ālu kings who seem to have ruled in South Kanara. The subsequent history of that part is connected with the Santara kings of Pomhurchaha (Hombucha or Humcha Shimoga District). In the account given of that line we see that they extended their dominions over the hill country southwards as far as Kalasa and thence established their capital first at Sisila or Sisukali at the foot of the Ghats in Mudigere and finally at Karkala in South Kanara. They became at one time feudatories of the Chalukya sovereigns. But the numerous inscriptions of the Karkala rulers with the general cognomen of Bairasu Wodeyar surrounding the

Kadambas

temple at Kalasa, date from the beginning of the 12th to the middle of the 16th century, those from the 14th downwards being made with permission of the Vijayanagar sovereigns

Gangas

All other parts of the District were in possession of the Gangas as testified by inscriptions which occur in various parts. As far back as the 9th century, we find mention in them of *Piriyamuguli* and *Kiriyamuguli*, which are the correct names of what are now called *Hirimagalur* and *Chikmagalur*. There seems, therefore, no foundation for the legend which derives the names from the elder and the younger daughter (*magalu*) of Rukmāṅgada Rāya. The *muguli* is a useful tree, known botanically as *acacia suma*.

Hoysalas

This District can claim the distinction of having given birth to the powerful Hoysala kings, who succeeded the Gangas, and who ruled Mysore from the 11th to the 14th century. For though their capital was in the Hassan District, their place of origin, *Sosevūr* or *Sasakapura*, has been identified with *Angadi* in the south of the *Mudigere* taluk, where the existing temple of *Vāsantamma*, no doubt that of the goddess *Vāsantika*, represents the scene of the incident with the tiger which transformed *Sala* into *Hoysala*. Throughout the District, the memorials of the Hoysala kings are abundant, especially east and south of the *Bāba Budan* mountains, in the neighbourhood of their capital *Dōrasamudra* (*Halebīd*, Hassan District). To the west their inscriptions are found at *Khandya*, and the fortified height of *Ballāla-Rāyan-durga* bears witness to their rule. *Āluva-khēda* was the early boundary of their kingdom under *Vinayāditya*.

Vijayanagar

The foundation of the next paramount power, that of *Vidyānagara*, afterwards called *Vijayanagara*, is in some accounts ascribed to, and was certainly greatly promoted by,

the sage and scholar Madhava entitled Vidyaranya or forest of learning. Wilson says —

Besides experience and talent Madhava may have brought pecuniary aid to the undertaking. His title Vidyaranya and the scope of his writings show that he was a disciple of Sankarācārya and in all probability he was connected with the Sringeri (Sringeri) establishment the members of which alarmed by the increasing numbers of the Jangamas and Jains and the approach of the Muhammadans may have contributed their wealth and influence to the aggrandisement of the sons of Sangama.

They were Bukka and Hakka or Harhara the progenitors of the Vijayanagar line. Vidyaranya was their father's minister. Under the Vijayanagar empire the west of the District save the independent estate of Sringeri was mostly under the rule of the Harkala chiefs. South formed part of the territory of Balala (Manjarabad Hassan District) belonging to the Aigur chiefs. The north east was included in the possessions of the Basvapatna or Farikere Palegars. The greater part of the District was subsequently in the middle of the 17th century overrun by Sivappa Nayak the most distinguished of the Ikkeri or Bednūr chiefs. Sri Ranga Raya the representative of the Vijayanagar kings resorted to his protection and was by him established in the government of Sakkarapatna Belur and the neighbourhood. Meanwhile the Basvapatna territories had fallen a prey first to the forces of Bijapur and then to those of the Mughals and were in 1687 absorbed in the province of Sira.

The Rajas of Mysore having in 1610 gained possession of Seringapatam and in 1687 of Bangalore now carried their conquests to the west and between 1690 and 1694 subdued all the south of the District. In the latter year a treaty was concluded between Mysore and Ikkeri by which with the exception of Aigur and Vastara the remaining conquests were retained as a part of the Mysore kingdom.

Haider Ali in 1761 took possession of Sira and after receiving or forcing the submission of its various dependencies,

Mysore
Rajas.

planned his expedition against Bednūr. This capital was taken in 1763, and the terrified Rām escaped to Ballal-Rayāndurga. Thither a detachment was sent in pursuit, by which she was taken prisoner and conveyed to Madhugiri (Tumkur District), appointed as the place of her confinement. By this conquest, the Mysore dominion was extended over the whole of the Kadur country.

After the downfall of Tīpu Sultān and the restoration of the ancient Royal line, the District formed part of the Nāgara Rāyada or Subāyana. It was in the wild country north of the Bābā Budans that some of the abuses were practised which led to the *pālegār* insurrection of 1830. In December of that year, Rangappa Nāyak, the head of the Tarikere family, secretly left Mysore, joined the insurgents and seized upon Kaldurga and Kāmandurga. These forts were, however, recovered by the Mysore troops in February and March 1831, and the *pālegār* was put to flight. On the assumption of the government by the British in 1831, and the restoration of order, this part of the country was included in the Nagar Division. In 1863, it was formed into a separate District named after Kadur, where for a time the head-quarters were established. Before long, however, Chikmagalur was selected for the chief station as being more central, and a considerable town has there now sprung up. In 1882, the Kadur District was extended by having Hassan attached to it as a Sub-Division, with 4 taluks (Arsikere, Belur, Hassan and Manjarābād). But in 1886, the Hassan District was restored, and the Kadur District formed with its present limits. In 1897, the Yedehalli sub-taluk was abolished and the new taluk of Bāle Honnūr was then established.

B ARCHÆOLOGY

The inscriptions found in the District will be found collected in *E C VI, Kadur District*, and in the *Mysore Archaeological Reports*. Mention may be made of a few of the principal buildings of architectural interest in this District. The most ornamental was probably the Amritēsvara temple at Amritapura, near Tarikere, now almost completely in ruins.

It was erected as *Tarikere* 15 informs us in 1196 by Amita
 a minister and general under Ballala II. The style is Hoysala
 but the elaborate ornamentation of the outer walls and some
 features of the elevation were of peculiar design. At Vastara
 is an old temple of Padumavati which contains fine colossal
 figures of the Sapta Matrika and also of a king and his
 minister seated opposite each other. Who they were is not
 known. The ruined temples at Sosevur or Angadi must
 also have been fine buildings. There is a well executed image
 of Kesarī still standing in one of the Hindu temples and
 there are large figures of the Sapta Matrika at the Vasantamma
 temple. But the finest and oldest sculpture is in the
 Jain *bastis* probably of the 11th century. In addition to
 the massive seated images of Jina in one of the *bastis* is a
 striking female figure representing a *Yakshini*. Above
 her head is a beautiful leafy canopy and studded over the
 whole are minutely sculptured arboreal animals such as
 birds, squirrels tree frogs lizards etc. The temple of Vidya
 sankara at Srīngēri is a well designed and effective structure
 in the Dravidian style. It resembles the temple at Vijaya
 nagar. It belongs to the 11th century. These and other
 temples to be seen in this District are noticed at some length
 in Vol. II Chapters V and VI.

SECTION III—ECONOMIC

GENERAL AGRICULTURAL CONDITIONS

Along the south of the Baba Budans is a rich tract of black Soil
 cotton soil which is well watered. It was for this reason that
 the plain country near Chikmagalur and Hiremagalur and
 onwards to Belur side was called Honjavange Sime
 or the land flowing with gold. Black cotton soil is also
 met with near Birur in the Kadur Taluk and Sivane and
 Ajampur in the Tarikere Taluk. The western parts of Tarikere
 are sandy and gravelly. The soil in some of the valleys in
 the Kadur Taluk is well adapted for cocoanut growth.

Paddy is most extensively cultivated in the Malnād. Areca-nut is largely cultivated in the Kadur, Tarikere, Koppa and Mudigere taluks and in the Srīngērī Jāgīr. Cardamom grows wild in the Malnād and is also systematically cultivated in many estates and in some of the areca-nut gardens in Koppa. The cardamom cultivation requires plenty of running water and heavy rainfall.

Pepper is grown in all the Malnād gardens.

Coffee is cultivated in this District more extensively than in any other in the State.

CHIEF AGRICULTURAL STATISTICS AND PRINCIPAL CROPS

The following table shows the area under cultivation in the District --

Year	Area of the District	Area available for cultivation	Cultivable waste not in occupancy	Cultivable area under occupancy	Current fallows	Net area cropped
1921-22	16,81,699	5,88,708	67,073	5,49,286	1,29,645	4,19,641
1922-23	17,09,400	6,19,811	64,506	5,54,985	1,36,685	4,18,330
1923-24	17,09,400	6,20,871	61,973	5,58,898	1,45,783	4,13,114
1924-25	17,09,399	6,24,804	63,761	5,61,043	1,46,829	4,14,214

Area of different crops that were raised during the four years 1921-1922 to 1924-1925 under the following heads was as below

Year	Food grains and pulses	Oil seeds	Condiments and spices	Sugar	Fibre
1	2	3	4	5	6
1921-22	273,409	26,860	29,658	1,624	524
1922-23	251,057	28,332	39,762	2,176	647
1923-24	246,015	23,131	38,676	2,309	1,259
1924-25	255,345	30,473	24,226	2,032	2,040

Year	Dyes	Drugs and Narcotics	Food crops	Miscellaneous	Total area cropped
	-	-	-	-	-
1910-11	47	1368	13833	70	419641
1911-12		1068	10118	314	418330
1912-13		5031	9314	1099	413114
1913-14		50	1091	800	41414

The number and extent of different holdings under cultivation in the District during 1920-21 to 1924-25 are shown below —

Year	Holdings not exceeding one acre in extent		Exceeding one acre and not exceeding five acres		Exceeding five but not exceeding ten	
	No	Extent	No	Extent	No	Extent
1920-21	2054	137	91090	55803	18060	130514
1921-22	103	607	0884	50156	1738	12008
1922-23	3137	1031	30	6893	1853	128153
1923-24	1	411	0015	566	1811	14531
1924-25	548	443	098	6060	18664	1517

Year	Exceeding ten but not exceeding 50		Exceeding 50 but not exceeding 100		Exceeding 100 but not exceeding 500		Above 500 acres	
	No	Extent	No	Extent	No	Extent	No	Extent
1920-21	1531	3750	935	6657	61	45687	—	6139
1921-22	173	1085	630	6668	64	45687	7	6139
1922-23	1071	10538	84	5603	166	43873	—	2886
1923-24	171	14810	958	6680	19	49665	31	10607
1924-25	144	9917	1063	6608	18	4709	71	36917

The number of holders classified according to the extent of revenue paid during 1920-21 to 1924-25 was as under.—

Year	Holders paying assessment or jodi of Rs five and under		Holders paying assessment exceeding Rs five but not exceeding Rs 25	
	No	Amount paid	No	Amount paid
	2	3	4	5
1920-21	15,619	35,597	32,802	339,843
1921-22	15,692	35,934	33,250	345,986
1922-23	14,668	41,404	33,027	415,633
1923-24	14,737	44,000	33,942	368,500
1924-25	14,614	44,734	33,821	352,502

Year	Holders paying Rs 25 but not exceeding Rs 100		Holders paying Rs 100 but not exceeding Rs 500		Holders paying above Rs 500	
	No	Amount paid	No	Amount paid	No	Amount paid
	6	7	8	9	10	11
1920-21	6,129	227,861	1,683	240,136	68	15,118
1921-22	6,315	235,412	1,686	240,835	68	15,118
1922-23	6,035	284,153	1,642	235,651	71	51,009
1923-24	5,017	294,638	1,784	275,930	71	67,367
1924-25	6,045	275,485	1,715	255,637	104	123,115

AGRICULTURAL LOANS

Amounts of loans granted for different purposes during the years 1920-21 1921-22 and 1922-23 were as below —

Name of Taluk	Taka Loans			Land Improvement Loans		
	1920-21	1921-22	1922-23	1920-21	1921-22	1922-23
Chikmagalur	2,000	1,300	600			
Hadur	1,500	1,500				600
Tankere	2,000		600	In 'T' Hadur & Tankere		400
				Taka Loans		
Hoppa		1,000				1,000
Mudigere	1,000	1,100	600			
Narasimharajapur	1,000					
Total	7,500	4,900	1,200			1,600

Loans granted during 1923-24 and 1924-25

	Taka	Land Improvement	Flood relief
1923-24	2,600	5,500	3,350
1924-25	1,640	500	

IRRIGATION

A table showing the various means of irrigation in the District and the area irrigated is given below —

Taluk	Tanks in action				Wells	
	Major		Minor		No	Extent irrigated
	No	Extent irrigated (Acres)	No	Extent irrigated (Acres)		
Chikmagalur	20	5,735	571	6,500		
Hadur	3	1,444	6	1,068		
Tankere	16	4,393	67	5,000		
Hoppa	6	461	913	8,077		
Mudigere	3	36	6	5,590		
Narasimharajapur			566	7,840		

The total number of major and minor tanks in the District and the number restored are given hereunder.—

Taluk	No of Major tanks			No of Minor tanks		
	Restored	Unrestored	Total	Restored	Unrestored	Total
1 Chikmagalur	24	12	36	39	532	571
2. Kadur	23	5	28	33	93	126
3 Tarikere	16	14	30	23	184	207
4 Koppa	6	14	20	10	913	923
5 Mudigere	3	1	4	4	266	270
6 Narasimharājpur		8	8	6	560	566

Government tanks classified according to revenue are as shown in the appended statement —

Taluk	With a revenue of					Total
	Less than Rs 300	Between Rs 300 and Rs 500	Between Rs 500 and Rs 1,000	Between Rs 1,000 and Rs 5,000	Above Rs 5,000	
1 Chikmagalur	571	11	13	11	1	607
2 Kadur	126	7	7	11	3	154
3 Tarikere	207	16	5	9		237
4 Koppa	923	5	1			929
5 Mudigere	270	3		1		274
6 Narasimharājpur	566					566

Bamboos

Fifty thousand big and 150,000 small bamboos are extracted every year Rates Rs 40 for 1,000 big bamboos and Rs 25 per 1,000 small bamboos.

Grass

Five hundred tons of grass were collected in 1923-24 for supply to the famine-stricken areas Collection work and supply to Mysore Military has been taken up this year also One thousand tons can be collected and supplied easily from the Forests

Thangadi
and Hakke

These products are leased out *talukwan* every two years

Minor forest
produce

Alale, Sigekayi, Geru, Honey, Tamarind, Antuvala, gum, hides, kan-pepper, halmaddi, silk, cotton, pith, hippe seeds and flowers, Nux-vomica, and Lichens are the minor forest produce and are leased out once in two years

Fibres

Fibres are usually collected by villagers round about for their own use

MINES AND QUARRIES

See under Geology

ARTS AND MANUFACTURE

Import and
Industries

The following table gives details of important industries carried on in the District

Taluk	Name of the concern	When started	Kind of power used	Quantity of work turned out	Value thereof
Chikmagalur	1 Rice Mill	1917	Mechanical	Pallas 15,000	Rs 120,000
	2 Oil and Coffee Mill				
Mudigere	Rice Mill	1920	Do	Mds 10,000	160,000
	Rice Mill	1924	Steam	Pallas 2 an hour	25,000
Koppa	Narway Rice Mill	1923	Oil Engine	Pallas 30,000	Not furnished
Sringeri	Do	1914	Steam	" 5,500	do
	Tile Factory	1911	Hand Press	2 Lakhs	8,700

Coarse glass bangles are manufactured on a small scale at Bidare in the Kadur taluk Rural industries

Bamboo mats and baskets are manufactured by a few families in Chikmagalur, Tinkere and Koppa

Apiary or bee rearing of a crude kind is carried on in parts of Mudigere taluk

Ichal mats are manufactured in a great many villages in the Kadur taluk

Country shoes of good quality are made at Tinkere

COMMERCE AND TRADE

The most important exports are coffee, pepper, cardamoms, rice and other food grains and oils and the various products of the District. The Malnad parts have been opened up by a net work of roads and since 1883 the railway has run through a small part of the District. The Government are effecting considerable changes in trade and the transport of commodities.

The principal traffic between the Malnad and Madan taluks was through the following five *Janares* or passes before the country was opened up for traffic by the Provincial and District Fund Roads—Talagudde, Talavikkal, Birnahalli, Gantevinayakan and Sitthimallappan.

The following is an approximate statement

Name of article	Manufacture and produce in the District		Exports		
	Quantity	Average value in rupees	Quantity	Average value in rupees	To what place
	Tons	Rs	Tons	Rs	
Rice (Palla)	30,500	66,50,500			
Ragi	1,84,500	18,46,600			
Wheat	250	48,200			
Jōla	9,900	9,90,000			
Bengal gram	15	2,000			
Horse gram	1,950	9,62,300

Pura	Kadur	Do	2,000
Birur	Do	Saturday	1,000
Keresante	Do	Do	1,000

MEANS OF COMMUNICATION

Railway
Lines

The Madras and Southern Mahratta Railway line passes through the District on the eastern side in Kadur and Tarikere taluks. There is the branch line from Birur to Shimoga. The lengths of the two lines are 39 and 17 miles respectively. The stations are Devanur, Kadur, Birur, Ajampur and Sivane on the main line, and Sivapur and Tarikere on the Branch line. Government have approved of the proposal to connect Chikmagalur with Kadur by railway on certain agreed terms. The line is to be a Government concern, the Kadur District Board having agreed to make over to the Government the accumulated surplus of the Railway cess to meet part of the cost of construction and to continue to levy the cess and hand it over to Government to meet the losses in working for a period of 25 years. If the railway should work at a profit, the surplus profit after meeting the interest charges on the capital contributed by Government is to be utilized for further railway development in the District. The Survey of the alternative lines proposed for the construction of this line was under progress during 1920.

The length of the Provincial roads in the District is 327 Roads miles and of the District Fund roads 320 The annual cost of maintenance of the former is Rs 69 673 and of the latter 24 652 The details of each class of roads is given below —

	Roads	Miles	Annual cost of maintenance	Provincial Roads
			Rs	
1	Hassan Chikmagalur road	7	1 25	
	Bangalore Honnavar road	37	7 400	
3	Banavar Belur Mudigere road via Gonibid	10½	9 100

FAMINES

No famine prevailed in any part of the District during the last 40 years except for the distressed conditions that prevailed once in 1905-06 and for the second time from the middle of 1918-19 and 1919-20. In 1905-06 the south west monsoon commenced later than usual and ended earlier and the north east monsoon was also not satisfactory. Tho Malnad taluks were not affected but the dry crops in the Maidan did not yield more than 8 annas in the rupee. In Kadur

the yield was 4 annas and less This shortage in the out-turn of crops coupled with large exports of grain to markets outside the State led to a general rise in the price of food grains, but the situation changed with the favourable seasonal conditions of the following year In 1918-19, the distress was partly due to the after effects of the Great War and partly due to the failure of rains and consequent failure of important crops of food-stuffs and also partly due to the export of large quantities of paddy to the neighbouring parts of the State Prompt action was taken by the Government Restrictions were placed on exportation of food-stuffs and sufficient quantities of Burma rice were supplied to the people, through grain depots established at several Taluk head-quarters The situation which was acute in the middle of 1918 improved remarkably by the end of December The distress continued in a mild form for some months in 1919 but normal conditions were soon restored

SECTION IV ADMINISTRATIVE

DIVISIONS

Taluks and
sub-taluks

The District is divided into the following five taluks and one sub-taluk

Taluk	Area in square mile	No of Hoblis	No of inhabited villages & towns	Population in 1921	Density per square mile
Chikmagalur	640 45	8	220	80,329	125
Kadur	545 86	6	244	82,011	150
Tarikere	467 87	6	100	65,221	139
Koppa		5	103	35,845	81
Narasimharājpur (sub-taluk)	657 47	3	65	17,112	
Mudigere	433 42	5	132	43,683	101
Sringēri (<i>Jāgīr</i>)	43 62	2	25	9,337	214
Total	2,788 69	35	889	333,538	122

The Sringeri *Jagir* is included in the Koppa Taluk. The town with the sub taluk which was formerly styled Yede hall has been now called Narasimharajpur after His Highness Sir Sri Kantirava Narasimharaja Wodeyar Bahadur Yuvaraja of Mysore.

The Taluks of Chikmagalur and Mudigere are under the direct charge of the Deputy Commissioner while the other Taluks have been constituted into a Revenue Sub Division and placed in charge of an Assistant Commissioner with Head-quarters at Tarikere. The Sringeri *jagir* is an *mam* under the management of the Sri Swamigalu through an Agent.

JUDICIAL

There are two Munsiff's Courts in the District one at Chikmagalur and the other at Narasimharajpur. The latter has jurisdiction over the taluks of Tarikere, Koppa and the sub taluk of Narasimharajpur.

Consequent on the introduction of the scheme of separation of Judicial and Executive functions into this District there is one Special First Grade Magistrate's Court at Chikmagalur with original jurisdiction over the second and third class cases of the Mudigere Taluk and the first class cases of all the Taluks and sub taluks of the District. There is also a Special Second Class Magistrate's Court at Tarikere with original jurisdiction over the second and third class cases of Kadur, Koppa and Tarikere Taluks and the Narasimharajpur and Sringeri sub taluks.

The Treasury Assistant Commissioner at Chikmagalur as *Ex officio* First Class Magistrate has been empowered to dispose of cases arising in the Chikmagalur and Mudigere taluks and coming within the purview of Chapters VIII to XII of the Criminal Procedure Code. The Sub Division Officer Tarikere also exercises similar powers in respect of the Taluks and the Sub Taluks in his Sub Division except the Taluk of Kadur the jurisdiction over which has recently been vested

in the Special First Grade Magistrate at Chikmagalur as a measure of public convenience

Excepting the Amildar Magistrates of Chikmagalur and Kadur, all the other Amildars and the Deputy Amildars are empowered to dispose of cases under the Breach of Contract Act

In all the Taluk and the Sub-Taluk Head-quarters in the District, there have been established Bench Courts for the disposal of Criminal cases arising within the limits of the Taluks or the Sub-Taluks with original jurisdiction over certain specified offences of the Indian Penal Code and the Special and Local Laws, the Bench Court at the District Head-quarter town alone exercising the powers of a Magistrate of the Second Class while all the other Bench Courts exercise the powers of a Magistrate of the Third Class

Village
Courts

In addition to the above, there have been ten Village Munsiff's Courts in the District, in the following places

<i>Chikmagalur Taluk</i> —	<i>Mudigere Taluk</i> —
1 Aldur	7 Gombid
2 Kalasapur	8 Kalasa
3 Malalur	<i>Tarikere Taluk</i> —
<i>Kadur Taluk</i>	9 Lakkavalli
4 Sakkarepatna	<i>Sringeri Sub-Taluk</i> —
5 Yegati	10 Sringeri
6 Yellambalase	

LAND REVENUE

The following statement shows the demand, collection and balance for the four years, *viz*, 1921-22, 1922-23, 1923-24 and 1924-25

Year	Total demand	Remissions	Net re coverable demand	Actual collections	Balance	Percent of collection
1921-22	10,09,316	1,645	10,07,621	8,71,265	1,36,106	86.1
1922-23	10,94,850	3,084	10,91,766	9,77,868	1,13,898	89.5
1923-24	10,73,736	5,031	10,68,705	9,69,006	99,698	90.6
1924-25	10,62,706	11,711	10,50,995	9,65,159	85,536	92.3

MISCELLANEOUS REVENUE

Statistics for the three years from 1921-22 to 1921-25 were as below —

Year	Total Demand	Collections	Balance
1921-22	49,116	37,055	12,061
1922-23	53,708	43,355	10,353
1923-24	59,000	51,513	7,487
1924-25	64,009	59,993	4,016

LOCAL AND MUNICIPAL BOARDS

Besides the District Board there are six Taluk Boards and 32 Village Panchayets in the District. The Deputy Commissioner is the President of the District Board. There are elected non-official Vice Presidents on the District Board as well as on all the Taluk Boards.

District and
Taluk
boards

The receipts and expenditure of the Local Boards for the last three years are given in the appended statement —

Board	Year	Receipts					
		Local Cess including Ry. Cess	House tax etc	Tolls and ferris	Fees, fines etc	Contri- bution	Total
1		3	4	5	6	7	8
District Board	1921-22	10,049	1,103		4,078	8,104	1,0,034
	1922-23	87,813	1,007	400	4,600	7,945	11,005

					26,319	510	35,350

Municipali-
ties

There are 3 Town, 6 Minor and 1 Non-Regulation Municipalities in the District as below —

Town Municipalities —

- 1 Chikmagalur
- 2 Tarikere
- 3 Birur

Minor Municipalities —

- 1 Kadur
- 2 Ajjampur
- 3 Sivane
- 4 Koppa
- 5 Narasimharājjpur
- 6 Mudigere

Non-Regulation Municipality —

- 1 Srīngēri

The receipts and expenditure of the various Municipalities for the last 5 years were as below —

Year	Receipts	Expenditure	Closing balance
1919-20	92,338	79,567	165,765
1920-21	102,009	192,948	74,826
1921-22	99,485	123,896	50,415
1922-23	146,207	139,339	57,283
1923-24	161,785	164,751	54,317

POLICE AND JAILS

There are 10 investigating centres with Head stations as follows forer below —

Chikmagalur Taluk —

- 1 Chikmagalur Town
- 2 Chikmagalur Kasha
- 3 Aldur

Kadur Taluk —

- 4 Kadur Kasha
- 5 Birur
- 6 Nagati

Tarikere Taluk —

- 7 Tarikere
- 8 Vijayanpur

Koppal Taluk —

- 9 Koppa Kasha
- 10 Solhalyu
- 11 Sringeri

Mudigere Taluk —

- 12 Mudigere Kasha
- 13 Kalasa

Narasimharajpur Sub-Taluk —

- 14 Narasimharajpur Kasha
- 15 Balehannur

There are 13 sub stations and 14 outposts in the District as hereunder —

Taluk	No. of sub stations	No. of outposts
1 Chikmagalur	3	4
2 Kadur	3	4
3 Tarikere	1	4
4 Koppa	1	
5 Mudigere	2	
6 Narasimharajpur		
Total	13	14
		with 1 total

The strength of the Force during 1921-25 consisted of 1 Superintendent 8 Inspectors 15 Sub Inspectors 3 Jamadars 32 Sergeants or Daffedars and 378 men

The total cost of the force was Rs 105 162 during 1923-24

There is only one District Lock up at Chikmagalur and Jails Taluk Lock ups at the Head quarters of all the Taluks and

sub-taluk The statistics of admissions, etc, in the Lock-ups during the year 1924-25 were as below —

Item	Number admitted during the year			Daily average number of each class		
	Males	Females	Total	Males	Females	Total
Convicts	75	4	99	2 04	05	2 09
Under trial	149	2	151	4 12		4 12

EDUCATION

Schools and scholars

This is the smallest of all the Districts in point of extent, as well as in the number of schools and scholars, viz, 581 schools and 15,196 scholars during 1924-25. Of the schools, 1 was a High School for boys, 33 Middle Schools, 459 Primary Schools, 3 Special Schools and 85 Village Indigenous Schools both for boys and girls. Of the girls under instruction, 1 was in the High School, 104 in Middle Schools, 2,371 in Primary Schools and 87 in Village Indigenous Schools. The average number of square miles, villages and persons served by a school in the District was 4.8, 1.8 and 574 respectively. The usual statement containing the several grades and number of schools is appended.

Area

During the calendar year 1925, there were working in the district 27 Medical institutions (hospitals and dispensaries), the total number of patients, indoor and out-door, treated in them was 2,03,722, and the total expenditure incurred on establishments connected with them, medicines supplied to them, etc, was Rs 74,668

VACCINATION

Supervision

The posts of District Health Officers were abolished in connection with the re-organisation of the Health Department, a Chief Sanitary Inspector for each District being appointed in their place, to work under the orders of the District Board

Vaccination has been made compulsory in all the towns and 1 Minor Municipalities in the District and there are 10 Vaccinators distributed as follows —

Chikankar Taluk	—
Chikankar Town	1
Kankar Taluk	1
Tankere Taluk	1
Tankere Town	1
Varanasi Taluk	1
Kojhar Taluk	1
Muzaffar Taluk	1
Beniganj	1
	—
Total	10
	—

In addition to the above 10 Special Vaccinators 12 have been appointed as a temporary measure under the Malaria Improvement Scheme and they have been stationed at Sakkarajana Balchour Harbhaur Kishna and Lingadabali. The total number of persons vaccinated during the year 1920 was 6700.

SECTION V — GAZETTES

Ajjampur — A town in the Tankere taluk on the Banga Ajjampur
 fore Poona Railway and the Tankere Huzurga road 11
 miles east of the Luba. Headquarters of the Ajjampur
 taluk, and a Municipality.

Population in 1911	Males	Females	Total
Hindus	113	110	223
Muhammadans	3	9	12
Christians	1	—	1
Jains	1	4	5
Total	118	123	241

The site was originally occupied by the village of Keral. In the 17th century, Azim Khan, an officer of the Sira government, while hunting in the neighbourhood, was surprised at observing the hares turn upon his hounds and pursue them. The circumstance indicating a spot favourable for the purpose, he was directed to build the present fort, which was named after him *Azim-pur*, now generally called *Ajjampur*. Hanu-mappa Naik of Tarikere restored the old fort and rebuilt a temple which had been originally built by Bukkarāya of Vijayanagar. Haidar Ali conquered it in 1761.

A weekly fair is held on Tuesday. Black soil prevails in the neighbourhood, on which a considerable quantity of cotton is raised. Extensive old gold workings have been discovered in the vicinity. An European Company commenced gold mining, about 1897, but, owing to want of financial support, ceased to work after sometime.

Aldur

Aldur A village in Chikmagalur taluk. Head-quarters of a *hobli*. Population 1,434.

The *vīragals* *E C* VI, Chikmagalur 99 and 100 at Aldur are very neatly executed. The fallen hero is shown as being borne in a palanquin in the second panel and an umbrella is held over him in the top panel. These peculiarities are not usually found in other specimens of this class.

Amritapura.

Amritapura. A village at a short distance north-east of Tarikere. Population 299.

Head-quarters of the Amritapura *hobli*. Population 299. Contains the remains of a very fine and large temple of Amrītēśvara, erected in 1197, in the time of the Hoysala king Vīra-Ballāla II. It is in the Hoysala style and was originally profusely sculptured with decorative details even on the round battlements of the outer wall.

The temple is a very fine specimen of the architecture of the times, with some features which are unique in design and execution. It consists of a *garbhagriha*, a *sukhanasi*, a *nataranga* and a *mukha-mantapa*, and stands in the middle of an extensive

court yard enclosed by a stone wall about 7 feet high with *mahadvaras* in the east end and west. The *gurbhagricha* doorway has a figure of *Capalakshmi* on the lintel and small finely carved *sharapalakas* at the bottom of the jambs. The *sukhanesi* doorway has ornamental carvings at the side and fine figures of *Manmatha* and *Rati* on the jamb, the lintel having a figure of *Tandava* in the middle flanked by *Brahma* and *Vishnu* and by *maharas*. All the ceiling of the *nataranga* which are more than 2 feet deep are beautifully executed. The middle one has a round central piece depending from the top with a fine figure of *Tandavasvara* sculptured on its circular under surface while the one to its north has a finely carved conch shell hanging down from the top. The remaining ceilings have lotus buds. The conch shell is peculiar. To the right in the *nataranga* are figures of *Cinapati*, *Saptamatrakah*, *Siravati* and *Nigadamapati* (i.e. *Naga* temple) and to the left figures of *Virabhadra* and *Subramanya*. The 1st 3rd and 11th are fine figures with rich ornamentation. The *nataranga* has also an entrance in the south with a fine porch. The *mukha mantapa* is a grand artistic structure with veranda all round and the usual three entrances. It is connected with the *nataranga* by a porch which has verandas on both sides and two well executed ceilings. Altogether there are 70 beautiful ceilings each about 3 feet deep in this hall. Some of them have labels on the sides below giving the names of the sculptors who made them. Among the names may be mentioned *Malhattamma*, *Ladumanna*, *Baluga* and *Malayo*. Altogether fifteen such labels are to be seen. The verandas running round the hall have in the middle a frieze of flowers between pilasters. The pillars are polished and have a black shining surface. Outside the front hall runs round a *jagati* or railed parapet about 6 feet high with delicately carved turrets in relief and an artistic rail about 2 feet wide above them containing figures between angular columns. Above and below the rail are exquisitely finished bands of scroll work the convolutions having in some places figures of animals flowers etc. the lower band also containing some obscene figures here and there. The rail here takes the place of the *Puranic* frieze in other temples. On the north or left side of the hall begin on the rail sculptures illustrating the story of the *Bhagavata Purana* chiefly or its tenth *skandha* which treats of the boyish sports of *Krishna* the lost incident illustrated being *Kamsa vadh* or

the killing of Kamsa. One of the sculptures represents Vasudēva, father of Krishna, as falling at the feet of an ass. This incident is not mentioned in the *Bhāgavata* but is based on a vulgar tradition, which says that Kamsa had kept an ass near the room where Dēvakī, wife of Vasudēva, used to be confined with instructions that he should bray as soon as a child was born, so that Kamsa might be apprised of the occurrence and kill the child, and that, when the 7th child was about to be delivered, Vasudēva fell at the feet of the ass entreating him not to bray. The sculpture is worthy of note as showing that the tradition was current as far back as 1196, the year in which the temple was built. To the right of the north entrance begins the story of the *Mahābhārata*, ending with the acquisition by Arjuna of the Pāsupatāstra from Śiva. On the south or right side of the hall, the story of the *Rāmāyana* is completely delineated. The sculptures on the rail are all well carved. The turrets around the hall are of two sizes, the smaller ones flanked by pairs of lions come between the larger and add considerably to the beauty of the structure. To the left of the south entrance is a fine turret below which a man, standing under a canopy formed by the seven hoods of a serpent between two pairs of lions which attack elephants, stabs the lion to the right, and another near it with a creeper, perfectly natural, twining itself round the pilaster below. Around the *garbhagriha*, *sukhanasi* and *navanaga* the outer walls have fine turrets, pilasters and perpendicular bands of scroll-work. The latter are rarely found in other temples of this style. The only other temple where similar bands have been seen is the Sāntisvara temple at Jinanāthapura near Sravana-Belgola. Around the *garbhagriha* in the three directions the turrets are flanked by pairs of scroll work bands. The whole presents a charming appearance. Above the eaves, which are decorated with bead-work, runs a parapet containing fine figures all round. The tower is sculptured with figures on all the sides. But in the three directions there are rows of protruding figures one over the other from the bottom to the top, surmounted by *simhalalātas* or lion's heads. This too is peculiar. In front of the tower we have the Hoysala crest, adjoining which there is a very fine figure of Gaṇasuramardana, carved out of black stone, with a *prabhāvali* containing figures, of the regents of the directions. The original *kalasa* having disappeared, a brass one has been substituted. The front hall

has gigantic drip stones and there runs a parapet with well executed figures some of which have labels below. Figures of lions attacking elephants occur here and there as in the temples at Harihar and Ānekonda. Opposite the north entrance of the front hall is a structure in ruins known as Sule (the dancing girls) mantapa which appears to have been a *mahadvara* once. It is said that this was the passage through which the god was taken out in procession and that the dancing girls waited here to accompany the god. To the south east of this is a small shrine in ruins containing a fine but mutilated figure about 4 feet high of Bhairava. To the right of the *garbhagriha* is a beautiful temple also in ruins said to be of Sarasvatī with elephants at the sides of the entrance. It has a *garbhagriha*, a *nataranga* and a narrow veranda in front. A fine *jagati* or parapet runs round the last. It is worthy of mention that a single beam measuring $2\frac{1}{2} \times 1\frac{1}{2} \times 1\frac{1}{2}$ is carried over all the four pillars of the veranda. The doorway of this temple is an exquisite piece of workmanship. The stone *prakara* or compound wall is now in ruins. It had on the top all round thick stone discs about 1½ feet in diameter with rectangular bases both in one piece the outer faces being sculptured with fine figures of flowers animals gods etc in relief. This is another special feature of this temple. A few of the discs are in position though most of them have fallen down. The *prakara* must have once presented the appearance of a veritable art gallery seeing that the artistically carved figures are of various kinds and designs. About a dozen varieties were observed in flowers alone some standing by themselves and some enclosed in fine geometrical figures such as squares and circle. The same was the case with the figures of animals.

This temple is by no means inferior in workmanship to the temple at Halebid. Though not possessing a row of large figures and a large number of friezes as the temple there it has some fine architectural features which are not there. The delicacy of touch and originality of design displayed here are admirable.

It is said that on the Sivaratri day the rays of the rising sun used to fall direct on the *linga* but that owing to the repairs effected some time back to the east *mahadvara* or outer gate the rays now fall only in part. Over the roof of the central hall is a low room supported by 9 short pillars extending up to the

tower over the *garbhagrāha* or adytum, the entrance to which is now walled up. It was perhaps intended for a safe room to store things in during times of trouble. The Kēdārēśvara temple at Halebīd had a similar room before restoration.

Angadi

Angadi. A village in the Goumbidnur *hobli*, Mudigere taluk, about seven miles south of Mudigere, near Ugghalli. Population 721. It is of special interest from its having been identified with the Sosevūr, Sasipura or Sasikapura, which was the birthplace of the powerful Hoysala line of kings, and the scene of the incident with the tiger which gained their progenitor Sala the throne and the name of Poysala or Hoysala. The name means a market or shop, a rare thing in that mountainous country covered with forests. It is a common part of several names in Kanara, such as Uppinangadi, Bellatangadi, Hosangadi and so on. The change was made in the time of the Vijayanager kings, and perhaps from political motives. Thus in 1359, under Bukka-Rāya, the place is called Sosevūr (see *Mudgere* 25), but in 1539, under Achyuta-Rāya, it is called Angadi (inscription in Belur taluk). It contains a number of old inscriptions and remarkable ruined temples. There is some beautiful sculpture in what remains of the two Jain *bastis*. On the opposite side of the deeply sunk village path are the ruins of three fine temples, dedicated to Kēsava, Pātāla Rūdra and Mallēśvara. But the principal deity now worshipped is Vāsantamma, who has a great reputation. It has been suggested by Mr. Rice that this Vāsantamma is probably the original Vāsantika-Dēvi of the Hoysalas.

Mr. Narasimhachar thinks that this Vāsantamma cannot be connected in any way with the Vāsantika of the Jainas and the early Hoysala kings. Probably the original image was removed and the present goddess set up in its place. The Vāsantamma temple is, however, a tiled building. The goddess is a seated stucco figure bearing a trident, a drum, a sword and a cup as her attributes. There are also two more seated stucco figures at the sides, the one to the right being known as Chukkamma and that to the left as Dēviramma. At some distance

from this temple are the two ruined *bastis* or Jaina shrines above referred to standing in a line and facing north. They may represent Hoysala buildings of an early type there is scarcely any ornamentation in them. The shrine to the west has a seated figure about 3 feet high of Nandinatha flanked by male *chakrabartis*. To its left a standing figure about two feet high of Chidranatha and in front a seated figure about two feet high of Chinnatevara. The shrine to the east which consists of a *garbhagriha*, an open *sukhanasi* and a *navaranga* supported by four moulded pillars has three standing figures each about three feet high and to the right of the Jina Vira Malli and Munisuvrata. To the right in the *sukhanasi* is a seated Yaksha and to the left a standing Yakshi about 2½ feet high under a well carved canopy. To the right of the Yakshi is the figure of a man riding a lion. The outer wall have pilasters here and there. Behind the *bastis* stand in a row the inscriptions E C VI and CXCIX the older being No 11 a Jaina epitaph of about A.D. 1000. These two *bastis* deserve to be preserved as a memorial of the birth place of the Hoysalas. The west shrine is mostly gone but the east shrine can very well be repaired. There is not a single Jaina now at Angadi. At a little distance from these *bastis* are the three ruined temples of the Hoysala style mentioned above standing in a line and facing east. The temple to the south of which only the walls of the *garbhagriha* are now left has an exquisitely carved figure about six feet high of Kṛṣṇa. The other temples consisting of a *garbhagriha*, a *sukhanasi* and a *navaranga* each are known as the Patalarudrasvara and the Mollasvara. Nothing can be done to these as they are past repair.

Ardani—A village in the Sringeri Taluk

Ardani

At this place are to be seen two *mastakots* of elaborate workmanship about seven feet high. They have six panels the one at the bottom shows bandsmen blowing horns and beating drums the next warriors fighting with bows and arrows the next warriors armed with swords and shields the next a man and a woman husband and wife borne in a palanquin by two men on either side with a man on horseback in front attended by an umbrella bearer the next husband and wife with a dagger between them seated with folded hands wife attended by a

female *chauri*-bearer, her head being represented as encircled by flames, and below the couple an ornamental post lying horizontally with a raised hand projecting from its right extremity and bearing a lime fruit between the thumb and the forefinger, and the next and last, a *linga* flanked by elephants which bathe it with pots of water held in their uplifted trunks. The top of the stone is fashioned into a *prabha* with a *simha-lalāta* or lion's head. A similar *māstīkal* is also to be seen on Benne-gudde to the north-west of Arasalu.

Asandi

Asandi A village in Kadur taluk, about 5 miles east of Ajjampur. Population 1,173.

Numerous old inscriptions and ruins in the place show that it was in ancient times of considerable importance. Under both the Gangas and the Hoysalas, it was the chief city of a principality, which in the 8th century was governed by Vijayāditya, son of the king Śrīpurusha, and in the 12th and 13th centuries by a line of chiefs of Ganga descent.

Ayyankere
or Dodda
Madagakere

Ayyankere or Dodda Madagakere. A beautiful loch, surrounded with high hills and studded with islands, 4 miles west of Sakkarepatna. It is situated at the eastern base of the Bābā Budan range, being formed by embanking the perennial stream of the Gauri halla at the foot of Sakunagiri. Its outflowing waters are called the Vēda, which unites, after a short course, with the Avati near Kadur and forms the joint stream of the Vēdāvatī.

The construction of this magnificent reservoir is attributed to Rukmāngada Rāya, the ancient king of Sakkarepatna. The embankment, formed of earth and stone, is about 1,700 feet long, and 300 feet high at the rear slope. The tank is very deep and contains in many parts 35 feet of water. The contents of the bund have been estimated at 605,760 cubic yards, and the quantity of water at 207,900 cubic feet, or 12,854,260 gallons.

There is a tradition that the bank was once on the point of breaching, when the danger which threatened the town of Sakkarepatna from inundation was announced by the guardian goddess of the lake to Honbilla, the *nīrganti* or waterman. He

obtained a promise from her that the catastrophe should be delayed until he returned with orders what to do from his master the king of Sakkarepatna and hastening to the town delivered warning of the impending danger. The king sagely but inhumanly thought that under the conditions of the promise to prevent the return of the messenger would be for ever to avert the catastrophe. He accordingly had him killed on the spot and the embankment has stood ever since. A shrine has been erected at Sakkarepatna to the memory of the unfortunate man who was sacrificed for its stability at which worship is still performed. Under the Hoysala king considerable repairs were made to the mound. An inscription at the Ballalesvara temple erected on a hillock towards the centre of the embankment is of the time of Vira Narasimha the middle of the 13th century.

Baba Budan Mountains—The loftiest range on the Mysore table land situated in the centre of the District to the north of Chikmagalur between 13° 23' and 13° 35' north latitude 75° 37' and 75° 57' east longitude. The form of the chain is that of a horse shoe with the opening to the north west. The northern arm commencing with the Hehho hill (4385 feet) stretches eastwards without interruption for about 15 miles whence bending southwards it presents to the east an unbroken wall of more than 20 miles. The southern arm is formed by the Basvan gudda and Woddin gudda ranges. The character of the chain is that of a stupendous ridge 6000 feet above the level of the sea and in some parts only a few yards wide at the summit rising at intervals into loftier peaks. The summit of the hills consists of steep grassy slopes well wooded in the ravines through which flow perennial springs. The sides are densely clothed with forests among which are numerous coffee plantations as well as in the Jagar valley which is one stretch of forest as far as the eye can reach.

Bāba Budan
mountains.

The highest point is the symmetrical Mulainagiri 6317 feet above the level of the sea. It is towards the south of the range and is the loftiest mountain between the Himnayas and the Nilgiris. Next to this north eastwards is

Bābā Budan giri, Vāyu Parvata or Marut Saila, 6,214 feet. Near it are the sources of the Vēda and Avatī. The hollow which succeeds marks the shrine of Bābā Budan. The conspicuous conical peak on the outer verge of the eastern face is Dēviramman-gudda. A beacon is lighted here at the Dīpāvalī festival, which is visible to all the surrounding country. Near the north-east angle is situated Kalhatti-giri, 6,155 feet in height, north of which is Kalhatti bungalow, formerly a hot weather retreat for European officials. These vast wilds and solitudes, with scarcely a human habitation, were, until a few years ago, well stocked with every variety of game, from the elephant and bison downwards. The advance of the coffee-planter has now forced back the savage demizens to remoter and more secluded spots. The Bābā Budan mountain was the cradle of the coffee cultivation of Southern India, and the slopes of the entire range, as well as the south of the forest-bound Jāgar valley, are now occupied by coffee gardens, both European and native. The first European coffee plantation, opened out by Mr Cannon in about 1840, is to the south of Bābā Budan giri, with other early estates.

Two roads pass along the eastern face from Chikmagalur to Tarikere, one over the summit and the other at a lower level. About midway in the latter, under Kaman durga, is the settlement of Santaveri, from which a road, four miles in length, leads to Kalhatti. Santaveri is occupied chiefly by a colony of Lambānis. On the north-east of the mountains are the Abbe falls, a descent of 600 feet by a stream running to the Bhadra.

The *Purāṇic* name of Chandradrōṇa, the crater of the moon, seems appropriate to this range, the highest in the State, as it is of crescent or horse-shoe form, enclosing the impenetrable forests of the Jāgar Valley. The term *ghāḥpūje*, by which it is called in certain inscriptions connected with it, connects it with Vāyu, the Wind God. These inscriptions belong to the Phalāhāra Matha, which has its head-quarters here, and bear the dates 1698, 1702, 1707 and 1717. (*Chikmagalur* 111, 110, 103)

and 109) The first three of these record certain amicable arrangements between the Virabhiṣṭa Matha at Sri aṣṭa and the Phalahara Matha at this place including their union with one another and the renouncing of the father in these parts to the Phalahara Matha. Various insignia of office are granted to the Swami of this *matha* who is described in the fourth of the inscriptions noted above as the Swami of the original throne of guru Dattatreya's Phalahara Matha which is also called the *matha* of Channa Vira Deva disciple of the ancient Phalahara Deva. Many claims are made for the Virupakṣa *linga* of this *matha* which is said to have been consecrated by Hanuman the servant of Rama. A graphic description is also given in this inscription of the great cave forest wild animal serpents and demons of these mountains also of the medicinal plants and drugs found here and of the deluging rains and drenching fogs and mists.

Though the range is called in the Hindu *puranas* Chandra Drona it derives its present name from a Muhammadan saint who took up his residence on one of the southern slopes. He is stated to have reared coffee from the seeds he obtained at Mocha and thus to have introduced that important article into India. A cave containing what the Muhammadans assert to be the tomb of Baba Budan but the Hindus to be the throne of Dattatreya is a venerated place of pilgrimage for adherents of both creeds. A Muhammadan *Kalondor* is the custodian of the cave which is designated the southern Mecca and well endowed. By the Hindus the reappearance of Dattatreya at the mouth of the cave into which in ancient times he vanished is looked for as a sign prophetic of the final avatar of Vishnu and the introduction of the millennium.

There is said to have existed a history of the Baba Budan mountains in Persian compiled in the time of the Bijapur kings. But it was borrowed in recent times by some official and at his death was among his effects which were sold by auction. It is believed to have found its way to Mangalore and has so far been unavailable to the public.

Attigundi about a mile from the cave is the residence of the *Kalondor* and the principal village on the hills.

The Baba Budan mountain is well known as a place of pilgrimage to both Hindus and Muhammadans.

The cave containing Dattātrēya-pīṭha or the seat of Dattātrēya faces south and has a porch or veranda in front. According to Muhammadans, what is called Dattātrēya-pīṭha is the throne or the tomb of their saint Hazrat Dada Hayat Mir Kalandar. Some naively say that Dattātrēya is nothing but a corruption of Dāda Hayat Mir. Descending a few steps into the cave we turn to the right leaving to the left a raised platform vacant to some distance and having tombs further on, and reach a small doorway beyond which we are not allowed to go. Within the doorway is a circular wide area with another doorway opposite to us which is said to lead to Mecca. To the right of this doorway is the seat of Dattātrēya with a spring to its right, intended for the ablutions of the saint, which is said to overflow during the rainy season, the water going out of the cave through an underground canal. To the right of the spring, again, is a vacant platform intended for the disciples of the saint. To the left of the Mecca doorway is a niche in which are kept the silver plated sandals of the saint. The height of the cave is only four or five feet. Turning to the left side of the cave and proceeding a little distance, we come to a platform where it is said a certain princess used to distribute bread among *fakirs* unseen. A little further on is a dark well, about five feet deep, known as Gandada-bāvi or sandal well, because the earth taken out of it has the colour and, in some degree, the odour of the sandal. The story goes that Vira-Ballāla, who lived in the fort of the hill, having heard of the beauty of a Muhammadan princess, wanted to get possession of her, and with this object sent some men who contrived to bring her away while asleep on her couch. The cool breeze of the mountain awakening her, she learnt from the men the purpose for which she was brought there and prayed to God that she might be made to look an ugly creature to be given away to the *fakir* of the hill, i.e., the saint Dada Hyat Mir Qalandar. The latter took her under his care and directed her to give food to *fakirs* unseen through an aperture of the cave seated on the platform mentioned above. On one occasion a mischievous *fakir* seized her outstretched hand, whereupon his head became severed from the body by the curse of the Qalandar. After this incident, the distribution of food by the princess was ordered to be discontinued. Vira-Ballāla was defeated and thrown into prison by the father of the princess. In front of the entrance to the cave is lying a thick slab broken into

pieces. The reason for the breaking of the stone is stated to be the large number of the cocoanuts broken on it during the visit of Krishna Raja Wodeyar III. Near the slab is a short pillar into the west face of which is built a stone engraved with a Persian inscription bearing the date 111396 (A D 1005) the year in which according to tradition the sacred place was occupied by the Mubammadan saint. The date is also indicated by the chronogram *Jagir salikan* i.e. *Jagir* granted to a saint. Though it bears this early date judging by the script and by the words Dattatraya and Dada in English and Modern Kannada characters at the end this inscription appears to have been put on stone but recently. Higher up to the south are a number of tombs on both sides of the flight of steps leading to the *matha* of the *stami*. Another Persian inscription is to be seen here and a third at the Bbandarkhana to the left of the *matha*. The *matha* is said to have been built or restored by the Ikleri queen Chonnammaji. The *stami* named Syed Murutuja Shah Khadri Sajjado wears a beard his title being Sri Dattatraya svami Baba Budan svami Jagadguru. Only Sajjads can be the *svamis* of the *matha* either Husenis or Khadris the descendants of Husen or Hasan sons of Ali. After initiation a Khadri becomes Shah Khadri and after apostolic seat he is styled Sajjado. No unmarried man can become the *stami* of the *matha* though the worship of the *pittha* or seat in the cave is invariably conducted by an unmarried man or *salir* the things offered in worship being sugar sweetmeat plantains cocoanuts and incense. Dada Hyat Mir Kalandar is said to have appointed Baba Budan as his successor the man who brought coffee to Mysore is said to be Hazrat Shah Jama Allah Magarabi. *Jagir* in Chikmagalur taluk is said to be a corruption of *Jagir* as that portion of the taluk was once granted to the *matha* as a *jagir*. Haidar is said to have granted Dasarhalli and Krishna Raja Wodeyar III Sulaguppe. It appears that the ancestors of the present *stami* had once their *matha* at Delhi which was in later times removed to Dodda Medur in Belur Taluk. The *stami* generally lives at Attigundi a village at the foot of the mountain. He is stated to possess with him *sanads* granted to the *matha* by Humayun Akbar the chiefs of Ikleri Haidar Tipu and Krishna Raja Wodeyar III. From the inscriptions on two silver sticks in the *matha* we learn that they were presents from Krishna Raja Wodeyar III. There are *three tirthas* on the mountain.

viz, Gadā tīrta, Kamana tīrta, and Nellikāyī-tīrta The first is so called because it was formed, according to tradition, by Bhīma with his *gada* or mace for his thirsty mother during the exile of the Pāndavas At the second is the site of an old city on which old brick and pieces of pottery are strewn about and occasionally coins too are said to be picked up The third is so named because water falls there in big drops in the shape of the *nelli* (*emblic myrobalan*) fruit

The Persian inscriptions mentioned above have been deciphered by the Archæological Department, and in view of the interest attaching to them, their contents are set down below

The Persian inscription near the tombs to the south of the cave on the Bābā Budan mountain is an epitaph recording the death on the 14th day of the month of Jamad-al-Akhir of A H 1246 (A D 1830), of Hazrat Syed Miran Shāh Kadiri, Sajjadah (recognised successor) of the shrine of Hazrat Mir Hayat Kalandar Another at the entrance to the Bandarkhana, dated A H 1269 (A D 1852), commemorates in verses the construction of the building It may be rendered thus —“The Sajjadah Nashin (Spiritual descendant) of the holy mountain of Hazrat Budhan, *z e*, Hazrat Shāh Sayyid Ghauth, the guiding Shaikh, built a beautiful spring-house on the mountain, the envy of Tur, for the comfort of the people The house is indeed a most comfortable place of rest, God has blessed this abode of the Kalandar with distinction from Eternity, hence it has been a place of pilgrimage for the high and low Lo! I saw the holy place, and my bountiful teacher Nusrat ordered me to compose a chronogram relative to it The hint of my teacher is for my honour when I meditated about the chronogram, this voice came from heaven “The House based on beneficence ”

Ballāl-rāyan-
durga

Ballal-rayan-durga A fine spreading hill in the Western Ghat range, crowned with extensive fortifications It is situated in 13° 8' north latitude and 75° 29' east longitude, in the north-west angle of the Mudigere taluk, over against Kellaggur The fortifications were erected, as its name indicates, by the Hoysala kings The old entrance is to the north, through what is now the Horikan coffee plantation There are two gates, the *diddi bāgalu* and the *simha bāgalu*

The citadel is a small square fort on the highest point overlooking the South Kanna District. To the east of it is the old tank now a bog overgrown with impenetrable bushes. The pass to Kanna north of the droog is tremendously steep but was formerly in regular use. To this fortress the Rani of Bednūr fled for refuge on the capture of her capital by Haider Ali in 1763 and hence she was sent by him as a prisoner to Madhugiri (Tumkur District).

Bale Honnur—A town situated on the west bank of the Bhadra 32 miles distant from Chikmagalur. Is chiefly a trade centre. A mile to the north of this town is the Balchalli mutt the seat of one of the chief gurus of Lingayat sect. There has always been a fort here over the Bhadra but a fine bridge was erected some thirty years ago increasing the importance of the town for through traffic.

Of some interest here are the inscriptions engraved on boulders in the river (*E C VI Kadur District—Koppa 17 21 and 3*). In the first of these Mammasa of Mayuravarma the second states that he was ruling over the whole world and the third that he was the disciple of the great muni *Vadibasimhn Ajitasena* who has been assigned to about 1010 A.D. Mammasa was apparently a Santara king though connected (perhaps ancestrally) with the Kadambas. His rule extended apparently over both banks of the Tunga though it is poetically exaggerated to the whole world in the inscription. A point noteworthy about these inscriptions is that the river in which the rocks are on which they are engraved is apparently called in them the Tunga. But on the spot the names Tunga and Bhadra are applied in just the opposite way. In all maps known for over a hundred years this stream is marked as Bhadra the twin stream to the west which farther on unites with it to form the Tunga Bhadra being marked as the Tunga. From the evidence of other inscriptions (see *Chikmagalur 77* dated in 1180) there seems to be a mistake here in calling this stream the Tunga. And as Mr Rice remarks this seems the natural inference as there would obviously be no sense in praising the Tunga on the rocks of the Bhadra (*E C VI Intro 12*).

One of the boulders is locally known as Bommanakallu owing probably to the presence of a Jina figure on it

The celebrated Lingāyet Matha at Bālehalli is said to have been founded by Rēnukāchārya, the first of the five Virasaiva Āchāryas, the others being Marulasiddha, Panditārādhyā, Ekorāma, and Visvēsvara Rēnukāchārya is said to have been born from the Mahalinga at Kollipāka There is no figure or Gaddige (tomb) of this *guru* in the *matha*, though there is a *gaddige* of his son Rudramum, which is occasionally worshipped There are besides several *gaddiges* of the former *svāmis* of the *matha* in the backyard Attached to the *matha* to the right is a temple of Virabhadra, a Dravidian structure with a large *prākāra* or enclosure The *navaranga* has two shrines at the sides, the right shrine having a *linga* and the left figures of Ganapati and Sūlabrahma The latter consists of a panel with two stakes in the middle flanked by two standing male figures, the right having a *linga* in the left hand with the right hand placed over it, and the left also with a *linga* in the left hand, but with the right hand placed on the shaft of the stake, as if preparing to climb it There are also kept in the *navaranga* stout metallic figures of Virabhadra and his consort Bhadrakālī which are taken out only once a year, smaller figures being used for the car and other festivals The car festival takes place in the month of Phālguna (March) The seat of the *svāmi* appears to be known as Virasimhāsana The *matha* is said to own several copper-plates and *sanads* granted by the Ikkēri chiefs and the Mysore kings These await examination The present *svāmi* was installed in 1925 and is known to be highly pious and learned

Bhadra

Bhadra The twin stream of the Tunga, which both united form the river Tungabhadra It rises close to the Tunga in the Gangāmūla peak in the Western Ghats, fifteen miles west of Kalasa With a tortuous course it flows first eastwards and then, being joined at Sangamēsvara by the Ānebidda halla from the south, turns north-north-east and runs past Khandeya, across the mouth of the Jāgar valley, the drainage of which it receives in the Sōmavāhini at Hebhe Thence, fed near Lakkavalli by streams from Kalhat-tigiri and Kal-durga, it continues, by Bhadrāvati and

Hole Honnur to the point of confluence with the Tunga at Kudali in the Shimoga District. The extreme steepness of the banks prevents the waters being extensively utilized for irrigation but there are 18 dams from which 325 acres are supplied with water. The dense forest through which it flows has procured it the reputation of being a less healthy stream than the Tunga. It is bridged at Bale Honnur and at Bhadravati for the Bangalore Shimoga high road. It crosses the Tarikere Igumhi ghat road between Narasimha rajpur and Lakkavalli.

Birur—An important trading town in the Kadur taluk Birur on the Bangalore Poona railway and the Bangalore Shimoga road 4 miles north by west of the *Lasba* and a Municipality. A junction for the M & S M Ry with the Birur Shimoga section of the Mysore State Railways.

Population in 1911	Males	Females	Total
Hindus	1 785	1 880	3 665
Muhammadians	59	58	117
Christians	1	1	2
Jains	18	7	25
Total	1 863	1 946	3 809

The town was once the centre of all the araca trade of the Malnad but has declined in recent years owing to the rising importance of Tirthahalli in the Shimoga District. Coconut trade is also carried on on a large scale.

Bund Ghat—The Bund Ghat (coffee ghat) is the principal Bund Ghat outlet to the western coast from the south of the District. The Ghat road runs from Mudigere and is led through the Wombat-maradi or nine hills. The views from Kotigehar of the approach to and down the ghat are very fine. Near the

head of the ghat is a hill, called Hulikal, with two boulders on it supposed to represent the petrified forms of a tiger and a bull. The descent is by easy gradients of 1 in 20 to 1 in 15.

Chikmagalur

Chikmagalur A taluk in the centre and south. Area about 640 45 square miles. Head-quarters at Chikmagalur. Contains the following *hobls*, villages and population —

No	Hobls	Villages	Population
1	Chikmagalur	38	22,697
2	Jagara	21	6,149
3	Ambale	28	12,651

The north of the taluk is occupied by the lofty forest-clad circle of the Bābā Budan mountains, enclosing the wild Jāgar valley. The southern, northern, and eastern slopes contain many coffee plantations. The tract of country around Chikmagalur consists of an elevated plain, composed of rich black soil, extending along the southern base of the Bābā Budan mountains and bounded east and west by inferior ranges of hills, which separate it from Sakkarepetna on the one hand and from Vastāra on the other. Apart from

the excellence of the soil it is watered by perennial streams issuing from the Baba Budans the principal being the Yagichi which flows south by east into the Hassan District. Such is the fertility of the tract that it received the expressive name of *kon javanige* or land flowing with gold. It is very bare of trees but produces unfailing crops of wheat Bengal gram sugarcane rice comander mentya garhe onions and kusumba. Neither cotton nor tobacco is grown owing it is said to too much damp.

The western portion which till 1875 formed part of the separate taluk of Vastara borders the Mafnad beyond and partakes of its character.

The country formed part of the territory of the Jain kings of Humcha and of their descendants the rulers of Karkali latterly included in the Hoysasi kingdom. Under the Vijayanagar empire it passed into the hands first of the chieft of Balam and then into those of the Nayaks of Ikkeri. It was subdued by Chikka Deva Raja in 1690 and added to Mysore by treaty with Ikkeri in 1691 except the Vastara country which fell to Mysore by Hudar Ali's conquest of Bednur in 1763.

There are roads from Chikmagalur north east to the rail way at Kadur south east to Hassan south west to Mudigere and Bund ghat with branches to Aldur and Bale-Honnur north west past the mouth of the Jagar valley to Narasimharajpur and north to the Baba Budans and to Tarikere.

Chikmagalur—The head quarters of the Kadur District situated in 13° 18' N lat 75° 51' E long 25 miles from the railway at Kadur. It is also a regulation municipality.

Population in 1911	Males	Females	Total
Hindus	4 104	3 503	7 607
Muhammadians	1 140	901	2 041
Christian	38	12	50
Parsis	1	3	4
Total	5 483	4 719	10 202

It is situated in the valley south of the Bâbâ Budan range, in a fertile tract of black soil. Since the removal hither of the District head-quarters from Kadur, in 1865, it has enormously increased. The main bazaar street is a fine wide thoroughfare, more than 2 miles long, extending from the old fort of Chikmagalur to the village of Basavanahalli, which it includes. In fact, the place is often called by the latter name. A large fair is held on Wednesday, at which 4,000 people assemble. The wants of the neighbouring coffee districts have led to the settlement here of a number of Muhammadan traders and shopkeepers. The town, *ûru*, is popularly supposed to be named after the *chikka magalu*, or younger daughter, of Rukmāngada, the king of Sakkarepatna, being her dowry, as the contiguous village of Hiremagalur was that of the *hure magalu* or elder daughter. But there seems to be no foundation for this derivation. There are inscriptions in the fort of the Ganga kings in the 9th century, and of the Hoysalas in the 13th century. In inscriptions of the 9th and 12th centuries, the names *Kurva Mugulu* and *Hirya Mugulu* frequently occur. Chikmagalur was apparently a Jain settlement at one time. The inscribed stone in the Lâlbâgh is a memorial to one Sana gunda who, it is stated, "having burst the tomb," attained "to the world of gods." It is dated in 1280 A D. Recently two more Jain epitaphs, dated in the 11th century A D, have been found by the Archæological Department. At Basavanahalli mentioned above, there is a *vîrakal* near the Vîrabhadra temple. This is dated in 1289 A D and refers to a collision between the Hoysala royal brothers Narasimha III and Râmanâtha. Basavanahalli is apparently an old village and has been referred to in an inscription, probably assignable to the 11th century A D which is engraved on a stone in Sayyid Hussain's field in that village. (*Chikmagalur* 15) Many more inscriptions have recently been discovered at this village.

At certain seasons the high east winds, to which the place is much exposed, render it unhealthy. A wide belt of

trees has been planted completely round the limits of the station in the form of an oval to mitigate this evil. Besides the usual District offices there are a club hospital high school and other public buildings.

In the European Cemetery the oldest monument is dated 1861. It is in memory of T. J. W. Tylor who died on 20th July of that year aged only about 24 years who is described as an alumnus of Bishop's College Calcutta. He was Head master of the local Government school at the time of his death.

Gangamula—The source of the Tunga and Bhadra rivers, situated in 13° 15' N lat 75° 11' E long. The hill from which they issue called the Varaha Parvata is in the Western Ghats on the confines of the Koppa and Bale Honnur taluks. The legend is that after Vishnu incarnate as the Varaha or Boar had raised up the earth from the waters of the ocean into which a Dasya named Hiranyaksha had carried off and plunged it, he took his stand on this mountain and the drops which trickled from his two tusks formed respectively the twin streams the Tunga and Bhadra. The Netravati a stream which flows west through South Kanara is supposed to rise at the same place and to have sprung from the drops which fell from the eyes (*netra*) of the Boar. The *tunga* (long) left tusk was the one he used as his weapon the *bhadra* (firm and strong) right tusk was the one on which he bore up the earth. This is the *dakṣiṇonnata dāśhtrāgra* frequently invoked in inscriptions.

Mr Bowring who visited Gangamula says—

It is in truth a wild country and has a desolate grandeur about it seeming to be the end of the world. On every side tower up magnificent mountains spreading for leagues in every direction and covered with immense forests while nowhere can one detect the faintest trace of human life either in the shape of houses or of cultivation.

It was to these solitudes that the father of Pandita Ramabai retired for many years and here it was that he taught her Sanskrit.

Hariharpur
properly Ha-
riharapura

Hariharpur, *properly Hariharapura* A village situated in $13^{\circ} 30' N$ lat, $75^{\circ} 22' E$ long, on the left bank of the Tunga, on the Tarikere-Agumbi road, 7 miles east of the Agumbi ghat Till 1897 the Head-quarters of the Koppa taluk Population 953

From inscriptions at the place, it appears to have been an *agrahāra* established in 1418 by Sābanna Wodeyar of Āraga (Tirthahalli taluk, Shimoga District) in the reign of Harihara Rāya (?) of Vijayanagar, and named after the latter

There is a Smārtha *matha* at this place, the *svāmis* of which are said to be descended in spiritual succession from Bhattapādāchārya, one of the immediate disciples of Sankarāchārya. There are two shrines in the *matha*, one dedicated to Narasimha and the other to Sārada. The former is said to have been set up by Surēsvarāchārya, another immediate disciple of Sankarāchārya. The car festivals of both Narasimha and Sārada take place at an interval of about 12 days in the month of *Vaisākha* every year. The disciples of the *matha* are confined mostly to Koppa, Mudigere, and Tirthahalli taluks. There are two inscriptions in the Mādhavēsvara temple, and two on the old site of the *matha*. All the four records have a figure of Vāmana at the top, which appears to be peculiar to these parts. Local tradition asserts that Daksha's sacrifice is said to have been performed near the Sōmēsvara temple close to Hariharapura. The place has about 15 families of Smārtha Brāhmans. A *svāmi* of this *matha* named Rāmachandra Sarasvatī is mentioned in *E C VI*, Koppa 49, of 1392. About 5 miles from Hariharapura is the village Bhandigede which contains a Smārtha *matha* the disciples of which are the sect of Brāhmans known as Kōtadevaru from Kōta, a place in South Kanara District. The god worshipped in this *matha* is Gōpālakrishna. Similarly, there is a Smārtha *matha* at *Tirthamuttur*, Tirthahalli Taluk, the disciples of which are the sect of Brāhmans known as Panchagrāmadavaru (those of the five villages) with whom the other Smārthas do not mix. The god worshipped here is Narasimha.

Hemāvati

Hemavati. This river, a principal tributary of the Cauvery, is more fully described under the Hassan and Mysore Districts, in which most of its course is run. But it rises

in this District in Javalu in the Melbangadi *māgani* of the Mudigero taluk. The reputed source is a spring behind the house of Lakshmayya a coffee planter which is led through a stone bull into a square stone well. The stream runs in a south east direction to the Hassan District which enters at the common boundary of Manjuralabad and Belur.

Hiremagalur—A large village one mile south east of Chikmagalur largely inhabited by Sri Vaishnava Bruhmans. Hiremagalur
Population 916

It is said to be named from the *hire magalu* or elder daughter of Rukmangada, the king of Sakkarapatna having been bestowed on her as a dowry.

According to the *Purānic* account Hiremagalur was once the residence of nine *siddhas* or saints who performed penance near a pond in the village known as Siddha pushkarini. It then became the residence of Parasurama and was named Bhargava puri after him. He set up Raia in the Kodandarama temple. Subsequently Janamejaya performed the serpent sacrifice in this village a stone pillar about 9 feet high with the top fashioned like a trident or spear being pointed out as the *yupa stambha* or sacrificial post used by him. Opposite to the post is a Siva temple to the left of which stands a curious figure about 4 feet high with 8 legs 4 in front and 4 behind wearing matted hair sacred thread and a belt. It has 4 hands the right upper holding a staff the right lower a rosary and the left lower what looks like a bag with the mouth tied the remaining hand being broken. The people call it *Jademuni* (the sage with the matted hair). According to some it represents a spirit stationed there for the protection of Janamejaya's sacrifice. A fine figure of Sarasvati and a bull are lying in the compound of the Siva temple mentioned above.

The Kodandarama temple is a structure in the Hoysala style so far as the *garbhagriha* and *sukhanasi* are concerned the remaining portions being subsequent additions in the Dravidian style. In the *prākara* or enclosure are cells enshrining figures of Vedantacharya Ramanujacharya some Ālwars of Sri Vaishnava saints Yoga Narasimha Sugriva and Madhava Vedantacharya a famous Sri Vaishnava teacher and author of the 13th century. Yoga Narasimha so called because he

is in the posture of meditation, is a good figure, about $3\frac{1}{2}$ feet high, with *prabha* on which are sculptured the ten incarnations of Vishnu, Buddha with a (?) lotus in the right hand being shown as the ninth incarnation of Vishnu. Sugrīva, about 4 feet high, stands with folded hands. Mādhava is said to have been found at a place called Mādhava-kshētra near a river at some distance from the village. It is a *peculiar* figure, about $4\frac{1}{2}$ feet high, with 4 hands, the upper ones holding a conch shell and a ring in place of the conventionalised conch and discus, and the right lower, a short round staff, the left lower being placed on the waist. There is also a smaller figure of Yōgā-Narasimha with an ornamental *prabhāvali*, said to have been found in the Siddha-pushkarinī. The outer walls of the *garbhagriha* and *sukhanasi* have besides pilasters and turrets two rows of figures representing mostly Vishnu and his forms such as Hayagrīva, Narasimha, Lakshminārāyana, Vēnugōpāla, Kāliya mardana, and Gōvardhandhārī. There are also figures of Lakshmi, Hanumān, Garuda and Ganapati. Garuda occurs both at the beginning and the end of the second row. Altogether the number of figures is about 30.

The Parasurāma temple has a stone in the shape of an axe for the object of worship. It is said that on a cow bringing forth a calf in the village it is usual for the owner to offer milk and curds on the 11th day for the *abhishēka* or anointment of the god, and that omission to do this results in the cow giving blood instead of milk. To the north of the temple is found buried in the middle of the road a curious panel containing a figure of the goddess Kālī flanked by elephants holding water-pots in their uplifted trunks. This is said to be worshipped occasionally by the Holeyas.

The *yūpa-stambha* or sacrificial post above mentioned is said to be efficacious in restoring any one bitten by a serpent, the patient must circumambulate the pillar and bathe in the Siddha Pushkarinī, the pond referred to above, which is close by. The village is surrounded by a rich tract of black soil. Inscriptions at the place show that it was an *agrahāra* in the 9th century in the time of the Ganga king Nītamārga, and in the 11th century in the time of the Hoysala king Vinayāditya.

Jambitige

Jambitige A village about a mile from Hariharapura. Contains a small neat temple known as the Nilakantēsvara, remarkable for its sculptures, though built so recently as

A D 1733 An inscription around the base gives the name of the sculptor as Kolanna son of Kollura of Kalasa in Chikmagalur taluk The labour bestowed on this little building is enormous

Every inch of space in this temple is carved with figures etc on the outer walls and the inner walls too of the *sukhanasi*. Though the figures are not very remarkable for artistic beauty still considering the material used namely hard granite they are creditable to the sculptor the south and west walls of the temple delineate briefly the stories of the *Ramayana* and the *Mahabharata* and the north wall the *Bhagavatapurana*. The incident of Vasudeva falling at the feet of an ass to save his child from destruction is also represented The north wall depicts besides some sports of Siva and the torments that sinners have to suffer in hell Nor are the ten incarnations of Vishnu omitted A figure worthy of notice on this wall is Kamodhanu or celestial cow with five faces Portions of the *Ramayana* story are also depicted on the lintels over the *gorbhogriha* and *sukhanasi* doorways On the wall to the left of the *sukhanasi* doorway are figures of Durga Chandra and Suryanarayana and on that to the right Gonapati Surya and Gopala Surya is represented with eight hands and four faces three in a row and one above Chandra also has eight hands Every figure has a label over it giving its name and every group a descriptive note The temple stands on a raised terrace and measures only ten feet by eight feet Altogether it is a noteworthy structure bearing ample testimony to the skill and patience of the sculptor Kolanna The village has 15 houses of well to do Smartha Brahmans

Kadur—A taluk in the east area 545.86 square miles 1 adur
Head quarters at Kadur Contains the following *hobbs*

			1,257

There have been frequent local changes in regard to the taluk. Originally, it appears, there were four taluks, Kadur, Yagatī, Garudangiri and Bānavar. The two former belonged to the old Ikkēri kingdom, but were taken by the Mysore kings and given to the chief of Tarikere, in return for services in the field rendered by him. Haidar resumed them and annexed them to Mysore. Garudangiri was absorbed into Bānavar, and about 1835 Yagatī was absorbed into Kadur. In 1876, Kadur and Bānavar were formed into one taluk, named after Bānavar, which was the chief town. In 1882, the head-quarters were removed to Kadur, and in 1886, on the formation of the neighbouring Arsikere taluk, Kadur taluk was reconstituted, with the addition of Sakkarepatna *hobli* from Chikmagalur, while portions of the old Bānavar taluk, together with Bānavar itself, were transferred from this District to Arsikere taluk in the Hassan District.

It is now virtually bounded on the west by the congeries of hills east of the Bābā Budan mountains, and those separating Chikmagalur from the Sakkarepatna valley, and on the south by the hills running up from Jāvagal to the conspicuous height of Garudangiri. It is traversed through the middle, in a north-east direction, by the Vēdāvati, which is formed by the junction, south-east of Kadur, of two streams, the Vēda and Avatī, and receives near Yagatī a stream from the south, called the Jāvagal-halla. The Vēda and Avatī both have their sources in the Bābā Budans, but the former comes through the Ayyankere and the latter

through the Madigkere the two largest tanks in that part of the country. These streams as they emerge from the hills have been dimmed with great skill and a perennial water supply thus obtained. Numerous channels are taken off from each converting a considerable stretch of country into irrigated lands of special fertility. The general character of the taluk is that of a slightly undulating plain. Most of the waste lands are covered with wild date or *babul* trees. A large extent of waste lands is kept for grazing purposes the number of cattle and sheep being very considerable. Soils of almost every quality are found varying from black cotton soil of good quality to the poorest sand irrigated lands of average quality varying principally as the proportion of clay or sand predominates. A high class of tobacco is grown in the south and west. Coconuts are largely grown without irrigation in low lying sandy soils. The tree thrives best in the drier parts where also the produce is superior in quality. Iron ore is obtained from Hogari betta in the north west.

The Bangalore Poona railway runs through the taluk in a north west direction with stations at Devanur, Kadur and Birur where it turns north east and enters the Farikere taluk. From Birur a branch north west to Shimoga is constructed. The Bangalore Shimoga road is close along side the railway and there are roads from Kadur south west to Chikmagalur and from Birur north to Ajjampur and west to Lugadahalli and the Baba Budans. There is also a road from Sikkarepatna to Devanur and Banavar.

A few places in Kadur Taluk are supposed to bear evidence to the connection of the Pandavas with this part of the country. Thus Macheri is believed to be Matsyapura Virata's Capital. Turuvanhalli the village where Virata's cattle (*turu*) were rescued and Kunti halla a portion of the Vidavati the place where Kunti the mother of the Pandavas used to bathe.

Kadur—A town in 13° 32' north lat 76° 1' east long on Kadur the Bangalore Poona railway and the Bangalore-Shimoga

road, 25 miles north-west of Chikmagalur. Head-quarters of the Kadur taluk and a Municipality

Population in 1921	Males	Females	Total
Hindus	1,465	1,409	2,874
Muhammadans	147	90	237
Christians	16	9	25
Jains	12	2	14
Animists	2	3	5
Total	1,642	1,513	3,155

It was from 1863 to 1865 the chief town of the then newly formed District, whence the latter obtained its name, and still later, till 1875, the head-quarters of the Kadur taluk, which was then absorbed into Bānavar taluk. In 1882, it was again made the taluk head-quarters, and in 1886, the taluk was again called after it.

From inscriptions and other monuments, it is evident that a Jain settlement existed here in early times, connected with the Ganga kings. It was subsequently under the Hoysalas. During the sovereignty of the Vijayanagar kings in the 14th century, the lands around Yemme Doddi gudda were conferred upon a dependent named Mada Nāyak. At that time, the *agrahāra* of Nārnapura occupied the present site of Kadur, and the Nāyak, when hunting one day in that direction, had his dogs turned back and pursued by an elk. This led to the foundation of the fort, called *Kad-ūru* elk town, from *kadave*, an elk.

The Ānjanēya temple near the pond in the fort has a veranda supported by four fine pillars which must have once belonged to some Hoysala temple. A noteworthy peculiarity in these pillars is the presence of sculptures representing *Purāṇic* scenes. Such sculptures are very common on the square pillars of Dravidian temples, but not on the turned pillars of Hoysala structures.

The recent advent of the railway has increased its importance, as being the station for Chikmagalur and the coffee districts beyond.

Kalasa — A village in the Mudigere taluk situated in Kalasa
 13° 14' N lat 75° 26' E long near the right bank of the
 Bhadra by road 21 miles south west of the *Jasba*

It is situated in a valley surrounded by the lofty hills of the Western Ghat range and at the southern base of Merti the grand hill of Kalasa. It contains a large temple dedicated to Kaliswara surrounded with inscriptions of the Barmarasa Wodeyar family of Karkala. The temple is said to have been founded by Shrutabindu a king from the north in order to atone for the sin of slaying animals in the chase. It was therefore probably a Jain temple originally. Mounds covering ruins on all sides point to the existence of a large town in former times. It was included in the dominions of Humcha and of the Karkala chiefs descended therefrom. Subsequently it became the residence of the Agur chiefs. The town then extended so as to include the present villages of Melangadi, Kilaugadi and Rudripada. Going through Melangadi and keeping on to the river a sacred bathing place called Ambu tirtha is reached where the stream rushes very deep between some water worn rocks. At one point is a large boulder a big square shaped stone placed horizontally on another. On the former is an inscription in Sanskrit stating that Sri Madhvacharya brought and placed it there with one hand.

The circumstances under which he brought the stone here are related in the *Madhva vijaya*. Mahaksha (Madhvacharya) saw a big rock capable of supporting the fall of water from a height which had been brought by a thousand men for some tirtha and abandoned through utter inability. Why was the rock not conveyed (to its destination) for the good of the people? he inquired when the crowd at the place replied that there were no men able to convey it there and that even if Bhima were to try it was doubtful whether he could do it or not. Whereupon he bore up the rock easily with one hand as in the form of Hanuman he had borne up the mountain (Gandhamadana) and placed it at the destined spot. And this rock in the Tunga even now bears witness to his deed.

The Kalasa Kārkala kingdom was an extension below the ghats into South Kanara of the original Sāntara Kingdom of Pombachha (see *Humcha*) Kalasa is above the ghats in Mysore and Kārkala below the ghats in South Kanara, in about the same latitude The inscriptions relating to this kingdom are collected in *E C VI*, Kadur District They range from 1246 to 1598 A D The kings of this line followed the *ahya santāna* law of inheritance and were probably Jain by religious persuasion The following is a list of these kings from 1132 to 1598, as contained in their inscriptions

	A D
Ballu-Dēva,	1132
Malla-Dēva	
Maru-Dēva	
Jakala-mahādēvi (2 his widow)	1246-7
Kalala-mahādēvi	1270-81
Bala-Dēva, Rāya-Ballāha-Dēva	1284-5
Vīra-Pāndya-Dēva, son of Kalala-Dēvi	1292-7
Bhairarasa-Wodeyar	1419
Vīra-Pāndya-Dēva	1440
Bhairarasa-Wodeyar (his younger sister was Balama-Dēvi)	1493-1501
Immaḍi-Bhairarasa-Wodeyar, son of Bommala-Dēvi	1516-30
Son-in-law of Hiriya-Bhairarasa-Wodeyar (his younger sister was Kalala-Dēvi)	
Vīra-Pāndya-Wodeyar, or Vīra Pāndyappa-Wodeyar, son of Chandala-Dēvi, son-in-law of Bhairarasa-Wodeyar	1512-52
Immaḍi-Pāndyappa-Wodeyar	1555
Bhairarasa-Wodeyar, son of Gummata-Dēvi	1588-98

Vīra-Pāndya-Dēva was a contemporary of the Hoysala Vīra-Ballāla-Dēva III *Chikmagalur* 35 and 36 refer to his attacking a certain Marakāla and cutting him to pieces

The *virakula* at the Bundera and Sangamesvara temples at Indavara (*Chikmagalur*) and 36 dated in 1292 A D) are memorials to those who assisted Vira Pandya to avenge the death of Marikala and in the attempt fell. Vira Bhairarasa and Vira Pandya who ruled in 1119 and 1110 were feudatories of the Vijayanagar king Deva Raya II. Similarly Virabhairarasa who came next was a feudatory of the Vijayanagar king Immadi Virasimha Raya. He assumed the special title *ari raja-gudam datani* (or cattle rope to champions over hostile kings). Bhairarasa II was a feudatory of the Vijayanagar king Krishna Raya. From *Mudigere* 11 dated 1516 A D we learn that when Krishna Raya invaded the kingdom and encamped at Mangalore this chief deserted the country and on the retreat of the invader came back and as a thank offering repaired the temple of Kalasanatha at Kalasa. As Vira Pandya Wodeyar was a feudatory of Achyuta Raya the Vijayanagar emperor it may be inferred that the old relationship continued undisturbed down to the time of Sadasiva Raya when we find Immadi Pandjappa Wodeyar as chief. During the period of the last two chiefs Kalasa seems to have been managed by a person named Bhairarasa Annaji (*Mudigere* 10 dated in 1552). From certain other inscriptions we learn that the Kalasa country was a Thousand and administered by three Hebharas or Hebhararavas. Apparently it enjoyed a kind of self government about which fuller particulars are not available (*Mudigere* 88 dated in 1515 A D). Some of the princes of the Vijayanagar family are also said to have ruled over Kalasa. Thus Bukka's son Virupanna is said to have ruled over it and Ariga. (See *Ariga* in Shimoga District).

The areca nut produced in the neighbourhood is reckoned the best in Mysore being known as Desavara in distinction from that grown in other Malnad parts which is called Honnavara and from Volagra which is the produce of other inland gardens. Kalasa is connected with the Bund ghat by a road through Balur and with the Agumbi ghat by a road running north through Baggunji.

Kalsapura

Kalsapura A village in the Chikmagalur taluk Population 1107

The Cheluva-Nārāyana temple at this village is of some interest. The temple which is an old one with a newly built exterior is very dark and the doorways provided are too narrow to admit any light inside. The temple faces east and consists of a *Garbhagriha*, *Sukhanasi*, *Navaranga* and *Mukha-mantapa*. A cell to the left of the *mukha-mantapa* contains the goddess. The image Cheluva-Nārāyana which is beautiful is about 7 feet high including the pedestal. The figure holds *Padma* and *Gada* in the back hands and *Chakra* and *Sanka* in the front hands. It is flanked by *Sīdēvi* and *Bhūdēvi* and there is the usual Garuda carved on the pedestal. Images of Garuda, Ānjanēya and Nammālvār are kept in the *navaranga*. The goddess is about 4 feet high seated on a pedestal of about 1 foot in height. She is holding Padma in both of her back hands while the two front are in the *abhaya* and *varada* attitudes, respectively. One scenographic peculiarity to be noticed in the image is the bodice band which runs round the bust of the goddess.

There is another temple in the same village dedicated to Mallikārjuna. A short inscription is to be seen on the lintel of its *Sukhanasi* doorway. It records the gift of one *Gadyāna* for the service of Mallikārjuna. The temple is an early Hoysala structure with a well carved Hoysala crest on the top. It consists of a *Garbhagudi*, *Sukhanasi* and *Navaranga*, with an entrance doorway on the south wall. In the *Navaranga* are placed images of Sarasvatī, Nārāyana, Kālabhairava, Sūrya, Mahishāsūramardini, Ganapati, Saptamātrika, and Nāga stone.

Khandēya

Khandeya. An ancient village now in ruins in Bāle-Honnai taluk, on the right bank of the Bhadra, where it makes a bend to receive the Ānebidda-halla, 5 miles north-east of the *kasba*.

It appears to have been formerly a large place. There are some considerable old temples, the principal one being dedicated to Mārkaṇḍēsvara, also several inscriptions of the Hoysala and Vijayanagar kings. It is said to have been originally the hermitage of Mārkaṇḍa rishi. He sought from Siva the boon of a son, and was required to choose between one who should be distinguished for his wisdom but die at the age of 16, and

one who should be a fool and live a long life. The aunt chose the former and obtained Markandeya. The desires of his mother at the time of his death approached led to his recovery of his life. But when Mritya the god of death appeared to claim his life, Indardana (Vishnu) offered to be the substitute and Siva moved by the youth's devotion gave him victory over death. The place derived its name from Markandeya and the temples of Indardana and Mrityuvijaya (conqueror of death) commemorate his deliverance.

Kigga—A village in the Koppa taluk in the extreme west of the District. It is known as Markina. Population 715. It is well known for its temple dedicated to Sri Rishya Sringesvara which is a well endowed Muzrai institution.

This temple is a pretty large Dravidian structure. The *navaranga* has three entrances and four sculptured pillars. Some of the sculptures showing an ingenious combination of men, animal, etc. One of them is noteworthy as representing the incident of the sage Rishyasringa being carried by dancing girls to King Lomashadi's capital. The pulvinus formed by the women themselves is shown here as being supported by two antelopes. Such a sculpture but without the antelopes is to be seen at Devanhalli and Sivaganga. The *sukhanasi* has two shrines at the sides; the right shrine containing a figure of Ganapati and the left a figure of Mahashivaradhini. This Ganapati deserves notice as he has only two hands. Beside his trunk is turned to the right. Both the features are rare. A Ganapati with two hands has been noticed at the foot of the Jain garumessara hill near Siddapura, Molakshuru taluk. (Q V). The *linga* in this temple is called Sringesvara, a shortened form of Rishyasringesvara, because it was set up in the name of the sage Rishyasringa or according to another account he was absorbed into the *linga*. It is said to have Santa, wife of Rishyasringa at the left side and two horns over the head like the sage. The Puranic account of the place describes *linga* as remover of famine which spread over twelve *yojanas* of the earth as rejoicing to have Parvati on his left thigh as the fulfiller of the desires of devotees as being worshipped by all the gods and as having the shape of a *rudraksha* i.e. the berry of the *rudraksha* tree (*Elacocarpus ganitrus*) and Rishyasringa as being

in company with his wife Sānta, as dwelling on the bank of the river Nandini, and as being adorned with Rudrāksha berries

Koppa

Koppa. A taluk in the north-west Head-quarters till 1897 at Hariharpur, now at Koppa Contains the following *hobls*, villages and population

No	Hobls	Villages	Population
1	Koppa	23	8,357
2	Hariharpur	22	7,802
3	Kigga	26	6,426
4	Baggunji	14	4,097
5	Megunda	22	8,937
Total		107	35,619

Principal places with population

No	Place	Population
1	Koppa (town)	858
2	Nuggi	798
3	Bhandigadi	799
4	Hariharpur	953
5	Attikodogi	811

Position

The tract forms a compact quadrilateral in the extreme west of the Kadur District, reaching up to the crest of the Ghats along a length of over 20 miles in the west. The Udipi taluk of the South Kanara District adjoins on the other side of the crest. The Tirthahalli and the Mudigere taluks lie on the north and the south respectively, the late Lakkavalli and the Chikmagalur taluks are on the east.

Physical features

The country is practically a succession of hill and dale all over, except in the centre and the north-west. The Ghats along the west and south are among the loftiest with such prominent peaks as Walkanji, Sujibetta and Narasimhabetta. The Tunga river taking its rise at Gangamūla in the Varāha Parvata, flows north-eastwards through the Srīngēri valley, and then rather abruptly

Population in 1921	Males	Females	Total
Hindus	361	267	628
Muhammadans	123	52	175
Christians	23	15	38
Jains	12	5	17
Total	519	339	858

The town consists of three portions known as Mel-Koppa, Kela-Koppa, and Balugadi, the last, at some distance from the other, contains the travellers' bungalow, the Taluk Office, the Amildar's office, and a row of houses for the Taluk officials. The hospital, school, and musafirkhana are in Kela-Koppa. Mel-Koppa has a small stone temple of Virabhadra, consisting of a *garbhagriha*, surmounted by a tower a *sukhanasi* and a porch. The outer walls have sculptures representing some of the *lilas* or sports of Siva. The south wall has a good representation of the destruction of the three celestial cities by Siva. As stated in the *Purānas*, Siva is represented as shooting the three cities with an arrow in the shape of Vishnu, Vasuki, the king of the serpents serving as the bow-string, the earth as the chariot, Brahma as the charioteer, the *Vēdas* as the Horses, and Mēru, the golden mountain, as the bow. One foot of Siva is placed on the hump of his Nandi. There is also Subrahmanya on the peacock to his right. The west wall has a panel depicting the destruction of Yama, or the god of death. Yama is represented as throwing his noose over Mārkaṇḍēya who embraces a *linga* out of which Siva emerged and spears Yama. A woman to the left probably represents Mārkaṇḍēya's mother. The north wall has Siva and Pārvatī, seated on Nandi enclosed by a *prabha* or halo with three-legged Bhṛingi to the left and a man and a woman with folded hands to the right. The latter are evidently the persons mentioned in the inscription engraved below as having caused the figures to be carved and his wife. According to the *purāṇic* account, Daksha celebrated a great sacrifice at Hariharapura, about 8 miles from Koppa, and as he insulted Siva by not sending an invitation to him, the latter sent Virabhadra to interrupt the sacrifice, and punish Daksha. Having done this, Virabhadra came here with the unabated

rage (*Lopa*) and took up his abode in this temple. Hence the place came to be known as Koppa. The original figure of Virabhadra having suffered mutilation another from a ruined Langayet *mutha* is now substituted for it. There are also metallic figures of Virabhadra and his consort Bhadrakali the latter with only two hands holding a sword and a shield.

Kotevuru — A village in Vastara Taluk. Population Kotevuru 247

A place noteworthy for its ancient inscriptions. Among them is a very curious one at Latei Bavananda's garden which has been conjecturally assigned by Mr. Rice to about 800 A.D. which gives details of a line of kings called Taryalla or Kusa Taryalla. It is unfortunately too much defaced to allow of continuous decipherment. It begins with the ancient form *Siddham* and is throughout composed in Sanskrit. Manu Ikshvaku Harischandra Dilipa and Raghava are declared to be the progenitor (*vamsasiddhijagajah*) of the line called Kusa Taryalla. In that family was Saksvami Hari Vishnu Trivikramas all meaning Rami by whom the Solar race was purified. His son was Kusa whose son was Kukusa. The latter had two sons Mallikari and Marikari (or Murikari) who slew *sena* a hunter (*yudhi*) difficult to conquer. The famous Marikari having come to this country (*simandam*) wherefrom is not stated performed the birth (*jata karma*) and other ceremonies for Taryalla. A Kasyapa apparently also performed some ceremony perhaps for Srutakirti who was devoted to Brahma (*parama brahmanya*). The latter's son was Nagakirti who established schools (*salah*) for the four divisions of learning. His son was Singama also a *parama brahmanya* who made a great war like those of old as is described in 20 *ubandhas*. His son was Taryalla who made this grant to 20 Brahmins. The *sasana* was composed by Paudasvami a Kasyapa a grammarian and versed in the *puranas* who was the *purohita* or family priest to Taryalla. He has evidently done his best for his patron. All this information is quite new and there is no other inscription to throw any light upon it. Though not dated the record is undoubtedly very old and several expressions in it remind one of the Kadanaba grants.

At the Rāmēśvara temple, on a stone to its left, there are Sēnavāra inscriptions, mentioning Māra Sēnavarma, who is said to have erected many temples. One of them belongs apparently to the 11th century. There is, besides, a *vīraka* near Mannirkatte, at the entrance of the village.

Kudure
Mukha

Kudure Mukha A peak in the Western Ghats and one of the loftiest points in Mysore, the summit being 6,211 feet above the level of the sea. It is situated on the frontier in the south-west of the District, at the point where the line of the Ghats bends more inland. The approach from the Mysore side is by way of Samse, the hill being sometimes called on the spot the Samse parvata. Its name of Kudure mukha, or horse-face, is descriptive of its appearance seawards, where it is a well-known mark for navigators. The officials of Malabar have a bungalow at the top as a hot weather retreat, and a bridle path has been formed from the Malabar side, which is the easiest means of ascending the mountain.

Lakavalli

Lakavalli A village in Tarikere taluk, on the right bank of the Bhadra, 13 miles west of Tarikere. Population 1,113.

Till 1882 it gave its name to a taluk which included the Bābā Budan mountains and parts of what are now Koppa and Bāle-Honnur taluks. West of it are vast forests on each side of the Bhadra, containing some of the most valuable teak timber in the country. Nowhere is the transition from Malnād to Maidān more abrupt or striking than here.

Lakavalli is close to the site of Ratnapuri, the ancient capital of Vajra Makuta Rāya. The neighbouring country subsequently formed part of the Humcha and Ganga territory, then of the Hoysala and Vijayanagar kingdoms. The Pālegiri of Tarikere afterwards acquired some portion of it, but were forced to yield it to the Nāyaks of Ikkēri. The overthrow of this latter power by Haidar Ali's conquest of Bednūr in 1761 led to the absorption of the country into Mysore.

Markalu—See K॥५१

Markalu.

Marle—A village in Chikmagalur Taluk. Population 11610

There are two fine temples in the Hoysala style in this place standing side by side with an interval of only a few feet between them both facing east. The one to the north the Chennakalesvara is larger and more artistically executed than the other named Siddhesvara though the plan of both is the same—a garbhagriha a *sukhanasi* a *nataranga* and a small porch. Both are pretty early specimens of the style having been built in 1100 only 13 years after the Belur temple during the reign of the Hoysala king Vishnuvardhana by one of his generals named Rajarajadandanatha. From the fine inscription to the right of the Chennakalesvara temple A.C. VI Chikmagalur 131 we learn that Vishnuvardhana visited the temple in 1100 A.D. probably at the time of the consecration and made a grant to it. The god about 5 feet high is flanked by consort and has a *prabhavali* sculptured with figures representing the ten incarnations of Vishnu Buddha being shown as the 9th incarnation. The ceilings are not domed they are flat though about 1½ feet deep. The *garbhagriha* has a ceiling with a large lotus in the centre. The pediment of its doorway has in the middle a figure of Narasimha killing Hiranyakasipu flanked on the right by Garuda and on the left by Isabhlada and figure of Vishnu flanked by consorts at the extremities with intervening turrets flanked by rampant lions. The *sukhanasi* ceiling has in the centre a large panel carved with a figure of Lakshminarayana with ornamental work around its doorway is flanked by well carved *diarapalakas* and the pediment over it has in the middle a figure of Laskhminarayana and seated figures of Sarasvati at the sides. The central pillars at the *nataranga* show beautiful bead work and had once four *madanakais* or bracket figures each though only five of them are now left one on the north west pillar and two each on the north east and south west pillars. Though mutilated the *madanakais* figures show good workmanship. Of the *nataranga* ceilings eight in the eight directions have a projecting panel in the centre carved with the figures of the *ashta dikpalakas* or regents of the directions surrounded by eight lotuses in the case of the corner ceilings which are square

and by fourteen lotuses in the case of the others which are oblong, while the central ceiling has Lakshminārāyaṇa in the centre and the regents of the directions around. The porch supported by two artistically executed pillars has a ceiling similar to the last. All the ceilings are adorned with ornamental knobs. They closely resemble the ceilings of the Brahmēśvara temple at Kikkeri. The pediment of the *navaranga* doorway has Lakshminārāyaṇa in the middle flanked by elephants with water-pots in their uplifted trunks, and seated figures of Naminārāyaṇa at the extremities. In front of the porch are two beautiful elephants at the sides. The outer walls have mostly turrets over single or double pilasters. The north and south outer walls of the *navaranga*, however, have one figure of Vishnu in the middle between pilasters surmounted by turrets. The outer walls of the *garbhagriha* have three beautiful niches in the three directions surmounted by elegantly carved turrets and enclosed by walls ornamented with screen work. The south and west niches have a frieze of lions at the bottom. The eaves are of good bead work all round. The temple has a stone tower consisting of uncarved blocks. The Siddhēśvara temple has an open *sukhanasi* whose ceiling has a projecting central panel carved with a figure of Tāṇḍavēśvara surrounded by eight lotuses. The *garbhagriha* ceiling has a large lotus with ornamental work around, and the pediment over the doorway has the figure of Gajalakshmi. The ceilings of the *navaranga* and porch are similar to those of the other temple, only in place of Lakshminārāyaṇa of the central ceiling we have Tāṇḍavēśvara here, and instead of the oblong ceilings with fourteen lotuses we have square ones with eight lotuses like the others. The beams over the central pillars have sculptures on the inner faces representing *Purāṇic* scenes, those on the south beam depicting the fight between Siva in the guise of a hunter and Arjuna, those on the north the churning of the ocean by the gods and demons, those on the east, Siva's dance with attendant musicians, and those on the west the same with the addition of a female figure whose cloth is shown as being pulled by a monkey. The pediment over the *navaranga* doorway has Gajalakshmi in the middle flanked by Ganapati on the right and on the left by Sarasvatī. Unlike the outer walls of the other temple, the walls here have also figure sculpture in addition to the turrets over the single or double pilasters. Among the figures, there are two prominent

one on the north and south walls of the *natarang* namely Gajaramardana and dancing Varasiv with 12 hands for holding an elephant goad a noose a book and a roary and two in the *natya* or dancing posture flanked by attendant musicians and three in the three directions between pilasters surmounted by turrets around the *garbhagrha* namely Bhairava on the south Tandavavara on the west and Varanmba killing Hiranyakasipu on the north. The gods and goddesses represented by the remaining figures are Vinayaka and his forms such as Varaha Vamana and Trivikrama Brahma 2 Siva as Uma mahesvari Tandavavara and Ardanasvara Canapati Subrahmanya Bhairava 2 Manmatha and Mahahesuramardini there are likewise a few more male and female figures. The inscription referred to above is a beautiful slab measuring 11 feet by 9 feet standing between two pillars which have *diwapalakas* sculptured at the bottom and adorned at the top by a semi-circular panel containing a figure of Lakshminarayana flanked by *chakra* bearer. Behind the Hanthavara temple at this place is a curious *murtikal* with three projecting hands. Usually such stones have one or two projecting hands. A *murtikal* with three projecting hands is a rarity. An old Nolamba record has been discovered by the Archaeological Department in the field of Hanumanhalli.

Mattavara—A village in the Chikmagalur taluk. Po. Mattavara. population 1215.

The Laxmanatha basti at this place appears to be an old structure as an inscription recently discovered in the *sukhanasi* supplies the information that the basti was visited by the Hoysala king Vijayaditya in about the middle of the 11th century. To the north of the basti is a Siva temple with a ruined shrine to the north-east in which stands a fine figure of Bhairava about 1 foot high with its body split across by a stroke of lightning. It holds in the right lower hand an exquisitely carved sword about 1½ feet long across the body.

The Government plantation to the south west of the village is studded with a large number of cronlechs each measuring about 10 feet by 9 feet. The slabs used are 9 feet long and 8 feet broad and 10 inches thick. Most of the cronlechs have been opened and the slabs broken and removed for use in connection

with the Taluk office under construction at Chikmagalur. Some spears and pieces of pottery found in the cromlechs are said to be in the charge of the local Police. None of the cromlechs has the usual circle of rough boulders around though some were found to have small slabs fixed around in nearly a vertical position as at Bellandur, near Bangalore (g v)

Merti-gudda

Merti-gudda Merti-gudda, also called the Kalasa hill, is situated in the Bāle Honnur taluk, in $13^{\circ} 18' N$ lat, $75^{\circ} 26' E$ long. It is the loftiest peak between the Bābā Budan and Western Ghat ranges, the summit being 5,451 feet above the level of the sea. To the north it presents a majestic conical aspect. Towards the south-west it is connected with two lower heights and is so surrounded on all sides with high hills that its true elevation does not appear except at a distance.

Mr Bowring, who left few hills unscaled, says

“After a toilsome climb up its steep sides by the ‘windy gorge,’ one revels in a view which surpasses all expectation. On every side tower up hills of various shapes and sizes, stretching far away to the horizon, and presenting a wonderful spectacle of wild sublimity. The foot of the steep ridge which runs up to a sharp point forming the actual peak is called the Tural bagalu (entrance gate), and is in a gap between the Merti Parvat and another hill to the south. A very tough pull of twenty-five minutes takes one hence to the summit, the higher of two peaks, between which there is a dip.

“The top of Merti is quite bare, but its sides are clothed with fine forests in which are splendid specimens of the champaka trees, so much esteemed by natives for its fragrant white flowers, while one sees beneath, in secluded nooks and sheltered valleys, stretches of paddy land in successive layers, one below the other, and numerous gardens of areca-nut, which, in this remote corner, attains an excellence surpassing that of any other place where the fruit is grown. The sides of Merti, where the nature of the ground admits of it, are cultivated in a series of terraces, in which abundance of rice is grown, with a little coffee, this, however, does not succeed well, owing to the humidity of the climate.”

Mudigere—A taluk in the south Area 1312 square miles Head quarters at Mudigere Contains the following hohls villages and population —

No.	Hohl	Villages	Population
1	Banahal	5	8151
	Balur		144
2	Chimbid	11	1011
3	Kalasa	13	10446
4	Mudigere	75	141
Total		104	43643

No.	Place	Population	Total places with population
1	Balur	105	104
2	Mavinhere	436	
3	Banahal	1494	
4	Mudigere	110	
5	Kalasa	1147	
6	Mankhalli	101	

The taluk was formed in 1876 out of parts of Manjarabad Belur and Vastara taluks. In 1897 the Kalasa *magan* was transferred to Balc Honaur taluk and Bidarwad added from Chikmagalur. The taluk is Malnad and picturesque like all such country. The Hemavati has its source here and flows out at the south-east. The forests are not composed of such big trees as towards Lakavalli but the hollows are well wooded and the many hanging woods on the hill sides impart great beauty to the landscape. The principal productions are coffee, areca nut, cardamoms, rice and sugar cane the last in small quantity. The rice is dependent chiefly on springs in the hills from which water courses are led. Dry crops are of no account and do not generally thrive. Coffee cultivation is extensive and important and there are many estates under European superintendence. Tulu is much spoken by the labourers and others from South Kanara.

The nature of the Malnād country, its climate, the constitution of its society, and the character of its inhabitants all conspire to produce a sort of semi-independence. There are some descriptive lines to the following effect which convey the same idea

Hanneradu sāvira gudda Kād-ella sampige
Aru sāvira daiva Ur-ella heggade

Twelve thousand hills, six thousand demons in every forest, champaka, in every village, a Heggade (or local chief)

The hopeless inaccessibility of the country in past times, together with its natural fertility seem to have whetted the rapacity of the governing powers, and the following is given as a history of the revenue exactions. 'The *māganas* were more or less subject, first, to the Vuada or Vaiāha-shist of the Vijayanagar kingdom, then to the Rekha-shist of Sivappa-Nāyak, then to the additional imposts of other Ikkēri rulers, Pāllegārs, and Haider Ali, called Dasoha, Pagadi and Patti, or more generally Patti, then to the Paimāyish of Pūrnaiya and the increased assessment imposed by him under the name of Shistjāsti and Kāmke, and by the process of commuting the money-assessment of some of the best lands for a grain contribution for the use of the Rāja's Mōtikhāna, then to the impositions of over-zealous Amildars, mostly of this Minister's time, who, in villages rented in block to the Patels or other principal inhabitants, having found that these collected more than the Shist and Patti from the cultivators, carried this excess to account under the name of Benz-jāsti, then to the arbitrary exactions of the Amildar during the Rāja's time, to which the Sharti system then in vogue necessarily gave rise, and then to the enhancement caused, after the assumption of the country by the British Government, by the Amildars to whom the duty of converting Pūrnaiya's grain contribution into Suvarnadāya or money rent again was entrusted, and who settled the new money rates with reference to the Chadsālajama or the highest share that had ever been paid.

or with the aid of the more insidious Dhan gutta system which professing nominally to levy only the grain rent as a means of allaying the clamours of more suspicious raiyats levied a money rent in reality by compelling them to take the grain at an arbitrarily fixed price. Again as in other Malnad parts there was also the plan of compelling the raiyats to keep in their holding every field they may at different times have taken either of their own accord or in consequence of pressure used to induce them to take up the holdings of their deceased relatives or neighbours and to pay for these fields whether they were cultivated or waste. On the other hand generally as a compromise necessarily due from the above extremely rigorous method of management to the actual exigencies of the revenue it was customary to grant the concessions of the Shraya or Alave system or reductions in whole or in part under the name of Tavaguf or Baki of the Beriz justu or Patti and even of the shist on the ground of the general excessiveness of the combined assessment or of Saguvahinashita Kulanashta and Nis thalu which suppose so much waste rice land or supari garden or of Alate kammu and Hari mara which imply an actual deficiency either in the recorded extent of land or in the number of trees that should ordinarily be standing thereon in the supari gardens.

The revenue settlement based on a regular survey which put an end to all these irregularities was introduced in 1881 except in Gonibid *magan* which was settled in 1877 with Belur taluk.

The road from Chikmagalur to the Bund Ghat runs through the taluk from north east to south west by Mudigere with branches from Kotiguhar north to Bale Honnur and westwards to Kalasa. From Mudigere there are roads east to Belur south to Manjarabad and south west to Ugghalli. But the best road to Belur is from Anjur through Gonibid.

Mudigere—A town situated in 13° 8' N lat 75° 41' E long on the road from Chikmagalur to the Bund Ghat

Mudigere

19 miles south-west of Chikmagalur Head-quarters of the Mudigere taluk Population 1,278 It owes its importance to being the taluk station The road to Manajarābād also branches off here

Nandini

Nandini A stream that flows near Kigga It rises in the hill known as Narasibetta, about 5 miles from Kigga, along with two other streams named Nalinī and Sita, and joins the Tunga at Nemmai Sita flows in South Kanara The *utsava-vigraha* or metallic figure of gold bears an inscription on the pedestal dated 1678 stating that the image was presented to the temple by Gurubasavappa, an officer under Ikkēri queen Chennammāji, (1671-97) The village is of considerable antiquity as its name occurs in inscriptions of about the 7th century found in the temple (*EC VI*, Koppa 37-41) There appears to have been a *linga* here of the name Kilganēsvara at that early period

Narasimharajpur

Narasimharajpur (*formerly Yedehalli*)—The Head-quarters of a sub-taluk, 14 miles north-east of the *hasba*, on the Tarikere-Agumbi road Till 1882 it was the head-quarters of the Lakkavalli taluk, and then till 1897 the head-quarters of the Yedehalli sub-taluk attached to Koppa taluk It is a Regulation Municipality

Population in 1921	Males	Females	Total
Hindus	697	637	1,334
Muhammadans	334	272	606
Christians	18	9	27
Jains	22	8	30
Total	1,071	926	1,997

Yedehalli (the former name) is said to be so called because there was formerly a *Sivāchara matha* here, at which food (*yede*) was given every day to travellers The town consists of two portions, the fort and the *petta*, which are a considerable distance apart At the end of the 16th century,

it belonged to the Palegars of Tarikere, and afterwards fell into the hands of the Ikleri chiefs. It is the residence of several wealthy merchants. The name Narasimharajpur was given recently in commemoration of the visit of His Highness Sir Sri Kantirava Narasimharaja Wodeyar Bahadur G C I E Yuvaraja of Mysore to the place in 1915.

The town consists of a single street about a mile long running east to west. At the end locally known as Singannagadde are three *bastis* or Jain temples and a Jain *matha* all of which are tiled buildings. One of the *bastis* has Chandranatha a seated marble figure about 2½ feet high with an inscription of A D 1778 on the brass pedestals. Similar inscription but older in date were found on the pedestals of three metallic figures. This *basti* has likewise metallic figures of Sarasvati Candhara pada and Sruta the second has footprints on a roiled pillar like pedestal while the third is in the shape of a tree the *angas* being shown in lines below and *purtas* in seven branches on either side above. Sruta represents the sacred Jain scriptures. The Santisvara *basti* has a standing figure of that Jain about 4 feet high with an inscription in the Hoysala style characters on the *prabhavali* stating that the image was caused to be set up by a woman named Chandiyabbe, his disciple of Chiagiyabbe ganti of Uddire. The date of the inscription may be about A D 1500. The third *basti* has a figure about 1½ feet high of the Yakshi jvalimalini seated in the *lal tasana* (with 8 hands) the attributes in seven of them being a bow an arrow a noose a discus a trident a fish and a fruit the remaining hand being in the *varada* or boon conferring pose. A black buffalo is shown on the pedestal as the emblem of the goddess. The brass pedestal bears an inscription dated A D 1779. The town appears to have been improved by the Ikleri queen Chennammaji (1671-97) and Virammaji (1757-1763) the eastern portion was till recently known as Chennammappete and a tank close by this even now called Virammaykere. The western portion mostly consisting of Brahman houses is known as Agrahara. An officer under the Ikleri chiefs named Sugappa is said to have dug seven wells in different parts of the town for the use of the public. These are even now known by his name. A *matha* behind the travellers bungalow known as Sugappas *Matha*.

is also said to have been built by him for his *guru* Gurusānta-svāmī. This *Matha* is said to be affiliated to the Kōlāla Matha near Lal-Bagh, Bangalore

Sakkarepatna

Sakkarepatna --A village in the Kadur taluk, 11 miles south-west of the *kasba*, on the Kadur-Chikmagalur road. Population 1,303

A large weekly fair is held on Friday. At the car festival of Ranganātha, held in *Varsākha*, as many as 3,000 rams are sacrificed in honour of the god.

Tradition relates that it was in olden times the capital of Rukmāngada, a king mentioned in the *Mahābhārata*. Objects of interest in the town are the monument to Hon-billa, sacrificed for the stability of the Ayyankere, a great gun, and an immense slab of stone, about 12 feet square and several inches thick, supported on 4 pillars. This is called Vira Ballāla Chauki and is said to have been the royal seat of justice. During the time of the Vijayanagar kings, the town became a possession of the Aigur or Balam chiefs. It was next taken by the Nāyaks of Ikkēri. Srī Ranga Rāya, the fallen king of the Vijayanagar State, took refuge with the Ikkēri chief, who espoused his cause and established him in power at Sakkarepatna. But in 1690 it was taken by the Mysore army and retained by the treaty of 1694.

Santaveri

Santaveri A small village, principally composed of Lambānis, situated on the eastern face of the Bābā Budan mountains, just below Kāman-durga. It is on the Chikmagalur-Tarikere road, about midway between those two places. A road hence leads to Kalhatti on the summit of the mountains.

Simhagiri

Simhagiri, A village in the Srīngēri Taluk

The Vidyāsankara temple here has a fine *linga* forming the top of a cube of a blackstone which is carved on all the four faces with figures seated in niches. It faces east and has on the east or front face of the same a figure of Vidyātīrta seated palm over palm, the right hand showing also the *chūn-mudra*-po-3. Ill-

danda or staff stands to the right and there are two *sanyasis* his disciples at the sides. The figure rather emaciated is supposed to represent the *stupa* as engaged in *Lambiga Yoga*. The *prabha* of the niche has a figure of Lakshminarasimha at the top flanked by Sridevi and Bhudevi with the sun and moon at their sides. The south nicho has a fine figure of Brahma with a *prabha* the top of which is carved with the ten incarnations of Vishnu the first two in the shape of animals and the ninth as Buddha. The west contains a well executed image of Para Vasudeva canopied by the seven hoods of the snake forming his conch with four hands two hands holding a discus and a conch one hanging by the side and the other in the *chin mudra* pose and a *prabha* similar to that of Brahma. The north niche has a figure of Siva with five faces three in a row and one over the middle and the fifth being supposed to be on the back. The *prabha* in this case has figures of *ashtadikpalakas* or regents of the directions. The figures in niches are about 2½ feet high. Altogether the *linga* is an elegant piece of work. It is called the *Chaturmurtinadhyestora* (Isvara in the middle of four figures) in a newly discovered inscription of 1360 A D which records a grant for it. So the *linga* was in existence before 1830. There is an epigraph in front of the temple.

Sringeri—A *jagir* belonging to the chief *matha* of the Sringeri
Smarta Brahmans. It is administered in imitation of the Mysore revenue system and contains the following *hoblis* villages and population —

No	Hoblis	Villages	Population
1	Sringeri	12	5 740
	Melurajala	1	3 515
	Total	24	9 04

The *jagir* seems from an inscription at the place to have been granted as an endowment of the *matha* in 1346 A D by Hariyappa Wodeyar (or Harihara the first king of Vijayanagar) his four brothers—Kampanna Bukanna Marappa and Muddappa—son in law Ballappa Dannayaka and the latter's

son Sāvanna In an inscription of 1621, the Keladi king Venkatappa-Nāyak, who describes himself as grandson of Sadāsiva-Nāyak, claims to have re-established Srīngēri, from which it would appear that some interruption had occurred in the enjoyment of the *jāgīr*. It is about 8 miles long by 6 miles wide, and has the river Tunga running through it from south-west to north-east. The country is pure Malnād, and similar in character to the adjoining Koppa and Bāle-Honnur taluks.

A road from Koppa to Nemar runs through Srīngēri, where it is crossed by one from Bēgar to Bāle-Honnur. There is also a road from Srīngēri to Kīgga.

Srīngēri
(town)

Sringeri (Town) A sacred town on the left bank of the Tunga, situated in $13^{\circ} 25' N$ lat, $75^{\circ} 19' E$ long, in the Koppa taluk, 15 miles south-west of the *kasba*, and a municipality. Population 1,889.

It is the head-quarters of the Jagad-guru, the high priest of the Smārta Brāhmans, who is proprietor of the surrounding tract of country. *Sringeri*, *Sringa-giri* or *Rishya Sringa-giri* is related to have been the place where Vibhāndaka rishi performed penance, and where Rishya Sringa, a celebrated character of the *Rāmāyana*, was born. The latter, according to the narrative, grew up to man's estate without having ever seen a woman, when Lōmapāda, king of Anga, was advised that if the youthful recluse could be brought to his city and married to the princess Sānta, the drought which prevailed in his kingdom would be removed. In order to entice the young saint from his hermitage, a bevy of fair damsels was despatched. They are said to have made their fast at Nārve, a few miles from Srīngēri, before essaying the power of their charms. Allurements, which even the most wary can rarely withstand, soon worked their effect on the unsophisticated youth. His curiosity being strongly excited to see more of these beautiful and gentle creatures so new to him, he was led away and conveyed to Anga. He afterwards became the priest of Dasaratha Rāya, and performed the *asvamēdha* or horse sacrifice which resulted in the birth of Rāma.

In subsequent times the great Saiva reformer Sankaracharya settled here as directed by the image of Saradamma or Sarasvati which he had brought from Kashmir and founded the spiritual throne which has been occupied down to the present day by as apostolical a succession as the papal chair. The eighth century is now proved to be the period of Sankaracharya's religious conquests and revival of Siva worship. His opposition to the Buddhists and Jains, his destruction of their influence and his polemical victories in all parts of India are matters of history. The Sringeri Swami is a man of eminent learning and great sanctity. Sringeri is the chief of the four places where Sankaracharya established *mathas* or monasteries, the other places being Dvaraka in the west, Badari in the north and Jagannath in the east. The following table shows at a glance the distinctive characteristics of these *mathas*.

Designation	Sarala matha	Khika matha	Sri matha	Gövar matha
God	Var h	Siddha vara	Narayana	Yogan
Goddess	Sarala	Bladrak hi	Iarna gari	Vri lal
Convention (amrad va)	Uthirala	Kitya la	Nanda ala	Bl o al
Veda	Yaju	Sam	Ytharvana	Rik
Motto (mah v lyu)	Iha Bhah ra n	tat tu asv	atma Brahma	prajñā n Brahma
Sacred spot	Ramaksh tra	D raka Lal tra	B darik sr ma	Luru shittama Lal tra
Holy bathing place	Tunga bha tra	(öm ti	Alakanan dika	Mahāladhi
Character of the svami	Chaitanya Brahma ch ri	S arāpa Brahma ch ri	Ananda Brahma ch ri	I rak sa Brahma chari
Titles of the svami	Sarasvati I uri Bharati Aranya, Tirtha Ciri and Asrama.	Tirtha and Var ma.	Giri Aravata and Sagara	Ar nya and V na

Sankaracharya's claims to reverence are admitted by all votaries of Siva whether of the Smarta or any other communion.

The enormous sums obtained from the piety of his disciples during his tours in various parts are spent with a lavish hand in hospitality and works of charity. He is often away from his capital on such expeditions for several years.

Śringēri consists of a long street, with a loop on one side, encircling a small hill, Śringa-giri, on which stands a temple of Mallikārjuna. There are said to be 120 temples in the place, one being a Jain *baṣṭi*. Many Brāhman houses have a temple in the yard behind, of which the resident Brāhman is the officiating priest. At the head of the street is the *matha* of the *guru*, within which is the temple of Sārada-amma, whose image is said to be of pure gold. At the side of the *matha* is the temple of Vidyāsankara, an ornamental building of the Dravida-Hoysala style, on a raised terrace. Round the outer wall are sculptured images of various gods. At an angle on the right of the front entrance is a statue of Vyāsa, wearing a conical cap, the sacred thread and a *dhōtra*, his right hand in the position called *abhaya hasta*. He is imparting instruction to Sankarāchārya, whose statue through the indentation of the plan, is at right angles to him. Sankara has a palmyra leaf book in his left hand. These two figures, from being constantly anointed with oil, are quite black. Towards Vidyāranyapura, on the bank of the Tunga, is a small temple with an image of Sankarāchārya seated as a *yati*. This is where he is said to have disappeared from life.

Several large festivals occur during the year, the principal being the Navarātri. On these occasions all classes are not only fed at the expense of the *matha*, but cloths and bodices are distributed to the women, and pieces of money to the men. The fishes in the river are sacred and daily fed at certain pools. Besides Rs 50,000 a year, the revenue of Māgaṇi, the cultivation of which is rice and areca-nut, the religious establishment is supported by a grant of Rs 1,000 a month from the Mysore State.

There are over 30 inscriptions recording grants made by or under *gurus* of the Śringēri *matha*, ranging in date from 1392 to 1758 A.D. The Śringēri *dharma-piṭha* or religious throne was established, as mentioned above (see also Śringeri II dated in 1652), by Sankarāchārya, the great Saiva reformer of the 8th century. The celebrated scholar Mādhava or Vidyāraṇya

(forest of learning) author of the *Vedabhashya* who was instrumental in founding the Vijayanagar empire in 1336 was the head of the establishment at that time (See Sringeri 11) By his aid and advice Hakka and Bukka the first and third sons of Saugama succeeded in establishing the new State and Hakka the first king assumed the name of Harihara His capital which occupied a very ancient historical site on the Tungabhadra was named Vidyanagara (city of learning) after the minister but in course of time came to be called Vijayanagar (City of Victory) Vidyanarya's brother Sayana the well known commentator on the *Rigveda* became minister to Saugama the son of Kampa the latter being the second son of the progenitor Saugama and ruler of a territory he had acquired in the Nellore and Cuddapah Districts

In gratitude for Vidyanarya's services Harihara established the *matha* at Sringeri in 1346 (see Sringeri 11) and he and his brothers richly endowed it (Sringeri 1) He also at the same time founded the *agraras* of Sringeri and Vidyanaryapura which adjoin one another During the ascendancy of the Vijayanagar empire the religious establishment at Sringeri continued to flourish under the royal patronage But when the rule was overthrown by the victory of the confederacy of Muhammodon powers in 1565 and the Vijayanagar kings were driven to settle in more distant parts to the east the influence of the *matha* was weakened In fact the establishment seems to have been ruined and the lands which formed its endowments were appropriated by any one who could seize them

The state of things was eventually remedied by the Keladi kings who had come into power in the north west of Mysore under the protection of Sadusiva Raya the last king who had Vijayanagar for his capital In 1621 Venkatappa Nayaka re-established Sringeri (*punar pratishtheyam madida* see Sringeri 5) In 1652 on the representation of Sachchidananda Bharati the *guru* at that time who visited the king at the capital Bidarur that is Bidnur for the purpose Sivappa Nayaka to whom in 1646 the last representative of the Vijayanagar line had fled for refuge from Chandragiri and Chingloput on their being taken by the forces of Golkonda and who invaded Mysore on the plea of restoring him to power and gave him Belur and Sakkarapatna as an estate held an inquiry into

the matter, rescued the lands of the *matha* from those who had unlawfully got hold of them and restored them to its possession and enjoyment (Srīngēri 11, 13) The Keladi, that is the Bednūr, kingdom having been conquered by Haidar Ali in 1763 and absorbed into the Mysore territories, the Srīngēri *matha* has received the full support and countenance of the Mahārājas of Mysore, who, as above stated, make an annual grant for its support from the State

The head of the Srīngēri *matha* is styled the *Jagad-guru* or *guru* of the world, and is possessed of extensive authority and influence He wears on ceremonial occasions a tiara like the Pope's, covered with pearls and precious stones, said to have been given to him by one of the Pēshwas of Poona, and a handsome necklace of pearls, with an emerald centre piece His sandals, which as usual with those of holy men consist only of a wooden sole, with a single peg that is held between the big toe and the next, are covered with silver He is an ascetic and a celibate, and in diet very abstemious He is specially chosen by his predecessor for the office in boyhood, and trained for the purpose to the highest point in all Hindu learning On visiting any town he is borne along in an *udda pālki*, or palanquin carried crossways which prevents anything else passing, and is attended by an elephant and escort, and accompanied by a numerous body of Brāhmans and disciples Though his revenues are large, the expenses connected with the feeding of Brāhmans, and the distribution of food and clothing on festival days to all comers of both sexes, exceed the income, and the *guru* is constantly engaged in long and protracted tours through various parts for the purpose of receiving contributions from his disciples, and settling religious disputes

The full titles of the *gurus* as contained in numerous inscriptions run as follows — *Srīmat paramahansa-paritrā jakāchāryya-varīya* (chief āchāryya of the paramahansa or nyāsis), *pada-vākya-pramāna-paravāra-parina* (who has seen to the farthest point of grammar philosophy and logic), devoted to *yama nyama* and others, the eight branches of Yōga, establisher of the pure *Vaidik-advaita-siddhānta*, establisher of the six *darsanas*, disciple of the succession of *gurus* descended from the holy feet of Sankarāchārya, (or) disciple in regular succession

from Vidyaranaya swami. And the *gurus* are said to be seated on the Yoga throne or to be ruling the Yoga kingdom.

The following are the *gurus* mentioned in inscription with their dates —

	A D
Vidyātirtheya Bh ratī tirtha sripada V k I	1316-135
r nya srip d	
Narasimha Bh ratī	135 1406
It machandra Bh ratī	140
Sankara Bh ratī	} These may be different names of the same person
Chandra ekhara Bharati	
Lurushottara Bh ratī	1408-1416
Rāmachar tra Bh ratī	1418-1451
Narasimha Bh ratī	1513-154
Abhinava Nara simha Bh ratī	154
Sachidananda Bh ratī	1603-161
Narasimha Bh ratī	1619 166
Nara simha Bh ratī	1696
Nara simha Bh ratī	1708

This list though not agreeing in every particular is fairly in accord with the succession of *gurus* obtained from the *matha* as given in Vol I Chapter VIII *Religion* of this work.

A few of the more important inscriptions found in the *Jagir* are noted below.

In *Sringeri* 1 we have the record of the original endowments of the *matha* granted by Harihara and the other sons of Sangama and their relatives to Bharati tirtha sripada that is Vidyaranya or Vidyā tirtha. It is dated in *Saka* 1268 (A D 1316, and is thus one of the earliest Vijayanagar grants known. It professes to have been issued in celebration of the festival of Hanbharas victory over all the countries from the eastern to the western ocean. In *Koppa* 30 we have a grant made in 1378 by order of Vidyaranya sripada.

In *Sringeri* 29 of A D 1416 Pratapa Deva Raya is mentioned as in power as well as the *guru* of *Sringeri*. In *Sringeri* 5 of 1621 Keladi Venkatappa Nayaka is said to have re-established *Sringeri* and the swamis chief disciple repaired and endowed the temple of Mallikarjuna. *Sringeri* 11 and 13 of 1652 contain a summary of the history of the *matha* as regards its endowments and relate how they were restored by Keladi Sivappa Nayaka.

Most of the inscriptions relate to sale or transfer of lands and many of them are engraved in small Nagari characters although the language used is Kannada.

From inscriptions recently discovered we learn that in 1346 Harihara I, and in 1356 Bukka I, came to Srīngēn to pay homage to Vidyātīrtha, and made grants for the livelihood of his and his disciple Bhārati-tīrtha's attendants. From some letters addressed to the *svāmi* of the *matha* by Tipu, we learn that the place was raided by the Mahrattas under Parasurām Bhāo in 1791 and that the marauders not only plundered the *matha* of all its valuable property worth Rs 60 lakhs but also committed the sacrilege of displacing the image of the goddess Sārada. Adjoining the *matha* stands a substantial stone structure built in the modern style about 20 years ago which is called the new *matha*. The *svāmi* stays here for the Chāturmasya during the rainy season. At other times he lives in a building on the other side of the river free from the bustle of the village, and visits the temples of Vidyāsankara, Sārada, Janārdana, etc., on this side of the river every Friday. The building on the other side of the river, situated in the middle of a garden known as Narasimha-vana, is eminently fitted for a contemplative life. A good metallic figure of Sankarāchārya, about 1½ feet high, seated with the right hand in the *chinnudra* or (teaching) and the left hand in the *varada* (or boon conferring) pose, is worshipped here. A temple is built in the garden in memory of the late *svāmi*, Sachidānanda-sivābhīnava-Narasimha-Bhārati, who died in 1912, and a marble image of his set up. About 50 students are fed at the expense of the *matha* and taught literature, logic, grammar, philosophy, etc., by the *svāmi*, and other *pandits*.

A copper-plate inscription in possession of the *matha* records a grant by Harihara II in 1386 to three scholars named Nārāyana-vājapēya-yāji, Pandari-dikshita and Narahari Sōmayāji, who helped Sāyana in the composition of commentaries on the *Vēdas*. Mr Narasimhachar has suggested that these might be the progenitors of the three families, which receive special honours even now at this *matha*. From local enquiries it has been found that his surmise is correct. It is learnt that the houses of the first two scholars, named the first and the second houses, once stood on the site in front of the new *matha*, and that the descendants of these scholars along with those of Narahari-sōmayāji, whose house, named the third house, stood in some other part of the village, are even now the recipients of special honours in the *matha*. Further enquiry has elicited

the fact that there being no direct descendants now of the first scholar the honours of the first have been reaped. One Katti Shamal at a of Srirang has in his possession a copper plate inscription exactly similar to the one mentioned above. It is therefore to be presumed that each of the three families was given a copper grant.

There are more than 10 temples at Srirang including a Jain temple all of which are in the enjoyment of either royal or private grant. Most of them are tiled buildings situated in the courtyard of dwelling houses. A few are at some distance from the village. The most remarkable of these is the artificially built Vijayanagara temple which according to tradition was built in the Sala year 1600 the year Bahubharya (A.D. 1735) though it is a newly discovered inscription at Srirang which is sufficient reason to infer that it was erected some later than 1735. It is noteworthy both for its design and execution and is perhaps the most ornate structure in the Dravidian style in the whole of the State. Outwardly it exhibits a few features of building in the Hoysala style such as (1) a raised terrace about 3 feet high closely following the contour of the structure on which the temple stands and (2) rows of animals, putative scenes, and large images on the outer wall which have led Mr. Rice in the last edition of this work to suppose that it is a Hoysala structure (*Mysoore* II 40) see also *Journal of the Asiatic Society* VI 202) but a closer examination of the exterior and a look into the interior will clearly show that it is a Dravidian structure. With the close of the Hoysala rule the erection of temples in the Hoysala style seems to have come to an end seeing that no temple of that style dating in the 14th and subsequent centuries have been met with. The plan of the temple is unique it is apsidal at both ends. Even temples apsidal at one end are rare in India this feature being found only in a few Buddhist *stoupas* of the Mauryan period a few caves at Karle Ajanta Kanheri and Ellora and one Vishnu temple of about the 7th century at Hale in the Bijapur District. The present plan is somewhat similar to that of Trajan's basilica at Rome of A.D. 98 with apses at both the ends (See Fletcher's *History of Architecture* p. 139). The formation of the tower too is peculiar. The temple faces east and consists of a *garbhagrha* a *sukhonor* a *pradhana* or passage for circumambulation around both

and a *navaranga*. The last has three entrances on the east, north and south, as also the *pradakshina* but in the latter case the entrances face three niches on the outer walls of the *garbhagriha* containing good seated figures, about $2\frac{1}{2}$ feet high, of Brahma with Sarasvatī, on the south, and Lakshmi-nāīyana on the west and Umāmahēsvara on the north. All the six doorways have fine *dvānapālakas* on the jambs and figures of Gajalakshmi on the lintel and pediment. The outer walls have from the bottom friezes of 1 horses, 2 elephants, 3 lions, 4 *Purāṇic* scenes, etc., and 5 dwarfs, 2 to 5 each being surmounted by a projecting cornice, while a moulding of the same level comes between 1 and 2. The first frieze also shows a few camels here and there. The elephants are better executed than the horses. Above the frieze of the dwarf, comes a row of large figures surmounted by eaves in two tiers one over the other. The number of large figures is altogether 104. Their positions and details are as under.

From the *navaranga* east entrance to the *navaranga* south entrance 14 (1) Indra as the regent of the east with 4 hands, two of them holding a thunderbolt and a fish, the other two being in the *varada* and *abhaya* attitudes, (2) a male figure with four hands, the attributes in the three hands being a water vessel, a rosary with *chin-mudra* or the teaching pose, and something indistinct, the remaining hand being in the *varada* attitude, (3) ² Rāma with bow and arrow, (4) Vyāsa wearing a high cap and sacred thread with two hands, one of them placed on the waist and the other in the *chin-mudra* pose, (5) Śiva, (6) Bhairava, a nude figure with bare head, holding a staff and a cup, said to represent the Dandapāni variety, (7) a male figure with 4 hands, 2 of them holding the sacrificial vessels *Sruḥ* and *Sruva*, the other two being in the *varada* and *abhaya* attitudes, and with the emblem of a swan sculptured on the pedestal said to represent one of the 9 Prajāpatīs, (8) Durga seated on a lion, the right upper hand holding a trident, the left lower being in the *tarjani-mudra* or warning pose, (9) a male figure worshipping a *linga*, (10) the planet Saturn, a nude figure, holding a bow, an arrow and a trident in three hands, the remaining hand being in the *varada* attitude, (11) a male figure, holding in both the hands a *five-hooded snake* at both the ends, said to represent Mrityu, (12) a male figure with a trident, a drum and a sword in three hands, the remaining

hand being in the *tarada* attitude (13) a male figure holding a hook and what looks like an elephant goad (14) Yama as the regent of the south with a mace and a snake in two hands the others being in the *tarada* and *abha* attitudes and with two dogs cated at the sides

From the *nairang* south entrance to the *pradakshina* south entrance 15 to 30 (15) *Mrttyu* same as (11) 16 to 22 form one composition — (16) *Garuda* (22) *Hannuman* centre (18) *Lakshminara* imha canopied by even hooded snake and flanked by (19 20) *dvapalakas* left (17) *Brahma* with *Sarvati* and right (21) *Umanahvara* (23) *Dikshinamurti* flanked by two seated figures on either side (24 25) (28) a male figure with folded hands (29) to (33) form one composition — (29) and (33) figures giving *argya* or offerings of water to *Surya* in the centre (30) who is flanked by (31 32) *dvapalakas* *Surya* very peculiar represented as a seated female figure with four heads — 3 in a row and one over the middle head and 10 hands eight holding various attributes and two in the *tarada* and *abha* attitudes a single wheeled chariot being shown below (31) and (32) *Prajapati* same as (7)

From the *pradakshina* west entrance to the *pradakshina* south entrance — (36 50) — (36) to (42) *Prajapati* is same as (7) (43) *Kalki* the tenth avatar or incarnation of *Vishnu* seated on a horse and holding a sword (44) a figure of *Jina* for *Buddha* (45) *Venugopala* flanked by consorts (46) *Balarama* (47) to (49) *Rama Sita* and *Lakshmana* (50) *Parasurama*

From the *pradakshina* west entrance to the *pradakshina* north entrance 51 to 66 — (51) to (52) *Vamana* and *Bali* (53) to (56) standing *Narasimha* attacking *Hiranyakasipu* with *Lakshmi* and *Prabada* at the sides (57) *Varaha* standing with the goddess of the earth on the waist (58) to (59) *Kurma* and *Matsya* represented not in human form but as animals (60) *Hanhara* (61) represents *Siva's kalasam kara lila* — *Markandeya* being dragged with a noose by *Yama* embraces *linga* and *Siva* kicks and spears *Yama* (62) represents *Siva's Somashanda lila* — *Siva* standing with *Parvati* with child *Skanda* between them (63) *Ardhanarisvara* (64) represents *Siva's Tripura Samhara lila* — he shoots at the three celestial cities *Meru* serving as his bow *Vasuki* as his bowstring *Vishnu* as his arrow and *Brahma* as his charioteer (65) *Siva* (66) *Manmatha* or *Cupid* shooting arrows at *Siva* while engaged in meditation

From the *pradakshina* north entrance to the *navaranga* north entrance 67—89 —(67) Tāndavēsvara, (68-69) varieties of Bhairava, (70-74) Chandra flanked by two figures on either side, a *peculiar* seated figure with 10 hands 8 of which bear water vessels, two of these placed over the head—corresponds in position to Sūrya on the south wall, (75) Bhairava, (76) Gajāsūramardana, (77-81) Hayagrīva with two seated figures on either side, (82) to (88) forms one composition —

(Eighty-two) Annapūrṇa with a pot and a ladle, (88) Durga holding a discus and a conch in two hands, the other two being in the *varada* and *abhaya* attitudes, centre (84) Sarasvatī or Sāvitrī, bearing an elephant-goad and a noose in two hands, the other two being in the *varada* and *abhaya* attitudes, flanked by (85-86) *dvārapālakas*, left (83) Sarasvatī holding a rosary, a water vessel and a book in three hands, the remaining hand being in the *abhaya* attitude with *chin-mudra*, right (87) Gajalakṣmī, (89) Bhairava

From the *navaranga* north entrance, to the *navaranga* east entrance 90-104 —(90) Kubēra as the regent of the north with four hands, two of them holding a mace and a water vessel, the other two being in the *varada* and *abhaya* attitudes, (91-92) Bhadrakālī and Bhairava, (93) Bhṛngī, an emaciated figure with three legs, (94) Kālā Bhairava, a nude figure, (95) Vīrabhadra, (96) Śiva, (97) Śiva with Pārvatī at the sides, (98) Viṣṇu, (99-100) said to represent Vyāsa (see four above) and Sankarācārya, teacher and pupil, the latter looking like a youthful *sanyāsi* or ascetic with a book in his left hand, (101) a male figure with the left hand placed on the waist and the right hand in the *abhaya* attitude, (102) a male figure with the right hand on the breast the left holding what looks like a *vīṇa* or lute, (103) Ganapati with two hands, a rare figure (see para 15), (104) Subrahmanya

Above the row of large images, there are, besides, smaller figures representing Gandharvas, etc, and in the panels adjacent to the *dvārapālakas* at all the six entrances are carved two smaller images one above the other instead of one large figure. From the details given above it will be seen that the temple as far as it goes is a veritable museum of sculptures for the study of Hindu Iconography. The *purāṇic* frieze represents past scenes from the Śaiva-purāṇas. One panel represents Sankarācārya as teaching his four disciples (see previous para)

who are seated on either sides with books on *Vyasapithas* or stools placed in front. There are several other disciples further on both sides holding books in their hands. The frieze also contains representations of various kinds of *Yoga* postures and figures of sages seated on various animals such as tortoise the fish the lion the bear the antelope the scorpion the *makara* and the snake. The tower is a fine tall structure with an embankment in front as in *Kovala* temple; the front face of which has a fine figure of *Siva* carved on it. Chains of stone rings hang from the eaves at several corners of the temple. At every doorway there is a flight of steps leading into the interior.

The interior is not in any way inferior to the exterior of the temple. The *navaranga* is a grand hall supported by 12 sculptured pillars with lions and riders; the corner pillars having lions and riders on two faces; the whole pillar being carved out of a single block of stone. Many of the lions have balls of stones put into their mouths which must have been prepared when making the lions seeing that they can be moved about but cannot be taken out. Each pillar has sculptured on its back a sign of the zodiac such as the ram bull and so forth and it is stated that the pillars are so arranged that the rays of the sun fall on them in the order of the solar months; that is to say the rays of the sun fall on the pillar marked with the ram in the first solar month and so on with the others. Each pillar has likewise carved on it the particular planet or planets ruling over the particular *rasi* or zodiacal sign represented by it while the sun being the lord of all the *rasis* is sculptured on the top panel of all the pillars. The height of the *navaranga* is about 18 feet. The central ceiling about 8 feet square is an exquisite piece of workmanship with a panel about 4 feet square and 2 feet deep in the middle containing a beautiful lotus bud of 5 tiers of concentric petals at which four parrots are shown as pecking the four sides head downwards. In all the four directions between the capitals of the two central pillars opposite the entrances four panels measuring 6 feet by 2½ feet of elegant floral design are added on to the ceiling and above the lintels of these pillars stands a panel containing three figures between pilasters on all the sides. The stones used here are gigantic in size. The floor is paved with slabs measuring 9 feet by 4 feet the central one being 9 feet square.

To the right in the *navaranga* are kept several metallic figures, marble *lingas*, etc., among which the images of Nambinārāyana, Tāndavēsvara and Śrīnivāsa show a very good work. A figure of Viṣṇu holding the discus and conch to the front in the lower hands is known among the Śrī-Vaiṣṇavas as Nambinārāyana. Tāndavēsvara with its ring of fire and with Ganga seated with folded hands on the *jata* or matted hair to the right is not in any way inferior either in movement or elegance of execution to the Natarājas of Ceylon and Madras. The *pradakṣhina* separates the *navaranga* from the *sukhanasi*. At the sides of the latter are two small shrines containing figures of Ganapati and Mahishāsūramardini. In the Ganapati shrine is also kept a small steel figure of the planet Saturn which is always immersed in oil, vows are made to it and it is only on occasions of special worship that it is brought out to the *navaranga* and bathed in oil. It is believed that nothing pleases this planet so much as oil bath. In the *sukhanasi* is kept a metallic figure of Harihara, which is the *utsava-vigraha* or image taken out in procession of the temple. There is also kept here a mutilated figure (wooden) of Sarasvatī which is said to be very old. Tradition has it that during a Muhammadan incursion of former times this image was decorated with jewels and placed in front of the walled-up *garbhagriha* of the Śārada temple, that the raiders, after taking possession of all the jewels, mutilated the figure and threw it into the river, and that it was afterwards recovered and kept in the temple. These vicissitudes have not deprived the image of regular worship. The *linga* in the *garbhagriha* is called *Vidyāsankara*. It was set up in memory of the great guru Vidyātīrtha who, as mentioned above, is said to have engaged himself in a kind of meditation called *Lambika-Yōga* and departed this life. Vidyātīrtha's is perhaps the greatest name in the list of the *svāmīs* of the Srīngēri matha. We know scarcely anything about his predecessors on the spiritual throne at Srīngēri. He appears to have procured a status for the matha and his sanctity and learning were so great that he was specially honoured and revered by the early Vijayanagar kings Harihara I and Bukka II.

It is likely that he helped the royal brothers in founding the Vijayanagar kingdom, though his disciple Vidyāranya is generally believed to have done so. The latter may have

continued the policy of his *guru* and strengthened the foundation. Images of Vidyatirtha set up soon after his death are being worshipped even now. Two such images are found at Simhagiri and Vidyaramayapura. Built of hard granite the Vidyasaunkara temple shows elegant workmanship both in the interior and the exterior. It is a worthy memorial of the great Vidyatirtha. From an inscription found at Sringeri the consecration of the temple appears to have taken place soon after 1306 under the supervision of Bharatitirtha disciple of Vidyatirtha who granted 120 *Varitas* to various Brahmins on the occasion.

The newly restored Sarada temple situated to the north of the Vidyasaunkara is a fine structure in the Dravidian style consisting of a *garbhagrha* a *sukhanasi* a *nataranga* and a *prakara* or enclosure. It faces east and has three entrances on the north south and east the east entrance which is the main entrance having two open *mantapas* at the sides inside. The *nataranga* is an open hall with two rows of four pillars at the side all the pillars except two being carved with large female figures in relief in front. Of the latter two are *diara pulakas* and two more facing each other Mahishasuramardini and Rajarajesvari. The figures are well carved and a Gandharva female figure above Rajarajesvari is especially so. The temple bears testimony to the artistic skill of the present day sculptors of Southern India who were employed in building and ornamenting it. It has two metallic images of Sarada and Sarasvati one slightly larger than the other about 3 feet and 24 feet high respectively there being no stone image of the goddess. They are equally old dating back to the time of Vidyatirtha who is said to have set up the larger image on the spot where a mystical diagram (*yantra*) has been previously fixed by Sankaracharya and the smaller one at its side. The existence of two images is accounted for by the statement that Vidyatirtha not being satisfied with the size of the smaller image which was first prepared has the large one made under his own supervision. Both the images are worshipped. They are seated with four hands the attributes in three of them being a rosary a vessel of nectar and a book while the remaining hand is in the *abhaya* attitude with *chin mudra*. These attributes appear to be peculiar to the image of Sarasvati of Sringeri seeing that a noose and an elephant goad invariably form two of the attributes of this goddess elsewhere. For the purposes of processions during the

festivals there are two smaller images—one, a fine figure of silver, about one foot high, and the other, a standing bronze figure, about two feet high. Both have the same attributes as the larger figures. The silver image is used on all occasions when *āgamic* rites are performed. It is also sometimes taken out with the *svāmi* when he goes on tour. The other image is used during festivals like Navarātri, etc. For the car festival both are used. From some letters addressed to the *svāmi* of the *matha* by Tipu, referred to above, we learn that during a raid of the Mahrattas under Parasurām Bhāo in 1791, the larger image was displaced and that Tipu helped the *matha* by ordering the grant of the requisite money and things for the re-consecration of the image. At some distance in front of the temple, but a little to the south, is a lofty *dīpastambha* or lamp-pillar, about 35 feet high, with a male figure with folded hands, on the south face. The figure is wrongly supposed by the people to represent Buddha.

We may now notice briefly a few other temples in the village and its environs. To the north of the Vidyāsankara is a small temple dedicated to Janārdana, a form of Vishnu. This temple was in existence before 1386, as a copper-grant issued by Harihara II in that year records a grant to it. At the sides of the *navaranga* entrance are two shrines, the one to the right having a figure of Hanumān and the other a figure of Garuda. Janārdana is a good figure, about 4 feet high, to the right of the *navaranga* is a niche containing a stone figure of Sankarāchārya about 1½ feet high, with the hands in the *abhaya* and *chinnudra* attitudes, his four disciples being shown on the pedestal.

The staff (*danda*) and water vessel (*kamandala*) are also sculptured at the sides. The figure has a fine copper *prabhāvali*, the middle portion of which is occupied by a figure of Vēnugōpāla flanked by consorts and the top by representations of the ten incarnations of Vishnu. Leaning against the south outer wall of the temple is the inscription stone containing *EC VI*, Srīngēri, 1, of 1346, at the top of which are small figures of Brāhma and Vyāsa with labels giving their names. This peculiarity is also observed on another inscription stone newly discovered near a shrine at some distance to the north of the Janārdana temple. The meaning of the symbolism is not quite apparent. The former epigraph records a grant to Bhārati-tīrtha and the latter dated 1356, a grant to his *guru* Vidyā-tīrtha. Are the *guru* and the disciple identified with Brahma

and Vyasa ! It may also be stated that in the *Guru parampara* or list of *gurus* 10 names precede that of Sankaracharya of which the third is Brahma and the seventh Vyasa To the north of Janardana temple is a shrine containing figures of Sanuti Ganapati and Vaglavari the former about 1½ feet high is in a niche with his consort seated on the top while the latter is in a cell These two are stated to have been favourite deities of Vidyananya

To the west of the Vidyananya and these temples are 12 shrines known as Samadhi gudi or tomb temples mostly built on the tombs of former *swamis* of the *matha* with a *linga* in each On the site of the first and the second houses in front of the new *matha* (see para 16) are now built two small temples one of them containing figures of Ramo Lakshmana Sita and Hanuman and the other a figure known as Moleyala Brahma Though the temples are new the figures in them are old Ramo Lakshmano and Sita are old in one panel encircled by a *prabhavali* while Hanuman stands apart They are all good figures each about three feet high There is however a curious story about the figure in the other temple It is a fairly stout figure about 1½ feet high wearing sandals and holding a mace in the right hand the other hand hanging by the side Moleyala Brahma was a Brahmarakshasa or evil spirit whom Vidyananya brought with a promise that he would feed him to his heart's content Without propitiating him no entertainment or feast could be organised or successfully carried out at Sringeri Even the oil or the ghee intended for preparing eatables refused to boil It appears that till recently there was a family of Sringeri one of the members of which used to become possessed by this spirit every year In the unpropitious times however the spirit has become perfectly harmless But he is being worshipped all the same

The Horihara temple has a figure about 3½ feet high of the god with 4 hands—the right upper holding a trident the right lower a rosary with the *abhaya* pose the left upper a discus and the left lower a conch flanked by Lakshmi and Parvati Nandi and Garuda being shown on the pedestal This temple was in existence before 1608 as in that year *EC VI Sringeri* 8 registers a grant to it The god in the Sankaranarayana temple about 1½ feet high has however a drum with an axe in the right hand and a discus in the left upper the left lower being in the *abhaya* attitude

The *Maṣlāra* temple has a figure of the god about 1 foot high, seated with his consort to the left, both holding the same attributes, viz, a drum, a trident, a sword and a cup. The pedestal has sculptured on it three heads, probably of demons killed by the god. There is also a standing figure, about 1 foot high, of Durga with the same attributes and a necklace of skulls in addition.

The *Honne* temple, so called because it was built by a merchant of the Kōmatu caste named Honnana Setti, is a good structure, with a *linga* called Visvēsvara. At the sides of the *navaranga* entrance, are figures of Bhairava and Virabhadra in addition to the *dvārapālakas*. From *EC* VI, Srīngēri, 9 we learn that the temple came into existence in 1652. The Nīlakantha temple was, according to Srīngēri 7, built by Rājagōpāla Bhatta in 1695. Mallikārjuna temple, so called because it stands on a small hill (betta), Srīngēri, which gave its name to the whole village, is a large Dravidian structure facing east. A flight of about one hundred steps leads to the top. The *navaranga* has four sculptured pillars supporting a ceiling with a good lotus bud. Among the sculptures on the pillars may be mentioned a seated figure of Chandra with 10 hands, similar to the one on the north outer wall of the Vidyāsankara temple. The *linga* of the temple is identified with Vibhāṇḍaka, father of Rishyasringa. In the *prākāra* is a shrine containing a figure of Bindumādhava, a form of Viṣṇu, flanked by consorts. The pedestal shows Lakṣmī with Garuda and Hanumān at the sides. On a pillar which looks like a *dīpastambha* is a crude figure of Gaṇapati, known as Kambha-Gaṇapati, which is said to have been drawn by Abhinava-Narasimha-Bhārati, a *svāmī* of the *matha* (1599-1622), with a piece of turmeric. The sound of the pillar on the back is heard above and below the figure, but hollow in the middle where the figure is. This circumstance is looked upon as a miracle. It is also stated that the outline of the figure, which was quite obscure once, is now becoming clearer and clearer, year after year. *Srīngēri* 1, as revised, records a grant for this god in 1685 by Siddammāji, daughter of the Ikkēri chief Sivappa-Nāyaka. The Mallikārjuna temple appears to be an old one, though there is no means of determining its exact period. From *Srīngēri* 5, we learn that the temple was repaired in 1621, by Puttappaṇṇa, a disciple of the above Abhinava-Narasimha-Bhārati. A few modern inscriptions were found on the temple vessels. A new

Hyderabad Several of them recognise the full powers of the *svāmi* to order enquiries into the conduct of the disciples and to punish the delinquents, and call upon local officers to afford all facilities to the representatives of the *matha* in carrying on this work. Special interest, however, attaches to the letters addressed to the *svāmis* of the *matha* by Haidar and Tipu. They are couched in respectful language and breathe a spirit of reverence for the holy personages, though of an alien faith. Haidar requests the *svāmi* to pay a visit to Pēshwa Raghunātha Rao, makes suitable arrangements for the journey and sends Rs 10,500 for expenses. Tipu entreats the *svāmi* in several letters to have certain Hindu rites performed in the prescribed manner at his expense for the success of his warriors against his three sets of enemies, *i e*, the English, the Mahrattas, the Nizam, and requests him to pray to god for his welfare and to send him his benedictions. Nor do the father and the son forget to send occasionally valuable cloths for the goddess Sārada and the shawls for the *svāmi*. It is also recorded that Tipu sent a silver palanquin and a pair of silver *chauris* for the Sārada temple. A few more of these records are of social interest being addressed to local officers telling them that the Markas should be warned against adopting the customs and observances of the Brāhmins, that the Dēvāngas should not be permitted to wear the sacred thread, that no interest higher than 12 per cent per annum should be made over to the charge of the *matha* and that unclaimed property within certain limits should go to the *matha*. There are, moreover, in the *matha*, several cart-loads of *kaditas* nearly 200 years old, stored in two or three big rooms. A *kadita* is cloth covered with charcoal paste, folded in the form of book and written with a pencil of potstone. Most of the *kaditas* contain the accounts of the *matha*, while a few that have been closely examined show that they contain copies of stone and copper-plate inscriptions and several matters of importance relating to the *matha* and its *svāmis*. A copy of a copper-grant of some historical value said to consist of 7 plates has been transferred by the Archæological Department. A list of the *svāmis* of the *matha*, with a few dates here and there, is also contained in one of these *kaditas*. With regard to some of the *svāmis*, we learn that Bhārati-Krishna-Tirtha, Narasimha-Bhārati and another Narasimha Bhārati died in 1374, 1402 and 1602, respectively; that Rāmachandra Bhārati and

Narasimha Bharati were installed respectively in 1517 and 1518 and Puru hottama Bharati a period was 1440 to 1450 and that there was Vidyaranya in 1515 during Krishna Raja Raya's time. These dates do not agree with those given in the printed list and the last is a new one not found in it. With regard to Sachchidananda Bharati we are told that on his falling ill in 1439 a letter was written to the Ikkeri chief Basappa Nayaka II (1431-51) informing him of the illness of the arami and asking him to arrange for a suitable successor. A careful examination of these *Adittas* is likely to reveal several interesting facts with regard to the history of the *mathas*. The authorities of the *matha* have on hand a comprehensive work dealing with the documents in their possession.

The jewels of the goddess Narada are of great value made with solid gold and set with diamond, emeralds, rubies and other precious stones. There are also numerous pearl necklaces, beads with and without pendants, set with precious stones. Besides these are very many valuable articles a few of which deserve mention —

Figures of Venugopala and Srinivasa both flanked by consorts and made of rubies. Sandi made of a single pearl, an emerald *mantapa* with a golden *linga* inside, a gold *pancha patre* or drinking vessel of a cylindrical form set with diamonds, a gold *uldarne* or spoon set with rubies, the hollow part consists of a big ruby which has been scooped out, a gold mask of the Chaudramauleswari *linga* set with rubies and diamonds, a couch winding to the right set with diamonds, and a large gold *mantapa* of fine workmanship said to have been presented by a former Maharaja of Travancore. There are besides several vessels made of solid gold, to say nothing of silver *mantapas*, *prabhavalas*, lamp-stands, pitchers and so forth. The Mahratta raid of 1791 during which the *matha* was despoiled of valuables worth 60 lakhs, probably accounts for the fact that no jewels or other valuables older than the time of Krishna Raja Wodeyar III are forthcoming with the single exception of the ruby of Venugopala which is an old possession of the *matha* being referred to in records dated 1700, 1759 and 1822 and which must somehow have escaped the notice of the wicked marauder.

A letter dated 1867 of Krishna Raja Wodeyar III giving suggestions for the proper management of the *matha* refers to the gifts made by his predecessor Kanthirava Narasa Raja Wodeyar (1638-59) and ends with a request that particular care

may be taken of them It is very probable that the ruby Vēnugōpāla was one of these

Two necklaces known as *Puttalar Saras* of the goddess Sārada, consisting of various gold coins numbering in all 124 are worthy of note Of the coins in the possession of the agent, 13 were gold and 9 were silver Of the former, 9 were found to be mohurs of the Moghul Emperors, 1 a mohur of Hyderabad, 2 a mohur and a half mohur of the East India Company, and 1 a coin of some Northern Indian State, judging from its Nāgarī legend Vikrama-Sahdēva, and of the latter, 4 were found to be coins of the East India Company, 2 of Mysore, one of Northern Indian State, being similar to the gold coin noticed above, 1 a yen of China and one a coin of Russia of 1780, judging from the double-headed eagle on the reverse These 124 coins consist of 3 mohurs of the Moghul emperors, 1 mohur and 1 half mohur of the East India Company, 114 Venetian ducats and 5 coins ranging in date from 1715 to 1849, probably of Belgium

The library of the *matha* consists of about 500 palm leaf manuscripts and a large number of printed books The manuscripts and books are kept neatly arranged in glass almirahs The manuscripts appear to contain a good number of unpublished works A brief and cursory examination of these manuscripts has brought to light several unpublished works in the form of poems, biographies, philosophical, religious and grammatical treatises, and commentaries Of these may be mentioned the poems *Rāmanīyarāghava* and *Sādhanakāvya*, the biographies *Purushōttama-bhārati-charita* and *Rāmachandra-mahōdhaya*, the philosophical and grammatical treatises *Vardīkarnnaya* and *Prākṛayakaumudī*, and the commentaries on Surēśvara's *Vārtika*, the *Mahābhārata*, the *Raghuvamsa*, the *Sisupālavadha*, and the *Sāstradīpika* Most of the manuscripts are written in Nāgarī characters The collection as a whole awaits closer examination at the hands of the specialists

Tanikodu. A village in the Srīngēri Taluk It has a small Sankaranārāyana temple The god is about 2½ feet high, has a conch and a mace in the left hands and an axe and a rosary in the right upper, the right lower being in the *abhaya* attitude Nandi and Garuda are carved on the pedestal

This taluk is partly hilly and partly plain the soil and climate being as varied as the configuration. Along the north are the Ubraim hills which throw out short spurs into the plains. These were at one time covered with thick bamboo jungle. Around Ajjampur and up to the eastern border black cotton soil prevails on which fine crops of wheat cotton Bengal gram Great millet etc. are raised. All this portion of the taluk is perfectly bare of trees and there is a good deal of saline efflorescence. In other portions red sandy and gravelly soils are found on which ragi and

different kinds of pulse are cultivated The western portions of the taluk are semi-Malnād

A portion of the Bābā Budan range enters the taluk in the south-west, the slopes of which are covered with heavy forest, partially cleared for coffee plantations Fine iron ore is much worked in the Ubrani hills and those at Lingadahalli at the foot of the Bābā Budans In the hills near Ajjampur very extensive old gold workings have been discovered, and gold-mining has been revived under European superintendence by the Kadur-Mysore Company

During the period of the Hoysala sovereignty, the greater part of the taluk appears to have formed a principality, whose chief seat was at Kātur, a village near Tarikere It was subsequently subdued by the Muhammadan forces which took Dōrasamudra in the first part of the 14th century, but the line of chiefs seems to have been restored to power under the Vijayanagar sovereigns After the fall of Vijayanagar, the Pālegārs of Basavapatna, being driven south by the invasions of the Bijapur army, gained possession of the country and founded Tarikere, from which they subsequently took their name The territory eventually became subject to the Mughal government established at Sira, and so passed into the possession of Haidar Ali in 1761, and became a part of Mysore

The revenue settlement was introduced in 1877, and the resettlement in 1917-18. The area of the taluk at that time was distributed as follows

Dry	123,230 }	136,332 acres
Wet	8,785 }	
Garden	4,317 }	
Unoccupied area		22,369 acres
Kharab land	..	178,884 ..
Inam		2,650 ..

The Bangalore-Poona Railway runs near the south-east boundary, with stations at Ajjampur and Shivam A branch from Birūr runs through Tarikere to Shimoga

The Bangalore Shimoga road runs through Tarikere whence there are roads west through Lakkavalli to the Agumhi Ghat east through Ajjampur to Ho durga and south along the eastern face of the Baba Budans to Santaveri and Chikmagalur as well as over the summit near Kalhatti. From Lingadahalli there is a road to Birur railway station and from Santaveri a short road to Kalhatti bungalow and the summit of the mountains.

Tarikere (Town)—A town situated in 13° 12' N lat 75° 52' E long on the Birur Shimoga Railway and the Bangalore-Shimoga road 35 miles north of Chikmagalur Headquarters of the Tarikere taluk and a municipality. Nearest railway station for Baba Budangiri and Sringeri.

Tarikere
(Town)

Population in 1911	Males	Females	Total
Hindus	338	2031	2369
Muhammadians	86	59	145
Jains	25	7	32
Christians	26	41	67
Animists	4	15	19
Total	489	2153	2642

Tarikere appears to have had its origin in the town of Katur to the north west founded at the end of the 12th century by one of the Hoysala kings in obedience to the commands of the goddess Renuka paramesvari who appeared to him in a vision. The town and neighbouring territory were bestowed in 1181 A.D. on a chief named Kanchada arasu. A descendant of his named Kama Chakresvara Raya fortified Kamandurga on the Baba Budans. The territory was afterwards subdued by Bukka Raya of Vijayanagar and given to one of his Danayaks or generals. The latter was

maintenance allowance. The representative of the House took a leading part in the disturbances of 1830. His son continued at large, creating disturbances till 1831 when he was seized and hanged.

At the entrance to Purnava chattram in the town are 4 pillars belonging to a temple and figures of two lions at the sides. The latter are well carved and are said to have once adorned the gate of the Tarikere Lalgar's palace in the fort which is no longer in existence. The lions have a relief of the parvatesing on a man who is holding a sword. The Lalgar's palace in the town is an old dilapidated structure which it is stated was sold by public auction one year ago to one Bahadur in Bangalore. It has a tiled porch with a well carved wooden door way and a fine old fashioned wooden screen on the upper floor. At Halepur a village about 2 mile from Tarikere is a ruined Kalya temple. The image of this temple appears to have been removed to Tarikere and set up in a small shrine newly built near the tank. From one of the newly found inscriptions at Halepur we learn that Tarikere otherwise called Amaravativpura was an *agraraj* brought into existence by Lakumara a *danavanaka* a general of Ballala II (1173-1200) before 1180 the year in which the image of Kalya was set up at Halepur.

Tippanakoppa — A village in the Sringeri taluk

Tippana
koppa

In a field at Tippanakoppa is a curious *musthal* (*mahatikal*) i.e. a memorial of a woman who immolated herself on the funeral pyre of her husband in three panels. The top panel has a fine *ajalikshmi* the middle one a female figure in the centre flanked by two female figures on either side and the lower one has in the centre a man borne in a palanquin by four men two on either side at the right end a warrior armed with a sword and a shield and to the left a woman seated on a throne with a female *chauri* bearer to her right. The man in the palanquin is apparently a king and the woman on the throne his queen who became a *sati* on his death such *musthals* appear to be peculiar to these parts. A new inscription was found at each of the villages Talakodu Haravari Hechehe and Harike. Another at Rudrapada dated 1602 states that the

Rāmēśvara *linga* there was set up by Narasimha Bhārati Sachchidānandapura is so called because it was founded as an *agrahāra* by Sachchidānanda. It is stated that Vaikunthapura was once known as Kuntapura (lame town) and that by paying *kāṇike* or a contribution to the *matha* the residents got it changed into the present form

Tunga

Tunga A river which rises in the same spot as the sister stream of the Bhadra, namely, at Gangāmūla in the Varāha peak of the Western Ghats, in the south-western angle of the Koppa taluk. Its general course is north-east, but at Baggunji it turns to the north-west and keeps that direction to near Tirthahalli. Thence, with a sudden bend to the north-east, it takes its course past the town of Shimoga, and flows on to the point of confluence with the Bhadra at Kūdalī, from which point commences the united stream of the Tungabhadra

Uppavalli

Uppavalli A village in the Chikmagalur Taluk Population 314

Judging from the inscriptions the place appears to have been of some importance at one time, the oldest record in the village being a Ganga inscription dated 959. In and around the village are lying scattered well carved but mutilated figures of Bhairava, Subrahmanya and Ganapati, Mahishāsūramardini, Saptamātrika and so forth. *Chikmagalur* 38, a *vīrgal* of the early part of the 11th century at the place, is noteworthy for the simplicity of its sculptures, having only a standing figure of a man armed with bow and arrow at the top. One of the new inscriptions was found on the pedestal of a figure of Mahishāsūramardini, known as Bāḡilu-Māramma or Māramma of the gate, which must have replaced a former figure of Ganapati as evidenced by the inscription and the symbol of the rat

Vastāra

Vastāra A village in Chikmagalur taluk, on the Chikmagalur-Mudigere road, 6 miles south-west of the *lasba*. Till 1875 it was the head-quarters of a taluk named after itself. Population 638.

It is situated at the entrance to the Mulund country. The name is said to be a corruption of *vasu-dara* land bestowed that is as an endowment. The foundation of the town is due to a Santarisa one of the Humcha kings and it was subsequently held by their descendants, the Panyda rulers of Sisugah and the Burirasa Wodeyirs of Karkula. The chiefs of Bilum and of Ikheri in turn possessed it. Though taken by the Mysore army in 1690 it was one of the places restored to Ikheri by the treaty of 1691. The conquest of Bednur by Haider Ali in 1763 annexed it to Mysore.

Two very old stones here registered as *Chikmogalur* 92 and 93 (*E C VI Kadur District*) and engraved on a stone near the Padmavati temple may be noted. The first of them states that the sole ruler (or *alarum*) Sundari gave the Sundari Charetti free of all imposts to Maravarma Swami of the Bharadvaja Gotra. The second consists principally of imprecations. Mr Rice assigns these inscriptions to about the middle of the 8th century A D.

Mr Lewin Bowring in his *Eastern Experiences* notes —

About twenty five years ago a successful attempt to grow coffee was made in Vastiri not far from the Baba Budan hill by Mr Cannon who gradually extended his operations and is said to have realised a large fortune. His example was soon followed by others and as Manjarabad having fine forests and a good climate appeared well suited for planting operations a great many European gentlemen settled there and obtained grants of lands for coffee cultivation.

Vedavati or Hagari — A river which after a lengthened course principally through the Chitaldrug District flows into the Tungabhadra in the Bellary District. It is formed by the union of two streams the *Vida* and the *Atati* which spring from the eastern side of the Baba Budan mountains. The immediate source of the *Vēdn* is the Gauri halla which rising near Mulainagiri flows eastwards and is embanked at a gorge near Sakunagiri expanding into the Ayyankere. The stream on leaving this tank takes the name of the *Vida* and skirting the town of Sakkarapatna flows north east

V. davati
or Hagari

to Kadur The Avatī also rises near Mulainagūrī, and after forming the Madaga tank, continues east to Kadur The two streams unite at Tanglī, 3 miles south-east of Kadur, and form the Vēdāvati, which shortly enters the Chitaldrug District.

Vidyāaranya-
pura

Vidyaranya-pura A village in the Srīngēri Jāgīr about a mile from Srīngēri Population 617 This is so called because it was granted as an *agrahāra* by the Vijayanagar king Harihara II in memory of Vidyāaranya on his death in 1386 A portion of the village is said to represent Vasisthāsrama where Vidyātīrtha (para 18) is said to have performed penance Here the river Tunga is Paschima-vāhīnī, *i e*, flows towards the west, the only place where it is said to flow thus and forming therefore a spot of peculiar sanctity The village has several temples with tiled roofs We learn from *Srīngēri* 10, that the Vighnēsvara or Ganapati temple here was built in 1547 by Purōhita Narasimhabhatta The Vidyāsankara temple has a seated figure, about 2 feet high, of Vidyātīrtha with the right hand holding a rosary in the *chin-mudra* or teaching pose The stone temple of Sadāsiva was built in 1657 by the Ikkēri chief Sivappa-Nāyaka.

SHIMOGA DISTRICT

SECTION I—DISCRIPTIVE

SITUATION AREA AND BOUNDARIES

A District in the north west situated between $13^{\circ} 27'$ and $14^{\circ} 39'$ north latitude and between $74^{\circ} 38'$ and $76^{\circ} 1'$ east longitude Its greatest length is 95 miles from east to west From north to south the longest line is 80 miles Situation

Its area is computed at 1030 square miles of which 1171 square miles are under cultivation 198 square miles are culturable waste and the remaining 2661 square miles are forests and unculturable waste Area

It is bounded on the east and south by the Chitaldrug and Kadur Districts respectively on the north by Dharwar and on the north west by North Kanara both belonging to the Bombay Presidency and on the west by South Kanara of the Madras Presidency Boundaries

PHYSICAL ASPECTS

A line drawn from Talguppa to Anantapur and thence to the Ghats through Masarur and Kavaledurga with one from this last point to Kodachadri Parvata would nearly correspond with the water sheds which separate the main lines of drainage All the streams to the south east and north of the line flow to the Tungabhadra those on the west to the Sharavati and those on the south west to the Gargita The main part of the District therefore consists of the western slopes of the upper Tungabhadra valley Rocks

The Tunga-
bhadrā

This river is formed by the union, at Kudal, of the Tunga and the Bhadrā, of which the former runs most of its course within this District, in a north-easterly direction. From the point of confluence of the united streams, the river runs north to the frontier, which it follows north-eastwards to beyond Harihara, receiving on the left bank the Chorade and on the right the Haridra. Thence, leaving Mysore, it runs north, separating Madras from Bombay until joined on the left by the Varada, when again turning north-east, it marks the boundary between Madras and the Nizam's dominions, and receiving on the right the Hagari or Vedāvati, flows past Hampe, the site of the ancient cities of Kishkindha, Anegundi and Vijayanagar, into the Krishna beyond Kurnul.

The Sharāvati rises near Kavaledurga and, uniting with the Haridāvati on the right, pursues a north-west course to the frontier. Thence turning west, it hurls itself down the Ghats by the Jog or far-famed Falls of Gersoppa, a sheer descent of over 900 feet, and runs into the sea at Honavar (Honore).

The streams rising between Kodachādrī Parvata and Kavaledurga flow west or south-west into the sea at Kundapur, the principal one being the Gargita, which descends to South Kanara from the head of the Haidar Ghar Ghat.

The western side of the District, resting upon the Ghats, is very mountainous and covered with magnificent forest, the highest point being the Kodachādrī Parvata, a fine peak situated 10 miles north-west of Nagar. Its elevation is 4,411 feet above the level of the sea. Govardhangiri in Sagar, and Chandragutti in Sorab, are also conspicuous hills, the height of the latter being 2,794 feet.

The interior of the District is crossed at the central watershed by a chain of hills running from Mandagadde on the Tunga northwards, between Anantapur and Kumsi, towards Sorab, and by a range from Atavādi westwards through Ikkēri to Talguppa. On the east are two lines of low, stony hills stretching from the south of Channagiri to the frontier,

one following the course of the Tungabhadra northwards the other crossing that river near Hole Honnur and passing near Shikarpur. The south west around Nagar and Haidargur is full of hills.

The general elevation of the District along the water shed is about 2100 feet above sea level falling to 1900 in the east and west. The height of Anantapur has been determined as 2101 feet east of which Shimoga is 1899 and Benkpur (Bhadravati) 1872 while on the west Talgappa is 1906 Sagar 1973 Kollur Katte 1928 Nagar 1867 and Haidargur 1896. The head of the chasm at the falls of Gersoppa is 1670 feet.

The greater part of the District is reckoned as *Malnad* or hill country which roughly speaking may be described as occupying all to the west of a line drawn from Shikarpur to Gajanur the eastern portion being *Maisad* or *Bailu sine* open country. The whole of the first named region presents a range of scenery abounding with every charm of tropical forests and mountain wilds. Trees of the largest size stand thickly together over miles of unbroken ranks their giant trunks entwined with creepers of python dimensions their massive arms decked with a thousand bright blooming orchids. Birds of rare plumage sit from bough to bough. From the thick woods which abruptly terminate on verdant awards bison issue forth in the early morn and afternoon to browse on the rich herbage while large herds of elk pass rapidly across the hill sides. Packs of wild dogs cross the path hunting in company and the warning boom of the great *langur* monkey is heard from the lofty trees. The bamboo forest has beauties of its own whether waving in immenso fronds of delicate green foliage or whitening with its rice like grain. Lively gardens of the elegant areca palm for which Nagar is famous the *lans* of Sorab with the rich hues of wild cinnamon and the sombre green of the jack intermingled with the truncated leaf of the *bagn* palm and the waving bunches of the pepper vine the magnificent avenues of the *dhupa* tree in Sagar—all unite to vary the

attractions of a region replete with every natural beauty. The view from the head of the descent to the Falls Gersoppa is probably one of the choicest bits of scenery in the world.

The features of the open country are tame in comparison with those of the woodland tracts, but there is much that is picturesque in the fertile taluk of Channarayana with its large Sulekere lake, the finest reservoir with one exception in the south of India.

GEOLOGY

Rocks

In this district also are wide patches of Dharwar schists underlain by granites and gneisses of different series. The schists are of a different character from those noticed in the Kadur District and are mostly chloritic—consisting of scales and small flakes of green chlorite and granular quartz. From these basic chloritic schists, there are gradations to the acidic gritty schists in which scales and wisps of chlorite occur in subordinate quantities. These latter rocks are seen in the field to be the crushed and altered phases of various effusives and intrusives, such as the rhyolites, quartz porphyry, aporhyolites, granite porphyry, microgranite, etc., which are all believed to be the various phases of the Champion gneiss series. These altered acidic schists have in them bands of iron ore, limestone and manganese ores, which appear to be the secondary replacement of the various acidic schists. The one other noticeable feature in these schists is the occurrence of a number of bands of crushed or auto-clastic conglomerate.

Granites

Bordering the schist regions occur fairly wide masses of uniform, medium to coarse grained, generally greyish type of a granite, such as is exposed near Honnali, Saulanga and Bhadrāvati, etc. These are now regarded as the granitic phases of the Champion gneiss series and are separated from the vast complex of the granite gneisses of the Peninsular gneiss series.

The western and the north western parts of the District in parts of the Sorab Shikarpur and Sagur Taluks are capped sheets of laterite or lateritic soil which entirely hides the underlying formations

In the eastern parts of the district granite has been quarried and used for purposes of construction In the west the laterite forms the chief building material This is excavated in open quarries and is sold cut into bricks of $18 \times 12 \times 4$ During 1916, the price per 100 of such bricks was Rs 3 to Rs 4 On hill 2159 west of Hiregoingere tank (Honnali Taluk) the altered quartz porphyry band is quarried for making grind stones On the banks of the river north west of Hiregoingere a fine chlorite schist has also been worked for long slabs of about $7 \times 2 \times 3$ in dimensions

Building
Material

The ores of iron manganese and limestone form the chief minerals of the district

Mines and
Minerals

Iron ore is found in the interior in parts of the Sorab and Shikarpur Taluks and also in more easily accessible places near Joldbal (Chennagiri) Kumsi and Shankargudda areas The ores are mostly limonite or hematite and some of these ores in the Shikarpur Taluk appear to have been locally smelted about 30 years back

Iron Ores

Limonitic ore from the Chettanahalli area near Kumsi is being utilised by the Mysore Iron Works for smelting

Limonitic
Ore

Manganese is produced chiefly from the Kumsi and Shankargudda mines the former being situated about 4 miles north north west of Kumsi town and the latter 9 miles west of Shimoga Psilomelane and pyrolusite are the chief forms of the ore obtained and the ore bodies are worked in a series of benches by the open quarrying method The total amount of manganese ore obtained from these blocks from 1905 to 1924 is 4 68 409 tons of which 1 47 025 tons have been exported

Manganese
Ores

Work which was practically at a stand-still at the Kumsi mines has been resumed recently, removing ores of inferior grade. At Shankargudda, work is being carried on round about the knoll deposits.

Besides these, during 1907-1909 when there was a good demand for manganese, vigorous exploration and prospecting for the mineral were carried out, with the result that low grade ore was located at a number of places in the Kumsi and Shikarpur Taluks.

The other areas where manganese ores have been worked are Ittighalli, Hosur and Ballur, Kagmelli, Hoshalli near Joladhal, Bikonhalli, Bhadigund, Balekatte, Siddarhalli, Mavinkere near Masarhalli and Karekodlu.

The total quantity of ores extracted in this district from 1905 to 1924 is 525,138 tons, of which 488,375 tons have been exported.

Limestone

Bands of limestone are found near Bikonhalli 7 or 8 miles north of Shimoga, 4 to 6 miles north-east and north of Honnali and near Joldhal and Bhadigund and also at Kumsi and Shankargudda mines. The dolomitic limestone of the latter areas is being supplied as a flux for iron smelting at Bhadrāvati.

Soil

The general substratum of laterite in the western taluks, wherever it approaches the surface, checks vegetation. The soil in the rice valleys, so characteristic of the *Malnad*, is loose and sandy, while that of garden lands is stiff and clayey. The richest soil of the District is in the north-east, from the Sulekere northwards. The black soil here prevails, as also around Nyamti and Belgutti in Honnali Taluk.

BOTANY

Vegetation

The Western Ghats and the country immediately below them are covered with magnificent evergreen forest. Many of the hills are heavily wooded up to their summits. In some parts the undergrowth is dense, elsewhere the forest is open, and on all sides trees with clear stems to the first

branch of from 80 to 100 feet met the eye. The great bulk of these trees can scarcely be realised except by actual measurement. The more valuable kinds are poor wild jack, ebony, some height crool dupada mara, the large devadaram garuhoga and a species of cedar. The wealth of timber in these forests is almost entirely unproductive owing to the inaccessible nature of the country.

More to the east as far as a line from Anavatti to midway between Shikarpur and Honnali and thence to Sakrehal is a rich and productive belt of vegetation including the *kans* of Sorab, areca palm and cardamom garden and the rich rice flats of Sagar Nagar and Tirthahalli. Within this tract are the State and District forests. The more important trees are teak, black wood, honne, matti, sampaji, arcentega, alale, biridi, bulavara, bagi, sigade or chendala, jambu, dandiga, hulvati or namadari, hunal and mashi, jani, kadagi, kuli, kalteka, nelli, navaladi, nandi, pabbari, shi, anvige, tapasi, and kendatsai.

Teak, not of the largest size, is found in Shikarpur, Kunisi and Sakrehal. Bamboo is abundant everywhere. Sandal is most plentiful in Sorab, Sagar and Nagar taluks. It also grows in parts of Shimoga and Shikarpur and a little in Channagiri and Honnali.

The taluk of Sorab abounds with *kans*, many of which are cultivated with pepper vines and sometimes coffee. The sago palm (*caryota urens*) is also much grown for the sake of its toddy. These *kans* are apparently the remains of the old forests which appear once to have stretched as far east as Anavatti. At the present day at Anavatti itself there is no wood and the surrounding country is clothed with either scrub jungle or small deciduous forest generally pentapterous. *Kans* are found also in Sagar Nagar and the other *Mahad* taluks but those in Sorab are from their number, situation and accessibility the most valuable.

The Sagar taluk is not so thickly wooded as that of Sorab except along the Ghats. The adjoining taluk of Nagar possesses heavy forests in the west (though several of the

hills are cleared), but the wood grows generally in large *lans*, which are scattered unequally over the taluk. Going south to Tithahalli much fine timber is found to the north of the Tunga, while to the south of the river the country is comparatively open. From Mandagadde in this taluk is a long stretch of wooded country, which runs north *via* Hannigeri through portions of the Shimoga taluk to the confines of Sorab and Sagar. In this strip there is good teak, much fine second-class timber, and a vast quantity of *ingaxylocarpa*, which is largely used for making charcoal for the iron mines that abound near Masrur, Shringeri and other places in Anantapur and Shimoga.

Between Shikarpur and Kumsi is a belt of jungle, parts of which have been placed on the State forest lists. In the eastern portions of Shikarpur and Honnali taluks, there is comparatively little wood. Between Shikarpur and Sorab is a quantity of small pentapterous jungle near Udagan and Siralkoppa, which only requires conservation to grow up into a valuable second class forest.

The Honnali taluk is poorly wooded. Near Malebennur, in the low hills to the east of the Tungabhadra, are the remains of old jungles, which apparently yielded small timber and much fuel. In Channagiri there is very little wood, in the south-west of the taluk is a small jungle.

Forests

The District comprises of three Forest Divisions. The extent of State Forests and Plantations in each of the Divisions is as follows

Division	State Forests	Plantations
Shimoga	195 Sq Miles	2 Sq Miles
Bhadraṇavati	241 do	294 Acres
Sagar	337 do	2 Sq Miles

The thickly wooded evergreen Ghat forests run along part of the western boundary of the District merging gradually

into the deciduous forests of the centre and south. The eastern portion particularly of Shikarpur Kumsi and Honnali taluk is comparatively little wooded. The fans of Sorab are characteristic of that taluk.

The more valuable species of the Ghats are chony, boṇi devadāri (white cedar) uṇṇasampṇa surithonn habbithalsu gandhaṇṇige (tām). The most numerous are bilṇa and dhuma. The deciduous forest contains teak and wood bonne matti arēntṇa alale hunaḷ uṇṇi etc.

Rice is the principal cultivated product of the District Cultivation of which more than 60 kinds are enumerated. Rice is extensively grown in Nagar, Sorab and Tirthahalli that of the first named place being considered superior to any in the Province. Sugar-cane is largely raised in Shikarpur Honnali chiefly produces different kinds of dry grains as well as cotton. Pepper grows wild in the forests of Nagar and Sorab, while cardamoms are produced in the jungles about Agumbi though not so good as those raised in rice gardens.

The sowing of rice commences in April and continues on till well in July. Reaping commences in November and by the end of February or so is concluded. By the close of March or a little after the grain is threshed and by the close of April or May is ready for the market.

The following are the names of the different kinds of rice grown in the District —

Sakalan panna	Hasar kesari	bhatta
Dasar do	Kempu kesari	do
Nerlagiri do	Hanesale	do
Putti do	Keruvina	do
Bili do	Ambe mori	do
Kempu do	Hasadi	do
Marutra do	Haralu honsana	do
Nirlagiri do	Hudri	do
Gauri do	Jola ma	do
Bhangar kaddi bhatta	Chekkalli	do
Mentyasale do	Janagali	do

Kodde	do	Kambu tige	
Kurri	do	Pusta manjari	
Gugigonda	do	Bih mundakara	
Varnagalli	do	Kempu do	
Chale	do		

Next to rice the most important wet crop is sugar-cane, of which the principal varieties cultivated are *kni kabbu*, *maru kabbu*, *rastali*, and *pattapatti* or *ram rastali*. Planting operations commence in January and continue till June. The crop takes a twelve-month or more to arrive at maturity, when it is cut and for the most part converted into jaggery, which is ready for the market about July of the year following that in which the cane was put down.

Crops

The following statement shows the important crops raised in the District during the three years 1922-23 to 1924-25 together with the area in acres cropped.

Name of the crop	Extent cropped		
	1922-23	1923-24	1924-25
Rice	2,11,520	2,04,211	2,12,699
Cholam or Jawar	79,414	79,791	82,656
Areca-nut	15,409		11,646
Ragi or Marua	1,18,271	1,14,483	1,15,906

Name of the crop	Talents cropped		
	1922-23	1923-24	1924-25
Horse gram	7.31	489.25	321.7
Bengal gram	563	1,034	714
T. Ari	707	318	
Til or Can. elly	967	970	979.5
Mustard and Rajoo	3	718	1023
Cround nut	1119	108	504
Cocoa nut	141	161	117
Castor	273	2194	250
Coriander	134	10	523
Chilies	368	6,117	10,171
Pepper	157	226	1,194
Onions	1,344	9	57
Sugar cane	87	70	8,060
Cotton	769	9,531	14,146
Drugs and Narcotics	635	220	1,886
Fodder crops	266	10	
Man oca	449		1,106

FAUNA

The larger game is most abundant in Sagar where hison are common and elephants occasionally met with. Wild ani
panthers and bears which are the most feared by the people
are found principally to the west of Shimoga and in Shikar
pur. In Channagiri their numbers have been very greatly
reduced. The wild bear so destructive to crops abounds
in Channagiri Nagar and other parts. Sambar chital and
jungle sheep are general in the wooded tracts. Elephants
latterly became so numerous and destructive to the crops
that attempts were made to reduce their numbers by shooting.
But this was found ineffectual and *Keddah* operations were
started.

Crocodiles are found in the Tunga and Bhadra and in the Reptile
streams and tanks connected with them.

Wild geese, ducks and teal frequent the tanks in Channa Birds
giri and Shimoga while pea fowl and jungle fowl are to be
had in the woods.

Domestic
animals

The cattle—cows and bullocks—are, with the exception of those in the *maidan* taluks, generally undersized and of very poor quality. About Shimoga the bullocks are a short, thickset breed, well adapted for agricultural purposes. The cows are very indifferent and give but little milk. Buffaloes are kept in the *malnad* as standing the climate better, the females being reserved for the dairy and the males used for draught purposes. Asses are numerous in the neighbourhood of Shimoga, where also a few sheep and goats of inferior breed are reared.

Live Stock

The District in 1924-25 contained 34,587 bulls, 1,54,816 bullocks, 1,34,898 cows, 83,389 buffaloes, 821 horses, 25,450 sheep, 62,193 goats, 1,56,813 young stock and 688 mules and donkeys.

CLIMATE AND RAINFALL

Climate

The climate is similar to that of Hassan.

Rainfall

The annual average for the District is 56.98 inches distributed over 79 days, most of the rain falls in the months of June, July and August, the total for this period being a little over 40 inches. The driest part of the year extends from December to March when only 0.79 inch of rain can be expected. The rainfall rapidly diminishes as one proceeds from the eastern to the western boundary of the district, the annual rainfall at Agumbi, a station in the extreme west, is as much as 316.59 inches while that at Honnali, a station near the eastern boundary, is only 23.36 inches. The precipitation over greater part of the taluks of Tirthahalli, Sagar and Nagar is more than 100 inches in a normal year. In the north-eastern parts of the Honnali and Channarayana taluks, the rainfall is a little less than 25 inches. The heaviest fall on record for a single day is 22.16 inches registered at Agumbi on the 23rd July 1922. The deficiency in rainfall exceeded in no year 30 per cent since 1893 but the deficit exceeded 15 per cent in 5 years.

The following table gives the average monthly and annual rainfall for the various rain gauge stations in the District —

Station	No. of years	Jan	Feb	Mar	April	May	June
1	2	3	4	5	6	7	8
<i>Shimoga Taluk</i>							
1 Shimoga	51	0.13	0.03	0.35	1.8	3.6	4.00

Since 1837 the best years on record are 1882 and 1886 when the annual totals were respectively 57.86 and 52.13 inches during recent years the heaviest total is that for 1912, 15.12 inches. The yearly aggregate was short of the normal in 17 out of 83 years and it was less than 20 inches in four years. The precipitation was the lightest in 1813 when only 15.30 inches were registered and the total for 1918 also was low being only 21.20 inches.

The actual rainfall at Shimoga from 1837 to 1921 is given in the following table —

Year	Inches	Year	Inches	Year	Inches
1837	10	1851	38.63	1865	8.3
1838	15.80	1852	10.1	1866	11.1
1839	31.00	1853	0.4	1867	23.47
1840	23.30	1854	7.0	1868	78.1
1841	23.80	1855	4	1869	31.88
1842	1.00	1856	3.31	1870	4.30
1843	1.30	1857	8.8	1871	31.8
1844	0.0	1858	7.18	1872	31.6
1845	1.10	1859	0.8	1873	4.0
1846	0	1860	10.6	1874	33.00
1847	31.0	1861	4.5	1875	3.0
1848	7.80	1862	6.6	1876	5.0
1849	40.0	1863	1.7	1877	70.10
1850	78.50	1864	33.0	1878	31.34
1851	20.0	1865	23.14	1879	0.9
1852	4.80	1866	6.86	1880	45.42
1853	0.10	1867	4.7	1881	9.4
1854	0.10	1868	31.6	1882	8.3
1855	15.00	1869	39.10	1883	37.04
1856	3.0	1870	5.43	1884	10.00
1857	10	1871	6.25	1885	8.42
1858	13.40	1872	37.74	1886	1.0
1859	31.50	1873	10.0	1887	31.13
1860	0.30	1874	3.04	1888	7.6
1861	50	1875	1.60	1889	30.80
1862	1.0	1876	6.31	1890	6.4
1863	31.0	1877	34.10	1891	37.99
1864	34.0	1878	6.43	1892	34.01
1865	34.10	1879	38.58		
1866	36.30	1880	48.76		

THE PEOPLE.

Distribution.
and number

The entire population of the District, according to the Census of 1921 was 192,560, of which 257,150 were males and 235,410 females

Density

The number of persons to the square mile as per Census of 1921 was 122, while at the Census of 1911, the density stood at 131.69 persons to the square mile. There was thus a decrease of 9.31 persons to the square mile or 1.671 per cent of the total population during the past decennium.

Honnali taluk was the most thickly peopled at the time of the Census, containing 194 persons to the square mile. In Channagiri there were 164, in Sorab 133 and in Shikarpet 130. The most sparsely populated taluks were Nagar, with 72, Sagar with 77 and Tirthahalli with 119 persons to the square mile.

By religion

The following table represents the numbers according to religion

The following figures compare the population in the different census periods from 1871 to 1921 — Inter cen al variations

Taluka	1871	1881	1891	1901	1911	1921
Shimoga	7 028	7 911	8 866	7 102	4 344	74 363
Kumsi (Sub Taluk)	17 907	17 401	17 583	18 677	17 144	10 80
Channagiri	0 31	66 160	11 111	91 43	83 33	6 000
Honnala	5 1037	1 6	63 6	68 1	68 3 7	61 100
Shikarapur	61 110	61 10	61 101	67 601	63 0 4	5 3
Sorab	67 073	66 11	66 017	71 193	66 60	55 901
Sagar	10 038	5 10	58 933	6 815	1 010	51 30
Nagar	1 600	4 16	4 841	10 4 5	5 600	38 180
Tirthahalli	51 71	56 561	53 9	5 53	47 4	6 74
Total	507 334	66 30	8 519	531 36	516 716	49 560

The population remained almost stationary during the period from 1871 to 1881 or even slightly decreased. The famine of 1877-78 apparently had no effect in diminishing the population in this District. The increase in the 20 years from 1871 to 1891 was only 1.16 per cent and that from 1891 to 1901 was still less being 0.60 per cent while the percentage of decrease was 2.81 and 1.671 respectively during the periods from 1901 to 1911 and 1911 to 1921.

Arranged according to occupation or means of livelihood the population may be classified as follows — Classes

Exploitation of earth	107 646
Extraction of minerals	86
Industrial occupation	10 706
Transport	1 207
Trade	7 328
Public Force	1 549
Public Administration	2 321
Professional and liberal arts	2 918
Persons living on their income	186
Domestic Service	1 891
Insufficiently described occupation	625
Unproductive	5 217

Towns and
Villages

The District contains 12 municipal towns with a population of 49,484, composed of 37,619 Hindus, 10,054 Muhammadans, 1,512 Christians, 232 Jains and 67 others. The following are the towns with population

Towns	Town	Population
	—	15,090
	Shimoga	4,987
	Sagar	4,366
	Shikarpur	3,996
	Channagiri	3,860
	Honnali	3,789
	Bhadrāvati	3,336
	Tirthahalli	3,209
	Nyamati	2,230
	Sialkoppa	2,128
	Kumsi	1,482
	Sorab	1,011
	Kallurkatte	

Villages

The total number of villages in 1921 was 2,020 of which 1,736 were populated and 295 depopulated. Of the total number, 19,456 were Government villages, 13 Sarvamanya, 60 Jodi and 1 Kayamgutta.

STOCK AND DWELLINGS

Stock

The agricultural stock of the District in 1921 consisted of 31,540 carts and 80,256 ploughs. The livestock consisted of 194,925 bullocks, 147,649 cows, 88,499 buffaloes, 190,129 young stock, 32,555 sheep, 41,241 goats, 1,100 horses and ponies and 1,163 mules and donkeys.

Dwellings

The total number of houses in 1921 was 96,406—9,092 in towns and 87,314 in villages accommodating a population of 49,484 and 443,076 respectively. Next to Shimoga, the taluks of Tirthahalli, Honnali and Sorab contain the largest number of first class houses. Houses in the villages are invariably thatched. The average number of persons per house comes to nearly 9.

The principal concourse of people occurs at the festivals *Festivals* shown in the following table —

Name of place	Name of Jatra	Time	Attendance at the Jatra
<i>Shimoga</i>			
Kudli	Sangameswara Jatra	April	People 4 000 Cattle 10 000
Pillangiri	Brinivasa Car festival	May	People 3 000
<i>Channagiri</i>			
Channagiri	Kote Hananathala Car festival	February	9 000 Cattle 600 to 1 000 People 3 600
Devarahalli	Udumara Hananathala Car festival	April	
Chikahubkere	Maheswara Jatra	December	6 000
Sulekere	Bund Siddheshwara Car festival	January	1 000
<i>Hannal</i>			
Rampur	Hannal Jatra	January	4 000 Cattle 3 000 People 000
Marikoppa	Halladuruma Car festival	October	
Nelli	Hannur Jatra	February	000
<i>Shikarjuri</i>			
Torani	Mallikarjuna Jatra	March	10 000
Shikarjuri	Hutcharayawami Jatra	April	5 000
Belgavi	Hedreswara Samant Basanant Devara Car festival	March	People 3 000
<i>Sorab</i>			
Chandragutti	Hanukamba Jatra	April	8 000
<i>Sigar</i>			
Sagar	Maheswara Jatra	Not fixed	4 000
Kela	Rameswara Car festival	March	000
<i>Nagar</i>			
Hadaravalli	Jenahallan mana Jatra	September	1 000
Hill	Surge Paraso	December	1 000
Sutta	Padmavattamma Car festival	March	000
Humha			
Ramachandrapur	Ramachandraswara festival	April	1 000
<i>Tirthahalli</i>			
Tirthahalli	Rameswara festival	December	5 000
Mahaglu	Asvathamanayana Devara festival	April	1 000

A good deal of the internal trade of the District is carried on in the weekly and other periodical markets and *santes* which are held in almost every important place in the District as also in the annual *jātiās* and fairs held at some of the chief centres

Vital Statistics and Diseases

The following table shows the number of births and deaths in the several taluks of the District during 1921-22 as compared with the previous year

Taluk	Births during		Deaths during	
	1920 21	1921-22	1920 21	1921-22
Shimoga	1,182	868	1,231	673
Kumsi	376	399	274	291
Channagiri	1,356	1,575	912	757
Honnali	1,275	1,457	1,277	712
Shikarpur	758	875	754	408
Sorab	1,140	1,158	1,199	1,124
Sagar	913	807	829	822
Nagar	917	818	719	582
Tirthahalli	911	758	881	730
Total	8,828	8,715	8,076	6,192

Of the 6,192 deaths in 1921-22, 381 were due to plague and 102 to small-pox as against 565 and 238 respectively in the previous year. The influenza epidemic of 1918 did its havoc in this district as in other parts of the State claiming about 30,677 people.

The following table shows the births and deaths in the district during the years 1922-23 to 1924-25 --

Year	Births	Deaths
1922-23	9,459	8,552
1923-24	10,704	10,166
1924-25	8,704	12,010

CASTES AND OCCUPATION

The following are the largest castes or classes which number over 10 000, in order of strength. These account for 101 001 or 81.41 per cent of the population.

Lingayat	101 538
Idiga	17 540
Muhaimadan	35 918
Brahman	27 309
Vokkaliga	25 918
Kuruba	25 115
Holeyā	24 131
Beda	20 636
Vodda	20 167
Madiga	16 319
Panchala	13 711
Mahratta	13 208
Lambani	12 742
Agasa	11 366

The following table shows the distribution of population according to occupation —

Occupation	Total including dependants	Actual workers			Dependants
		Male	Female	Total	
1. Exploitation of animals and vegetation	410 74	66 157	1 489	107 646	303 096
Exploitation of minerals.	189	8	1	86	103
3. Industry	90 8	9 090	1 616	10 706	18 3
4. Transport	2 830	1 097	110	1 207	1 623
5. Trade	21 416	5 717	1 551	7 268	14 148
6. Public Force	4 693	1 406	443	1 849	3 156
7. Public Administration	7 18	—34	87	53	4 681
8. Professions and Liberal Arts	7 623	10	116	2 918	4 705
9. Persons living on their income	53	16	1	186	367
10. Domestic Service	2 578	1 361	336	1 697	687
11. Insufficiently described occupations	1 467	614	11	625	84
12. Unproductive	4 143	1 074	1 007	2 081	2 062

CHRISTIAN MISSIONS

The Roman
Catholic
Mission

The Roman Catholic Mission maintains two Churches, one at Shimoga and the other at Tirthahalli. There are a number of sub-stations at Kumsi, Shikarpur, Sagar, etc. The Mission maintains at Shimoga a Tamil School with 76 pupils and a Kannada School with 32 pupils.

The Wesley-
an Mission

The Wesleyan Mission maintains 8 Boys' Schools and 2 Guls' Schools. There is a Mission Hospital and Dispensary at Mandagadde.

SECTION II HISTORY AND ARCHÆOLOGY

A HISTORY

Legendary
Period

As stated in Volume II of this work, there are four copper-plate inscriptions in the District claiming to be grants made by the Pāndava emperor Janamējaya, son of Parīkshit, of the Lunar line. This is the monarch to whom the *Mahābhārata* was originally recited. The grant at the Bhimankatte matha, near Tirthahalli, is dated in the year 89 of the *Yudhishtira* era, or B C 3012. The king is stated to be ruling at Kishkindha, and to have made the grant in the presence of the God Harihara, on the spot where his grandfather Yudhishtira had rested on the bank of the Tungabhadra. The other three grants—Gauj, Kuppagadde and Begur, in Shikarpur taluk—profess to be grants made by Janamējaya to the officiating priests at the *saipa yāga*, or serpent sacrifice, which, we have been told (under Kadur District), is supposed to have been performed at Hiremagalur. In these inscriptions, the king is said to be ruling in Hastināpura, and to have made the grants in the presence of the God Harihara, at the confluence of the Tungabhadra and the Haandra. Their period, if genuine, would be about 3012 B C, the commencement of *Kali-yuga*, when Janamējaya is said to have reigned. The date of the Gauj *agrahāra*

plates was calculated by Astronomer Royal Sir G. Baily to be really 1521 A D but this seems to have arisen from a mistake in the details as given to him. An inscription discovered by Mr Rice dated *Saka 366* (A D 111) expressed in similar terms but attributed to a Chalukya king Vira Nonamha has thrown some light on the question and in publishing it Mr Rice has examined the parallel passages and given reasons for assigning all of them to about 1191 A D. These and some other grants of a questionable character seem to be connected in some way with Henjeru (see Hemavati Tumkur District) and Harihara (Chitaldrug District).

The legend of Jamadagni and Renuka (see Vol II) is also applied to this District and at Chandragutti the latter is said to have performed the *sahagamana* and become a *sati* leaving to her son Parasu Rama the fulfilment of a curse upon Kartiviryaarjuna the murderer of her husband.

Another place of undoubted antiquity is the village of Kubattur in Sorab. Its former name was Kuntala nagara and tradition declares it to have been the capital of Chasdrahasa the romantic story of whose life (see Vol II) occurs as an episode in the *Mahabharata* and is related at length in the popular Kannada poem the *Jaimini Bharata*.

The earliest authentic history relating to the District is connected with the Mauryas. An inscription at Bandinlikke (Shikarpur taluk) says that they ruled over Kuntala and in this province some parts of the Shimoga District were certainly some included. The discovery by Mr Rice of Asoka in Chitaldrug District has placed beyond doubt the fact of Mauryan rule in the north of Mysore in the middle of the 3rd century B C. We have also the statement in the *Mahawanso* that Asoka sent a *there* to Banavasi to proclaim the Buddhist faith. Another inscription at Kupatur says that Nagakandaka (Shikarpur taluk) was protected by the wise Chandra Gupta an abode of the good usages of eminent Kshatriyas. In the Samudra Gupta inscription at Allahabad a list is given of kings in Southern India who submitted

Mauryas and
Guptas

to him, among these, according to one reading of the passage (Fleet, *Early Gupta Kings*, p 7 of Inscriptions), was Ottu-
iaka, he of Ottūr. Again, in the Mahakūta inscription
near Bādāmi, in Bijapur (*Ind Ant*, XIX 7), the Chālukya
king Kīrtivarma is said to have subdued (besides the Maur-
yas, Kadambas and Gangas) among others, a king of Vattūr
These are doubtless the same place, and may be identical
with the Ottūr to the north of Sorab. The oldest inscriptions
now there are Rāshtrakūta, of the 10th century In the
Kadamba inscription at Tālgunda, too, described below,
it is implied that the king Kakusthavarma gave his daughter
in marriage to a Gupta king

Sātavāhanas. The next guides we have to the history of those early
times are the inscriptions discovered by Mr Rice at Mala-
vali (Shikarpur taluk), and one previously known at Bana-
vāsī, which show that Haritīputra Sātakarnī, an Āndhra-
bhūtya or Sātavāhana king, was ruling in those parts in
about the second century A D

Kadambas The Kadambas followed the Sātavāhanas, and are specially
identified with Banavāsī, which was their original capital,
and is mentioned in connection with Asōka in the third cen-
tury B C, and by Ptolemy in the second century A D The
fine inscription discovered by Mr Rice at Tālgunda (Shikarpur
taluk) has given us what appears to be an authentic account
of their origin and rise to power, free from the numerous
legends that have become mixed up with the subject The
information derived from this source, and all others available,
has been summarized in the chapter on *History* in Vol II

Gangas While the Kadambas were exercising sovereignty in the
west of the District, the Gangas were established in the
east, and Mandali and Purali, on the river, close to Shimoga,
one to the south and the other to the north, seem to have
been places of importance under their rule In the fourth
century, the Ganga king Mādhava II married the Kadamba

king's sister, and in the 10th century the Banavasi Twelve Thousand (in the Shimoga District) with other provinces was formally transferred to the Gangas by the Rashtrakutas

The Chalukyas, claiming to be of the Lunar line and former rulers of Ayodhya first crossed the Narmada or Nerhudda and appeared in the Dekkan in the person of Javaharshimha who in the 11th century defeated and destroyed the Rashtrakuta or Ratta prince. He was subsequently killed in a contest with the Pallava king but his immediate successors subdued the whole of the Karnataka country and by the 5th century had established their capital at Vatapi now Badami in the Bijapur District. In the 6th century they profess to have subdued the Kadambas and Gangas. The former became their feudatories but the latter remained independent though they must have retired from much of the Shimoga District. In the 7th century the Chalukyas separated into two families the Eastern Chalukyas fixing their capital at Vengi in the Godavari District and the Western Chalukyas continuing to rule from Badami. The Shimoga District was under the latter forming the Banavasi Twelve Thousand province with its seat of government at Belgaum (Sikarpur taluk). But in the 8th century the Western Chalukyas were overcome by the Rashtrakutas and did not regain supremacy for two hundred years.

Chalukyas
of Badami

This line of kings exercised a great influence over the Mysore country especially in the north west. Their capital was Manyakhūta (Malkhūd in the Nizam's dominions). They at first seized and imprisoned the Ganga king and appointed their own viceroys to govern his territories. But eventually they reinstated him and entered into alliance with the Gangas. In the 10th century there were intermarriages between the families and in return for Ganga help in defeating the Cholas the Banavasi Twelve Thousand and other provinces were again added to the Ganga kingdom by the Rashtrakutas.

Rashtrakutas

Humcha

At the time of the commotions in the 7th century, we find a Jain principality established at Pomburchcha or Hombucha (Humcha, in Nagar taluk), founded by Jinadatta, of the Solar race, and prince of the northern Mathura (on the Jumna, near Agra) This event is assigned to the year 500 of the fifth *Kali-yuga* of the Jains, or 159 B C It seems more probable that the dynasty arose after the power of the Kadambas had been circumscribed by their superiors, the Chālukyas Under the latter, Humcha kings, bearing successively the title of *Sāntana* or *Sāntara Dēva*, can be traced by inscriptions in the 10th and 11th centuries Jinadatta brought under his sway all the country as far as Kalasa (Kadur District), then descending the Ghats to Sisila or Sisukali, finally established his capital at Karkala (South Kanara), appointing lieutenants at Bārākūr, Bangādi, Mūdu Bidaie and Mulki The territories thus acquired yielded a revenue of 9 lakhs of pagodas above and 9 lakhs below the Ghats His successors, under the general title of Bharasu Wodeyar, continued in power down to the 16th century, being subordinate in turn to the Chālukyas, the Hoysalas, and the Vijayanagar kings, until their territories were subdued by the Keladi chiefs The last of them, it is said, having no son, divided his territories among his seven daughters

Chālukyas
of Kalyāna

In 973, Taila retrieved the fortunes of his dynasty by destroying the Rāshtrakūtas, and restored the Chālukya empire, which became more powerful than under the early kings The capital was now established at Kalyāna (in the Nizām's Dominions) The Kalyāna dynasty was at the zenith of its glory in the 11th century, under Vikramāditya, who established the Chālukya Vikrama era, used in subsequent inscriptions for nearly 200 years. During this period, the Banavāsī Twelve Thousand was one of the most important provinces of their empire In 1155, the Chālukya king was dethroned by his general, Bijjala-Dēva, of the Kalachurya line, a family which had been originally subdued

at the same time as the Rishtrakūṭis or Rattas. The Chalukya power thus came to an end. The king retired to Banavasi and a feeble remnant of the State appears afterwards to have survived first at Annigeri in Dharwar and then in the Konkan for about a century later. The name then disappears from history.

The Kalachuryas possessed themselves of most of the Chalukya dominions including the Banavasi Twelve Thousand and ruled it kalyani for three generations down to 1187. During the reign of Bijjala Deva before mentioned it was that the Lingayat religion which prevails throughout the Kannada and Telugu countries arose its founder Basava being his prime minister whose sister famed for her beauty the king had married. Bijjala's son-in-law Bunimarasa was governor of the Banavasi country in about 1163 A.D. No mention occurs after the 12th century of the Kalachuryas.

This brings us to the time when the Hoysalas of Dorasamudra (Halebid Hassan District) had subdued the whole of Mysore. Among the provinces ruled by Vishnuvardhana of that line are included Banavasi. Vir Ballala advancing north of the Tungabhadra came into collision with the Yadavas of Dēvagiri (Daulatabad). Between the forces of these two powers several engagements took place. At one time in the 12th century the Hoysalas advanced as far as the Krishna. A century later the Yadavas appear by inscriptions to have secured the allegiance of the Kadambas and gained possession of the northern parts of the District.

The Muhammadans now appear on the scene. Dēvagiri was reduced in 1294 by Ala-ud-Din and twenty years later the Yadava line was extinguished. Dorasamudra was sacked in 1310 by Kafur and totally destroyed in 1326 which terminated the Hoysala power.

Mulamma
dan incur
sions

Vijayanagar

The Vijayanagar empire next arose, the foundation of that city on the Tungabhadra being assigned to the year 1336. Within its dominions were ultimately comprised all the countries south of the Krishna. Towards the close of its ascendancy were established the houses of the *Keladi*, *Ikkēr* or *Bednūr* chiefs in the west, and the *Basvapatna* or *Tankere* chiefs in the east.

Keladi

The origin of the former, who were Lingāyets, is as follows. Bhadrāya, a Mālava Gauda of Keladi, is said to have discovered a hidden treasure, which, after sacrificing two of his slaves, he took possession of, and therewith built a fort. He next visited the court of Vijayanagar and obtained from Sadāsiva-Rāya, then ruling, a grant of the government of Barkur, Mangalur and Chandragutti, with the title of Sadasiva-Nāyak. (The Jam account is that the last of the Humcha kings became a Sivabhakta, taking the name of Gante Wodeyar, that he was the progenitor of the Keladi family, and that owing to his change of faith the provincial governors threw off their allegiance). His successor transferred the capital to Ikkēr. Venkatappa-Nāyak threw off dependence on the fallen Vijayanagar sovereign, and in 1639, during the reign of Virabhadra-Nāyak, the capital was again removed and established at Bednur. Sivappa-Nāyak was a most able administrator, and conquered as far as Shimoga eastwards, with all Kanara westwards. He succeeded to the government in 1645, and is the most celebrated of the line, not only for the extent of his conquests but for his politic regulations, elsewhere described. We have seen in the history of the Mysore, Hassan and Kadur Districts how he overran the province of Balam, also how he granted protection to Sri-Ranga-Rāya, the fugitive king of Vijayanagar, establishing him in a government at Belur and Sakkarepatna, and even adventuring to besiege Seringapatam in his behalf. Sivappa-Nāyak died in 1660, and the government continued in the same family till 1763, when Bednūr was captured by Haidar Ali, and the District thus

annexed to Mysore. The Rani Virammaji with her adopted son fled to Ballalrayandurga (Kandur District) a strong fortress at the head of the Kudalalpa a but being surrounded by Haidar's troops she was taken prisoner and sent to Madhugiri (Tumkur District).

The Keladi, Ikkeri or Bidnur State was the most considerable of those that were absorbed into the present Mysore territories by the victories of Haidar Ali and its conquest was always acknowledged by him to have established his fortune. Some details of its history are therefore here given largely based on a manuscript account furnished by Mr F M Mascarenhas of Mangalore who has also written a *History of Canara* and other works relating to that interesting region. I have consulted he says two Canarise manuscripts one of which came to me from Bednūr and another from Kundapur in South Canara.

The following is the list of the chiefs as given by him. It agrees generally with one taken by Mr Stokes from a *Tadala* or black book at Keladi and appears to be more correct than the one given by Buchanan —

- 1 Chaudappa Nayak son of Hulibaidu 1409-1513
Basappa
- 2 Sadasiva Nayak son of 1 1513-1540
- 3 Sankauna Nayak I son of 2 1545-1558
- 4 Sankanua Nayak II younger brother 1558-1570
of 3
- 5 Rimaraja Nayak son of 3 1570-1582
- 6 Venkatappa Nayak I younger brother 1582-1629
of 3
- 7 Virabhadra Nayak grandson of 6 and 1629-1645
son of Bhadrappa Nayak
- 8 Sivappa Nayak grandson of 1 and son 1645-1660
of Siddappa Nayak
- 9 Venkatappa Nayak II younger brother 1660-1661
of 8
- 10 Bhadrappa Nayak son of 8 1661-1663

- 11 Sōmasēkhara-Nāyak I, younger brother 1663-1671
of 10
- 12 Channamāji, widow of 11 1671-1697
- 13 Basappa-Nāyak I, adopted son of 12 1697-1714
- 14 Sōmasēkhara-Nāyak II, son of 13 1714-1739
- 15 Basappa-Nāyak II, nephew of 14, and 1739-1754
son of Virabhadrapa Nāyak
- 16 Channa-Basappa-Nāyak, adopted son 1754-1757
of 15
- 17 Virammāji, widow of 15 1757-1763
- 18 Sōmasēkhara-Nāyak II, adopted son
of 17

The 18 chiefs ruled 265 lunar years, 1 month and 25 days

A number of inscriptions in the Shimoga District furnish particulars about these chiefs. From *Shimoga* 2, dated in 1641, we learn that Virabhadra was of help to Vēnkata-pati-Rāya II, to whom he gave asylum when attacked by the Ādilshāh king of Bijapur. There are a number of grants in the name of Channamāji (*Shikarpur* 213, 82 and 79 and *Shimoga* 17). Channamāji's son Basappa-Nāyak is the donor of the grant mentioned in *Shimoga* 29 dated in 1712. His successor Sōmasēkhara-Nāyak II is the donor of *Shimoga* 128 dated in 1718.

The circumstances under which the family first rose to power are described under Keladi, and the reason of the transfer of their capital to Ikkēri. Sādasiva-Nāyak received that name from Sādāsiva-Rāya of Vijayanagar, in reward for his services against the forces of Ahmednagar, and his success in putting down various rebellious chiefs in Tuluva or South Kanara, which he overran as far as Kasargod, in witness of which a stone pillar was erected by him there. The two Sankanna Nāyaks who followed were sons of different mothers. The elder after a time made over the government to his brother, and set out on a pilgrimage to all the holy places in India, from Rāmēśvara in the extreme south to Kēdār-nāth, Nepal and Kashmir in the Himalayas. When

at Delhi he is said to have defeated in the presence of the court a celebrated prize fighter named Ankush Khan who had affixed a sword to the gate of the city as a challenge to all comers. During his travels the God Aghōresvara appeared to him at Paidana and Virabhadra at Avali in consequence of which on his return to his country he set up the latter at Keladi and the former at Ikkeri. According to Buchanan he did not resume his power but lived in retirement for the rest of his days. But it would appear that he did take up the government again and was successful in various contests against the Muhammadans and in Kanara. It was during the reign of Sankanna II that the Vijayanagar empire was overthrown by a confederacy of Muhammadan powers. The Keladi chief seems to have embraced the opportunity to overrun the territories of Baira Dēvi.

But it was Venkatappa Nayak who assumed independence and had to encounter the invasion of the Bijapur forces under Randulha Khan which he succeeded in driving back. During his reign the dominions of his House were extended north and east to Masur Shimoga Kadur and Bhuvanagiri (Kavaledurga) while on the west and south they were earned to the sea at Honore by the conquest of the queen of Gersoppa—the pepper queen of the Portuguese—a feudatory of Bijapur and down as far as to the borders of Malabar his power being so firmly established that he was able to add 50 per cent to the land assessment throughout a great part of Kanara. He came into collision with the Portuguese by espousing the cause of the queen of Olaya against the Bangar Raja who was an ally of theirs and ousting him from his territory. The Portuguese being at the time engaged in expeditions against Persia and Malacca and desiring to gain the alliance of Venkatappa in order to secure the trade in pepper and keep it out of the hands of the English and the Dutch the viceroy at Goa sent him an embassy in 1623. An Italian nobleman Pietro della Valle who had been wandering for some years through Turkey

Egypt, Arabia and Persia, accompanied the ambassador to Ikkēri, and has left an account of his journey. He mentions the fine wide level road from Sagar to Ikkēri, and the splendid avenue of trees on either side. These are the magnificent *dhupa* trees, of which many may still be seen. He also came upon a woman performing *sati*, whom he endeavoured, without success, to save from the flames. *Māstikals* of the later Vijayanagara period are numerous in Sorab and neighbouring parts, and the rite must have been very prevalent. He afterwards travelled alone through the country, "marching at his 'pleasure', and as the roads throughout the dominions of Venkatappa were very secure, he descended the Ghats slowly."

Virabhadra-Nāyak, by an embassy to the Bijapur Sultan, stopped a formidable invasion by Randulha Khān, assisted by the Rājās of Sunda and Bilgi, and the chiefs of Tarikere and Banavar. He then removed the capital to Bednūr. Sivappa Nāyak, his general, subsequently subdued Tulava, and Bairasa Wodeyar of Karkala, invading Malayala and entering Coorg.

Sivappa-Nāyak was one of the most distinguished of the line. He greatly enlarged Bednūr, assisting merchants and artisans from all parts to settle there. His expeditions in Mysore extended over Balam to Vastana, Sakkarapatna and Hassan. He introduced the land assessment called *shist*. Father Leonardo Paes, who travelled in Kanara at the time, says that he had collected enormous treasure after his thorough conquest of Kanara, that his possessions extended from the Tudy river to Kasargod or Nilevar, and that he had a standing army of from forty to fifty thousand men. There were more than 30,000 Christians among his subjects, originally natives of Goa and Salsette. Srī-Ranga-Rāya, the fugitive king of the Vijayanagar dynasty, fled to him for refuge in 1616, and Sivappa-Nāyak not only gave him the government of Belur and Sakkarapatna but attacked Seringapatam on his behalf, gaining the sobriquet "Pinda of Ikkēri, Minda of Mysore." Father Vincent,

a barefoot Carmelite friar mentions in his travels the wealthy Mussalman merchant Shah Bandari Isak who was a favourite of the chief and traded on the western coast and at Bednur

There were frequent contests in subsequent reigns between the Mysoreans and the forces of Bednūr also several invasions by the Bijapur armies In the time of Bhadrappa Nayak the latter are said to have taken Bednur and besieged Bhuvanagiri whither the chief with his family had retired but a peace was eventually concluded In 1664 Sivaji made a sudden descent on the coast of Kanara sacked Barcelore or Kundapur and sailed back to Gokarna plundering all the adjacent tracts and levying heavy contributions from the rich mercantile towns of which the English factory at Karwar paid £112 sterling

Somasekhara was murdered by his nobles as stated by Dr John Fryer of the English Navy who was then at Karwar and there were many intrigues regarding the succession as he had no son But according to information given to Buchanan he went mad and during the paroxysms of his disease committed great enormities ripping up pregnant women with his own hands and for the gratification of his lust seizing every beautiful girl that he met At length he was assassinated by a Brahman named Somaya who though he had rid them of a monster was nevertheless put to death by the Sivabhaktas as they considered that he had brought to an end the principal dynasty that professed their creed His widow Channamaji carried on the government by and with the authority Dr John Fryer says of one Timmanna Nayak who from a toddy man has by his cunning polity more than true prowess and valour raised himself to be General and Protector The Rani adopted a son and Timmanna Nayak who kept them both under restraint was killed in battle on which things began to return to the regular current The Rani's forces took Basavapatna and other places to the east She fortified Harikere and named it Channagiri after herself

She also gave shelter to Rāma Rāja, the son of Sīvāji, when he was in hiding from the Mughals, until he could escape to his own country.

Basappa-Nāyak, her adopted son, next came to the throne. He seems to have been devoted to works of charity. All ascetics, of whatever faith, who came to his dominions in the winter, were provided, it is said, with an umbrella and a blanket. All wayfarers were fed at the *dasoharas*. At nightfall men were sent into the streets with cooked rice for wanderers, and milk for young children. As an atonement for the murder of Sōmasēkhara, he imposed an extra assessment of $\frac{1}{10}$ of an anna, or $\frac{1}{16}$ of the standard rent, to provide funds for erecting *chatras* and feeding pilgrims.

Sōmasēkhara II is said to have attacked Sira, and taken Ajjampur, Sante Bennur, and other places from the Mughals. Basappa-Nāyak was called *Buddhi*, or the Wise. Jacobus Canter Vissacher, writing of this period, says —“The Bednore Prince is much more magnificent and powerful than those of Malabar. His kingdom produces many peculiar commodities, such as sandalwood, which is found there in great abundance, as well as rice.” He calls Bednore the granary of all southern India. He also writes —“The city (Bednūr) where the Raja holds his court lies some leagues inland, and is connected with the seaport by a fine road, planted with trees, which the inhabitants are obliged to keep in excellent order. This road is so secure that any stranger might go and sleep there with bags full of money, and nobody would molest or rob him, for if such a thing occurred, the people in the neighbourhood would not only be severely punished, but would be forced to make good the money.” It was during this reign, in 1748, that the intrigues of Duplex released Chanda Sahib from the Marhattas at Sattara, as a candidate for the Nawabship of the Karnatic, in opposition to Muhammad Ali, the English candidate. Bednūr was then at war with Chitaldrug, and both sought the countenance of Chanda Sahib, who was marching leisurely to the south, awaiting information from

his partisans. He was induced to side with Chitaldrug but in the decisive battle of Mayakonda on the 24th March 1748 the Chitaldrug forces suffered complete defeat, and their chief, Madikeri Nayak was slain. The son of Chandra Sahib had been killed by his side and he himself fell into the hands of the enemy who were taking him in triumph to Bednūr. But informing his Mustaharri guards of his prospects, they marched off with him to the French instead and he eventually took Arcot in 1750. On the other hand in 1752 the French were forced to surrender at Trichinopoly to Major Lawrence. Chandra Sahib escaped to the Tanjore general under a promise of being conveyed to some French settlement but was badly stabbed by him and his head sent to his rival Muhammad Ali. The latter gave it to Nanja Raja the Mysore commander who despatched it to Seringapatam where it was exposed for three days over one of the gates. To return to Bednūr. In 1761 a treaty was concluded between the Raja and the chief of the English factory at Tellicherry.

An adopted son succeeded Basappa but on remonstrating with his adoptive mother on her rumours which had become a public scandal he was put out of the way by a Jetti dislocating his neck in the bath and Virammaji occupied the throne in her own name adopting a son as her successor. But her notorious character and an imposition of 50 per cent additional tax in order to buy off the Mahrattas who threatened the country had alienated the people and Haidar's invasion now followed. The chief of Chitaldrug whom he had just subdued introduced to him a pretender Channa Basappa professing to be the prince who was thought to have been murdered. Haidar saw the use to be made of him, and invaded Bednūr in January 1763 ostensibly to restore him to the throne though even the troops nicknamed him the Ghaib or resurrection Raja. At Kumsi Haidar found the former prime minister of Bednūr in prison and obtained from him such information that refusing all the offers of money made by the Raja to buy him off which

were raised in amount the nearer he approached, he pressed on to Bednūr. Diverting the attention of the garrison by a feigned attack at the barriers, he entered with a column by a secret path revealed to him by the prime minister, and captured the city in March 1763. The Rānī, with her paramour and adopted son, fled to Ballālāyandurga, leaving orders to set fire to the palace. The inhabitants *en masse* took shelter in the surrounding woods, and the triumphant Haider, extinguishing the flames and sealing up the houses, acquired a booty estimated at twelve millions sterling. The Rānī, her lover, and her adopted son were all seized by Haider and transported to the fortress of Madhugiri (Tumkur District), together with even the pretender whose cause he had ostensibly espoused. They were liberated when the Mahrattas took Madhugiri. Vīrammāji died on the way to Poona, and Sōmasēkhara ended his days there unmarried (See under *Keladi* for further information).

Basavapatna

The founder of the Basavapatna family appears to have been Dhūma Rāja, who, coming from, it is said, Vijayanagar, formed an alliance with a Bednūr family, and established himself at the Dhūmī hill, near Holalkere. His son, Kongana Nāyak, built the fort of Basavatapna, and subdued a territory extending from Harihar and Kumsi to Tarikere and Bagur. Hanumappa-Nāyak, who succeeded, appears to have been confirmed in these possessions by the Vijayanagar sovereign, and to have founded Sante Bennur. The family were driven from their northern possessions by the Bijapur army under Ran-dulha Khān in 1636, and then established themselves at Tarikere (Kadur District).

At the beginning of the 18th century, the north-east of the District was the scene of much contest between the Chitaldrug and Bednūr troops, culminating in 1748 in the decisive battle of Mayakonda, in which, as already described, Madakeri-Nāyak, the Palegar of Chitaldrug, was slain, and Chanda Sahib, the claimant to the Nawabship of Arcot, who had espoused his cause, was captured by the Bednūr

army The Nawab of Savanur then held it for a short time until the whole with Bednūr was included in Mysore by the conquests of Hudar Ali His successes in Sunda and Savanur led to an invasion by the Mahrattas in 1765 repeated on several occasions afterwards From the devastation of Shimoga and the open country in 1791 by the army under Parasuram Bhoir a famine ensued

In January 1783 when Tipu Sultan succeeded his father Mysore being still at war with the English a force from Bombay under General Mathew landed at Kundapur and carrying by assault the formidable defences of the Hosangadi pass—which bristled with a continuous series of batteries and breast works headed at the top by the strong fort of Haidarghar the whole held by about 17 000 men—occupied Bednūr or Haidarghar on the 27th the governor having fled But an expedition which began so well was deemed to end in disaster The English general was deluded into a false security and instead of making adequate preparations for defence scattered his force in various detachments over the country On hearing of this the Bombay Government superseded him by another officer but on his way the latter was captured by pirates and killed Tipu appeared in April with a large army recovered Kavalidurga and Haidarghar on one side and Anantapur on the other and invested Bednūr The garrison held out till the 30th when they were forced by starvation to capitulate which they did on condition of being sent to the coast But in violation of the terms they were marched off in irons some to Chitaldrug but the majority to Seringapatam where numbers were put to death with the most inhuman cruelties

After the death of Tipu Sultan and the restoration of the Hindu government in 1799 parts of the District were ravaged by Dbundia Wahag a prisoner at Seringapatam who had obtained release at the time of the capture but he was speedily put down by Colonel Arthur Wellesley being killed in a cavalry charge led by that illustrious warrior in person The tranquillity thus restored continued until

1830 But during the greater part of this time the principal authority had been left too much in the hands of one family. At the same time the mode of farming the revenue laid the people under burdens from which there was no redress. Matters grew to such a pitch that in 1830 the *gaudas* and ryots assembled in *kūtas* or indignation meetings at Basvapatna and Honnali. The discontent was fomented by a pretender to the Bednūr throne, named Būdī Basavappa, who formed insurgent bands, and these again were shortly joined by Rangappa-Nāyak, the head of the Tarikere family, and by numbers of Thugs, professional stranglers. The Rāja's troops failed to put down the new open revolt, and he was obliged to seek the aid of a British force. The suppression of the insurrection in 1831 was followed by an inquiry into the causes which had led to it, and as the result of that investigation, the government was placed under British Commissioners. The District has since that time not only enjoyed the blessing of peace, but has advanced in a course of prosperity which has effectually obliterated all traces of the disorders by which it was previously afflicted.

In 1862 the Shimoga District, Kadur and Chitaldrug, were formed into the Nagar Division. In 1879 the Division was abolished. In 1882 Davangere taluk was transferred to this District, but in 1886 reverted to Chitaldrug.

B ARCHÆOLOGY

The inscriptions found in this District are collected in *E C VII, Part I, Shimoga District* and *E C VIII, Part II, Shimoga District* and in the *Mysore Archæological Reports*.

Antiquities
of Belgāmi

Mr Rice describes at length in the above mentioned volumes the antiquities of the District. The most striking examples of architecture in the District are at Belgāmi and Bandahke. Belgāmi was the royal city or capital (*Rājadhāni*) of the Banavāsī Twelve Thousand. It was a place of such antiquity even in the 12th century that it was styled the *Anādi Rājadhāni*, or immemorial capital, and *Pattunaryāla*.

Tatarmmane (the home from which a bride goes forth on becoming a wife) the mother of cities. It contained five *Mathas* and three *Puras* besides seven *Brahmapuris*. The first were connected with temples to Vishnu Siva Brahma Jina and Buddha. The principal temple seems to have been that of Dakshina Kedarasvara to which was attached the Kochiyamatha. At the head of this were a very learned and distinguished line of high priests a branch of the Kalamukhas forming the Sakti parish of the Muvurakoneya santati of the Parvatavali. The first one named is Kedarasakti whose disciple was Srikantha whose disciple was Somesvara (with dates 1031 1113) who had a younger brother Vidyabharana. Somesvara's disciple was Gautama (dates 1129 1149) whose disciple was Vamasakti (dates 1156 1193), whose disciple was Jannasakti. There was also a Vamasakti disciple of Srikantha in 1215. And there was besides another line from Kedarasakti namely his disciple Rudrabharana whose disciple was Valmiki in 1078. This *matha* was not only celebrated for learning but was a centre for dispensing medicine to all manner of sick persons and like the mediæval monasteries in Europe for distribution of food to the destitute and mendicants of all classes and sects. Another principal temple was the Pancha Linga said to have been founded by the Pandvas. This had attached to it the Kalamukha Brahmachari sthana at the head of which in 1036 was the celebrated Lakulishvara founder of the Pasupata sect whose system of philosophy is frequently referred to as the Lakula siddhanta and the Lakulamanya.

Belgam is now an ordinary small village of 1 100 inhabitants. Several of the temples of which it formerly boasted still exist but mostly in ruins. The Kedarasvara is perhaps the best preserved. It is a triple temple originally of very ornate design in the Chalukyan style. In front of each of the pinnacles is the Hoysala crest but this must have been added after the Banavasi country had come into their possession as the temple is evidently of much older date.

and there is no Hoysala inscription in support of a claim for them as the founders of it. But the erection of the Kēdārēśvara temple at Halebīd was almost certainly suggested by this one, for Abhinava-Kētala-Dēvi, who was associated with Ballāla II in its erection, was, it would seem, connected with the neighbouring city of Bandalike (See *Shikarpur* 235). The Kēdārēśvara at Belgāmī is situated behind the embankment of the Tāvarekere or lotus tank which is frequently mentioned in the inscriptions. The Kōdiya-matha, as its name indicates, must have been situated near the *Kōdi*, or waste well. Another temple still standing is the Panchalinga, towards the north, near the Jaddi tank. The sculpture in it must have been very fine, especially the Umāmahēśvara groups. Two *Dvārapālakas* in the Bangalore Museum were brought, Mr Rice believes, from here. There is a Nilakantha shrine, the *linga* in which is of green stone. North of this is the Tripurāntaka, a double temple, with rich carving in the doorways and the perforated screen between the two chapels. In the middle of the village is the Sōmēśvara temple, now a large and plain building. The Jain *basti* is represented by a massive seated Jina in the yard of a private house. There is also a colossal fallen statue of Jina to the east of the village. The Bauddhālaya was to the west of the Jiddi tank, where a large mutilated figure of Tāra Bhagavatī is still lying. North-west of the village is a small island called Sīta-honda, which contained a temple of Jalasayana and a number of Vishnu shrines. The images in those temples are reported to have been removed to Shimoga.

The most striking object standing in the village is perhaps the Bhērundēśvara pillar, now called the Garuda-kambha. It is a lofty and elegant monolith, with a figure of the Ganda-Bhērunda at the top. (Its dimensions are as follows—the shaft, to the top of the cornice of the capital, 30 feet 6 inches high, the Bhērundēśvara at top, about 4 feet high, the bottom of the pillar is 1 foot 6 inches square to 8 feet from the ground, above that it is circular, of the same

diameter with decorative bands The Bherunda is a double headed eagle with human body) It was erected according to the inscription on its base (*Shikarpur* 151) by Chamunda Raya in 1047 and probably fixed the length of the *Bherunda* pole used in measuring land (See *Shikarpur* 120) Near to it is the Sula Brahma stone representing a man about to leap from the top of the pillar supported by celestial nymphs with another tableau showing him fallen upon the points of a row of stakes This act of suicide was apparently in fulfilment of a vow (See *Shikarpur* 152)

Bandalike or Bandanike as it is called in the inscriptions Bandalike must have been a splendid city in its time and appears to have been the *Rajadhāni* (royal city or capital) of the *Nagara* *khanda* Seventy It is now entirely deserted and overgrown with teak trees Of the ruined temples there the *Somesvara* had an elaborately carved screen on each side of the doorway extending from the ground to the roof representing on one side the *Rāmāyana* story and on the other the *Bharata* story The former has been much damaged by fire The *Trimurthi* temple must have been a handsome building It has a fine *Simha lalata* with the regents of the cardinal points in front of a dome which has tumbled down In the centre of this carving is an empty niche formerly occupied by some image There is also a ruined *Sahasralinga* temple The *Jina basti* must have been a large and important one On the pillars are inscriptions engraved in *Bandhas* or wheels with a key to their interpretation (See *Shikarpur* 229 to 234 and 228 to 231) Near the *Trimurthi* temple is a sculptured stone representing the acts described in *Shikarpur* 249 In the lowest tableau the queen is seen giving away her cloth to her attendants preparatory to the last farewell In the middle tableau on one side are the attendants tanding round the cloth over which is held an umbrella of honour while on the other side is seated a man in penance surrounded by others with drawn swords preparing to cut off his head

Tālgunda
temple

The Pranamēśvara temple at Tālgunda, of which hardly anything remains, is of special interest on account of its antiquity and associations. It professes to have been founded by Brahma, and the fine pillar inscription in front of it says that Sātakaini and other great kings performed worship there which would take us back to the 2nd century. Close by is the Biahma tīrtha, the five *lingas* at which are said to have been set up by the gods Biahma, Indra, Chandra, Yama and Agni. The tank carved with lotus, the construction of which it is the object of the pillar inscription to record, is also still there. Tālgunda moreover was the birth place of the Kadambas.

Jain Basadis
at Humcha

The Jain *Basadis* at Humcha must have been fine buildings, especially the Pancha-basadi, described in *Nagar* 35 and other inscriptions as Urvvi-tilakam, a glory to the world. They are now in ruins. Of other buildings, the Champaka-sadasa *matha* at Anantapur must also probably have been a superior building. There still remain some fine stone elephants, and a splendid tank belonging to it, built round with steps of laterite. The plan of these institutions, of which an instance also occurs in the Basavanabyana at Nagar, is a Langa temple in the middle of a large tank or pond, surrounded by water (like the golden temple of the Sikhs at Amritsar), which is approached by a stone causeway. The best preserved of the old buildings of this part of the State is no doubt the Aghōrēśvara temple at Ikkēri, the second capital of the Keladi kings. It is a stone building of large and well proportioned dimensions, erected after the style of the Dravidian temples of Vijayanagar. The Nandi pavilion in front is a particularly handsome structure. On the floor in front of the shrine in the temple are effigies of three of the Keladi kings, doing obeisance, with the name inscribed above each. One of them, Huchcha (mad Sōma-sēkhara) is represented as manacled and fettered (See *History* above). The distance between the central pillars was adopted as the standard measure for garden land. A rod

of this length equal to 18 feet 6 inches was the spice called *Daga* allowed for one tree and the *Shist* or assessment was fixed on 1 000 such *Daga* at various rates

At Sante Bannur is an imposing mosque erected by Rana *Mosque at Sante Bannur*
 Dulha Khan on the site of the Ranganatha temple which was destroyed. The mosque was desecrated in revenge by the ousted chief and has never been used. The *Honda* or reservoir in front faced round with flights of steps had ornamental pavilions at the angles and in the centre. These were improved with elegant additions by the Muhammadans but are in a ruinous condition. A fountain used to play from the middle one.

Further information regarding the temples mosques and other antiquities of this District will be found in Vol II, Chapters V and VI of this work.

SECTION III—ECONOMIC

GENERAL AGRICULTURAL CONDITIONS

The main occupation of the people of the District is agriculture 68 per cent of the actual workers among the population being dependent on it for their subsistence and only 32 per cent following other vocations such as industries trade public services and the like.

The soil in the District is of a varied nature and widely *Soil*
 differs from place to place. The kind of crops raised therein depends mostly on the nature of the soil coupled with other conditions. The following is a brief description of the soil in the several taluks of the District.

Shimoga Taluk—The soil in the taluk may be classed into three broad divisions:—

(1) Black loamy soil which is fit for the cultivation of paddy, sugar-cane cotton wheat Beugal gram and jolam.

(2) Red sandy soil which favours the growth of dry crops, such as ragi, jolam, horse-gram, and ground-nuts. This soil is also suitable for the cocoa-nut cultivation.

(3) Red laterite which is fit for the cultivation of green-gram, black-gram and *til* and for the growth of fruit trees, chiefly mangoes.

Channagiri Taluk The black cotton soil to the north-west from the Sulekere northwards is the richest in the District and is best suited for the cultivation of cotton, jolam and ragi. There are also some gardens. Sugar-cane cultivation is abundant along the Sulekere channels.

The sandy soil found in the north-west of the taluk is suitable for the cultivation of ground-nuts.

The southern portion of the taluk consists mostly of stony red soil. The rest of the taluk consists of red and black cotton soil where ragi, jolam, cotton, togari and horse-gram are extensively grown.

Sugar-cane, areca, cocoa-nut and rice do not thrive well in the taluk.

Honnali Taluk The soil in the taluk may be classified as—(1) Black cotton, (2) red soil and (3) mixture of red and black and (4) sandy soil.

The black cotton soil is very well suited for growing cotton, wheat, bile jola, mungar jola and pulses. The red soil is quite suited for growing mungar jola, ragi, sawey, doll, etc.

Shikaripur Taluk—The soils found in the taluk are chiefly reddish-brown containing much sand, except in the low-lying grounds, where they are much duller in colour and more clayey. In the extreme north, however, and on the banks of the Choradi, dark-brown and black soil of a superior description is found on which wet crops are raised. In the east where dry crop cultivation is the most successful, the soil is less sandy and more like loam except in the high-lying wet crop land.

Sorab Taluk—The soil of this taluk is generally of laterite and as such it does not retain moisture to a considerable time. But as there is abundant rainfall and the surface strata of the land retains so much of the properties as are

Area of
different
crops

Area of different crops raised in the district during the five years 1920-21 to 1924-25 is shown in the following statement —

Year	Food Grains	Oil seeds	Condi- ments and spices	Sugar cane
1	2	3	4	5
1920-21	490,252	19,789	7,129	7,623
1921-22	502,142	14,665	10,906	3,924
1922-23	499,361	16,025	8,796	8,755
1923-24	488,687	17,043	9,932	7,072
1924-25	476,771	23,339	12,395	8,060

Year	Fibres	Drugs and Narcotics	Fodder crops	Miscella- neous crops
	6	7	8	9
1920-21	10,523	657	614	12,002
1921-22	6,204	2,360	1,570	999
1922-23	9,241	635	566	12,671
1923-24	11,512	550	1,022	13,178
1924-25	14,223	1,886		21,835

Number and
extent of
holdings

The following table shows the number and extent of different holdings under cultivation in the district during 1920-21 to 1924-25

Year	Holdings not exceeding an acre in extent		Exceeding one acre and not ex- ceeding five acres		Exceeding five but not exceeding ten	
	No	Extent	No	Extent	No	Extent
1	2	3	4	5	6	7
1920-21	4,319	5,232	30,037	101,411	27,947	219,207
1921-22	4,221	3,241	30,283	107,983	27,817	218,446
1922-23	8,904	22,101	28,558	101,423	27,175	216,190
1923-24	4,264	3,999	30,471	116,244	27,986	222,150
1924-25	4,552	4,294	30,571	117,529	28,327	227,520

Year	Exceeding 10 but not exceeding 10		Exceeding 10 but not exceeding 100		Exceeding 100 but not exceeding 500		Above 500 acres	
	No.	Extent	No.	Extent	No.	Extent	No.	Extent
	8	9	10	11	12	13	14	15
1920-1	860	190 0	5613	13010	601	8 921	9	20 0

AGRICULTURAL LOANS

Kinds of
loan issued

The following statement shows the allotments sanctioned and the amounts actually advanced on account of Takavi and other loans during the years 1922-23 to 1924-25

Year	Amount allotted	Takavi		Land Im- provement		Irrigation Wells	
		Amount sanctioned	Amount disbursed	Amount sanctioned	Amount disbursed	Amount sanctioned	Amount disbursed
	Rs	Rs	Rs	Rs	Rs	Rs	Rs
1922-23	6,000	1,000	1,000	850	1,100		
1923-24	16,000	9,225	8,725	1,550	1,025	4,810	4,810
1924-25	21,500	1,500	1,500	5,125	3,950		

IRRIGATION

Tanks

There are 7,797 tanks in the district of which 566 are major tanks with a revenue of more than Rs 300 under them and the rest are minor ones. Of these, the numbers of major and minor tanks which have been restored and brought up to the standard amount to 191 and 217 respectively.

The following statement shows the number of tanks in each taluk classified according to the revenue of the lands under them.

Name of Taluk	Number of tanks with a revenue of					Total
	Less than Rs 300	Between Rs 300 and Rs 500	Between Rs 500 and Rs 1,000	Between Rs 1,000 and Rs 3,000	Above Rs 5,000	
1 Shimoga	671	50	18	3		742
2 Channagiri	165	13	8		1	187
3 Honnali	88	51	1			140
4 Shikarpur	1,225	73	55	14		1,367
5 Sorab	1,125	81	67	17		1,290
6 Sagar	862	33	20	1		916
7 Nagai	1,191	12	1			1,204
8 Tirthahalli	1,194	50				1,244
9 Kumsi sub- taluk	245	22	11	2		280

There are about 74 miles of channels in the district irrigating an area of 9 222 acres. The more important of them as per details are given below —

Irrigation Channels.

Name of channel	Length of channel	Taluk commanded	Area irrigated in acres	Area in sq. miles
	Miles			Sq. miles
Bulekere	1	Channarayana	4 116	10 1 0
Sagar	0-0-0	Honnali	1 688	4 201
Sakur	13 10	Shikarj	1 15	0 99

The subjoined statement gives the irrigated area under each of the various sources of irrigation in the district during 1922-23 —

Area irrigated under each source

Name of Taluk	Area irrigated—in acres				Total irrigated area in acres
	Channels	Tanks	Wells	Other sources	
Shimoga	4 5	33 81			38 06
Channarayana	3 690	4	1 6 4	1 000	138 06
Honnali	1 239	7 08		100 270	10 6 3
Shikarj	1 307	3 0 0		36	33 13
Sorab		41 046		14 088	56 34
Sagar		11 691		4 6 6	30 47
Nagar		14 110		19 907	34 117
Turthahalli		11 170		8 94	39 4 9
Total	0 0 0	155 000	1 879	310 590	480 1 0

The large area shown as irrigated from other sources is due to the wet and garden lands in the *malnad* taluks being mostly dependent on rain for their water supply

Tank
Panchayets.

The particulars of tanks in respect of which tank panchayets have been constituted under the Tank Panchayet Regulation are given below

Sl No	Name of taluk	Name of tank
1	Shunoga	Nidige tank
2	Kumasi (Sub Taluk)	Mandaighatta tank
3	Channagiri	Nallur tank
4	Shikarpur	Gama tank
5	Sorab	Mavalli tank
6	Do	Andige tank

FORESTS

Besides sandalwood which grows almost all over the district, the forests yield an abundant supply of all kinds of timber, the more important of which are teak, blackwood, honne, matti, bilvara, bhogi, jambe, dindiga, hunal and nandi

MINES AND QUARRIES

See under Geology.

ARTS AND MANUFACTURES

Chief industries

The chief industries of the district are the manufacture of tiles, bangles and country carts, extraction of cinnamon oil, manufacture of coarse cotton cloths and towels, iron articles, brass and copper vessels and jaggoiy, carpentry, smithy and pottery. The different kinds of oil made in the district are generally gingelly, castor, ramtil, cocoanut, linseed, safflower and pundi

The district is noted for its beautiful carving in sandal wood and ivory. This industry is carried on in the Sagar and Sorab Taluks by a class of people known as "Gudigars." Sorab is the principal seat of this industry.

A short description of the industries in each taluk in the district is given below — Industries carried on in the several taluks

Shimoga Taluk — Manufacture of coarse cloths cabinet making cart making and pottery are the chief industries in the taluk.

Channarayana Taluk — Manufacture of coarse blankets and cloths and pottery are carried on in the taluk. As teak wood is easily available in the taluk manufacture of country carts is carried on on a pretty large scale by about 28 firms. There is a glass bangle factory at Nallur a populous village in the taluk.

Honnali Taluk — Pottery and manufacture of coarse blankets and cloths are carried on on a small scale in the taluk.

Shikarpur Taluk — A class of Muhammedans known as 'Sikligars' make various sorts of knives sickles and agricultural implements. There are also hand looms in some of the villages where coarse *panches* and towels are made. Carpentry is also carried on to some extent.

Sagar Taluk — Carpentry smithy and sandal wood carving are carried on to some extent. Tiles are manufactured at the Varoda Tile Works. Rattan baskets boxes etc. are prepared on a small scale by the Mahratta Kunbis who have settled down in some parts.

Nagar Taluk — Making of rattan boxes and baskets by the Kunbis and extraction of cinnamon oil are the only industries in the taluk.

Kumsi Sub-Taluk — Manganese mining forms the chief industry. This is worked by the Workington Iron and Steel Company. The Forest Department have established a saw mill at a short distance from Kumsi. Manufacture of country carts and of iron pans for boiling sugar cane juice is carried on in some parts on a pretty large scale.

The following is a list of large industrial establishments in the district

Name of Establishment	Class or description of Industry	Average number of persons employed daily	Whether worked by Mechanical Power or Hand Power
<i>Shimoga</i>			
1 M A T Z Co's Rice Mill	Rice Milling	30	Mechanical Power
2 M A E & Co's Rice Mill	Do	25	do
3 Government Saw Mills	Sawing	30	do*
<i>Sagar</i>			
4 Varada Tile Works	Manufacture of Tiles	30	do
5 Maharaja Tile Works	Do	30	do
6 Gudigar Co operative Society	Sandalwood carving	25	Hand Power
<i>Tirthahalli</i>			
7 Tirthahalli Tile and Sanitary Works	Manufacture of Tiles	30	Mechanical Power
<i>Bhadravathi</i>			
8 The Mysore Distillation and Iron Works	Iron Melting	250	do

* Owned by Government

EXPORTS AND IMPORTS

The following statement furnishes particulars regarding the exports and imports of the chief articles in the district. The figures are only approximate

(a) EXPORTS

No	Article	Chief place of Export	Approximate quantity	Value
			Tons	Rs
1	Ragi	Vellore	7,402	905,000

Marts

A good deal of the internal trade of the District is carried on in the weekly and other periodical markets and *santes* which are held in almost every important place in the District as also in the annual *jātras* and fairs held at some of the chief centres

The following are the largest weekly fairs held in the District.

Place	Taluk	Day	Number of visitors
Shimoga	Shimoga	Tuesday	1,500
Benkupur	Do	Monday	1,000
Hole-Honnur	Do	Saturday	1,000
Anaveri	Do	Thursday	1,000
Ayanur	Do	Sunday	1,000
Nyamti	Honnah	Friday	1,000
Siralkoppa	Shikarpur	Sunday	3,000
Shikarpur	Do	Saturday	1,500
Sagar	Sagar	Thursday	2,000

MEANS OF COMMUNICATION

The concluding portion of the line from Birur (Kadur District) to Shimoga lies within the District for a distance of 15 miles and contains stations at Visarballi Bhadravati Bidarc and Shimoga. This is the only line open for passenger traffic in this District. There are also portions of the Bhadravati Agasanahadlu and Bhadravati Kemmanagundi tram ways in this District used for the carriage of fuel and ore to the Iron Works at Bhadravati. A further extension of the metre gauge line from Shimoga to Arsalu was put in hand in 1919 and was stopped in 1921 due to financial stringencies. There is however a prospect of resuming construction of this line in the near future.

Railways

The length of State Fund Roads in the District is 297½ miles maintained at an annual cost of Rs 55,227. District Roads cover a distance of 519 miles and cost Rs 50,710 for upkeep. Details of each class of roads are subjoined.

Roads.

of the State Famine is therefore of rare occurrence in the district—particularly in the *malnad* and *semi-malnad* taluks. For this reason, the provisions of the Famine Code relating to the preparation of the programme of famine works are not made applicable in respect of the *malnad* taluks of the district.

EDUCATION

Number of
schools and
scholars

There were 1,057 schools during 1924-25 with a strength of 31,721 pupils. The schools are classified thus—2 High Schools for boys (1 English and 1 Kannada), 70 Middle Schools, 947 Primary Schools, 6 Special Schools and 32 Village Indigenous Schools both for boys and girls. The number of girls is distributed among the several grades of institutions as follows—111 girls were in Middle Schools, 4,968 in Primary Schools and 44 in Village Indigenous Schools. The average number of square miles, number of villages and number of persons served by each school in the district was respectively 3.8, 1.6 and 466. The following statement shows the several grades of schools together with their strength.

Area	4,030	Sq Miles	
Inhabited villages	1,736		
Population	4,92,560	(Males 257,150)	
		(Females 235,410)	
	No	Boys	Girls
High Schools	2	438	
Middle Schools	70	2,487	111
Primary Schools	947	23,058	4,968
Special Schools	6	168	
Village Indigenous Schools	32	447	44
Total	1,057	26,598	5,123
	Total	31,721	

Inspecting
Officers

Besides the Inspectors of Primary and Secondary Education and of Science, 4 Education Inspectresses, the Assistant Inspectress of Urdu Girls' Schools and the Assistant Inspector

of Sanskrit Education who had their Head quarters at Bangalore and visited the district for the inspection of the schools under their respective charges there were one District Inspector six Assistant Inspectors and one Assistant Inspectress entrusted with the inspection of the schools in the district who had their head quarters in the Shimoga District. The statement given below shows the grades and numbers of the several Inspecting Officers in the district.

Designation of the Inspecting Officer	Territorial jurisdiction	Head quarter	Number of schools under direct control
District Inspector Shimoga	Revenue District of Shimoga	Shimoga	All Middle and Incomplete Middle Schools
Assistant Inspector Shimoga	Shimoga and Kumta	Shimoga	Primary School
Assistant Inspector Channagiri	Channagiri	Channagiri	do
Assistant Inspector Shikarjpur	Shikarjpur and Hennali	Shikarjpur	do
Assistant Inspector Nagar	Nagar and Borai	Nagar	do
Assistant Inspector Tirthahalli	Tirthahalli and Nagar	Tirthahalli	do
Assistant Inspector of Urdu Primary Schools	Shimoga, Kadur and Chitaldrug	Shimoga	Urdu Primary Schools
Assistant Inspectress of Kannada Primary Schools for girls	Shimoga and Chitaldrug	Shimoga	Kannada Primary Schools for girls

VACCINATION

The establishment for the district during 1925 consisted of one Deputy Inspector and 22 Vaccinators under him including one Reserve Vaccinator. The following table shows

the total number of children vaccinated during the years 1921 to 1925

Year	Number of children vaccinated		
	Males	Females	Total
1921-22	8,617	6,133	14,750
1922-23	5,468	4,778	10,246
1923-24	4,352	8,704	13,056
1924-25	4,983	7,498	12,481

The average annual number of deaths from small-pox during the previous years was 129 which works out at 0.88 per 1,000 of population

SECTION IV ADMINISTRATION

Divisions

The District is divided into 3 sub-divisions and 9 taluks. The following table shows the names of Sub-divisions, Taluks, etc.

Name of Sub-Division	Name of Taluk	Number of Hobbs	Number of villages		Population in 1921	Population for square mile
			Government	Inam		
1 Shimoga	Shimoga	4	261	45	74,369	144
2 Tirthahalli	Channagiri	4	246	1	76,552	164
	Honnali	3	159	9	64,125	194
	Tirthahalli	5	246	1	56,574	119
	Kumsi (sub-taluk)	2	90	3	16,786	100
	Sagar	6	246		51,550	77
3 Sagar	Sorab	6	307	5	58,901	133
	Shikarpur	5	192	8	55,523	130
	Nagar	5	205	1	38,180	72
	Total	40	1,952	73	4,92,560	122

- 12 The Sub-Division Officers of Sagar Sub-Division, Tirthahalli, the Treasury Assistant Commissioner in charge of Shimoga Taluk are *Ex-officio* I Class Magistrates exercising criminal powers under the preventive sections of the Criminal Procedure Code. So also, all Amildars and the Deputy Amildar of Kumsi are *Ex-officio* II Class Magistrates.

LAND REVENUE

The following statement shows the demand, collection and balance of Land Revenue for the five years ending 1922-23

Year	Total demand	Remissions	Net recoverable demand	Actual collections	Balance	Percentage of collections
1918-19	15,44,889	66,883	14,78,006	10,71,347	4,06,659	72 1
1919-20	18,59,497	40,898	18,18,599	16,46,317	1,72,282	91 1
1920-21	16,18,428	11,016	16,07,412	13,89,630	2,18,782	88 9
1921-22	16,55,881	13,464	16,42,417	15,20,637	1,21,780	91 6
1922-23	15,73,131	20,251	15,52,880	14,44,824	1,08,056	93 9

MISCELLANEOUS REVENUE

The following are the statistics for the two years, 1921-22 and 1922-23

Year	Total Demand	[Collections	Balance
1921-22	44,233	34,887	8,513
1922-23	47,423	41,108	5,102

LOCAL BOARDS AND MUNICIPALITIES

Besides the District Board there are nine Taluk Boards Local Boards and 100 Village Panchayets in the District. The following statement shows the constitution of the District and Taluk Boards in the District —

Name of Board	Ex officio	Elected Non-officials	Nominated	Total	Date of Constitution
District Board Shimoga	1	4	4	36	1-10-23
Shimoga Taluk Board	4	1	6	17	1-10-19
Channarayana Taluk Board	3	9	4	16	10-11-1920
Honnali Taluk Board	3	8	4	17	8-6-19
Shikarapur Taluk Board	3	9	4	16	1-9-19
Sorab Taluk Board	3	7	6	15	10-11-19
Sagar Taluk Board	4	7	4	15	1-10-1922
Nagar Taluk Board	3	8	6	16	1-7-19
Tirthahalli Taluk Board	3	6	5	14	1-11-19
Humel Taluk Board	3	8	6	16	1-9-19

	Vice Presidents		Presidents	
	Official	Non-official	Official	Non-official
District Board		1	1	
Taluk Boards		9	9	

The following table shows the receipts and expenditure of the District Board during the years 1920-21 and 1921-22 —

Receipts			
Heads	1920 21	1921 22	
1	2	3	
Local Cess	86,055	92,319	
House Tax ..	20,093	15,581	
Tolls and fees	4,008	4,827	
Fees and fines .	21,660	19,997

POLICE AND JAILS

The Police administration of the District is conducted by the District Superintendent of Police who is subordinate to the Deputy Commissioner of the District. The Police establishment consisted of 10 Inspectors 11 Sub Inspectors 17 Sergeants 10 Head Constables or Jamadars and 160 Constables in the year 1923-24. There were besides one Inspector one Jamadar five Sergeants or Daffedars and 32 Constables on temporary establishment in connection with the Special Magistrates Courts Sandalwood Smuggling Prevention Duty and Bindravati Iron Works and Tram way Executive Engineer's Office. There were 35 Police Stations and 41 Out-Posts in the same year.

The following table shows the sanctioned strength and the cost on the Police force during the year 1923-24 —

	Particulars	Inspectors	Sub Inspectors and Jamsdars	Daffadars	Constables	Head Stations	Sub Stations	Out Posts	Cost of Force

MEDICAL

There is a District Civil Hospital and a Female Dispensary in Shimoga Town, besides Local Fund Dispensaries in all the Head quarter Taluka and the Sub Taluk as well as in some of the more important stations in the District. A list of Dispensaries is given below -

Female Dispensary Shimoga	Male Dispensary Sagar
Maternity Shimoga	Female Dispensary Sagar
Dispensary at Bhilavati	Maternity Sagar
Channarayana	Dispensary at Kallurkat
Santhebenur	Nagar
Hirahalli	Mandagadde
Nayana	Munchali
Shikarapur	Katte
Shiralkoppa	Firthahalli
Sorab	Megaravalli
Anantapur	Maternity at Firthahalli
Anavatti	Dispensary at Kumi

In addition to these 6 Dispensaries have been established out of Malinal Improvement Funds at Agumbe and Hulikere in the Firthahalli Taluk, Avalgodu and Fargth in the Sagar Taluk, Sulegodu in Nagar Taluk and Chandrautti in the Sorab Taluk. The Wesleyan Mission also maintains a small maternity at Mandagadde in the Firthahalli Taluk.

The total number of patients both indoor and out door treated in all the hospitals and dispensaries during the calendar year 1925 was 273 190 and the total cost of the establishment medicines etc. of all the hospitals and dispensaries amounted to Rs 73 111 during the year.

SECTION V —GASITILLER

Anantapur — Village in the Sagar taluk 15 miles south east of the *Ashta* on the Shimoga Gersoppa road. In 1838 it was included in Nagar taluk but afterwards till 1875 was again the head quarters of a taluk bearing its own name.

Anantapur

It is now the head-quarters of the Anantapur *hobli* Population, 333

The name of the town, it is stated, should be *Ānandapura*, bestowed upon it in the time of Sōmasēkhara Nāyak, of the Keladi family, on account of the *ānanda*, or pleasure, he enjoyed in the company of a mistress named Champaka Sarasi who lived here. But there are several inscriptions of the Chālukyas on the spot, dated in the 10th century, which show that it was a place of importance long before the rise of the Keladi house. From one of these it appears that the town was originally named after Andāsura, who, in the account of Humcha, it will be seen, opposed himself to Jinadatta in the 8th century, and was defeated. It was several times the subject of attack during the commotions of Haider and Tipu's time, and during the insurrection of 1830.

Besides the high road from Shimoga to Sagar, there are cross-roads hence to Shikarpur northwards, and to Kallurkatte and Tirthahalli southwards.

This place figures rather prominently in the annals of the 18th century warfare. Just before the close of the Second Mysore War, this place had been surrendered by Ayaz Saheb (sometimes called Hyat Saheb), Tipu's *Chēla*, Governor of Bednūr. An English detachment was marching to take possession of the place. The garrison and the inhabitants had sent an agent to offer their submission. On hearing of this advance, Luttf Ali Beg, who had been sent by Tipu to supersede Ayaz in the Government of Bednūr, sent a force 300 strong to occupy the place. On the approach of the British detachment, repeated signs were, it is said, made to it to withdraw and on its persisting to advance, the flag of truce was fixed at. The British, however, confident of admission, gave no quarter to the garrison on its capture by assault. These appear to be the actual facts but a writer in the *Annual Register* of the time exaggerated the affair, which is thus contradicted by Wilks in his *Historical Sketches*, (II 57).

Such is the amount of fact involved in the atrocities imputed to the English on the capture of Anantapoor. The touching

tale descriptive of 400 beautiful women all bleeding with the wounds of the bayonet and either already dead or expiring in each others arms the soldiers stripping them of their jewels and committing every outrage on their bodies while others rather than be torn from their relations threw themselves into large tanks and were drowned has long since been traced to its author a silly young man whose *amende honorable* for describing his adventures into a romantic tale is not so generally known as the historical record of that supposed event in the respectable pages of the *Annual Register*. Of a conduct so atrocious if true the reprobation could not be too severe and if unfounded the disproof could not be too anxiously established the author of this work has therefore not neglected the ample means within his reach of ascertaining that the tale in all its parts is destitute of every shadow of foundation in truth Without the fort the body of a woman was some days afterwards found who had fallen into a well but it was not known in what manner or on what occasion the accident had occurred

It is not a little curious that the above baseless tale of atrocity is told in M Michaud's work *History of Hyder Aly and Tippoo-saib* (1899) where it is stated of Tipu that he took prisoners the whole of General Mathews army and avenged with the greatest ferocity the cruelties the English had committed in the town of Annapore (i.e. Anantapur)

The old Fort is in ruins The country round about is a magnificent piece of *Malnad* Mrs Bowring thus describes the approach to Anantapur in a letter dated Anantapur December 20 1868 —

The road was very pretty running through jungle with a peep from time to time of the distant country The jungle was high beautiful and graceful clumps of bamboos meeting over our heads and forming natural arches across the road The latter part of the drive was through a splendid avenue of Dhooпада trees for at least three miles up to the bungalow and so lovely was the avenue that to see it was worth the whole journey The Dhooпада tree is a giant with large deep green leaves and round foliage with perfectly scarlet masses here and there—not of flowers but of leaves just turning

I walked with L to the old fort, to see a big gun, which had, however, been blown up. The fort is a picturesque ruin, and as we turned to leave it the scene was very striking. On one side the sun was setting in golden glory over the grass-grown walls, and at the same moment the full moon was rising in silvery beauty in a cold blue sky, reflected in a large sheet of water. Altogether it was a lovely scene" (Lewin Bowring's *Eastern Experiences*)

Āraga

Āraga A village in Tirthahalli taluk, a few miles north of the *kasba*. Population, 428

In old inscriptions it is called the capital of the Male-rāja, or hill kingdom, and was in the Sāntalige Thousand. The Sāntāra kings of Hombucha ruled it under the Chālukyas in the 14th century, and later on under Vijayanagar, it comprised 3 cities and 18 *kampanas*, and gave its name to the kingdom of Āraga, which was governed by a prince of the royal family. Thus the brother of Harihara II was ruling over Āraga in 1377, Vnūpanna, son of Bukka I, in 1378, and Chikka Rāja, son of Harihara II, in 1381. Vnūpanna ruled over both Āraga and Kalasa. In 1403, Vithala, grandson of Santapa, a minister of Harihara, and a Brahmakshatri, ruled over it. His authority extended over Āraga, Gutti, Barakanur, Mangalore and the Kainātaka kingdom as far as the western ocean (*E. C. VI*, Kadur District, Introd 22). The Keladi chiefs next held it, until they were subverted by the conquests of Haidar Ali.

Bandalike
or Banda-
like

Bandalike or Bandanike A ruined and deserted village in the north of Shikarpur taluk. It was in the earliest times the capital of the Nāgarakhanda Seventy, which, an inscription informs us, was ruled by the "wise Chandragupta." It contains many ruined temples of large dimensions and wonderful sculpture. There are more than thirty important inscriptions, ranging from *Saka* 831 to 1369, and containing records of the Rāshtrakūtas, Chālukyas, Kālachūryas, Hoysalas, Yādavas and Vijayanagar kings. The place was

probably destroyed by the Muhammadans after the fall of Vijayanagar.

The Santinatha basti has a front *mantapa* with a veranda all round and entrances on the three sides like the Kalesvara temple at Belgaum. The *sukhanasi* has a well-carved doorway with screens at the sides. There is no image in the *garbhagriha* but mutilated Jina figures are found lying here and there. A parapet runs round the front *mantapa* with a broad rail about 1½ feet wide containing figures or flowers between double columns surmounted by an ornamental band. The Trimurti temple is similar in plan to the Chattisvara temple at Chetchnattahalli near Halebid. All the three cells have *sukhanasis* with ornamental doorways and niches at the sides. There are also niches at the inner sides of the outer entrance. The doorways have well-carved lintels and fine screens at the sides. The temple faces east with *lingas* in the west and south cells and a figure of Vishnu in the north cell. The *linga* in the south cell represents Brahma. In all the lintels there is a panel of Gayalokshmi above which we have in the main cell a standing figure of Siva flanked by these four sets of figures—female *chauri* bearers, Brahma and Vishnu, Mahishasuramardini and Ganesa and *malharas* with Varuna seated on them. In the Vishnu cell a figure of Vishnu flanked by these five sets of figures—Garudas, consorts of Vishnu, female *chauri* bearers, Mahishasuramardini and Ganesa, and *malharas* as before. And in the Brahma cell a figure of Tandavesvara flanked by figures as in the main cell but without the *chauri* bearer. Over the cells there are three towers with projections in front without Hoysala crests, the sculptures on the towers consisting of only four figures coming one over the other on each of the faces. Only one projection that over the main cell shows a well-executed *simha lolata*. The outer walls have only turrets here and there. This temple is remarkable for its elegance and symmetry. The Ankal Somaiya temple has also 3 cells with niches at the sides but the side cells are small and have no doorways. It is similar in plan to the Somesvara temple at Belgaum. The outer doorway is beautifully carved and has at the sides large sculptured screens representing scenes from the *Ramayana* and the *Mahabharata*. At the Rasabhasi temple there is a good figure of Hanuman and a *viragal* (*Shikarpur* 246) in front affording another illustration

of "offering the springing head" A male figure is seated, as usual, in front of an elastic rod with two figures standing at the sides with swords ready to cut off the head The head is shown as simply cut off but not as bounding up On a neatly executed *māstikal* near the Banasankarī temple are sculptured two raised hands instead of the usual one hand with three seated figures above the arms—a male between two females, his wives This is a double memorial being an instance of both the wives becoming *satis* on the death of their husband

Basvapatna

Basvapatna A ruined town situated in 14° 12' N lat, 75° 52' E long, in the north-west of the Channagiri taluk, 16 miles north-north-west of the *kasaba*

Basvapatna, properly Basavapattana, is situated in a narrow valley enclosed with hills, and was the original possession of the Basvapatna chiefs, afterwards known as the Tarikere Pālegārs The founder of the family was Dhūma Rāja, said to have come from Vijayanagar When hunting in the forest where Basvapatna now stands, he came upon the abode of the Bēda who grazed his cattle there, and who had a beautiful daughter Becoming enamoured of her he proposed to marry her, but her father was unwilling to give her to a man of a different caste Dhūma Rāja then obtained his consent by a promise that he should settle there, and that her sons should succeed him in the government He established himself at the Dhūma hill, and had two sons, Kongana Nāyak and Rāmappa Nāyak, of whom the former succeeded his father, and built the fort of Basvapatna During his rule he also subdued a territory extending from Anantapur to Māyakonda and from Harihar to Tarikere He was followed at Basvapatna by Vira Hanumappa Nāyak, he by Immadī Hanumappa Nāyak, and he by Huchchu (mad) Hanumappa Nāyak In the time of Kongana Nāyak, the next ruler, the place was taken by the Bijapur army under Randulla Khān This was in 1636, and the chief then retired to Tarikere, which from that time became the residence of the family Basvapatna was subsequently taken by the Bednūr chief, who built a second or outer wall to the fort It was next captured by the Mughals, and during the time that Dilāvar Khān was governor of Sira, seems to have enjoyed much prosperity for twenty years Buchanan mentions a mosque near the fort

which was celebrated as being the first abode of Baba Budan before he went south to the hill which bears his name in Kadur District. It afterwards changed hands several times being held by the Mahrattas for seven years and by Haidar Ali who destroyed the fortifications. The Mahrattas under Parasu Ram Bhae ruined the town in 1791. The fort was repaired after 1799 but the place has never recovered its former prosperity.

The tank known as *Bade Sahab's Tank* is a little to the south of this place. On a stone on the bund of this tank are two inscriptions of considerable interest (*Channagiri* 43 and 44 both dated in 1653 A.D.). The first of these is partly in Persian and partly in Kannada. The Bijapur Governor Bari malik (another form of Made malik or Bondeyo Malik as mentioned in the inscription) son of Lar Khan and grandson of Shakh Malik resolved to construct a tank the breached dam of which is still in existence in the hills to the north west of Sulekere. When laying the foundation he heard that the Sultan was ill and vowed not to complete it till his recovery. Some well known Sanskrit texts are quoted as to the merit to be derived from constructing a tank. What moved him to excavate the tank was to provide for the security of the region south from Basvapatna where the Sendra country (as it appears to be called) was covered with great forest the haunt of robbers. On travellers complaining to him of the dangers of the place he at once said 'I will go myself and see what there is there. This he did and clearing away the forest built there a town called Mallipura (or Vallipura) and made this tank such that the three worlds were astonished. He freely gave out the land for cultivation and formed the most sanguine expectations as to the result. 'I will sow without limit' he said and to all travelling between Ramasa and Kasi will daily supply milk from sugar cane mills and will set up watersheds. I will continually plant cocoa nuts plantains and rice with betel vines so that all the people shall be prosperous. *Channagiri* 41, which is all in Persian, states that the Sultan recovered from his illness and the

governor was under the obligation of fulfilling his vow. He, therefore, completed the tank, and named it Vali Surur (joy of a friend)

Bednūr

Bednur - (See Nagar)

Belagāvi or
Belagāmi

Belagavi or Belagami A village remarkable for its antiquities, situated in 14° 24' N lat, 75° 18' E long, in Shikarpur taluk, 14 miles north-west of the *kasba*. Population, 1,531

Balligāve, Balligāmve, Balligrāme, Ballipura or *Balipura*, as its name is variously written in old inscription; (the two last seldom) was, under the Chālukya and Kālachūrya sovereigns, the capital of the Banavāse nād, or Banavāse Twelve Thousand province. The earliest mention of the place is in *Shikarpur* 154, dated in 685 A D. It was a place of such antiquity, even in the 12th century, as to be styled the mother of cities, the capital of ancient cities, the *anādi rajadhāni*, or immemorial capital, and is said to derive its name from the *rākshasa* Bali. On account of its religious merit, it was called the Dakshina Kēdāra, and it also had the name of Kamatha. It contained five *mathas* and three *puras*, the former belonging respectively to the votaries of Vishnu, Siva, Brahma, Jina and Buddha. An inscription dated in 1165 (Sorab 277) describes it as containing three *puras*, five *mathas*, three medical dispensaries and three Brahmapuris. About this time it was according to this inscription—full of wealthy citizens, “numerous varied mansions” and an ornament to the Banavāse country. Its prosperity continued under Hoysala Vīra Ballāla and the Yādavas. The place abounds with inscriptions, of which there are eighty-four nearly all dated earlier than the close of the 13th century. There is little doubt that the city fell a prey to the Muhammadan armies which overturned the Yādava and Hoysala powers soon after. The ruined temples of Kēdārēsvara, Pancha Linga, Kartabhēsvara, Somēsvara and Tripurāntakēsvara are rich with carving which is not surpassed in taste

and finish by any in Mysore the handiwork according to tradition, of the famous Jakanachari. The two fine *diāra pālakas* at the entrance to the Museum at Bangaloro were brought from the Pancha Linga temple.

The backyards of many of the houses here were once the sites of temples and the owners have put the temple stones to various uses. Though there is no trace of any *Jama ba ti* now figures of *Jinas* are found lying in a mutilated condition in several parts of the village. One of them about 10 feet high and 4 feet broad is lying on its back with broken legs near Madar Sab's house. The villagers call this *Betala* (or goblin) and it appears that this part of the village was named *Betala koppalu* even in official records. It is amusing to hear that when children fall ill the villagers make vows to this image and pour oil into its navel. Another stout seated figure about $4\frac{1}{2}$ feet high is seen in Yallapur Holoyappa's backyard with broken hands and a severed head. Another seated image about 2 feet high broken across the breast is lying near the pond known as *Badagi honda*. A fourth seated figure with a canopy about 3 feet high is found under a mango tree in Kittadaballi Channabasappa's field. It is on this that the inscription *Shilarpur 134* is engraved. A fifth standing image with a canopy about $2\frac{1}{2}$ feet high is found in the backyard of Bharangi Channabasavanna. A panel about 3×3 with male *chauri* bearers at the sides from which the central *Jina* figure has been removed the *mukhade* or triple umbrella still remaining is lying half buried in the backyard of Chaurada Basavalingappa. There is also at the same place a fine figure of a male *chauri* bearer about 4 feet high buried up to the breast. The places indicated above are no doubt sites of former *Jama bastis*. Among other mutilated images scattered here and there may be mentioned *Tara Bhagavati* lying under a tamarind tree in Balli Kadappa's field. *Dattatreya* seated with three faces and four hands about 5 feet high with canopy on the bund of the Jiddikere tank. *Narasimha* killing *Hiranyakāshipu* the latter standing instead of lying on the lap as usual on the same bund. *Umamahesvara* about 4 feet high in front of the *Isvara* temple near the pond named *Onakehonda* and *Mahishasuramardini* standing about 4 feet high in Jalagara Annappa's field. These places are also apparently the sites on which once stood temples enshrining the above images.

Belgāmi has even now a large number of temples, though many of these are in a dilapidated condition. The Kēdārēsvara temple is the finest and perhaps the oldest in the place. It is a *trikūtāchala* facing east with *lingas* in the west and south cells and a figure of Vishnu in the north cell. The *linga* in the south cell is said to represent Brahma. The chief cell has a *sukhanasi* with a doorway on both sides of which there are perforated screens and niches. At some distance from the latter are two more niches facing north and south, with two more broader ones to the east of the side cells. The door-lintel of the *Sukhanasi* is well carved with a standing figure of Siva in the centre flanked by three sets of figures, *viz*, Subrahmanya and Ganēsa, Vishnu and Brahma, and *makaras* with Varuna and his consort seated on them. The ceiling panels do not show any good work. Attached to the *navaranga* without any partition wall is a fine *mantapa* supported by elegantly executed pillars with a veranda running all round and three entrances on the three sides, but the east entrance is now converted into a dark and ugly room, with mud walls and a wooden doorway, with the Nandi inside, which unfortunately spoils the front view. Outside, there is a *jagati* or parapet, about 5½ feet high, running round the front *mantapa*, with a row of turrets and a rail containing figures, mostly female, between double columns surmounted by a small band of delicately executed scroll work with fine figures in most of the convolutions. It is worthy of note that no obscene figures are found on the rail here as in other temples. The outer walls are plain with a few turrets here and there. All the three cells have towers over them with projections in front bearing the Hoysala crests. The north crest has, however, tumbled down and is now lying near the smaller temple to the north. These crests may be later additions as the temple appears to have been in existence before the Hoysalas attained supreme power. The carving on the towers is confined to only four figures arranged one above the other on the three faces. The projections have well executed *simha-lalātas* with niches which are now empty. There are also small empty niches on the outer walls of the *garbhagriha* on the three sides. The temple has a *mahādvāra* with a tile roof and veranda on both the sides. Though inferior in workmanship when compared with the temples at Halebīd and Belur, this temple has its own architectural merits, which are of a very high order, and, being perhaps the oldest specimen

of Chulukyan architecture in the State it eminently deserves conservation. Fortunately it is in a fair state of preservation. It is said that some year ago the villagers replaced the tile roof of the front *mandapa* by a terrace at a cost of about Rs. 500. A compound wall is urgently needed. The roof has to be made water tight. The mud structure covering up the east entrance of the front *mandapa* ought to be removed and the tile roof of the *mandapa* replaced by a terrace or stone roof. The smaller temple to the north which is called the Prabhulva temple though no reason is given for the name is a plain building similar in plan to its neighbour but with a doorway opening into the front *mandapa*. This doorway has ordinary screens at the sides and a lintel with the same figures as those in the other temple. There are also in this temple two cells but instead of a Vishnu figure in the north cell there is a figure of Virabhadra with the sheep-headed Dakshin standing at the right side with folded hands. The front *mandapa* resembles in a few respects the porch of the lavara temple at Arakere. In the compound of the Kadiresvara temple stand near the *mandapa* an inscribed *prasthal* of the Vijayanagar period on which below the inscription are sculptured a male and a female figure husband and wife the latter holding a lime as usual in the raised right hand and a *gundi* (a water vessel with a spout) in the left which is hanging by the side. Outside the temple there is a small shrine to the left of the *mandapa* in which there is a naked female figure with a lotus in place of the head seated in a peculiar posture exposing the private parts. It is called Udatadiyamma or Kamalamma and is worshipped by the villagers. There is a tradition among the Lingayets that the figure represents the daughter of the king of Udatadi and that on her appearing before Saiva devotees in a naked condition during Basava's time her head vanished and a lotus took its place.

The other temples in the village may now be briefly noticed. The Tripurantakesvara temple is a fine structure with exquisitely carved doorways and perforated screens. It is a double temple facing east with entrances on the south also the south temple being a later addition as indicated by the eaves on the separating wall. The north temple resembles the Kappe Chennigaraya temple at Belur in having only two cells in the north and west with entrances opposite to them but without verandas. There

is a figure of Vishnu in the north cell and the *linga* in the west with a well-carved Nandi in front. Both the cells have a *sukhanasi*, that of the Vishnu cell having no doorway. The *sukhanasi* doorway of the *linga* cell as well as the lintel over it shows marvellous workmanship. The lintel has in the centre a figure of Siva as destroyer of the three Rākshasas and their three cities. The delicacy of the sculptural work will be found referred to in Vol. II, Chapter V—*Sculpture and Painting of this work*. There are niches at the sides of the cells as also at the sides of the east entrance. The pillars of the *navaranga* are sculptured with fine figures on all the four faces in the lower portion. At the sides of the south doorway, which is also beautifully executed, come, after the *dvārapālaka*s, perforated screens in two panels with fine scroll work containing pretty large dancing figures in every convolution. The south temple is only a front *mantapa* with a veranda running all round and with entrances as usual, only in place of the west entrance we have a *linga* cell with a well-carved doorway. There are no sculptures on the outer walls. But it is remarkable that the basement of the south temple has in some places a frieze in which, with intervening obscene figures, there are sculptures illustrating some of the stories of the *Panchatantra*, such as: "The Swans and the Tortoise," "The Rams and the Jackal," "The Monkey and the Alligator," and so on. There is also a noteworthy sculpture representing *kōlātam* by dancing girls. An inscription newly discovered gives the information that the Tripurāntakēśvara temple was built in about A D 1070. The Sōmēśvara temple is a small neat building with screens at the sides of the *sukhanasi* and outer doorways. The stone used is of a reddish colour. The Kallēśvara temple is situated on high ground with pillars of a greenish colour and a well-carved doorway. The Anantasayana temple has a fine reclining figure of Ranganātha. This is the only Vishnu temple in the place. The Maleyamallēsa temple has gone to complete ruin, the only things left at the site being a large *linga* with faces on the four sides, a mutilated Nandi and three inscribed stones. This *linga* is especially worshipped on occasions of drought for getting rain. A well-known Virasaiva teacher of about the 14th century, who is said to have gone to Mecca and converted the Muhammadans, names himself after this *linga*. The Panchalingēśvara temple is a fine building,

loftier than all the other temples in the place with a well carved doorway. Outside the *garbhagriha* are seen mutilated figures of Vaikunthaswamy, Umamaheswari, Subrahmanya, Mahisha suramar, Siva and Parvati. The *skrapa lakas* of this temple as stated above are now in the Bangalore Museum. The villagers say that soon after their removal a fire broke out in the village resulting in the destruction of nearly 60 houses and pray for their return. The following story is told in connection with the image of Umamaheswari in the temple. When once Balaraja visited this temple the *skrapa lakas* tipped him as he had no *ustha linga* with him having given it away to Anumahaya. Thereupon Balaraja became enraged and numbers of *lingas* began to issue from the pores of his body. On seeing this Siva himself came out of the shrine with Parvati to receive his faithful devotee. This incident is mentioned in some Virasaiva works as having occurred in Hailu. But people have transferred it to this temple.

There are many evidences of the influence of the Virasaiva creed in the village and its surroundings. There were once 6 *mathas* at *mitha* here viz. Hosa matha, Andra matha, Virakti matha, Kallu matha, Kani matha and Samavachari matha. Several of them are now in ruins. In the third matha is shown the *gadhiya* or tomb of the well known Virasaiva teacher Irabhuja. There are places near Belagutti known as Anumishyanakoppalu (Coggayanachauki) and Ekantala Ramayana gadda named after the Virasaiva teachers Anumishya Coggaya and Ekantada Ramayana who were more or less contemporaries of Balaraja.

A thorough inscriptional survey of the village and its environs by the Archaeological Department has resulted in the discovery of a large number of new inscriptions.

Belagutti—A village situated in 14° 12' N lat. 75° 35' E long., in the Honnali taluk, 5 miles north west of Nyamti. Population 2105. Belagutti

It was the residence of a line of chiefs called Siudas subject to the Chalukya and Yadava Kings. The inscriptions at the place are all of the 12th and 13th centuries. From these it is ascertained that *Belagavatti* was the original form of the name. It was also known as Belagavarti. The following chiefs are

mentioned as ruling there — Malli Dēvarasa in 1196, Isvara Dēvarasa in 1216, Simhala Dēvarasa in 1232 and Bīra Dēvarasa in 1249 (See Honnālī Taluk)

Benkipur

Benkipur (See Bhadrāvati)

Bhadra

Bhadra One of the two main streams whose union forms the Tungabhadra. It rises in the Western Ghats at Gangamūla in the Varāha Parvata, on the western frontier of the Kadur District, and flowing north-east along the western base of the Bābā Budan mountains, enters this district in the south of the Shimoga taluk. Thence, running due north past Bhadrāvati and Hole Honnūr, it unites with its sister stream the Tunga at Kūdālī, about 8 miles north-east of Shimoga. It is bridged at Bāle Honnūr, and at Bhadrāvati.

Bhadrāvati

Bhadravati A town on the right bank of the Bhadra near the Birur-Shimoga railway line. A railway station 12 miles south by east of Shimoga. The place has become important since the location of the Mysore Iron Works here. The factory is said to be the largest of its kind (for the manufacture of charcoal pig iron) in the British Empire. It turns out the strongest and purest charcoal pig iron manufactured in India (see below).

Population in 1921	Males	Females	Total
Hindus	1,650	1,421	3,071
Muhammadans	384	291	675
Christians	11	8	19
Jains	21	3	24

A new town has been laid out by Government on an up-to-date plan for accommodating the employees of the works. It is provided with electric lights and filtered water.

The beautiful views to be obtained from here of the Bābā Budan hills and glories of the Dekhan sunset that can be

enjoyed at this spot have been described by Mrs Bowring. She writes under date Benkipur December 22 1868 —

The bungalow is close to the Bhadra which is a fine river as wide as the Thames at Richmond and spanned by a handsome bridge. As it was still cool and the reflection of the clear waters over the rocks gave a refreshing look, and I strolled down to the bed of the river and seeing how lovely was the view of the Baba Budan hills looked about for a nice corner to sketch from when the voice of the hunter above informed me there were plenty of alligators in the river. I did make a sketch but from the higher ground near the bungalow not daring an encounter with a crocodile. In the evening we walked to the bridge from which we had a most enchanting view of the sunset and I felt quite savage with myself for my inability to do justice to its glories on paper. (Lewis Bowring *Letters Experiences*)

There are here the remains of a fine triple temple of Lakshmi Narasimha of the early Vijayanagar period never finished. The original name of the town is more properly *Bankiyapura* or *Bankipura* from Sanskrit *Banka* a bend in a river such as occurs here making it a sacred spot. There is a reference to this temple in *Shimoga* 30 (A C VII) dated in 1113 A D. It states that in that year Yere Lakke-Nayaka who was then ruling the Dumm and Banūr nads had a great forest near Bankiyapura cleared and built there two villages named Narasimhapura and Lakshimpura with a tank. He is also stated to have granted a number of taxes and transit duties of Bankiyapura also called Vankipuri for the God Lakshmi Narasimha.

The origin and development of the Mysore Iron Works located here can only be briefly touched on in this place. The investigation of the Mysore Geological Department had revealed the existence of important deposits of high grade iron ore in the Baba Budan mountains in the State. Early in the year 1915 Mr C P Perin the expert adviser of the Tata Iron and Steel Company was in India in connection with the extensions contemplated during the early stages of the War

Bhadravati
Iron Works

to the plant belonging to that Company. The Government took advantage of his presence in the country and invited him to report on the Iron and Manganese resources of the State and advise them as to the commercial feasibility of starting any metallurgical industry in Mysore. After an inspection of the iron ore deposits and the *Malnad* forests in the vicinity of the ore-field, Mr. Perin submitted a report in May 1916 recommending the installation of a plant for the manufacture of charcoal pig iron providing also for the recovery of by-products in the conversion of wood into charcoal.

After a thorough investigation by experts both in and outside the State, the scheme was sanctioned by the Government of His Highness the Maharaja in 1917-18.

The Tata Iron and Steel Company, Ltd., were appointed as the Managing Agents of the concern under the control of a Board of Management and the construction was commenced in 1918 with Messrs. Perin and Marshall of New York as consulting engineers. The Tramways, Forest and Mining sections of the Works were under the direct supervision of the Mysore Government. The construction was completed at the end of the year 1922 and the Blast Furnace was blown in and the operation began in January 1923 for the first time.

In March 1923, the management of the Works was transferred to a new Board and at the request of His Highness's Government Sir M. Visvesvaraya joined the Board as Chairman and he was vested with special powers and responsibilities. In May 1924, the agreement between the Government of Mysore and the Tata Iron and Steel Company, Ltd., was by mutual consent cancelled and the latter ceased to be the Managing Agents of the undertaking.

The Works consist of Charcoal Blast Furnace with a rated daily capacity of 60 tons. The main products of the wood distillation are calcium acetate, alcohol and wood tar. Ore is brought from the top of the Bābā Budan Hills by a self-acting ropeway, 3 miles long, the lower terminal of which is connected with Bhadrāvati by a tramway 2½ miles in length. The entire length of tramway (2 feet gauge) in the

service of the Works is 58 miles. Certain subsidiary industries such as a pipe foundry, an alcohol refining plant and a tar distillation plant started. The various products manufactured by the Works are —

Charcoal pig iron	Methyl Acetone
Cast iron pipes (B S S)	Black Paint
Casting	Iron Acetate
Acetate of lime	Pyrolignite of lead
Methanol (C P)	Hard wood tar pitch and
Denaturing	Myro Wood Preservative

The total outlay on the Works up to the end of the year 1925-26 amounted to Rs 1,83,71,173.87.

The production of pig iron during the year ending 31st December 1926 rose to 19,576 tons, almost the full rated capacity of the furnace.

Bilesvara betta or Agastya Parvata — A hill near **Bilesvara betta or Agastya Parvata** Humcha in the Nagar taluk from which several of the streams in the District spring, namely the Haridravati flowing north west to the Sharavati, the Sharmanavati which runs in the same direction into the former, the Kumudavati running north and falling into the Tungabhadra, and the Kushavati running south into the Tunga.

Chandragutti — A high peaked hill in the west of the Sorah taluk formerly fortified with a village of the same name at its base on the east. Population 749. **Chandragutti**

The hill is said to have been originally of such a height that it obscured the moon whence the name *Chandragutti*, but it was reduced to its present size by a *raikshasa* during his contest with Krishna who hid here. The summit is 2,836 feet above the level of the sea. It was the early stronghold of the Kadaroba kings of Banavasi, and the town below was the residence of Trimetra Kadamba. In *Honnali* 71 dated in 1396 in the reign of the Vijayanagar king Harihara II, Bachana Raya, son of Vira Vasanta Madhava Raya, calls himself *Gori durga malla* and claims to have established

himself in the Kadamba Rāja's throne and to have ruled over Chandragutti and other kingdoms. In more modern times, it was one of the first acquisitions of the Ikṣvāku chiefs, but was destroyed by the Pālegār of Bilgi in the time of Haider Ali. The place was afterwards taken successively by Parasu Rām Bhao, and by Dhundia, neither of whom held it for more than a few months. On the Hill is a temple dedicated to Rēnuka, the mother of Parasu Rāma.

Channagiri

Channagiri. A taluk in the east. Area 565.56 square miles. Head-quarters at Channagiri. Contains the following *hobls*, villages and population

	Hobls	No of Villages	Population
1	Channagiri	80	21,665
2	Basvapatna	55	15,301
3	Sante-Bennur	64	23,392
4	Ubiani	47	13,191
	Total	246	76,552

Principal places with population

No	Place	Population
1	Channagiri	3,996
2	Nallur	1,670
3	Hodigere	1,370
4	Kattalagere	1,050
5	Chiradoni	1,188
6	Thyavanagi	1,225
7	Kerekatto	1,211
8	Kerebilachi	1,096
9	Devarahalli	1,331
10	Sante Bennur	1,727
11	Somalapura	1,019
12	Durvigere	1,045
13	Pandavamatti	1,173
14	Malahalu	1,019
15	Vaddanahalu	1,166

The south and west are crossed by lines of hills the streams from which unite to form the great Sulekere tank 10 miles in circumference and thence flow north in what is called in old inscriptions the river Haridra to the Tungabhadra at Harihar. The remaining parts of the taluk consist of an open country with very extensive grazing lands. Hence the cattle are superior to those in other parts of the District. In the north is a fertile tract containing much garden and sugar cane cultivation. The cultivation of the black soil below and the red soil around the Sulekere so long neglected that the wild date had invaded all the neighbourhood and made it extremely unhealthy has been in recent years promoted by clearing the jungle and other measures conducive to this end. The hills to the west of the taluk are included in the auriferous belt running north from the Bihra Budan mountains.

The Revenue Settlement was introduced into the south of the taluk in 1870 and into the north in 1871 and the Revision settlement was brought into effect from the year 1907-08. The area of each description of land according to re survey is as follows —

Description of land	Area in Acres
Arable dry crop	161 373
Rice or wet land	8 301
Garden land	1 993
Unarable land	97 517
Total	262 217

The Bhadravati Chitaldrug road passes through Channagiri from which place there is a road north running west of the Sulekere up to Malo Bennūr with one from Sulekere east to Sante Bennūr and the railway at Sasalu. The Bangalore Poona railway runs a few miles beyond the eastern border of the taluk.

Channagiri — A town situated in 11° 1' N lat 75 59 E Channagiri long, 11 miles west of the Holalkere railway station, and

33 miles north-east of Shimoga, on the Bhadrāvati-Chitaldrug road Head-quarters of the Channagiri taluk, and a municipality

Population in 1921	Males	Females	Total
Hindus	1,462	1,484	2,646
Muhammadans	528	491	1,019
Christians	11	10	21
Jains	9		9
Other classes	1		1
Total	2,011	1,985	3,996

It is the residence of several Lingāyat merchants, but derives most of its importance from being the taluk station

Municipal Funds	1920-21	1921-22	1922-23
Income	3,819	4,534	4,175
Expenditure	5,831	4,037	4,327

From inscriptions it would appear that in early times this part of the country was in the possession of the Gangas and governed from Asandi (Kadur District) In the twelfth century it formed part of the Chālukya dominions, and was included in the Nonambavādi Thirty-two Thousand province over which the Pāndya Rāja at Uchchangi ruled Under Vijayanagar, in the sixteenth century, it was still under the Uchchangi district, and attached to Sante-Bennūr At the end of the seventeenth century, the town was captured by the Bednūr army, and named Channagiri after the reigning queen Channamāji, who erected the fort and granted the place as an estate to her sister The Kallēsvara temple here appears to be an old structure in the Hoysala style It faces south and has two cells The cell facing south has a good figure, about 5 feet high, of Kēsava, while the cell facing east has a *linga* The latter has an open *sukhanasi* and there is a pierced window in the wall opposite to it.

The *navaranga* is supported by four pillars ornamented with bead work. There are pretty niches at the sides of both the cells. There are no sculptures on the outer walls.

There is a fort built on the hillock in the south west corner of the town. This was erected towards the end of the 17th century by Channuraji the then reigning queen of the Keladi dynasty from whom the town derives its name. The temple of Bete Ranganathaswami built at the top of the hill commands a beautiful scenery. The panorama of the country below is varied and interesting especially towards the north with the magnificent lake of Sulkere situated at a distance of 12 miles.

Channagiri —The image in this temple (Bete Ranganathaswami) is a standing figure about 3 feet high with 4 hands the upper ones holding a discus and a conch and the lower ones a bow and an arrow—flanked by consorts. Being represented as a hunter with the attributes the bow and the arrow the god has the word *bete* (hunting) prefixed to his name. An inscription is to be seen on the brass plated door of the god. In the Lingayat *matha* known as Kallimathu worn out inscriptions are to be seen. The Doddamasi or Big Mosque has the tomb of Mohabat Shah Mastan Khadri and bears the date A H 1016 corresponding to A D 1636. The Khazi possesses some *sannads* issued in favour of the mosque by Tipu Dew in Purnaiya and Krishna Deva Raja Wodeyar III the dates given being respectively A D 1791 1808 and 1821. Channagiri

Chikka Magadi —At Chikka Magadi a former basti has been converted into the present Basavanna temple. The basement resembles that of the Chattisvara temple. The inscription stone at the entrance about 13½ by 1½ is the tallest one that has been found out till now. An inscribed stone in front (Shikarpur 201) has seated figures of a Jaina teacher and four female disciples. Several Jina images are lying about in a mutilated condition. A new inscription Chikka Magadi

was found behind the temple. The Kallēsvara temple is triple with *lingas* in two cells and a Vishnu figure in the third. In front of the Ammanagudi are two *mēṣṭakals* on which instead of the mere raised hand, we have well executed female figures, about 3½ feet high, with raised hand and *gudā* and also with small figures seated above the arm. The Nandi pillar to the east of the village is inscribed on one

Devarhalli

Devarhalli. A village in Sante-Bennūr *hobli*, Channarayana Taluk. Population, 1,334

The god is worshipped by a Smarttha Brahman but during the car festival a Srivai hnava of the *Pancharatragama* officiates. There is said to be a cellar containing copper plates and other things stored in it but it has not been possible to identify the spot where it is.

Gersoppa — FALLS OF — (See Sharavati)

Gersoppa

Govardhangiri — A hill on the western frontier of the Sagar taluk overlooking the old town of Gersoppa said to have been fortified by Jinadatta the founder of the Humcha State. Mr Lewin Bowring writes —

Govardhan
giri

It is in the remotest corner of Mysore and has rarely been visited by European. It stands on a promontory the rock on all sides being precipitous save an approach from the south east which is limited to a narrow neck of land on which are two causeways called *sara* strongly fortified by outposts called *ulhads* and with tremendous ravines on either side. A difficult path then leads down to a third causeway above which towers up the fort on one side while on the other a rugged and devious path commanded for some distance by the fortress leads down to the plain country beneath. The fort is in fair repair but is now deserted and overgrown with jungle (*Eastern Experiences* 128)

An interesting Jain inscription at the deserted hill fort referred to by Mr Bowring above gives valuable information about the local chiefs. *Sagar* 55 is also an interesting Jain inscription at this deserted hill fort. It belongs to the time of Deva Raya and gives an account of the kings of his line and a description of Kshemapura or Gerasoppe after which the celebrated Gersoppa Falls are named. First is mentioned the king Bhairava whose younger brothers were Bhairava Amba and Salva malla who though the last was the greatest. His sister's son (the succession was evidently in the female line according to the *ahiyasantana* law of the West Coast) was Deva Raya whose *guru* was Pandita raya. This king performed the rare and great ceremony of the head anointing of Gummata. His sister's sons who were his *Yunarājas* were Salva malla and Bhairava and he was ruling the Tulu Konkani Haive and other countries. Then follows a long

account of a family of Srēshtis or merchants, who seem to claim royal descent from the Kadambas. One of the family, Yōjanasrēshti, built a splendid *chartyālaya* of two storeys in Kshēmapura, setting up the images of Nēmīsvara in the lower and Gummata-nātha in the upper one. The former is no doubt the one so highly praised in the opening verses of the inscription, and the latter probably the one whose head-anointing was performed by Dēva-Rāya. Yōjana's grandson and his wife, on a visit to Gōvardhangū, took a vow to erect the *māna-stambha* on which the inscription is engraved in front of the Nēmīsvara *chartyālaya* there, and had one made of polished bell-metal. Meanwhile, twin daughters were born to them, and to commemorate this event, they had a golden *kalasa* fixed at the summit of the pillar of the same height as that of the twins.

Hole-Honnur

Hole-Honnur A village in the Shimoga taluk on the right bank of the Bhadra, 9 miles north-east of Shimoga. Population, 1,667.

During the time of Haidar Ali, Hole-Honnur was given in *jāgīr* to the officers of the Sowars, and a great many Mahiattas are settled there, most of whom have still one or more members of their family in the Sowar Department.

Honnali

Honnali A taluk in the north-east. Area 331.01 square miles. Head-quarters, in 1869 fixed at Nyamti, were again transferred to Honnali in 1882. Contains the following *hoblis*, villages and population.

Hoblis	Villages	Hamlets	Villages classified				Population
			Govern- ment	Sarva- manya	Jodi	Kayam- gutta	
Honnali	51		48	.	2	1	20,139
Belagutta	54	2	53		1		19,570
Sasivehalli	63	1	58	1	1		21,116
Total	168	3	159	1	7	1	61,125

No	Place	Population	Principal places with population
1	Arabagatti	1145	
2	Soratur	116	
3	Honnali	7860	
4	Kundur	1368	
5	Nyamti	303	
6	Belagutti	400	

The Kumsi hobli was made a separate sub taluk under Shimoga in 1862 and Kundur in 1861 was at the same time transferred to Honnali from Channarayana. The taluk is crossed from south to north by the Tungabhadra and bounded east and west by lines of low stony hills. The northern and eastern parts consist of dry crop country of unusual fertility good black soil being common and cotton and jowari the leading products. The extreme west on the other hand may be considered a purely rice country with sugar cane as usual intermixed ragi being the staple dry crop grain. The central part partakes of a mixed character between the two. Very rich black soil prevails around Nyamti and Belagutti. Much money was made in this neighbourhood during the American Civil War of 1861-5 by the growth of cotton. The Honnali gold field lies at the foot of the hills in the south west at which the Kalva Rangan peak (3388 feet) is the highest point within the District.

The Revenue Settlement was introduced in 1874 and the Revision Settlement from 1912-13. The following statement exhibits the different classes of land according to the revision survey —

Dry	86167	} 96224 Acres
Wet	9515	
Garden	512	
Unoccupied waste	17121	

The important roads in existence are —

- 1 The Honnali Shimoga road running south from Honnali
- 2 The Honnali Harihar road going north eastwards
- 3 The Honnali Ayanur road south westwards

Communications

- 4 Two short roads connecting Kumsi with Harnahalli and Ayanur
- 5 A road connecting Saulanga with Shikarpur
- 6 The Honnali-Shikarpur road
- 7 The Honnali-Channagiri road
8. Part of the Honnali-Tumbinkatte road towards the north

The road from Shimoga to Harihar passes through Honnali, where the river has been bridged

According to inscriptions found in this taluk, it would appear that it was part of a kingdom called Sindavādi, which extended over parts of the present Shimoga, Chitaldrug, Bellary, Dharwar and Bijapur districts, and was ruled over by a line of chiefs known as the Sindas, who, during the 12th and 13th centuries, were subject to the over-lordship of the Chālukya and Yādava kings. This province of Sindavādi is mentioned as far back as 750 A D (*E C VI, Manjarābād* 36) or even in the 5th century (*E C VI, Kadur* 162). Their chief city was at Belagavarti or Belagavatti now Belagutti (*q v*). Their legendary origin is related in *Honnali* 50 and *Honnali* 20 (*E C VII*). These inscriptions trace the descent of the line from Siva whose union with Sindhu the river Indus resulted in the birth of Saindhava, to whom was allotted the country of Karahada (*i e*, modern Karahata in the Satara District of Bombay Presidency). He was entitled Nidudol or the long-armed. From Karahada, we are told, he shook and subdued his enemies and became master of the world. After him came many kings, of whom Kayavīrasa is known by name (*E C VII, Shikarpur* 69, 1061 A D). Then came Chattarasa (*Shikarpur* 316, dated in 1117 A D) when Gōvīndarasa, Minister of Chālukya Tribhuvanamalla, was governor of Banavāsi. During his time a grant was made for a temple, to Rudrasakti, disciple of Kriyāsakti, of the Kālāmukha sect. After other rulers, came Isvara Dēva, 1166-1180 A D. *Honnali* 98 of 1166 A D shows him as a subordinate of the Hoysala king Narasimha I. *Honnali* 26 and 27 (1173 and 1172 A D) relate to his fights with Singi Dēva, the king of Sāntalige. *Honnali* 45 informs us that the Hoysala king Ballāla II had appointed Toda-pille Dannāyaka as governor of Belagavattinād in 1175 A D. *Shikarpur* 206, dated in the next year, however, shows that the Kāla-chūryas were in possession of the country and that one Vikramāditya Dēva, probably a Sinda, was governor of Banavāsi.

Honnali 50 of 1140 still shows them in possession of the country their minister's younger brother Madava Dannaayaka being the governor. By 1140 however the Chalukyas were again in possession (Honnali 46). We have however a number of inscriptions (Honnali 37 38 40 and 28) which testify to the persistent attacks made in 1196 and 1197 A.D. by Umayyadevi who must have been the queen of Hoysala Ballala II. Her force is said to have been defeated on each occasion but she seems to have obtained a lot of booty. In 1188 the Hoysalas were again in the ascendant (Siddapur 31a) and continued so. During the whole of this period Malladeva otherwise Malladeva should have been the Sinda king. We have dates 1167 1204 for him. In 1208 A.D. we find Todejalle Dannaayaka still in office (Honnali 2a). In 1210 and 1216 however the Yadavas of Devagiri were in possession (Honnali 44 and 48) and Mayadeva was governor of Panavara. During this period Jayadeva II (1210-1222) was the Sinda king. In 1212 Vanka Raghava was appointed to the post of governor of Panavara (Honnali 20). Ten years later in 1230 when Kalyana Deva was the Sinda chief we find Henna Bominasetti was occupying that place. The Sindas must have had troublous times in keeping with so many changing overlords. But none are mentioned after 1232 A.D. A battle took place in 1240 at Kūdah between (1) Boppala and the Sevuna general Śrīdhara (Honnali 34). The Sinda king Bira Deva, called also Harabira (1244 1247) took up his residence in Hallur. In 1247 another battle was fought at Nematti between Dakaraya and the ministers Mādiraya and Śrīdhara (Honnali 35). On this occasion Echaya son in law of the king Bira Deva's Iatta Sahana Gūṅḍya Sahana made good the pledge he had taken at a council of war before the whole court that he would drive off the enemy in confusion. He was in consequence presented with the umbrella which was the stake (B.C. VII Introduction 34 36).

The later history of the taluk is the same as that of Honnali town (q.v.)

Honnali—A town situated in 14° 15' N lat., 75° 12' E long. on the left bank of the Tungabhadra 24 miles north of Shimoga, on the Shimoga Harihar road. It is a municipality and was till 1869 the head quarters of the Honnali

taluk, which were then fixed at Nyamti, but were again transferred here in 1882

Population in 1921	Males	Females	Total
Hindus	1,499	1,348	2,847
Muhammadans	509	473	982
Christians	8	11	19
Jains	9	2	11
Ammist	1		1
Total	2,026	1,834	3,860

Honnali is said to have borne the *purāṇic* name of Bhāskara kshētra. By the Muhammadan government it seems to have been called Bīdīrī. Honnali means "gold-bearing," but the Mackenzie MSS state that the name is derived from "Honnu" and "anala," "gold of fire," the tradition being that fire is the father of gold. An inscription, however, gives it as Suvarṇnālī, which is the same as Honnali. The fort is occupied principally by Vaidika Brāhmans, and the town by Lingāyat traders in grain. The place belonged to Vijayanagar, and after the overthrow of that power in the 16th century was seized by a chief named Mūgīdora Mara Nāyak. In spite of attacks from the Tarikere chiefs, he held it till ousted by the Bijapur conquests in the 17th century. On the fall of Bijapur, Honnali was captured by the Bednūr State, with which it was connected until taken by Haider Ali, and annexed to Mysore. It was one of the centres of the insurrection of 1830. Honnali is the residence of a Nawāb of Afghan descent. Mr Lewin Bowring writes "The founder of the family was a Jamaud Afghan named Abdul Nabī Khān, an officer of the court of Delhi, who received an estate from the Emperor in Dharwar along with the Nawāb of Sāvanur. Since the death of Nawāb Kutb-ul-Mulk, during the siege of Seringapatam, the Honnali chiefs have possessed little but a barren title." (*Eastern Experiences*, 107)

Humcha — A Jain village situated in $13^{\circ} 51' N$ lat 75° Humcha
 16° E long, in the Nagar taluk 12 miles east of Nagar
 Population, 956

The correct name is *Hombucha* also written in old inscriptions *Pomburchchha* and *Patti Pomburchchha*. It was the capital of a principality founded by Jinadatta who is said to have come from Matburi in Upper India. His father Sahakara had a son Vardatta by a Kirati woman at whose instigation an attempt was made to get Jinadatta out of the way in order to secure the succession for her. Jinadatta was accordingly sent on a certain errand bearing the offering of a lime which was to be the signal of their victim to the executioners appointed to murder him. But Vardatta meeting him on the way offered to relieve him of the message and was consequently slain. Jinadatta advised by his mother fled taking with him a small golden image of Padmavati. He was pursued by a force of 1000 men sent by his father but on exhibiting the image of Padmavati they were transported back to a distance of 150 miles. He continued his wanderings until he arrived at the spot where Humcha now stands. Being weary he tied his horse to a *lori lalli* tree and fell asleep when the goddess revealed to him that he was to be the founder of a kingdom in that place and directed him to touch her image with his horse's bit which on his doing so was instantly changed into gold. The story of the golden bit gained him the support of a local chief against the army of his pursuers who now again appeared. They at last surrendered and entered his service whereupon being provided with funds by the goddess who converted into gold all the iron brought into contact with her image he commenced the building of the city. He also erected a temple to Padmavati over the tree under which he had slept—the same it is said which is now growing out of the side of the temple. All these things being accomplished the golden image vanished the king being directed to one of stone in which the goddess would reside and which was duly set up in the temple. These events happened according to the account of the late Humcha svami Devendra Tirtha Bhattaraka in the year 500 of the 5th Koli yuga (or 159 B C).

An inscription of the 11th century traces the descent of Jinadatta to Raha of the Ugravamsa lord of the Northern

Madhura, who was a successful leader in the Bhārata war in Kurukshētra, on account of which he received a *sankha*, or conch shell, and the *vānara dhvaja*, or monkey flag, from Nārāyana. After several kings had ruled in succession to him, there came Sahakāra, who turned a cannibal. (An inscription at Harihar contains a curious allusion to a king who, possessed of an evil spirit, became a cannibal and in order to gratify his taste settled as a barber at Kālanjasa, where he was slain by Krishna, one of the earliest of the Kālachūrya kings.) To him and to his wife Sriya-dēvi was born Jinadatta. Disgusted at his father's character, the latter fled to the south. On his way he slew an *asura* named Simharada, and thus obtained the *simha lanchhana*, or lion signet. He also slew Andhakāsura and founded Andhāsura, a place which still bears the same name, immediately to the east of Anantapur. Then, coming to Kanakapura, the modern Humcha, he slew Kanakāsura, and drove away Kara and Karadūshana, who were in Kundada-kote, the hill near Agumbi. Pleased at his exploits, the goddess Padmāvati entered into the *lakṣī* tree (still shown growing out of her temple) at Kanakapura, gave it the name of Pombuchcha, and made it the capital of his kingdom. According to another statement, he was aided in establishing his kingdom by his *guru*, named Siddhāntakīrtti. After several kings had ruled, there were Śrīkēśi and Jayakēśi. The former had a son Ranakēśi. He was followed by several kings, after whom came Hiranyagarbha, who drove out the kings of Yadhivāsa and subdued the Sāntalige Thousand Nād (the present Tirthahalli taluk). He took the name of Vikrama Sāntara, and was succeeded by the following Sāntara kings — Chāgi Sāntara, Vīra Sāntara, Kannara Sāntara, Tyagi Sāntara (who married a Kadamba princess), Nanni Sāntara, Rāya Sāntara, Chikka Vīra Sāntara, Ammana Dēva, Tailapa Dēva (who married a Ganga princess), Dīra Dēva Sāntara (who married Ganga and Nolamba princess), and his brother Barmma Dēva Sāntara, ruling in 977. This genealogy is sufficient to warrant our placing Jinadatta in the 7th or 8th century. The grants continue to the 12th century and give us the later names of Ammana, Taila, Kūma, Jagadēva and Bammaraśa.

Jinadatta subdued the country as far as Kalasa (Kadur District), and fortified the hill of Gōvardhangiri on the western

frontier of the Sagar taluk. He or his descendants afterwards removed the capital first to Sula or Sisukali and then to Harkala both in South Kanara establishing lieutenants in Barkur Bangadi Mudu Bidare and Mulki and obtaining from the positions a revenue of 9 lakhs above the ghats and 9 lakhs below. His successors at Harkala adopted the title of Bairarasu Wodeyar which was taken by all the line subsequently. The Jains say that Gante Wodeyar adopted the faith of the Siva bhaktar or Lingayat on which the lieutenants refused to obey him and declared their independence and that he was the progenitor of the Keladi chiefs who afterwards subdued the territory. The grants existing at Harkala of the Bairarasu Wodeyars of Harkala date from the end of the 12th to the 16th century and are made under the Hovvala and Vijayanagar sovereigns.

The existing ruins of Humecha situated at the foot of the Bilasvara hill said to be the source of seven streams indicate the site of a large town. The name *Hombucha* golden bit is considered to confirm the story of its origin while that of Govardhangiri given to the chief's first stronghold points to his connection with the celebrated hill so called near Mathura.

Among the temples here are the Jain temples erected by Chattala Devi the grand-daughter of Rakkasa Canga in association with her sister's sons. The principal of the two was the Pancha Kuta (or Panchavasthi) known also as Urvatilalam glory of the world. The foundation stone for it was laid by her Gura Sri Vijaya Deva. From what remains of it it was evidently a notable building and the inscriptions connected with it are beautifully engraved on slabs in the Panchabasti (Nagar 35 36 and 40 all dated in 1077). *Tirthahalli* 192 dated in 1103 A.D. records the erection of another *basadi* opposite to it. (See also Volume II Chapter V of this work.)

Ikkeri—A village situated in $11^{\circ} 8' N$ lat $75^{\circ} 5' E$ Ikkeri
long, in the Sagar taluk, 3 miles south of the *lasba*. Population 208.

Ikkeri (the two streets) was from about 1560 to 1640 the capital of the Keladi chiefs afterwards removed to Bednur. *Ikkeri* continued however to be the nominal capital the Rajas were called by its name and the coins were called

Ikkēri pagodas and fanams, although, in fact, the mint was removed. Its walls were of great extent, forming three concentric enclosures. In the citadel was the palace, of mud and timber, adorned with carving and false gilding. The only vestige of its former greatness is the temple of Aghorēsvara, a large and well proportioned stone building. On the floor in front of the shrine are the effigies of three of the Keladi chiefs, doing obeisance, with the name inscribed above each. One of them, Huchha (mad) Sōmasēkhara, is represented as manacled and fettered. The distance between the central pillars was adopted as the standard measure for garden land. A rod of this length, equal to 18 feet 6 inches, was the space called *dāya* allowed for one tree, and the shist was fixed on 1,000 such *dāya* at various rates.

The Aghorēsvara temple above mentioned is a large structure, built of granite, in the Dravidian style. There are also some features of the Chālukyan and Sāracenic styles in it. The temple faces north and has a lofty roof and ornamental doorways on the west, north and east, the north doorway being the best with two elephants at the sides. The *garbhagriha*, which is built of huge stones, contains a gigantic pedestal occupying nearly three-fourths of the whole space and sculptured all round with 32 seated female figures. In the *sukhanasi* is a small translucent Nandi carved out of white spar. The temple has no *navaranga* but only a front *mantapa*. At each side of the *sukhanasi* doorway there are two niches, those to the right containing the figures of Ganēsa and Subrahmanya and those to the left figures of Mahishāsūramardini and Bhairava. The front *mantapa* is supported by well-carved pillars and has narrow high verandas at the sides of the three entrances. There is a big stone tower over the cell with a projection in front as in Chālukyan temples. On the outer walls there are at regular intervals, with intervening figures, about 20 perforated windows, $2' \times 1\frac{1}{2}'$, with ornamental arches, beginning at the sides of the north doorway and ending at the doorways on the east and west. Below the windows runs round the walls a parapet with ornamental turrets at intervals but without a sloping rail at the top. The Nandi-mantapa in front of the north entrance has 7 arched doorways, a large one on the south and two smaller ones on each

of the other side with a big Nandi inside. In front of the *sulhanas* doorway in the temple three Keladi kings are represented as prostrating themselves before the god with their names Sadaiva Nayaka, Bhadra Nayaka and Huchcha Sankanna Nayaka written over the head. The temple has a metal image of Virabhalta with 32 hands. There is also a shrine of *Urvatti* to the west with a stone tower and an arched entrance. An inscription is to be seen on the north basement of the Aghoravara temple.

Kavaledurga — A hill in a wild and inaccessible region Kavaledurga in the west of the Tirthahalli taluk. It rises to 3008 feet above the sea. The place is said to be the Kanyakavana in which the Pandvas lived for some time during their exile. They are related to have erected the ancient fortifications of great size and strength on the hill. Bhima threw the Bhimankatte across the Tungabhadra so as to turn the course of the river towards their abode. But the *rishis* performing penance lower down the stream finding the water cut off complained to Dharmaraya who requested Bhima to release the stream which he did by making the three existing openings in the dam. The hill was in later times called Bhuvana giri, and was a stronghold of the Bednūr chiefs. A large slab of stone in the palace 8 feet by 7 feet called the Rama's Cot and well carved has an inscription on it bearing date in the year *Bhava* corresponding to 1691. This cot is now in Mysore city. The present name Kavaledurga or guarding hill fort was given to the hill on its capture by Haider Ali. The old town formerly head quarters of what was till 1882 called the Kavaledurga taluk is to the west of the Drug.

There are a number of well constructed ornamental ponds here of which the Sante Gango pond is one. The whole place is one hill surrounded by fortifications and almost deserted except at the time of certain festivals. The *matha* of the former Lingayat *Gurus* of the Keladi kings attracts a certain number of adherents. At the highest point of the Drug is the temple of Srikautesvara a peculiar feature of which is that the only door is on the west. There is a fine view from here of the Western Ocean.

Keladi

Keladi. A village situated in $14^{\circ}13' N$ lat, $75^{\circ}5' E$ long, in Sagar taluk, 4 miles north of the *kasba*. Population, 1,658

It is interesting as the place whence the Ikkēri chiefs derived their origin, which is thus related. -

Two brothers named Chavuda Gauda and Bhadra Gauda, living in the village of Hale-bayal, in the Keladi taluk of the Chandragutti *pargana*, had two servants or slaves, named Yādava and Murāri, who cultivated their masters' fields. A cow they had was discovered to shed her milk over a certain ant-hill, which, on digging into, Chavuda Gauda found, contained a *linga*, over which, therefore, he built a small temple. A little time after, the servants, when ploughing, turned up an old sword, which they put into the thatch of the house, intending to make a scythe of it. But they discovered that if a crow perched on the shed the sword leaped out in the form of a serpent and killed it. On this, Chauvda Gauda took it and, carefully cleaning it, kept in his house, giving it the name of Nāgaramuri. At another time, the ploughshare struck against the ring of a cauldron, which contained treasure. Afraid to disturb it, Chavuda Gauda covered it up again, but that night had a dream, in which he was directed to offer a human sacrifice and take the treasure. On hearing this, his two slaves volunteered to be the victims on condition that their memory was preserved. All the preparations being made, the place was dug up at night, and the slaves, after ablutions, prostrated themselves to the cauldron and were beheaded with the sword Nāgaramuri.

With this accession of wealth the Gaudas raised a small force and began to subdue the neighbouring villages. But they were seized and sent to Vijayanagar by orders from the king, and there put into custody. Hearing that a Pālegār near Balihalu was rebellious, they made an offer through the court musicians to punish him if allowed to do so. Permission being given, they went with a force and killed the Pālegār, on which they were released and confirmed in the possession of the place, they had captured, receiving from the king a seal (*sikka moharu*). The town of Keladi was then founded, together with the temple of Rāmēsvara.

One day while the Gauda was hunting, a hare turned upon his hounds, indicating heroic virtue in the soil of the place in

which this occurred. He therefore removed his town to the spot calling it Ikkeri. His son and successor with the sanction of Sadasiva Raya the Vijayanagar sovereign took the name of Sadasiva Nayak.

Two mounds called kalte at the entrance to Keladi are pointed out as the scene of the human sacrifices.

The principal building in the place is the double temple of Ramāvara and Virabhadra a large and plain structure.

Several inscriptions included in F C VI VII and VIII (hadur and Shimoga Districts) throw light on Keladi. These may be briefly referred to here. Sringeri 1 dated in 1621 and Koppa in 1621 are of the time of Venkatappa Nayak grandson of Sadasiva Nayak. The former records the re-establishment of Sringeri and the latter gives the titles of Venkatappa—Yudaya Murari *Kotekulahala* (destroyer of forts) and establisher of the pure Vaidikānta Siddhanta one of the titles of the Sringeri gurus devoted to the faith of Siva and the (Sringeri) Guru. The inscription records the grant of a *mutha* to a guru who appears to have come from Tiruvannamalai in the present South Arcot District. Two inscriptions (Sringeri 11 and Sringeri 13) both dated in 1652 in the time of Sivappa Nayak great grandson of S. Raya record the restoration of the endowments of the Sringeri mutt. In Koppa 60 dated in 1709 Basappa son of Channamma is mentioned and records a grant to a Lingayat Guru who also seems to have come from Tiruvannamalai. Koppa 46 dated in 1719 registers a grant of Somanākhara 11 for a Virakta (or Lingayat) mutt. Shimoga 2 dated in 1641 furnishes certain details of genealogy. The tale begins with Sadasiva mentions his son Venkata his son Bhadra his son Virabhadra who proved helpful to the Vijayanagar king Venkatadri (Venkatapati Raya II) being to him like a long right arm as the inscription puts it. Sadasiva is praised for his political wisdom Venkata for checking the advance of the Muhammidans Bhadra for his devout piety and faith in Siva and Virabhadra for his inexhaustible religious gifts. His minister was Ramakrishna who was it is stated among other things skilled in royal policy. Ramakrishna's ancestors to three generations are named who apparently were ministers in their own days. Among the many gifts made by Ramakrishna was the white horse gift. Besides a temple dedicated to Virabhadra he built the temples

of Triyambakapura, and the Gajanur Siva in the Āraga mandala, which he donated to Brāhmins *Shimoga* 29 dated in 1712 in the reign of Basavappa, son of Channamāji, yields further steps in the genealogy *Shikarpur* 255 and 1155, dated in about 1544 and 1556, relate to Sadāsiva-Nāyak *Honnali* 9 dated in 1557 belongs to the same reign *Honnali* 83 dated in 1632 mentions Virabhadra-Nāyak, son of Bhadrappa and grandson of Venkatappa-Nāyak. He had a minister of his own name (*Honnali* 83, dated about 1636). His another minister Rāma-krishna has been mentioned above *Shikarpur* 27 dated about 1664 mentions Sōmasēkhara-Nāyak I, son of Sivappa-Nāyak. It registers a grant to Bālekoppa *matha* freeing from transit duties the loads of 50 of the pack-bullocks mentioned in its service. His widow Channamāji's reign is referred to in several inscriptions (*Shikarpur* 213 of 1672, 82 of 1681, 79 of 1661 and *Shimoga* 17 of 1696). One of these—that of 1661—refers to the oppression of the Muhammadans and the steps taken by the grantee for protecting the cattle. In *Shimoga* 128, dated in 1718, we have Sōmasēkhara II. For his father-in-law, he built a dam called Basavana-vaddu on the Tunga. He also made a grant to Raghurāja-tīrtha of the Kūdali Kallumatha. Siddappa Nāyak is referred to in *Shikarpur* 209, dated in 1757. In *Shikarpur* 210 dated in 1758, we have mention made of Sōmasēkhara III. *Tirthahalli* 156, dated in 1666, furnishes a summary of the genealogy of the dynasty up to that year. In *Sagar* 123, dated in 1604 in the reign of the Vijayanagar king Venkatapati-Rāya, Venkatappa-Nāyak is mentioned in a grant made by all the leading merchants of the *nād* of the transit duties payable at 42 custom-houses above the Ghats on all loaded pack animals to the Champaka-sadasa mahathe Saivāchar (a *matha*) at Ānandapura, now Anantapur, to the west of Kurnool. He is referred to in *Tirthahalli* 166 dated in 1610, and is stated to be ruling from Āraga, a city which is said to be 'glorious beyond description' in the "celebrated" Aranyadēsa—apparently the reference being to *malanādu*. In 1627, he granted a piece of land at Halasinhalli for a mosque (*Tirthahalli* 38). A number of inscriptions of his period (*Tirthahalli* 56 dated in 1616, *Tirthahalli* 83 dated in 1623, etc.) refer to various grants of custom duties made to Lingāyat mutts. Grants of the kind made during the time of Channamāji are also referred to in *Tirthahalli* 100 and 118, both dated in 1672.

The differences perceivable between the list of Keladi chiefs given in the section on *History* above from Mr. Mascarenhas MS. and that derivable from the extant inscriptions are in certain cases rather difficult to reconcile. The discovery of further inscriptions may perhaps clear up the matter.

Kodachadri — A lofty mountain in the west of the Nagar taluk and a conspicuous landmark. Its height is 1511 feet above the sea. It rises more than 2000 feet above the level of the villages below and is clothed with splendid forests. From Nagavidi at the head of the Kollurghat it is 1 mile distant and from this point the ascent is 3 miles. The first portion of the hill is very steep and difficult to ascend. Above this is a temple to the Huh Deva, tiger god, whose image is provided with thirty-two arms. The top of the hill which from a distance has a bluff appearance is in reality a narrow ridge in many places only 12 feet across with a precipice on either side. It commands an extensive and splendid view over the Western Ghats and Kanara.

On the west the hill descends almost perpendicularly for 1000 feet, and the Kanara forests lie spread out below. The sea appears quite close and on a clear day the vessels are discernible with the naked eye. The bay and town of Kundapur lie opposite. But for the very limited level space on the top, and the difficulty of access this hill would make a most desirable sanatorium, having a beautiful climate and so near the sea that it catches the earliest breath of the sea breeze. There is a small bungalow at the top.

Kudali — A sacred village in Shimoga taluk at the confluence (*kudali*) of the Tungga and Bhadra where they unite to form the Tungabhadra about 9 miles north east of Shimoga. Population 718.

It is the seat of a *matha* connected with the one at Sringeri, the original *Guru* having been appointed by the Sringeri Svami about 528 years ago to minister to the Smarthas of Mahratta descent. There is also a *matha* of the Madhava

sect Notwithstanding their being subject to the Kūḍali *gurus*, the Mahrattas under Parasurām Bhao plundered and burnt the place in 1791, and were consequently threatened with excommunication, which was averted by timely gifts. There are three old temples at Kūḍali, dedicated to Brahmēśvara, Narasimha and Rāmēśvara.

Of inscriptions at the place the one with the oldest pretensions is on copper-plates at the Brahmēśvara temple, professing to be a grant by the emperor Rukmāṅgada ruling at Ayōdhya. The Sringēri *matha* has one, also on copper, dated *Saka* 1075, a grant by a Kadamba king named Purandara Rāya. Of those on stone, the oldest are of the Hoysala period. One records a grant to the Rāmanātha temple by Vīra-Ballāla (III) on the return of his son from Delhi, whither apparently he had been taken in the Muhammadan invasion. *Shimoga* 98, dated in 1738, a stone inscription found at Sivagondanahalli, Holatur *hobli*, records a grant by the Keladi chief Sōmasēkhara Nāyaka to Raghurāja Pista of the Kūḍali Kallu *matha*. Later grants are by the Vijayanagar kings, and the Sringēri *matha* has copper-plate grants by the Keladi chief Sōmasēkhara Nāyaka in the 17th century.

The Chōla king Rājēndra-Dēva claims to have gained a great victory over the Chālukyas in the middle of the 11th century at Kūḍali-sangam, which, as Dr. Hultzsch thinks, may be this place. On the other hand, it may be one near Srīsaṅga.

One of these records a grant in favour of Vidyāsankara Bhārati, the Sringēri *guru*, which, it says, was confirmed by Harihara, the Vijayanagar king. Another copper-plate in the same mutt, which professes to record a grant by Kadamba Rāya in favour of the same *guru* Vidyāsankara Bhārati, is also in its possession. It is dated in a peculiar manner, the year intended being apparently equivalent to 1255 A.D. (*Shimoga* 79 and 80). *Shimoga* 81, dated in 1668, in the reign of the Keladi chief Sōmasēkhara Nāyaka records the restoration of various grants in favour of the then *guru* Narasimha Bhārati. *Shimoga* 82 dated in 1683 is a grant by Sankara Bhārati Svāmi of this *matha*.

Of the copper plate grants belonging to the Madhva *matha* (called also *Arya matha*) one is a grant of five villages in the Araga country to Narayana Yatindra disciple of Raghupati Yatindra dated in 1527 by the Vijay nagar king Krishn Raya (*Shimoga* 81) Another grant dated in the same year and belonging to the same reign (*Shimoga* 80) records the grant of Gaurapura in the Hanugal Shuc to Vyasa Yatindra disciple of Brahminya Tirtha This is the famous Vyasa Raya the author of *Tarka Tindara* and other well known works (See Vol I Chapter VIII Religion) In *Shimoga* 81 he is described as having seen the furthest point of grammar and logic and in interpreting the *Vedas* and *Sastras* as Brihaspati

The following is an account of Vyasa-tirtha which is borne out by a little work called *Vyāsa vijaya* —

Brahmanyatirtha was the head of the Abbur *matha* near Channapatna A woman whose husband was dying was preparing to become a *sati* but being dissuaded by her friends came to Brahmanyatirtha for his advice He blessed her that she should continue a wife and bear two sons of whom give me he said the elder and live with the younger On returning home she was surprised to find her husband revived and according to the sage's prediction she in course of time bore two sons The elder was brought up in his *matha* by Brahmanyatirtha who in the seventh year consecrated him giving him the name Vyasa-tirtha and sent him to Mulbagal where he studied under Sripadararya for twelve years After this he and his *gurus* went to Panduranga and bathed in the Bhimarathi and he set out on a pilgrimage to the holy places in the north On his return he went to Srirangam where some dispute arose about his admission and he fixed a space for Vaishnavas He also had the large Vyasasamudra tank made on the Myore Cuddapah border After this he was for twelve years at Tirupati where the *guru* of the Vyasaraya *matha* is even now entitled to certain privileges in consequence He became the author of the following important works on the Dvaita philosophy — *Tatparya-chandrika Nyajamrita* and *Tarkatandma* Eventually he went to Anegondi (or Vijayanagar) While there the king was warned of an evil *muhurta* (a period of 48 minutes)

approaching, and advised to put some one else on the throne for that time. Not knowing whom to choose, the king sent out his state elephant with a garland, which the animal presented to Vyāsātīrtha. The latter was not enamoured at the prospect, and said, he was only a mendicant, it must be a mistake. But on being urged, he hid himself in a cave, and the elephant being sent out again, again took the garland to him at the cave. He could not any longer deny the divine summons, and so for the time of the evil *muhūrta* was anointed to the throne. But in order both to make manifest the danger and to escape it, instead of sitting on the throne, he threw his ascetic's robe on it, which immediately burst into flame and was burnt. The danger being thus averted, he took his seat, and in the short time left him signed grants of land to the Brāhmans who had anointed him. (Some of these grants, it is said, are still to be met with.) He ended his days at Anegondi, and his *vṛndāvana* or tomb is still pointed out at a spot called Nava-vṛndāvana, on an island in the Tungabhadra, about half a mile from that place.

Kumadvati
or Choradi

Kumadvati or Choradi An affluent of the Tungabhadra. It rises in Agastya Parvata or the Bilēsvara hill near Humcha, and flowing north near Kumsi and Shikāpur, receives at the latter place a stream on the left from Anantapur. Continuing north, it forms the large Masur Madaga tank on the frontier, and turning north-east, runs into the Tungabhadra at Mudanur, some distance above Harihar.

It is stemmed by twelve *anicut*s, giving rise to channels 33 miles in total length.

Kumsi.

Kumsi A Sub-taluk in the south-east. Headquarters at Kumsi. Contains the following *hoblis*, villages and population —

Hoblis	Villages	Population
Kumsi	34	5,727
Haranahalli	60	10,516

No.	Place	Population	Principal places with population
1	Kumsi	118	
2	Ayanur	119	
3	Kohalli	84	
4	Haranshalli	102	

This taluk contains important manganese mines at Kumsi and Shankargudda worked by the Workington Iron & Steel Co

The following are the important roads in the taluk —

Communications.

	Length
1 Bangalore Honnavar road	16 miles
2 Ayanur Nagar road	5
3 Ayanur Savalanga road	9
4 Kumsi Haranshalli road	1
Total	31 miles

Kumsi (Town) — A town on the Shimoga Gersoppa road 14 miles north west of Shimoga Head quarters of the Kumsi Sub Taluk and a Municipality

Kumsi (Town)

Population in 1911	Males	Females	Total
Hindus	844	914	1,558
Muhammedans	185	167	352
Christians	9	5	14
Animists	1	3	4
Total	1,039	1,089	2,128

From inscriptions at the place it appears that its correct name is Kumbase and that it was granted as an endowment

by Jinadatta Rāya of Pomburcha (Humcha) for the Jain temple there

The Pakshiranganātha temple here deserves mention. In it there is a small figure of Vishnu seated on a bird with outstretched wings, like the figure in Ravivarma's picture, but without consorts at the sides

Kuppatūr

Kuppatūr. A place of great antiquity in the Anvattī *hobli*, Sorab Taluk.

According to tradition, Kuppatūr is the ancient Kuntalanagara, the capital of king Chandrahāsa

The Kālī temple outside the village is said to be the one in which Chandrahāsa was ordered to be beheaded by the minister Dushtabuddhi who, being foiled in his design, put an end to his own life. A severed head in stone, lying in front of the Kālī temple, is shown as representing the wicked minister. Tradition accounts for the name of Anavattī, a village close by, by the statement that that was the place where the king's elephants and camels (*āne onte*) were once tied. Kuppatūr contains a number of temples, more or less in ruins. In the *garbhagriha* of the Jaina temple there is a seated image of Jina, about 5 feet high with canopy, flanked by *chauri*-bearers and overshadowed by a seven-hooded serpent, all in one stone. An inscription was discovered on the pedestal. Another image outside the *garbhagriha* had also an inscription on the base. The *navaranga* of the Rāmēsvara temple has a large ceiling panel 8' × 8', of *ashtadīpālakas* with a figure of Tāndavēsvara in the centre. It is curious that Kubēra and Agni have interchanged their places. In the Narasimha temple, the image of Narasimha is very peculiar, being seated without a crown and with only two hands, the right hand resting on the raised knee and the left hand on the thigh. The face too is more like that of a natural than of the conventional lion. The god is called Chintāmani Narasimha. The wooden image of the goddess Dyāmavva in the Dyāmavva temple is a terrible figure with 16 hands, riding a lion, with Mahishāsura flanked by two fowls at the feet. At the sides of the lion are two female *chauri*-bearers. The *prabhāvali* or glory is beautifully carved, the two semi-circular rows at the top containing fine figures representing

the 10 *atalaras* of Vishnu and the regents of the cardinal points. The height of the image with the *prabhatala* is about 8 feet. The Kaitabhesvara temple situated at some distance to the east of the village is a good specimen of the Chalukyan style and perhaps the largest of its kind. It resembles the Kedarasvara temple at Belgaumi in some respects. There is however only one cell with a large tower over it and a projection in front having neither the Hoysala crest nor a *simha lalata*. The doorways are lofty. There are 4 niches in the *nataranga*—2 at the sides of the *sukhanasa* doorway and 2 at a little distance from them facing north and south. The *nataranga* is blacked by a new mud wall with a wooden doorway. The front *mantapa* has as usual a veranda all round and entrances on the three sides. The central ceiling panel is artistically executed. The outer *jagati* or parapet running round the front *mantapa* is about 8 feet high with a rail resembling that of the Santiathantha basti at Bandahiko. There are turrets at intervals on the outer walls as also on the parapet below the rail. The tower which is now plastered is a lofty one with 9 tiers though containing only a few sculptures here and there. Around the temple there are a few dilapidated small shrines with fine doorways containing the figures of Virabhadra, Durga, Adisesha and so forth. There is also a temple of Parvati to the north. The god of the temple though popularly called Kaitabhesvara is named Kotesvara in the inscriptions. The temple is an old one being referred to in an inscription dated A D 1070.

Madagada-kere or Masur-Madaga-kere—A large tank in Sibiharpur taluk 7 miles north of the *lasba* on the frontier. It is formed by embanking the waters of the Choradi or Kumadvati at a point where it runs through a gorge in a low chain of hills. The original bund was 660 feet wide at top and 90 feet high. Mr Lewin Bawring notes that according to an Arabic inscription on the spot it was at one time repaired by the Nawab of Savanur. This seems unfounded for the inscription referred to by him records the construction of a fort at this spot. (See below). The sheet of water—second only to the Sulekere—thus formed irrigated a large extent of land in Dharwar. When the tank breached many

Madagada
here or
Masur
Madaga kera.

years ago, the bund was reconstructed on a smaller scale, in consequence of which a considerable tract of rich land, formerly included in the bed of the tank, was left bare. This was soon taken up for cultivation, and as many as thirty-five villages have sprung up around, contributing Rs 45,000 more to the Mysore revenue than was formerly realized. Should the embankment be ever raised to its original standard, as at one time contemplated, most of these villages would be submerged (See *Shikarpur*)

An object of interest here is a fine Arabic and Persian inscription of the time of Sultan Muhammad Adil Shāh, son of Ibrahim Adil Shāh of Bijapur, recording the erection of the fort at this place, as an indication of victory and an attempt "to repel the wicked infidels and establish the auspicious Islam." The inscribed slab is in front of the sluice of the tank.

Malandur

Malandur A village in the Anantapur hobli, Sagar taluk. Population 475

Here are the remains of a fine Lingāyat *matha* in a large enclosed ground. There is also a splendid tank, about 200 feet by 144 feet, built round with laterite steps. Towards the middle of one side is a Basava temple surrounded by the water and approached by a stone causeway. Some very fine stone elephants remain at the entrance to the *matha*, which is entirely in ruins.

Malvalli

Malvalli A village in the north of Shikarpur taluk, about 9 miles from Siralkoppa. Population 411

Of interest on account of a pillar discovered there, bearing an inscription of Hārītiputra Sātākarni, probably of the second century A.D., the oldest in Mysore next to the Edicts of Asōka. From this it appears that the original name of the village was Mattapatti. (See *Tālgunda* for some further information)

Nagar

Nagar A taluk in the south-west. Area 528.52 square miles. Head-quarters, till then at Nagar, were transferred

to Kallurkatte in 1893 Contains the following *hoblis* villages and population —

	Hoblis	Villag	Population
1	Nagar	3	98
	Lakshmyura		634
3	Kallurkatte	5	6718
4	Humcha	43	6500
5	K. Chhalli	33	4256
	Total	107	78180

No	Place	Population	Principal place with population
1	Mulagojja	1111	
2	Kallurkatte	1011	
3	Humcha	356	

The Nagar taluk was extended in 1832-33 by amalgamating with it the Anantapur taluk but the latter was re-established in 1857-58. In 1875 a portion of it was again added to Nagar.

This is a purely *malnad* taluk abounding in perennial streams deep valleys high wooded hills and dense vegetation. Situated on the Western Ghats and forming one of the extreme westerly taluks of the Shimoga District it is one of the most picturesque portions of the Mysore State. The taluk is enclosed on three sides by hills the drainage of which flows north west into the Sharavati. But the streams in the south west of the taluk run directly down the Ghats westward and discharge into the sea at Kundapur forming in South Kanara the three rivers Gargita Chikrān nadi and Mudur. The Honnar hobli in the north west is an isolated bit of country belonging to South Kanara and forming part of the endowments of the temple at Kollur below the Ghats. The principal mountain is the Kodachadri parvata in the north west to the north of which is the Kollur Ghat. The other pass to the coast is by the Hardar Ghat or Hosangadi Ghat.

in the south-west The average annual rainfall in the southern portion of the tract is 190 54 inches, while that in the northern portion is 102 14 inches Towards the east the rainfall diminishes and averages from 70 to 80 inches. Scarcity of water is seldom felt in the tract, even the great famine of 1877-78 having left it untouched, but the soil is nowhere very rich Owing to the purely *malnad* nature of the country, dry crops do not grow well and are therefore not much cared for and the rayats engage themselves mostly in wet and garden cultivation Rice cultivation is predominant, 90 per cent of the occupied lands being devoted to that crop Supāri and other garden produce take up 6 34 per cent while ragi and other minor crops form a very insignificant portion Among the best are pepper and cardamoms The supāri gardens are occasionally attacked by plant diseases, the most harmful of which is the *kolerōga*

The whole taluk is densely wooded, the southern part being composed of a perfect cluster of hills, in a basin formed by which Nagar, the capital formerly called Bednūr, is situated The Sharāvati flows from south to north, and its valley may be said to be the most open portion of this very inaccessible country The Rāmachandrapur Nāla is a small stream which flows very close to and almost parallel with the Sharāvati, and joins it near the boundary of the taluk To the west of the valley in which these two streams flow the appearance of the country becomes wilder and wilder as the Ghats are approached, and these are here more precipitous than usual, and present few natural outlets The rise towards the crest of the Ghats is very rapid, a height of 4,411 feet being attained at Kodachādri, a mountain on whose summit meet the three boundaries of South Kanara, Nagar, and Sagar taluks To the east of the Sharāvati and to the north generally the country is more level, although the extent of jungle appears to suffer no diminution, but it changes considerably in character, the proportion of timber trees seeming to be greater than to the west, where the soil is more shallow, with much laterite

The areca nut is reputed to be of very fine quality. They largely belong to Brahmans who are dependent on labour imported from the coast for their cultivation. The forests are chiefly *lans*, there being but little deciduous forest what there is being found chiefly to the north and east, towards Anantapur. Rice is exported to the coast and areca nut to Bellary and Walajapet by way of Birur. All other articles of consumption and cloths of every description are imported from the plain countries about one fourth by the merchants who come to buy areca nut and the rest by *royats* from Tirthahalli, Avinalli and Kollur either on bullocks or by porters.

The Revenue Settlement was introduced in 1877 and the Revision Settlement from 1914-15. The different classes of land according to the Revision Settlement were as follows —

Dry	4 239 acres
Wet	25 195
Garden	2 094
Total	31 528 acres
Unoccupied waste	1 601 acres

Considerable attention has been paid in recent years to improving the communications of the taluk by a system of roads radiating from Kallurhatta. There are thus roads east to Ayanur and north to Sagar and to Anantapur with the Ghat roads to the coast south through Nagar and Haidarghar to the Hosangadi Ghat and west to the Kollurghat. There is also a road from Anantapur south through Humehadakatte to Tirthahalli and one is projected from Hulikal near Haidarghar to Tirthahalli. A branch from the Sagar road connects with the Kollurghat road.

Communi-
cations

Nagar — A village situated in 13° 50' N lat 75° 6' E long on the Kollurhatta Haidarghar road. Head quarters till 1893 of the Nagar taluk and for some time a Municipality. Until recently an important town but has declined in importance.

Nagar

It was originally a small village, called, from the nature of the forest around Bidaru halli, bamboo village, and contained a temple of Nilakantha, the property of a Brāhman named Honne Kamblī Bhatta. About 1640, under the name of Bidarur or Bidanur (Bednūr), it became the capital of the Keladi chiefs, who transferred the seat of their government hither from Ikṣkēn. Being in the direct course of trade by the Hosangadi Ghat, it rapidly increased in size and importance, until there was a prospect of the houses reaching the number of a lakh, which would entitle it to be called a *Nagara*. The walls were 8 miles in circumference, and had ten gates, named the Dili, Kodial, Kavaledurga, etc. The palace was on a hill in the centre, surrounded with a citadel, and the whole city was encircled by woods, hills and fortified defiles, extending a great way in circumference.

Sivappa-Nāyak, whose conquests have been elsewhere described, did much to improve and enlarge the town, and his successors ruled here undisturbed till 1763, at which time their territories extended from Sante Bennur and Holalkere in the east, over the whole of South Kanara to the western coast. In that year, Haidar Ali, having conquered all the northern parts of Mysore, advanced upon this capital. The Rāni Virammāji, having in vain tried to buy him off with offers of large sums of money, took to flight, ordering the palace to be fired, if the treasures could not be saved. The terror-stricken inhabitants fled *en masse* to the woods. Haidar pressed on, and storming the town, extinguished the flames of the palace and gained possession of a booty estimated at twelve millions sterling in value.

In pursuance of the intention to make it a *Nagara*, he gave the place the name of Haidar-Nagar, and greatly increased its trade. He built a palace outside the fort, established in the town his principal arsenals which employed many hands in the manufacture of arms and ammunition, and continued the mint, where coins were first struck in his name, the Haidari pagodas, and much money was coined during his reign. He gave great encouragement to merchants, and endeavoured, but with little success, to introduce the cultivation of mulberries and the rearing of silkworms.

The place suffered much during the wars with Tipu Sultān. It was captured by the British in February 1783, under General Matthews, and surrendered at the end of April. During the

sieges the palace and the town were burnt. Tipu rebuilt the palace and endeavoured to restore the town but his regulations for the protection of internal trade dealt a severe blow to its prosperity. He also appointed a *Ka*, who pulled down the Christian church and Hindu temples broke to pieces numerous inscriptions on stone and erected a mosque from the ruins. In the insurrection of 1830 Nagar as it was called after 1789 again became the object of attack. But from the time that the court was removed the place lost its prospects as it never obtained a footing as a mercantile town between the table land and the coast being merely a place of transit. Mr. Stokes writing in 1838 says — Nagar and its vicinity exhibit traces of great decline in wealth and population. It has nearly lost its trade for which from the difficulty of access it is not naturally well adapted. Under the Maharaja's government it gave its name to the Nagar *Kaujdar* which included the present Districts of Shimoga and Kadur. From 1831 that name was changed to Nagar Division and from 1863 to 1881 when Divisions were abolished the Nagar Division was composed of the Shimoga, Kadur and Chitaldrug Districts. Nagar benefited by the opening out and improvement of the ghat roads but the transfer of the taluk head quarters to Kallurkatto in 1893 wholly tended to diminish its importance.

Among interesting relics of former times at this place are the bells at some of the temples carried off by Tipu Sultan from Christian Churches in Malabar or Kanara. One has the following inscription on it *Fecit Imste Londami Anno Domini 1713* which means that it was made at Amsterdam in the year of Our Lord 1713.

Nyamti — A town situated in 14° 9' N lat 75° 38' E long on the Honnali Ayanur road. Head quarters from 1869 to 1882 of the Honnali taluk and a Municipality.

Population in 1911	Males	Females	Total
Hindus	1470	1432	3002
Muhammadians	164	166	330
Christians	11	4	15
Jains	7		7
Total	1647	1566	3213

Nyamti is a town of very modern date, the *petta* having been established in the time of the Dewan Purnaiya. Being situated between the *malnad* and the *madan* regions, a considerable trade is carried on by the merchants, who are all Lingāyāts, in exchanging the products of both tracts. The grain of the *malnad* and the jaggory of the neighbouring taluks which can be stored in this dry climate for some time without risk of damage, with areca-nut from Nagar and Koppa, are forwarded to Bellary, Dharwar, etc., in return for cloths and other articles, which are sent to the *malnad* and Kanara. During the American Civil War of 1864-5, much money was made here by the cotton trade.

Sagar

Sagar A taluk in the west. Area 667·77 square miles. Head-quarters at Sagar. Contains the following *hoblis*, villages and population

Hoblis	No of villages	Hamlets	Villages classified		Population
			Government	Inam	
Ananthapur	63	60	60	3	6,350
Sagar	58	71	58		17,651

Total	269	909	308	3	55,716

Principal places with population

Twenty-three villages which formed part of Shikarpur taluk were transferred to this taluk since the 1st of October 1923 of which three are Inam villages

No	Place	Population
1	Keladi	1,858
2	Sagar	4,987
3	Kanle	1,321
4	Tadagalale	757
5	Thalaguppe	904
6	Nellur	958
7	Shuntikoppa	886

This taluk occupies the most westerly projection of Mysore being at one point not more than 8 miles from the sea. The west and greater part of the north and south are bounded by the Ghats, a spur from which crosses the taluk from west to east passing south of Ikkārī and parting the western from the northern streams. The Sharavati runs through the middle from south to north west receiving near Bīrangī the Yenne Hale. On touching the frontier it turns west and descending the Ghats in the far famed Falls of Gersoppa flows to the sea at Hannavar. The principal stream running north is the Varada, which rises near Ikkārī. The chief heights are Deva landu and Govardhangurī.

The taluk is considered purely *malnad* but there is a considerable difference between the south western and north eastern portions separated mostly by the river Sharavati. The rice fields in the former bear a double crop annually but the gardens stocked with areca palms pepper and cardamoms are somewhat inferior. This tract presents the appearance of a rolling stretch of bare hill tops the sides and valleys densely wooded the latter occupied by the gardens. The scenery is surpassingly beautiful and the climate in the hottest time of the year is cool and pleasant. The people live in separate hamsteads and village communities so far as living in same place is concerned are unknown. The remaining portion of the taluk is comparatively level and open but the climate is not so good as in the other part. Only one crop of rice can be raised annually but some of the gardens are remarkably fine. The people as a rule live together in villages but still there are many hamsteads scattered here and there principally to the south west.

The forests although on the whole extensive, are not in compact masses nor are they very productive. Excepting the great Hinnī forest which lies to the south of the Gersoppa Falls the remainder are chiefly *lans* or tracts of virgin ever green forest, in most of which pepper grows abundantly self sown and uncared for but little of the produce being collected owing to the depredations of mankeys. There are

also towards the south patches of evergreen forest, generally only a few acres in extent, with very sharply-defined limits. There is a thick undergrowth of a low plant called Goravakatige. Deciduous timber trees are rare. Inside one of these patches of forest the growth of trees and underwood is so dense that it is difficult to pass through, on emerging, suddenly hardly a bush will be visible for the hundreds of yards or more of grassy open which may intervene between the patches. The real cause of this alternation of bare ground and densely-wooded patches is to be found in the laterite formation. Wherever the hard bed of laterite is near the surface, wood refuses to grow. Towards the east the forest is gradually disappearing before the inroads of garden cultivators, who mercilessly strip and clear the Bayan Betta, as they are called, in order to obtain the *soppu*, or leaf manure, which is indispensable for their gardens.

In the *kans* the soil is rich and deep, but in most of the taluks the soil is hard and shallow, with much laterite. Sagar is essentially a garden taluk, and rice cultivation is also extensive. Dry crops are of no account, and are raised on the same ground only once in three or four years. The rice is largely exported by the raiyats themselves, chiefly to Gersoppa, by way of the Gōvardhangurī and Hinnī ghats, but that of the southern *māganis* is often sent to Bhatkal or Baidur. Areca-nut is exported principally towards Bellary, though some goes also to Walajapet and to Birur. Cardamoms and pepper are taken to the Kanara and Dharwar markets.

At first under the Kadambas, this country subsequently was subject to the rule of the Sāntara kings of Pomburcha, as feudatory to the Chālukyas. Various governors of the Banavāsī Twelve Thousand, appointed by the Chālukyas, Hoysalas and Yādavas, held sway over it from the 12th century, until under Vijayanagar the Keladi chiefs rose to power, of whose territory it formed a part until taken by Haidar and annexed to Mysore.

The Revenue Settlement was introduced in 1874 and the Revision Settlement with effect from the year 1908-09. The land is classified as follows —

Dry	8 932 acre
Wet	30 527
Garden	3 578
Government occupied land	12 987
Government assessed waste	13 205

The high road from Shimoga to the Gersoppa Falls runs through Anantapur and Sagar. From Sagar there are roads north to Simalkoppa with a branch to Sorib and south to Kallurkatti with a branch to the Kollur ghat. From Anantapur there are roads south west to Kallurkatti and Nagar and south to Tirthahalli. The passes to the coast are the Gersoppa Hinni and Govardhangiri to Honavar, the Hogavadi to Bhatkal and the Karmi and Kollur to Bandur. Regular roads have been constructed through the first and last of these, the others are only fit for pack bullocks, which are largely used.

Sagar—A town on the left bank of the Varada near its source, situated in $11^{\circ} 10' N$ lat $75^{\circ} 5' E$ long 10 miles west north west of Shimoga on the Shimoga Gersoppa road. Head quarters of the Sagar Sub Division and of the Sagar taluk and a Municipality.

Population in 1911	Males	Females	Total
Hindus	2 111	1 855	3 966
Muslims	359	317	676
Christians	10	17	27
Jains	8		8
Total	2 698	2 289	4 987

The town is one of the chief depots for the areca nut trade and contains some wealthy merchants. Pepper and al wood and other products of the *malnad* are exported by them to the Madras districts east and north and to parts of Bombay in the west the returns being made chiefly in cloths.

The town has been recently extended to the west by a quarter named Chāmarājēndra Pēte, in memory of H H the late Mahārāja's visit.

Sante-
Bennur

Sante-Bennur A village in Channagiri taluk, on the road from Sūlekere to Sasalu railway-station. Head-quarters of the Sante-Bennur hobli. Population, 1,727

It was called Sante-Bennur on account of the large weekly fair (*sante*) held there, and to distinguish it from Male Bennur, Rām Bennur, and others of the name. It was founded, probably in the 16th century, by a chief of the Basavapatna family, on the spot where a hare had been observed to turn upon the hounds, which indicated heroic soil. The settlement of traders and merchants was encouraged, and a large *petta* sprung up. Hanumappa Nāyak, one of the chiefs, erected a palace at Sante-Bennur, and had a skilfully constructed *honda* or reservoir made in front of the ancient temple of Ranganātha, faced round with flights of steps, and with ornamental pavilions at the angles and in the centre. The one in the middle, called the Vasanta-mantapa, had a fountain playing from the top. After the capture of Basvapatna, the town was taken by the Mussalman forces of Bijapur, under Randulha Khān, who destroyed the temple and erected in its place a mosque of very large dimensions. Hanumappa Nāyak, who had been forced to retire to Tarikere and Kaldurga, was greatly incensed at this, and watching his opportunity planned a night attack, in which he put to death the Muhammadan governor, and desecrated the mosque with the blood of hogs, pulling out a stone from the walls of each compartment. The Tarikere chiefs eventually regained the place and held it until it was taken by Chitaldrug early in the 17th century. In 1717, it was captured by the Bednūr chiefs, who fortified it, and in spite of repeated attacks by Chitaldrug, retained it till 1761, when it fell into the hands of Hardar Ali. In common with other places in the neighbourhood it was plundered and destroyed by the Mahrattas under Parasu Rām Bhao in 1791. The mosque, never used since its desecration, and the *honda*, with its ruinous but graceful pavilions, are the only points of interest now left.

The Hanumappa Nāyak above mentioned is probably identical with the donor of lands mentioned in *Chiknayakanhalli*

19 dated in 1636 in the reign of the Vijayanagar king Venkatapati Deva. Several other inscriptions in the Chitaldrug District refer to earlier chiefs of this place. Thus Rajappa Nayaka son of Hanuma Nayaka was in power in 1572. Immadi Hanumappa in 1576 and 1581 and his son Dala Nayaka 1605. Some of these names recur in certain inscriptions found in the Shimoga District (*R C VII*). Thus *Shimoga 108* which probably belongs to 1558 mentions Hire Rangappa Nayaka. *Channagiri 6^o* dated in 1565 mentions Hanuma Nayaka's son Bollappa Nayaka and Kengappa Nayaka. *Channagiri 67* which might be referred to 1565 records a grant to a tumbler by Kengappa Nayaka. *Channagiri 12* which has been assigned to 1601 belongs to the time of Hanumappa Nayaka III. *Honnali 31* a copper plate grant corrupt in language which Mr Rice thinks may be set down to 1667 gives a confused account in which the following succession is detailed—Hire Hanumappa who's son was Tula Hanumappa who's son was Hanumappa II whose grandson was Kengappa whose son was Basavappa. In the present state of our knowledge it is altogether impossible to reconcile these names and dates.

For an account of the chiefs of this place after they returned to Tarikere see *Tarikere Kodur District*.

Sharavati—A river which rises at Ambutirtha near Honavar, in the Tirthahalli taluk. It takes a north westerly course by Kattūpetta receives the Haridravati on the right below Pattaguppe and the Yenno Holo on the left above Barangi. On arriving at the frontier it bends to the west and precipitating itself down the celebrated Falls of Gersoppa and passing that village (properly *Geru sappe*) which is really some 18 miles distant discharges into the sea at Honavar in North Kanara. The name Sharavati arrow born, is in allusion to its flowing from the Ambutirtha which was formed by a stroke of Rama's arrow. The stream is crossed by 70 aments, from which small channels are drawn having an aggregate length of 26 miles.

The magnificent *Falls of Gersoppa* or Jōg that is the waterfall are unquestionably the grandest natural beauty in Mysore rich as it is in splendid scenery. They eclipse

every other Fall in India and have few rivals in any part of the world "While excelled in height by the Cerosoh and Evanson cascades in the Alps, and the Falls of the Arve in Savoy, the Gersoppa cataract surpasses them in volume of water precipitated and while much inferior to Niagara in volume, it far excels those celebrated Falls of the New World in height " The height of the Cerosoh cascade is 2,400 feet, that of Evanson, 1,200 feet and the Falls of the Arve, 1,100 feet At Niagara, a river two miles across, contracted to less than half its former breadth, is hurled over a precipice 164 feet high in two great sheets into the basin below (*J A S B*, XIV, 421) L BOWLING says 'It may truly be called one of the wonders of the world, for though the volume of water is less than that of the Cauvery, the immense height of the chief fall is almost without a parallel " They are situated in $14^{\circ} 14'$ N lat, and $74^{\circ} 50'$ E long, on the borders of Mysore and North Kanara, 62 miles from Shimoga in the former and 30 from the port of Honavar (Honore) in the latter Their existence appears to have been unknown at the time of Buchanan's journey in 1800 The Sharāvati, flowing over a very rocky bed about 250 yards wide, here reaches a tremendous chasm, 960 feet in depth, and "performs (as Captain Newbold has expressed it) this stupendous lover's leap from the chains of the giant Ghats into the arms of his ocean-rescued mistress prolific Kanara " This is in allusion to the legend of the formation of the western coast by Parasu Rāma

The water comes down in four distinct falls, presenting a scene of transcendent grandeur and sublimity, whose effect is greatly heightened by the wild and beautiful country around, covered with a wealth of luxuriant vegetation The Rāja Fall pours in one unbroken column sheer to the depth of 830 feet (By various visitors this has been called the Grand fall, the Mam fall, and the Horse-shoe fall The Rāja after whom it is now generally named was the Sode Rāja of Sirsi, who proposed to erect a little shrine or *mantapa* on the spot, the lines for the foundation of which may be seen

on the stone just above the Raja's rock which projects over the chasm) Half way down it is encountered by the Roarer another fall which precipitates itself into a vast cup and then rushes violently downwards at an angle of forty five degrees to meet its famous compeer A third fall the Rocket, shoots downwards in a series of jets while the fourth called the Dame Blanche is an Undine like cascade gliding quietly over the mountain side in a sheet of foam

The most favourable time for visiting these glorious works of nature is in the cold season when the river is low enough to admit of crossing to the Mysore side whence the best views are obtained During the monsoon the place is enveloped in a dense cloud of vapour through which rises the thunder of the invisible mighty waters in their fearful descent There are good bungalows on both the Mysore and the Bomhay sides immediately at the head of the falls Close by the latter is a slab of rock projecting over the verge of the gulf by lying down on which and peering over the best view is obtained of the appalling abyss from above rendered more striking by the continual flight across it of myriads of rock pigeons which find a congenial home in the face of the cliffs

I lay down flat on this shelf (says a visitor in the month of August fifty years ago) and drew myself up to its edge over which I stretched my head A sight but not on the view which I shall never forget and can never hope to describe I have since looked down the fuming and sulphurous craters of Etna and Vesuvius but have never experienced the sensations which overwhelmed me in the first downward gaze into this (*hibernice*) volcano of waters for so it looks a chaotic scene that rivets with baishik fascination the gaze of the spectator It was with great reluctance and with an intense feeling of depression that I withdrew my head drenched in spray from the brink of the precipice Ooo might almost gaze for ever on this abyss in which a mighty mass of water appears eternally burying itself in a mist shrouded grave The clouds of spray which continually ascend heavenwards in slow and majestic wreaths appear to typify the shadowy ghosts of the entombed waters

The Falls are seen to greatest advantage from the selected points of view which have been cleared on the Mysore bank, the most popular being Watkin's platform. From this side a descent may be made to the pool below, the water in which is 130 feet in depth. But this is a difficult undertaking and the re-ascent extremely laborious. The view looking upwards from below is generally considered far less impressive than from the other points, as regards the Falls themselves, but the grandly rugged features of the chasm and the winding gorge in which it is prolonged are more clearly seen in all their savage nakedness.

The varying effects of light and shade at different hours are extremely beautiful. A lovely rainbow spans the waters in the afternoon, rising with the declining sun, and even lunar rainbows are said to be formed in certain aspects of the moon. Rockets and blazing torches or bundles of straw, cast over on a dark night, throw out a fitful glare upon the jaws of the abyss, producing weird and solemn effects as viewed from the Rāja's Rock. No words can suffice to adequately describe the charms of a scene replete with every element of the sublime, combining in one superb panorama so many varying aspects both of terror and of beauty, all instinct with the life, the force and play of moving waters.

"The precipice over which the water falls affords a fine section of gneiss and its associated hypogene schists, which dip easterly and northerly away from the Falls at an angle of about 35° . The gneiss is composed of quartz and felspar, with both mica and hornblende, and alternates with micaceous talcose, actinolitic, chloritic and hornblende schists, imbedding (especially the latter) iron pyrites. These rocks are penetrated by veins of quartz and felspar and also of a fine grained granite, composed of small grains of white felspar, quartz and mica. The mass of hypogene rocks has evidently been worn back several hundred feet by the erosion and abrasion of the cataract, the softer talcose and micaceous schists have suffered most. Rock basins are frequent in the bed of the river, which is worn in the rock and rugged with water-worn rocky masses" (*J A S B*, XIV, 420)

Two officers of the Indian Navy deputed by Government to measure the Falls arrived there on the 6th of March, 1856 Their account of the feat, written in the old bungalow book, is as follows —

Threw a light swing bridge across the chasm from the tree overhanging the Roarer to the rock westward of that called the Raja's Rock To this slung a cradle of light bamboo capable of holding two people comfortably The cradle traversed on one single and two double blocks through which rove the four hawsers composing the bridge We had previously placed the bridge from the Raja's Rock to the tree but found that the lead line would not from any single part of the bridge plumb clear of the Roarer or the rocks on either side thus proving beyond a doubt that the pool had never before been plumbed from the sides of the chasm

In the forenoon of the 12th of March all arrangements being completed and provision made against remote contingencies we made the passage in the cradle from side to side halting in the centre to pour a libation to the guardian spirits of the chasm The arrangements being found perfectly satisfactory we proceeded to plumb the pool The cradle with one person was eased away to a distance of 17 feet from the tree The lead line was lowered from the shore through a block (*vulgo* a pulley) on the cradle passing down through its centre The plummet consisted of 7 lbs of hard lead placed in the centre of an annular life buoy slung horizontally the whole weight being about 18 lbs When the lead reached the pool the life buoy floated it and thus the lead man in the cradle felt the loss of weight Having during our service had a little experience in deep water we know that a loss of 20 lbs from a plumb line of upwards of 100 fathoms would be scarcely appreciable and so we found it But by hauling up half a fathom and letting go suddenly the life buoy made a discernible splash in the water A mark was then placed on the line by the block and the angle of its dip taken with a theodolite on the brink of the precipice near the tree at the hypotenusal distance of 17 feet This gave the perpendicular depression of the cradle below the instrument (on a level with the tree) as 14 feet which added to the line laid out 815 feet gave the exact depth 829 feet

In the afternoon we descended the ravine, and with a raft of a few bamboos and three boats' breakers, paddled and sounded all round and across the pool, having previously, from above, turned off a great part of the Roarer into the Rocket. We found that 22 fathoms was the greatest depth anywhere. This sounding was taken very near the west side, about 30 yards from the head of the pool or base of the Grand Fall. We climbed the rock on which the Roarer falls, and when about 30 feet up it, the stream, which before had been mild rather, came down with great force on our devoted heads, and we had to "hold on by our eyelids" to prevent being washed off.

By measuring a base we ascertained the horizontal distance between the centres of the Kanara and Mysore bungalows to be 710 yards, between the Raja's rock and the tree that plumbs the Roarer, 74 yards. The top of the Raja's rock is 5 feet below the level of the abovementioned tree. A plumb-line lowered from this tree into the bed of the Roarer measured 315 feet.

On the 15th of March, we broke up our bridge, from which we had taken several satisfactory views of the chasm, and descended by a rope into the cup of the Roarer, where we breakfasted, and afterwards, with some little difficulty at one point, passed down by the side of the Roarer, and reached a position at the back of the Grand Fall, whence the Rocket and the Roarer were seen to the right of it. From this place only can you have a correct idea of the great depth of the cavern in front of which the Grand Fall drops. The sky clouded over and thunder pealed when we were below. The effect was grand in the extreme. At 5 P.M., reached the top of the cliff in safety.

The new Kanara bungalow is 1,670 feet above the level of the sea, the old one 1,850. The old Mysore bungalow was 30 feet lower than the last, the new one, built at what was known as Palmer's platform, is still lower. There is one special Travellers' bungalow. This place is resorted to by thousands of visitors during the months of October, November, December, January and February every year.

Mrs Bowring gives a brief but graphic description of the Falls, under date "Gairsoppa, January 1, 1869." She writes

"The Ghat road is a zigzag like the St Gothard pass on the Italian side, and when we reached it, the view was so beautiful

down into the valley that I was persuaded to remain in the carriage and we walked the horses with the horse boys at their heads there was no danger. Once I was obliged to get out a bridge over a brook having been made with nothing but a few sticks and mud plastered over them and it was so insecure that it bent with the weight of the carriage.

We are now in the Bombay Presidency out of its jurisdiction but the other side of the river belongs to Mysore. We found a very dirty tumble down bungalow with a few tables and chairs all ailing the wood being so dense that it was difficult to pitch a tent.

As soon as I came up we proceeded to the Falls the platform on which the bungalow stands being so high that nothing could be seen beyond the river and the wood but a mighty roar of unseen waters prepared us for what we were to see.

After following a steep descending path through the wood we came upon some enormous boulders of rock which during the rainy season are covered with water and scrambling over these for a few yards found our elves at the edge of the fearful abyss. I crawled on my hands and knees I holding me and looked over a sheer drop of 820 feet the waters rushing over to the left of where I lay. Hundreds of pigeons were flying in and out of the clefts in the rocks. It was a fearful precipice to look over and yet there was a sort of fascination about it. There is not much water now in the river but one can imagine what it must be in great floods. The people say that the spray is then so great that the pool at the bottom cannot be discerned. There are four Falls all from the same level the largest being called the Raja the next the Roarer the third the Rocket and the last the Dame Blanche but in great floods they are united in one grand stream.

After leaving the rocks we walked through the wood to a platform a little below the Falls a rather rough affair made of only a few planks fastened to some trees. From this you only see the two latter Falls but they are certainly wonderfully beautiful in their graceful shoot from the rocks and the height inspires you with an irresistible feeling of awe. After a few minutes spent in silent admiration we climbed up again to the bungalow and enjoyed our breakfast in the verandah although it was rather a windy roost.

In the cool of the evening, we again descended to the Falls, and peeped once more over the yawning abyss, the gentlemen being very rash, and making me quite nervous by standing so near the edge. We afterwards crossed the Raja fall, a few yards above the actual descent of water, on a rough bridge made of a few logs of trees tied together with bamboos. It was giddy work, but I did not feel afraid, and we then climbed the rocks between the Raja and the Roarer Falls, and going on our hands and knees, looked over. The view looking down the ravine, with the sunset lights on the hills beyond, was perfectly beautiful, and quite repaid us for the fatigue.

Descending through the wood the next morning, we crossed the river above the Falls, scrambling over the great boulders of slippery rocks, which even the gentlemen said was hard work. When we reached the final bridge above the Roarer, my courage gave way, and I declared I could not cross, but, after saying an 'Ave,' I took L's hand, and on we went together. There was no real danger, but it looked so very perilous, and the roar of the waters shook one's nerves."

Shikarpur

Shikarpur. A taluk in the north. Area 428 58 square miles. Head-quarters at Shikarpur. Contains the following *hobls*, villages and population

Hobls	Government		Inam		Population
	Popu- lated	De-popu- lated	Popu- lated	De- popu- lated

5	Ulagani	1,110	
6	Siralkoppa	230	
7	Belanavi	1,731	

The taluk is crossed from south to north by the Choradi or Kumadivati which forms the large Misur Madak tank on the northern frontier. There are lines of low hills on all sides covered with jungle which give shelter to numerous tigers, cheetas and other wild beasts.

Being on the border where *malnad* and *maidan* meet it partakes of the characteristics of both. Except for the Jambur hills running down into the middle from the north the gentle undulating surface is unbroken and where uncultivated is covered with low scrubby jungle which in the south and west rises into forest. The soils are chiefly reddish brown and grey, very light and friable and containing much sand except in the low lying grounds where they are much darker in colour and more clayey. In the extreme north, however, and on the banks of the Choradi dark brown and black sod of a superior description is found on which wet crops are raised. In the east where dry crop cultivation is the most successful the soil is less sandy and more like loam, except in the high lying wet crop land.

The main cultivation is sugar-cane and rice especially the former, to which crop the energies of the raiyats are chiefly directed and on the successful maturing of which the prosperity of the taluk rests. Dry crops in the west are poor chiefly ragi, horse gram and castor oil. In the east the dry crops are much better, and cotton and jola grow well in some villages. The principal export of the taluk is jaggery which mostly goes to Dharwar and rice which is sent in various directions. Siralkoppa is the chief market for grain and Shikarpur for cloth.

The taluk is a perfect museum of antiquities, and no part of Mysore is richer in remains and records of the past. It is here that has been found evidence of the rule of the Sāta-vāhanas and Guptas, and the true history of the early Kadambas. Bandamke was the chief city of the Nāgarakhanda Seventy, and Belgāvi of the great Banavāse Twelve Thousand province, which was one of the chief possessions of succeeding dynasties, the Chālukyas, the Rāshtrakūtas, the Gangas, the Hoysalas, the Yādavas, and others, down to the time of Vijayanagar and the Keladi or Bednūr chiefs, overwhelmed in the conquests of Haider Ali.

The Revenue Settlement was introduced in 1783 and the Revision Settlement with effect from the year 1909-10. The lands are classified as follows:

Dry .	119,126 acres
Wet	11,957 „
Garden	778 „
Unarable land	104,000 „

From Shikarpur there are roads to Shimoga, Anantapur, Honnali and Siralkoppa. From the latter there are roads to Hire Kerur and the railway at Byadgi, to Anavatti, to Sorab and to Sagar.

Shikarpur.

Shikarpur A town near the right bank of the Choradi or Kumadvati, situated in 14° 16' N lat, 75° 25' E long, 33 miles north-west of Shimoga, with which it is connected by road. Head-quarters of the Shikarpur taluk, and a Municipality.

Population in 1921	Males	Females	Total
Hindus	1,743	1,708	3,445
Muhammadans	433	439	872
Christians	5	4	9
Jains	24	15	39
Animist	1		1
Total	2,205	2,161	4,366

The town appears to have been founded by one Mahya and after him originally called Mahyinhalli. The Keladi chiefs on gaining possession changed the name to Mabadanpur. During the time of either Haider or Tipu it received its present name of Shikarpur or Shikaripur hunting or hunter's town, from the abundance of game there met with during a royal hunt. The old fort at the western end is now in ruins.

Mr Lewin Bowring thus describes the vicinity and the Masur-Madak tank which can be reached from here as well —

'In the low jungle not far from Shikarpur tigers are common. On the frontier is a magnificent reservoir called the Masur Madak tank the embankment of which forms the boundary between Mysore and Dharwar. It was constructed by some influential chief who conceived the idea of storing up the accumulated waters of the Kuniadvati river which at this point cuts its way through a gorge in a low range of hills. An Arabic inscription records the repairs effected by the Savanur Nawab (See *Shikarpur*). The embankment is of immense height and strength (a female having it is said been immolated to ensure its stability) and the old sluice of colossal size but in course of time the river when in flood burst through the barrier and carried away a portion of it. Ten years ago the Bombay Government undertook the repair of the sluice though at a lower level than the original design and a considerable amount of irrigation is now afforded by the tank to the neighbouring villages of Dharwar. It is believed however that it would be quite feasible to restore the whole work as originally planned in which case an almost unlimited supply of water would be available the old sluice being perhaps twenty feet higher than the modern one so that the storage capacity of the tank would be vastly increased the only obstacle being the submersion of Mysore villages which would ensue on raising the level of the water spread. (See *Eastern Experiences*)

Kumsi and Haranhalli *Maganis* were added to this taluk from Honnali in 1882.

The Tunga and the Bhadra entering the taluk on the south, flow northwards and unite at Kudali 9 miles north north east of Shimoga whence the Tungabhadra continues north with a winding course.

The ancient divisions were Gajanur-pal to the west of the Tungga, Yedatore-pal between the rivers, and Benkipura east of the Bhadra.

Shimoga

Shimoga. A taluk in the south-east Area 688 41 square miles including the Kumsi sub-taluk Head-quarters at Shimoga. Contains the following *hobhs*, villages and population.

5	Bhadrāvati	3,673
6	Hole-Honnur	1,667

Physical features

Except for a few openings here and there, though the main communications with adjoining taluks are laid out, the taluk under report is surrounded on all sides by hills. These are dark in colour and for the most part devoid of anything like vigorous vegetation in the north and the east. Manganese is an important constituent of these hills. On the south-east and on the north-west, they are covered with jungle, still scrubby and uninviting; but towards the south-west and the south, they are clothed with the heavy forest of the *malnad* type; elephants, tigers and wild boar find a natural habitation here. The interior of the taluk is free from

hills. The Tuuga and the Bhadrī two streams that take their origin in the Ghats in the Kadur District collect the drainage from the hills and slopes on the east and the west of the taluk and meet at Kūdah about 8 miles north east of Shimoga. The never failing supply of water to man and beast is the chief benefit that these rivers confer. A far less important use to which the rivers are put consists in their being employed, for about 1 month in the year as a vehicle for floating down timber from the southern forests up to Harihar.

Both good and bad soils from the agricultural stand point are met with. The soil in a portion of the north and north east of the taluk occupied by the Harungatta Averi, Holalur Hole Honnur Kūdah and Chandankero māḡanis, and in a portion of the *Kasba māḡani* is rich in productive elements. The Bhadravati Hariyur and Kalagero māḡanis would come next in order and in the rest of the taluk it is a shade inferior still. Ragi is the staple crop in the red soils but black soils which are confined to the north and north east produce a variety of crops including jola cotton, and oil seeds. The rice lands are mostly of poor quality and not specially productive. A small amount of sugar cane is grown. The gardens produce a little areca nut with betel leaf and plantains.

The Revenue Settlement was introduced in 1875 and the Revision Settlement with effect from 1913-14. The lands were classified as follows —

		Total
Dry	49 270	} 75 761 acres
Wet	25 630	
Garden	861	
Unoccupied waste		20 998

The rail road from Shimoga to Birur connects the taluk by rail with the Districts of Madras on the one hand and of Bombay on the other. A light railway constructed by the Manganese Company for the transit of manganese ore

Communi
cat ons

commences from Chordi in the Kumsi sub-taluk and ends at Shimoga, but takes a wide sweep along the western skirts of the taluk

The roads in existence in the taluk are

(1) The Shimoga-Bangalore road running through Bhadrāvati, Tarikere, Birur, etc

(2) The Shimoga-Channagiri road running through Bhadrāvati

(3) The Shimoga-Harihar road running through Honnali

(4) The Shimoga-Sagar road running through Ayanur and Anantapur and leading after Sagar to Gersoppa

(5) The Shimoga-Āgumbi road going along Tirthahalli

(6) The road 14 miles long connecting Shimoga with Saulanga, establishing thereby a direct connection with Shikarpur, Siralkoppa, Sorab and Anavatti and furnishing also a second route to Honnali by way of Nyamti

(7) The Shimoga-Narasimharājpur road of which about 13 miles fall within the taluk

(8) A road 11 miles long connecting Bhadrāvati with Umblebil on the Narasimharājpur road

(9) An eight-mile road between Shimoga and Hole-Honnur

Shimoga

Shimoga. The chief town of the District, situated in 13° 55' N. lat, 75° 38' E. long, on the left bank of the Tunga, 171 miles north-west of Bangalore, on the Bangalore-Gersoppa road, and at the terminus of the railway from Birur

Shimoga derives its name either from *Shiva mukha*, the face of Shiva, or from *Shimoga*, sweet pot, an appellation

given to it by a *rishi* who here found the savoury herbs which he compounded for his daily meal. From inscriptions it appears that Mundah, a suburb of Shimoga to the south was an important place in early times under the Gangas. This part of the country was at a later period ruled by the Chelukyas and the Hoysalas, after which it was included in the dominions of Vijayanagar. Little is known of its history but that from the 16th century it was one of the possessions of the Keladi or Ikleri chiefs. The place was taken by Haidar in his invasion of Bednūr and he subsequently brought a number of carpenters here from Mangalore to make lights or barges for navigating the river. But they proved to be of no use. A battle was fought in the neighbourhood of Shimoga in 1798 between the Mahrattas under Parasu Ram Bhao and Tipu Sultan's forces under Muhammad Reza, the Benki Nawab, when the latter was forced back on Haidarnagar (Bednūr) and Shimoga was besieged. The garrison was forced to capitulate and the Mahrattas plundered and burnt the town. The scattered survivors of the population returned on the withdrawal of their army but after the fall of Srirangapatam the place was again pillaged by Dhundia Wahig, who left Shimoga and the neighbouring villages a heap of ruins. Being made the head quarters of the District and of the late Nagar Division it has gradually risen in population and wealth.

Siralkoppa —A mercantile town in the Shikarpur taluk Siralkoppa 11 miles north west of the *Kasba* and a Municipality

Population in 1921	Males	Females	Total
Hindus	769	717	1 486
Muhammadians	383	312	73
Christians	3	3	6
Jains	7		7
Animists	3	3	6
Total	1 165	1 075	36

It is of importance as forming a point of communication between Sagar, Sorab, and other parts of Mysore, and the Dharwar, Kanara and Bellary Districts. It is the principal depôt for jaggory, which is largely prepared in this taluk and exported by the merchants of Siralkoppa in exchange for piece goods, *kambles*, etc. A large fair is held on Sunday.

Sorab

Sorab A taluk in the north-west. Area 444 29 square miles. Contains the following hoblis, villages and population.

Hoblis	Villages			Villages classified			Population
	Populated	De-populated	Hamlets	Government	Sarvamanya	Jodi	
Sorab	51	4	18	55		1	12,116
Chandragutta	37	4	29	41	1		7,635
Ulv	68	16		84			8,579
Kuppagadde	36	8	9	44			7,520
Jade	27	10	4	37			6,326
Anavatti	40	6	12	46		2	16,725
Total	279	48	72	307	1	3	58,901

Principal places with population

No	Place	Population
1	Uddari	1,557
2	Sorab (town)	1,482
3	Kuppagadde	1,197
4	Jade	912
5	Anavatti	1,057
6	Tuttur	1,067
7	Mudi	1,691

The Varada runs along the western side, forming in some places the boundary, and at one point, near Banavāsi, leaving and re-entering the taluk. The minor streams unite in the Dandāvati, which, rising near Sorab, flows north and west

into the Varada near Jade. The principal hill is Chandragutti in the west rising to 2 794 feet above the level of the sea.

Except Chandragutti *magani*, the taluk is gently undulating the bottoms of the valleys being occupied by rice fields and gardens. Above the wet lands are stretches of open dry crop fields called *hakkal* and on the highest ground are the *lans*. The woodland scenery of the taluk is unique, on account of these patches of forest. These are composed of some of the finest forest to be found in the south of India, detached in small portions with clearly demarcated lines. This arrangement is due to the position of the laterite which forms the substratum of the whole taluk. Outside the forest on the higher ground the soil is only about 1 inches in depth while within 15 feet from the edge it is deep and rich enough to support the largest forest trees. These *lans* are full of the wild pepper vine the produce of which used to be largely gathered, but the most valuable product now is the juice of the *bagani* palm which is extracted for toddy by the *Hālī* *paikas*.

Rice, jaggory and areca nut are the chief products of the taluk. The areca palm gardens are larger and more numerous in the south and west than in the other parts and often contain cardamoms. On the areca trees obtaining a certain size betel and pepper vines are trained up the stem. Rice and sugar cane cultivation are universal and the crops good and certain. When the rice has been cut and stacked the ground while still damp is ploughed up and left fallow till the early rain in May no Vaisakh crop being raised.

The Revenue Settlement was introduced into 19 northern villages in 1868 and into the remainder of the taluk in 1871. The Revision Settlement was introduced with effect from 1908-09.

The land was classified as follows —

Dry	51 453	}	Total
Wet	51 072		104 072 acres
Garden	1 547		
Unoccupied waste			18 123

Communi-
cations

There is a road through Sorab from Siralkoppa to Siddapur, one south from Sorab to Sagar, with a branch from Ulavi to Siralkoppa, and one north to Banavāsī. A road from Siralkoppa runs through Anavatti towards Hanagal.

Sorab

Sorab—A town situated on the right bank of the Dandāvati, in $14^{\circ} 23' N$ lat, $75^{\circ} 10' E$ long, at the junction of roads from Sagar and Siralkoppa, 54 miles north-west of Shimoga by road. Head-quarters of the Sorab taluk, and a Municipality.

Population in 1921	Males	Females	Total
Hindus	598	603	1,201
Muhammadans	139	119	258
Christians	11	2	13
Jains	7	3	10
Total	755	727	1,482

Sorab derives its name from Surabhi, the cow of plenty, which together with Nanda, Bhadra, Susilya and Sumana, four other celestial cows—used daily to shed milk over the image of Ranganātha on the bank of the Dandāvati. It is the principal residence of the *gudrigārs* or sandalwood carvers, whose delicate and elaborate workmanship is generally well known. The articles of their manufacture chiefly in demand are boxes, caskets, and cabinets. These are completely covered with minute and complicated designs of vegetation and scroll work, interspersed with figures from the Hindu pantheon, the general effect of the profuse detail being extremely rich. The carving of Sorab is considered superior to that of Bombay or Canton, and being a very tedious process, requiring great care, is expensive. The *gudrigārs* will imitate admirably any designs that may be furnished them. Boards for album-covers, the plates from Jorrock's Hong, and cabinets surrounded with figures in high relief of knights in mediæval armour, have thus been produced for European gentlemen with great success.

The temple of Ranganatha and Puranamatha contain inscriptions. The *urogols* at the Kallavaras temple in the Mavalh village are very fine specimens of the kind. The Siddhesvara temple at Kodakam is a fine building with one cell. The pillars in the *notoranga* which are of a reddish colour are well executed. There are two niches at the sides of the *sulhonor* doorway containing figures of Mahishasuramardini and Ganesha. There are also *Septomatrika* figures in the *notoranga*. It is worthy of note that the stone near the ruined Narayana temple, which contains an inscription (*Sorab 15*) of the time of the Chikukya king Vinayaditya has at the top a bear with two fishes placed one over the other in front its snout touching the upper fish. This is perhaps to be taken as symbolizing the overthrow of the Pandyas whose ensign was the fish by the Chalukyas.

Sulekere—Sulekere the largest tank or artificial reservoir in Mysore is situated in the middle of the Channagiri taluk. Its margin is said to be 10 miles round and next to the Kambham tank in Cuddapah is probably the finest reservoir in Southern India. Sulekere.

Its name is derived from *sule* courtesan and *kere* tank.

The local legend asserts that this woman was a king's daughter who having formed a connection with some divinity built as an expiatory act the tank which submerged the town of her father who cursed her as a prostitute. The work is a very fine one and the reservoir receives the drainage of twenty square miles all of which pours into the gorge where it is built (the main stream bearing the name of *Haridra* or *Haridravati*). The embankment is of no great length the defile between the adjacent hills being narrow but it is of stupendous width height and strength though not quite straight. It has resisted successfully the floods of centuries but owing to the great pressure of the volume of the water in the tank the difficulty of properly working with rude plugs the enormous sluices was immense and the latter in course of time became much injured and could not be utilized. (The old wooden plugs have now been replaced by iron ones). Of the two sluices that to the north was called the *Sidda* and that to the south the *Basava* and both were in bad order. During the drought which prevailed some years ago advantage was taken of the circumstance to

repair the sluices, which a man could pass through with ease, although the first adventurer was encountered by a cobra on entering the northern one. The channels had also fallen into disrepair, and the great extent of land immediately below the tank (reputed to be more than 20,000 acres) was covered by a dense date jungle, so that the vast supply of water afforded by this magnificent reservoir flowed uselessly away to the river Tungabhadra, near Harihar. (The channels have now been fully repaired, and hundreds of acres of sugar-cane are grown under them. The feverish jungle, formerly so dreaded by cultivators, has given place to smiling gardens.) It is a remarkable fact that notwithstanding the damaged state of the sluices and the great force of the water when escaping through them, the embankment has always remained firm and uninjured, a satisfactory proof of the solidity of the structure."

The construction of the tank is assigned to the 11th or 12th century, and remains are pointed out, said to have belonged to Svargavati, the city which was submerged. Its king was Vikrama Rāya, who, having no children, adopted the son of the Gauda of Billahalli. This youth received the name of Rāgi Rāya. But a daughter was subsequently born to the king in reward for his devotion to Siva. She was called Sāntava, and was the heroine of the story. At the east end of the embankment is a temple of Siddēsvara in front of which are some defaced inscriptions. One appears to be a Vijayanagar grant of the 16th century. There is said to be a stone, dated Saka 1311, in the tank. A large festival is held at the temple at the time of Sivarātri.

Tālgunda

Talgunda. A village in Shikarpur taluk, about 2 miles north-east of Belgāmi. Population, 724.

The original village was an *agrahāra* called Sthānagundur, and was the place in which the Kadamba king Mukanna or Trinētra established the Brāhmans he had brought from Ahichchatra. According to some accounts, there were 12,000 Brāhmans of thirty-two families, and according to other accounts, 32,000. The place is rich in ancient inscriptions, the most important of which is on a pillar discovered by Mr. Rice in front of a ruined temple. It is of about the 5th

century, beautifully engraved in what are called box headed characters and contains in high flown Sanskrit verses the only apparently authentic account that has been found of the origin and rise of the Kadamba dynasty

The Pranavësvara temple in this village is a small plain building now in ruins consisting of a *garbhagriha* and a *sukhanas*. The *linga* is about 6 feet high with the pedestal and about 5 feet in circumference at the bottom. Two important records of the Kadamba period were discovered on the jambæ of the doorway of the *garbhagriha*. They are engraved in the same box headed characters as the pillar inscription (*Shilarpur* 176) in front of the temple and belong to the same period. The tank whose construction by *Kakusthavarman* is recorded in the pillar inscription is even now known as *Pranamauahero* after the name of the god of the temple. And as we learn from the same inscription that *Satakarni* and other kings worshipped the god the period of the temple is carried back to about the 2nd century A.D. It is thus one of the oldest temples if not the oldest in the State. The inscribed pillar stands in front of the temple at a distance of about 20 yards. The *Gangadharesvara* and *Virabhadra* temples have lithic records which have been copied by the Archaeological Department. To the east of the village is the *Virnkta matha* with the *gaddige* or tomb of *Prabhudëva*. It is said that it was here that *Prabhudëva* died and not at *Belgum*. There is a hill to the east called *Donanagudda* where according to tradition *Bhima* killed *Dona* (*Bakasura*). The hill is said to represent the *Ekachakra nagara* of the *Mahabharata*. At *Mnlnvnlh* is the pillar containing the *Satakarni* and *Kadamba Prakrit* inscriptions (*Shilarpur* 263 64). These have been copied (See *Malavalli*). It is octagonal like the *Talgunda* pillar but has only six of its faces inscribed. It stands at a distance of about 6 yards in front of the *Kallesvara* temple a mud structure with a tile roof facing south. The lines read from the top downwards unlike those of the *Talgunda* pillar which read from the bottom upwards. As the bottom of the pillar was broken off the masonry newly built around it unfortunately conceals about 6 inches of the inscribed portion so that 7 or 8 letters at the end of the lines cannot now be read. In the *Mastigudi* of the village the *mastikal* that is worshipped has sculptures similar to those on the stone

at Belgāmi, but the male figure is armed with bow and arrow. Another *māstikal* in one Kariyappa Basappa's backyard, which is neatly executed, represents the male as a drummer with a number of necklaces and a turban resembling in some respects that of a Madras police constable. A third stone to the left of the Kallēsvara temple has only a female figure seated above the projecting arm instead of, as in others of the kind, a male and a female figure, husband and wife. To the west of the village is a fine mud buttress, a relic of a former fort, about 30 feet high and 20 feet in diameter, with rectangular holes in rows all round.

Talaguppe

Talaguppe A village in the Talaguppe *hobli*, Sagar taluk. Population, 904.

A description of the view from this place has been given by Mrs Bowring. Writing under date, "Talguppa, December 31, 1868," she says.

The view from the new bungalow at Talguppa is very picturesque. It stands on the top of a rocky hill, looking over a large sheet of water, a deep blue lake in the morning light, on which floated quantities of large white and scarlet water-lilies, with their large green leaves, the red earth of the road, the grey rocks, and the varied shades of green in the dense woods beyond forming an effective contrast, while, in the far distance, the hill ranges near the Gairsoppa Falls peeped out in hazy indistinctness.

Tirthahalli

Tirthahalli A taluk in the south-west, till 1882 called Kavaledurga. Area, 476.02 square miles. Head-quarters at Tirthahalli. Contains the following *hoblis*, villages and population.

	Hoblis	Villages	Population
1	Tirthahalli	56	10,654
2	Agrahāra	56	9,401
3	Agumbi	29	12,679
4	Muttur	12	9,304
5	Mandagaddo	64	8,536
	Total	217	50,574

No.	Place	Population	Principal places with population
1	Tirthahalli (town)	3 336	
2	Mulabailu	1 062	
3	Konanur	1 131	
4	Thallur	1 123	
5	Meeravalli	1 222	

The Tunga enters the taluk in the south and takes a northerly course to a point west of Tirthahalli where it is joined by the Begurhalla from Sringeri. It then runs east forming for some distance the boundary between the Shimoga and Kaidur Districts. All the minor streams said to number seventy five run into the Tunga except a few in the north west which flow into the Sbaravati. The taluk is essentially *malnad* in its nature hills forests areca nut gardens and running streams being the prevailing characteristics. The whole taluk is hilly especially the west which touches the Ghats and is covered with splendid forest. The chief heights are Kavaledurga Kabbimadagudda and Kundadagudda the latter which is near Igumbi being a very conspicuous point. Iron stone of a superior quality is obtained at Kabbimadagudda (iron hill) the iron made from which the Indians hold to be as good as steel.

The east and south of the taluk is heavily wooded. The undulating country in the centre and north is more open the unculturable portions being usually covered with grass and bushes. Heavy forest prevails in the west the tops of the hills only being bare. Open patches often occur in the forest owing to laterite cropping up near the surface allowing only of the growth of a little poor white grass. In the vicinity of large stretches of garden the forest has often almost disappeared owing to reckless cutting of trees to provide leaf manure for the areca gardens.

The principal productions are areca nut pepper cardamoms and rice with a little coffee. Sugar cane is grown for local consumption only. The areca nut is considered as of better quality than that of Nagar, and only a little inferior to that

of Kalasa and Sagar The whole of it is exported to Wallaja by way of Birur, and to Bellary and Channagiri taluks. The pepper is exported to Kanara, and cardamoms to Haveri in Dharwar A small quantity of cardamoms is produced spontaneously in the jungles about Āgumbi, but this is not so good as what is produced under the shade of areca gardens. The rice grown is mostly of the coarser varieties. In the high-lying rice lands, called Makki, a little ragi or other dry crop is raised Coffee cultivation was introduced in 1897, but there are no European coffee gardens, and the native gardens are few and carelessly tended The *kans* contain less pepper than those of Sorab and Sagar, but they are valued for the toddy extracted from the *bagani* palms. Much of the cultivation of the taluk is in the holding of Brāhmanas and Namdāri Gaudas, who, in addition to their own field hands, formerly slaves, and even now in the wilder parts fed, clothed, housed, and married by their masters, are dependent on labour from below the Ghats These below-ghat coolies can always be recognized by the peculiar cap, made out of the spathe of the areca palm, which both men and women are accustomed to wear

Large vessels of *balapam* or potstone are made at Kavale-durga, and silver cups at Tirthahalli

This part of the country formed the Sāntalige Thousand which is mentioned in many old inscriptions Under the Chālukyas the Sāntara kings of Hombucha held possession At a later period, and during the time of the Vijayanagar sovereignty, it was called the Aragada-rājya or Āraga kingdom Eventually the Keladi chiefs acquired it, and Kavale-durga was their principal stronghold This was captured by Haidar Ali, and the country annexed to Mysore

The Revenue Settlement was introduced in 1878 and the Revision Settlement with effect from 1915-16.

The land was classified as follows

Dry	}	Total
Wet		41,735 acres
Garden		
Unoccupied waste		7,643 „

The main road from Shimoga to the Āgumbi Ghat passes through Tirthahalli, and is met at Āgumbi by the Trikere and Koppa road. From Tirthahalli there is a road north to Anantapur and roads are proposed south to Koppa and west to Hulikal on the Hosangadi Ghat. From Mandagadde with the river between there is a road to Narasimharajpur.

Tirthahalli—A town situated in $13^{\circ} 11' N$ lat, 75° Tirthahalli
 $17' E$ long on the left bank of the Tunga 35 miles south west of Shimoga on the Shimoga Āgumbi road. Head quarters of the Tirthahalli taluk and a Municipality.

Population in 19-1	Males	Females	Total
Hindus	141	110	250
Mulammadans	94	148	242
Christians	118	106	224
Jains	17	11	28
Total	370	375	745

The town derives its name from the number of *tirthas* or sacred bathing places in the Tunga at or near this spot. A pool at one of the cylindrical hollows scooped out by the water in the rocky bed is a favourite spot for cleansing away sin by ablution. The formation of the hole is ascribed to Parasu Rama who made it with his axe. At the Ramēsvara festival held for three days in Margasira thousands of people pass through the hole. At that season the river can be crossed by stepping over the great boulders in the bed the difficult places where there is a rush of water being temporarily bridged over by the Brahmans.

It is the principal centre of trade for the Nagar and Koppa taluks valued at five to six lakhs a year one half of which results from transactions at the Ramēsvara festival. Coconuts and cocoa nut oil are imported from Kanara by the Āgumbi and Hulikal ghats and various kinds of pulse piece goods cattle etc from the *maidan* taluks.

There are two *maths* the Havika math on the town side and the Putiki (or Puttige) math on the opposite side. To this

place all the people of the Mālava caste resort from Kanara and Nagar to be branded with a religious stamp, *mudrā-dhārana*, by their priest the Koppada Dasaiya, who comes here from Koppa Three miles up the river is the Mulbāgal matha and a mile higher, the Bhīmankatte matha, which claims a fabulous antiquity

Tunga

Tunga This river rises in the Western Ghats, at Gangamūla in the Varāha *parvata* (Kadur District), close to the twin stream of the Bhadra Its course is at first north-east past Srīngēri to Baggunji, where it turns north-west and continues in that direction to near Tirthahalli Thence, bending round for some distance to the east, it eventually flows north-east past Shimoga to Kūdali where it unites with the Bhadra Near Mandagadde it branches for a short distance into seven streams, hence called Yelukalu shilu, which prevent the passage of rafts of bamboos and timber during the dry season when the water is low Its banks are not so steep as those of the Bhadra, and it is generally esteemed a more healthy stream, its current being more rapid and the banks less shut in by dense forest A project was formed some years ago by the Madras Irrigation Company for damming the river either at Tirthahalli or at Mallur, and constructing an immense reservoir, all the requisite surveys for which were made

Tunga-
bhadra

Tungabhadra. This famous river, the chief tributary of the Krishna, is formed at Kūdali, 9 miles north-north-east of Shimoga, by the confluence of the twin streams, the Tunga and Bhadra

From this point its general direction is north, but it winds so as to form three loops before reaching Honnali Thence with a more direct course it runs north, and receiving the Choradi or Kumadvati on the left, bends to the north-east, following the Mysore frontier to Harihara, where it is joined by the Haridra from the Sūlekere on the right Running again north along the boundary, it quits this State and, continuing north-west and north, separates the Madras and Bombay Presidencies From the point where the Varada

enters it on the left the river turns north east and flowing past the village of Hampi between the sites of the celebrated cities of Kishkindha Angundi or Hastinavati and Vidyanagara or Vijayanagara forms the common boundary of Bellary and the Nizam's Dominions receiving on the right the Hagari or Vedavati Soon after this its course is directly east, along much of the Karaul and Haidarabad frontier Passing Karaul it enters the Krishna a few miles beyond at Kuddali Sangam or Srisaila

The river is never dry but the channel being full of rocks will not admit of floats in the hot season when the water is low In the rainy season it swells prodigiously and forms an extremely rapid and muddy stream ten or more feet higher than the rocks It is easily fordable in the dry season at other times ferry boats are used for crossing at favourable spots where the banks approach one another and the water is deep Alligators abound in it The maximum flood discharge determined for the Haribara bridge was 207 813 cubic feet per second the ordinary monsoon discharge being roughly calculated at 30 000

The river is crossed at Haribara by a fine bridge of stone and brick consisting of 14 elliptical arches of 60 feet span each It was completed in 1868 at a cost of 3½ lakhs of rupees There is another magnificent bridge of 52 piers at Rampur in Bellary where the north west line of the Madras Railway crosses the river

The ancient and puranic name of the river is the Pampa by which it is mentioned in the *Ramayana* and which still survives in the name of the village Hampi at the Pampa Ksetra the site of the celebrated ancient and modern capital cities previously mentioned The name Tungabhadra occurs in the *Bhagavata Purana* The mythological origin of the river as given in the *Tungabhadra Mahatmya* of the *Brahmanda Purana* is to the following effect — Hiranyaksha son of Kasyapa Rishi by Diti Devi seized the earth and bore it down to the lower world The Brahmans having no ground to stand upon discontinued their usual rites and sacrifices The demi gods being thus deprived of their usual offerings complained to Vishnu, who

assuming the form of a *varāha* or boar, plunged into the ocean, entered the lower world, destroyed the demon, and brought up the earth again. The perspiration arising from this exertion of the boar trickled down its tusks as it rested on the *Varīha parvata* and formed two streams, that from the left tusk being the Tunga and that from the right tusk, the Bhadra. A third stream the *Nētrāvati*, is supposed to have its origin in the same place from the *nētra*, or eyes of the boar.

Varada.

Varada. A tributary of the Tungabhadra. It rises at Varadamūla, near Ikkēri, and running north past Chandragutti and Banavāsi, turns to the north-east, which direction it keeps till it leaves the Mysore territory. Entering Dharwar, it flows north, and bending round gradually to the north-east some distance south of Bankapur and Sāvanur, runs with an easterly course into the Tungabhadra at Gulnātha, below Havanur.

It is stemmed by 51 small anicuts in Sagar and Sorab, giving rise to channels having a total length of 36 miles.

The *Varada* (boon giving) river originated, according to legend, in the Bhagīrathi water poured from his conch by Nārāyana (Vishnu) on the head of Siva at Varada mūla, the hermitage of Sringa muni in order to subdue the flame of austerities which threatened to consume the gods, performed by Siva to atone for his sin in pulling off one of Brahma's five heads.

CHITALDRUG DISTRICT

SECTION I—DESCRIPTIVE

SITUATION AREA AND BOUNDARIES

A district in the north Its situation taking the extreme Situation limits is between $13^{\circ}35'$ and $15^{\circ}2'$ north latitude $75^{\circ}38'$ and $77^{\circ}2'$ east longitude but owing to a long and narrow projection into Bellary northwards the main part of the District does not extend beyond $14^{\circ}10'$ north latitude Its greatest length from north to south is about 88 miles the greatest breadth from east to west about 100 miles The arm jutting north into Bellary is 32 miles long by from 5 to 12 miles wide

The area is 1 160 square miles of which 1 700 square miles Area, are cultivated and 1 510 square miles are unculturable

It is bounded on the north by the Bellary District and Boundaries, on the east by the Anantapur District both of Madras on the south east by Tumkur District south west by Kadur District and west by the Shimoga District all of Mysore while on the north west it is bounded by the Dharwar District of Bombay

PHYSICAL ASPECTS

The whole of this comparatively arid District is included in the valley of the Vedavati or Haggari with the Tunga bhadra running for a few miles along the north western boundary The Vedavati enters the District in the south west and flows in a north east direction to a few miles beyond Hiriyur From this point where the stream begins to take

the name of Haggari, it runs north, within a few miles of the main eastern boundary, and leaves the District near the eastern base of the Molakalmuru projection. During the hot months it is for the most part dry, but supplies a number of wells sunk in the sandy bed.

The District is crossed from south-south-east to north-north-west by a belt, about 20 miles broad, of intermittent parallel chains of low hills, mostly bare and stony, through which are several *kanwes*, or passes. The eastern line runs from the west of Hiriyur up to Chitaldrug (3,229 feet), and thence, with a break for some distance, continues from Kankuppa hill (2,721 feet) to the frontier. The summit of Jogi Maradi to the south of Chitaldrug, one of the highest points in this range, is 3,803 feet above sea level. The western parallel commences at Hosdurga (3,226 feet), and passes by Mayakonda to Anaji. Around Molakalmuru in the north are some detached clusters of rocky hills. Of these, Nunke Bhairava hill is 3,022 feet, Jatinga Rāmēsvara hill 3,469, and Santigudda 2,595. This part of Mysore, says Mr Bruce Foote, is "occupied by a tract of country of singular beauty. The bold, rocky hills which rise out of it in every direction are divided from each other by equally picturesque valleys full of fine trees, amongst which tamarind trees, pre-eminent for their love of granitic soil, abound. The road from the travellers' bungalow at Hangal (on the Bangalore-Bellary high road), which skirts the south side of the line of hills for the first five miles, and for the next four passes right through them, takes one through scenery not easily forgotten for its striking beauty in grand rocks and rich vegetation."

Except in the region of the hilly belt, the whole extent of the District north and east is an open and level plain, entirely destitute of picturesque features, but presenting at certain seasons in favourable spots a vast expanse of verdant cultivation. Though there are no trees, there is abundance of excellent pasture, while the black and dreary-looking soil seems only to require the contact of water to

develop its productiveness To the north and west of Chitaldrug the surface of the country is undulating and covered with thick and rich grass Trees are few in number

The general level of the District is about 2 000 feet above the sea At Chitaldrug it is 2 383 but at Hiriyur it is 1 965 while at Harihar probably the lowest point in Mysore it is only 1 830

GEOLOGY

The Chiknayakanhalli band of schists of the Tumkur Rocks. District continuing in a N N Westerly direction constitutes the chief belt of schists in this District where it has been split up into two divisions viz. the lower or the Javanhalli belt consisting of the dark hornblendic schists with some bands of quartzites and ferruginous quartzites and the upper or the Chitaldrug belt consisting mostly of chloritic schists and green stones with also a few bands of ferruginous quartzite These chloritic schists are overlaid by a series of grits clays and ochreous schists which have of late been shown to be the altered phases of the fine grained acidic members of the Champion gneiss series Intrusive into these chloritic schists are a class of greyish green hornblendic traps typically developed near Jogimaradi These differ from the dark hornblendic schists in their paler colour and also in containing the remnant crystals of pyroxene

Intrusive into these schists and being subsequent in age are a number of exposures of granitic gneisses and granites This complex granitic gneissic region is found to consist of the earlier Champion gneisses (Pitlake granite) and also the subsequent Peninsular gneiss series

Bordering the western side of the Chitaldrug schist belt and intrusive into it is an exposure of coarse grey and pink porphyritic granite This as also the band extending from Holalkere through Hosdurga to near Hardankere were regarded as of Closepet series but these masses are now thought to be the older Champion gneissic granites

Of the dyke rocks, dolerites make a conspicuous feature and they cut across all the rocks previously mentioned

Mines and
Minerals

Indications of asbestos have been found near Budihal (Hosdurga Taluk) and Mayakonda (Davangere Taluk). These are not in large quantities and the deposits have not been worked.

Copper

Blue sulphate of copper and the carbonate-malachite are found as encrustations near Ingladhali in reefs in the altered traps. Malachite has been found in tufts of slender acicular prisms in a thin vein in quartzite near Kaidal (Davangere Taluk). At both these places, the ore appears to be of very limited extent.

Cervantite
and Stibnite

These ores of antimony are found near Chikkannanahalli, Chitaldrug Taluk, distributed to the extent of one to two per cent in the rock. The ores obtained have been smelted locally, the resultant product being sold as antimony regulus and star antimony.

Galena

The sulphide of lead containing silver to the extent of 130 ozs. to the ton is found near Kurubarmardikere. The clean ore assays 70 to 72 per cent lead. The area has been worked to a small extent, but good payable lodes have not been located in larger quantities.

Gold

Old workings exist near Honnemardi, Kote-mardi, Gonur, Bodimardi, Anesidri and other places.

Iron

Iron ores are found in the form of haematite quartzites running as bands in the schists. Formerly, the ores used to be smelted near Dodkittadhalli and were also being converted into steel at Gattihoshalli. A brief account of this industry will be found in the *Records of the Mysore Geological Department, Vol. III*.

Limestone

Bands of limestone exist at various points in the schist belt, the chief of which being the Javagondanahalli band. In the vicinity of Marikanve also are found a number of such bands.

Pyrolusite and psilomelane exist as pockets in the acidie Manganese
gritty schists of the Champion gneiss series Manganese
ores have been worked near the following areas —

Hulikatto in the Davangere Taluk Kandavadi Chik
Kandavadi Sadarhalli Mahadevapur Shivginge Kare
kalgudda Kenkere and Madadkere

The total quantity of ores extracted in this District from
1905 to 1921 is 29 681 tons of which 17 228 tons have been
exported

Red and yellow ochres are found to some extent in the Ochre
clayey and argillitic schists near Guddad Rangavanahalli
and also near Lakkihalli (Marikanve area)

Bauxite is found in patches in lateritic region near Shiv Bauxite
ganga and Bhimasandra (Holalkere Taluk)

Earth Soda has been noticed to occur in the Hiriyur Chal Earth Soda
lakere and Jagalur Taluks

The black cotton soil prevails throughout the taluks north Soils
and west of Chitaldrug interspersed with sandy and gravelly
tracts In the west a red and loamy soil occupies the valleys
In the south the soil contains much common salt and on
that account is favourable to the growth of cocoanut trees
of which there are large plantations The eastern taluks
have a light sandy soil abounding in springs These *tal*
parges or spring heads may be tapped at short distances
from each other

BOTANY

The District is almost throughout a dry and thirsty land Vegetation
having no forest Great undulating plains covered fre
quently with nothing but stones and the dwarf species
of mimosa (*Hotto Jah*) are dotted at wide intervals with
villages lying in the hollows having sometimes a few trees
round them These are the characteristics of fully one third

of the district The whole taluk of Challakere answers generally to this description, but where there is any water in the soil there are some fine cocoanut gardens The pastures, too, during the cooler months of the year, are good and the Amrut Mahal has extensive grazing grounds in the Challakere, Holalkere, Hosdurga, and other parts of the district

To the south and south-east, along the Hiriyur Hills, there are jungles of karachi (*hardwickia binata*) Again between Bommagondankere and Hangal and in the extreme north-west of the Molakalmuru taluk, there are tracts of country, covered with the karachi In the same taluk, to the east of the *kasba* town, and on the borders of the Bellary District, is a small fuel jungle among the hills

The quantity of timber for building purposes is, as may be supposed, very limited, and the large towns draw their supplies chiefly from more favoured districts Mr Bowling remarks

“ It is not improbable that this portion of Mysore may have been less sterile formerly as on many of the hills traces are to be seen of forests cut down long ago In fact, old records mention the existence of fine timber where such has wholly disappeared, owing, no doubt, to the reckless way in which the cultivators have cut down whatever they required for agricultural implements, regardless of the destruction caused to young trees and saplings No one ever thought of planting new trees to replace those that had been felled, and so, as population increased and agriculture spread, the few remaining forests rapidly disappeared The denudation of trees under which the district suffers has probably had much to do with the prevailing drought, there being scarcely any vegetation to arrest the passage of the monsoon clouds, which float onwards without depositing their valuable contents ”

The State Forest covers an area of about 358 square miles and plantations, 1 square mile

Kaghi, Udi, Dindiga and Karachi are some of the species met with in the forests Some bamboos and small teak grow on the Jogimatti hills There are extensive grazing

grounds in Chalkere Holalkere Hosdurga and other parts of the district Tinkadi bark is produced in large quantities

Avenue trees have been planted along the public roads as in the other districts But owing to the scanty rainfall the trees are kept alive with much difficulty The most popular trees appear to be Margosa and Tamarind According to the latest returns there were about 12500 trees

Arboriculture

There are about 2393 *vanams* or Survey numbers in the district with a total area of 108321 acres

Chitaldrug Hiriyur Mayakonda Davangere and Bilchod produce cotton which is also grown though in smaller quantities in Anaji Kankuppa Molakalmuru and Chalkere Flax for the manufacture of linseed oil is raised in Davangere Kankuppa and Bilchod All the northern taluks produce wheat jola navane sugarcane and chenna Rice is less abundant Cummin seed is grown in the north east In the south about Mattod are extensive groves of coconut trees growing as in the neighbouring parts of Tumkur in the dry lands without irrigation The cultivation in the south west consists of the ordinary dry crops raised on red soil All along the east the *kapile* wells are largely used in raising crops by irrigation including ragi which on the Bellary border is cultivated in no other way

The following are the principal crops cultivated in the District —

Kannada name	Botanical name	English name
<i>Cereals</i>		
Baragu	<i>Lanicum milacum</i>	
Bhatta	<i>Oryza sativa</i>	Rice
Godhi	<i>Triticum aristatum</i>	Wheat
Haraka	<i>Lanicum semiverticillatum</i>	
Jola	<i>Holcus sorghum</i>	Great millet

The following are the principal crops cultivated, etc

Kannada name	Botanical name	English name
<i>Cereals</i>		
Navane	<i>Panicum italicum</i>	Italian millet
Ragi	<i>Eleusine corocana</i>	Ragi
Sajje	<i>Holcus spicatus</i>	Spiked millet
Same	<i>Panicum fremuntaceum</i>	Little millet
<i>Pulses</i>		
Avare	<i>Dolichos lablab</i>	Cow gram
Hesaru	<i>Phaseolus mungo</i>	Green gram
Hurali	<i>Dolichos uniflorus</i>	Horse gram
Kadale	<i>Cicer arietinum</i>	Bengal gram
Korasani		Panic seed
Tadagani	<i>Dolichos catiag</i>	
Togari	<i>Cajanus indicus</i>	Pigeon pea, doll
Uddu	<i>Phaseolus minimus</i>	Black gram
<i>Oil Seeds</i>		
Haralu	<i>Ricinus communis</i>	Castor oil
Huchchellu	<i>Guizotea oleifera</i>	Wild gingelli
Wollellu	<i>Sesamum orientale</i>	Gingelli
<i>Vegetables (Native)</i>		
Bellulli	<i>Allium sativum</i>	Garlic
Jirigē	<i>Cuminum cyminum</i>	Cumin seed
Kottambari		Coriander
Mensina kāyi	<i>Capsicum annuum</i>	Chilly
Mentya	<i>Trigonella foenum groecum</i>	Fenugreek
Nirulli	<i>Allium cepa</i>	Onion
Saute kāyi	<i>Cucumis sativus</i>	Cucumber
<i>Miscellaneous</i>		
Adike	<i>Areca catechu</i>	Areca nut
Arale	<i>Gossypium indicum</i>	Cotton
Bālē	<i>Musa sapientum</i>	Plantain
Hoge-soppu	<i>Nicotiana tabacum</i>	Tobacco
Hunse	<i>Tamarindus indica</i>	Tamarind
Kabbu	<i>Saccharum officinale</i>	Sugar cane
Sanabu	<i>Crotalaria juncea</i>	Country-hemp
Tengina kāyi	<i>Cocos nucifera</i>	Cocoa nut
Viledele	<i>Piper betle</i>	Betel vine

After the construction of Vāni Vilāsa Sāgara in the Hiriyur taluk, Ranikere, Chikkamaddure, Thippaiyanakote and Rāmasāgara tanks in the Challakere and the opening of a large channel from the Janūghalla, called the Rakalgere project, paddy is grown to a large extent in the Hiriyur and Challakere taluks

The following table shows the principal crops in the district their distribution according to taluks and crops peculiar to each taluk —

Taluk	Name and area of crop cropped during the year 1942-5			
	Paddy	Ragi	Horse gram	Cholum
	2	3	4	5
	Acres	Acres	Acres	Acres
Chitaldrug	2307	1500	1097	3139
Challakere	6016	1068	16000	8600
Hiriyur	6636	6643	6146	2316
Holalkere	26	3616	6730	466
Davangere including Harihar	7160	990	1568	670
Molakalmuru	3137	5130	5560	1156
Jagalur	1180	660	5346	3166
Hosdurga	460	2360	946	1646
Total	6408	144713	608	640160

Taluk	Sugar cane	Cotton	Names of the crops which are peculiar to the Taluk
	6	7	
	Acres	Acres	
Chitaldrug	406	11600	Cholum sugar cane and cotton
Challakere		1488	Paddy ragi and horse gram
Hiriyur	106	18372	Sugar cane cotton and paddy
Holalkere	3	4467	Ragi horse gram and cholum
Davangere including Harihar	168	5436	Ragi cholum and cotton
Molakalmuru	107	6860	Paddy ragi and horse gram
Jagalur	6	9547	Cholum cotton and ragi
Hosdurga	8	300	Ragi and horse gram
Total	869	91660	

Garden pro-
duce

The particulars of the approximate area under fruits and vegetables grown in the district during the year 1922-23 are given in the statement appended below

Taluk	Mangoes	Arcca-nut	Cocoa nut	Others
	Acres	Acres	Acres	Acres
Chitaldrug	196	1,430	956	1,020
Challakero	28	430	76	61
Hiriyur	32	242	607	468
Holalkere	320	750	460	50
Davangero	122	28	212	
Molakalmuru	9		23	128
Jagalur	20	120	190	35
Hosdurga		226	7,936	34
Total	727	3,226	10,460	1,796

FAUNA

Wild ani-
mals

The panther, bear, hyæna and wild hog infest the hilly and wooded tracts Deer are found in the Hiriyur, Challakere, Holalkere and Hosdurga taluks and pea fowls in the jungles of Molakalmuru

Birds

All kinds of wild fowl are very numerous in the secluded tanks in the south of the district Pelicans may be seen about Mattod

Domestic
animals

The breed of cattle in this district has acquired a distinctive name and is known as the Chitaldrug breed This breed belongs to the class of "Doddadana," the latter term embracing cattle of Amrut Mahal, Hallikar, Chitaldrug, Mahadesvar Betta and other kindred breeds Cattle of the Chitaldrug breed are found all over the district and those parts of the neighbouring districts which adjoin it The chief breeding centres in the district are the taluks of Challakere, Hiriyur, Chitaldrug and Holalkere.

The ordinary run of the cattle employed by the rayats, both for domestic and agricultural purposes, is of small

size and stature Buffaloes are finest in the neighbourhood of Chitaldrug

The best sheep and those which yield the finest wool are bred in the north western parts of the district In the south and west they are slightly inferior while those of Hanyur are considered still less valuable

CLIMATE AND RAINFALL

This is the hottest and driest district in the State the mean annual rainfall is about 23 inches while the mean annual temperature is 77° 3 The relative humidity ranges from 50 per cent in March to 83 per cent in July and August

The following tables give the mean and extreme values of the various weather elements obtained at the Chitaldrug Observatory since 1893

Months	Pressure in inches at 3 A.M. to 3 P.M.	Temperature in degrees Fahrenheit				Humidity at 5 A.M.

The mean maximum temperature for the warmest month viz. April is 97° 0 and the highest temperature on record is 103° 0 registered on the 15th April 1901 and 17th April 1903. The temperature will generally be 100° or a little over during a few days in summer especially in the absence of summer showers. December is the coldest month of the year with a mean minimum temperature of 61.3. Since 1893 the temperature has not fallen below 50° during any winter night the lowest temperature on record being 51° 2 recorded on the 11th December 1895. The diurnal range of temperature varies from 21.6 in March to 13.6 in July. The highest monthly and annual ranges on record are 11.2 and 60° 7 respectively.

The mean annual rainfall for the district is the lowest Rainfall for the State being only 21.95 inches spread over 11 days. September and October are the rainiest months of the year and a fall of 8.37 inches can be expected during these months in a normal year. As in other districts very little rain falls

from December to March, the total for this period being only 0.72 inch. The rainfall over the district decreases from south-west to north-east. The average annual rainfall approaches 25 inches only in parts of Chitaldrug, Holalkere and Hosdurga taluks while it is only a little over 15 inches in parts of the Challakere, Hiriyur and Molakalmuru taluks. During years of drought, the annual aggregate will be less than 10 inches in parts of the district, in 1923, as many as 6 out of 23 stations gauged less than 10 inches of rain. Since 1893, the deficiency in rainfall exceeded 30 per cent of the normal in one year and the deficit was over 15 per cent in 8 years. The heaviest fall for a single day was 7.30 inches recorded at Davangere on the 30th November 1918.

The following table gives the mean monthly and annual rainfall at the various rain gauge stations in the Chitaldrug District —

Station	No. of years	Jan	Feb	Mar	Apr	May	June

Even in the wettest year on record, viz. 1889 the precipitation was only 11.93 inches and the rainfall was over 35 inches in 5 out of 55 years. The annual total fell short of the normal in 27 years and it was less than 20 inches during 13 years. The worst year on record is 1876 when only 9.96 inches were gauged. During recent years the total was very low in 1908 being only 15.10 inches.

Rainfall at
Chitaldrug

The actual rainfall at Chitaldrug since 1870 is given in the following table —

Year	Inches	Year	Inches
1880	22.20	1899	30.00
1881	20.14	1900	15.60
1882	27.50	1901	1.14
1883	31.18	1902	11.10
1884	33.10	1903	20.10
1885	12.21	1904	28.01
1886	0.94	1905	3.01
1887	1.00	1906	16.00
1888	6.00	1907	20.40
1889	24.00	1908	2.30
1890	35.01	1909	10.40
1891	16.41	1910	2.37
1892	0.13	1911	35.10

THE PEOPLE

The population of the district as per Census of 1921 consists of 571,179 of which 291,955 are males and 279,224 females. Population

Density

The number of persons per square mile is 138, a comparatively low rate, though better when compared with that for 1891 due to the extent of the district and the barrenness of a considerable portion of it. The Davangere taluk in which is included the Harihar sub-taluk is the most thickly populated, the ratio being 206 persons per square mile, followed by Chitaldrug taluk with 185 and Holalkere and Jagalur taluks, with 150 and 138, respectively. The scantiest population was in Hosdurga taluk, with only 99 per square mile, while Challakere, Hiriyur and Molakalmuru have 107, 110 and 124, respectively.

By Religion

According to religion, the population is distributed as follows

Religion	Above 15		Under 15		Total	Per cent
	Males	Females	Males	Females		
Hindus	1,66,308	1,51,640	1,05,270	1,06,160	5,29,378	92.19
Muham- madans	9,450	8,019	6,649	6,575	30,723	5.35
Jains	440	277	167	125	1,009	0.18
Christians	100	102	62	63	327	0.05
Animists	3,567	3,290	2,931	2,938	12,726	2.21
Total	1,79,865	1,63,358	1,15,079	1,15,861	5,74,163	

Inter-Censal variations

The following figures compare the population in the different census periods from 1871 to 1921

Taluks	1871	1881	1891	1901	1911	1921
Challakere	57,187	45,747	60,711	74,035	80,240	85,556
Chitaldrug	75,442	50,834	66,546	83,205	93,251	98,259
Davangere	56,889	44,425	58,462	70,202	76,385	76,501
Harihar	37,117	28,324	36,103	38,919	39,962	38,418
Hiriyur	50,607	34,142	45,974	56,782	63,180	69,960
Holalkere	50,096	31,139	43,520	53,284	62,194	61,133
Jagalur	40,311	28,437	38,229	47,196	53,574	51,445
Molakal- muru	28,405	25,332	32,560	37,744	39,231	36,483
Hosdurga	56,424	56,226	49,695	42,172	29,712	50,356
Total	4,46,410	3,18,092	4,24,277	5,11,062	5,64,243	5,74,179

The great famine of 1877-78 fell with severity upon Chitaldrug and the population went down 28.7 per cent by 1881. It again rose to 33.38 per cent in the 10 years to 1891 indicating considerable elasticity in the population. The percentage of increase from 1891 to 1901 was 20.1 while that from 1901 to 1911 was 10.4 per cent. The increase during the last decade ending with 1921 was comparatively very low being only 1.7 per cent.

Classified according to occupation the population is composed of the following —

Occupation	Number
Agriculture	1,000
Industry	5,000
Commerce	2,000
Professions	500
Other occupations	20,133

With reference to means of livelihood the population may be classed as follows —

Means of livelihood	Number
Exploitation of earth	113,711
Extraction of mineral	253
Industrial occupation	16,133
Transport	1,018
Trade	7,587
Public force	1,111
Public administration	1,257
Professions and liberal arts	2,067
Persons living on their income	167
Domestic service	1,792
Insufficiently described occupation	129
Unproductive	7,117

TOWNS AND VILLAGES

The district contains 12 towns with a population of 55,307. Towns composed of 43,550 Hindus, 10,237 Muhammadans, 260 Christians, 626 Jains, 16 Parsis and 618 Animists.

The following are the Municipal towns with the population of each.

Towns	Population
Davangere	16,971
Chitaldrug town	8,520
Harihar	5,904
Molakalmuru	3,359
Holalkere	3,184
Nayakanhatti	2,704
Jagalur	2,668
Hiriyur	2,616
Hosdurga	2,594
Challakere	2,529
Malebennur	2,177
Mayakonda	2,081

Villages

The following table gives details of villages by taluks in two different ways

Taluk	Villages			Villages Classified				
	Populated	Depopulated	Total	Government	Sarvamanya	Jodi	Kayamgutta	Total

Total	5,639	6	76,446	1,144	77,590	27,223

There were thus 3,08,641 cows and bullocks, 1,07,532 buffaloes, 2,697 horses and ponies, 3,31,435 sheep, 1,24,922 goats, 2,535 pigs, 5,639 donkeys, 77,590 ploughs and 27,223 carts

Dwellings . As per census of 1921, there were 1,15,033 occupied houses in the district, of which 14,607 were in towns and 1,00,426 in villages accommodating a population of 5,74,179 The best houses are most numerous in Davangere Taluk Hiriyur and Chitaldrug follow next in order

FESTIVALS ETC

The following table gives particulars of important festivals or *jatras* in the District —

Important
Festivals
and Jatras.

Name of place	Name of Jatra	Time	Amount at the Jatra
1 Chaulakre Taluk			
Naikanalatti	Thiruvirutha	11th day (March)	10000
Gourasamulra	Melurima	11th day	3000
2 Jugalre Taluk			
heliudla	Virabharava	11th day (March)	4000
Kalldivara	Celestial	11th day (March)	1000
Curulajura	Cowkavari	11th day (March)	3000
3 Hiralur Taluk			
Levalalli	Annam Jatra	Chaitra day	6000
Hiriyur	Trimalavara	Do	5000
Manikav	Melurima Jatra	11th day	500
Yaraballi	Do	Do	3000
4 Chitlur Taluk			
Murugut	Murugut	11th day of Chaitra	1000
5 Hosur Taluk			
Devipura	Keriyalamman Jatra	11th day	1000
6 Darange Taluk			
Davare	Durgam Jatra	11th day	8000
Avare	11th day	11th day	1000
7 Harihar Taluk			
Harhar	Sankaravara	March	1000 (1000 and Cattle)
8 Molak Taluk			
Nunkelirav	Nunkelirav	11th day	3000
Bemmagatta	Ramakavara	March	1000
Do	Kanipule Devara Jatra	11th day	1000

Fairs

Weekly *santes* (fairs) are held in all the Taluk head-quarters. The largest *sante* is that of Challakere where business to the extent of about Rs 10,000 is transacted. The *santes* at Chitaldrug, Davangere, Holalkere are next in importance. The following is a list of the more important *santes*

1 Challakere	7 Aimangala (Hiriyur Taluk)
2 Chitaldrug	8 Devasamudra (Molakalmuru Taluk)
3 Davangere	9 Hireguntanur (Chitaldrug Taluk)
4 Holalkere	10 Jagalur
5 Harihar	11 Budihal (Hosdurga Taluk)
6 Hosdurga	

Cattle Shows

Since 1909, a cattle show is held at Harihar in the month of March in connection with the Sangamēsvara Jātra and it is growing in importance. The grand open *mardan* to keep the cattle and the Tungabhadra river adjoining the ground afford great facilities for the cattle owners who come not only from the neighbouring taluks of the Chitaldrug and Shimoga Districts but from the British taluks of the Bombay and Madras Presidencies. The District Board had supervision in conducting the show till 1920 when the Harihar Municipality undertook to manage the affairs.

Vital statistics
Diseases

The total number of births and deaths in the District during the year 1924-25 was 12,414 and 12,440 respectively. Of the deaths, 3 were of plague, 47 of cholera and the rest of other causes.

CASTES AND OCCUPATION

Castes

The following are the largest castes or classes which number over 10,000, in order of strength. These account for 492,532 or 85.78 per cent of the population.

1 Lingāyet	122,171	7 Muhammadans	30,723
2 Bēda	98,171	8 Mādiga	29,189
3 Golla	15,123	9 Vōdda	28,368
4 Vakkaliga	42,769	10 Uppāra	13,013
5 Kuruba	37,141	11 Lambāni	10,501
6 Holeyā	35,359		

According to occupation and means of livelihood, the population of the District may be classified as follows —

	Occupation and means of livelihood
Exploitation of earth	113 711
Extraction of minerals	253
Industrial occupation	16 133
Transport	1 018
Trade	7 587
Public Force	1 114
Public Administration	3 257
Professions and liberal arts	2 067
Persons living on their income	167
Domestic service	1 792
Insufficiently described occupation	129
Unproductive	7 417

CHRISTIAN MISSIONS

The Roman Catholic Mission carries on evangelistic and educational work in several places in the District the important ones among them being Holalkere Davangere and Harihar

The Roman Catholic Mission

The Wesleyan Mission maintains a Girls School at Davangere and evangelists are also stationed at this place

The Wesleyan Mission

SECTION II—HISTORY AND ARCHÆOLOGY

A HISTORY

The plates existing in Shimoga District which profess to record grants made at Harihar by the emperor Janamē jaya in 3066 and 3022 B C have been referred to under that District and in the general chapter on *History* in Vol II

Lagenlary History

But the oldest authentic inscriptions found in Mysore and indeed in Southern India are the Edicts of Asoka

Mauryas

discovered by Mr Rice in 1892 in Molakalmuru taluk. This discovery carried back the history of Mysore to the 3rd century B.C., and threw a new light on the condition of the Peninsula at that period. The accounts of Bhadrabāhu and Chandragupta at Sravana-Belgola (Hassan District) had connected Mysore with the Mauryas, but the Edicts of Asōka made it clear that the north of the country, probably the province long afterwards known as Kuntala, was a component part of the Maurya empire.

Sātavā
hanas

The next link in the chain of evidence for the early history of the District was the find of Buddhist lead coins on the site of the ancient city of Chandravalli, immediately to the west of Chitaldrug. One at least of the coins bore the name of the Sātavāhana king Pulomāyi, and in conjunction with the inscriptions of Hārītiputra Sātakarni, discovered by Mr Rice in Shikarपुर taluk (Shimoga District), left little doubt that the Sātavāhanas held sway over the north of Mysore in the 2nd century A.D. (See Vol. II, Chap. IV)

Kadambas

The Kadambas succeeded the Sātavāhanas, and there is probably a trace of them in an old inscription at Anaji, which may be of the 4th century and which mentions a great battle between a Pallava king named Nanakkāsa and a king named Krishnavarma, doubtless a Kadamba. The latter suffered so complete a defeat that the prince Sivanandavarma retired in consequence from the world. Banavāsī was the chief Kadamba capital, but Uchchasringi is also mentioned as an important seat of their government and this corresponds either with Uchchangi-durga near Davangere, or with a hill of the same name, but also called Hire-Āryara-durga, near Molakalmuru, some Kadamba inscriptions being found here. A rock inscription of Chandiyammarasa, to the south-west of Chitaldrug, is also probably Kadamba.

The *Chālukyas* in the 6th century reduced the Kadambas to the condition of feudatories, and soon extended their dominion over this District in their contests against the

Pallavas But in the 8th century the *Rāshtrakūṭas* became supreme and so remained for two hundred years Under them part of the District seems to have been attached to the Kadambahge nad

But the distinctive ruling race in the District at this time was the Nolambas or Nonambas a branch of the Pallavas and their territory was the Nolambavadi or Nonambavadi Thirty two Thousand called in an inscription a girdle for her loins (*latīnupura*) to the Lady Earth They had a capital at Penjeru or Henjeru now Hemavati close to the eastern point of Hiriyur taluk but they also had a city Nolambapattana of which only the name remains to the east of Chitaldrug near Vymanagala properly Vyapamangala so named after a Nolanba king as also was Nannivala

The *Chalukya* power was revived at the end of the 10th century and their government of Nolambavadi was at one time under the prince Vishnuvardhana Vijayaditya who had his capital at Kampili (on the Tungabhadra in Bellary District) and then under the prince Jayasingha Nolambapallava who also ruled over Banavasi From about the middle of the 11th to the end of the 12th century the government was hereditary in a family of Pandyas of whom Trihuvana Malla Pandya Deva Vijaya Pandya Deva Vira Pandya Deva and another Vijaya Pandya Deva are mentioned whence the region or some portion of it was also called the Pandya rajya and the Pandya mandala Its capital at this time was at Uchchangidurga (near Davangere) In the latter part of the period though subordinate to the Kalachurya kings who supplanted the Chalukyas these Pandyas appear to have affected some degree of independence They claim to be of the Yadava race and lords of Kanakapura The latter title seems to be assumed because of the defeat their name sake of Madura had inflicted on the Cholas Further information on this branch of the Pandyas will be found in Mr Riees *E O XI* Introduction 16 18

Hoysalas

At the close of the 12th century, the District was absorbed in the kingdom of the Hoysalas, whose capital was at Dōrasamudra (Halebīd, Hassan District) Nolambavādi and Nīrgunda were both provinces of the Hoysala dominions, and descendants of the Ganga kings appear to have continued to rule over the latter as subordinate governors. The north-east, as far as Nīdugal, was subdued by Viṣṇuvardhana, and Molakalmuru by Vīra Ballāla

For about 15 years from 1270, the *Yādava* kings of Dēvagiri (Daulatabād) gained some advantage over the north-western parts of the District, and the seat of the provincial government was apparently established by them at Betūr near Davangere, which, however, is also described as having long before been the capital of some local chieftain.

In 1287, the Hoysalas had recovered their possessions in this part of Mysore, but the seat of government seems to have been transferred to Bemmatana-kallu, the present Chitaldrug. Before long, both Dēvagiri and Dōrasamudra were taken and sacked by the Muhammadans, and the two royal lines were brought to an end

Vijayanagar

From the middle of the 14th century, under the Vijayanagar sovereigns, who next became paramount, Bemmatana-kallu continued the chief town of the District. But subordinate to this sovereignty, in the course of the 15th century, arose the various *pālegārs* who held tracts of country on feudal tenure. The most considerable of these were the chiefs of Chitaldrug and Nīdugal

(1) Chitaldrug

The Chitaldrug family were of the Bēda or Bōya caste, corresponding with the Kīrātas of Sanskrit writers. Hunters and mountaineers, as the names indicate, they belonged to one of the hill tribes who subsisted by hunting and tending cattle. The accounts of their origin are somewhat confused, but it appears that three families emigrated from Jadikal-durga, in the neighbourhood of the shrine of Thirupati, and settled at Nīrutadi near Bharamasāgar about 1475. The son and grandson of one of the leaders, named respectively Hire Hanumappa Nāyaka and

Timmana Nayak afterwards took up their residence at Matti in Hadadi hobli Davangere taluk. The latter called Kuma-gati Timmana Nayak was appointed in 1508 by the Vijayanagar king as Nayak of Holahalli and afterwards to the same office in Hiriyur and eventually in Chitaldrug. The hill at this place he fortified and so conducted himself that a force was sent against him. According to another account Timmana Nayak came with a small body of armed men from a place called Modokeri below the Ghats 10 *gauts* distant from Tirupati and entered the service of the *palegar* of Basavapatna. Some quarrel arose about a mistress that Timmana Nayak kept at Matti and he took refuge at Mayakhonda whence on being pursued he escaped to the jungle at Guutur. Collecting a band he commenced plundering on every side and erected a small fort called Rangapatna near Haloyur. The neighbouring *palegars* of Horpanhalli Nidugal and Basavapatna being much annoyed by his depredations united against him and with the aid of some troops from Vijayanagar marched upon Rangapatna. Timmana Nayak was then forced to retire to Chitaldrug where he was closely besieged when the incident related below occurred and led to his formal recognition as one of the chiefs dependent on Vijayanagar.

On this occasion Timmana Nayak distinguished himself as the hero of a most extraordinary adventure. Stealing into the camp at night with the intention of carrying off the horse of Saluva Norasinga Raya the prince who commanded he accidentally roused the groom. Hastily hiding among the latter he lay quiet to escape observation when the groom driving in afresh the peg for the heel ropes as he would have it sent it right through the hand of the concealed chief. The latter bore the pain without moving and when all was again still releasing himself by cutting off the hand which was pinned to the ground he succeeded in carrying off the horse in triumph. The unexampled proof of fortitude while it attached to him more closely his immediate followers showed the besieging army that no intimidation would be effectual with such an opponent. A peace was therefore it is said concluded and Timmana Nayak invited to Vijayanagar the sovereign of which expressed the greatest admiration of his courageous exploit. After successfully aiding the royal troops in an expedition against

Kulburga, he visited the capital and was rewarded with many honours. At a later period, he incurred the royal displeasure and was imprisoned at Vijayanagar, where he died.

His son, Obana Nāyak, was in the next reign appointed Nāyak of Chitaldrug. He took the name of Madakeri Nāyak, and, on the fall of Vijayanagar in 1564, assumed independence. In 1602, he was succeeded by his son Kastūri Rangappa Nāyak, during whose warlike reign the possession of Māyakonda, Sante-Bennur, Holalkere, Anaji, Jagalur and other places was contested in several battles with the Basvapatna *pālegāi*, and they remained as parts of the Chitaldrug territory. At the chief's death in 1652, his possessions yielded a revenue of 65,000 Durgi pagodas. Madakeri Nāyak, his son, was next installed, and ruled till 1674. He extended the dominions, principally eastwards, until they yielded 100 000 Durgi pagodas.

An adopted son named Obana Nāyak next succeeded, but after a few months was put to death by the *dalavāyis*, who were dissatisfied with his management. His son Sūrakanta Rangappa then took the government but, on refusing to the troops the customary gratuities on the accession of a new master, they mutineed and killed him. Chikkanna Nāyak, a younger brother of Madakeri Nāyak, was next invited to the throne and installed in 1676. After forcing the Harpanhalli chief to raise the siege of Anaji, he was under the necessity of defending Harihar against the Muhammadans. This he effected by the following stratagem. Causing, on the approach of night, lights to be fixed to the branches of the trees and horns of the cattle at his encampment near the Batā hill, and the musicians to play as usual on their instruments as if the army were still there, he marched with nearly the whole force by a circuitous route and threw himself into the fort from the west, and thus drove off the besiegers. He formed alliances by marriage with the Rāyadurga and Basvapatna chiefs, and died in 1686. His brother Madakeri Nāyak succeeded, but was imprisoned by the *dalavāyis*, who set up Rangappa.

But in 1689, Kumāra Barmappa Nāyak assumed the government and reigned till 1721. He was principally remarkable for the extent of his benefactions and the number of his children. It was during this period that the Mughals overran the Karnāṭa possessions of Bijapur and established their government at Sira, of which province Basvapatna and Budihal were made

parganas and to which Chitaldrug and the other neighbouring estates of *palegars* became tributary

His son Madakeri Nayak who came next was engaged in continual hostilities against Harapanhalli Savanur Bednur and the Mahrattas under Saddoji or Hindu Rao the father of Morari Rao. He was generally successful in his engagements and annexed a large tract of country on the north east extending beyond Melakalmuru conquered from Rayadurga. In 1718 he secured the alliance of Chanda Sahib who released from prison at Sattara through the designs of Mons Duplex was marching south. But in the battle of Mayakonda the Chitaldrug army encountered with disastrous result that of Bednur which was assisted by the confederate forces of Rayadurga Harapanhalli and Savanur. Madakeri Nayak was slain in single combat on elephants by Somasaklara Nayak the Harapanhalli chief. Chanda Sahib's son fell at his side and he himself was taken prisoner by the Bednur troops. But having made known his hopes and designs regarding the Nawabship of the Karnatic to the Mussalman officers of the latter they released him and joined his standard.

Kasturi Ranappa Nayak son of Madakeri Nayak succeeded and with the aid of Morari Rao retook Mayakonda. He made various expeditions to the north and south in the latter of which he gained some possessions in the Budihal country. He at the same time kept up a friendship with the Subadar of Siru who it is said invested him with the titles of Talluri and Nudguda of Siru. He died in 1751 without issue and Madakeri Nayak the son of Barmappa Nayak was acknowledged as his successor.

Placed between the Mahrattas on one side and Haidar Ali on the other this chief occupied a perilous position. In 1762 he was summoned by the latter to whom the *palegars* of Rayadurga and Harapanhalli had submitted. Madakeri Nayak procrastinated on which Haidar overran the whole country with his cavalry and the chief was forced to compromise by paying a fine of two lakhs of rupees and an annual tribute. At this time a pretender to the throne of Bednur announcing himself as Channa Basavaiya who it was supposed had been murdered had sought protection and assistance from Chitaldrug. Haidar Ali soon saw the use that could be made of him and

in 1763 the united armies of Mysore and Chitaldrug invaded the Bednūr country with the ostensible object of restoring the rightful king. The result of the expedition has been related in the history of the Shimoga District. Haider, having accomplished his purpose, sent the pretender, called in joke the Ghaib (or resurrection) Rāja, to Madhugiri (Tumkur District) as a prisoner, along with the Bednūr Rāni.

In 1777, when Haider Ali was threatened with a formidable invasion by the allied armies of the Mahrattas and of Nizām Ali, the Chitaldrug *pālegār* having received information which led him to consider that Haider's fortune would shortly be reversed, held back from sending the usual contingent of troops to his assistance. Haider, posted in a strong position at Gooty, found means to avert the danger, and immediately marched upon Chitaldrug to punish it, rejecting the offers of the chief to pay a large fine. The siege was maintained for some months without success when an arrangement was entered into and a fine of thirteen lakhs of pagodas levied on the chief. But the advance of the Mahrattas forced Haider to destroy the siege works and hasten to the north-west before the whole was paid, and the *pālegār*, still doubting to which side fortune might incline, evaded the order to accompany the army with his troops. The Mahratta campaign failed, from the mutual jealousy of the leaders and other causes, and Haider, after a successful career of conquest over all the country between the Tungabhadra and the Krishna, once more sat down indignant before Chitaldrug. But only by the treachery of the Muhammadan officers in the *pālegār's* service was the place at last taken in 1779. Madakeri Nāyak, on finding himself betrayed, threw himself on Haider's mercy. He and his family were sent as prisoners to Seringapatam, while to break up the Bēdar population, whose blind devotion to their chief had so prolonged the contest, he removed 20,000 inhabitants to people the island of Seringapatam, and of all the boys of proper age formed regular battalions of captive converts of Chelas, who in following were of great service to him. From the inscriptions found in the District, a few more facts about the Bēdar chiefs of Chitaldrug may be noted. They are described as Bēdas by caste, of the Kāmagēṭṭa *taṃsa* and of the Vālmīki *gōtra*. They were styled Mahā-nāyaka-chārya and had the distinctive preface of Kāmagēṭṭi Kastūri. So man,

Kshatriya According to tradition, he was born of a girl of that caste, whose family had settled at Dodderi, Harti, and Sarvād in the Bijapur country. At the age of seven she conceived by the Sun, and her father Timma Rāja, to avert disgrace, exposed the infant to which she gave birth on a *tippe* or dung-hill. The child was found by a cowherd named Kamma, who brought him up as his own. After a time the cowherd removed to Kāma-lāpūrā near Vijayanagar, where there was an enclosure for the exhibition of tiger fights. On one occasion when the king Krishna-Rāja was present, a tiger got loose and ran among the cattle on which the boy killed it with his axe. The king made inquiry regarding a youth of such bold spirit, and on hearing his story took him away from the cowherd, alleging that as a foundling he belonged to the State. At the same time, from the fact of his having been found on a *tippe*, he gave him the name of Tippana Nāyak.

Some time after, he defeated a noted champion athlete, who had prevailed against all other opponents at the Court, and put him to death, for which exploit he was granted a tract of country in the east of the Chitaldrug District, to be cleared of jungle and formed into an estate. Settling at Machisamudra, Gosikere and Challakere, he built Dodderi and Harti, naming them after the towns of his ancestors, and took possession of the country extending from Chitaldrug to Pavugada, and from Molakalmuru to Sira. At his death which must have happened in the latter half of the 16th century, he divided his territory among his seven sons.

On the invasion of the country by the Bijapur army, the descendants of these were driven from their respective possessions, and Timmanna Nāyak, who had lost Dodderi, retired to the hill of Nidugal, which he fortified, and there the family long remained, paying to Sira a tribute of 3,000 pagodas. On the capture of Sira by Haider Ali in 1761, the Nidugal Chief, also called Timmanna Nāyak, submitted to the conqueror, who imposed on him a tribute of 7,000 pagodas and the supply of 300 men. Subsequently, while accompanying Tipu Sultān in the expedition against Mangalore, he fell ill, and when at the point of death, was compelled to sign a letter relinquishing his territory and ordering his son Hottanna Nāyak to deliver it up to the Governor of Chitaldrug. Possession was at once taken and

Hottanna Nayak with his brother were sent as prisoners to Chitaldrug, and thence to Srirangapatam where they were put to death when the British army ascended the Ghats.

On the overthrow of the Muhammadan government and the formation of the present kingdom of Mysore the Chitaldrug country was included in it and formed the Chitrikal Rayadi Subrayana or Landari. The west and south suffered during the insurrection of 1830. Under the subsequent British management the Chitaldrug division included the Chitaldrug and Tumkur Districts with head quarters at Tumkur. In 1863 that Division was broken up by joining the Chitaldrug District to the Nagar Division and the Tumkur District to the Nunddrug Division. In 1879 the Divisions were abolished and in 1882 Chitaldrug was reduced to a Sub Division under Tumkur District. In 1886 the Chitaldrug District was re-established but Pavagada taluk remained a part of Tumkur District.

B. ARCHAEOLOGY

The inscriptions found in the District will be found collected in *P. C. XI Chitaldrug District* and the *Mysore Archaeological Reports* 1901-1926.

There are to be seen in this District some prehistoric monuments of note which as elsewhere in south India are called *Moriyaramane* houses of the Moriyas or Mauryas. There are groups of stone circles at Haykal and Chukka Madhure. These are called *Morga dinne* or mounds of the Mauryas. Mr. Rice remarks of them that they may be sites of Bōda encampments. Nothing has been found in them on excavation.

Among the most noteworthy monuments found in the District are the Edicts of Asōka found in Molakalmuru. These and other antiquities will be found referred to at some length in Vol. II *Historical* vide especially Chapters V, VI and XI.

The curious long series of subterranean chambers to the west of Chitaldrug now forming part of the Anklī *matha* are also deserving of notice. They are approached by a good staircase, which leads down to rooms of various sizes at different levels. In these are shrines, *lingas*, baths and pedestals, the last apparently for *yōgāsana*. The caves may be old, though the structures referred to may date only from about the 15th to 17th centuries. At the Panchalinga cave is an inscription (*Chitaldrug* 32) of 1286. It says that the *tīrtha* of five *lingas* was established by the Pāṇḍavas.

Architecturally, the most important building in the District is the temple of Hariharēśvara at Harihar built in 1224, by Pōlālva, minister and general of Hoysala Narasimha II Sōma, minister and general of Hoysala Narasimha III, who built the famous Sōmanāthpur temple, erected the *gōpura* of five storeys over the eastern gateway of this temple in 1268 (*Davangere* 36). In 1280, Sāluva Tikkama, the general of the Sēvuna (Yāduva) king Mahādēva, completed a temple of Lakshmi-Nārāyaṇa within its precincts, in the name of the king and in commemoration of his successful expedition into the Hoysala territories (*Davangere* 59). At Anekonda, north-east of Davangere, is a ruined Īśvara temple, the ceilings and pillars of which are finely carved and of special design. The temple at Nandigudi, on the right bank of Nandagudi, to the north-west of Male-Bennur, is a highly ornamental one. Near to it is a *vīrakal* dated in 930 A D (this is the one mentioned in *Davangere* 119). A little to the north of this is Vāsana, the Osana-tīrtha mentioned in inscriptions (*Davangere* 113 and 114). To the north-east of Male Bennur, at Nanditavare, is a ruined temple of the Hoysala period (13th century) which is well carved. (See *Davangere* 69).

The Ranganātha temple at Nīratadi, which, as mentioned above, was destroyed by the army of Aurangzīb, was rebuilt by the Chitaldrug Chief Barmana Nāyaka. The design is good though the execution is inferior. At Yelakote

on the Thugabhadra is a fine and well built Virasawa *matha* with simple but good ornamentation

The extensive fortifications of the upper fort of Chitaldrug are good specimens of the military buildings of the latter part of the 18th century erected in the time of Haider Ali and Tipu Sultan with the assistance probably of French Engineers They contain immense granaries and pits for storing oil and ghee Also a number of temples of much older date The *mahal* or palace erected by Tipu Sultan in the inner fort below is used as a *cutcherry* The quadruple mill in the arsenal was probably intended for preparing gunpowder

At the beginning of the flight of steps leading to Jatinga rameswara hill in Chitaldrug District is a Ganesa temple which is noteworthy for its Ganēsa which has only two hands which is considered to be a speciality According to text-writers an image of Ganesa may have four six eight ten or sixteen arms In the majority of cases however the image has only four arms one with two arms being a rarity (*Vide* T A Gopinatha Rao *E H I I* 35)

SECTION III—ECONOMIC

GENERAL AGRICULTURAL CONDITIONS

A description of the soil of the District has been given Soils in Section I *Descriptive* In some taluka especially in the Challakere taluk the soil is very inferior and so the lands lose their fertility after they yield crop for a year or two The rayats therefore relinquish the lands after a year or two and apply for fresh ones The number of *Darkhasts* for lands and their relinquishments are consequently very large in this Taluk

CHIEF AGRICULTURAL STATISTICS

Net area
cropped

The following table gives particulars of the area available for cultivation in the District and the net area cropped, during the years 1920-21 to 1924-25 —

Year	Area of the District	Area available for cultivation	Cultivable waste not in occupancy
1	2	3	4
1920-21	26,21,480	15,88,383	93,812
1921-22	26,21,513	15,86,160	96,209
1922-23	26,21,472	15,85,824	97,781
1923-24	26,21,472	15,84,781	97,287
1924-25	26,21,474	15,97,660	97,296

Year	Cultivable area under occupancy	Current fallows	Not area cropped
	5	6	7
1920-21	14,90,326	4,32,599	10,57,727
1921-22	14,89,851	4,50,958	10,38,893
1922-23	14,88,043	4,37,569	10,50,474
1923-24	14,87,494	4,77,205	10,10,289
1924-25	15,00,364	3,55,872	11,44,492

Area of crops
raised

Area of different crops that were raised during the years 1920-21 to 1924-25 is given in the following table

Year	Food grains and pulses	Oil seeds	Condiments and spices	Sugar	Fibre
1	2	3	4	5	6
1920-21	8,84,892	72,271	17,018	1,445	89,479
1921-22	8,99,714	83,583	16,305	1,542	16,526
1922-23	9,06,656	76,117	15,751	2,213	68,872
1923-24	8,15,857	97,653	18,470	1,178	69,922
1924-25	9,06,495	1,17,488	18,963	869	92,677

Statement showing the area of different crops that were raised during the years 1920-21 to 1921-25 etc — *concl'd*

Year	Drugs and Narcotics	Food crop	Fruits and vegetables	Miscellaneous	Total
	7	8	9	10	11
1920-21	3 03	28	1 003	6 101	10 036
1921-22	481	0	0 09	3 439	10 0 081
1922-23	440	63	5 749	3 486	10 87 397
1923-24	406	0	3 34	3 068	10 17 410
1924-25	5 18	161	3 418	1 0	11 4 39

A table showing the number and extent of different holdings under cultivation in the District during the years 1920-21 to 1921-25 is given below —

Year	Holdings not exceeding one acre in extent		Holdings exceeding one acre but not exceeding five acres		Holdings exceeding five acres but not exceeding ten acres	
	No	Extent	No	Extent	No	Extent
	2	3	4	5	6	
1920-21	1 44	1 47	1 913	40 833	1 009	1 54 103
1921-22	1 247	1 47	1 848	18 80	1 013 0	1 01 3 0
1922-23	1 37	1 31	1 961	18 80	18 800	1 03 401
1923-24	1 13	1 1	1 973	47 83	10 12	1 00 301
1924-25	1 178	1 10	13 10	3 480	10 008	1 37 083

Year	Holdings exceeding 10 acres but not exceeding 50 acres		Holdings exceeding 50 acres but not exceeding 100 acres		Above 100 acres but not exceeding 500 acres		Above 500 acres	
	No	Extent	No	Extent	No	Extent	No	Extent
	8	9	10	11	1	13	14	15

1921-22	32 07	7 74 004	4 69	3 5 563	904	1 55 194	11	8 584
1922-23	3 069	7 72 2 5	4 744	3 51 449	938	1 53 710	11	8 584
1923-24	3 21	7 180	4 731	3 50 094	923	1 54 108	8	0 615
1924-25	3 111	7 0 0 4	4 715	3 40 800	905	1 93 710	6	6 150

Holders

A statement showing the number of holders classified according to the amount of revenue paid during 1920-21, to 1924-25 is given below

Year	Holders paying assessment or jodi of Rs 5 and below		Holders paying Rs 5 but not exceeding Rs 25	
	No	Amount paid	No	Amount paid
	2	3	4	5
1920-21	18,843	58,640	10,584	3,81,462
1921-22	18,838	58,502	10,552	3,71,247
1922-23	18,847	58,561	10,129	3,71,272
1923-24	18,860	58,913	10,567	3,71,804
1924-25	18,241	56,316	11,139	1,78,525
Year	Holders paying Rs 25 but not exceeding Rs 100	Holders paying Rs 100 but not exceeding Rs 500	Holders paying above Rs 500	
	1	1	1	

AGRICULTURAL LOANS

The following is a statement showing the different kinds of loans sanctioned and the amounts actually advanced during the years 1920 21 to 1924 25 —

Year	Talavi		Land Improvement		Irrigation Wells		Remarks
	Amount sanctioned	Amount disbursed	Amount sanctioned	Amount disbursed	Amount sanctioned	Amount disbursed	
1920-1	700	700	430	1300	000	050	
1921-2	0000	10000	4700	5150			Included under Land improvement
1922-3	5870	5000	3000	3400			
1923-4	3505	3500	1100	1000	0340	7600	
1924-5	400	500	100	00	400	300	A sum of Rs 6950 was disbursed for flood relief

IRRIGATION

There are 169 major and 180 minor tanks in the District of which 152 major and 107 minor tanks are restored. There are no private enterprise tanks in the District.

The following table shows the distribution of major and minor tanks according to taluks

Taluk	Number of Major tanks			Number of Minor tanks		
	Restored	Un-restored	Total	Restored	Un-restored	Total
1 Chitaldrug	22		22	14	7	21
2 Challakere	49	8	57	10	5	15
3 Hiriyur	20	2	22	15	10	25
4 Molakalmuru	10		10	7	2	9
5 Dwangere	13	1	14	15	10	25
6 Holalkere	14		14	11	23	37
7 Jagalur	5		5	18	1	19
8 Hosdurga	17	6	23	13	12	25
9 Harihar	2		2	4		4
Total	162	17	169	107	73	180

Oil engines

There are four oil engines installed for lifting water for agricultural purposes, three at Harihar and one at Muttagadur in the Holalkere taluk. Three more engines have been set up during the recent years at Pandarahally and Chikkandanahally in the Chitaldrug taluk and Obalapur in the Challakere taluk.

FORESTS

Area

The State Forests cover an area of 358 square miles and plantations, one square mile.

Forest produce

Kaghi, Udi, Dindiga and Karachi are some of the species met with in the forests. Some bamboos and small teak grow on the Jogimatti hills. There are extensive grazing grounds in Challakere, Holalkere, Hosdurga and other parts of the District. Tangadi bark is produced in large quantities. Sandal is also extracted but only in very small quantities.

MINES AND QUARRIES

See under *Geology*

ARTS AND MANUFACTURE

The chief arts and manufactures of the District are —

Chief Arts
and manu-
factures of
the District

- 1 Cotton Ginning and Pressing
- 2 Weaving of handlooms
- 3 Weaving cotton
- 4 Weaving Silk Fabrics
- 5 Others such as shoe making manufacture of glass jewels, etc

The following statement shows the description and number of industrial concerns using power or employing more than ten persons in the District —

(1) Rice Mills	3
(2) Oil Expellers	1
(3) Disintegrators	2
(4) Decorticators	2
(5) Sugar cane Mill	1
(6) Flour Mills	2
(7) Pumping Plants	10
(8) Ginning factories	16
(9) Cotton Presses	8
(10) Workshops	6
(11) Furniture Factory	1
(12) Weaving Factories	2
(13) Printing Machines	1
(14) Boot and Shoe Factories	2
(15) Other Miscellaneous Industries	6
	—
Total	63
	—

Davangere is the only place in the whole of the State where cotton is ginned with the help of the machinery on a large scale

Ginning and
Pressing

Weaving of
Kambles

The weaving of kambles is carried on all over the District but those made at Yemmachatti and Hampapur in the Chitaldrug Taluk, Davangere and a few surrounding villages, Halekal in the Jagalur taluk and Haralahalli and Halivana in the Harihar sub-taluk are very fine and have more than a local reputation

Weaving of
Cotton cloths

The weaving of cotton cloths is carried on in all the taluks. The weavers use only hand-looms. Coarse cloths are made by the Ādi-Drāvidas. At Chitaldrug, Hosdurga, Molakalmuru and Harihar, fine articles such as towels, *punches*, bedsheets and sashes are made. Checks are also made in Hosdurga, Chitaldrug and Molakalmuru towns.

Silk weaving

The weaving of pure silk cloth is mostly confined to Molakalmuru. The weaving industry of Molakalmuru has a Provincial reputation and nearly half the population of the town is engaged in it. The chief articles produced are Vastrams, Women's cloths (Sadies and Kuppasas) and Magatams.

At Hosdurga, Harihar and other places, cloths prepared out of what is locally known as *Vude Reshme* (mercerised cotton) are made. They are not so valuable as those made of pure silk and soon lose colour. Cloths of very good designs are made and are readily sold.

The following is a list of Large Industrial Establishments in the District

Name of Establishment	Class or Description of Industry	Average number of persons employed daily	Whether worked by Mechanical Power or Hand Power
<i>Chitaldrug</i>			
1 Laxminarayana Ginning Factory	Ginning	40	Mechanical Power
2 Wests' Patent Ginning and Pressing Factory	Ginning and Pressing	50	do

List of Large Industrial Establishments in the District — *concl'd*

9 Hirala Mohanlal's Ginning Factory	Do	,	do
10 Balappa Bondadaya Ginning Factory	Do		do
11 R. Hanumantha and Shadakeharappa's Ginning and Pressing Factory	Do	60	do
12 Tadapatra Cotton Press	Pressing	10	do
13 Camodia Press	Do	60	do
14 Swadeshi Mills Ginning Factory	Ginning	40	do
15 Herjibhoys Ginning Factory	Do	40	do
16 B. S. Athni & Co's Ginning Factory	Do	40	do
17 Messrs Brahmappa Thavanappanavar's Oil Mills	Oil Extraction	30	do

Small industries which are practised in almost all the villages are carpentry iron smithy pottery shoe making Manufacture of glass bangles is carried on at Molakalmuru

Rural industries

The chief centre of trade in the District is Davangere where a large volume of business is carried on in cotton oil seeds wool piece goods grain etc Next in importance is the town

Commerce and trade

of Chitaldrug where trade is almost confined to grain, cotton and piece-goods.

Imports and
Exports

The chief articles that are exported from the District are Ragi, Jolam, Cotton, Oil-seeds, Sugar and the principal articles imported are Rice, Sugar and Jaggery.

EXPORTS AND IMPORTS

Chitaldrug	Chitaldrug	Monday	1,000
Harihar	Davangere	Tuesday	2,000
Jagalur	Jagalur	Saturday	2,000

MEANS OF COMMUNICATION

Railways

The Madras and Southern Mahratta Railway from Bangalore to Poona runs through the west of the District, from south to north-west for about 52 miles, not far from the boundary. There are stations at Hosdurga Road, Ramagiri, Holalkere, Chickajur, Sasalu, Mayakonda, Kodaganur, Tolahunse, Davangere and Harihar.

From Chickajur station, a Mysore Government branch line has been opened by the Mysore State, connecting it with Chitaldrug town. The total distance is 21 miles. There are two intermediate stations at Amritapur and Halyur.

Roads

The State Fund roads in the District have a total length of 220 miles and cost for up-keep Rs 33,825 yearly. The District Fund roads cover 295½ miles and are maintained at an annual expense of Rs 30,000. Particulars are given below of the length and cost of each.

State Fund Roads

No	Name of road	Miles	Cost
			Rs
1	Salem-Bellary Road	80	15,575
2	Bangalore-Dharwar Road via Chitaldrug	74	11,500

FAMINES

There was no famine in any part of the District during the past 10 years. A somewhat severe distress prevailed in it during 1903-09. Relief measures were adopted extensively to alleviate the same.

Chitaldrug District

SECTION IV—ADMINISTRATIVE

DIVISIONS

The Chitaldrug District is divided into 8 taluks and one sub taluk. The following statement gives details regarding area population number of villages etc.—

Taluks and Sub Taluk

Taluk	Area in Square miles	No of Hoblis	Number of villages and towns		Population 1911	Population per square mile
			Government	Private		
1 Chitaldrug	530.4	4	171	5	94,500	18
Challakero	96.6	4	185	1	5,500	107
3 Hiriyur	63.1	4	10	1	63,900	110
4 Holakero	400.5	4	103	1	61,133	150
5 Davangero		4	171	5	10,011	100
6 Harihar Sub Taluk	550.7	-	81	-	38,118	
7 Molakalmuru	91.00		9	5	30,183	14
8 Jagalur	37.07	3	170	1	51,445	138
9 Hosdurga	507.49	4	8	6	56,444	99

There are two Revenue Sub Divisions (1) Chitaldrug Sub Division, comprising the taluks of Chitaldrug Challakero

Sub Divisions

and Molakalmuru with a total area of 1,620 77 square miles, and (2) Davangere Sub-Division, comprising Davangere, Jagalur, Holalkere and Hosdurga and the Sub-Taluk of Harihar with an area of 1,903 63 square miles

Hiriyur taluk with an area of 635 21 square miles is under the direct charge of the Deputy Commissioner

JUDICIAL.

Civil Courts

There are two Munsiffs' courts in the District

(1) Munsiff's Court at Chitaldrug exercising jurisdiction over the taluks of Chitaldrug, Challakere, Hiriyur and Molkalmuru

(2) Munsiff's Court at Davangere exercising jurisdiction over the taluks of Davangere, Hosdurga, Holalkere and Jagalur and the Sub-Taluk of Harihar

Criminal Courts

There are fifteen Criminal Courts as follows

- (1) The Court of the District Magistrate, Chitaldrug
- (2) The Court of the Assistant Commissioner and 1st Class Magistrate, Chitaldrug
- (3) The Court of the Assistant Commissioner and 1st Class Magistrate, Davangere
- (4) The Treasury Assistant Commissioner and 1st Class Magistrate, Chitaldrug
- (5) The Court of the Amildar Magistrate, Chitaldrug
- (6) The Court of the Amildar Magistrate Hiriyur
- (7) The Court of the Amildar Magistrate, Challakere
- (8) The Court of the Amildar Magistrate, Molkalmuru
- (9) The Court of the Amildar Magistrate, Jagalur
- (10) The Court of the Amildar Magistrate, Davangere
- (11) The Court of the Amildar Magistrate, Holalkere
- (12) The Court of the Amildar Magistrate, Hosdurga
- (13) The Court of the Deputy Amildar Magistrate, Harihar
- (14) The Bench Court at Chitaldrug
- (15) The Bench Court at Davangere

Village Courts

There are 24 Village Courts

LAND REVENUE

The following statement shows the demand collection and balance under Land Revenue in the District for the 5 years commencing from 1920-21 —

Year	Total demand	Recreation	Not recoverable demand
1		3	4
	Ra. a. p.	Ra. a. p.	Ra. a. p.
1920-21	946 88 13 10	1 1 6 8	141 64 7

1924-25	163 604 0 0	159 97 0 0	61 86 0 0

LOCAL AND MUNICIPAL BOARDS

Local Boards The administration of Local Funds is controlled by three bodies, viz, (1) the District Board, (2) the Taluk Boards and (3) the Union Panchayets.

The District Board which is the controlling authority is composed of 35 members of whom 6 are *ex-officio*, 4 non-officials nominated by Government and 25 non-officials elected by the Taluk Boards as well as by certain Municipalities and recognised Associations

The Deputy Commissioner is the President *Ex-officio*, while the Vice-President is elected from among the non-official members of the District Board

There are 9 Taluk Boards corresponding to each of the Taluks and Sub-Taluk in the District, with the respective Amildars and the Deputy Amildar as their Presidents, and composed of members as follows

<i>Ex-officio</i>	<i>Non-official nominated</i>	<i>Non-official elected</i>
3	4 to 6	7 to 9

There are 78 Union Panchayets in the District

Receipts and Expenditure of the above three Local Bodies are given in the annexed statement

Receipts				
No	Items	1921-22	1922-23

POLICE AND JAILS

Police

The Police administration of the District is conducted by the District Police Superintendent who is subordinate to the Deputy Commissioner of the District. The Police establishment consists of 1 Assistant Superintendent, 11 Inspectors, 15 Sub-Inspectors, 4 Jamadars, 58 Sergeants and 533 Constables. There are 18 investigating centres, 6 sub-stations and 41 out-posts. The total number of cognizable cases dealt within the District during 1923-24 was 554 of which 297 ended in conviction.

Jails

There is one District Lock-up at Chitaldrug and taluk lock-ups at the Head-quarter towns of taluks and sub-taluks. The District Medical Officer is in charge of the District Lock-up and the Sub-Registrars are in charge of the respective taluk Lock-ups.

The subjoined statement shows the particulars of prisoners admitted during the year 1925 -

	Males	Females	Total
Convicts	170	10	180
Under-trials	264	17	281
Civil	10		10

DAILY AVERAGE OF EACH CLASS

	Males	Females	Total

Special Schools	1	153	1
Village Indigenous Schools	161	2 812	116
Total	932	27 066	5 906
		32 322	

Number of square miles served by a school	11
Number of Villages served by a school	13
Number of person served by a school	616

INSPECTION

In addition to the other Inspecting Officers who inspected the schools of their respective charges having their Head quarters elsewhere there were 1 District Inspector and 4 Assistant Inspectors who had their Head quarters in the District and were entrusted solely with the inspection of schools in the district. A tabular statement showing the number and grades of the several inspecting officers of the District is given

Inspecting
Officers

Inspecting Officers.

Designation of the Inspecting Officer	Territorial jurisdiction	Head-quarter	Kinds of schools under direct control
<i>Chitaldrug District</i>			
District Inspector, Chitaldrug	Revenue District of Chitaldrug	Chitaldrug town	All Middle and Incomplete Middle schools, Primary schools
Assistant Inspector, Challakere	Challakere and Molakalmuru	Challakere	
Assistant Inspector, Hiriyur	Hiriyur and Hosdurga	Hiriyur	do
Assistant Inspector, Davangere	Davangere and Jagalur	Davangere	do
Assistant Inspector, Chitaldrug	Chitaldrug and Holalkere	Chitaldrug	do

MEDICINE

There is a District Civil Hospital and a Female Dispensary in the Chitaldrug and Davangere towns, respectively. There are Local Fund Dispensaries in all the Taluk Head-quarters and other important stations, their number being 10. The total average number of patients treated in all the Hospitals during 1925 is 119,560.

The average cost of the establishment, medicines, etc., amounted to Rs. 40,971.

VACCINATION

The total number of Vaccinators in the District is 10 and the total number vaccinated during the last 3 years is about 5,000. Every taluk has got one or more Vaccinators and their work is supervised by the Chief Sanitary Officer.

SECTION V—GAZETTEER

Abbinahole

Abbinahole A village in Hiriyur Taluk. Population 544. The Ranganātha temple at this place has a round stone (*udbhava-mūrti*) for the object of worship. In front of it is to be seen an inscription, dated in 1664 A.D., which

is of some interest as it refers to the establishment of a claim to the office of Shambho through success in an ordeal of dipping the hand in boiling ghee in the presence of a large number of people. There is also a record of the time of the Nolamba king Vyapar dated 923 A D.

Betur or Bettur — A village in Davangere taluk 2 miles north of the *kasba* population 1128 Betur or Bettur

It appears to have been the old capital of a principality. At the end of the 13th century it was taken by the Devagiri general and made the seat of government during the ascendancy of the Yadava kings of Devagiri over the northern parts of the Hoysala dominions.

Blstuvalli — A village in Jagalur Taluk Population 115 Blstuvalli

Dalavayi honli about 2 miles to the west of this place is a symmetrically built pond about 50 yards square with flights of steps on all the four sides. There is some ornamental work in the middle of the parapet all round. The pond is mostly buried. According to a chronicle in the possession of the Patel of this village which gives an account of the Chitadrug chiefs it was built by Muddanna the *lalavaji* or general of Hiri Madakeri Nayaka at the close of the 17th century. He also built to the north a fine *mantapa* of dressed stone unsupported by sculptured pillars for the use of the god Ranganatha of the adjacent hill known as Konrichagal gudda. One of the sculptures is an ingenious combination of three cows with one body and three heads in different postures. To the north west of the *mantapa* is the shrine of Urelondappa a round stone marked with *namam* which is said to be the original god of the place older than Ranganatha. The Ranganatha temple on Konrichagal gudda has its *garbhagriha* in a cave and the god is in the form of a round stone (*udbhata murti*) marked with *namam*. In an adjoining cave to the right is the goddess named Lakkamma or Tolasamma a small figure about 1½ feet high standing half buried with lotus in the right hand the left hand hanging by the side. At the *garbhagriha* entrance are kept a few old swords and other weapons which are said to be used for performing *parada* or miracles during the annual festival in the month

of *Charitra* (April) when thousands of people collect together At the foot of the hill is a rough stone to the right, known as Chelappa, to which offerings of scorpions made of silver, jaggery, etc., are made to escape from scorpion stings Higher up stands a boulder called Talebolu-gudda against which those who have undergone torture in fulfilment of vows are required to knock their heads thrice Further up is a conical stone, about three feet high, known as Arne-gundu, near which potters and others keep the pots (*arime*) which are thence removed by the *pūjārī* to the temple Marriage parties also leave their *arimes* and *bāshingas* (marriage fillets) here and then enter the temple The *pūjārī* of the temple is a *nāyaka* or a man of the hunter caste

Bharmagiri

Bharmagiri A village in Hriyur Taluk Population 697 This place, so named after the *Pālegār* Bharmanna-Nāyaka, is situated on a fortified low hill It has a shrine in which the *utsava-vingraha* or processional image of Kaniveya-Māramma, the goddess after whom Mārikanive is named, is kept The image consists of a wooden box which, decorated with hands and other limbs and an umbrella, is taken out in a car once a year

For *Brahmagiri* in Molakalmuru taluk, see under *Siddapura*.

Budihal

Budihal A village in the Hosdurga taluk of Chitaldrug District, Mysore, situated in 13°37' N lat and 76°25' E long, 16 miles south-east of Hosdurga town Population (1901), 1,118 The fort was built here about the fifteenth century by a chief who was invested with authority by the king of Vijayanagar After the fall of that power, the Tarikere chiefs seized the place, but it was taken from them by the Sultān of Bijapur, and subsequently formed a district of the province of Sira under the Mughals The *Pālegār* of Chitaldrug and the Mahrattas in turn held it, until it was taken by Haider Ali in 1761 The Mahrattas again seized it in 1771, but it was recovered in 1774 In 1790, it was once more in the hands of the Mahrattas, but was restored at the peace of 1792 It was one of the last places at which the insurgents under the Tarikere *Pālegār* created disturbances in 1831

Challakere—A taluk in the north east till 1882 called Challakere Dodderi taluk. From 1875 to 1886 the Molakalmuru taluk was included in this taluk. Area 796.36 square miles. Head quarters at Challakere contains the following *hoblis* villages and population—

Hoblis	Village	Habitat	Villages (clan names)				Population
			Cheruvu	Saravali	Jodi	Kavampatti	
1 Challakere	4	3	46			1	1833
2 Nayanahatti	4	5	47				1630

12	Ghataparthi	1858	
13	Talaku	1060	
14	Doddaullarhi	1186	

This tract has no hills of any importance or of considerable height. The few rocky hills there are are scattered about. Physical feature

and are quite bare. But for these, the taluk is flat or rather gently undulating, intersected by numerous *nallas*. In the extensive Amrut Mahal Kāvāls forming a peculiar feature, *babal*, *chuggal* and other fuel trees and date groves are found. Date groves also occur along the banks of streams, in the beds of tanks and other low-lying tracts. But for these, the taluk has a bleak and barren appearance.

The Vēdāvati enters the taluk at the most southern point and runs through it in a north-easterly direction. It has for its main affluents the Garani and the Naikanhatta. It has also another minor affluent rising in the Pavagada taluk, and effecting the drainage of the south-eastern portion of the taluk. The drainage of the north-western corner of the taluk is effected by the Haggari river, which forms the north-western boundary of the taluk.

Soil and Crops

Except under irrigation, the soils of the taluk are poor and unfertile. In the extreme south-west corner, there is some good black cotton soil. With this exception, the dry soils are poor, being of a light, red sandy or gravelly description. In many villages, the soil is impregnated with saline matter. This soil (*chowlu-bhūmi*), though cultivated, produces poor dry crops.

The chief dry crops taken are *save* and *sajje*, *kulthi*, castor, *ragi* and *javari* are also cultivated, the two latter as well as *navane* and tobacco are generally raised in irrigated lands. Cotton in small quantities is grown in the black soil. Rice is grown wherever water can be obtained. There is little or no sugar-cane grown. There are some villages possessing cocoa-nut and betel vine gardens, most of which are below tanks, but almost every garden has its own well. There are also some gardens irrigated from channels which conduct water from the river or *nallas*. There are numerous small tanks in the taluk, but some large tanks have been constructed after the original and resettlement of the taluk and it may be said that so far as channels and tanks are concerned, this taluk has received special attention.

The Revenue Settlement was introduced in 1872 and the Revision Settlement from 1906-07. The area in acres of the taluk at the time of Revision Settlement was thus distributed —

Cultivable	Dry	Wet	Barley	Total
Oxeye 1	163 481	6 784	1 908 1	182 904
Uncult 1				1 5 143

Total				303 4 1

The Bangalore Bellary high road runs through the taluk from south to north being met at Challakere by a road from Chitaldrug. There are also roads from Challakere north west to Nayakanhatti and east to Pavagada. The most important additions have been the road connecting Challakere with Jagalur passing through Nayikanhatti. There are cart tracks to connect villages of any importance with one or more of the above roads which intersect the taluk. The nearest railway station to Challakere is Holikere distance 12 miles. Bellary station is 66 miles from Challakere.

Challakere or Chellakere—Head quarters of the Challakere taluk situated in 11° 18' N lat 76° 13' E long on the Bangalore Bellary road 18 miles east north east of Chitaldrug with which it is connected by a road. It is a Municipality.

Total	1 326	1 201	2 527

The place is growing into importance from a commercial point of view. A weekly fair is held on every Sunday to which nearly 4 or 5 thousand people collect from the different parts of the District and also from the adjoining British territories. A rice mill has been put up. The Hindu residents are mostly Lingāyats. The temple of the local goddess Challakeire-amma has adherents chiefly drawn from this sect.

Chandravalli

Chandravalli Forms part of Chitaldrug town

The ancient site of the name of Chandravalli is situated at the north-west foot of the Chitaldrug hill. It appears to extend over a considerable area from the Hanūmanta temple in the north to the Ankle *matha* in the south. How far it extends towards the west it is not easy to determine. A large portion of it is now covered over with cultivated fields. Broken bricks and pieces of pottery are strewn over the whole area. A water course has cut through the site towards the hill in the east. It exposes on both sides banks 10 to 12 feet deep made up of two layers: the lower, about 6 feet in depth, of hard gravel and the upper, of about the same depth, consisting of loose earth, ashes and rubbish with pieces of pottery imbedded in it. Some of the latter are beautifully glazed and ornamented. In the water course some neolithic celts were also picked up. Guided by indications of some brick walls on the site, Mr R. Narasimha-char carried on some preliminary excavations by the side of the walls in 4 places in 1909-1910. The bricks of which the walls are built are well burnt and unusually large in size—16 inches long, 8 inches broad and $4\frac{1}{2}$ inches thick. At the corners where two walls meet, bricks of greater width, nearly square in shape, are used. The excavations exposed 3 rooms, about 14 feet square, within a few yards of each other, but in every case the walls were only $4\frac{1}{2}$ feet high. The digging was continued to a depth of about 7 feet below the ground level when virgin soil was met with. Pieces of pottery, broken cups, jars, lamps, ring-stands and other earthenware articles, ashes and rubbish were found in all the rooms. Most of the pieces of pottery bear ornamental devices and are neatly glazed, and the shapes of some of the vessels are unlike those of the ones now used in the neighbourhood, or, for that matter, in the State itself.

There were also dug up a few perforated and elegantly shaped beads made of stone and a number of flat circular earthen pieces, some of which are marked with ornamental lines. It is difficult to say what the latter were intended for. Near one of the rooms at a depth of about 3 feet were unearthed a few hand made roofing tiles with ridges and groove. They resemble the modern Mangalore tiles and some of them have two holes at the end perhaps to allow of nails being driven into the rafter below to keep the tiles in their place even during storms. By the side of one of the walls running in the direction of the water course a lead coin and a large circular clay seal were dug up at a depth of about 6 feet. The seal has a hole at the top and just below it some marks which look like 4 Brahmi letters. There is an elephant standing to the left in front of which a soldier is seen standing armed with some weapon. On the back of the seal is an ornamental circle with some indistinct symbol in the centre. Four other places were selected for excavation and pits were dug to a depth of about 5 feet. In all of them pieces of pottery broken cups etc. ashes and rubbish were found as in the other places. In a pit a few yards to the north of the spot where the seal was discovered three more lead coins were found and in another pit about 80 yards to the south of the same spot were dug up together a silver and a lead coin along with another which is presumably a potin coin. The silver coin is a Roman *denarius* of the time of the Emperor Augustus. The lead and potin coins are much smaller in size than the four lead coins mentioned above and no legends or symbols are visible on them. The large lead coins are undoubtedly of the Andhra period and the same is most probably the case with the small lead and potin coins which were found together with *denarius*. Of the former the one which was found with the seal is a coin of the Maharati probably a viceroy of the Andhras stationed at Chitaldrug and of the three which were dug in the northern pit two are coins of Mudananda and one of Chutukadanda both of whom are supposed to be Andhrabhrityas or feudatories of the Andhras.

Some of the vessels and pieces of pottery dug up during the excavations were submitted to Sir John Marshall Director General of Archaeology for examination. He says of them — One piece is worth noticing as being similar to pottery found

in some pre-historic graves in the Nilgiris and elsewhere. None of the pottery is enamelled but some specimens are *glazed*, a mucilaginous gum having apparently been used for the purpose."

As mentioned above, of the four large lead coins discovered at this place, one is a coin of the Mahārathi, two, of king Mudānanda, and one, of king Chūtukadānanda. They may be briefly described as follows —

<i>Obverse.</i>	<i>Reverse</i>
1 A humped bull standing to left with a crescent over the hump. Round it, beginning over its head, the legend <i>Mahārathisa Jadakana Kalayasu</i>	A tree within railing to left with a <i>chaitya</i> to right surmounted by a crescent
2 A <i>chaitya</i> . Round it the legend <i>Rano Mudanamdasa</i>	A tree within railing in the centre flanked by two symbols to right and left
3 The same. But the legend reads <i>Rano Mulanamdasa</i> with <i>la</i> for <i>da</i>	A tree within railing to left and the symbol called <i>Nandiyada</i> to right
4 A <i>Chaitya</i> . Round it the legend <i>Rano Chutukadanamdasa</i>	A tree within railing in the centre with no trace of any symbol on the sides

The two small coins, one lead and the other probably potin, found with the Roman silver coin, have neither legends nor symbols visible on them. The Roman coin is a *denarius* of the time of the Emperor Augustus.

<i>Obverse</i>	<i>Reverse.</i>
Laurate head of Augustus to right. Round it the legend <i>Cæsar Augustus Divi F' Pater Patriæ</i>	Two draped figures standing, each holding a spear, with two bucklers grounded between them. Around, the legend <i>C'æsar Augusti F' Cos Des'j</i>

The circular clay seal which was dug up together with the Mahārathi coin is about 3½" in diameter. It has a hole at the top and just below it some symbols which look like four Brāhmi characters. There is an elephant to the left in front of which a soldier is seen standing, holding something (perhaps a weapon) in his hand. On the back, there is an ornamental ring with an illegible symbol in the centre.

The Mahārathi who issued coin No. 1 was probably a viceroy of the Andhras stationed at Chitaldrug; and Mudānanda and

Chutukadananda Āndhrabhrityas or feudatories of the Āndhras who subsequently became independent This Chutukadananda was perhaps an ancestor of the Chutukulananda mentioned in the Banavaṃśa (*Ind Ant* XIV 331) and the Malavalli (*Shikarpur* 263) inscriptions

In 1888 Mr A Mervyn Smith a mining engineer while prospecting for gold found it would appear a few lead coins at Chitaldrug and distributed them to various coin collectors Three of the coins which belong to the Maharathi have been described by Dr Hultzsch (*J p Ind* VII 51) who however starts at a different point and reads the legend thus — *Sadolana Kolalaya Maharathiso* Professor Rapson of Cambridge to whom a photo of the newly discovered coins was sent by Mr Narasimhaiah wrote as follows — I am much interested in the account of your discovery of Roman silver and Āndhra lead coins at Chitaldrug The discoveries of objects which can be dated found in association are most important historically

As you point out Dr Hultzsch's reading of the Maharathi's coins may have to be revised in the light of your new specimens There are said to be two other specimens in the Museum at Bangalore I wonder whether by means of a comparison of all the e you will be able to establish the true reading I may say by the way that if your Roman coins were actually found with the others it will settle a point which I leave doubtful as to their date The two coins in the Museum referred to above have been examined One of them is a coin of the Maharathi and the other a coin of Mudananda similar to Nos 1 and 2 described above The legend on the former is unfortunately illegible beyond the word *Maharathiso* The e two coins are also said to have been presented to the Museum by Mr Mervyn Smith So he had preceded Mr Narasimhaiah in the discovery of Mudananda's coin at Chitaldrug though nobody knew anything about it This is however the first time that a coin of Chutukadananda has been found at Chitaldrug The region of the occurrence of the coins of Mudananda and Chutukadananda was supposed to be limited to Karwar Now however it has to be extended further south at least as far as Chitaldrug

Among the coins unearthed at Chandravalli there was a brass coin which has been noticed in the *Mysore Archaeological Report*

for 1909-10 It was picked up in a part of the water course that cuts through the Chandravalli site, and has a square hole in the middle around which runs a legend in Chinese characters which are much worn It is apparently an old Chinese coin Mr Taw Sein Ko, to whom it was sent for examination, has given it as his opinion that the coin may belong to the 2nd century B C

Chikka-
Byaladakere

Chikka-Byaladakere A village in Huliyar Taluk At the entrance to this place is a *gōkal* or cattle-stone with an unintelligible Telugu inscription on it There are also a few sculptures here, of which may be mentioned a panel with two females standing side by side holding something in both the hands, and a fine *māstikal* containing a female figure holding a lime in the right hand and a mirror in the left, both arms akimbo, a *gindri* (spouted vessel) being carved to the right at the bottom as at Heggare

Chikjajur

Chikjajur Is the junction for the Chikjajur-Chitaldrug section of the Mysore State Railway, which covers a distance of about 21 miles This section was opened for traffic on 5th January 1921 About 8 miles to its north-east is Bhīmasamudra, an excellent sheet of water About 8 miles to its south-east is Holalkere

16	Ilaiyal	150	

A range of hills wedge shaped with the base to the south divides the taluk into two not very unequal portions east and west. Towards the base of this range where the town of Chitaldrug is situated the hills are lofty, extensive and rugged. Covered with bamboos, stunted teak and other trees the Jogannatti and its surroundings promise to be of much importance were it only as a health resort to the dry District. The western and larger portion of the taluk from the range just described until a parallel but smaller range on the extreme western confines is reached is comparatively level and this is usual in the red soil tracts. Villages are numerous, small but thriving. Water supply is better than towards the east and here are to be found almost all the tanks the Taluk possesses.

The eastern half is drier, the water supply is not so good and tanks are few. Large stretches of black soil are met with and, as is often the case in the black soil tracts, villages are large and far apart. So marked and different are the characteristics of the two tracts, east and west, that even a glance at the map reveals them.

Soils being so distinct the crops are equally so. *ragi* Crops being the staple in the west with *avare*, *oil seeds* *joware*

and gram as the miscellaneous products, while to the east *jowari* is the staple and the miscellaneous crops may be set down as gram, cotton, *navane*, oil-seeds and *ragi*. Garden produce, sugar-cane and rice are confined chiefly to the western portion.

The Revenue Settlement was introduced in 1867 and the Revision Settlement was introduced with effect from the year 1905-06. According to this, the area of the taluk was distributed as follows

Culturable—

Dry	175,732 }	185,491 Acres
Wet	6,388 }	
Garden	3,371 }	

Unculturable 31,235 Acres

Communi-
cations

The Bangalore-Harihar trunk road which took almost all the traffic there was 50 years ago is just as essential to the taluk, the great markets to which it has access having become greater than ever since the completion of through railway communication between Mysore and Bombay in 1889. There can be no doubt, however, that the railway has deprived the trunk road of much of its importance and new attractions have sprung up which trade will certainly seek. There are railway stations nearer than Davangere and the growing importance of Raidurg, now connected by railway with Bellary, is drawing trade to the north, through Nāyakanhatti, and the people require new roads. Of the existing roads the high road from Hiriyur to Harihar runs through the Taluk from south-east to north-west and is crossed at Chitaldrug by a road from Holalkere railway station in the south-west to Challakere in the north-east. There is also a road from Vijāpur to Jagalur and the frontier northwards.

Chitaldrug

Chitaldrug. The chief town of the District, situated in 14°14' N. lat, 76°27' E long, 24 miles from the Holalkere

railway station and on the Bangalore Harihar road 126 miles north west of Bangalore It is a Municipality

Population in 1911	Males	Females	Total

The town which is surrounded with a line of fortifications and includes in inner fort is built at the north-eastern base of a dense cluster of rocky hills very extensively fortified. The history of the place has already been related in connection with that of the District. There are many inscriptions on the hill of the Chalukyas the Hoysalas and the Vijayanagar Kings dating from the 11th to the 15th century. Its name at that time was Bemmattanalalu or Bemmattinuru. According to legend a giant named Hidimhasura was here slain by Virikodara or Bhima one of the Pandavas. The present name of the place is derived either from *Sitala* or *Chitrakal-durga* meaning spotted or picturesque castle or *Chatralal* umbrella rock the umbrella being the ensign of royalty. To the south west is a striking lofty hill of this form considered sacred by both Hindus and Muhammadans. At the top is a pillar and shrine of Dhavalappa or Siddesvara. The Muhammadans call it the tomb of Saidulla. There is also another hill south of Chitaldrug with a shrine at the summit dedicated to *Obaladevi* and held specially sacred by the Būdas.

In the town water is laid on to all the streets from the Timmanhalli tank at short distance to the south. The principal temple is one of two storeys dedicated to Uchchangamma. The extensive fortifications batteries and works of masonry forming the *meldurga* or upper hill fort

which includes 14 temples, present many points of interest. The remains of the fort and the palace of the *pālegārs*, which were of mud, are still to be seen, with the site of a pleasure-garden. The formidable stone fortress, as it now is, was erected under Haidar and Tipu, by whom also were constructed the immense granaries and pits for storing oil and ghee. Chitaldrug was for some years garrisoned by British troops, but given up on account of its unhealthiness.

In the Mahal in the inner fort, the ceiling of the inner hall is pulled down and the lofty wooden pillars are alone left standing. The pillars have no ornamentation about them like the ones in the Palace at the Bangalore Fort. The upper storey contains a few plain-looking rooms. There is a garden attached to the building. Though a plain structure, the Mahal deserves renovation as a building of some historical interest. In the compound there is a huge stone trough, 10'6" long, 4' 6" broad and 4' 10" deep, chiselled out of hard granite and well polished. It is said that the trough was used for watering elephants during Tipu's time. The Ankle *matha* is noted for its caves which form a perfect labyrinth consisting of rooms of various sizes at different levels.

On the hill are the Sampige-Siddēsvara, Hṛdīmbēsvara, Ēkanāthamma, Phalgunēsvara, Gōpālākṛishna, Ānjanēya, Subbarāya and Basava temples. In the Hṛdīmbēsvara temple a big piece of bone is shown as the tooth of the demon Hṛdīm̐ba, and a cylinder of iron plates, 6 feet high and 10 feet in circumference, as the *bhēṛi* or kettle-drum of Bhīma, the Pāṇḍava prince who killed Hṛdīm̐ba. The *garbhagriha* of this temple is carved out of single rock. A figure of Hṛdīm̐ba is sculptured on the *vimāna*. In the Sampige-Siddēsvara temple also, a piece of bone much bigger than the one at the Hṛdīmbēsvara temple is shown as the tooth of Hṛdīm̐ba. At the entrance to the temple are placed two capitals on which, curiously enough, two inscriptions of the middle of the 14th century are engraved. On the hill there is a structure built of masonry in the form of a circular well, about 8 feet deep and 21 feet in diameter, on the

edge of which in the four cardinal points are fixed on two stone beams big millstones 5-10 in diameter the lower stone being 1-10 thick and the upper 10. The upper stones have around the rim 38 square holes each $2\frac{1}{2}$ long and $3\frac{1}{2}$ deep. There are two flights of steps leading down into the well. The 4 millstones are supposed to have been used for grinding gunpowder at the time of Haidar and Tipu and this supposition is strengthened by the fact that when the structure was unroofed some years ago quantities of charcoal powder were found at the sides of the millstones. Probably elephants were employed for working the millstones all the four moving at the same time by some ingenious contrivance. Two of the upper stones have been removed to the park and fixed there like round tables.

Besides the usual District Offices which are beyond the fort walls 3 miles to the north west is situated the *Murga* math the residence of the chief guru of the Sivabaktis or Lingayits. It is a large and well built edifice. It is in two storeys with a lofty *mahakarna* or outer gate known as *Inc baglu* which has also an upper floor where the *sema* receives Europeans and other visitors. The chief object of worship in the *matha* is the *Caddige* of Immadi Muriga Swami, who is described as the founder of the institution. Only bachelors can become the *Swamis* of this *matha*. In one part is an ingenious water wheel. The name of the *math* is said to be derived from *murgis* the three *gis* namely *yogi*, *jogi* and *bhogi*. There is a fine *math* belonging to the *guru* on the hill but it is deserted owing to his inability on account of the opposition of other sects in the town to visit it with all the insignia of his authority one of which is a lighted torch by day.

To the west among a wildly rugged and picturesque group of hills is the *Ankli math* of recent establishment. There is here a curious long series of subterranean chambers now regularly built round with masonry and thickly covered with plaster. They are entered by a good stone staircase which leads down to rooms of various sizes at different levels.

In them are shrines, *lingas*, baths and pedestals, apparently for *yōgāsana*. The style of their present architecture may be from 300 to 500 years old, but the caverns no doubt existed long before. When and for what purpose they were originally formed or occupied is unknown. When the *Ankli matha* was first established, about 68 years ago, they were found deserted, and the entrance choked up with a thick growth of bushes. They are now merely used for storing things in. At the Panchalinga cave, near the entrance, is an inscription of 1286, in the reign of the Hoysala king Narasimha III, recording a grant by his minister Perumāle.

In this quarter, immediately to the west of Chitaldrug, are traces of an ancient city, consisting of very large sized bricks, and remains of pottery. Coins are frequently found after heavy rains. In 1888, a large find was made of Buddhist leaden coins, one of which bore the name of the Āndhra or Sātavāhana king Pulumāyi, of the 2nd century. Excavations were carried out here by the Mysore Archæological Department in 1909. According to tradition, the city was called Chandravalli, (*q v*) and extended as far as the four points, Naralgundi, Baralgundi, Huligundi and Basavangundi. Huligundi is to the north of the *Ankli matha*, and Basavangundi is to the north-west of the Cholagatta hill, near Garihatti village.

About three miles south of Chitaldrug is the Jōgi matti or maradi, one of the highest points in the District, being 3,803 feet above the level of the sea. It is surrounded with hills and is overgrown with bamboo, stunted teak and other trees. A road has been made to it and a plantation commenced. It is a convenient resort during the intense heat of the hot months.

Setting aside the main drainage of the country by the Tungahhadra river the most important subsidiary or local drainage is effected by the Sulekere nala called the Haridra flowing from south to north through the best part of the tract and falling into the Tungahhadra at Harihar For the eastern villages a stream rising near Anagod and joining the Tungahhadra river at Chukbidare performs on a small scale the same office With the exception of a group of hills separating the taluk from Honnali near Malebennur

Physical feature

its western edge resting on the Tungabhadra river, and another well defined range of hills extending from Mayakonda to Anaji, on the eastern confines of the tract, the country presents an almost unbroken plain, sloping gradually towards the Tungabhadra river and Harihar. The solitary hill of Batu, between Harihar and Davangere, although of no great height, presents a conspicuous land-mark in this plain.

Soils

Although soils are more or less intermixed throughout, the western half of the tract may, broadly speaking, be said to contain the black cotton and better soils and the eastern half, the ordinary red soils, some of them very stony and inferior.

The whole tract is essentially dry crop. The crops are, according to the soil, jola, navane, cotton and wheat in the black and better soils, and ragi, navane and the usual miscellaneous crops in red soil and castor oil, wild gingelly and gingelly are grown for oilseeds. The irrigated lands whether under wells or tanks or both combined produce rice, some sugar-cane and cocoa-nuts, as well as a good deal of irrigated jola and ragi. There is but very little areca-nut grown.

The taluk is noted for the manufacture of *kumbals*, of which some of the finest are valued as high as from Rs 200 to Rs 300. Coarse cotton cloths are largely woven in the villages.

This country was probably owned by the Kadambas at the beginning of the Christian era. It afterwards formed part of the province of Nonambavādi under the Chālukya and Hoysala kings, the seat of government being at Uchchangi-durga. The Yādavas of Dēvagiri held it for some years, making Bettur the chief town. It then fell a prey to the Muhammadan incursions by which the Hoysala dominion was overthrown, but on the rise of the Vijayangar empire was enriched by its kings, from Harihara Rāya downwards. On the downfall of that State, the principal places in the taluk were seized by the chiefs of Bednūr and Tanikere, until

taken some by the Nawab of Savanur and some by the *palegār* of Chitaldrug who in their turn were forced to yield them to Haidar Ali since when with occasional possession by the Mahrattas in the latter part of the last century they have remained attached to Mysore

The Revenue Settlement was introduced into the old Harihar taluk in 1865 and into Davangere taluk in 1866 The Revision Settlement of these taluks was introduced with effect from 1901-05 The area at that time was distributed as follows —

	<i>Dry</i>	<i>Wet</i>	<i>Garden</i>	<i>Total</i>
<i>Culturable—</i>				Acres
Occupied	211 88	3 711	1 650	216 949
Unoccupied				28 278
<i>Unculturable—</i>				
(including roads village sites etc.)				56 274
Total acres				331 501

The Southern Mahratta Railway from Bangalore to Poona runs through the taluk from south east to north west with stations inside the taluk at Harihar Davangere Tolahunse Kodaganur and Mayakonda The Bangalore Harihar high road runs through the centre of the taluk from east to west and the high road from Harihar southwards *via* Malebennur to Shimoga A road north wards from Harihar towards Harpanhalli roads from Davangere southwards to Hadadi and eastwards to Anaji as well as one from Anagod southwards to meet the railway have all been constructed

Communi-
cation

Davangere —One of the most important seats of trade in the Province situated in 14° 28' N lat 75° 59' E long on the Bangalore Poona railway and the Bangalore Harihar

Davangere

road, 38 miles north-west of Chitaldrug Head-quarters of the Davangere taluk and a Municipality

Population in 1921	Males	Females	Total
Hindus	6,892	6,255	13,147
Muhammadans	1,708	1,482	3,190
Animists	142	135	277
Jains	191	81	272
Christians	18	35	53
Parsis	7	5	12
Total	8,978	7,993	16,971

Davangere was originally an obscure village, forming one of the suburbs of Bettur. Haidar Ali gave it as a *jāgīr* to a Mahratta chief named Appoji Rām, who encouraged merchants to settle there. He died without heirs, but the place continued to increase under encouragements given by Tipu Sultān, and it is now the most populous town in the Chitaldrug District. The merchants are principally Sivabhaktas or Lingāyats. The increase in population, especially since the advent of the railway, has made it necessary to extend the town to the east.

A valuable trade is carried on in Davangere, with Wallajpet in North Arcot District on the one hand and with Sagai and Nagar on the other, the areca-nut of the two latter being sent to Wallajpet. Madras goods imported from Europe, China, Bengal and the eastern islands together with the salt obtained in return, as well as *kambhis* made in the neighbourhood, are transmitted to the *malnad*. Such has always been considered the general direction of the trade carried on at Davangere. The railway no doubt has effected considerable alterations both in direction and goods, but all for the better. Some idea of the importance of Davangere as a centre of trade may be formed from the fact that, according to railway records, the quantity of inward and outward traffic at Davangere compares favourably with stations such as Bangalore and Bellary.

The town of Davaagere is now supplied with drinking water drawn by means of pipes from the Tungabhadra at Harihar, 9 miles distant from Davaagere. The water is pumped out by engines set up on the banks of the river. The water is stored at Davaagere in a big iron tank constructed outside the town. From this tank water is served to the town by means of distributing pipes. House connections are also given. The capital cost of the scheme was nearly Rs. 2,89,600 and the annual maintenance charges amount to about Rs. 25,000 which is borne by the Municipality.

The Isvara temple at Inekonda, a village about 2 miles from Davaagere, is a neat little one in the Hoysala style. It was restored about 1912 with mud walls and plastered. Originally it had three cells though there are only 2 at present, the south cell being no longer in existence. The north cell is now empty. The main cell has a *sukhanasi* and a *nataranga*. The *garbhagriha* door way is well executed and has a figure of Gajalakshmi in the middle of the lintel. The *sukhanasi* door way, which is also good, has ornamental screens at the sides and a figure of Siva on the lintel flanked on the left by Vishnu and Subrahmanya and on the right by Brahma and Ganapati with *malaras* beyond these on both the sides. At the sides of the door way are 2 fine niches with female *chauri* bearers on either side, the right one containing a figure of Sarasvati and the left one of Mahisha-siramaridini. The left cell has the finest door way in the temple. The ceilings are deep and show good work, 8 of them having on the circular under surface of the hanging central piece figures of *astadipalakas* in the particular directions while the central one has a figure of Siva as Gajasuramardana flanked by Brahma and Vishnu. The four pillars of the *nataranga* are well executed with bead work and sculptures at the bottom. The latter are fine figures of gods and goddesses in niches under ornamental canopies. Beyond the *nataranga* are verandas on both sides with three beautiful pillars on either side, the front pair being of a special design rarely seen in other temples. Outside a railed parapet about 41 feet high runs round the front portion up to the plastered walls of the *nataranga*. At some distance from the bottom runs a frieze of Yakshas seated in niches, every alternate figure being placed a little inward.

Above this comes a row of turrets Above this again comes a rail with figures between ornamental double columns which are in a slightly slanting position There are also ornamental bands above and below the rail Opposite the temple is a fine Nandi in a shrine A new inscription was discovered on the base to the left of the entrance It is in praise of one of the sculptors named Bavōja The temple appears to have been built in the first half of the 12th century To the south-west of the temple is a small shrine containing a seated female figure, about 3 feet high, with 4 mutilated hands, which the villagers call Gangāmbika On an elevation close by is the temple of a four handed goddess known as Maradamma. At Davangere a new epigraph was copied at the entrance to the Ānjanēya temple Ānekonda appears to have been a place of some importance at one time Till recently, small gold coins used to be picked up there after heavy rains One of these which was shown to Mr Narasimhachar, late Director of the Archæological Department, has been described by him as a small one, weighing about 3 grains, with a caparisoned elephant on one side and a bird or foliage on the other It probably belongs to the Pāndyas of Uchchangi, which is only 6 miles from Davangere

Dodderi

Dodderi. A village in Challakere taluk, 4 miles east of the *kasba* Population, 1,718.

It was founded by the progenitor of the Nidugal family of chiefs, and it was here that Khāsim Khān, the Mughal governor of Sira, being surprised while conveying a large treasure, by a Mahratta force under Danoji Ghorpada, assisted by the *pālegār* of Chitaldrug, appears to have committed suicide to avoid disgrace His body was afterwards taken to Sira and buried there From this time Dodderi remained in the possession of the Chitaldrug chief until it was taken by Haidar Alī Down to 1882 it gave its name to the taluk now called Challakere, and was long the head-quarters It was once celebrated for its paper manufacture, and the size of the sheets regulated the Dodderi gaz or yard, which was a standard measure of length

Haggari

Haggari The principal stream of this name, sometimes called Hire Haggari by way of distinction, is also known as the Vēdāvati, and is described under that designation

The remaining stream is formed by the outflow of the Anaji tank whence running northwards almost along the boundary it continues in the same direction through the Bellary country to the Tungabhadra.

Harati — A village between Challakere and Hiriyur Harati
about 21 miles to the south of the former place. The head quarters of a line of local chiefs who later occupied Nidugal in the Tumkur District. These chiefs are called in their earlier inscriptions chiefs of Harati Yamangule and in the latter ones of Harati Nidugal. The founder of the family is said by tradition to have come from the Bijapur country and on being granted as an estate the east of the Chitaldrug District built Dodderi and Harati naming them after the towns of his ancestors. At his death he divided his territory among his seven sons who were dispossessed by the Bijapur army when it invaded those parts. The son who lost Dodderi retired to Nidugal which his descendants held till the time of Tipu Sultan who put to death the last representative and added their country to Mysore.

The only inscriptions here that give a connected account of the family are *Hiriyur* 6 dated in 1592 and *Challakere* 38 dated in 1739. In the former we have the following list of *maha nayakacharyas* the succession being from father to son throughout —

Kamru Nayaka	Hottenna Nayaka	Iyavara Dulaj pa Nayaka
Abu Nayaka	Iyavara Deva Nayaka	Dundappa Nayaka
Kamru Nayaka	Basavai Nayaka	Lakshminipati Nayaka
Gudda Brahma Nayaka	Mummadi Brahma Nayaka	Chikka Ranappa Nayaka

In *Challakere* 38 we have —

Immadi Hottenna Nayaka	Vira Timmanna Nayaka
Vira Hottenna Nayaka	Hottenna Nayaka

The variations occurring in many other inscriptions can only be reconciled by supposing that they are members of the different families of the seven sons among whom the possessions were divided. (See also under *Nidugal* in Tumkur District)

Harihar

Harihar A sub-taluk under Davangere taluk Contains the following *hobls*, villages and population —

	Hobls	Villages	Population
1	Harihar	42	18,878
2	Malebennur	44	19,505

Harihar

Harihar An ancient town, situated in $14^{\circ} 31' N$ lat, $75^{\circ} 51' E$ long, on the right bank of the Tungabhadra, at the Mysore and Dharwar frontier Till 1785 it was the headquarters of a taluk bearing the same name, now united to Davangere, from which it is 9 miles west It is a railway station and a Municipality

Population in 1921	Males	Females	Total
Hindus	2,221	2,173	4,394
Muhammadans	732	701	1,433
Christians	19	21	40
Jains	16	10	26
Parsis	1		1
Animists	7	3	10

According to legend, this spot was the capital or stronghold of a giant named Guha or Guhāsura, whose extent was such that its eastern gate was at Uchchangi-durga, the southern at Govinahalu, the western at Mudanur, and the northern at Airani The giant, having by his penance obtained from Brahma the boon of exemption from death at the hands either of Hari (Vishnu) or of Hara (Siva), became in consequence such a tormentor of gods and men that Vishnu and Siva, in order to counteract the spell, combined into one form of Harihara and destroyed him The descent of this incarnation was at Kūdlur, the confluence of the Tungabhadra and the Haridra, where its footprints are still pointed out The expiring giant prayed that the place might be named after him, whence it was called Guhāranya kshētia

There are numerous inscriptions around the great temple the earliest of which (passing over one on copper of the 7th century, which refers to another part) are dated in the 12th century. In the time of the Chalukya kings Harihara appears to have been an ancient *agrahāra* possessed by 101 Brahmins and included in the province of Nannibavadi administered by governors bearing the name of Pāṇḍya. The present highly ornate temple of Hariharēśvara was erected in 1223 by Pōlakṛī a general and minister of the Hoysala king Narasimha II and some additions were made in 1268 by Soma the general under a subsequent king of the same name and dynasty, and the founder of Somnathpur (Mysore District) with its splendid temple. In 1277 Suluva Tikkama commander of the forces of the Devagiri king Ramachandra appears as erecting a temple to Mahadeva in honour of the preceding king so named. Many benefactions were bestowed down to the 16th century by the Vijayanagar kings one of the founders of which line Hikka assumed the name of Harihara Raya.

After the fall of Vijayanagar the place was seized by the Tanjore chiefs who erected the fort. From them it was taken by the Nawab of Savanur who granted it in *jagir* to Shir Khan. While in possession of the Muhammadans the temple was left intact but the roof was used for a mosque a small Saracenic doorway being made into the tower for the pulpit. Harihara was subsequently sold to the chiefs of Bednur for it is said a lakh of rupees. The Mahrattas next held possession until it was subdued by Haider Ali in 1763. Since that time it has been thrice taken by the Mahrattas.

Until 1865 an Indian regiment was stationed in the cantonment two miles north west of Harihar. In 1868 was completed the splendid bridge across the Tungabhadra over which runs the trunk road from Bangalore to Dharwar. It is of stone and brick built in 11 elliptical arches of 60 feet span and cost nearly 3½ lakhs of rupees. There is also now a separate bridge over the river for the railway.

The Harihara temple is a large one in the Hoysala style of architecture, built in 1224 by Pōlālva, a general of the Hoysala king Narasimha II. It has a *garbhagriha* or adytum, a *sukhanasi* or vestibule, a *navaranga* or middle hall and a *mukha-mantapa* or front hall. The image of Harihara, which is about 4 feet high, stands without any *prabhāvali* or glory, the left half representing Vishnu with the Vaishnava attributes, the discus and conch, and the right half, Siva with the Saiva attributes, the trident and rosary. The head wears a crown on the Vishnu side and matted hair and a crescent on the Siva side. The upper two hands rest upon two panels on both sides, the right one containing figures of Pārvatī and Gāṇapati and the left one figures of Lakṣmī and Rishyasringa. Some say that the image, having been mutilated by the Muhammadans, was immersed in water, being replaced by a smaller figure of the same kind, about 1½ feet high, called Chikka Hariharēsvara, and that subsequently it was pieced together and set up again, the smaller image being removed to the small shrine to the north-west of the main temple in which we find it now. The doorway of the *sukhanasi* entrance has ordinary screens at the sides with pairs of *dvārapālakas* below, the left pair holding a discus and a conch and the right pair a drum and a trident. The *navaranga* has also entrances in the north and south in front of which are fine porches with good pillars, door-ways and ceilings. The pillars of the *navaranga* are well executed. The ceilings, though flat, are neatly and delicately carved with rows of lotuses, the central one being sculptured with fine figures of *ashtadīpālakas*. The middle space of the latter is now vacant, the panel containing a figure of Hariharēsvara which was there having been removed. It was this figure that was worshipped for some time in the temple as stated above, and was subsequently set up in the small shrine to the north-west. The *mukha-mantapa* is a grand structure with three entrances in the three directions and a high veranda running all around. There are also two narrow entrances in the north and south at the ends of the *navaranga* front wall. This is peculiar. The ceilings are similar to those of the *navaranga*. Around the *mukha-mantapa* outside runs a railed parapet, about 3½ feet high. At the bottom of this comes a frieze of fine scroll-work with well carved figures in every convolution, above this runs a frieze of elephants, above this again comes figures between pilasters surmounted by miniature turrets and finally runs a

rail with figures between double columns surmounted by a band of ornamental scroll work with figures or flowers in the convolution. Around the *sukhanasi* and *garbhagriha* outside there are friezes of scroll work as elsewhere and of swans. Above the latter at some intervals come figures between pilasters with turrets above. Over the *aces* runs round a parapet containing delicately carved figures of animals, men or gods, the majority consisting of figures of lions attacking elephants. The latter appear to be peculiar to the temples of this part of the country. The top parapet of the front *mantapa* has no sculptures now but only small uncarved blocks of stone which may be supposed to indicate that the portion was either unfinished or subsequently restored. The *Saric me* doorway said to have been made by the Muhammadans into the dome over the image of the god (*Epigraphia Carnatica* Vol. VI Introduction page 32) is no longer in existence, having been removed when the temple was repaired. The *garbhagriha* has a tower built of brick and mortar and three ornamental niches on the outer walls in the three directions with pairs of elephants at the sides. There are two *mahadvaras* one opposite the east entrance and the other opposite the south porch of the *nataranga*. It is said that there was likewise a *mahadvara* opposite the north porch but now we have a cell of *Kalabhairava* in the porch with a fine doorway which blocks the passage. The north porch has two narrow entrances in the east and west. On both sides of the east *mahadvara* stand two ornamental lamp pillars built of separate pieces of stone with stands for lamps jutting out on all sides from the bottom to the top. The temple resembles in several respects the *Kedarvara* and *Kritabhavara* temples at Balgami and Kuppatur. To the left of the temple stands the shrine of *Lakshmi* consisting of a *garbhagriha* and a front *mantapa*. The latter has three entrances and a veranda running all round inside. The ceilings are flat like those of the main temple except the central one which is about 2 feet deep with a big lotus bud in the centre. There are two niches at the sides of the doorway one containing a figure of *Canapati* and the other a *Naga* stone. In the *adytium* we have instead of the original *Lakshmi* a marble figure of *Vabishvasuramardini* about 1½ feet high with eight hands said to have been set up by Subedar *Lakshmana Hari* during the time of the *Peshvas*. Around the *mantapa* outside runs a *jagati* or railed parapet about 6 feet high.

which has no friezes at the bottom, but has in the middle single pilasters surmounted by turrets and at the top a rail with flowers between columns. The shrine has a fine tower built of brick and mortar. It is said that corresponding to this shrine there was a shrine of Pārvati to the right of the temple. This may be true as it is in conformity with the dual nature of the god.

The *Shanbhog* of Harihar, Srinivasa Sitarama Kulakaram, has some old records relating to the temple, one of which says that Tipu broke the images (a large number named) of the temple, carried away its belongings and converted a portion of it into a mosque. He has five *sanads*, 3 issued during the time of Peshwa Bālājī Rao and 2 by Krishna-Rāja-Wodeyar III, as also a brief quasi-historical account of Harihar compiled from old records in 1868. The slabs containing *Davangere* 30 and 59 have at the top a figure of Harihara as in the temple, flanked by Nandi and Garuda on the right and left. The stone containing *Davangere* 39, about 15 feet high, is perhaps the tallest of the inscribed slabs that have been set up in the State. Though the temple was built in 1224, the god of the temple is referred to in several earlier inscriptions. In the inscriptions, Harihar seems to be called Kūdalur as being at the confluence of the Tungabhadra and the Haridra.

Municipal Funds	1918-19	1919-20	1920-21	1921-22	1922-23

Hiriyur

A taluk in the south-east

A glance at the map will show that this taluk represents roughly a triangle, its western base resting on the hills from which the Vēdāvatī river emerges and its apex, some 30 miles north-east on the borders of the Bellary District, not far from Ananthapuram. Area 635.21 square miles.

Head-quarters at Hiriyur Contains the following *hobls*, villages and population —

Hobls	Villages	Hamlets	Villages classified				Population as per Census of 1921

The Vidavati river flows north east through the very heart of this triangle to some distance beyond Hiriyur where it turns north. A dam is put up across the Vidavati river near the narrow gorges at Vanivilasapura. The straight and well defined ridge of hills on the west from which the Vidavati

Physical features

emerges represents roughly the end of the red soil country and the beginning of its somewhat rapid gradation into the long stretches of black cotton soil, which, under a precarious rainfall and owing to their bleak appearance, excepting at crop-time, have earned for the Hiriyur taluk its not wholly deserved bad name. Directly the red soil country is left behind, indeed, wherever black soil is found, a great and a serious change begins. The area of the village unit at once grows larger, the dry crop holdings run to a size found nowhere else in the State and manuring becomes light. The cultivation becomes, in short, the reverse of what is known as close cultivation and a raiyat family can easily cultivate from 18 to 20 acres, or even more.

Crops

Jola, gram and cotton are the chief crops in black soil, bajna or *segge*, in the better, but not necessarily black soil and ragi and the usual miscellaneous assortment in the red soils.

Communications

At the time of the original settlement, *i.e.*, 1868-69, there existed the main road from Bangalore to Harihar and the Tiptur-Bellary road, crossing each other at the town of Hiriyur north-east and north respectively, greatly benefiting the central and open parts of the taluk. Subsequently, a new road has been constructed from Hosdurga to Pavagada, also passing through the town of Hiriyur and known as the Marikanave road. The nearest railway station is at Holalkere, some 15 miles from the extreme western villages. The Hosdurga Road station is somewhat more distant but is more easily reached than Holalkere.

The local markets are not very important. The northern villages benefit from the Davangere market and the Bellary demand, the eastern villages from the large and important market at Ammapur in the Bellary District, and the western and southern villages from their position with reference to Hosdurga, Hiriyur and Holalkere through which the trade of the Nagar-Malnad passes.

The Revenue Settlement was introduced in 1868 and 1869, and the Revision Settlement from 1901-05.

The cultivable area according to Resettlement was distributed as follows —

Occupied as —	Acres
Dry	189 900
Wet	5 117
Garden	8 093
Kharab land	236 856
Inam	1 211

Hiriyur — A town situated in 13° 57' N lat 76° 10' E long on the right bank of the Vedavati at the bifurcation of the Bangalore high road to Bellary and to Chitaldrug. Headquarters of the Hiriyur taluk and a Municipality.

Population in 1911	Males	Females	Total
Hindus	36	120	156
Muslims	73	34	107
Christians	-	4	4
Jains	3	1	4
Total	110	159	269

Hiriyuru the great town was founded apparently in the 16th century by a chief from Mayasamundra named Kesava Nayak the virtue of the spot being discovered by the incident of a hare turning on its hounds. The family of the founder continued in possession for three generations under Nallu Allappa Nayak Kanchappa Nayak who built the big temple and Rangappa Nayak. During this time settlers were encouraged to take up their residence in the town and it reached a prosperous condition. It was then taken first by the Bijapur army and afterwards by the *palegār* of Chitaldrug whose ancestor before coming to power had held the office of Nayak of Hiriyur under the Vijayanagar kings. In 1762 it was captured by Haider Ali and suffered very severely during the subsequent contests of that ruler and the Mahrattas whose devastations brought on a famine which swept off all the inhabitants.

Its unhealthy condition led to an attempt in recent times to remove the town to a higher site on the other side of the river, where the taluk offices have been built, but the people, as usual, are loath to leave the neighbourhood of the ancient temples, one of which, dedicated to Tēru Mallēsvara, has a lofty tower erected by the Chitaldrug *pālegār*. East of the old town the Vēdāvati is bridged for the high road.

The Tērumallēsvara temple abovenamed is a large Dravidian structure with a *mahādvāra* surmounted by a lofty *gōpura*. In front of it is a lofty *uyyāle-kambha* with stout iron chains hanging from the top intended for swinging the god. On the inner sides of the pillars are sculptured two male figures with tilded hands armed with a sword and a shield. The open *mukha-mantapa* or front hall has entrances in three directions. In front of it stands on a high pedestal a fine *dīpastambha* or lamp-pillar, about 45 feet high, with a pavilion at the top enshrining a Basava or bull, and 8 lamps in the form of huge iron cups, two in each direction, each capable of holding about 10 seers of oil. The lamps are lighted once a year. The pillar has slight projections on the sides which serve as steps to go to the top. Its front face has a male figure with folded hands, representing perhaps the chief who built the temple. The ceilings of the *mukha-mantapa* are painted with scenes from the *Sarva-purānas* and the front central ceiling has a chain of stone rings. The east outer wall of the *navaranga* has two rows of figures representing the *ashtadīkṣpālakas* or regents of the directions and illustrating the story of the fight between Siva as a *kīrāta* or hunter and Arjuna. Though the *gōpura* faces east, the god faces south. In the *navaranga* are kept three sets of metallic figures large images of Siva and Pārvatī, small images of the same, and Umāmahēsvara seated on Nandi—which are taken out in procession in three separate cars during the car festival which takes place in the month of *Māgha* (February). This circumstance probably accounts for the name *Tēru* (car)-*mallēsvara*. The ruined Virabhadra temple has figures of Virabhadra and his consort Bhadrakālī, the latter holding in the right lower hand a lotus instead of the usual sword, and Daksha's cut off head being shown at the side. The Kannada poet Babbura, author of *Ambikā-vijaya* and *Parasurāma-Rāmāyana*, was a native of this town and a devotee of the god Ranganātha of Babburu, a village about 2

miles from Hiriyur. He mentions in his works the god Terumal Kesava. Rangadappa the present Shaubhog of Hiriyur who is about 65 years old states that he is the great grandson of Babbura. It is not clear whether the Kannada poet Madhava author of a Kannada version of the *Kavyadarśana* of Dandi who styles himself ruler (*prabhu*) of Hiriyur belonged to this place.

The lab containing the inscription *E C VI* Hiriyur is at this village has a horseman riding to right with a sword held in the uplifted right hand. Behind him is a child standing with three folded hands and behind the child stands a female figure perhaps the wife of the horseman with uplifted right hand. It is not clear what the composition is intended to represent. The inscription merely names a number of *gandas*.

Municipal Funds	1915-16	1916-17	1917-18	1918-19	1919-20

Physical
features

A range of hills extends from south to north till Aīasana-ghatta and a branch of this extends westwards till Rāmagiridurga. Besides this, there are small hills near Kadoor, Rāmagiri and Gunderi.

But for the range and groups of hills above referred to, the tract is gently undulating and comparatively flat. The desolate and arid appearance of the country is relieved by a few areca-nut and cocoa-nut gardens and *shēndi vanams*. There are no forests of any importance though there is some scrub jungle on the hills. Though black cotton soil is found in Rāmagiri and in a few villages of Holalkere hobli, there is a preponderance of red and sandy soils. Good and bad soils are in this tract very intimately interspersed. Excellent grazing ground is met with in the central portion of this tract. The taluk may be taken as a fair specimen of the type of a *maidan* taluk found on the Mysore plateau.

Crops

The crops follow the soils, ragi, javari, gram, and the usual miscellaneous crops being grown in the red or sandy or gravelly soils which preponderate in the taluk. Of the higher garden produce, areca-nut and panvel receive great attention, especially under the large tanks, and cocoa-nut trees are planted to a large extent in low-lying dry crop lands. Rice and sugar-cane are grown in a small proportion, the facilities for their extension being wanting.

The oldest inscriptions in the taluk are Rāshtrakūta, of the 10th century and show this part of the country as being then attached to the government of the Kadambalige Thousand nād. The Chālukyas, the Hoysalas, and the Vijayanagar kings succeeded in turn. Under the two first, the two great provinces of the Nonambavādi 32,000 and the Gangavādi 96,000 are constantly mentioned, and there is reason to believe that their boundaries met somewhere near Rāmagiri.

The Revenue Settlement was introduced in 1868 and the Revision Settlement with effect from the year 1905-06.

The area of the taluk is thus distributed —

Culturable —		Total
Dry	15 574	Acres 163 950
Wet	1 850	
Garden	3 10	
Unarable		209 170
Isam		1 131

The Southern Mahratta railway from Bangalore to Poona runs throughout the west of the taluk from south to north with stations at Bidarkere or Hosdurga Road Ramagiri Holalkere Chikjajur and Sasalu There is a road from Channagiri through Holalkere to Chitaldrug with one from Hulyar through Hosdurga to Davangere most of it close to the railway line There are roads from Hosdurga to the railway at Bidarkere to Ajjampur and to Hiriyur Also a road from Sasalu to Sante Bennur and Sulekere

Holalkere — A town situated in 11°2' N lat 76°15' E long 1 miles east of the Holalkere railway station and 20 miles south west of Chitaldrug on the Chitaldrug Shimoga road Head quarters of the Holalkere taluk and a Municipality

As Holalkere it appears to have been an important Jain settlement in the 10th century The present town seems to have been founded in the 14th century by a Boya Gauda under the protection of the Dharm chief Doddanna Nayak In course of time it fell into the hands of the *paleqars* of Basvapatna and in 1475 Timmanna Nayak the progenitor of the Chitaldrug family obtained from Vijayanagar his

first appointment as Nāyak of Holalkeire It remained in possession of the Chitaldrug family till taken by Haidar Ali, and suffered, in common with all the neighbouring parts, from repeated Mahratta invasions

Its situation on the high road, near the foot of the pass which leads to Chitaldrug, and a large weekly fair combined to make it a thriving town, and its prosperity has been promoted by the advent of the railway and the location here of the taluk head-quarters

The Bail-Ganapati at this place is a huge figure, about 9 feet high, seated on a high pedestal marked with the rat emblem in the open ground enclosed by a low compound

In this taluk the river Vedavathi runs in a direction from south west to north east and falls into the sand Van Vilasa Sagar or Marikanve tank the present name being the former.

The most common dry crops are jola and rigi. Cotton is grown on a small scale. In Hosdurga there are good many weavers and a few brass workers. Bangles or glass bracelets for women are manufactured at Mathlu. Cocoa nut is largely grown in the Srirampur hobli and the chief exports from the taluk are cocoa nuts, chulka and gingelly to outside the province.

There are three rain gauge stations now in the taluk and the average rainfall at Hosdurga for 30 years, at Srirampur for 25 years and at Bagur for 20 years was as follows —

Station	Jan.	Feb	March	April	May	June
1		3	4	5	6	7

Hosur the new hill fort appears to have been erected in 1676 by Chikkanna Nayak the *palegar* of Chitaldrug for the purpose of covering his operations against Bigur the chief town of that quarter then in possession of the Muhammadans and attached to Sirsi. In 1703 a Jangama priest driven out of Bigur took refuge with the Chitaldrug *Palegar* and was by him commissioned to build the *petta* below the hill and procure settlers to reside there. Eventually the place was taken by Huder Ali and with the exception of temporary occupations by the Mahrattas has ever since been attached to Mysore.

10	Sakkō	1519	

Physical
features

The country is gently undulating excepting in the north-west where an insignificant group of hills, chiefly scrub covered but with a small quantity of deciduous forest, occupies a few square miles. Otherwise, Jagalur is the type of *madan* taluk found on the Mysore plateau. About one-quarter of the whole arable area is good black or brown soil, the rest being poor red or sandy. The better soils are in the southern half and in some of the bottoms or valleys in the north-west.

The Janaga-halla, rising from the important tank of Bhimasamudra in the Chitaldrug taluk, flows through a few villages in the extreme east, but, with this exception, the taluk cannot be said to be well watered. Elsewhere a scanty rainfall and deficient natural drainage are eked out by some 33 tanks of which 7 or 8 are fairly large. Somewhat of a watershed runs from south-west to north-east, shedding very minor streams to the north-west and south-east, but these minor streams have proved of considerable use, especially those flowing north-west, admitting of the sinking of a good many wells. The minor streams flowing south-east join the Janaga-halla and are important. Janaga-halla is a small but very important stream, many *kapile* wells being sunk along its banks admitting of good rice and very often double crops.

Crops

The crops follow the soils, cotton with *navane* and the late or white javari being grown in the black and better soils, and the early javari and ragi, with the usual miscellaneous crops in the red soils. Supari, cocoa-nut and panvel representing the higher garden produce, are not cultivated to any great extent, the raiyats preferring to raise rice and sugar-cane, but even these two latter are not grown in any great proportion. Excellent rice crops are obtained on the banks of the Janaga-halla where double cropping is not uncommon.

The Revenue Settlement was introduced in 1867 and the Revision Settlement in 1905-06. The area of the taluk was thus distributed

Railway construction has had marked effect upon the taluk. Although the line does not run very close to the taluk as a whole it is in fair proximity to the western villages whose market has always been Davangere to which trade is, more than ever, being drawn.

The following are the important roads in the taluk —

No.	Name of the road	Length in miles
1	Vijapur Ujjain road	31
2	Nayabandatti-Jaipur road	10
3	Davaniseri-Jaipur road	30

Jagalur — A town situated in $11^{\circ} 31' N$ lat $76^{\circ} 21' E$ long 28 miles north by west of Chitaldrug with which it is connected by a road from Vijapur. Head quarters of the Jagalur taluk and a Municipality.

Population in 1911	Males	Females	Total
Hindus	1 131	1 030	2 161
Muslims	83	1 7	350
Christians	1	0	1
Jains	5	0	5
Animists	19	0	41
Total	1 140	1 037	2 177

The population consists mostly of Lingāyats. There is little of interest about the place, which derives its importance from having the taluk head-quarters removed here from Kankuppa in about 1868. The houses are mostly built of an non-shot and slaty stone, and flat-roofs. Jagalur has a large tank.

The Jogappa shrine at this place has a standing figure, about 3 feet high, of a *rishi*, holding a trident in the right hand and a *kamandalu* or water-vessel in the left. The place takes its name after this *rishi*. A small shrine below a margosa tree has a goddess known as Kemmavva, a seated figure about 1½ feet high, bearing a trident and a drum in the upper hands, whose worship is believed to cure any kind of cough. The goddess in the Udasalamma shrine is a two-armed seated figure, about 2 feet high, with neither pedestal nor attributes—she looks as if hanging in the air. The Lingāyat Kallumatha has the *gaddige* of Tōtada-svāmi, said to have been one of the *svāmis* of the Muragi-matha.

Jatinga
Rāmēśvara

Jatinga Ramesvara Hill, 3,469 feet high, in the Molakalmuru taluk of Chitaldrug District, Mysore, situated in 14° 50' N and 76° 51' E. It is one of the places where edicts of Asōka have been discovered, and consists of a long ridge, having towards the western end an ancient temple of Rāmēśvara, the present building for which was erected in 962 A D.

Marikanive

Marikanive A pass in the eastern line of the Chitaldrug hills, through which the Vēdāvatī issues to the open country of Hriyur. So far back as Buchanan's time it was pointed out as a spot peculiarly favourable for the construction of a dam across the gorge, whereby an immense reservoir would

be formed capable of irrigating the adjoining thirsty plains and converting them into a vast expanse of rice cultivation.

A large artificial lake called the Vani Vilas Sagara has been constructed by putting up a dam across the river at the Marikanive village. The length of the dam is 1330 feet while its height is 162 feet. The lake has a capacity of holding 30 000 millions of cubic feet of water and its catchment area is 2075 square miles. The water spread of the lake is 31 square miles in extent. Two channels—right and left channels—have been excavated to a length of 29 and 30 miles respectively and they have under them nearly 21500 acres of land. The total cost of the whole project is estimated at about Rs 10 lakhs. The reservoir when full becomes one of the largest artificial lakes in the world. There is a furnished Travellers Bungalow close to the dam. The distance from Hosdurga Road railway station the nearest on the main line is 32 miles.

This dam which may be looked upon as a great feat of engineering skill was commenced in August 1898 and completed in August 1907. There are two fine *mantapas* in the Saracenic style built at the ends of the dam. The east *mantapa* has a tablet giving the dates of the commencement and completion of the dam. In the west *mantapa* is set up an inscription in Sanskrit and Kannada verses giving an account of the dam and of the progressive administration of Mysore and the date *Saka* 1828 (1907) in which the reservoir was opened for public use. Close to the reservoir is situated a shrine of Mari known as Kanive Maramma from whom the village derives its name. The shrine which was a wooden structure has recently been built of dressed stone by one Kannappa of Mysore. It has a stone panel sculptured with three figures Parvati in the middle Lakshmi to the right and Mari to the left. To the right of the shrine on a lower level is a cell containing a broken *tergal* which is known as Bhutappa. At Bharinagundi there is a shrine at Arasinagundi dedicated to Mari here known as Kannevamma which contains the processional image in the shape of a box of the goddess at Marikanive. In front of it is an iron lamp on a shaft about 8 feet high which is lighted once a year. At some distance from the shrine stands in a field a *mastikal* carved with a fine female figure about 2½ feet high with its right

hand raised and open and the left hand hanging by the side holding a lime, flames being shown around the head

Masakal

Masakal A village in Hiriyur taluk Population, 1,218
This place was once fortified, two lofty gateways with wooden ceilings bear evidence to the importance of the village at one time

Mattod

Mattod A village in the Hosdurga taluk, 10 miles east of the *kasba*, near the right bank of the Vēdāvati Population, 1,032

It is celebrated for its glass works, at one time more extensive than they are now The articles made consist entirely of bangles, the rings worn round the wrists of Indian women They are of five colours—black, green, red, blue and yellow The furnaces are constructed in a high terrace, built against the inside of the fort wall, but many of them seem to have long been disused Only two are now in good repair The process of manufacture is described in the first part of this work All the materials are found in the neighbourhood.

Mattod was the seat of a line of *pālegāns*, whose founder was named Giryappa-Nāyak He was a handsome man, of great stature and prodigious strength, which he exercised in catching the wild beasts of the neighbourhood Venkatapati Rāya, hearing of him through the Budihāl chief, sent for him to Penugonda, where, an elephant one day breaking loose, he had an opportunity of displaying his powers, for the infuriated animal could not be secured until Giryappa-Nāyak boldly seized him by the tusks and fastened a rope to his trunk For these and other feats, he was, about 1604, made *pālegān* of Lakavanhalli, his native place, with a grant of villages yielding a revenue of 9,000 pagodas In 1710, Dodala-Nāyak, a descendant, built the fort of Mattod He at the same time adopted the Lingūyat faith His son, Sangappa-Nāyak, distinguished himself at the court of Seringapatam by riding a most vicious and unmanageable horse which would allow no one to mount it, and when the courtiers, jealous of his success, pelted him with limes to embarrass him, he drew a sword and divided them as he rode swiftly about after them

Halappa Nayak next succeeded and after him Siddappa Nayak. He was the second son but inherited the beauty, stature and prowess of his line on which account his father had allowed him to supersede the eldest son Dodala Nayak. The latter thereupon repaired to Chitaldrug, the *palegar* of which took up his cause and defeating the younger brother installed the elder in his place subject to a tribute of 2600 pagodas. On Siddappa Nayak being taken prisoner to Chitaldrug, the daughter of the *palegar* of that place fell in love with him. His being a fugitive would have made their union impossible had he not been a Bova by descent. Eventually it was arranged that he should marry her and be restored to his government. His son Halappa Nayak was induced by the growing power of Haidar Ali to assist the latter in the first siege against Chitaldrug. On Haidar's withdrawal the *palegar* of Chitaldrug in revenge took Mattod by a night, plundered the town and carried Halappa off to prison. Chitaldrug was next near taken by Haidar and Halappa released but he never regained his territory.

In *Holalkere* 36 Mattod is called *Mattedu* and *Mattinadu*. In several inscriptions found in the district a slightly different version of the Mattod family is given. In the inscription above referred to the founder of the family is named as Halappa and described as a handsome and high born personage—according to tradition these chiefs were renowned for their stature and good looks—and as well versed in the *Sama Sstras*. He is described as a contemporary of Harikara (11th century). His palace at Mattodu had walls the colour of gold and adorned with all manner of paintings. His son was Duddanna (1672) whose son was Sangappa whose son was Hala Raja (1707-1736) whose sons were Siddarama and Doddanna. The first Doddanna—son of the first Halappa—founded the *agrarah* of Ganjigera referred to in *Holalkere* 96 dated in 1736 and in 1772 on the occasion of the marriage festival of his eldest son remitted the tax payable by barbers (*Holalkere* 98). Halappa built and endowed a *matha* for the Murige svami at Mattinadu in 1707 (*Holalkere* 101). In 1736 Halappa rebuilt the *agrarah* which had gone to ruins and restored the tank which had breached. The name of the *agrarah* was subsequently changed to Narasapura (*Holalkere* 96).

Molakal-
muru

Molakalmuru This is the northernmost taluk of the State. In 1875, the taluk of Molakalmuru was abolished and added on to the Challakere taluk, and in 1882 it was formed into a Sub-Taluk named Hangal, under Challakere taluk, and continued as such till 1886, when it was reconstituted into a taluk with its old name of Molakalmuru. An isolated village to the south-west, Maleboranhatti, was then transferred to the Challakere taluk. Area 294 square miles. Contains the following *hoblis*, villages and population:—

Hoblis	Villages	Hamlets	Villages classified			Population
			Government	Sarvamanya	Jodi	
1 Devasamudra	52	11	48	2	2	15,785

Physical
aspects

The taluk abounds with ranges of rocky hills of de olute appearance, the important one being the range of rocky hills of considerable height which stretches across the northern portion of the taluk, running in a south-easterly to a north-westerly direction, another range running across to the north of Molakalmuru, the head-quarters of the taluk.

There are also rocky hills in the south eastern corner of the taluk. Though these hills are generally so barren that no grass or trees will grow on their sides their importance cannot be under rated as they catch the drainage and increase the water supply of the low lying tracts. The southern and north eastern portions of the taluk are gently undulating and comparatively level. Except the *Hammar* plantation in the south which is about 3 square miles and the avenues on both sides of the provincial road to Bellary the taluk may be said to be treeless black and barren in appearance which is intensified by bare and rocky hills of fantastic appearance. The absence of Date Bums is another peculiar feature of this taluk.

The Jinagihalli receiving the main drainage flows along part of the western boundary of the taluk and then cuts across the centre of the taluk in a north easterly direction debouching eventually into the Haggari or Vedavati river in the Bellary District. Two fair sized important hill streams which take their rise in the range of hills in the north west of the taluk run across the taluk from west to east and flow into the Jinagihalli about a mile beyond the boundary of the taluk. Several other minor streams also find their way into the Jinagihalli. There is also another hill stream which rises in the south eastern hills of the taluk and flows in a south easterly direction for about five miles and eventually feeds the Gourasannudra tank of the Challakere taluk. The important tanks fed by the channels drawn by throwing *anicuts* or bunds across the Jinagihalli or Chik Haggari which receives the main drainage of the taluk are close to the river. Besides these channels there are *talaparige* (spring) channels led off from the river to irrigate wet lands. The importance of the streams as irrigational sources in an arid tract like this cannot be under rated.

The chief dry crops are *sajje jola* and *kulthi ragi uavane*. Crop castor oil gingelly and cotton are also raised. The chief crop raised under irrigation is paddy wheat ragi tobacco

jola, navane and sugar-cane take minor place. Onions are extensively cultivated under well irrigation. Betel leaf is extensively cultivated in Rāmpur and Dēvasamudra and a few villages around. Supari and cocoa-nut gardens are found in Konasagara, which is the only village noted for its high cultivation of "Dhruvapauu" gardens. Cocoa-nut gardens have sprung into existence along the hill stream which flows through the southernmost portion of the taluk.

Industry

Silk cloths, both superior and inferior, *panches* and *saries* are turned out of the looms at Molakalmuru. Common *saries* and *panches* for the middle classes are also made in Dēvasamudra and Sherikola.

History

This part of Mysore has acquired a special interest from the discovery here by Mr. Rice in 1892 of the Edicts of Asōka. None had ever been found before in the south of India, and this find was pronounced by high authority as marking an epoch in Indian archæology. It effectually lifts the veil which has obscured the ancient history, and leaves no doubt that the Maurya empire of the 3rd century B.C. extended as far as to include the north of the Mysore country. The Edicts found were in three places, close around the village of Siddapura (possibly the Isila to which the Edicts were addressed), engraved on rocks on either side of the Janagahalla—one at Brahmagiri, another at the Timmanna rocks, and the third at the top of the Jatinga Rāmēwara hill. Here Jatāyu is said to have fallen in attempting to rescue Sita from Rāvana.

The next oldest inscriptions in the taluk are also at the latter place and at the Nunke Bhairava hill. Those of the former are Chālukya of the 10th and 11th centuries, and show us Vishnuvardhana Vijayāditya ruling the Nolambavādi 32,000, which thus included Molakalmuru, with its capital at Kampili, on the Tungabhadra in the Bellary District. He was followed by Jayasingha, younger brother of Vijayamāditya VI, and having, among others, the titles of *Vajra* &c.

Pallava The inscriptions at the Nunke Bhairava hill are Kadamba and it is possible that the Uchchangidurga to the north of Molakalmuru also known as Hire Arjuna durga hill fort of the old Aris may be the Uchchasingi which was one of the Kadamba seats of government. In the time of the Hoysalas we find a line of rulers of the Solar race that is of Chola descent who held Nidugal in possession of Haneyakote which was then the name of the Brahmagiri fort and of which there is perhaps a remembrance in Hangal or Haneyagil. The fort was captured in the 12th century by Varu Bellala who changed the name to Vijayagiri.

Under the Vijayanagar Kings in the 15th century Molakalmuru seems to have belonged to the chiefs of Rayadurga 7 miles to the east. One of them named Bomma Nayaka the Ioolish gave it up to Mallappa Nuyak of Hatti (now called Nayakanhatti) in exchange for some white cattle of which he owned a rare and valuable breed. It was before long conquered by the *palegars* of Chitaldrug in whose hands it remained till captured by Haider Ali and annexed to Mysore.

The Revenue Settlement was introduced in 1872 and the Revision Settlement in 1907-08. The area of the taluk at the time of Revision Settlement was thus distributed --

<i>Culturable</i>		Total
Occupied	Dry 270 }	Acrea

		<hr/>
Total		181579

The Bangalore Bellary high road runs throughout the taluk from south to north with a road from Hangal east to Molakalmuru and Rayadurga. Excepting the villages in the proximity of these roads the other villages make use of the numerous cart tracks which are available for traffic in fair

weather for carrying their surplus produces to the large market of Bellary which is a railway station and is about 15 miles from the northern frontier of the taluk. The road from Hangal to Rāyadurga has also become important as Rāyadurga is an important market and railway station as the terminus of the feeder railway from Bellary to Rāyadurga.

Molakal-
muru

Molakalmuru A town situated in $14^{\circ} 44' N$ lat, $76^{\circ} 48' E$ long, 38 miles south of the railway at Bellary, on a cross-road from Hangal, which is on the Bangalore-Bellary high-road, to Rāyadurga. Head-quarters of the Molakalmuru taluk, and a Municipality.

Population in 1921	Males	Females	Total
Hindus	1,331	1,270	2,601
Muhammadans	379	368	747
Christians	6	5	11
Total	1,716	1,643	3,359

The place is entirely surrounded by barren stony hills, among which, just above the town to the north, is a large reservoir, constructed by the Hatti chief in the name of his mother. Near to it a good echo is obtained from the *lūguva bande* or shouting stone, and in the east of it is a boulder on which is inscribed a *yamaka* verse in praise of Kāhdāsa.

This curious *Yamaka* verse is engraved across the legs of an elephant (*Kunjarām*—the first word) drawn on the rock near this tank. It is registered as inscription No. 39 in Molakalmuru Taluk, Chitaldrug District (*EC XI*). The words of the *Yamaka* verse are to be read as follows —

Kam jaram puri tā indram
Chamahodā āhsadāhka
Kāhdāsa hda ahō machandram
tēipu—ranjakam

The translation as given by Mr. Rice is as follows —“Lo ! Pleasure-giving Kāhdāsa, thy soul rejoicing poetry confers happiness, victory and wealth, and gives joy even to enemies,

in this city (or in regard to my body) thy compassion is conspicuous over the most highly esteemed among the company of poets (EC VI Trans 96) The date when this verse inscription was engraved is not known and the reason why it is inscribed here is also not quite apparent Mr Rico has suggested that it might perhaps have been suggested by the interpretation *murkha* given by Katyayana for *Devanampriya* which was a title of Asoka As will be seen the verse is in praise of the poet Kalidasa and reads the same forwards or backwards Pandit Rajagopalacharya who was consulted by Mr Rice remarked that it can be arranged in four kinds of *bandha* and in various other skilful modes The one given is the most obvious and straightforward He also says that the following were the circumstances under which it was originally composed as related in the *Bhojaprabandha* — Bhoja's queen was one day closed with her *guru* who was telling her fortune from her hand when the king unexpectedly arrived on which she called out *murkha si gachchha Bhoja tam* (you are a fool go away Bhoja) Annoyed at this rebuff he went into his court and in vexation repeated to every one who came near him *murkha si* (you are a fool) Among the 6 to whom he said this was the poet Kalidasa who replied —

khadan na y sy uni hasan na bhash gatam na sochimi kritam
smarami
 dvayos tritiyo na bhavami rajan katha ny aham Bhoja bhavami
 mārkkhah

(I do not go along eating I do not speak laughing I do not lament what is gone I remember what is done among two I do not become a third — say then king Bhoja how am I a fool?) Recognizing from these descriptions that his entry into the queen's apartment was under the circumstances foolish the king uttered the *yamaka* verse *kanjaram* etc of the inscription To which Kalidasa replied with another complimentary *yamaka* as follows —

Bhoja R ja mahideva K lidasa manohara
 raha nō masadalka vad ham Aja raja bho

the syllables reading the same forwards or backwards

To the north west of the *Yamaka* boulder is the Nunke Bhairava hill on which in a remarkable enclosed valley or ravine with no visible outlet at either end is an ancient

temple of that name, served by a succession of Gosāyins from Northern India. Inscriptions show that the proper name of the god is Lunkēsvara, and it appears to have been set up in the 10th century by a Kadamba prince. The Kadambas also had a fort here called the Lunkeya-kōte. This fort Lunka, referred to in the Kadamba records (*Molakalmuru* 41 dated in 1100 A D), was immediately to the north of Molakalmuru and the temple of Nunke Bhairava, as it is called, is in a rocky ravine near where this inscription is engraved.

The ancient history has been given under the taluk. In modern times, under the Vijayangar State, it belonged to the chief of Rāyḍurga, 7 miles to the east. After the fall of Vijayanagar, the Rāyḍurga *pālegār* Bomma-Nāyak, surnamed the Foolish, gave up Molakalmuru to Mallappa-Nāyak of Hatti (now called Nāyakanhatti) in exchange for some white cattle, of which he owned a rare and valuable breed. Mallappa-Nāyak, finding water on the hill, fortified it and lived there. But in the time of his son, the place was taken by the *pālegār* of Chitaldrug, in whose family it remained till captured by Haider Ali and annexed to Mysore.

Nanditavare

Nanditavare A village 8 miles from Harihal. Population, 396.

The Isvara temple here is worthy of note. It is a small neat structure in the Hoysala style. The *garbhagrīha* and *sukhanasi* are intact, but the *navanaga* has been restored with mud walls. The god is named Amṛtalingamanikēsvara in *Davangere* 69, of 1920. The temple appears to have been built at about that period. The lintel of the *sukhanasi* door-way has a figure of Tāndavēsvara in the middle flanked by Brahma and Vishnu on the right and left. In a niche to the left of this

door way is a good figure of Mahasuramardini. There is now no nicho to the right though a mutilated figure of Ganapati which once occupied it is lying there. Other figures found in the *nataranga* are Sarasvati and Saptamatrikah to the right and Subrahmanya Umamahesvara and Nigadampati to the left. In a cell to the left stands a fine figure of Vishnu about 4½ feet high flanked by 2 pairs of female figures one pair bearing *chauris* and the other pitchers. Beyond the female figures there is also on the right a figure of Garuda and on the left a figure of man standing with uplifted hand with an elephant behind. The central ceiling has delicately carved figures of *ashtadik palakas*. Opposite the temple is a large Nandi enclosed in a shrine. The outer walls of the *garbhagriha* and *sukhanasi* have sculptures on them. A row of large figures mostly mutilated runs round in the temple. The figures are 35 in number 14 being female. The gods represented are Siva Ganapati Virabhadra Hanuman and the robed Dakshinamurti with his companion Mohini. Above this row is a fine cornice with bead work. Below the row of figures runs a delicately executed frieze of foliage and between this and another similar frieze come finely carved figures of lions attacking elephants etc. as in the top parapet of the Hariharesvara temple at Harihar. There are also similar figures at the top but they are roughly worked. Around the *garbhagriha* are three fine niches in the three directions with turrets above and female *chauri* bearers at the sides. The north has a broken figure of Durga the other two being empty. In this temple is kept an ornamental wooden frame named *Elechattu* mounted on small wheels and decorated with five knobs at the top. It is about 3½ by 2 broad with ornamental borders and rows of small cavities all over the front surface. It is said that those who grow the betel vine in order to guard the leaves against disease and insect pests vow to the god of the temple that they would worship the frame and give doles of rice etc. to the *pujari* and that in fulfilment of the vow they insert numbers of betel leaves in each cavity of the frame tying at the same time large quantities of the same to the knobs at the top and move the frame side ways on the wheels. The number of leaves required for the purpose is above 2 000. After the *puya* or worship is over the leaves are said to be distributed among the villagers. They say the worship of the frame takes place almost every year.

Nayakan-
hatti

Nayakanhatti Formerly called Hatti, a large village in the Challakere taluk, 14 miles north-west of the *lasba* Population, 2,704

The traditional history of this place relates that one Kotte Malla Nāyak, the owner of numerous flocks and herds of superior cattle, living in the forests of Kara-male and Komma-male, to the east of the Srīsaila mountains, was compelled by drought and famine to move elsewhere in quest of forage. He ultimately arrived, with 1,200 head of cattle, besides cows and sheep, in the neighbourhood of Hatti, where, finding abundant pasturage, he settled, obtaining permission from Vijayanagar to clear some of the forest, erect villages and bring the region under cultivation. A *bhāt* or eulogist one day visited him, and was so liberally rewarded for his flattering verses that on repairing to court he extolled the Nāyak in such extravagant terms as to excite the jealousy of the king, who sent a force to apprehend him. Mallappa-Nāyak, having no other resource, urged his cattle to charge the troops which were completely routed by these novel defenders. The king, indignant at the repulse, offered a large reward to any one who would bring the Nāyak prisoner to him, but none would venture. Finally, some courtesans undertook the task, but failed with all their seductive arts to get him into their power. Surprised at their failure, they questioned the genuineness of his virtue unless it could stand the test that all his cattle would run to him at the sound of his voice. He immediately mounted on a rock and called out in his usual manner, when all the herds and flocks ran and assembled round him. The report of the courtesans aroused the highest respect for Malla-Nāyak on the part of the king, who conferred on him all the country round Kondarpi-durga, with the title of *pālegār*.

One of his descendants, in the third generation, separated with his cattle from the others and founded Hatti as a residence for himself. At a later time, Budi-Malla-Nāyak of this family rendered important military aid to Vijayanagar, and, by victory over a *jetti* or wrestler at court, obtained the name of Bhīma, and thereupon built Bhīmankele. Afterwards, when Bomma Nāyak the Foolish was *pālegār* of Rāyadurga, Malla-Nāyak at his request gave him 2,000 red and 1,000 white cattle, and received in exchange the hill of Molakalmuru. This he fortified and thence extended his possessions, but in the time of his son it was seized

by Barmappa Nayak of Chitaldrug who confined the *palejar* to his original estate at Hatti. This too was shortly taken by Hiri Madikeri Nayak and annexed to Chitaldrug of which it remained a part till captured by Haider Ali.

The chiefs of this place are referred to in a couple of inscriptions found in the District *Molakalmuru* 37 and 38 dated in about 1620 and 1621 in which Hatti Mallappa Nayak's son Katur Mallappa Nayak is mentioned. This Hatti Mallappa was probably the Malla Nayak above stated who obtained Molakalmuru. His mother was Lakshminamma Nayati perhaps of the Chitaldrug family as her son adopts the prefix *Katur*. The tank to the north of Molakalmuru was dug about 1620 and named after her by her son Mallappa—(See *Molakalmuru*).

Nayakanhatti contains a celebrated tomb and temple dedicated to a Maha puruṣa or saint of the Lingavats named Tippe Rudraraya who lived about 200 years ago wrought miracles and became the spiritual preceptor of the Hatti *palegars*. The large sums be-towed upon him by the faithful he devoted to the enlargement and repair of tanks and to other works of public benefit which entitled his name to be held in honour.

Nirgunda — A village in the Hosdurga taluk 7 miles west of the *kasba*. Population 101.

This now insignificant village is interesting as marking the site of one of the most ancient cities in Mysore of which there is authentic record. Nirgunḍa was the capital of a Jain principality of the same name included in the Ganga empire 1500 years ago. According to tradition it was founded in B.C. 160 by a king from the north named Nila khara son of Rājā Paramavara Rāja who gave it the name of Nilavati patna. He was succeeded by Viras khara and their descendants continued to be independent sovereigns of their country.

From the Nagamangala plates we know that Dundu with the title of Nirgunda Yuta Rāja and after him his son Parama Gulu with the title of Sri Prithvi Nirgunda Rāja ruled early in the 8th century. The legend of the place proceeds to the reign of Vikrama Rāja of this House in whose time occurred a romantic incident. Two princes Soma khara and Chitrakhara son of Vajra Mahā Rāja came secretly to Nilavati from Ratnapuri (near Lakvali Kādur District) for the purpose of securing for the younger the hand of Rathnavati or Rupavati the king's

daughter, famous for her beauty. Having rendered themselves invisible, they penetrated at night to the king's bed-chamber and attached to his arm a paper containing their demand. The king on discovering it was much perplexed, but a lion having taken refuge in a pleasure garden near the town and become a terror to the people, he caused it to be proclaimed that the princess would be given in marriage to whomsoever should destroy the lion. The two brothers, who lodged in disguise at a dancing-girl's house, sallied forth next night, killed the beast and, cutting off its tail, returned to their concealment. In the morning, Māra, a washerman of the town, finding the lion dead, cut out its tongue, and carrying it to the king, presented himself as the champion to be rewarded with the hand of the princess. While preparations for this distasteful marriage were going on, the princes appeared before the palace in the guise of strolling musicians, with the lion's tail tied to their lute. This drew attention to them and the truth came out, which ended in Ratnāvati being married to Chitrasēkhara. Vikrama Rāya, dying without issue, left the kingdom to his son-in-law. His descendants were Bala Vīra and Narasimha. About this time, the Hoysala kings captured Nilavati, and some epidemic seems to have led to its desertion soon after. Bāgūr, a short distance to the north, was subsequently founded, and became the capital of the region in place of Nirgunda or Nilavati. Mounds of ruins and several old temples are still in existence around the village, with an old Hoysala inscription of 1065.

Nunke
Bhairava

Nunke Bhairava A bare rocky hill, 3,022 feet high, in the north-east of Chitaldrug District, situated in $14^{\circ} 44' N$ and $76^{\circ} 47' E$. The Kadambas had a fort here called Lunkeya-kote. In a remarkable enclosed ravine on this hill, with no visible outlet at either end, is an ancient temple of Nunke Bhairava or Lunkēśvara, built by a Kadamba prince in the tenth century. It is served by a succession of Gosains from Northern India.

Siddapura

Siddapura A village in the Molakalmuru taluk. Population, 561.

The *baṣṭi* temple here is a neat little building at the foot of the Brahmagiri hill in which there is a Jaina image seated with

[illegible]

How the discovery of the script came to be made may best be told in Mr. Hume's own words. The discovery was on the 17th inst. of 1871. My people were all much fatigued with a long period of travel and I had spent my last rupee. I was therefore thinking of leaving Melakalmuru as not promising any script of importance. But fortune was in my favour and I procured immediately an excursion to Bellary. In order to make the discovery public as soon as possible it was communicated to the Editor of *The Madras Mail* who at once received it with interest and informed me that by the next morning it would be known at every breakfast table in England. I soon received hearty congratulations from all sides from the veteran archaeologist General Sir Alexander Cunningham from Dr. G. P. Fisher and many other learned and interested inquirers all eager to know the particulars.

The Jatingarudāvara Bhāgavata Sūtra and Virabhadra temples contain inscriptions, or near the main entrance one

on the Nāgarpade rock and five on the bells and gong of the Jatingarāmēśvara temple. This temple is an old one as a reference to its renovation is made in an inscription dated 962 A.D. A brick temple formerly, it was converted into a stone temple in that year. The above inscription also tells us that it was here that Jatāyu was killed by Rāvana. The prefix Jatinga in the name Jatingarāmēśvara is a corruption of Jatāyu. There is also a temple dedicated to Jatāyu on an adjacent peak which is loftier and steeper than this.

At the beginning of the flight of steps leading to the top of the Jatingarāmēśvara hill, is a ruined temple dedicated to Ganēsha, built of large-sized old bricks, about 12 inches long, 8 inches broad and 3 inches thick. The bricks are neater, though smaller, than those found at Chitaldrug. The Ganēsha here has only two hands, which is considered a peculiarity.

On Brahmagiri are the Trisankēśvara temple and the Mahal. An inscription at the temple tells us that one Bichana, the minister of Bamma, who was the son of Bhōganripa, built the Haneya, (i.e., Siddapura) and the Nidugal forts. The Mahal is a neatly built two-storeyed house, about 50' by 50', the lower portion being built of stone and the upper storey terraced. It is a picturesque building occupying a romantic position on the top of the hill and presenting a very imposing appearance. It was built by a Langāyat guru some 77 years ago and the guru died some 37 years ago. The house was, it appears, well furnished with chairs, sofas, etc., and even with a piano. On his death, the Ayya of Eradukere, Rāyadurga Taluk, is said to have removed many valuable things found in the Mahal under the plea that he was the guru of the deceased. The latter is said to have led a pure and pious life and to have spent large sums of money in feeding people of his own sect and others, especially on the *Sivarātri* day.

Turuvanūr

Turuvanur Town in the Chitaldrug taluk of Chitaldrug District, Mysore, situated in 14° 24' N and 76° 26' E, 11 miles north by east of Chitaldrug town. Population (1901), 5,035. The people are largely engaged in the weaving of blankets and cotton cloths. Dyers in red also carry on their trade. The municipality was formed in 1899. The receipts and expenditure for two years ending 1901 averaged Rs. 600 and Rs. 200. In 1903-04, they were Rs. 800 and Rs. 2,000.

Vedavati—Vēdavati or Haggari the principal river in the District a tributary of the Tungabhadra. It is formed by two streams having their sources on the eastern side of the Chandra Drona or Babu Budan mountains (Kadur District). The Veda which is the chief one forms the beautiful Vyikere lake whence issuing it passes to the south of Sikkareputur and then turns north east. Near Kadur it is joined by the other stream the Vati and further on by those streams from the hills near Halkid and Harnahab on the south and those from the hills around Ubram on the north.

With a direct north east course the Vedavati now enters the Chitaldrug District passing about midway between Hosdurga and Mattod and penetrating the central belt of hills it issues thence by the pass called the Miri Kanive to the south of Bramagurudurga and continues in the same direction past Hiriyur to about seven miles beyond. Here on receiving the streams from Sira and Haglavadi it turns northwards taking the name Haggari said to be derived from *haggi-ari* freeing from the bonds (of sin). Winding through an open country it leaves Mysore about 5 miles north of Ghatapirtim Challakere taluk and enters the Bellary District with for some distance a north east course. It then again turns north and at a point nearly parallel with the further limit of Mysore on that side receives the Janagahalla or Chinna Haggari from Molakalmuru. Continuing north and leaving Bellary about 10 miles to the west it flows into the Tungabhadra some distance to the south of Huchahalli. It is a very shallow river and though impassable except by boats in the monsoon in the dry season it presents a broad bed of sand in which however *lapile* wells are readily formed. In the Bellary country the river is supposed to be gradually changing its bed. At Mol a 12 miles from Bellary the sandy bed is two miles broad. The river is bridged for the trunk road at Hiriyur (the first bridge erected in Mysore under the British Government) and for the Bellary Branch railway at Permadavanahalli.

A greater number of small channels are drawn from the Vedavati in the Kadur District.
